EXECUTIVE SUMMARY

BSK Associates (BSK) has performed a Phase I Environmental Site Assessment (ESA) with Title 5 Environmental Hazardous Review and Limited Phase II Investigation at the Subject Property listed as Fresno County Assessor Parcel Numbers (APNs) 053-130-12T & 053-130-82T, in Riverdale, California (Subject Property, Figure 1). The Subject Property is approximately 21.5-acres. The Subject Property includes the Riverdale High School stadium, baseball/softball fields, agricultural barn area, agricultural field, parking lot, and a portion of a detention basin. It is BSK's understanding that the Subject Property's intended use will be to renovate the sports stadium, construct three soccer fields, and build a new animal barn building within the existing school property. This project will be broken out into three (3) stages:

- Stage 1: Renovate existing high school football/soccer and track stadium and reconstruct a parking lot. Soil from the soil berms surrounding the stadium will be staged and used in Stage 2. Please note, the District intends to utilize a portion of the Stage 2 area during construction of Stage 1 for construction staging.
- Stage 2: Construct three new multi-use athletic fields, demolish the existing ag barn building, reconstruct South Hazel Avenue, add sidewalk and parking on the east side of Hazel Avenue, and expand the existing campus detention basin. This stage will utilize soil from the soil berms surrounding the stadium (Stage 1) and soil that is excavated during the expansion of the campus detention basin (Stage 2).
- Stage 3: Construct a new Agricultural Education Barn Facility, a small bathroom building.

Please note, only Stage 3 has the potential to receive state funding in the form of local control funding formula (LCFF) funding. Therefore, per the Department of Toxic Substance's letter dated January 17, 2025, this is the only stage of the project that would be subject to the requirements of Education Code §17210, §17213.1, and §17213.2. The different stages are shown on Figures 2a, 2b, 2c, and Figures 3a, 3b, 3c.

This document has been prepared in general accordance with ASTM E1527-21 and as such, examines the Subject Property history and surrounding land uses. The purpose of this Phase I ESA was to examine historic land uses on and in the vicinity of the Subject Property in an effort to identify Recognized Environmental Conditions (RECs), Controlled RECs (CRECs), and Historic RECs (HRECs).

The Phase I study includes a comprehensive review of available private and regulatory records, Subject Property inspections, and interviews with those having specific knowledge of the Subject Property history. After conducting this review, BSK identified 10 RECs in connection with the Subject Property. BSK identified 7 RECs, 0 CRECs, 0 HRECs, and 1 Vapor Encroachment Concern (VEC) in the vicinity of the Subject Property.

The Phase I also included some supplemental items not required by the ASTM Standard but required per California Code of Regulation, Section 69104, subsection (d) for the assessment of school sites. Those items are detailed in Section 3 of this report. BSK does not have any concern as it relates to those items.

BSK also sampled the near-surface soil within the Subject Property for residual agricultural chemicals in accordance with the State of California Department of Toxic Substances Control's (DTSC's) Interim Guidance for Sampling Agricultural Properties, Third Revision dated August 7, 2008. On April 1 and 2, 2025, BSK's Jill Vieira obtained 35 soil samples from a depth of approximately 0 - 6 inches in 35 boring locations. An additional eight soil samples were collected from a depth of approximately 0 - 6 inches in 8 boring locations on July 2, 2025. Organochlorine Pesticides were not found in soil samples collected at the Subject Property above laboratory reporting limits, with the exception of 4,4'-DDE in two samples (Composite 7 and its duplicate sample), however, the concentrations of 4,4'-DDE that were detected were below the DTSC Screening Level for residential use. The two samples that had the 4,4'-DDE detections (Composite 7 and its duplicate sample) were collected from outside of the project area and one portion of the 4-point composite collected within Stage 1 of the project area (see Figure 4A). Arsenic was detected above the DTSC Screening Levels for Residential land use throughout the Subject Property. However, naturally occurring arsenic is a common element in rock and sediment documented throughout California and the concentrations detected are below the 95th percentile value of 12.6 mg/kg based on background arsenic concentrations in soil from 0 to 3 ft below ground surface (bgs) (Hunter, Davis and Roach, 2005). It is also BSK's professional experience that soils in the general vicinity of the Subject Property typically contain similar concentrations of arsenic.

A detailed description of the investigation process, property description, findings, and limitations is included in the following Report.

1 INTRODUCTION

BSK Associates (BSK) has performed a Phase I Environmental Site Assessment (ESA) with Title 5 Environmental Hazardous Review**,** and a limited Phase II Investigation at the Subject Property listed as Fresno County APNs 053-130-12T & 053-130-82T in Riverdale, California (Subject Property, Figure 1). The Subject Property is approximately 21.5-acres and includes the Riverdale High School stadium, baseball/softball fields, agricultural barn area, agricultural field, parking lot, and a portion of a detention basin. It is BSK's understanding that the Subject Property's intended use will be to renovate the sports stadium, construct three soccer fields, and build a new animal barn building within the existing school property. This project will be broken out into three (3) stages:

- Stage 1: Renovate existing high school football/soccer and track stadium and reconstruct a parking lot. Soil from the soil berms surrounding the stadium will be staged and used in Stage 2. Please note, the District intends to utilize a portion of the Stage 2 area during construction of Stage 1 for construction staging.
- Stage 2: Construct three new multi-use athletic fields, demolish the existing ag barn building, reconstruct South Hazel Avenue, add sidewalk and parking on the east side of Hazel Avenue, and expand the existing campus detention basin. This stage will utilize soil from the soil berms surrounding the stadium (Stage 1) and soil that is excavated during the expansion of the campus detention basin (Stage 2).
- Stage 3: Construct a new Agricultural Education Barn Facility, a small bathroom building.

Please note, only Stage 3 has the potential to receive state funding in the form of local control funding formula (LCFF) funding. Therefore, per the Department of Toxic Substance's letter dated January 17, 2025, this is the only stage of the project that would be subject to the requirements of Education Code §17210, §17213.1, and §17213.2. The different stages are shown on Figure 2a, 2b, 2c, and Figure 3a, 3b, 3c.

2 PHASE I ENVIRONMENTAL SITE ASSESSMENT

2.1 Purpose

The purpose of this Phase I ESA was to examine historic land uses on and in the vicinity of the Subject Property in an effort to identify RECs, CRECs and HRECs.

The term Recognized Environmental Condition (REC) is defined as "the presence of hazardous substances or petroleum products in , on, or at the Subject Property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum

products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment." (ASTM E 1527-21, pp. 1).

A Controlled REC is defined as "a REC affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls." (ASTM E 1527-21, pp. 4)

A Historic REC (HREC) is "a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls." (ASTM E 1527-21, pp. 6)

2.2 Scope of Services

BSK conducted this ESA in accordance with the methods described in the American Society for Testing and Materials (ASTM) Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.* The scope of services provided for this ESA included:

- A general description of the property
- Review of the property's history using aerial photography, USGS topographic maps, directories, and other readily available information
- Review of the reasonably ascertainable regulatory information published by local, state, and federal agencies
- Subject Property reconnaissance
- Interviews with representatives of the current lessee of the property
- Preparation of this Report

2.3 Non-Scope Issues

Non-scope issues are those conditions and concerns that are beyond the scope of services of this ESA and include, but are not limited to: asbestos containing materials, radon, lead-based paint, lead in drinking water, wetland delineation or identification, geologic hazards, regulatory compliance, cultural concerns, industrial hygiene, ecological resources, endangered species, indoor air quality, and high voltage power lines. Sampling and analytical testing of soil, groundwater, air, for such analytes including but not limited to radon gas, radioactive materials, urea-formaldehyde, mold, pesticides and polychlorinated biphenyls (PCBs) are also considered non-scope issues. These issues are therefore not covered in this Report. However, these issues are considered "business environmental risks" as defined in ASTM Standard E1527-21 (Sections 1, 1.4, and 3.2.11). Please note however, that non-scope items not covered by the ASTM Standard are included in Section 3 and Section 4 of this report.

2.4 Significant Assumptions

No significant assumptions were made regarding this ESA.

2.5 Limitations

The findings presented in this Report were based upon field observations during a Subject Property reconnaissance conducted on February 12, 2025 and July 2, 2025, discussions with persons knowledgeable of the property, and review of historical data. Observations describe only the conditions present at the time of this investigation. The data reviewed and observations made are limited to accessible areas and available records searched during the course of this investigation. BSK cannot guarantee the completeness or accuracy of the regulatory agency records reviewed. Unless BSK otherwise expressly agrees in writing, no other party is entitled to rely upon the observations, research information, or conclusions presented in this Report or in any other material obtained by BSK from the sources identified in this Report. Additionally, in evaluating the property, BSK has relied in good faith upon information provided by the interview sources noted in the Report with respect to existing property conditions, and the historic uses of the property. It must also be understood that changing circumstances in the property usage, proposed property usage, property zoning, and changes in the environmental status of the other nearby properties can alter the validity of conclusions and information contained in this Report. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

This ESA Report provides neither certification nor guarantee that the property is free of hazardous-material and/or petroleum-product contamination or that there are no RECs associated with the property that potentially pose an environmental risk/liability or that the property is in compliance with current applicable federal, state, or local regulations.

Findings of this ESA may have a potential for negative impact on the value or suitability of the property for the purpose intended. BSK cannot assume liability for such negative impact. No warranties, expressed or implied, are made as to the findings or conclusions presented in this Report. Sampling and analytical testing of soil, groundwater, air, radon gas, biological agents, and/or construction/building materials are non-scope issues and were not part of the scope of services for this ESA. This assessment did not include non-scope issues identified in Section 1.3 of this Report.

2.6 Exceptions

BSK did not have access to the interior of the snack shack building or the football stadium scorer's booth (Figure 2). No other significant exceptions or data gaps that would raise reasonable concerns regarding our opinions and conclusions in the Report were made or noted.

2.7 Special Terms and Conditions

There were no special terms or contractual conditions for this assessment.

2.8 User Reliance

This Report may be relied upon by the Riverdale Joint Unified School District. Reliance on the information and conclusions in this Report by any other person or entity is not authorized without the expressed written consent of BSK.

2.9 Subject Property And Vicinity Description

2.9.1 Subject Property Setting and Characteristics

The following sections describe the Subject Property setting and characteristics.

Table 1
Subject Property Setting and Characteristics

Subject Property Location/Address	3086 W. Mount Whitney Ave, Riverdale, CA 93656
Assessor's Parcel Number	Fresno County APNs 053-130-12T & 053-130-82T
Latitude/Longitude	36.434528 / -119.855185
Size	Approximately 21.5-acres
Subject Property Improvements	Existing school facilities including sports stadium, scorer's booth, baseball/softball fields, animal barn building, bathroom, irrigation well building, parking lot, detention basin
Zoning	AL20 – Limited Agricultural (Fresno County, 2025)
Nearest Intersection	S. Hazel Avenue and Stathem St.
Nearest Major Highway	Highway 41 (2.95 miles east)

2.9.2 Current Uses of Adjoining Properties

The following is based on observations by Mrs. Jill Vieira of BSK Associates during the Subject Property and vicinity reconnaissance on February 12, 2025 and July 2, 2025. Table 2 summarizes the current use of properties immediately adjacent to the Subject Property.

Table 2
Observed Adjacent Property Uses

Direction	Adjoining Property Use
North	Detention pond and Thomas Ditch, beyond which is agricultural row crops.
East	Agricultural row crops, beyond which is a dairy.
West	Riverdale High School, Riverdale High School maintenance building, beyond which is agricultural row crops, a detention pond, a solar array, and a single-family residence.
South	Riverdale High School, beyond which is W. Mount Whitney Avenue.

2.9.3 Physical Setting

The following sections describe the Geologic and Hydrologic conditions of the Subject Property. The topics summarized include General Geologic Conditions, Surface Soils and Hydrogeologic Conditions.

Table 3
Physical Setting

PHYSICAL SETTING INFORMATION FOR SUBJECT PROPERTY AND SURROUNDING AREA		SOURCE
Topography (Refer to Appendix A for an excerpt of the Topographic Map)		
Subject Property Elevation	Approximately 223 feet mean sea level (msl)	Environmental Data Resources (EDR)
Surface Runoff/ Topographic Gradient	Relatively flat, with a gentle downward slope from east to west.	
Closest Surface Water	Detention pond (Subject Property) and adjacent north	
Soil Characteristics		
Soil Type	Chino loam, somewhat poorly drained.	Environmental Data Resources (EDR)

Table 3 Physical Setting		
PHYSICAL SETTING INFORMATION FOR SUBJECT PROPERTY AND SURROUNDING AREA		**SOURCE**
Geology/Hydrogeology		
Description	Geology: The Subject Property lies within the Great Valley Geomorphic Province of California. The Great Valley of California is generally considered an elongated sedimentary trough, approximately 450 miles long that averages 50 miles in width. The Subject Property lies within the San Joaquin Valley, a broad structural trough bound by the Sierra Nevada Range to the east and Coast Ranges to the west sloping toward the trough's greatest depth near the western margin of the valley. The San Joaquin Valley has been filled with several thousand feet of sedimentary deposits. Sediments in the valley, derived from the erosion of the Sierra Nevada, have deposited sands with lesser silts, minor clays, and gravel by major to minor west-flowing drainages and their tributaries. The sedimentary deposits in the region form extensive coalescing alluvial fans with gradual slopes. Sediments at the Subject Property are mapped as Pleistocene-Holocene marine and nonmarine sedimentary rocks. Hydrogeology: The Subject Property lies within the San Joaquin Basin hydrographic subregion of the Central Valley. Groundwater movement within the San Joaquin Valley generally flows from the fringes of the valley to the median of the trough on the western side of the valley and subsequently north toward the San Joaquin - Sacramento Delta area. Local groundwater flow on the western side of the San Joaquin Valley can be strongly influences by geologic structures, such as faults and anticlines. The San Joaquin Valley is an area of substantial groundwater withdrawal and recharge due to municipal, industrial, and agricultural use. Information regarding hydrogeologic conditions associated with the Subject Property and vicinity is generalized, and additional information regarding local and regional hydrogeologic conditions could be obtained by additional investigation.	California Geological Survey, 2010 Geological Map of California (http://www.quake.ca.gov/gmaps/GMC/stategeologicmap.html) and Geology of California, Robert M. Norris and Robert W. Webb, (1990) State of California Department of Water Resources (DWR), California's Groundwater Update 2020 (California's Groundwater, Update 2020 (Bulletin 118) - Dataset - California Natural Resources Agency Open Data)
Estimated Depth to First Occurrence of Ground water	According to GeoTracker data from the Hazel Avenue Elementary School property located adjacent west of the Subject Property, groundwater was estimated at 100 feet below ground surface (bgs).	State Water Resources Control Board GeoTracker database (https://www.envirostor.dtsc.ca.gov/getfile?filena

Table 3 Physical Setting

Groundwater Basin	San Joaquin Valley-Kings subbasin (Basin # 5-022-08)	California Department of Water Resources Bulletin 118 (https://www.arcgis.com/home/webmap/viewer.html?url=https://gis.water.ca.gov/arcgis/rest/services/Geoscientific/i08_B118_CA_GroundwaterBasins/FeatureServer)
Hydrogeologic Gradient	According to GeoTracker data from the Hazel Avenue Elementary School property located adjacent west of the Subject Property, groundwater in the vicinity of the Subject Property flows to the southwest.	State Water Resources Control Board GeoTracker database (https://www.arcgis.com/home/webmap/viewer.html?url=https://gis.water.ca.gov/arcgis/rest/services/Geoscientific/i08_B118_CA_GroundwaterBasins/FeatureServer)

2.9.4 Historical Topographic Maps

BSK reviewed available historical topographic maps obtained from EDR to gather information regarding the developmental history and land use of the Subject Property and immediate vicinity. Appendix A includes a copy of the Historical Topographic Map Report, dated February 11, 2025. Table 4 summarizes information obtained from the review of historical topographic maps. Since the historical topographic maps do not provide detail of structures or other features, no specific description is provided of the Subject Property and adjacent properties.

Table 4 Review of Historical Topographic Maps	
Year	**Property and Adjoining Property Observations**
1924	The Subject Property appears vacant. The town of Riverdale is visible to the southwest of the Subject Property. Riverdale Ditch appears to bisect the Subject Property flowing approximately east/west through the southern portion. Murphy Slough is visible approximately 0.50 miles to the north of the Subject Property. Burrel Ditch is visible approximately 0.25 miles south of the Subject Property. A Southern Pacific railroad is visible approximately 0.25 miles south of the Subject Property. Due to the distance and direction, this railroad does not qualify as a REC.
1927	Riverdale High School is visible south of the Subject Property. No other significant changes from the 1924 topographic map.
1954	The Riverdale Ditch has changed its course through the Subject property. The football field and berm are now visible on the map. The town of Riverdale has expanded with additional buildings and roadways in the downtown area. A portion of the Southern Pacific rail line is no longer mapped. Oil tanks are visible approximately 0.25 miles south of the Subject Property. No other significant changes from the 1927 topographic map.
2012	The town of Riverdale has expanded further south and east of the Subject Property. A fire station is now visible approximately 0.25 miles west of the Subject Property. No other significant changes from the 1947 topographic map.
2015	No significant changes from the 2012 topographic map.
2018	No significant changes from the 2015 topographic map.
2021	No significant changes from the 2018 topographic map.

