EXECUTIVE SUMMARY

Apex Companies, LLC (Apex) has performed this Phase I Environmental Site Assessment (Phase I ESA) on the proposed Acacia residential subdivision located at the southeast corner of Nuevo Road and Wilson Avenue in Perris, Riverside County, California (hereinafter referred to as the "Target Property"). This Phase I ESA was performed in general conformance with the scope and limitations of ASTM International (ASTM) Practice E1527-13 and additional terms and conditions required by contract with D. R. Horton, Inc. (DHI). Any exceptions to, or deletions from, this practice are described in **Section 2.3** of this report.

PROPERTY DESCRIPTION

The Target Property is comprised of 57 unimproved lots in Tract 21651 (lots 1-57) that are assigned Riverside Assessor Parcel Numbers 311-161-001 through 311-161-035 and 311-162-001 through 311-162-022. The Target Property is bordered on its northwest by a vacant lot; bordered on its north by East Nuevo Road followed by Perris KinderCare and Providence Perris Apartments; bordered on its east by single-family residences; bordered on its south by single-family residences; and, bordered on its west by Wilson Avenue followed by single-family residences.

SITE AND AREA RECONNAISSANCE

An Apex professional mobilized to the Target Property on March 4, 2020 to conduct a reconnaissance visit with the objective of identifying any recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), or historical recognized environmental conditions (HRECs) associated with the Target Property.

At the time of the reconnaissance, the Target Property consisted of 57 unimproved lots in Tract 21651 (lots 1-57) that are assigned Riverside Assessor Parcel Numbers 311-161-001 through 311-161-035 and 311-162-001 through 311-162-022 and is being sold by Perris Enterprises LLC. The Target Property was overgrown with grass and weeds and had not been graded and developed into finished lots. A few discarded shopping carts were observed onsite; however, visual observation of the ground surface was difficult due to the overgrown vegetation. The Target Property was bordered to the north by Nuevo Road and to the west by Wilson Avenue and is located in a predominantly residential setting.

No active earthwork or site development activities were observed at the Target Property during the site reconnaissance; therefore, implementation of construction-related erosion control, storm water compliance and best management practices (BMPs) are not required at this time.

Apex's reconnaissance revealed no evidence of RECs for the Target Property.

HISTORICAL REVIEW

Apex's review of readily available historical aerial photographs (dated 1938, 1953, 1962, 1967, 1976, 1980, 1985, 1997, 2002, 2005, 2006, 2010, 2012, 2014, 2016, and 2018) indicated that the Target Property was developed agriculturally from at least 1938 until sometime prior to 1997 when it became unimproved vacant land. The Target Property has remained unimproved vacant land since that time. Apex did not identify a previous use of the Target Property that would represent a REC.

The adjoining properties were developed agriculturally by at least 1938. Additionally, at this time a residence was developed on the east adjoining property. By 1997, residential development had continued on the east, south, and west adjoining properties. The existing preschool and apartment buildings on the north adjoining property were developed circa 1997 and 2010, respectively. Apex did not identify a previous use of the surrounding properties that would represent a REC.

The Target Property has a history of agricultural use. Agricultural activities can result in environmental impacts as a result of the application and storage of pesticides and herbicides. Such applications are permissible under applicable regulations but can result in a build-up of contaminants over time. The legal application of regulated substances, such as pesticides, herbicides, and fertilizers in the course of standard operational practices, does not constitute a “release to the environment” by definition, and thus such usage would not necessarily result in regulatory enforcement under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Additionally, agricultural activities often involve the maintenance, repair, and operation of farm equipment. The User should take into consideration the historical use of the Target Property when undertaking development activities. Apex considers the agricultural history of the Target Property to represent a developmental condition.

REGULATORY REVIEW

Apex’s review of available regulatory information and area reconnaissance did not indicate on-site or off-site RECs or vapor encroachment conditions (VECs) for the Target Property. Six hundred and thirty-eight (638) facilities and twelve (12) unmappable facility were identified in the Environmental Data Resources, Inc. (EDR) Database Report. It is Apex’s opinion that none of the facilities listed present a concern to the Target Property due to distance, orientation, or that they only hold an operating permit. The following table summarizes the local, state, and federal databases searched in regard to the Target Property (TP) and surrounding properties. Database radii not researched are designated with an NR.

ON-SITE CONDITIONS

The results of this assessment have identified no evidence of on-site RECs to the Target Property. However, the following housekeeping and/or developmental conditions were noted:

- The Target Property was overgrown with native vegetation during the reconnaissance making visual observation of the ground surface difficult.
- A few shopping carts were observed on the Target Property. No other areas of discarded waste/debris were observed.

OFF-SITE CONDITIONS

Apex did not identify evidence of off-site RECs or off-site developmental conditions for the Target Property.

OTHER POTENTIAL ISSUES OF CONCERN

At DHI's request, Apex provides the following non-scope information with respect to the Target Property and surrounding properties for DHI's consideration as to whether conditions at the Target Property or surrounding properties exist which could impact a prospective home buyer's purchase decision.

