Hello Richard. We are in receipt of CPUC's letter titled ENVR 20250200003. Thank you for reaching out to us with your concerns about the Notice of Exemption (NOE) we filed for Amigos de los Rios' (Amigos) Environmental Enhancement and Mitigation Grant Program proposal for the Emerald Necklace Rio Hondo Greenway Phase III Project.

The project location we described on our NOE was incorrect. Amigos is proposing to enhance the existing bike trail on the east side of the Rio Hondo between Peck Road Water Conservation Park at the northern terminus and Valley Boulevard at the southern terminus. As is clearly demonstrated in the attached Site Plan, there are no improvements proposed on the west side of the Rio Hondo. The nearest improvements to the railroad bridge are two new trees that are proposed to be planted to the north of the bridge (refer to page 2 of the attached PDF), and again, both will be planted on the east side of the channel adjacent to the existing bike trail.

Please confirm if this clarifying information allays your concerns about the proposed project. We will work with the State Clearinghouse to correct the locational information contained on NOE 2025010989.