2.9.5 Historical Aerial Photographs

BSK reviewed available historical aerial photographs obtained from EDR to gather information regarding the developmental history and land use of the Subject Property and vicinity. Appendix A includes a copy of EDR's Aerial Photo Decade Package, dated February 11, 2025. Table 5 summarizes information obtained from the review of the aerial photographs:

Table 5
Review of Historical Aerial Photographs

Year	Observed Property Use	Property and Adjoining Property Observations (*Scale: 1" = 500'*)
1937	Residential/ Vacant	The Subject Property and neighboring properties to the east, west, and north appear to be agricultural. It is common for agricultural properties to have pesticides and/or herbicides applied as part of operations. This potential pesticide and herbicide application qualifies as an **on-Subject Property REC**. The surrounding properties are also agricultural fields and qualify as an **off-Subject Property REC**. Two buildings (B1 and B2) that appear to be part of a residence are visible on the Subject Property in the Stage 2 portion of the project. Due to the age of the structures, it is common for termiticides and/or lead-based paint to be applied that qualify as an **on-Subject Property REC.** The Riverdale Ditch is on the Subject Property near the southern boundary in the Stage 1 portion of the project. Due to the potential for this ditch to accumulate hazardous materials from neighboring properties, this ditch qualifies as an **off-Subject Property REC** and an **on-Subject Property REC.** Riverdale High School is visible adjacent south of the Subject Property. The town of Riverdale is visible to the southwest of the Subject Property.
1942	Residential/ Vacant	No significant changes to the 1937 aerial photograph.
1946	Residential/ Agricultural	The aerial photograph quality is poor. Portions of the Subject Property appear to be used for row crops and irrigation ditches in Stages 1, 2, and 3 of the project. As stated previously, due to the potential for these ditches to accumulate hazardous materials from neighboring properties, these ditches qualify as an **off-Subject Property REC** and an **on-Subject Property REC.** Riverdale High School appears to be expanding north towards the Subject Property. No other significant changes from the 1942 aerial photograph can be discerned.
1950	Agricultural/ School	The ditches observed in the 1946 aerial photograph in the Stage 2 and 3 portion of the Subject Property are no longer visible. The football field and berm are visible in their present location on the Subject Property. Riverdale Ditch has been diverted to a new path further north through the Subject Property in the Stage 1 and 2 portion of the project. The irrigation well building (B3) is visible in the southwest corner of the Subject Property in the Stage 1 portion of the project. Due to the age of the structures, it is common for termiticides and/or lead-based paint to be applied that qualify as an **on-Subject Property REC.** The town of Riverdale has expanded east towards the Subject Property.
1957	Agricultural/ School	Two additional buildings (B4 and B5) are visible near the agricultural residence within Stage 2 portion of the project are visible. Additionally, the football stadium scorer's booth building (B6) is visible in the Stage 1 portion of the project. Due to the age of this structure, it is common for termiticides and/or lead-based paint to be applied that qualify as separate **on-Subject Property RECs.** The town of Riverdale continues to expand in the area west of the Subject Property.
1960	Agricultural/ School	The aerial photograph quality is poor. No significant changes from the 1957 aerial photograph can be discerned.

Table 5
Review of Historical Aerial Photographs

Year	Observed Property Use	Property and Adjoining Property Observations (*Scale: 1" = 500'*)
1967	Agricultural/ School	The residence and associated structures on the Subject Property have been razed and is no longer visible in the Stage 2 portion of the project. . A new building (B7) is visible adjacent north of the Varsity baseball field on the Subject Property. This building was observed during the Subject Property Reconnaissance and is a bathroom building. Due to the age of the structures, it is common for termiticides and/or lead-based paint to be applied that qualify as an **on-Subject Property REC.** No other significant changes from the 1960 aerial photograph.
1973	Agricultural/ School	No significant changes from the 1967 aerial photograph.
1976	Agricultural/ School	The aerial photograph quality is poor. No other significant changes from the 1973 aerial photograph can be discerned.
1984	Agricultural/ School	The Riverdale Ditch is no longer visible on the Subject Property. The present-day ag barn (B8) is visible in the Stage 2 portion of the project. Due to the age of the structures, it is common for termiticides and/or lead-based paint to be applied that qualify as an **on-Subject Property REC.** No other significant changes from the 1976 aerial photograph.
1994	Agricultural/ School	The town of Riverdale has expanded in the area west of the Subject Property. A building (B9) is visible at the southeast corner of the football stadium. No other significant changes from the 1984 aerial photograph.
2006	Agricultural/ School	A portion of a ponding basin is visible at the northwestern corner of the Subject Property in the Stage 2 portion of the project. Due to the potential to accumulate hazardous materials from neighboring properties, this ponding basin qualifies as an **off-Subject Property REC** and an **on-Subject Property REC.** The maintenance yard is visible adjacent to the west of the Subject Property. The solar field adjacent northwest of the Subject Property appears to be under construction. The present-day football stadium snack shack building (B10) is visible at the southern end of the football field in the Stage 1 portion of the project. The building at the southeast corner of the football stadium is no longer visible. No other significant changes from the 1998 aerial photograph.
2009	Agricultural/ School	No significant changes from the 2006 aerial photograph.
2012	Agricultural/ School	No significant changes from the 2009 aerial photograph.
2016	Agricultural/ School	No significant changes from the 2012 aerial photograph.
2020	Agricultural/ School	No significant changes from the 2016 aerial photograph.

2.9.6 Historical Sanborn Fire Insurance Maps

According to EDR's Certified Sanborn® Map Report dated February 11, 2025. Fire insurance maps covering the Subject Property were not found in their Sanborn Library. A copy of the Certified Sanborn® Map Report is included in Appendix A.

2.9.7 Historical Directories

BSK reviewed several directory reports provided by EDR to obtain information regarding former property occupants and to provide an indication of the property's former use. The Subject Property was searched in the available directory years from 1973 to 2020. The Subject Property was identified as Riverdale High School in 2020 and Horizon High School in 2017 and 2014. The EDR-City Directory Image Report is dated February 14, 2025 and is included in Appendix A.

2.9.8 User-Provided Information

As part of the All-Appropriate Inquiry (AAI) requirements required under ASTM E1527-21, Messrs. Jeff Percell and John Nunes of Riverdale Joint Unified School District provided BSK with a completed user questionnaire dated April 11, 2025. Messrs. Percell and Nunes are unaware of any environmental conditions related to the Subject Property. A copy of the questionnaire is included in Appendix B.

2.10 Records Review

The purpose of the records review is to examine historic records concerning conditions on surrounding properties, including the Subject Property, which may represent a REC in relation to the Subject Property.

2.10.1 Standard Environmental Record Sources

Federal, State, and local regulatory agencies maintain databases of businesses and properties that handle, store, and dispose of hazardous materials and/or wastes, and locations known to have had unauthorized releases of hazardous substances to soil and/or groundwater. These databases are available for review at the various regulatory agencies, or the information may be obtained from commercial data collection services. BSK Associates retained Environmental Data Resources (EDR) to perform the regulatory agency database search. The record search meets the government records search requirements of ASTM E 1527-21. EDR's findings are documented in the EDR-Radius Map™ Report, dated February 12, 2025 which is included in Appendix A.

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate Subject Property boundaries. Database definition, descriptions, and the database search report are included in Appendix A.

Table 6

Table 6 Federal and State Database Search Results			
Database	**Description**	**Radius (Miles)**	**Listings**
NPL (Delisted)	The NPL (Delisted) refers to facilities that have been removed from the NPL.	1	0
Superfund Enterprise Management System (SEMS) (Previously known as CERCLIS)	The SEMS database tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States.	0.5	0
SEMS Archive	SEMS Archive refers to facilities that have been removed and archived from EPA's inventory of SEMS sites.	0.5	0
Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS)/ Treatment, Storage, Disposal (TSD)	The EPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous waste that are undergoing "corrective action." A "corrective action" order is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility.	0.25	0
RCRA Non-CORRACTS/ TSD	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.	0.25	0
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.	Subject Property and adjoining properties	0
IC / EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.	0.5	0
ERNS	The Emergency Response Notification System (ERNS) is a listing compiled by the EPA on reported releases of petroleum and hazardous substances to the air, soil and/or water.	Subject Property	0
State/Tribal			
NPL	State-equivalent and/or Tribal-equivalent database of NPL sites	1	0

Table 6 Federal and State Database Search Results			
Database	**Description**	**Radius (Miles)**	**Listings**
Envirostor	State-equivalent and/or Tribal-equivalent database of SEMS sites. These facilities may or may not already be listed on the federal SEMS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with facilities where cleanup will be paid for by potentially responsible parties.	1	1
Solid waste facility (SWF) / Landfill (LF)	State and/or Tribal database of solid waste facilities located within California. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.	0.5	0
Leaking Underground Storage Tank (LUST)	State and/or Tribal database of leaking underground storage tanks in state of California	0.5	4
Underground Storage Tank (UST)/Above Ground Storage Tank (AST)	State and/or Tribal database of registered storage tanks in the State of California which may include the owner and location of the tanks.	0.25	2
Voluntary Cleanup Program (VCP)	State and/or Tribal facilities included as Voluntary Cleanup Program sites.	0.5	0
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.	0.5	0

In addition to EDR, BSK reviewed the online databases for the following regulatory agencies to obtain reasonably ascertainable and practically reviewable documentation regarding RECs present at the property and adjacent facilities:

- State Water Resources Control Board (SWRCB), GeoTracker Website (http://geotracker.waterboards.ca.gov/)
- Department of Toxic Substances Control (DTSC), EnviroStor Website and Record Search (http://www.envirostor.dtsc.ca.gov/public/)
- California Environmental Protection Agency (CalEPA) Website (https://siteportal.calepa.ca.gov/nsite/map/help)
- California Geologic Energy Management Division (CalGEM) Database (https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx)
- U.S. Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Website (www.npms.phmsa.dot.gov)
- Fresno County Department of Public Health Environmental Health Document Portal (DPHEHDP) (https://www.fresnohealthinspections.com/)

The Subject Property is not identified on the SWRCB GeoTracker, DTSC Envirostor, CalGEM, PHMSA, or Fresno County DPHEHDP websites. The Subject Property is identified on the CalEPA site as a chemical storage facility and hazardous waste generator. Two administrative violations are noted, however, BSK

did not see documentation of a release of hazardous materials and/or petroleum products on the Subject Property in the CalEPA database or DPHEHDP database.

According to CalGEM, the Riverdale oil field is located approximately 3,000 feet west, southwest of the Subject Property. The nearest well is a plugged dry well approximately 1,292 feet north of the Subject Property. Due to the distance from the Site, these wells and oil field do not qualify as a REC.

The following table summarizes the Subject Property-specific information provided by the database and/or gathered by this office for identified facilities from the databases above. Facilities are listed in order of proximity to the Subject Property and evaluated for impacts to the Subject Property. Acronyms and terms used in this report are described in Appendix A– Radius Map Report.

Table 7 Listed Facilities			
Facility Name and Location	**Estimated Distance/Direction/ Hydrogeological Gradient**	**Database Listings**	**Additional Information Regarding Property and Interpretation of Impact on Subject Property**
Riverdale Joint Unified School District/Riverdale High School (3086 W Mt. Whitney Ave.)	Subject Property	HAZNET, SWEEPS UST, CA FID UST, CERS Hazardous Waste, CUPA Listings, CERS	This facility is documented as a hazardous waste generator, chemical storage facility, and auto repair/maintenance facility. The facility is documented as having a hazardous waste removed from the property from 1999 to 2020. The property is documented as having a 10,000-gallon diesel UST, a 1,000-gallon gasoline UST, and a 10,000-gallon gasoline UST. It is BSK's understanding that the USTs are located outside of the Subject Property and therefore, these USTs qualify as an **off-Subject Property REC.**
Hazel Avenue Elementary School (Northwest of Hazel Ave.)	Adjacent west / cross-to-down-gradient	ENVIROSTOR	This facility is documented as having a school site investigation performed in 2007. According to the DTSC letter dated July 30, 2007, DTSC stated that "based on review of the revised PEA report, neither a release of hazardous material nor the presence of naturally occurring hazardous material which would pose a threat to public health or the environment under unrestricted land use was indicated at the site. Therefore, DTSC concurs with the PEA report conclusion that no further investigation of the site is required." This listing does not qualify as a REC.
Joe M. Coelhi (3233 Stathem St.)	153 feet west, southwest/down-gradient	Historic UST, SWEEPS UST, CA FID UST	This facility is documented as having two (2) 350-gallon gasoline USTs. BSK did not see evidence of a release from this facility in the documents reviewed, however, the presence of USTs qualifies as an **off-Subject Property REC.**

Table 7 Listed Facilities			
Facility Name and Location	**Estimated Distance/Direction/ Hydrogeological Gradient**	**Database Listings**	**Additional Information Regarding Property and Interpretation of Impact on Subject Property**
Riverdale Memorial District (3085 W. Mt. Whitney Ave.)	604 feet south/down-to-cross-gradient	CUPA Listings	This facility is listed as having a hazardous material disclosure below reporting quantity. BSK did not see evidence of a release from this facility in the documents reviewed and therefore, this facility does not qualify as a REC.
Southwest Transportation (20900 Hazel Ave.)	636 feet south, southwest/ down-gradient	CA FID UST	This facility is listed as having a 10,000-gallon diesel UST. The facility is also documented as having 3 USTs removed. BSK could not ascertain if the USTs are still present at the property from the records reviewed. BSK did not see evidence of a release from this facility in the documents reviewed, however, the potential presence of the 10,000-gallon diesel UST qualifies as an **off-Subject Property REC.**
Coelho Farms / Tank Cleanup @ Riverdale (3150 Mt. Whiteny Ave.)	665 feet south/down-to-cross-gradient	SWEEPS UST, CA FID UST, CUPA Listings, Historic CORTESE	This facility is listed as having a 250-gallon gasoline UST. According to EDR, the UST was “cleaned up”. This UST qualifies as an **off-Subject Property REC.**
Riverdale Ice / The Corral (20924 Hazel St.)	676 feet south, southwest/down-gradient	SWEEPS UST, CA FID UST, CUPA Listings	This facility is listed as having two (2) 1,000-gallon gasoline USTs that were removed. BSK did not see documentation of a release from this facility and therefore, this facility does not qualify as a REC.
Carreiros Union / Austin Petroleum Co Inc. (3164 W Mt. Whitney Ave.)	690 feet south /down-to-cross-gradient	Historic UST, SWEEPS UST, CA FID UST, CUPA Listings	This facility is listed as having an 8,000-gallon waste oil UST and an 8,000-gallon gasoline UST removed. The facility is also documented as having a 10,000-gallon gasoline UST, two (2) 4,000-gallon gasoline USTs, and a 150-gallon waste oil UST. BSK did not see documentation of a release from this facility however, the remaining USTs qualify as an **off-Subject Property REC.**

Table 7
Listed Facilities

Facility Name and Location	Estimated Distance/Direction/ Hydrogeological Gradient	Database Listings	Additional Information Regarding Property and Interpretation of Impact on Subject Property
Riverdale PUD – Valentine & Strathem Site (S Valentine Ave.)	727 feet west/down-to-cross-gradient	CUPA Listings	This facility is listed as having a UST removed. BSK did not see documentation of a release from this facility and therefore, this facility does not qualify as a REC.
Get 'N Go 9927 / Fastrip Gasoline / Circle K Store #1331 (3210 W Mt. Whitney Ave.)	850 feet south, southwest / down-gradient	UST, CERS Hazardous Waste, CERS Tanks, SWEEPS UST, Historic UST, CA FID UST, CUPA Listings	This facility is listed as having a 12,000-gallon double-walled gasoline UST. The facility is documented as having three (3) 8,000-gallon gasoline USTs removed. BSK did not see documentation of a release from this facility however, and due to the distance and direction from the Subject Property, this UST does not qualify as a REC.
Riverdale Public Utilities (20945 Haslam St.)	1,015 feet southwest / down-gradient	SWEEPS UST, CA FID UST, CUPA Listings, Historic UST	This facility is listed as having a 500-gallon gasoline UST and a 500-gallon diesel UST that were removed. BSK did not see documentation of a release from this facility however, and therefore this facility does not qualify as a REC.
D&D Chevron / Casmeros Chevron Service/ Toronjita Tires (3410 W Mt. Whitney Ave.)	1,254 feet southwest / down-gradient	CUPA Listings, Historic UST, SWEEPS UST, CA FID UST, CUPA Listings, LUST, CORTESE, Historic CORTESE, CERS	This facility is listed as having a 12,000-gallon double-walled gasoline UST. The facility is documented as having three (3) 8,000-gallon gasoline USTs removed. BSK did not see documentation of a release from this facility however, and due to the distance and direction from the Subject Property, this UST does not qualify as a REC.

Table 7 Listed Facilities			
Facility Name and Location	**Estimated Distance/Direction/ Hydrogeological Gradient**	**Database Listings**	**Additional Information Regarding Property and Interpretation of Impact on Subject Property**
McLeod Ford (3415 W Mt. Whitney Ave.)	1,495 feet southwest / down-gradient	RCRA-SQG, CERS Hazardous Waste, SWEEPS UST, CA FID UST, CUPA Listings, Historic CORTESE, CERS, LUST, CORTESE	This facility is documented as having two, 5,000-gallon gasoline USTs removed from the property in 1995. Soil samples beneath the USTs showed elevated concentrations of toluene, ethylbenzene, xylenes, and TPH-gasoline. Groundwater samples from a well approximately 80 feet north of the Subject Property showed toluene, ethylbenzene, and xylenes in 1995 through 1998. No other petroleum hydrocarbons were detected between June 1995 to April 2002. The SWRCB GeoTracker case completed and closed in 2010. Due to the distance and direction, this former release and documented closure by SWRCB does not qualify as a REC.
Texaco Star Mart #8 (3610 W Mt. Whitney Ave.)	2,000 feet west, southwest / down-gradient	LUST, CORTESE, Historic CORTESE, CERS	This facility is documented as upgrading piping and dispensers for the gas station in 1996. During the upgrade, soil samples were collected and contained TPH-gasoline, and TPH-diesel. The SWRCB GeoTracker case was completed and closed in 2013. Due to the distance and direction, this former release and documented closure by SWRCB does not qualify as a REC.
Brown Feed & Seed (21053 Sherrill St.)	2,276 feet west, southwest / down-gradient	LUST, CORTESE, Historic CORTESE, CERS	This facility is documented as removing a 10,000-gallon diesel UST, a 10,000-gallon gasoline UST, and a 5,000-gallon gasoline UST in 1988. During the excavation soil samples were collected and contained TPH-gasoline and TPH-diesel. The SWRCB GeoTracker case was completed and closed in 1999. Due to the distance and direction, this former release and documented closure by SWRCB does not qualify as a REC.

2.10.2 Previous Assessments

BSK was not provided a previous assessment for the Subject Property.