- Are there or will there be any hazards or unusual conditions in the Target Property or surrounding the property such as: nearby hazards, oil sumps, oils tanks, toxic and/or solid waste dumps, underground storage tanks (USTs), soils conditions, neighboring agricultural production or any other environmental condition which needs to be disclosed? *No.*
- Has the Target Property or any surrounding property been previously used as a toxic and/or solid waste dump site, oil sump, or for military training purposes? *No.*
- Is the Target Property within a Nuclear Power Plant Basic Emergency Planning Zone? *No.*
- Are you aware of any of the following: substances, materials, or products which may be an environmental hazard such as, but not limited to, formaldehyde, radon gas, methane gas, lead-based paint, fuel or chemical storage tanks, and contaminated soil or water on the Target Property? *No.*
- Are you aware, or have any reason to believe, that the Target Property contains any rock material which includes natural occurrences of asbestos? *No.*
- Is the Target Property covered by a State-prepared map indicating the likelihood of the presence of natural occurrences of asbestos? *No.*

- Has any geologic testing been conducted on the Target Property for the purpose of identifying the presence of asbestos fibers? *None to our knowledge.*

In connection with potential submittal of the (COR) Acacia property for approval by United States Department of Housing and Urban Development (HUD), Apex prepared the following information requested by HUD Form 92541.

- Noise: Is the property located within the following:
 - 1,000 feet of a highway, freeway, or heavily traveled road? *No*
 - 3,000 feet of a railroad? *No*
 - One mile of a civil airfield? *No*
 - Five miles of a military airfield? *Yes, approximately 4.46 miles south-southeast of March Air Reserve Base*
- Runway Clear Zones:
 - Is the property within 3,000 feet of a civil or military airfield? *No*
 - If "Yes", is the property in a Runway Clear Zone? *Not Applicable*
- Explosive/Flammable Material Storage Hazard:
 - Does the property have an unobstructed view, or is it located within 2,000 feet of any facility handling or storing explosive or fire prone materials? *No*
- Toxic Waste Hazards:
 - Is the property within 3,000 feet of a dump or landfill, or a site on the U.S. Environmental Protection Agency (USEPA) Superfund (NPL) list or equivalent State list? *No*

FINDINGS AND CONCLUSIONS

Apex performed this assessment in general conformance with the scope and limitations of the ASTM Standard E1527-13 for the Target Property identified above to identify RECs in connection with the Target Property, including the presence, or likely presence, of hazardous substances or petroleum products in, on or at the property, due to any release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of future release to the environment. This assessment included an evaluation to the extent practicable of the past and present land uses at the Target Property and on adjacent properties.

The results of this assessment have identified no evidence of on-site or off-site RECs to the Target Property. However, the following housekeeping and/or developmental conditions were noted:

- The Target Property has a history of agricultural use. Agricultural activities can result in environmental impacts as a result of the application and storage of pesticides and herbicides. Such applications are permissible under applicable regulations but can result in a build-up of contaminants over time. The legal application of regulated substances, such as pesticides, herbicides, and fertilizers in the course of standard operational practices, does not constitute a "release to the environment" by definition, and thus such usage would not necessarily result in regulatory enforcement under CERCLA. Additionally, agricultural activities often involve the maintenance, repair, and operation of farm equipment. The User should take into consideration the historical use of the Target Property when undertaking development activities. Apex considers the agricultural history of the Target Property to represent a developmental condition.

Care should be taken when clearing the Target Property and grading for development. The identification of underground heating oil tanks, storage containers, or septic systems should be reported to Apex for further evaluation.

- According to the Environmental Risk Information Services, Inc. (ERIS) Physical Setting Report, the Target Property lies within USEPA Radon Zone 2, which has a predicted average indoor radon screening level between 2 and 4 pCi/L. Information provided in the ERIS Report indicates that 24 sites were sampled for radon within Riverside County. Of the 24 sites sampled, zero contained radon levels in excess of 4 pCi/L with an average basement indoor radon level of 0.3 pCi/L.

Site specific radon levels can only be confirmed through on-site radon sampling. The California Department of Public Health (CDPH) has specific regulations regarding the installation of radon mitigation systems within new residential construction.

The appropriate building and environmental permits should be reviewed to ensure that the Target Property is in compliance with local, state, and federal regulations.

No further assessment of the Target Property is warranted at this time.

Apex requests notification for further discussion or evaluation of new conditions discovered during the development of the Target Property.

A brief summary of findings is presented in this Executive Summary for your convenience. However, the entire report and appropriate report sections should be reviewed in full for additional details regarding our findings.

1.0 - INTRODUCTION

Apex Companies, LLC (Apex) has performed this Phase I Environmental Site Assessment (Phase I ESA) on the proposed Acacia subdivision located at the southeast corner of Nuevo Road and Wilson Avenue in Perris, Riverside County, California (hereinafter referred to as the "Target Property"). This Phase I ESA was performed at the request of D. R. Horton, Inc. (DHI) in connection with a potential acquisition and renovation/redevelopment of the Target Property. The purpose of this Phase I ESA is to identify the potential for Recognized Environmental Conditions (RECs) to exist at the Target Property.

2.0 - PURPOSE, SCOPE AND REPORT FORMAT

2.1 - PURPOSE

The purpose of the assessment is to follow ASTM International Practice E1527-13 (practice), which defines good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitation on CERCLA liability (the landowner liability protections or LLPs); that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice as defined at 42 U.S.C. 9601(35)(B). The term *recognized environmental conditions* is defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at the property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not *recognized environmental conditions*.

2.2 - Scope of Services

This Phase I ESA complies with the general scope and limitations of the ASTM International (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, Designation E1527-13 and the U.S. Environmental Protection Agency's (USEPA's) Standards and Practices for All Appropriate Inquiries (AAI), 40 Code of Federal Regulations (CFR), Part 312.