2.10.3 Subject Property Reconnaissance

In accordance with the ASTM 1527-21, a Subject Property reconnaissance, which included an observation of the Subject Property and adjacent properties, was conducted by Mrs. Jill Vieira of BSK on February 12, 2025 and July 2, 2025. Subject Property photographs taken during this reconnaissance are included in Appendix C. The objective of the Subject Property reconnaissance was to observe Subject Property conditions and obtain information indicating the likelihood of identifying RECs, including hazardous substances and petroleum products, in connection with the Subject Property and/or adjacent properties (including soils, surface waters, and groundwater).

The Subject Property reconnaissance included observations of the Subject Property, the Subject Property's exterior periphery, and immediately adjacent properties. Table 8 provides a brief description of Subject Property observations encountered during the Subject Property reconnaissance.

Table 8
Subject Property Observations

Observations or environmental conditions that may involve the use, storage, disposal or generation of hazardous substances or petroleum products	Observed	Not Observed	Description
Aboveground storage tank (AST)	X		Empty mobile AST (farm tote trailer) in the Stage 2 portion of the project. According to the Riverdale Joint Unified School District, this AST only contains water and therefore does not qualify as a REC. (Photo 8)
Air Emissions		X	
Below grade vaults		X	
Burned or buried debris		X	
Chemical storage	X		Chemical storage was observed in the ag barn on the Subject Property in the Stage 2 portion of the project. This qualifies as an **on-Subject Property REC.** Photo 9)
Chemical mixing areas		X	
Discolored soil or water		X	

Table 8 Subject Property Observations			
Observations or environmental conditions that may involve the use, storage, disposal or generation of hazardous substances or petroleum products	**Observed**	**Not Observed**	**Description**
Ditches, streams	X		Thomas Ditch was observed approximately 240 feet north of Subject Property (Photo 2). This ditch qualifies as an **off-Subject Property REC.**
Drains and piping (e.g., floor drains, floor trenches, bay drains, sand traps, grease traps)	X		Floor drain in bathroom (B7) at varsity baseball field in Stage 1 portion of the project.
Drums	X		One drum was observed inside the ag barn on the Subject Property in the Stage 2 portion of the project. According to the Riverdale Joint Unified School District, this drum is used to store pig feed and does not qualify as a REC. (Photo 9)
Electrical or hydraulic equipment (Polychlorinated biphenyls [PCBs])	X		Pad-mounted transformer outside of maintenance yard in Stage 3 portion of the project and electrical boxes west of football field in the Stage 1 portion of the project. BSK did not see evidence of staining at these locations. (Photos 11 and 16)
Fill dirt from unknown source		X	

Table 8 Subject Property Observations			
Observations or environmental conditions that may involve the use, storage, disposal or generation of hazardous substances or petroleum products	**Observed**	**Not Observed**	**Description**
Fill dirt from known source	X		Road baserock outside of maintenance yard in the Stage 3 portion of the project (Photo 11). According to Riverdale Joint Unified School District, this pile is leftover base rock from a previous project and does not qualify as a REC. Additionally, landscaping material in the northern end of the parking lot within the Subject Property. (Photos 14 and 15)
Hazardous chemical and petroleum products in connection with unknown use		X	
Non-hazardous containers with contents		X	
Hazardous Waste Storage		X	
Heating and cooling system and fuel source		X	
Industrial waste treatment equipment		X	
Loading and unloading areas		X	
Odors		X	
Pits, Ponds, or Lagoons	X		Ponding basin in the Stage 2 portion of the project. This ponding basin qualifies as an **on-Subject Property REC** and an **off-Subject Property REC.** (Photo 1)
Pools of Liquid		X	
Process wastewater		X	
Sanitary Sewer System		X	
Septic system (e.g., tank and leach fields)		X	

Table 8 Subject Property Observations			
Observations or environmental conditions that may involve the use, storage, disposal or generation of hazardous substances or petroleum products	**Observed**	**Not Observed**	**Description**
Soil piles	X		Soil/rock pile outside of maintenance shop in the Stage 3 portion of the project and in parking lot of Stage 1 portion of the project. According to Riverdale Joint Unified School District, this pile is leftover base rock from a previous project and does not qualify as a REC. (Photos 11, 14, & 15)
Solid Waste/Evidence of Unauthorized Dumping		X	
Stained pavement, soil or concrete	X		Stained concrete was observed under the irrigation well within the irrigation well building (B3) in the Stage 1 portion of the project. This staining qualifies as an **on-Subject Property REC.** (Photo 20)
Stains or corrosion (interior, non-water)		X	
Storm drains/catch basins		X	
Stressed vegetation		X	
Sumps and clarifiers		X	
Surface Water		X	
Underground storage tank(s) including heating oil tanks and oil/water separators		X	
Unidentified substance containers		X	
Utilities	X		Overhead power.
Wastewater Discharge		X	

Table 8 Subject Property Observations			
Observations or environmental conditions that may involve the use, storage, disposal or generation of hazardous substances or petroleum products	**Observed**	**Not Observed**	**Description**
Water supplies (potable and process)	X		Dry and unused irrigation well within the irrigation well building (B3) in the Stage 1 portion of the project. The staining on the well qualifies as an **on-Subject Property REC.** (Photo 20)
Wells (irrigation, monitoring, or domestic)	X		Dry and unused irrigation well within the irrigation well building (B3) in the Stage 1 portion of the project. The staining on the well qualifies as an **on-Subject Property REC.** (Photo 20)
Wells (dry)	X		Dry and unused irrigation well within the irrigation well building (B3) in the Stage 1 portion of the project. The staining on the well qualifies as an **on-Subject Property REC.** (Photo 20)
Wells (Oil and Gas)		X	

The following RECs were observed during the Subject Property reconnaissance:

1. Chemical storage was observed in the ag barn in the Stage 2 portion of the project. Due to the potential release of chemicals, this qualifies as an **on-Subject Property REC.**
2. Thomas Ditch was observed approximately 240 feet north of the Subject Property. It is common for agricultural canals to accumulate hazardous materials (i.e. pesticides/herbicides) and therefore qualifies as an **off-Subject Property REC.**
3. A ponding basin was observed on and adjacent to the northwest corner of the Subject Property in the Stage 2 portion of the project. It is common for ponding basins to accumulate hazardous materials (i.e. pesticides/herbicides) and therefore qualifies as an **on-Subject Property REC and off-Subject Property REC.**
4. Stained concrete was observed under the dry irrigation well within the irrigation well building (B3) on the Subject Property in the Stage 1 portion of the project. This release qualifies as an **on-Subject Property REC.**

2.10.4 Interviews

The Owner/Occupant Questionnaire was prepared by Messrs. Jeff Percell and John Nunes of the Riverdale Joint Unified School District (RJUSD) as the Subject Property owner, on April 11, 2025. According to Messrs. Percell and Nunes' responses, they are not aware of any USTs, ASTs, septic tanks, wash rack areas, stationary hydraulic lifts, pipelines, stained soils, or rail line/spurs on the Subject Property. They stated that the Subject Property leases the farmland portion of the Subject Property to Mt. Whitney Dairy which uses it for farming. Messrs. Percell and Nunes state that they are aware of water wells, storm drains, fill material/imported soil, electric transformers, and the use of pesticides on the Subject Property. Additionally, Messrs. Percell and Nunes' state that asbestos inspections occur annually and lead testing occurs as necessary regarding water and paint. The completed questionnaire is included in Appendix D.

2.10.5 Migration and VES

Migration refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. A Vapor Encroachment Screen (VES) was conducted to comply with the requirements of ASTM E2600-10, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." A VES is a high-level screening of available records to evaluate the likelihood of migration of volatile contaminants (generally excluding petroleum hydrocarbons from on-Subject Property sources) which may impact the Subject Property. The screening evaluates groundwater gradient, distance, migration pathways, barriers, and chemical specific characteristics to evaluate the likelihood of migration. A search of the available records was conducted by EDR as part of the screening evaluation. The VES (Appendix A) identified one (1) VEC at the Coelho Farms property located at 3150 W Mt. Whitney Blvd. This facility is documented as having a tank cleanup and qualifies as a VEC.

3 SUPPLEMENTAL EVALUATION ITEMS

Per DTSC guidance, BSK has reviewed and evaluated additional sources for potential release or presence of hazardous material on the Site per California Code of Regulation, Section 69104, subsection (d) for the assessment of school sites. The supplemental areas required are:

a) Agricultural use
b) Debris or stockpiles
c) Fill material
d) Electrical transformers, oil-filled electrical equipment, or hydraulic systems
e) Government use or ownership
f) Grading activities
g) Hydrogen sulfide
h) Illegal drug manufacturing
i) Lead-based paint application
j) Metals and metalloids

k) Methane
l) Mines
m) Naturally—occurring asbestos
n) Naturally—occurring hazardous materials
o) Petroleum deposits or use
p) Radon
q) Railroad use or easements
r) Residential use
s) Surface drainage pathways
t) Termiticide application
u) Utility easements
v) Munitions and explosives of concern

The following table summarizes the supplemental evaluation items *not* called out or fully addressed elsewhere in this report.

Table 9
Supplemental Evaluation Items

Item	Evaluation
Government Use or Ownership	The Subject Property is owned by the Riverdale Joint Unified School District since 1916. The District leases a portion of the Subject Property to Mt. Whitney Dairy.
Hydrogen Sulfide	Based on BSK's February 12, 2025 and July 2, 2025 Subject Property reconnaissance and review of historical air photos and topographic maps, there is no evidence of sources of hydrogen sulfide gas, such as springs, swamps, oil fields or buried sewer lines located at the Site. BSK reviewed the California Geologic Energy Management Division (CalGEM) web map. The closest well is approximately 1,292 feet north of the Subject Property. This well is reportedly a dry hole and is plugged.
Illegal Drug Manufacturing	No evidence of illegal drug manufacturing activities was noted in the ESA database search, GeoTracker, or EnviroStor. There is no evidence of residences/structures on the property which could have housed illegal drug manufacturing. Therefore, there is no reason to suspect illegal drug manufacturing has occurred at the Site.

Table 9
Supplemental Evaluation Items

Item	Evaluation
Lead-Based Paint Application	During BSK's February 12, 2025 and July 2, 2025 Subject Property reconnaissance, BSK observed five structures on the Subject Property: Ag barn (B8) – Stage 2, Snack Shack (B10) – Stage 1, Irrigation Well Building (B3) – Stage 1, Varsity Baseball Field Bathrooms (B7) – Stage 1, and Football Scorer's Booth (B6) – Stage 1 Due to the age of the Subject Property, the District could have utilized lead-based paint, which may also reside in soils in those locations. Additionally, four historic structures (B1, B2, B4, B5) were observed on the Subject Property in the historic aerial photographs. As stated previously, these pre-1979 structures (B1 through B8) qualify as **on-Subject Property RECs** due to the potential termiticide application and the use of lead-based paint.
Metals and Metalloids	With the exception of metals related to agricultural chemicals and also the on-site detention basin, sources that could be related to elevated metals in soil were not identified at the Subject Property. Soil testing by BSK summarized in Section 4 identified arsenic in soil samples collected were below the 95th percentile value of 12.6 mg/kg based on background arsenic concentrations in soil from 0 to 3 ft below ground surface (bgs) (Hunter, Davis and Roach 2005) and within typical background concentrations for California. It is common for elevated arsenic to be naturally occurring in soil in the Central Valley.
Methane	Based on BSK's Subject Property visit, review of historical air photos and topographic maps, and CalGEM there are no sources of methane, such as springs, swamps, oil fields or buried sewer lines located within approximately 3,000 feet of the Subject Property.
Mines	Based on BSK's February 12, 2025 and July 2, 2025 Subject Property reconnaissance, review of historical air photos and topographic maps, and one of the author of this Phase I ESA's experience as a professional geologist with 38 years' experience, the Subject Property is located in an area of Quaternary age alluvium with no potential for mining other than sand and gravel. No evidence of sand/gravel mining, other mines or pits in historic topographic maps, aerial photos, or database records was observed.

Table 9 Supplemental Evaluation Items	
Item	**Evaluation**
Naturally—Occurring Asbestos	Based on BSK's review of the California Department of Health's online GIS map for "Areas with Potential for Naturally Occurring Asbestos", approximately 29 miles east, northeast of the Subject Property are ultramafic rock. These geologic formations may have the potential to contain Naturally Occurring Asbestos (NOA). BSK did not identify any other occurrences of naturally occurring asbestos within 10 miles of the Subject Property. (https://cdphdata.maps.arcgis.com/apps/webappviewer/index.html?id=da4b648958844134adc25ff002dbea1c) Additionally, according to the California Department of Conservation's Geologic Map of California (https://maps.conservation.ca.gov/cgs/gmc/) the Subject Property is located in an area of Quaternary marine and nonmarine (continental) sedimentary rocks (unconsolidated and semi-consolidated) (mapped unit is Q).
Naturally—Occurring Hazardous Materials	Based on BSK's review of the geologic map for the Subject Property (https://maps.conservation.ca.gov/cgs/gmc/), the Subject Property is situated on Quaternary marine and nonmarine (continental) sedimentary rocks (unconsolidated and semi-consolidated) (mapped unit is Q). Other than elevated background metals concentrations common in sediments along the western margins of the Central Valley, naturally occurring hazardous materials are not associated with this type of sedimentary deposit.
Radon	According to the California Department of Conservation, Indoor Radon Potential Interactive map (http://maps.conservation.ca.gov/cgs/radon/), the Subject Property is located in an unmapped area for indoor radon.
Surface Drainage Pathways	A detention pond is partially located on the Subject Property and adjacent north of the Subject Property
Termiticide Application	During BSK's February 12, 2025 and July 2, 2025 Subject Property reconnaissance, BSK observed five structures on the Subject Property: Ag barn (B8) – Stage 2, Snack shack (B10) – Stage 1, Irrigation Well Building (B3) – Stage 1, Varsity Baseball Field Bathrooms (B7) – Stage 1, and Football Scorer's Booth (B6) – Stage 1. Due to the age of the Subject Property, the District could have utilized lead-based paint, which may also reside in soils in those locations. Additionally, four historic structures (B1, B2, B4, B5) were observed on the Subject Property in the historic aerial photographs. As stated previously, these pre-1979 structures (B1 through B8) qualify as **on-Subject Property RECs** due to the potential termiticide application and the use of lead-based paint.

Table 9 Supplemental Evaluation Items	
Item	**Evaluation**
Munitions and Explosives of Concern	No evidence of munitions and explosives of concern were observed at the Subject Property during the February 12, 2025 and July 2, 2025 Subject Property reconnaissance. Based on the historical research for the Subject Property, the Subject Property has not operated as a military base, ammunition depot, or shooting range.

4 LIMITED PHASE II ESA / RESIDUAL AGRICULTURAL CHEMICAL TESTING

BSK performed residual agricultural chemical testing on the Subject Property to evaluate the soil conditions related to agricultural activities that occurred on the Subject Property. As stated in Section 2.3, the Subject Property was formerly agricultural or vacant. It is common for agricultural fields to use chemicals that are considered hazardous materials. The sampling was done in general accordance with the DTSC's Interim Guidance for Sampling Agricultural Properties, Third Revision dated August 7, 2008. BSK collected eleven 11) composite samples and eleven (11) discrete samples for analysis for this approximately 21.5-acre property. Please note, due to an adjustment to the Subject Property boundary after soil sampling occurred, some soil samples were collected outside of the Subject Property. For transparency, BSK included this data as discussed below.

On April 1 and 2, 2025, BSK's Jill Vieira obtained 35 soil samples from a depth of approximately 0 - 6 inches in 35 boring locations. An additional eight soil samples were collected from a depth of approximately 0 - 6 inches in 8 boring locations on July 2, 2025. These samples were collected in general accordance with DTSC's Interim Guidance for Sampling Agricultural Properties, Third Revision and the aforementioned approved methodology. All samples were obtained and placed in laboratory prepared containers, labeled, and placed on ice in a secured cooler. The samples were transported to BSK's laboratory under chain-of-custody procedure. The laboratory composited the samples for a total of eleven (11) composite samples, eleven (11) discrete samples, two (2) duplicate composite samples, and two (2) duplicate discrete samples. The sample analytical results are summarized as follows:

Table 10 Residual Agricultural Chemical Sampling (All concentrations in mg/kg, except as noted)					
Sample ID	**Sample Depth**	**Sample Date**	**Total Arsenic (EPA Method 6020)**	**4,4'-DDE**	**Remaining Organochlorine Pesticides (OCP)**
Composite 1 (1A, 1B, 1C, 1D)	**0-0.5'**	4/1/25	--	ND	ND
1 D Arsenic	**0-0.5'**	4/1/25	**4.5**	--	--

[2] Hunter, Davis and Roach, 2005. "Inorganic Chemicals in Ground Water and Soil: Background Concentrations at California Air Force Bases. Presented at: 44th Annual Meeting of the Society of Toxicology, New Orleans, Louisiana, 10 March 2008" March 10.

For copies of the laboratory data reports and chain of custody documentation, please refer to Appendix E.

As shown in Table 10 above, arsenic concentrations in all discrete soil samples (concentration range of 2.9 to 5.2 mg/kg) exceeded the DTSC Screening Level for Residential Soil of 0.11 mg/kg throughout the Subject Property. However, naturally occurring arsenic is a common element in rock and sediment documented throughout California and the concentrations detected are typical and below the 95th percentile value of 12.6 mg/kg based on background arsenic concentrations in soil from 0 to 3 ft below ground surface (bgs) (Hunter, Davis and Roach 2005). It is also the experience of the signatories of this report that elevated arsenic concentrations exist along the western margins of the Central Valley. Additionally, the soil samples collected were below the reporting limits for the residual organochlorine pesticides analyzed with the exception of one (1) sample. 4,4'-DDE was detected in one (1) composite sample (Composite 7 and its duplicate sample) with a concentration of 0.0065 to 0.0067 mg/kg, respectfully. This concentration is below the DTSC Screening Level (SL) of 2 mg/kg for a residential scenario. Based on the soil samples collected and analysis conducted, the soil does not qualify as hazardous waste based solely on the sampling and analysis performed.

5 FINDINGS AND CONCLUSIONS

We have performed a Phase I ESA in general conformance with the scope and limitations of ASTM practice E 1527-21 for Fresno County Assessor's Parcel Number (APN): 053-130-12T & 053-130-82T in Riverdale, California. Any exceptions to, or deletions from, this practice are described in Section 2.6 of this Report.