The scope of services comprising this Phase I ESA was conducted to provide a reasonable level of investigation to identify RECs. This term, as well as the associated terms Historical REC (HREC), Controlled REC (CREC), and *de minimis* condition, are defined by ASTM E1527-13.

2.3 - Exceptions, Deviations and limitations

Unavailable Documentation

Requested documentation regarding the Target Property was made available for review.

Lack of Access/Reconnaissance Limitations

Apex did not encounter significant access or reconnaissance limitations at the Target Property, except for the following:

- The Target Property was overgrown with vegetation making observations of the ground surface difficult.

Data Gaps

The ASTM Standard requires that the report identify the following: 1) *obvious* uses of the Target Property since 1940 or first development, whichever is *earlier*; and 2) significant "data gaps" which affect the ability of the Environmental Professional to identify *recognized environmental conditions*. The report is also to include information on the sources consulted to address the data gaps.

Historical Target Property ownership and/or use information was obtained for the time period 1938 to present. Based on this information, Apex has not established the history of *obvious* uses of the Target Property since 1940 or first development, whichever is *earlier*. Apex does not consider this data gap significant since prior use of the property was likely the same. No other significant data gaps (or other data gaps warranting discussion) were encountered during this Assessment.

2.4 - Report Format

The report is presented in the following format:

- Site and Area Reconnaissance
- Historical Use Information
- Regulatory Review
- Physical Settings
- Vapor Encroachment
- Non-Scope Considerations
- Findings and Conclusions
- Limitations

3.0 - SITE AND AREA RECONNAISSANCE

The Reconnaissance was conducted by Apex representative Ms. Shannon Gillespie on March 4, 2020. Weather conditions at the time of the Site inspection were overcast. The temperature was approximately 79 degrees Fahrenheit, with no weather-related limitations encountered during Site observations.

The Reconnaissance consisted of a walk-through of the Target Property.

Photographic documentation of conditions observed during the Reconnaissance is included as **Appendix A**.

3.1 - Site Reconnaissance

At the time of the reconnaissance, the Target Property consisted of 57 unimproved lots in Tract 21651 (lots 1-57) that are assigned Riverside Assessor Parcel Numbers 311-161-001 through 311-161-035 and 311-162-001 through 311-162-022 and is being sold by Perris Enterprises LLC. The Target Property was overgrown with grass and weeds and had not been graded and developed into finished lots. A few discarded shopping carts were observed onsite; however, visual observation of the ground surface was difficult due to the overgrown vegetation. The Target Property was bordered to the north by Nuevo Road and to the west by Wilson Avenue and is located in a predominantly residential setting.

No active earthwork or site development activities were observed at the Target Property during the site reconnaissance; therefore, implementation of construction-related erosion control, storm water compliance and best management practices (BMPs) are not required at this time.

A description of the current site conditions at the Target Property is presented in the following table:

| On-site Conditions | Observed |
|--|-----------------|
| Underground Storage Tanks | No |
| Aboveground Storage Tanks | No |
| Hazardous Substances and Petroleum Products | No |
| Hazardous Wastes | No |
| Landfills, Dumps, Waste Burials and Solid Waste | Yes |
| Utilities | No |
| Potable Water Supply and Wells | No |
| Potential Polychlorinated Biphenyl Equipment | Yes |
| HVAC System | No |
| Pits, Ponds, Lagoons and Other Surface Waters | No |
| Drains, Sumps, Cisterns and Cesspools | No |
| Stains or Corrosion and Stained Soil or Pavement | No |
| Dead, Distressed, Discolored or Stained Vegetation | No |
| Odors | No |
| Oil and Gas Wells, Pipelines and Mine Shafts | No |

| On-site Conditions | Observed |
|--------------------|----------|
| Structures | No |

3.1.1 - Underground Storage Tanks

The Target Property was assessed for evidence of underground storage tanks (USTs). The assessment consisted of noting evidence (e.g., fill ports, vent piping, dispensing equipment, pavement variations, etc.) indicating that USTs are currently or were previously located on the Target Property. No visual evidence was observed, and/or no historical information was obtained, to indicate the current and/or potential past presence of USTs at the Target Property.

3.1.2 - Aboveground Storage Tanks

The Target Property was assessed for evidence of aboveground storage tanks (ASTs). The assessment included noting evidence (e.g., concrete foundations or saddles, pedestals or steel support structures, etc.) indicating that ASTs were previously located on the Target Property. No visual evidence was observed, and/or no historical information was obtained, to indicate the current and/or potential past presence of ASTs at the Target Property.

3.1.3 - Hazardous Substances and Petroleum Products

The Target Property was assessed for signs of use, storage, or disposal of hazardous substances and/or petroleum products. Property uses where these types of materials are typically found include: vehicle service bays, vehicle repair operations, auto body shops and related activities (e.g., solvents, cleaners, degreasers, lubricants, paints, antifreeze, etc.); dry cleaners, rug cleaners, steam laundries, laundromats with self-serve dry-cleaning machines (e.g., chlorinated solvents, Naphtha, mineral spirits, etc.); manufacturing operations, plating facilities and other industrial/commercial operations. For purposes of this assessment, this does not include use/storage of small quantities of typical janitorial and maintenance materials (if any), unless considered relevant. No visual evidence was observed, and/or no historical information was obtained, to indicate the current and/or potential past presence of the above noted features.

3.1.4 - Hazardous Waste

The Target Property was assessed for evidence suggesting the generation or disposal of "wastes" onsite (e.g., drums, dumpsters, debris piles, etc.). Observations suggesting the presence of wastes onsite (if any) are presented below. This includes observations/information suggesting 1) the placement of significant quantities of "fill" materials (from an unknown or potentially contaminated source), or 2) the "disposal" of wastes/debris/trash onsite. No visual evidence was observed, and/or no historical information was obtained, to indicate the current and/or potential past presence of "wastes" at the Target Property.

3.1.5 - Landfills, Dumps, Waste Burials and Solid Waste

A few discarded shopping carts were observed on the Target Property. No evidence of leaks or staining was noted. No evidence of landfills, dumps, waste burials or solid waste was observed during the site reconnaissance.

3.1.6 - Utilities

No utilities were observed on the Target Property during the site reconnaissance.

3.1.7 - Potable Water Supply and Wells

The Target Property was assessed for evidence of wells (e.g., dry, irrigation, injection, abandoned, monitoring, supply). No visual evidence was observed, and/or no historical information was obtained, to indicate the current and/or potential past presence of wells at the Target Property. Potable is not currently provided to the Target Property.

3.1.8 - Wastewater, Sewage Disposal and Septic Systems

The Target Property was assessed for evidence of waste or process water discharges (if any) and storm water discharges. For purposes of this assessment, this generally includes other than domestic wastewater from sinks and toilets. In addition, properly functioning septic systems used strictly for residential and most commercial operations generally do not represent a cause for concern. Exceptions can include those instances where hazardous substances/petroleum products may be discharged through the system (e.g., spent solvents at an auto repair facility). Wastewater currently does not originate from the Target Property. Wastewater and sewage disposal services are not currently provided to the Target Property. Septic systems were not observed during the site reconnaissance.

3.1.9 - Potential Polychlorinated Biphenyl Equipment

The Target Property was assessed for the presence of liquid-cooled electrical units (i.e., transformers, and capacitors) and major sources of hydraulic fluid (i.e., elevators and lifts). Such units are notable because they may be potential PCB sources. Vaulted electrical transformers were observed to the southwest of the Target Property within a utility right-of-way. The electrical transformer appeared to be in good condition and was free of leaks and staining.

3.1.10 - Heating, Ventilation and Air Conditioning Systems

No heating, ventilation, or air conditioning (HVAC) systems were observed on the Target Property during the site reconnaissance.

3.1.11 - Pits, Ponds, Lagoons and other Surface Waters

No pits, ponds, lagoons, or surface waters were observed on the Target Property during the site reconnaissance.

3.1.12 - Drains, Sumps, Cisterns and Cesspools

No drains, sumps, cisterns, or cesspools were observed on the Target Property during the site reconnaissance.

3.1.13 - Stains or Corrosion and Stained Soil or Pavement

No stains, corrosion, or stained soil were observed on the Target Property during the site reconnaissance.

3.1.14 - Dead, Distressed, Discolored or Stained Vegetation

No dead, distressed, discolored, or stained vegetation were observed on the Target Property during the site reconnaissance.

3.1.15 - Odors

No unusual odors were detected on the Target Property during the site reconnaissance.

3.1.16 - Oil and Gas Wells, Pipelines and Mine Shafts

No evidence of oil wells, gas wells, pipelines, mine shafts, or related activities were observed on the Target Property during the site reconnaissance.

3.1.17 - Structures

No structures were observed on the Target Property during the site reconnaissance.

3.2 - Area Reconnaissance

The area surrounding the Target Property consists of residential development. Adjoining and nearby properties were observed (from the Target Property or from public access areas) for evidence of potential *recognized environmental conditions* and their potential to pose an environmental concern to the Target Property (**Figure 2**). The uses and features of adjoining properties are described below (by relative compass direction and across adjoining roadways):

3.2.1 - North

The Target Property is bordered on its north by East Nuevo Road followed by Perris KinderCare and Providence Perris Apartments.

3.2.2 - East

The Target Property is bordered on its east by single-family residences.

3.2.3 - South

The Target Property is bordered on its south by single-family residences.

3.2.4 - West

The Target Property is bordered on its west by Wilson Avenue followed by single-family residences.

3.2.5 - Northwest

The Target Property is bordered on its northwest by undeveloped land.

4.0 - HISTORICAL USE INFORMATION

Apex collected information from historical data sources consisting of aerial photographs, topographic maps, and prior reports for the Target Property and its vicinity to evaluate the presence of activity of potential environmental concern. Copies of historical resources obtained from Environmental Risk Information Services, Inc. (ERIS) are provided in **Appendix B** and are summarized below.

| Resource | Dates |
|-----------------------------|--|
| Aerial Photographs | 1938, 1953, 1962, 1966, 1976, 1980, 1985, 1997, 2002, 2005, 2006, 2010, 2012, 2014, 2016, and 2018 |
| Topographic Maps | 1942, 1953, 1967, 1973, 1979, and 2015 |
| Sanborn Fire Insurance Maps | No Coverage |
| City Directory Listings | 1971, 1986, 1991, 1995, 2001, 2002, 2006, 2010, 2014, and 2018 |

USER PROVIDED INFORMATION

ASTM E1527-13 defines "User" as the party seeking to use Practice E1527 to complete an environmental site assessment of the Target Property. Apex understands that DHI is the User as defined by ASTM E1527-13. ASTM E1527-13 specifies that certain tasks associated with identifying potential recognized environmental conditions at the Target Property should be performed by the User and provided to the Environmental Professional (i.e., User Responsibilities).