This assessment identified ten (10) RECs in connection with the Subject Property. BSK divided the RECs based on which Stage of the project they are located. The RECs is as follows:

Stages 1, 2, and 3

1. Agricultural Operations – Potential Hazardous Material Release (i.e. pesticides/herbicides)
2. Historical Ditches – Potential Accumulation of Hazardous Materials (i.e. pesticides/herbicides)

Stage 1

3. Historic Structure B3 – Irrigation Well Building (Approximately 1950s – Present) – Potential Termiticide and/or Lead-based Paint Application
4. Historic Structure B6 – Football Stadium Scorer's Booth (Approximately 1950s – Present) – Potential Termiticide and/or Lead-based Paint Application
5. Historic Structure B7 – Varsity Baseball Bathroom (Approximately 1960s – Present) – Potential Termiticide and/or Lead-based Paint Application
6. Stained Soils on Concrete of Dry Irrigation Well – Petroleum Product Release.

Stage 2

7. Historic Residence and Associated Structures B1, B2, B4, and B5 (Approximately 1930s – 1960s) – Potential Termiticide and/or Lead-based Paint Application
8. Ag Barn B8 (Approximately 1970s – Present) – Potential Termiticide and/or Lead-based Paint Application
9. Chemical Storage on concrete in Ag Barn – Potential Hazardous Material Release
10. Detention Pond – Potential Accumulation of Hazardous Materials (i.e. pesticides/herbicides)

This assessment did not identify CRECs or HRECs in connection with the Subject Property.

Seven (7) RECs were identified in the vicinity of the Subject Property. The RECs are as follows:

1. Agricultural Operations in the Vicinity of the Subject Property – Potential Release/Application of Hazardous Materials
2. Riverdale Ditch, Historic Ditches, and Thomas Ditch – Potential Accumulation of Hazardous Materials (i.e. pesticides/herbicides)
3. Riverdale Joint Unified School District (3086 W Mt. Whitney Ave.) – Potential Petroleum Product Release from USTs
4. Joe M. Coelhi (3233 Stathem St.) – Potential Petroleum Product Release from USTs
5. Southwest Transportation (20900 Hazel Ave.) – Potential Petroleum Product Release from USTs
6. Carreiros Union / Austin Petroleum Co Inc. (3164 W Mt. Whitney Ave.) – Potential Petroleum Product Release from USTs
7. Detention Pond – Potential Accumulation of Hazardous Materials

This assessment did not identify a CREC or HREC in the vicinity of the Subject Property.

This assessment identified one VEC associated with the Coelho Farms property located at 3150 W Mt. Whitney Blvd. This listing is approximately 665 feet south from the Subject Property.

Based on the former and current use of the Subject Property for agricultural purposes, residual agricultural chemical sampling was performed to evaluate the presence of agricultural chemicals on the Subject Property in accordance with DTSC guidance documents. As stated in Section 4 above, arsenic concentrations in all discrete soil samples exceeded the DTSC Screening Level for Residential Soil and of 0.11 mg/kg and ranged from 2.9 to 5.2 mg/kg. However, naturally occurring arsenic is a common element in rock and sediment documented throughout California and the concentrations detected are typical and below the 95th percentile value of 12.6 mg/kg based on background arsenic concentrations in soil from 0 to 3 ft below ground surface (bgs) (Hunter, Davis and Roach 2005). Furthermore, it is also the experience of the signatories of this report that elevated arsenic concentrations naturally exist along the western margins of the Central Valley. Additionally, the soil samples collected were below the reporting limits for the residual organochlorine pesticides analyzed with the exception of one (1) sample. 4,4'-DDE was

detected in one (1) composite sample (Composite 7 and its duplicate sample) with a concentration of 0.0065 to 0.0067 mg/kg. This concentration is below the DTSC Screening Level (SL) of 2 mg/kg for a residential scenario. Based on the soil samples collected and analysis conducted, the soil does not qualify as hazardous waste based solely on the sampling and analysis performed and is below the DTSC SLs for OCPs.

6 RECOMMENDATIONS

Based on the intended use of the Subject Property as a school site, BSK recommends that this report be submitted to the State of California Department of Toxic Substances Control (DTSC) for review and comment. Based on their review, it is possible that a Preliminary Endangerment Assessment (PEA) Workplan will need to be prepared and submitted to DTSC to evaluate the Subject Property for the RECs identified above in the Stage 3 area of the project as it is the only part of the project that will be receiving state funding. However, based on the Limited Phase II ESA / Residual Agricultural Chemical Testing performed in the Stage 3 area and throughout the Subject Property, BSK does not recommend additional investigation of the Subject Property or the Stage 3 area at this time for residual agricultural chemicals. However, BSK does recommend sampling the excavated soil from the detention basin expansion that is intended to be used as fill in the Stage 2 area of the project.

Additionally, although the historic structures on the Subject Property qualify as RECs due to the potential termiticide and/or lead-based paint application per DTSC's Interim Guidance Evaluation of School Sites with Potential Soil Contamination as a Result of Lead From Lead-Based Paint, Organochlorine Pesticides from Termiticides, and Polychlorinated Biphenyls from Electrical Transformers date June 9, 2006, these buildings were already part of the approved school facility and no historic or existing buildings were observed in the Stage 3 area of the project.

As recommended in DTSC's comment letter dated January 17, 2025, this report should also be submitted to Fresno County for review and comment and to determine if additional investigation and cleanup is required in the Stage 1 and Stage 2 project areas. BSK is available to assist in the submittal of the report to DTSC/Fresno County, ongoing discussions with DTSC/Fresno County, and further investigation of the Subject Property.

8 ENVIRONMENTAL PROFESSIONAL STATEMENT AND SIGNATURES

The signatories of this Report declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the property. We have developed and performed all appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312. For copies of the resumes of said Environmental Professionals, please refer to Appendix F.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 4 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 09/16/2024 has revealed that there are 2 E MANIFEST sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 10 CUPA Listings sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Violation Date:	08-31-2021
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

GET 'N GO 9927 (Continued) **S121762274**

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: Returned to compliance on 08/31/2021. 50. VIOLATION: Failure to meet one or more of the following requirements: 1. Install or maintain a liquid-tight spill container. 2. Have a minimum capacity of five gallons. 3. Have a functional drain valve or other method for the removal of liquid from the spill container. 4. Be resistant to galvanic corrosion. 5. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. 6. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 7. Tested by a certified UST service technician. 8. Maintain records of spill containment testing for 36 months. (23 CCR 16 2635(b), 2637.1(a), 2637.1(b), 2637.1(c), 2665(a), 2665(b), 2712(b)(1)(F); HSC 6.7 25284.2) OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements:

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 10/13/2021. 52. VIOLATION: Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank

GET 'N GO 9927 (Continued) **S121762274**

at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release

Site History:	The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

ORPHAN SUMMARY

City	EDR ID	Site Name	Site Address	Zip	Database(s)
		NO SITES FOUND			

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

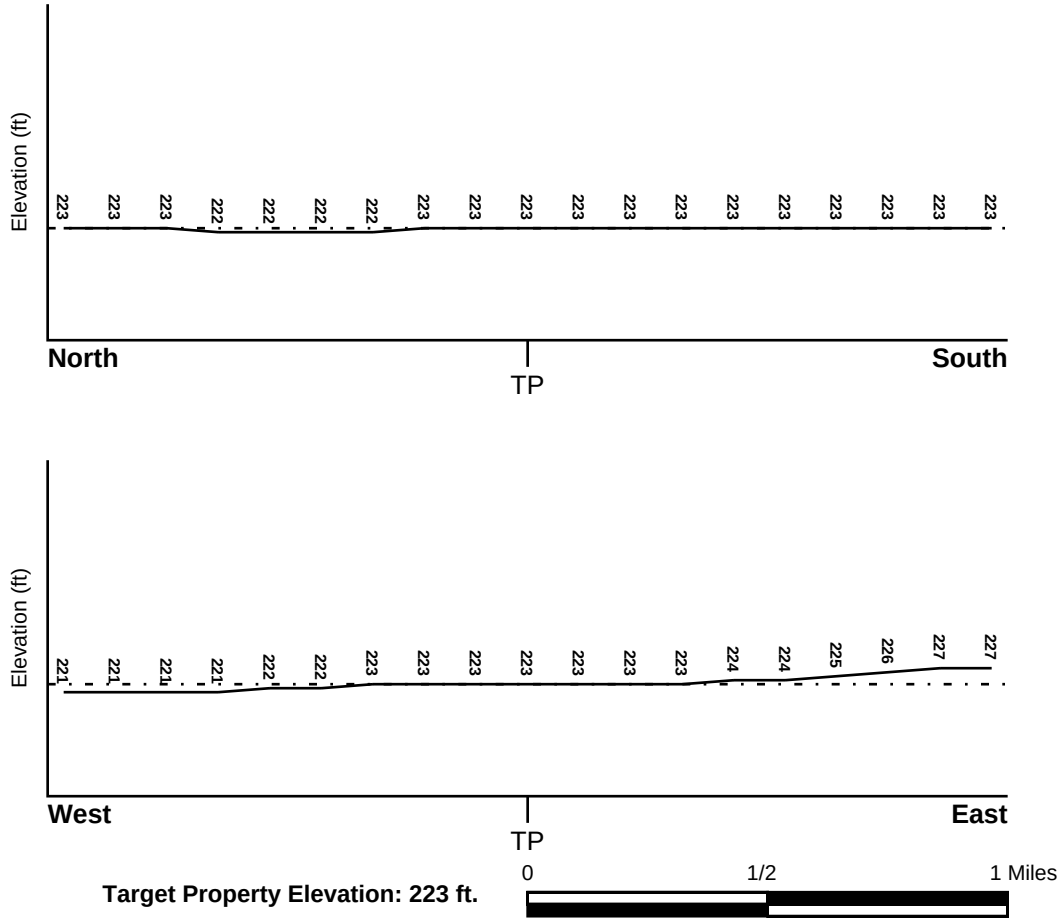

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: Undeterminable

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06031C0040D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06019C2900H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
RIVERDALE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CHINO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 7.4
2	11 inches	18 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 7.4
3	18 inches	23 inches	stratified fine sandy loam to clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by BSK & Associates were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by BSK & Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 7FCA-41A9-9D1F

PO # P25000088

Project P25000088

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 7FCA-41A9-9D1F

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

Disclaimer - Copyright and Trademark Notice

The EDR Vapor Encroachment Worksheet enables EDR's customers to make certain online modifications that effects maps, text and calculations contained in this Report. As a result, maps, text and calculations contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. Environmental Data Resources shall not be responsible for any customer's decision to include or not include in any final report any records determined to be within the relevant minimum search distances.

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANYSUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES.ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

APPENDIX B

Phase I Environmental Site Assessment Client Questionnaire
ASTM 1527-21: All Appropriate Inquiries

Property Location: 3086 W. Mt. Whitney Ave. Riverdale, CA 93656
APN#:

1) Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state, or local law?

   No.

2) Are you aware of any *Activity and Land Use Limitations* (AULs) such as *engineering controls*, land use restrictions, or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

   No.

3) As the *user* of this ESA do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   Yes, this is school district land.

4) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower price is because contamination is known or believed to be present at the *property*?

   Property is already owned by the school district.

5) Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as the *user*: Yes.

a) Do you know the past uses of the *property*?
Yes.

b) Do you know of specific chemicals that are present or once were present at the *property*?

Yes, to a certain extent. The school district owned farmland in this project has been leased to the same operator for multiple decades.

c) Do you know of spills or other chemical releases that have taken place at the *property*?
No.

d) Do you know of any environmental cleanups that have taken place at the *property*?
No.

6) As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

Completed by:

Name: Jeff Percell / John Nunes

Title: Superintendent / Director of Maintenance and Facilities

Signature: _____ Date: April 11, 2025

Glossary of Terms:

Activity and Land Use Limitations: legal or physical restrictions or limitations on the use of, or access to, a site or facility; (1) to reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to the public health or the environment. These legal or physical restrictions, which may include institutional or *engineering controls*, are intended to prevent adverse impacts to individuals or populations which may be exposed to *hazardous substances* and *petroleum products* in the soil or groundwater on the *property*.

All Appropriate Inquiry: that inquiry constituting "all appropriate inquiry into the previous ownership and uses of the property consistent with commercial or customary practice" as defined in CERCLA, 42 U.S.C. §9601 (35)(B), that will qualify a party to a *commercial real estate transaction* for one of threshold criteria for satisfying the LLPs to CERCLA liability (42 U.S.C. §9601 (35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense.

Commercial Real Estate: any real *property* except a dwelling or *property* with no more than four dwelling units exclusively for residential use (except that a dwelling or *property* with no more than four dwelling units exclusively for residential use is included in this term when it has a commercial function, as in the building of such dwellings for profit). This term includes but is not limited to undeveloped real property and real property used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; *property* used for residential purposes that has more than four residential dwelling units for residential use when it has a commercial function, as in the building of such dwellings for profit.

Commercial Real Estate Transaction: a transfer of title to or possession of real *property* or the receipt of a security interest in real *property*, except that it does not include transfer of title to or possession of real *property* or the receipt of a security interest in real *property* with respect to an individual dwelling or building fewer than five dwelling units, nor does it include the purchase of a lot or lots to construct a dwelling for occupancy by a purchaser, but a *commercial real estate* transaction does include real *property* purchased or leased by persons or entities in the business of building or developing dwelling units.

Engineering Controls: physical modifications to a site or facility (for example: capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the property. Engineering controls are a type of activity and use limitation (AUL).

Environmental Professional: a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The person may be an independent contractor or an employee of the *user*.

Environmental Site Assessment (ESA): the process by which a person or entity seeks to determine if a particular parcel of real *property* (including improvements) is subject to *recognized environmental conditions*. At the option of the *user,* an ESA may include more inquiry than that constituting *all appropriate inquiry* or, if the *user* is not concerned about qualifying for the *LLPs*, less inquiry than that constituting *all appropriate inquiry*. An ESA is both different from and less rigorous than an environmental compliance audit.

Hazardous Substance: a substance defined as a hazardous substance pursuant to CERCLA 42 U.S.C. §9601(14), as interpreted by EPA regulations and the courts: "(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any *hazardous waste* having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 U.S.C. §6921), (but not including any waste the regulation of which under RCRA(42 U.S.C. §§6901 *et. seq*.) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 U.S.C. 7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or

designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

Hazardous Waste: any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§6901-6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines a hazardous waste , at 42 U.S.C. §6903, as : "a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may – (A) cause, or increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."

Institutional Controls: a legal or administrative restriction (for example, deed restrictions," restrictive covenants, easement or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to h*azardous substances* or *petroleum products* in the soil or ground water on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Occupants: those tenants, subtenants, or other persons or entities using the *property* or a portion of the *property*.

Owner: generally the fee owner of record of the property.

Petroleum Products: those substances included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. §9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a *hazardous substance* under Subparagraphs (A) through (F) of 42 U.S.C. §9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

Property: the real *property* that is the subject of the *environmental site assessment* described in this practice. Real *property* includes buildings and other fixtures and improvements located on the *property* and affixed to the land.

Reasonable Ascertainable: information that is (1) *publicly available,* (2) obtainable from its source within reasonable time and cost constraints, and (3) *practically reviewable*.

Recognized Environmental Conditions (RECs): the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with the laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not RECs.

User: the party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A *user* may include, without limitation, a potential purchaser of the *property*, a potential tenant of the *property*, an owner of the *property*, a lender, or a *property* manager.

APPENDIX C

Photo 1: View of ponding basin located on and adjacent to northwest corner of the Subject Property. This basin qualifies as an **on-Subject Property REC** and an **off-Subject Property REC** and is located in Stage 2 of the project**.**

Photo 2: View of canal north of the Subject Property facing east. This canal qualifies as an **off-Subject Property REC.**

Photo 3: View of Subject Property interior in Stage 3 portion of the project facing south from near the northwestern corner.

Photo 4: View of stand pipe located adjacent to the northeastern corner of the Subject Property.

Photo 5: View of Subject Property interior in Stage 3 portion of the project facing southwest from unpaved road that runs along the eastern boundary of the northern section of the Subject Property.

Photo 6: View of stand pipe located on adjacent property to the east of the Subject Property.

Photo 7: View of two ASTs located on adjacent property to the east of the Subject Property.

Photo 8: View of empty mobile water AST located by the Ag Barn in Stage 2 portion of the project. BSK confirmed with Riverdale Unified School District that this AST has been used for only water.

Photo 9: View of interior of Ag Barn storage area in Stage 2 portion of the project. Note, concrete floor. Chemical storage qualifies as an **on-Subject Property REC.** Please note, the 55-gallon drum is reportedly used to store pig feed and does not qualify as a REC.

Photo 10: View of ag barn building looking west in Stage 2 portion of the project.

Photo 11: View of pad-mounted transformer and base rock pile outside of Maintenance yard facing south along western boundary of the Subject Property in Stage 3 portion of the project. BSK did not observe evidence of staining at the pad-mounted transformer. According to Riverdale Unified School District, the pile in the photo was left over base rock from a previous project and therefore does not qualify as a REC.

Photo 12: View of Subject Property interior in Stage 2 portion of the project facing northeast from north of the Maintenance yard.

Photo 13: View of stand pipe and associated irrigation well located on adjacent property to the west of the Subject Property.

Photo 14: View of landscaping piles on northern end of the parking lot within the Subject Property in Stage 1 portion of the project.

Photo 15: View of landscaping piles on northern end of the parking lot within the Subject Property in Stage 1 portion of the project.

Photo 16: View of electrical boxes west of the football field within the Subject Property in Stage 1 portion of the project. BSK did not see evidence of a release and do not qualify as a REC.

Photo 17: View of parking lot facing west from the berm on the northern side of the football field in Stage 1 portion of the project.

Photo 18: View of football field facing south from the berm on the northern side of the football field in Stage 1 portion of the project.

Photo 19: View of irrigation well building near southwestern corner of the football field in Stage 1 portion of the project.