Accordingly, Apex provided a User Questionnaire to DHI personnel requesting the above information. A copy of the completed User Questionnaire is provided in **Appendix E**.

Information provided is summarized below and elsewhere in this report.

| USER PROVIDED INFORMATION | |
|---|---|
| Data Type | Information Provided |
| Environmental Liens, Activity and Use Limitation (AUL), Title Records | The User was not aware if any environmental liens or AULs exist. The client did not request for a chain-of-title search, which may have identified any AULs associated with the Target Property. No evidence of Environmental Liens or AULs was identified during Apex's review of available documentation. |
| Specialized User Knowledge | The User did not have specialized knowledge or experience related to the Target Property. General knowledge provided by the User is presented throughout this report. |
| Commonly Known or Reasonably Ascertainable Information | The User did not have information regarding commonly known or reasonably ascertainable information. |
| Valuation Reduction for Environmental Issues | The User did not have information indicating a valuation reduction for environmental issues. |
| Reason for Performing Phase I ESA | This Phase I ESA was performed in connection with a potential acquisition of the property. |
| Other User Provided Information | The User did not provide Apex with any additional information regarding the property. |

4.1 - Previous Site Use

Based on review of readily available historical aerial photographs, the Target Property was developed agriculturally from at least 1938 until sometime prior to 1997 when it became unimproved vacant land. The Target Property has remained unimproved vacant land since that time. Apex did not identify a previous use of the Target Property that would represent a REC.

Per ASTM E1527-13, review of standard historical sources at less than approximately five-year intervals is not required by this practice. If the specific use of the property appears unchanged over a period longer than five years, then it is not required to research the use during that period.

4.2 - Previous Surrounding Site Use

The adjoining properties were developed agriculturally by at least 1938. Additionally, at this time a residence was developed on the east adjoining property. By 1997, residential development had continued on the east, south, and west adjoining properties. The existing preschool and apartment buildings on the north adjoining property were developed circa 1997 and 2010, respectively. Apex did not identify a previous use of the surrounding properties that would represent a REC.

4.3 - Previous Environmental Reports

Apex made requests to the client and the current property owner/site contact regarding the presence of previous environmental reports or other relevant documents for the Target Property (e.g., previous Phase I or Phase II ESA, geotechnical report, MSDS, etc.). Previous reports were not available for review.

4.4 - Interview with Seller or Owner Representative

Apex interviewed Mr. David Harbour (Broker) and Ms. Kathleen Karahalios (Owner) with the Target Property. According to Mr. Harbour and Ms. Karahalios, Bank of America foreclosed on the Target Property (which was being developed by Young Homes) in 2010. The Target Property has remained unimproved land since 2010. They were not aware of any environmental concerns associated with the Target Property.

4.5 - Interview(s) with Local and State Agency Contacts

Apex submitted Public Records Requests to the Regional Water Quality Control Board (RWQCB), the Riverside County Environmental Health Department (RCEHD), the South Coast Air Quality Management District (SCAQMD), and the Perris City Clerk for information pertaining to records of spills, incidents, or hazardous material storage. The Perris City Clerk does not have any records for the Target Property. Additionally, the RWQCB, the RCEHD, and the SCAQMD currently do not process requests for properties that do not have street addresses and cannot search for properties with parcel numbers only. Based on site observations and information obtained from referenced regulatory database resources, it is unlikely that the Target Property has records on file with these agencies.

5.0 - REGULATORY REVIEW

Consistent with ASTM E1527-13, Apex obtained and reviewed environmental databases and records to characterize the obvious and apparent uses of the Target Property. Apex retained Environmental Data Resources, Inc. (EDR) to conduct a search of regulatory databases and provide a report of readily available records. A copy of the environmental database records search report is presented in **Appendix C**. Apex's review of available regulatory information and area reconnaissance did not indicate on-site or off-site RECs or vapor encroachment conditions (VECs) for the Target Property. Six hundred and thirty-eight (638) facilities and twelve (12) unmappable facility were identified in the Environmental Data Resources, Inc. (EDR) Database Report. The following table summarizes the local, state, and federal databases searched in regard to the Target Property (TP) and surrounding properties. Database radii not researched are designated with an NR.

| DATABASE | DIST (MI) | TP | < 1/8 | 1/8 - 1/4 | 1/4 - 1/2 | 1/2 - 1 | > 1 | TOTAL |

5.1 - Regulatory Listed Facilities

5.1.1 – On-site Regulatory Listings

The Target Property was not listed on the databases reviewed.

5.1.2 – Off-site Regulatory Listings

The following site was evaluated in greater detail:

- Proposed Clearwater Elementary School, located at 1644 Murrieta Road, is approximately 482 feet northeast and upgradient from the Target Property. The site was identified in the NPDES, CIWQS, Envirostor, SCH, and CERS databases reviewed. Investigations were conducted prior to the elementary school being constructed onsite in 2008. It was determined that organochlorine pesticides and metals in soils were a concern due to former agricultural use that included former painted structures that could possibly contain lead. In May 2008, 44 discrete soil samples were collected from six inches below ground surface (bgs) and either analyzed for organochlorine pesticides, lead, and/or arsenic. Chlordane (0.001 milligram per kilogram [mg/kg]), 4,4-DDD (0.004 mg/kg), 4,4-DDE (0.0008 mg/kg), 4,4-DDT (0.004 mg/kg), and lead (4.01 to 12.4 mg/kg) were detected in the soil samples. All contaminant detections were below their respective regulatory standards and within California background levels. Based on available information, this site is not considered an environmental concern to the Target Property.

It is Apex's opinion that the remaining facilities listed do not present a concern to the Target Property due to distance, orientation, or that they only hold an operating permit.

5.2 - Orphan Summary

The orphan or unmapped site list consists of site currently listed in federal or state database that have inadequate address information. Twelve orphan sites were identified in the database.

6.0 - PHYSICAL SETTINGS

The “physical setting” of the Target Property was assessed through a review of the following: USGS Topographic Maps, visual observations at the subject and nearby properties, and selected additional documentation (e.g., soil survey, geotechnical reports, previous Phase II assessment, interviews with local personnel, etc.). The ERIS Physical Settings Report is provided in **Appendix C**.

6.1 - Topography

Apex reviewed the United States Geological Survey (USGS) 7.5-Minute Series topographic maps for Perris, California, dated 2015. According to the topographic maps, the Target Property is approximately 1,423.54 feet above mean sea level (FT-AMSL) and slopes to the southeast.

6.2 - Soil Characteristics

General information on the soils and bedrock in the vicinity of the Target Property is as follows:

Soil Type: Domino silt loam (ERIS, 2020).

Bedrock (Type and Depth): Quaternary alluvium and marine deposits (ERIS, 2020).

6.3 - Hydrogeologic and Hydrologic Data

Based on surface topography, it is likely that the shallow groundwater gradient for the Target Property is to the southeast. It should be noted that the surface topography does not always reflect the actual hydraulic gradient and that fluctuations are sometimes encountered. Groundwater elevation data would be necessary to determine the actual on-site flow direction and gradient.

7.0 - VAPOR ENCROACHMENT

Apex conducted a Tier 1 vapor encroachment screening (VES) during the Phase I ESA. The VES was conducted in accordance with ASTM E2600-15, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. A VES is often conducted in conjunction with a Phase I Assessment as much of the information utilized is common to both processes. The methods and terms are as defined in the ASTM standard.

The goal of a VES is to identify a *vapor encroachment condition* (VEC) at a Target Property. A VEC is defined as the presence or likely presence of *chemicals of concern* (COC) vapors in the subsurface of a Target Property caused by the release of vapors from contaminated soil or groundwater either on or near the Target Property.

A Tier 1 VES includes obtaining and reviewing information on the Target Property and adjoining properties. This includes information on the following: user provided information; physical setting information; existing/planned use of the Target Property; types of structures/existing or planned on the Target Property; surrounding area description; selected Federal, State, Local and Tribal environmental records sources; historical records related to the past use of the Target Property and adjoining properties within the *area of concern* (AOC); the likely COC; and the presence of significant natural or man-made conduits that can serve as preferential pathways, such as utility corridors, sewers, storm drains, etc. (Note: These “preferential pathways” may provide for a more direct route for vapors to encroach upon the Target Property). The Tier I VES is intended to reduce, but not eliminate, uncertainty regarding whether or not a VEC exists in connection with the property.

The following minimum search distances are outlined in ASTM E 2600-15:

| Federal, State, County & Local Regulatory Database | Chemicals of Concern (Miles) | Petroleum Hydrocarbon Chemicals of Concern (Miles) |
|---|------------------------------|--|
| NPL | 1/3 | 1/10 |
| SEMS | 1/3 | 1/10 |
| CORRACTS | 1/3 | 1/10 |
| RCRA-TSDF | 1/3 | 1/10 |
| RCRA Generators | Target Property Only | Target Property Only |
| Institutional/Engineering Controls | Target Property Only | Target Property Only |
| ERNS | Target Property Only | Target Property Only |
| State & Tribal-Equivalent NPL | 1/3 | 1/10 |
| State & Tribal-Equivalent SEMS | 1/3 | 1/10 |
| State & Tribal Landfill or Solid Waste Disposal Sites | 1/3 | 1/10 |
| State & Tribal LUST | 1/3 | 1/10 |
| State & Tribal UST | Target Property Only | Target Property Only |
| State & Tribal Institutional/Engineering Controls | Target Property Only | Target Property Only |
| State & Tribal Voluntary Cleanup Program | 1/3 | 1/10 |
| State & Tribal Brownfields | 1/3 | 1/10 |

Based on regulatory status, topographic location, underlying lithology and/or assumed groundwater flow direction, the EDR-listed facilities do not present a VEC to the Target Property. The completed Vapor Encroachment Worksheet prepared by Apex through EDR’s VEC application is included in **Appendix C**.

8.0 - NON-SCOPE CONSIDERATIONS

Apex also conducted a review of other potential issues of concern, which may warrant further investigation. Issues of concern may impact or affect the manner or timeline in which development of the property can occur. Other potential issues of concern are listed in the subsections below.

8.1 - Suspect Asbestos-Containing Materials

Currently no structures are located on the Target Property; therefore, ACM are not believed to be a concern to the Target Property.

8.2 - Suspect Lead-Based Paint

Currently no structures are located on the Target Property; therefore, LBP is not believed to be a concern to the Target Property.