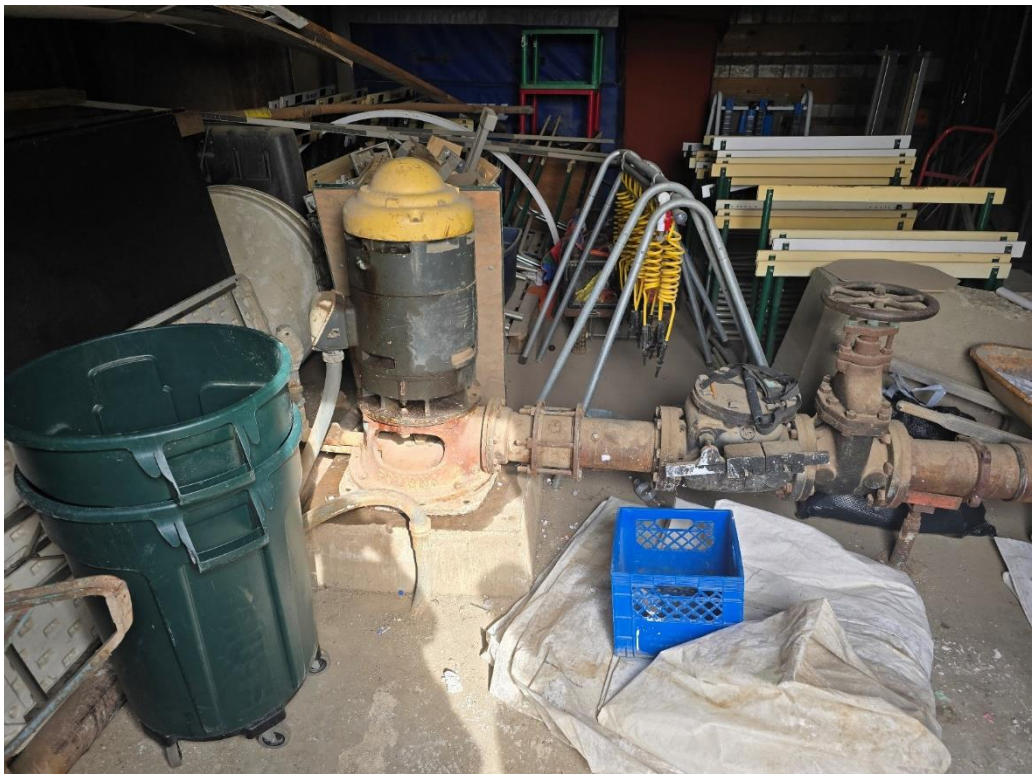

Photo 20: View of interior of irrigation well building near southwestern corner of the football field in Stage 1 portion of the project. Note the concrete floor. Also note the irrigation well with visible staining is considered an **on-Subject Property REC.**

Photo 21: View of Varsity baseball field, bathrooms, and storage buildings facing west in Stage 1 portion of the project.

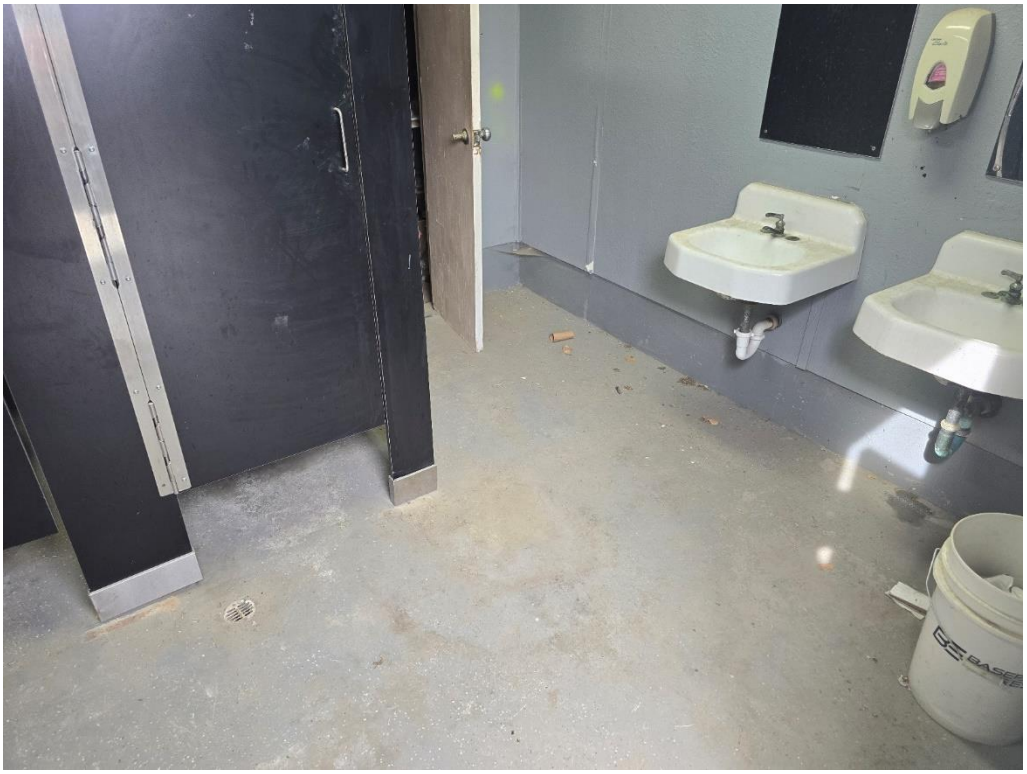

Photo 22: View of interior of bathroom adjacent to the Varsity baseball field on the Subject Property in Stage 1 portion of the project.

Photo 23: Snack shack at the south end of the football field in Stage 1 portion of the project.

Photo 24: Snack shack area looking northeast from the southern Subject Property Boundary in Stage 1 portion of the project.

APPENDIX D

Environmental Due Diligence
Owner/Occupant Questionnaire

Please complete a response to each question to the best of your knowledge.

1. Information about the person completing the questionnaire form:

   Name: Jeff Percell / John Nunes Date: April 11, 2025

   - Telephone Number: (559) 867-8200
   - Email: jpercell@rjusd.org / johnnunes@rjusd.org
   - Address: 3160 W. Mt. Whitney Ave. Riverdale, CA 93656
   - What is your relationship to the site? Superintendent / Director of Maintenance
   - What year did your first-*hand knowledge* of the site begin? 2005 / 2021

2. Site Address and/or APN Number(s): 3086 W. Mt. Whitney Ave. Riverdale, CA 93656
3. Size of the site in acres: 21.78 acres
4. Site Ownership and Usage:
   - Site owner: Riverdale Joint Unified School District
   - Site occupants and site use(s): Riverdale High School / farmland leased by Mt. Whitney Dairy
   - When was the Site first occupied? 1916
   - What is the Site history and current use? Riverdale High School and adjacent farmland (owned by the school district and farmed by Mt. Whitney Dairy by way of lease)
   - Previous site owners and occupants: Unknown
   - Date(s) of property transfers/lease: Property deed dated October 26, 1916
5. Site Features and Conditions:
   - Did the site ever have or currently have the following? (Please circle or highlight)

~~Underground storage fuel tanks~~
~~Above-ground storage tanks~~
~~Ponds, pits or lagoons~~
~~Septic tank~~
Water wells ~~or disposal wells~~
~~Wash rack area~~
Storm drains
Electric transformers
~~Stationary hydraulic lifts~~
Fill material or imported soil
~~Pipelines~~
~~Rail line or rail spurs~~
~~Stained soils or sheen on water~~
Use of pesticides
Other:

Environmental Due Diligence
Owner/Occupant Questionnaire

Please complete a response to each question to the best of your knowledge.

If so, please describe the nature of any releases including any hazardous substances.

To the best of our knowledge, there are no know releases including hazardous substances.

6. To your knowledge are you aware of the following past or present conditions, if so please describe:

   - Previous site activities or operations including manufacturing, dry cleaning, vehicle repair, photo-processing, junkyard or waste storage, recycling facility, painting facility or pest control facility, or other industrial or commercial operations that may store or dispose of waste: No
   - Previous environmental assessments or investigations, if so when? No
   - Materials that contained lead based paint or asbestos or surveys conducted to determine the presence of these materials: Annual inspections for asbestos take place. Lead testing takes place regarding water and paint as necessary.
   - Waste generation or disposal on site and types of hazardous substances or petroleum: No
   - Environmental liens against the property, if so please describe: No
   - Notice of violations for environmental concerns from a regulatory agency: No
   - Other Information: N/A

7. Utilities: Please describe the name of service providers for the following:

   - Water supply – Riverdale Public Utilities District, Riverdale Irrigation District (farmland)
   - Gas and electricity – SoCal Gas, PG&E, Tesla (solar)
   - Heating oil – N/A
   - Sanitary sewer disposal – Riverdale Public Utilities District
   - Garbage disposal – Mid Valley Disposal
   - Industrial wastewater disposal – N/A
   - Storm water disposal – Riverdale Public Utilities District plus basin on property

Completed by:

RE: Report for AID0215 Riverdale HS E2500088

Dear Kevin Grove,

Thank you for using BSK Associates for your analytical testing needs. In the following pages, you will find the test results for the samples submitted to our laboratory on 4/1/2025. The results have been approved for release by our Laboratory Director as indicated by the authorizing signature below.

The samples were analyzed for the test(s) indicated on the Chain of Custody (see attached) and the results relate only to the samples analyzed. BSK certifies that the testing was performed in accordance with the quality system requirements specified in the 2016 TNI Standard. Any deviations from this standard or from the method requirements for each test procedure performed will be annotated alongside the analytical result or noted in the Case Narrative. Unless otherwise noted, the sample results are reported on an "as received" basis.

This certificate of analysis shall not be reproduced except in full, without written approval of the laboratory.

If additional clarification of any information is required, please contact your Client Services Representative, Elaine M. Phillips , at 559-497-2888.

Thank you again for using BSK Associates. We value your business and appreciate your loyalty.

Sincerely,

Elaine M. Phillips, Project Manager

Accredited in Accordance with NELAP
ORELAP #4021

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Data Qualifiers

The following qualifiers have been applied to one or more analytical results:

MS1.0	Matrix spike recoveries exceed control limits.
MS1.2	Matrix spike recovery exceeds lower control limit. Reported results for parent matrix should be considered estimated due to matrix interferences.
MS1.5	Matrix spike recovery exceeds upper control limit. No material impact as parent sample results are Non-Detected.
MS2.1	MS/MSD RPD exceeds control limit. Reportable results in parent sample may have some degree of variability, higher than that inherent in the method.
SR1.0	Surrogate recovery exceeds upper control limit. No material impact as associated analytes are Non-Detect.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Certificate of Analysis

Notes:

- The Chain of Custody document and Sample Integrity Sheet are part of the analytical report.
- Any remaining sample(s) for testing will be disposed of according to BSK's sample retention policy unless other arrangements are made in advance.
- All positive results for EPA Methods 504.1 and 524.2 require the analysis of a Field Reagent Blank (FRB) to confirm that the results are not a contamination error from field sampling steps. If Field Reagent Blanks were not submitted with the samples, this method requirement has not been performed.
- Samples collected by BSK Analytical Laboratories were collected in accordance with the BSK Sampling and Collection Standard Operating Procedures.
- J-value is equivalent to DNQ (Detected, not quantified) which is a trace value. A trace value is an analyte detected between the MDL and the laboratory reporting limit. This result is of an unknown data quality and is only qualitative (estimated). Baseline noise, calibration curve extrapolation below the lowest calibrator, method blank detections, and integration artifacts can all produce apparent DNQ values, which contribute to the un-reliability of these values.
- (1) - Residual chlorine and pH analysis have a 15 minute holding time for both drinking and waste water samples as defined by the EPA and 40 CFR 136. Waste water and ground water (monitoring well) samples must be field filtered to meet the 15 minute holding time for dissolved metals.
- Field tests are outside the scope of laboratory accreditation and there is no certification available for field testing.
- Summations of analytes (i.e. Total Trihalomethanes) may appear to add individual amounts incorrectly, due to rounding of analyte values occurring before or after the total value is calculated, as well as rounding of the total value.
- RL Multiplier is the factor used to adjust the reporting limit (RL) due to variations in sample preparation procedures and dilutions required for matrix interferences.
- Due to the subjective nature of the Threshold Odor Method , all characterizations of the detected odor are the opinion of the panel of analysts. The characterizations can be found in Standard Methods 2170B Figure 2170:1.
- The MCLs provided in this report (if applicable) represent the primary MCLs for that analyte.
- (2) - Formerly known as Bis(2-Chloroisopropyl) ether.
  Unless otherwise noted, TOC results by SM 5310C method do not include purgeable organic carbon, which is removed along with the inorganic carbon interference. The POC contribution to TOC is considered to be negligible .

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Certificate of Analysis

Definitions

mg/L:	Milligrams/Liter (ppm)	MDL:	Method Detection Limit	MDA95:	Min. Detected Activity
mg/Kg:	Milligrams/Kilogram (ppm)	RL:	Reporting Limit: DL x Dilution	MPN:	Most Probable Number
µg/L:	Micrograms/Liter (ppb)	ND:	None Detected below MRL/MDL	CFU:	Colony Forming Unit
µg/Kg:	Micrograms/Kilogram (ppb)	pCi/L:	PicoCuries per Liter	Absent:	Less than 1 CFU/100mLs
%:	Percent	RL Mult:	RL Multiplier	Present:	1 or more CFU/100mLs
NR:	Non-Reportable	MCL:	Maximum Contaminant Limit	U:	The analyte was not detected at or above the reported sample quantitation limit.

Please see the individual Subcontract Lab's report for applicable certifications.

The following parameters are not available for certification through CA ELAP:

Odor Diisopropyl ether (DIPE) by EPA 524.2

The following parameters are calculated values and are outside the scope of our NELAP accreditation:

Total Nitrogen Aggressive Index Trivalent Chromium

BSK is not accredited under the NELAP program for the following additional parameters: **NA**

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

RE: Report for AID0312 Riverdale HS E2500088

Dear Kevin Grove,

Thank you for using BSK Associates for your analytical testing needs. In the following pages, you will find the test results for the samples submitted to our laboratory on 4/2/2025. The results have been approved for release by our Laboratory Director as indicated by the authorizing signature below.

The samples were analyzed for the test(s) indicated on the Chain of Custody (see attached) and the results relate only to the samples analyzed. BSK certifies that the testing was performed in accordance with the quality system requirements specified in the 2016 TNI Standard. Any deviations from this standard or from the method requirements for each test procedure performed will be annotated alongside the analytical result or noted in the Case Narrative. Unless otherwise noted, the sample results are reported on an “as received” basis.

This certificate of analysis shall not be reproduced except in full, without written approval of the laboratory.

If additional clarification of any information is required, please contact your Client Services Representative, Elaine M. Phillips , at 559-497-2888.

Thank you again for using BSK Associates. We value your business and appreciate your loyalty.

Sincerely,

Michael Ng, Regional Manager - QA

Accredited in Accordance with NELAP
ORELAP #4021

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Detailed Narrative

Report Amendments

Date: 5/2/25

Initials: EMP

This amended report supersedes any previous reports issued by the laboratory. Amendments to this report are as follows: Samples AID0312-05 and -06 were added as Duplicates and analyzed as new samples. The Duplicate of AID0312-05 was added as AID0312-19 and analyzed for EPA 8081B, and the Duplicate of AID0312-06 was added as AID0312-20 and analyzed for Arsenic, as per Kevin Grove.

Data Qualifiers

The following qualifiers have been applied to one or more analytical results:

HT1.4	Initial analysis was performed within the holding time. However, a required dilution/re-extraction was performed past the holding time.
MS1.0	Matrix spike recoveries exceed control limits.
MS1.2	Matrix spike recovery exceeds lower control limit. Reported results for parent matrix should be considered estimated due to matrix interferences.
MS2.1	MS/MSD RPD exceeds control limit. Reportable results in parent sample may have some degree of variability, higher than that inherent in the method.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Certificate of Analysis

Notes:

- The Chain of Custody document and Sample Integrity Sheet are part of the analytical report.
- Any remaining sample(s) for testing will be disposed of according to BSK's sample retention policy unless other arrangements are made in advance.
- All positive results for EPA Methods 504.1 and 524.2 require the analysis of a Field Reagent Blank (FRB) to confirm that the results are not a contamination error from field sampling steps. If Field Reagent Blanks were not submitted with the samples, this method requirement has not been performed.
- Samples collected by BSK Analytical Laboratories were collected in accordance with the BSK Sampling and Collection Standard Operating Procedures.
- J-value is equivalent to DNQ (Detected, not quantified) which is a trace value. A trace value is an analyte detected between the MDL and the laboratory reporting limit. This result is of an unknown data quality and is only qualitative (estimated). Baseline noise, calibration curve extrapolation below the lowest calibrator, method blank detections, and integration artifacts can all produce apparent DNQ values, which contribute to the un-reliability of these values.
- (1) - Residual chlorine and pH analysis have a 15 minute holding time for both drinking and waste water samples as defined by the EPA and 40 CFR 136. Waste water and ground water (monitoring well) samples must be field filtered to meet the 15 minute holding time for dissolved metals.
- Field tests are outside the scope of laboratory accreditation and there is no certification available for field testing.
- Summations of analytes (i.e. Total Trihalomethanes) may appear to add individual amounts incorrectly, due to rounding of analyte values occurring before or after the total value is calculated, as well as rounding of the total value.
- RL Multiplier is the factor used to adjust the reporting limit (RL) due to variations in sample preparation procedures and dilutions required for matrix interferences.
- Due to the subjective nature of the Threshold Odor Method, all characterizations of the detected odor are the opinion of the panel of analysts. The characterizations can be found in Standard Methods 2170B Figure 2170:1.
- The MCLs provided in this report (if applicable) represent the primary MCLs for that analyte.
- (2) - Formerly known as Bis(2-Chloroisopropyl) ether.
  Unless otherwise noted, TOC results by SM 5310C method do not include purgeable organic carbon, which is removed along with the inorganic carbon interference. The POC contribution to TOC is considered to be negligible.

Certificate of Analysis

Definitions

mg/L:	Milligrams/Liter (ppm)	MDL:	Method Detection Limit	MDA95:	Min. Detected Activity
mg/Kg:	Milligrams/Kilogram (ppm)	RL:	Reporting Limit: DL x Dilution	MPN:	Most Probable Number
µg/L:	Micrograms/Liter (ppb)	ND:	None Detected below MRL/MDL	CFU:	Colony Forming Unit
µg/Kg:	Micrograms/Kilogram (ppb)	pCi/L:	PicoCuries per Liter	Absent:	Less than 1 CFU/100mLs
%:	Percent	RL Mult:	RL Multiplier	Present:	1 or more CFU/100mLs
NR:	Non-Reportable	MCL:	Maximum Contaminant Limit	U:	The analyte was not detected at or above the reported sample quantitation limit.

Please see the individual Subcontract Lab's report for applicable certifications.

The following parameters are not available for certification through CA ELAP:

Odor Diisopropyl ether (DIPE) by EPA 524.2

The following parameters are calculated values and are outside the scope of our NELAP accreditation:

Total Nitrogen Aggressive Index Trivalent Chromium

BSK is not accredited under the NELAP program for the following additional parameters: **NA**

RE: Report for AIG0333 Riverdale HS E2500088

Dear Kevin Grove,

Thank you for using BSK Associates for your analytical testing needs. In the following pages, you will find the test results for the samples submitted to our laboratory on 7/2/2025. The results have been approved for release by our Laboratory Director as indicated by the authorizing signature below.

The samples were analyzed for the test(s) indicated on the Chain of Custody (see attached) and the results relate only to the samples analyzed. BSK certifies that the testing was performed in accordance with the quality system requirements specified in the 2016 TNI Standard. Any deviations from this standard or from the method requirements for each test procedure performed will be annotated alongside the analytical result or noted in the Case Narrative. Unless otherwise noted, the sample results are reported on an "as received" basis.

This certificate of analysis shall not be reproduced except in full, without written approval of the laboratory.

If additional clarification of any information is required, please contact your Client Services Representative, Elaine M. Phillips , at 559-497-2888.

Thank you again for using BSK Associates. We value your business and appreciate your loyalty.

Sincerely,

Elaine M. Phillips, Project Manager

Accredited in Accordance with NELAP
ORELAP #4021

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Case Narrative

Project and Report Details		Invoice Details	
Client:	BSK Associates - Fresno	**Invoice To:**	BSK Associates - Corporate
Report To:	Kevin Grove	**Invoice Attn:**	BSK Associates-Corp
Project #:	-	**Project PO#:**	-
Received:	7/02/2025 - 12:06		
Report Due:	7/14/2025		

Sample Receipt Conditions

Cooler: Default Cooler
Temperature on Receipt ºC: 26.9

Containers Intact
COC/Labels Agree
Received On Ice
Sample(s) arrived at lab on same day sampled.
Packing Material - Other
Sample(s) were received in temperature range.
Initial receipt at BSK-FAL

Data Qualifiers

The following qualifiers have been applied to one or more analytical results:

CV0.0	CCV recovery was above method acceptance limits; no material impact on reported result as sample detection is below the reporting limit for this parameter.
MS1.3	Matrix spike recovery data unavailable or unreliable due to significant dilution required for matrix interferences.

Report Distribution

Recipient(s)	Report Format	CC:
Jill Vieira	FINAL.RPT	
Kevin Grove	FINAL.RPT	

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Certificate of Analysis

Notes:

- The Chain of Custody document and Sample Integrity Sheet are part of the analytical report.
- Any remaining sample(s) for testing will be disposed of according to BSK's sample retention policy unless other arrangements are made in advance.
- All positive results for EPA Methods 504.1 and 524.2 require the analysis of a Field Reagent Blank (FRB) to confirm that the results are not a contamination error from field sampling steps. If Field Reagent Blanks were not submitted with the samples, this method requirement has not been performed.
- Samples collected by BSK Analytical Laboratories were collected in accordance with the BSK Sampling and Collection Standard Operating Procedures.
- J-value is equivalent to DNQ (Detected, not quantified) which is a trace value. A trace value is an analyte detected between the MDL and the laboratory reporting limit. This result is of an unknown data quality and is only qualitative (estimated). Baseline noise, calibration curve extrapolation below the lowest calibrator, method blank detections, and integration artifacts can all produce apparent DNQ values, which contribute to the un-reliability of these values.
- (1) - Residual chlorine and pH analysis have a 15 minute holding time for both drinking and waste water samples as defined by the EPA and 40 CFR 136. Waste water and ground water (monitoring well) samples must be field filtered to meet the 15 minute holding time for dissolved metals.
- Field tests are outside the scope of laboratory accreditation and there is no certification available for field testing.
- Summations of analytes (i.e. Total Trihalomethanes) may appear to add individual amounts incorrectly, due to rounding of analyte values occurring before or after the total value is calculated, as well as rounding of the total value.
- RL Multiplier is the factor used to adjust the reporting limit (RL) due to variations in sample preparation procedures and dilutions required for matrix interferences.
- Due to the subjective nature of the Threshold Odor Method , all characterizations of the detected odor are the opinion of the panel of analysts. The characterizations can be found in Standard Methods 2170B Figure 2170:1.
- The MCLs provided in this report (if applicable) represent the primary MCLs for that analyte.
- (2) - Formerly known as Bis(2-Chloroisopropyl) ether.
  Unless otherwise noted, TOC results by SM 5310C method do not include purgeable organic carbon, which is removed along with the inorganic carbon interference. The POC contribution to TOC is considered to be negligible .

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Certificate of Analysis

Definitions

mg/L:	Milligrams/Liter (ppm)	MDL:	Method Detection Limit	MDA95:	Min. Detected Activity
mg/Kg:	Milligrams/Kilogram (ppm)	RL:	Reporting Limit: DL x Dilution	MPN:	Most Probable Number
µg/L:	Micrograms/Liter (ppb)	ND:	None Detected below MRL/MDL	CFU:	Colony Forming Unit
µg/Kg:	Micrograms/Kilogram (ppb)	pCi/L:	PicoCuries per Liter	Absent:	Less than 1 CFU/100mLs
%:	Percent	RL Mult:	RL Multiplier	Present:	1 or more CFU/100mLs
NR:	Non-Reportable	MCL:	Maximum Contaminant Limit	U:	The analyte was not detected at or above the reported sample quantitation limit.

Please see the individual Subcontract Lab's report for applicable certifications.

The following parameters are not available for certification through CA ELAP:

Odor Diisopropyl ether (DIPE) by EPA 524.2

The following parameters are calculated values and are outside the scope of our NELAP accreditation:

Total Nitrogen Aggressive Index Trivalent Chromium

BSK is not accredited under the NELAP program for the following additional parameters: **NA**

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

APPENDIX F

Kevin Grove – Environmental Branch Manager

Professional Background:

Mr. Grove graduated from the University of California, Davis in March 2013. His academic background includes a Bachelor of Science in Environmental Policy Analysis and Planning. Following graduation and an internship with Yolo County Transportation District, Mr. Grove accepted a full-time staff planner position with BSK.

Mr. Grove has managed Phase I Environmental Site Assessments (ESA), Phase II ESAs, aerially deposited lead surveys, paint-stripe sampling and analysis, compost facility permitting, and Waste Discharge Requirement (WDR) facility permitting,. Additionally, Mr. Grove has interpreted aerial photographs, prepared GIS Figures, and conducted a 1600 Permit Vegetation Inventory, Ordinary High-Water Mark and Wetland Delineation Surveys. He prepares California Environmental Quality Act documentation, including Environmental Impact Reports for proposed projects. His work includes conducting special studies, section writing reference development, and quality assurance.

Qualifications

Registrations / Certificates:

Education:

BS, Environmental Policy Analysis & Planning, University of California, Davis 2013

Experience:

BSK Associates, Staff Planner-October 2013 to Current

Yolo County Transportation District, Transportation Planning Intern-June 2013 to October 2013

Relevant Experience:

Phase I Environmental Site Assessments

Numerous Sites **–** Conducted and provided technical oversight for over 30 Phase I Environmental Site Assessment (ESA) sites for banks, lenders, developers, schools, transportation projects, and public agencies throughout California.

EPA Brownfields Assessment Grant, Oroville, California **–** Kevin performed five Phase I ESAs as part of an Environmental Protection Agency (EPA) Brownfields Grant. In addition to the Phase I ESAs, Mr. Grove conducted the brownfields inventory for the area identified as IU2, south of Oroville's downtown area. Approximately 60 properties were identified from databases, site reconnaissance, and properties of interest to the City and community members. Kevin created a database linking the key information to data obtained through EDR, site photographs and created an interactive base map. Sites were screened against criteria and ranked in order of priority.

EPA Brownfields Assessment Grant, Rancho Cordova, California **–** Kevin performed six Phase I ESAs as part of an EPA Brownfields Assessment Grant. In addition to the Phase I ESAs, Mr. Grove conducted the Brownfields petroleum inventory for the area identified as Folsom Boulevard Planning Area. Approximately 44 properties were identified from databases, site reconnaissance, and property of interest to the City. Kevin created a database linking the key information to data obtained through outside vendors, site

photographs, etc., and created an interactive base map. Sites were screened against criteria and ranked in order of priority.

Aerially Deposited Lead and Paint-Stripe Surveys

Kern County Public Works Roadway Improvement Projects – Mr. Grove managed numerous aerially deposited lead (ADL) and paint-stripe surveys throughout Kern County. Mr. Grove successfully coordinated encroachment permits, traffic control subcontractors, scheduling with County officials, sampling procedures, laboratory analysis, data review, and reporting.

Site Assessment

Lafayette Elementary School Addition (Former Lafayette Public Library), Lafayette, California – Mr. Grove performed the Phase I ESA and helped prepare a Preliminary Endangerment Assessment (PEA) for the addition to this elementary school. The scope of work included an ESA in accordance with California Education Code Sections 17210 and 17213.1 which also included evaluation for radon, naturally occurring asbestos (NOA) and mercury. Based on the results of the ESA, a PEA was required to address possible migration of dry-cleaning chemicals in groundwater from a nearby site and sampling of the near-surface soils for lead, termiticides and other pesticides. Following the PEA, Mr. Grove assisted with the preparation and implementation of a Removal Action plan of affected soil at the Site.

Kilgore Property – Proposed Entertainment Center, EPA Brownfields Phase II ESA, City of Rancho Cordova, California – Using GIS, Kevin created all site maps and figures for the project area. Kevin assisted with the ecological screening evaluation to determine the potential presence of endangered species on site. Kevin also conducted inventory, documentation, and graphical representation of all soil samples from the project. Kevin assisted with the writing of the Quality Assurance Project Plan (QAPP).

Utility Pole Storage, Phase I/II ESA, Oroville, California – Mr. Grove prepared a Phase I ESA for a utility pole storage facility. The poles were stored in a former lumber yard with wood treatment processes. Following the Phase I ESA, Mr. Grove prepared a Phase II ESA to evaluate the impact to soil and chemical related to the wood treatment processes.

City of Winters, PG&E Training Center, Phase II ESA, Yolo County, California – Phase II ESA was completed for the Mclish Property, which is the future location of the PG&E Training Center. Kevin created site mapsand figures for the project area using GIS software. These maps included monitoring well locations and ground water flow direction.

Numerous Solar Facilities, California – Mr. Grove prepared numerous Phase I and Limited Phase II ESAs for solar facilities throughout California. The limited Phase II ESAs included soil sampling, geophysical surveys, underground utility locating, and soil vapor sampling.

CEQA / NEPA Services

Grapevine Shopping Center Project, Kern County, California – Kevin assisted with the Environmental Impact Report for the construction of an approximately 45-acre shopping center located in Delano, California. The proposed project includes a movie theater, regional shopping center, multiple fast food restaurants and quality restaurants.

Los Banos Landfill-Clean Closure Project, Initial Study/Mitigated Negative Declaration (IS/MND), Los Banos, California – Mr. Grove prepared an IS/MND for the Old Los Banos Landfill – Clean Closure Project. The project included the removal of waste and cover soils from the inactive City of Los Banos Landfill. Under the project, the removed waste was then transported to Bill Wright Landfill in Los Banos, or Kettleman Hills Landfill in Kettleman City, depending upon the waste profile.

Livermore Composting Facility, IS/MND, Livermore, California – Kevin prepared an IS/MND for a new composting facility in Livermore, California, per the California Environmental Quality Act (CEQA). Mr. Grove distributed the CEQA document to the appropriate agencies, responded to public comments, and provided information to the lead agency for their decision.

Big Sandy Rancheria Expansion, NEPA Environmental Assessment, Fresno County, California – Mr. Grove prepared a Bureau of Indian Affairs (BIA) approved environmental assessment (EA) for the expansion of Big Sandy Rancheria in Auberry, California. The expansion included 32 homes, a community garden, a baseball diamond, a community park, and a maintenance building on 71 acres of undeveloped trust land. In addition to the above infrastructure, the project included the construction of access roads, supporting power infrastructure, phone lines, and a consolidated community septic system. This project was performed under the National Environmental Policy Act (NEPA).

Putah Creek Channel Restoration, NEPA Environmental Assessment, Winters, California – Kevin prepared a United States Army Corps of Engineers (USACE) approved EA for the Putah Creek Channel Restoration in Winters, California. The EA covered three distinct project areas for a combined are of 98 acres and 14,400 linear feet of Putah Creek. Mr. Grove prepared a variety of permits for the project, including a Biological Assessment, Clean Water Act 401 permit and certification, a USACE Nationwide Permit, a USACE Pre-Construction Notification, a Section 7 consultation under the Endangered Species Act with the US Fish and Wildlife Service (USFWS) and USACE, a USFWS 1600 streambed alteration agreement, a construction stormwater pollution prevention plan (SWPPP), a workers environmental awareness plan (WEAP) and a wetland delineation. Mr. Grove also facilitated a cultural resources study under the State Historic Preservation Office (SHPO) regulations.

Walnut Park Project – Winters, California – Mr. Grove prepared a variety of permits for the proposed park, including a Biological Assessment, Clean Water Act 401 permit and certification, a US Army Corps of Engineers (USACE) Nationwide Permit, a USACE Pre-Construction Notification, a Section 7 consultation under the Endangered Species Act with the US Fish and Wildlife Service and USACE, a construction stormwater pollution prevention plan (SWPPP), a workers environmental awareness plan (WEAP) and a wetland delineation. The project received all environmental clearance permits and was completed in 2018.

Heather Farm Park, Walnut Creek, California – Mr. Grove oversaw the biological and cultural investigations for the project prior to construction. He oversaw the enforcement of required mitigation measures, including an initial habitat assessment, burrowing owl survey, nesting bird survey, and cultural survey. Following these mitigation measures, environmental clearance was granted, and construction was able to commence on the project.

CEQA / NEPA Special Studies

Air Modeling and Reporting

- CalEEMod
- Caline4
- CT-EMFAC 5

Noise Modeling

- Federal Highway Administrations (FHWA) Traffic Noise Model TNM 2.5
- FHWA Roadway Construction Noise Model RCNM

Biological Resources

Walnut Park Project, Yolo County, California – Prepared as part of a team the Biological Assessment for the construction of an approximately 5-acre park. The project includes playfields, benches and ancillary play structures.

Putah Creek Restoration Projects, Yolo and Solano County, California – Mr. Grove conducted as part of a team the 1600 Permit, Vegetation Inventory Surveys, mapped various species of trees using GPS locations, tree diameters, and aerial photograph interpretations.

Mr. Grove as part of a team also conducted Ordinary High-Water Mark and Wetland Delineation surveys using centimeter accuracy GPS equipment.

Pleasants Dixon Main Drain/V-Drain Enlargement Project – Burrowing Owl Protocol Survey, Dixon, CA – Mr. Grove assisted with a burrowing owl survey to determine the potential presence of burrowing owls on the project site.

Pleasants Creek Bank Stabilization Project – Breeding Bird Survey, Vacaville, CA – Mr. Grove assisted with a breeding bird survey to determine the potential presence of breeding birds on the project site.

Asbestos-Containing Building Material and Lead-Based Paint Surveys

Numerous Projects, California – Mr. Grove managed numerous projects that required asbestos-containing building material and lead-based paint surveys throughout California. Mr. Grove was responsible for coordinating with subcontractors who would perform the sampling and analysis and provide abatement specifications. Mr. Grove reported the findings of these surveys to clients in addition to other site investigation activities.

Stormwater Pollution Prevention Plans (SWPPP)

Numerous Projects, California – Mr. Grove aided QSDs with the preparation and implementation of multiple SWPPP reports. Projects included but were not limited to stream channel restoration, athletic field construction, and park construction. He is trained for on-site water sampling, BMP inspection, and monitoring. He also has experience with the SMARTS online permitting process for Risk Levels 1, 2 and "exempt" projects.

Spill, Prevention, Control, and Countermeasure (SPCC) Plans

Multiple Projects, California and Nevada – Mr. Grove conducted multiple SPCC site inspections to document the inventory and location of hazardous materials at aggregate facilities throughout northern California and Nevada. Mr. Grove provided technical oversight of the SPCC plans during their implementation at each respective Site. Kevin has also prepared training materials for workers at the facilities where the SPCC is implemented.

Compost Facility Permitting

Multiple Projects, California – Mr. Grove has prepared numerous Technical Reports as required under the State Water Resources Control Board (SWRCB) General Waste Discharge Requirements for Composting Operations. These reports include general site descriptions, site maps, operation details, climatology data, geologic setting, hydrogeologic setting, design information, and monitoring information. These Technical Reports allowed each compost facility to receive coverage under the Compost General Order. In addition, Mr. Grove has assisted with the monitoring required under this General Order and the annual reporting.

Professional Affiliations:

American Public Works Association

Robert "Tony" Martin, PG – Principal Geologist

Professional Background:

Mr. Martin began his career as a geologist in 1987. His academic background includes a Bachelor's, and Post-Baccalaureate studies in Geology at California State University at Fresno. Additionally, Mr. Martin has taken dozens of continuing education classes in hazardous materials, geology, groundwater, environmental chemistry/engineering/law, management and leadership from various colleges across the US. He has been an officer in numerous professional and community-based organizations; and managed professional/technical staff of over 250 people. He has negotiated and coordinated with local, state and federal oversight agencies in the southwestern U.S., and presented to the public at a variety of public participation meetings. Mr. Martin's technical expertise includes environmental consulting, project management and expert witness services for multi-disciplined projects, site assessment, remediation, water resource and CEQA / NEPA related services for transportation, energy, industrial, water, solid waste and Brownfields projects.