8.3 - Wetlands

Readily available data were reviewed to determine the Target Property status with respect to wetland designation, or potential presence of wetlands. Data sources reviewed included the ERIS Physical Setting Report, which illustrates Target Property conditions as reported by ERIS, and an on-line query of the "Wetlands Interactive Mapper" made available by the U.S. Fish and Wildlife Service National Wetlands Inventory (NWI) website. Based on Apex's review of the listings, wetlands are not located on the Target Property. A copy of the ERIS Physical Setting Report for the Target Property is included in **Appendix C**.

8.4 - Threatened and Endangered Species

Readily available data were reviewed to determine the listed status of the area or county with respect to the presence of threatened or endangered species. Data sources reviewed included the U.S. Fish and Wildlife Service endangered species protection program database obtained for Riverside County. Based on a list of endangered species for Riverside County provided by the U.S. Fish and Wildlife website, there are 27 endangered species and 11 threatened species for the County. A copy of the U.S. Fish and Wildlife Service database for Riverside County is included in **Appendix C**.

8.5 - Floodplain

According to the ERIS Report and the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRM) Community Panel Number 06065C1440H, dated August 18, 2014 the Target Property is located within Zone X-12, an area of minimal flood hazard. A copy of the ERIS Physical Setting Report for the Target Property is included in **Appendix C**.

8.6 - Radon

Radon is a naturally-occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The USEPA guidance action level for annual residential exposure to radon is 4.0 picoCuries per liter of air (pCi/L). The guidance action level is not a regulatory

requirement but is commonly used for comparison purposes to suggest whether further action at a building may be prudent. According to the ERIS Physical Setting Report, the Target Property lies within USEPA Radon Zone 2, which has a predicted average indoor radon screening level between 2 and 4 pCi/L.

8.7 - Oil and Gas Wells and Pipelines

No evidence of oil wells, gas wells, or pipelines was observed on the Target Property. No oil or gas wells and pipelines were noted on ERIS' Physical Setting Report.

9.0 - FINDINGS AND CONCLUSIONS

Apex performed this assessment in general conformance with the scope and limitations of the ASTM Standard E 1527-13 for the Target Property identified above to identify RECs in connection with the Target Property, including the presence, or likely presence, of hazardous substances or petroleum products in, on, or at the property, due to any release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of future release to the environment. This assessment included an evaluation to the extent practicable of the past and present land uses at the Target Property and on adjacent properties.

The results of this assessment have identified no evidence of on-site or off-site RECs to the Target Property.

The results of this assessment have identified no evidence of on-site or off-site RECs to the Target Property. However, the following housekeeping and/or developmental conditions were noted:

- The Target Property has a history of agricultural use. Agricultural activities can result in environmental impacts as a result of the application and storage of pesticides and herbicides. Such applications are permissible under applicable regulations but can result in a build-up of contaminants over time. The legal application of regulated substances, such as pesticides, herbicides, and fertilizers in the course of standard operational practices, does not constitute a “release to the environment” by definition, and thus such usage would not necessarily result in regulatory enforcement under CERCLA. Additionally, agricultural activities often involve the maintenance, repair, and operation of farm equipment. The User should take into consideration the historical use of the Target Property when undertaking development activities. Apex considers the agricultural history of the Target Property to represent a developmental condition.

Care should be taken when clearing the Target Property and grading for development. The identification of underground heating oil tanks, storage containers, or septic systems should be reported to Apex for further evaluation.

- According to the ERIS Physical Setting Report, the Target Property lies within USEPA Radon Zone 2, which has a predicted average indoor radon screening level between 2 and 4 pCi/L. Information provided in the ERIS Report indicates that 24 sites were sampled for radon within Riverside County. Of the 24 sites sampled, zero contained radon levels in excess of 4 pCi/L with an average basement indoor radon level of 0.3 pCi/L.

Site specific radon levels can only be confirmed through on-site radon sampling. The California Department of Public Health (CDPH) has specific regulations regarding the installation of radon mitigation systems within new residential construction.

The appropriate building and environmental permits should be reviewed to ensure that the Target Property is in compliance with local, state, and federal regulations.

No further assessment of the Target Property is warranted at this time.

Apex requests notification for further discussion or evaluation of new conditions discovered during the development of the Target Property.

10.0 - LIMITATIONS

This report was prepared as a result of a contractual agreement that defined the approach and scope of services to be employed during the investigation. The opinions and conclusions expressed in this study have been based strictly on the results of these contracted services. The scope of this Phase I ESA is intended to aid in the evaluation of RECs. Findings contained in this report are based on information collected from observations made on the day of the reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources. The services provided by Apex should not be construed as a warranty or guarantee that no RECs exist at the Target Property or that all RECs have been uncovered. No conclusions are stated or implied concerning the suitability of the Target Property for its eventual use. This document is not intended for purposes other than those expressly set forth herein or for use by parties other than for whom it has been prepared.

As limited by the ASTM Standard for Phase I ESAs, and Apex's scope of work, this project was non-intrusive in nature and did not include sampling or testing of soils, groundwater, surface water, building materials, or other materials. Additionally, unless specifically described in this report, Apex's scope of work explicitly excluded issues that are outside the scope of ASTM E1527-13 and may constitute a business environmental risk as defined by ASTM.

ASTM Standard Practice E1527-13 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

Uncertainty Not Eliminated - No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. The performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs, and this practice recognizes reasonable limits of time and cost.

Not Exhaustive - All Appropriate Inquiry does not mean an exhaustive assessment of property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions.

Level of Inquiry Is Variable - Not every property will warrant the same level of assessment. Consistent with good commercial or customary practice, the appropriate level of environmental site assessment will be guided by the type of property, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.