Relevant Experience:

Phase I Environmental Site Assessments

Numerous Sites-Conducted and provided technical oversight for hundreds of Phase I Environmental Site Assessment (ESA) sites for banks, lenders, developers, schools, public agencies, and Fortune 500 companies throughout the western United States. Many of the ESAs were used to provide information for the hazardous materials sections of Environmental Impact Reports (EIRs).

Stockton Highway 99 Corridor ISA-Mr. Martin managed, conducted and provided technical oversight for a Caltrans Initial Site Assessment (ISA). The corridor was over 7 miles in length and extended from the interchange with SR-4 to Hammer Lane in Stockton, California. This corridor through an older, industrialized area of town had approximately 9 sets of on-/off-ramps onto this 4-lane highway. The project involved widening the freeway to six lanes, improving sight lines, adding acceleration and deceleration lanes, reducing the number of ramps, and bringing the remaining interchanges up to more modern-day standards.

The project evolved into several Preliminary Site Investigations (PSIs) and Detailed Site Investigations (DSIs) for the areas of concern which included underground storage tanks, ponds, equipment storage yards, wash racks and smaller salvage yards. The PSI also included an Aerially Deposited Lead (ADL) study.

Qualifications

Registrations / Certificates:

Geologist (P.G.)
CA – No. 6768, 1998

Geologist (R.G.)
OR – No. G2817, 2022

Geologist (L.G.)
WA – No.22020436, 2022

Responsible Managing Employee (RME), California
- C57 #467252
2/13/2003 to 9/2/2011
- C57 #490942
2/6/2018 to Present

HAZWOPPER trained per 40CFR1910.120

Education:

Fundamentals of Professional Practice, ASFE, 2000

Numerous continuing education courses in hazardous materials, geology, environmental law, management and leadership.

Post-Baccalaureate Studies in Geology, California State University Fresno, 1986-1987

B.A., Geology, California State University Fresno, 1986

Experience:

BSK Associates- 2013 to Present

Terracon- 2011 to 2013

Kleinfelder- 1994 to 2011

Krazan- 1987 to 1993

Stanislaus County Measure L Sidewalks/Street Improvement Project, Stanislaus County, California-Mr. Martin managed the entire project (geotechnical and hazardous materials services), conducted and provided technical oversight for a Caltrans Initial Site Assessment (ISA) and an Aerially Deposited Lead (ADL) Study. The project included 4 separate areas throughout the County. All of the areas were in or near very old residential areas. Two of the areas also covered some industrial areas. The geotechnical investigation and the ADL Study were each summarized into one report. Whereas, the ISAs were done as four separate reports.

Bradshaw/Sheldon Intersection Improvement Project, Elk Grove, California-Mr. Martin managed the entire project (geotechnical and hazardous materials services) and provided technical oversight for an Aerially Deposited Lead (ADL) Study. The project consisted of replacing the existing bridge at the Sheldon Road and Bradshaw Road intersection with a precast reinforced concrete box culvert (RCBC). The existing bridge was constructed in 1940 and widened in 1970 and was supported on shallow foundations. The RCBC was approximately 260 feet long (oriented northeast to southwest), 35 feet wide (three segments of 10-feet clear width), and approximately 6 feet clear height. The new intersection design consisted of a roundabout and approximately 600 feet of roadway realignment in each direction to accommodate the new intersection. Portions of the Laguna Creek were rerouted near the intersection. This necessitated filling in portions of the existing creek on the northeast side of the intersection and excavating new portions of creek on the southwest and northeast side of the intersection.

Numerous Transportation Sites-Mr. Martin managed, conducted and provided technical oversight for many Phase I Environmental Site Assessment (ESA) for transportation projects. For California transportation projects, the work was done to satisfy the Caltrans Initial Site Assessment (ISA) guidelines, as well as the current American Society of Testing Materials (ASTM) standard and the USEPA All Appropriate Inquiry (AAI) requirements. Some of the projects evolved into Preliminary Site Investigations (PSIs) and Detailed Site Investigations (DSIs) for the areas of concern which included underground storage tanks, ponds, equipment storage yards, wash racks and smaller salvage yards. Additionally, Aerially Deposited Lead (ADL) Studies were frequently conducted. Some of the projects included portions of SR 180 in southern Fresno, State Route 4 ("Crosstown Freeway") in Stockton, several interchanges along I-5 through San Joaquin County and in Southern California, a small portion of State Route 120 in Escalon, the Jack Tone / SR99 Interchange in Ripon, and portions of the I-710 Gap Project east of Los Angeles. Many of the ESAs were also used to provide information for the hazardous materials sections of Environmental Impact Reports (EIRs). The assessments were done in conjunction with the Caltrans design teams or for local self-help agencies.

Dougherty Valley High School Expansion Project, San Ramon, California-Conducted portions of, and provided technical oversight for, a Phase I Environmental Site Assessment for a large addition project at an existing high school. The site was given a letter of no further action by the State of Toxic Substances Control without any Preliminary Endangerment Assessment (PEA) services being required.

Proposed Sand Lane Elementary School, Manteca, California-Conducted portions of, and provided technical oversight for, a Phase I Environmental Site Assessment (ESA), for a proposed elementary school. That ESA was used as the basis for the hazardous materials section of an Environmental Impact Report (EIR). Also, completed the geology and groundwater sections for that EIR.

Lafayette Elementary School Addition (Former Lafayette Public Library), Lafayette, California-Mr. Martin was the project manager and provided technical oversight of a Phase I Environmental Site Assessment (ESA), a Preliminary Endangerment Assessment (PEA), a Supplemental Site Investigation, a Remedial Action Workplan, remedial activities, and a Remedial Action Report for the addition to this elementary school. The scope of work included an ESA in accordance with California Education Code Sections 17210 and 17213.1 which included evaluation for radon, naturally occurring asbestos (NOA) and mercury. Based on the results of the ESA, a PEA was required to address possible migration of dry cleaning chemicals in groundwater from a nearby site and sampling of the near-surface soils for lead, termiticides and other pesticides. Termiticides were found to be present immediately surrounding the building which required cleanup. The cleanup was handled most economically and expeditiously by digging up the shallow soils and disposing of the soil offsite. However, there were challenges such as protecting some adjacent large trees whose wellbeing had to be preserved during digging near their roots.

Bristow Middle School Theater, Brentwood, California-Mr. Martin was the project manager (for part of the project) and provided technical oversight of a Phase I Environmental Site Assessment (ESA), a Preliminary Endangerment Assessment (PEA), for the addition to this middle school. The addition was most recently part of a City park, but at one time was part of an old oilfield. The scope of work included an ESA in accordance with California Education Code Sections 17210 and 17213.1. Based on the results of the ESA which included some limited environmental sampling for residual ag chemicals, a geotechnical investigation and geohazards investigation, a PEA was required to address vertical and lateral extent of residual organochlorine pesticides. This PEA is still underway.

Multiple Wineries, Napa Valley, Lodi, Ripon, Woodbridge and Manteca, California- Mr. Martin managed and/or provided technical oversight for Phase I Environmental Site Assessments for property sale/refinance for numerous properties within Northern California.

Confidential Agricultural Chemical Facility, Sacramento Valley, California-Conducted portions of, and provided technical oversight for, a Phase I Environmental Site Assessment for an agricultural chemical facility which was in an industrial area with other agricultural chemical facilities nearby. Recognized Environmental Concerns (RECs) and Historical RECs were identified, and subsequent Phase II Environmental Site Assessments were performed.

Site Assessment / Phase II Environmental Site Assessments

Multiple Transportation Projects in California-Mr. Martin managed, conducted or provided technical oversight for the hazardous materials investigation (RI/FS, or Caltrans PSI / DSI) for many transportation projects including the State Route 120 (SR 120) relocation project through the City of Escalon, the Jack Tone

/ SR 99 interchange in Ripon, many investigations along the SR 99 Improvement Project through Stockton, numerous interchanges along I-5 throughout California, portions of the I-710 Gap Project east of Los Angeles, and the SR 4 extension through San Joaquin County. . The projects each included the assessment of multiple properties including hazardous waste sites, bulk oil distributors, fuel stations, garages, naturally occurring asbestos (NOA) and numerous other potential environmental concerns. Many of these projects were done for the local self-help agency, or the design teams for said agencies or Caltrans. All received Caltrans and/or FHA funding. The findings were also sometimes included in the Environmental Impact Reports for the projects.

Lemoore Naval Air Station, Lemoore, California-Mr. Martin provided technical interpretation/oversight, regulatory agency negotiation, and project management services for a site assessment and mitigative measures related to a release of approximately 6,600 gallons of fuel to shallow groundwater that occurred on the base over approximately 2 days. The release produced vapor intrusion into a building that caused immediate evacuation of the facility on the base.

Travis Air Force Base, Fairfield, California-Provided technical interpretation, regulatory agency negotiation, and project management services for numerous environmental (RI/FS) projects on the base. The work included the investigation of Ramps 400 / 500 during a time of heightened military alert status.

Fresno Yosemite International Airport (FAT), Fresno, California- Managed and technically oversaw a Preliminary Site Investigation (PSI) for Per- and Polyfluoroalkyl Substances (PFAS) for the Fresno Yosemite International Airport. The airport is a joint civil-military airport that is owned and operated by the City of Fresno. In addition to providing commercial air services, FYI is home base to the California Air National Guard 144th Fighter Wing, the California Army National Guard Aviation Classification Repair Activity Deport (AVCRAD), and the US Forest Service (USFS) / California Department of Forestry (CDF) Air Attack Base. The airport was originally founded as Hammer Airfield in June 1942 and was used as a training facility by the United States Army Air Forces during World War II. After the end of World War II, commercial air service began in 1948. The investigation of the 13 potential release areas included the advancement of 41 shallow borings, the installation of 4 temporary groundwater monitoring wells (maximum depth of 140 feet), the installation of 2 permanent groundwater monitoring wells (maximum depth of 150 feet), the collection and chemical analysis of subsurface soil and groundwater samples, data analysis, and preparation of a report of findings. The investigation is currently still underway.

Stockton Metropolitan Airport (SCK), Stockton, California- Mr. Martin managed and technically oversaw a Preliminary Site Investigation (PSI) for Per- and Polyfluoroalkyl Substances (PFAS) for the Stockton Metropolitan Airport. The work addressed included the advancement of twenty (20) shallow borings, the installation of six (6) temporary groundwater monitoring wells, collection and chemical analysis of subsurface soil samples and groundwater, data analysis, and preparation of a report of findings for the 3 potential release areas on the airport. The workplan for the next phase of the investigation is currently still underway.

Numerous Underground Storage Tank Sites, California-Managed all phases of over 200 underground fuel storage tank removal sampling projects throughout California for Chevron USA, Shell Oil Company, ARCO, Mobil Oil Company and many other clients. Many of these projects required follow-up investigations (RI/FS) and remediation.

Shuttered Industrial Facility, Colusa County, California- Mr. Martin managed and provided technical oversight for an RI/FS of a shuttered industrial facility that had 1,1-DCA, 1,1-DCE, PCE, TCE, 1,4-Dioxane, metals, Cr+6, and fuels in soil and shallow groundwater beneath the site. The last of the RI/FS and sensitive receptor survey is being completed at this time, and interim remedial measures are being undertaken pending conception and approval of a Remedial Action Plan.

Proposed M4 Elementary School, Fresno, California-Provided technical oversight of a Preliminary Endangerment Assessment (PEA) and conducted, managed and provided technical oversight of a cleanup for a large proposed elementary school. The site had underground fuel storage tanks, improperly abandoned domestic wells, asbestos and lead based paints in existing residences, and pesticides (predominantly termiticides) in the shallow soils. This cleanup was conducted while protecting an adjacent middle school and residences from exposure resulting from the cleanup. All phases of the work managed by Mr. Martin were also conducted at or below budgets.

Confidential Former Dry Cleaner Site, Eastern San Francisco Bay Area, California-Mr. Martin managed, provided technical oversight and provided expert witness-related services for a former dry cleaner with soil and groundwater contamination. Groundwater was present beneath the site at a depth of approximately 25 feet below the surface in a two-zone unconfined aquifer. The site is surrounded by three or more UST sites with comingled plumes. Mr. Martin and his project team investigated the dual zone aquifer with numerous monitoring wells ranging in depth from 40 to 100 feet below the ground surface over an area of approximately 6 square blocks. Additionally, vapor encroachment of perchloroethylene (PCE) and related compounds was investigated, and risk assessed. Indoor air for commercial and residential properties were sampled and evaluated. A feasibility study (FS) was submitted which recommended a combined technology of in-situ chemical reduction and enhanced microbial degradation. Also, the FS proposed passive subslab vapor venting once a building is constructed. A remedial action plan (RAP) and notice of intent (NOI) was submitted and approved. Remediation is pending.

Major Oil Company Bulk Plant, Tulare County, California-Managed and/or provided internal oversight for all phases of an RI/FS project which involved the installation of approximately seventeen temporary groundwater monitoring wells, over one dozen permanent monitoring wells, quarterly monitoring, aquifer testing, and remedial system evaluation for a site with up to one foot of free-phase product involving one or more of the following petroleum products: gasoline, diesel, mineral spirits, kerosene, and weed oil. The plume was later noted to extend to approximately 1/2 of a mile from the project site towards a National Priorities List site within an aquifer of extremely high transmissivity.

Major Oil Company Bulk Plant, Kern County, California-Managed and provided oversight for all phases of an RI/FS project which involved the installation of approximately eighteen exploratory soil borings at an oil company bulk plant. Investigation was continued to a depth of approximately 150 feet below ground surface and groundwater was present at that time at over 210 feet below the ground surface. The contaminants of concern were both gas and diesel. Site closure was obtained for the client without any active remediation.

Kozy Shack Pudding Plant, Turlock, California-Mr. Martin conducted and managed a Phase II Environmental Site Assessment of this food processing facility which included a magnetometer, electromagnetometer and ground penetrating radar survey of suspected UST locations and soil and groundwater sampling.

Large Box Retailer Development Site, Kern County, California-Provided project management and overall project oversight for site assessment of a retail development where a portion of the property had been previously used for the storage of vacuum truck tank bottoms and other solids and semi-solids derived from oilfield operations in the area. The solids covered a large area of the property but was found to be limited in their vertical extent (upper 25 feet).

Retail Distribution Center, Merced, California-Provided project management and overall project oversight for an RI/FS project which included the installation of approximately six groundwater monitoring wells, the excavation of approximately 1,500 cubic yards of diesel fuel contaminated soil, the quarterly monitoring of said groundwater monitoring wells, and the construction of a surface impoundment for the bioremediation of the diesel-impacted soil which took 6 weeks to degrade concentrations of TPH-D from several thousand parts per million to less than 20 parts per million.

North Fork Ranger Station, Madera County, California-Managed and provided oversight for various phases of several projects at the North Fork Ranger Station. Those projects included, but were not limited to, site assessments (RI/FS) of 12 underground storage tank sites, a Pesticide Storage Building site assessment, miscellaneous herbicide spill locations, an aeration project, a diesel bioremediation project, and risk assessments. Some of the field assessment was done in Level B and Level C PPE.

Pipeline Leak Site, Avila Beach, California-Managed the emergency initial site investigation (RI/FS) services for this pipeline leak site. The pipeline carried semi-refined crude oil/diesel fuel/unleaded gasoline from an offshore handling facility to a bulk handling facility located on the city's main street. Investigative techniques included a detailed soil vapor contaminant assessment, the advancement of soil borings, and the sampling of groundwater using a Hydropunch and numerous monitoring wells. The aquifer was tested, and tidal fluctuations and groundwater gradient were monitored using dataloggers. The study area covered approximately 6 to 12 square blocks. The emergency investigative services included discrete nighttime services during spring break. Mitigative activities conducted for this pipeline leakage has reportedly totaled over $100 million.

Former Chrome Plating Facility, Fresno County, California-Managed and provided technical oversight of an investigation under State of California Department of Toxics Substances Control (DTSC) regulatory oversight of a facility with near surface soil contaminated by cadmium, cyanide and lead. Soil vapor beneath portions of the site was impacted by PCE, TCE and other volatile organics. Groundwater contains PCE, TCE, Cyanide, Cr+6, and other metals. The site is near a few residential structures and a school and is still under investigation at this time.

Potential Pipeline Leak Site, Tracy, California-Provided senior level review and quality control for a future industrial site which was developed on a site which had a crude oil pipeline that was to be relocated. Investigative techniques included soil sampling and an infrared aerial survey of the pipeline to note temperature gradients which might have been indicative of backfilled excavations and/or leakage.

Confidential Agricultural Chemical Burial Site, Fresno County, California- Mr. Martin provided project management and overall technical oversight for a project which included review of another consultants Phase I ESA, developed an approach for a Phase II ESA, and implementation of the Phase II. During those site assessment activities, approximately 3 dozen drums containing agricultural chemicals as well as miscellaneous farm/home refuse were discovered. Upon its discovery Mr. Martin's team oversaw the excavation, overpacking and disposal of the drums containing chemicals, investigation of the burial area for information as to who buried the materials and when, overexcavation of contaminated soil and confirmation sampling. Later, Mr. Martin provided expert witness and percipient witness testimony in the cost recovery litigation for the discovery. That litigation was successful.

Tire Fire Site, Fresno, California- Mr. Martin managed and provided technical oversight of a bank owned site that had a large tire fire. The tires smoldered for months leaving a fine ash high in semi-volatiles and metals. A biodegradable polymer fixent was sprayed over the ash to limit airborne dust from impacting nearby residents and to inhibit leaching. Additionally, site security measures were implemented to prevent trespassing. Later the ash (with polymer) was removed and hauled to a hazardous waste disposal facility and confirmation testing was done to confirm the adequacy of excavation.

Quitclaimed Pipeline Easement, Gustine, California-Managed this project which involved third-party observation and review of a crude oil cleanup performed by an oil company in a large farm complex. The cleanup involved the excavation and disposal of over 100,000 cubic yards of contaminated soil by the oil company. Successfully provided expert witness support to the farming operation's litigation team.

Confidential Agricultural Facility, San Joaquin County, California-Managed, interpreted, provided technical oversight and supplied technical support and expert witness services to a litigation team for a defendant who was being sued by an adjacent property owner due to high groundwater conditions and elevated nitrates in the shallow perched groundwater. Additionally, worked to optimize water use, implement best management practices related to water and fertilizer use and provide subsurface assessment of the vadose zone, perched aquifer and deep unconfined aquifer on the subject site and adjacent properties. Ongoing monitoring required by the State of California RWQCB was also conducted. This project is still ongoing.

Confidential Agricultural Facility, Kern County, California-Managed, interpreted, provided technical oversight and supplied technical support to a litigation team for a property owner with agricultural chemicals in soil of a chemical mixing area of a large farm complex. Work was conducted in Level C PPE.

Confidential Oil Field, Los Angeles County, California-Managed and provided technical oversight of ongoing methane monitoring of both abandoned and active wells in accordance with local community, county, and State of California Division of Oil, Gas, and Geothermal Resources (DOGGR) standards and regulations.

Confidential Residential and Park Development Site, Former Pipeline Leak Location, Tracy, California- Managed, interpreted, provided technical oversight and supplied technical support and expert witness services to a litigation team for a residential development on a site which had a historic pipeline that carried crude oil and semi-refined product. Investigative techniques included soil and groundwater sampling, working cooperatively with the oil company and their consultant to develop a soil management plan for any future discovered contamination, work with the developer's counsel to draft disclosure language to future home buyers and work as an expert witness with the developer's counsel for cost recovery.

PG&E Maintenance Facility, Fresno, California-Managed, interpreted, provided technical oversight to a prime consulting firm for a RI/FS of PCBs in shallow soil. Fieldwork was conducted in Level C PPE.

Confidential Residential Development Site, Former Pipeline Leak Location, Santa Nella, California- Managed this project which involved third-party observation and review of a crude oil cleanup performed by an oil company on a large residential development.

The cleanup involved the excavation and disposal of millions of cubic yards of contaminated soil by the Oil Company, dewatering and treatment of groundwater, additional site assessment in the pipeline ROW, risk assessment and formulation of a soil management plan. Mr. Martin also worked with the developer's counsel on cost recovery, which to date has been settled out of court.

Water Supply

Confidential Property, Central Coast, California – A permit for surface water diversion and use was filed with the State of California Water Resources Control Board (SWRCB) in 1989 for this Central Coast site. The use of the water was to be for fire protection, stock watering, irrigation and domestic use. The permit was approved in 1996. A site inspection was conducted by the SWRCB in 2007. The site was noted to be out of compliance with the approved permit. Upon realizing they were out of compliance, BSK was contracted to get the project back on track so that the water rights would not be lost. Mr. Martin managed and provided technical oversight for the licensing project. As part of the project, Mr. Martin oversaw the review, data analysis and summary of approximately seven years of back-data that had gone unreported. He specified a variety of measuring devices for the diversion, the onsite water storage ponds and another onsite water source. He reviewed contractor submittals during a retrofit project for the measuring devices. Generally

speaking, the site has a "Permit for Diversion and Water Use". After issuance, the applicant was required to do ongoing submissions while the "project" was being completed. Now that the project is completed, the permit is awaiting licensing by the SWRCB.

Wastewater / Waste Discharge Requirements (WDRs)

City of Auburn Wastewater Treatment Plant, Auburn, California – Mr. Martin managed and provided technical oversight of WDR ground and surface water monitoring for a municipal wastewater treatment plant whose effluent is discharged to a surface water body. Additionally, Mr. Martin cooperatively worked with two other firms to identify problems with the treatment system that allowed high coliform bacteria concentrations to make it into groundwater and the plant effluent. This was long term work that was performed over a period of about a decade.

Multiple Wineries, Napa Valley, Lodi, Ripon, Woodbridge and Manteca, California- Mr. Martin managed and/or provided technical oversight for Waste Discharge Requirement (WDR) monitoring of groundwater, wastewater, land application areas, etc., design of land application areas and a variety of other related services On many of these projects services were provided for 10-15 years or more.

Rosedale Spreading Basin WDRs, Kern County, California- Mr. Martin managed and/or provided technical oversight for Waste Discharge Requirement (WDR) monitoring of groundwater and a variety of other related services.

Pacific Coast Producers, Woodland and Oroville, California- Mr. Martin managed and provided technical oversight of the production of a Sampling and Analysis Plan (SAP), and ongoing groundwater monitoring for these facilities. The Woodland facility is reportedly one of the world's largest retail tomato canning facilities. The Oroville facility cans peaches, pears, fruit cocktails as well as some salsas.

California Natural Products, Lathrop, California- Mr. Martin managed and provided technical oversight negotiations with the State of California Central Valley Regional Water Quality Control Board, Waste Discharge Requirement (WDR) monitoring of groundwater, wastewater, land application areas, etc., production of a Sampling and Analysis Plan (SAP), and assisted with an Operations and Maintenance Plan (O&M Plan) and a variety of other related services for this facility that processes rice and soy into food products such as rice syrup, rice syrup solids, rice milk, a variety of soy food products, teas, and soups.

Remediation & Compliance

Crude Oil Soil Contamination Site, Sunset Midway Oil Field, Kern County, California-Managed and provided technical oversight of an RI/FS/remediation project in which a total of 23,700 cubic yards of crude oil-contaminated soil were excavated from numerous areas of a future retail site from depths of up to 35 feet. All the crude oil-affected soils were placed in four specially-designed containment cells constructed on site in the future parking areas. Excavation activities at the site also included the removal of approximately 15,000 cubic yards of unaffected soil. Mr. Martin's involvement also included

negotiations with the national retail client, the State of California Division of Oil, Gas, and Geothermal Resources, the State of California Regional Water Quality Control Board, the local municipality, and attorneys and civil engineers for all parties. Coordination of excavation surveying and analytical laboratory subcontractors was also accomplished. Total cost of the mitigative measures, limited investigation, confirmatory sampling, and regulatory negotiations was approximately 1/3 of the next lowest consultant's estimate. Total cost of the services performed was approximately $600,000. Mr. Martin's approach for this project saved millions of dollars in development costs. Because of the success of the project, a local redevelopment agency contracted Mr. Martin's firm for similar services on their adjacent property involving 1,000 cubic yards of crude oil-affected soils to be excavated from a stream channel and drainage diversions, placing those soils in containment cells on their property.

Southern California Edison Pole Treatment Facility, Visalia, California-QA/QC and project management oversight for a wooden utility pole treatment facility in which more than 250,000 gallons of creosote and 900,000 gallons of diesel with pentachlorophenol were used for pole treatment. This site was listed on the USEPA National Priorities List (NPL). Over 7 groundwater excavation wells have been installed within the 2-aquifer system as part of the RI/FS. Over one billion gallons of water have been extracted and treated using carbon absorption and/or u.v./ozone remedial treatment. Numerous pilot tests, soil vapor extraction tests, and bioventing tests were also performed on site. Additionally, site history research, treatment system operation and maintenance, and miscellaneous disposal-related activities were performed.

Los Vaqueros Project, Contra Costa, California-Managed and wrote portions of a Construction Activity Stormwater Pollution Prevention Plan for the Vasco Road Realignment (12 miles). The area of the relocation included hazardous materials concerns, up to 100-foot deep cuts and fills, and endangered species concerns. Additionally, managed, and was involved in the design, construction, operation and maintenance of a water treatment system for a dewatering effluent which contained free-phase crude oil and other refined and semi-refined petroleum products. The system was designed in four working days, permitted through the State of California RWQCB in one working day, and constructed in eleven days. The system was designed to treat in excess of 600 gallons/minute and was manned around the clock for approximately 3 months due to safety, security, and property-related issues. To avoid flooding the excavation, the treatment system could not be shut off, even for system maintenance. Over 17 million gallons of water were treated. Mr. Martin also assisted the Contra Costa Water District with technical support for mediation.

The quick service provided to the District saved the District over $500,000/day in delay costs. The District was able to recover approximately 98 percent of all costs claimed. This project earned Mr. Martin and his project team the "President's Award" for best overall project within Kleinfelder that year.

Numerous Post-Incident Locomotive Horn Testing, Multiple Locations, California- Mr. Martin, managed and/or performed numerous locomotive horn tests following accidents for one major and a couple of minor railroads in support of the legal teams' accident investigations. Testing was done in accordance with 49CFR.

Former Disco Facility, Stockton, California-Managed the design, permitting, construction and first 2 years of operation/maintenance/monitoring for a project in which Mr. Martin and his project team evaluated a plume of TPH and 1,2 DCA groundwater contamination. The contamination originated from a former fueling facility and migrated approximately 400-500 feet offsite, traversing beneath a major highway and to within 100 feet of an elementary school. In addition to its sizeable length, the plume was over 140 feet deep, had migrated 100 feet vertically into groundwater, and was in two separate hydraulic zones. The client had previously attempted to control the plume and remediate the site over the course of 11 years with little success. Under pressure from regulators, the client was asked to develop a new approach subject to their review and approval. Mr. Martin and his project team developed an innovative strategy involving aggressive deep air sparging and high vacuum SVE to remediate the source area and capillary fringe contamination. For the fugitive offsite plume that comprised primarily 1,2 DCA, we constructed and are currently operating and maintaining a remote ozone sparge curtain. The curtain comprises five triple-nested wells that inject air mixed with ozone to oxidize dissolved contamination as it traverses the curtain. The essence of this approach was to eliminate the source area contamination while controlling migration of the offsite plume, as opposed to a more costly approach of trying to remediate the entire plume at once. We outlined our approach to the regulators, which was approved without reservation. We utilized horizontal direction drilling (HDD) to place a 2-inch casing through which individual lines of tubing were run to supply the remediation wells. Also, run though the casing were electrical lines to individually activate solenoids at each wellhead, thus allowing enormous control and flexibility in optimizing operation of the curtain and the 15 sparge points it entails. The system is still in operation and results are exceeding expectations. The solvent concentration at the leading edge of the fugitive plume has dropped by over 75% to nearly non-detectable levels. The petroleum concentrations in the source area have dropped by an average of approximately 80%.

Brownfields

Brownfields Hazardous Materials and Petroleum Community-Wide Site Assessment Grants, Rancho Cordova, California-Mr. Martin managed and provided technical oversight of the portfolio of projects for the City of Rancho Cordova's two (Community Wide Site Assessment-Petroleum and Community Wide Site Assessment-Hazardous Materials) Brownfields grants. That work included community outreach, a grant area planning project (which included grant area research, and field reconnaissance), Phase I Environmental Site Assessments, Sampling and Analysis Plans, geophysical surveys, Phase II Environmental Site Assessments, etc.), and even a planning level study with a GIS deliverable. This work was conducted from 2011 to 2017.

Purity Oil Recyclers, Superfund Site, Fresno County, California-Involved with potentially responsible party group (PRPs) in the management of field activities such as groundwater sampling (RI/FS), remedial system design, regulatory agency negotiations, etc. The site is listed on the USEPA National Priorities List (NPL). The estimated remediation cost for this project was later estimated to exceed over $100,000,000.

Brownfields Hazardous Materials and Petroleum Community-Wide Site Assessment Grants, Oroville, California-Mr. Martin managed and provided technical oversight of the portfolio of projects for the City of Oroville's two Brownfields grants. That work has to-date included community outreach, a property screening and prioritization evaluation, Phase I Environmental Site Assessments, and Phase II Environmental Site Assessments, etc. This work is currently ongoing.

Former Spreckels Sugar Plant 2, Manteca, California-Managed all aspects of a Phase I / II Environmental Site Assessment for the Former Spreckels Sugar Plant No. 2. The site has been the location of a former beet sugar processing plant since 1916. The property continues to be redeveloped as a 362 acre mixed-use development called "Spreckels Park."

Because of a pending property sale, the entire project was conducted on a fast-track basis. Initially, Mr. Martin and his project team started the project by conducting a Phase I Environmental Site Assessment (ESA) in accordance with ASTM Standard E 1527-94. The ESA included but was not limited to a search of environmental databases and lists, a very thorough site reconnaissance, evaluation of the manufacturing process, evaluation of aerial photographs, numerous personal interviews, a review of Spreckels Development's files dating back to approximately 1915, a review of regulatory agency files, etc. Based on the assessment, twenty-seven recommendations were made for further investigation or mitigation.

A Phase II Environmental Site Assessment (RI/FS) was conducted to address the 27 recommendations in the ESA. Members of the Development Committee asked that all environmental concerns known to the project team be investigated, including rumors. During the "fast-track project," a total of approximately 1,000 soil samples and approximately 40 discrete groundwater samples were collected from approximately 500 borings and surface sample locations for lithological logging purposes, field screening and for potential chemical analysis. Approximately 600 of the samples obtained were analyzed for selected constituents. Groundwater samples were also obtained from 11 existing groundwater monitoring and production wells on site. Additionally, twenty-two (22) groundwater-monitoring wells were installed on the property; all of which were later sampled for chemical analysis. Building material samples were also analyzed for lead-based paints and asbestos. Soil-gas probes were installed in select areas. Geophysical techniques (magnetometer, electromagnetometer and ground penetrating radar) were used to search for buried debris throughout areas of concern. In the areas identified by geophysical methods, exploratory trenching was used for confirmation purposes. The data accumulated during the field and laboratory studies were summarized and evaluated. Statistical and Risk Assessment approaches were also utilized. The results of the Phase II assessments were detailed in approximately 40 different reports which were submitted to the Client, and subsequently to the appropriate regulatory agencies for review. Regulatory closure was requested for many of the areas investigated. Mitigation measures were proposed for a few other concerns.

Mr. Martin also represented the client in the regulatory closure process for existing on-site wastewater ponds, disposal areas and other portions of the property. The ponds on site were under a pre-existing Waste Discharge Requirements (WDRs) and a Monitoring and Reporting Program (MRP)> The ponds on site consisted of three "mud ponds" which contained the sediment that was rinsed off the sugar beets as they entered the process, A group of five "lime ponds" and three "wastewater ponds". During the processing of the sugar beets the beets are sliced/diced and boiled to extract the sugar. As part of the process lime is added to the solution to remove impurities. Once used, the lime solution is the consistency of a thick milkshake. The spent lime solution was pumped to these ponds and allowed to sit for years to get the lime to dry. The five lime ponds were cycled so that ponds were in various stages of dewatering. The pond with the least water content would then be excavated and sent by conveyor to a rotary kiln where the organic impurities were burned out of the lime and the lime was reused. Approximately 200,000 cubic yards of spent lime was on site in the lime ponds. The lime was tested to show it was not hazardous. Mr. Martin then negotiated with the Central Valley Regional Water Quality Control (CVRWQCB) staff that the spent lime was not even a waste as it was being dried, impurities removed, and then reused on site. Together with a senior geotechnical engineer, Mr. Martin showed that the blending of the spent lime with the silts and clays in the mud ponds was a valid reuse of the materials to stabilize the fine grained soil and not application of a waste to the land. It was also shown through a series of leachibility tests that the mix was unlikely to impact groundwater quality. Nevertheless, the mixed material was only used under industrial areas of the redevelopment where it was going to be paved to further inhibit leaching. This approach saved the developer tens of millions of dollars and avoided killing the project.

Stockton Downtown Redevelopment and Brownfields Sites, Stockton, California-Provided technical support to an EPA contractor for the former McCormick & Baxter Creosoting Co. Superfund site. Managed and provided technical oversight of a Phase I / Phase II Environmental Site Assessment of the Delta View Apartments on the south shore of the Stockton Waterfront. Managed and provided technical oversight for a portion of the City of Stockton Brownfields site. This site was the winner of a 2002 EPA Region IX Phoenix Award. Also, managed and provided technical oversight for the evaluation of two alternative baseball stadium sites as a portion of the Environmental Impact Reports for the Stockton Mudville Nine (A – Affiliate of the Oakland A's). Eventually, the North Shore Alternative was selected, and that site went on to be the 2008 winner of the EPA Region IX Phoenix Award.

Later provided technical oversight for the evaluation of several properties around the new EDD site on the south end of the channel for the City of Stockton Redevelopment Agency. Many of these projects included cleanup, third-party review of other consultants' work, and legal team support in cost recovery.

Solid Waste

Sierra Conservation Center, Jamestown, California-Managed and provided technical oversight for several years for groundwater and vadose zone monitoring at this Central California Prison Landfill.

Rice Road Landfill, Fresno, California-Managed and provided technical oversight for groundwater and landfill gas monitoring at this site.

Florin-Perkins Landfill, Sacramento, California-Mr. Martin was the project manager and provided third party technical oversight for construction quality assurance for the landfill cap of three large waste cells. The 3-foot-thick low-permeability soil cap consisted of foundation, engineered, and vegetative layers. Also assisted in some erosion mitigation and landfill gas waste characterization.

Committees and Commissions:

- City of Fresno Little Hoover Commission, Fresno, California (Water Division, Sewer Division and Wastewater Treatment Facility)
- Sacramento Chapter, American Public Works Association, Board Member and Chapter Officer, 2011 to 2017. Past President and Committee Chair 2017 to Present.
- San Joaquin Engineer's Council, Chair and longtime board member, 2012 to 2020

Awards:

- Stan Wilkening Member of the Year, Sacramento Chapter of the American Public Works Association, 2010
- President's Award for Outstanding Project, Los Vaqueros Water Conveyance Pipeline, Kleinfelder, 1996
- Interdisciplinary Award, Disco Remediation Site, Kleinfelder, 2003
- Co-author, "Fast-Track Water Treatment, Los Vaqueros Water Conveyance Pipeline Project, Byron, California", Technical Papers of the 12th Annual Environmental Management and Technology Conference West, Zenobia and Martin, (HazMat '96 West)
- Co-author, "Emergency Construction, Operation and Maintenance of a 600 gpm Dewatering Treatment System", Technical Seminar, Zenobia, Martin and Paulson, April 1996
- Co-author, "Removal of MTBE and other Oxygenates in Groundwater using Emerging Technologies", Technical Seminar, Jenkins and Martin, Denver, Colorado, February 2003