A Phase I ESA meeting or exceeding this practice and completed less than 180 days before the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction, is presumed to be valid. A Phase I ESA meeting or exceeding this practice and for which the information was collected or updated within one year prior to the date of the intended transaction may be used provided that the following components of the Phase I ESA were conducted or updated within 180 days of the date of purchase or the date of the intended transaction:

- Interviews with owners, operators, and occupants;

- Searches for recorded environmental cleanup liens;
- Reviews of federal, tribal, state, and local government records;
- Visual inspections of the property and adjoining properties; and,
- The declaration by the Environmental Professional responsible for the assessment or update.

10.1 - User Reliance

This report documents the Phase I ESA of the Target Property performed by Apex at the explicit request and direction of D. R. Horton, and in general accordance with ASTM E1527-13 and the USEPA Standards and Practices for All Appropriate Inquiries, 40 CFR 312. The findings, opinions, and conclusions of this Phase I ESA are for the confidential and exclusive use of D. R. Horton. Reliance on this report for any use or by parties other than specifically stated is prohibited without the expressed written consent of Apex and D. R. Horton, and such use is at the sole risk of the user.

11.0 - SIGNATURES AND EP STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 part of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the Target Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

RE: CITY DIRECTORY RESEARCH
DRH - Acacia Perris
East Nuevo Road and Wilson Avenue, Perris, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
400-900 of East Nuevo Road
1500-1800 of Wilson Avenue

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-LQG site within approximately 1.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAL000128183

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 14 RCRA-SQG sites within approximately 1.25 miles of the target property.

EXECUTIVE SUMMARY

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 ERNS site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/28/2019 has revealed that there are 18 ENVIROSTOR sites within approximately 2 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 1.5 miles of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 31 LUST sites within approximately 1.5 miles of the target property.

US CDL: A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

A review of the US CDL list, as provided by EDR, and dated 06/11/2019 has revealed that there is 1 US CDL site within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 11 SWEEPS UST sites within approximately 1.25 miles of the target property.

EXECUTIVE SUMMARY

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 11/12/2019 has revealed that there is 1 FUDS site within approximately 2 miles of the target property.

| <u>Lower Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |
|------------------------|----------------|-----------------------------|---------------|-------------|
| MARCH AFB ILS OUTER | | SE 1 - 2 (1.345 mi.) | CI633 | 1639 |

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/22/2019 has revealed that there are 68 FINDS sites within approximately 1 mile of the target property.

| CHRISTIAN HOSP MED C Facility Id: 44460 | 2224 MEDICAL CENTER | NW 1/2 - 1 (0.995 mi.) | BP515 | 1108 |

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there are 131 HAZNET sites within approximately 1 mile of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 01/21/2020 has revealed that there are 45 CERS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

HWTS: The Hazardous Waste Tracking System (HWTS) is the Department of Toxic Substances Control's data repository for hazardous waste Identification (ID) numbers and manifest information. HWTS generates reports on hazardous waste shipments for generators, transporters, and TSDFs.

A review of the HWTS list, as provided by EDR, and dated 10/15/2019 has revealed that there are 262 HWTS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 1.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 1.125 miles of the target property.

EXECUTIVE SUMMARY

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 7 RGA LUST sites within approximately 1 mile of the target property.

Environmental Interest/Information System:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: PROPOSED CLEARWATER ELEMENTARY SCHOOL
Address: 1644 MURRIETA ROAD
City,State,Zip: PERRIS, CA 92570
Facility ID: 60000824
Site Type: School Investigation
Site Type Detail: School
Site Mgmt. Req.: NONE SPECIFIED
Acres: 14.1
National Priorities List: NO
Cleanup Oversight Agencies: SMBRP
Lead Agency: SMBRP
Lead Agency Description: DTSC - Site Cleanup Program
Project Manager: Amit Pathak
Supervisor: Shahir Haddad
Division Branch: Southern California Schools & Brownfields Outreach
Site Code: 404780
Assembly: 61
Senate: 31
Special Program Status: Not reported
Status: No Further Action
Status Date: 11/06/2008
Restricted Use: NO
Funding: School District
Latitude: 33.80255
Longitude: -117.2097
APN: 320320002
Past Use: AGRICULTURAL - ORCHARD, RESIDENTIAL AREA
Potential COC: Arsenic, DDD, DDE, DDT, Endrin, Lead
Confirmed COC: 30001-NO, 30006-NO, 30007-NO, 30008-NO, 30010-NO, 30013-NO
Potential Description: SOIL

What Happened: Not reported
Type: Not reported
Measure: Not reported
Other: Not reported
Type: PETROLEUM
Measure: Gal(s)
Other: Not reported
Date/Time: 938
Year: 2015
Agency: NRC
Incident Date: 01/06/2015
Admin Agency: Riverside County Environmental Health
Amount: Not reported
Contained: Yes
Site Type: Not reported
E Date: Not reported
Substance: Gasoline, Automotive
Quantity Released: 20
Unknown: Not reported
Substance #2: Not reported
Substance #3: Not reported
Evacuations: Not reported
Number of Injuries: Not reported
Number of Fatalities: Not reported
#1 Pipeline: No
#2 Pipeline: No
#3 Pipeline: No
#1 Vessel >= 300 Tons: No
#2 Vessel >= 300 Tons: No
#3 Vessel >= 300 Tons: No
Evacs: No
Injuries: No
Fatals: No
Comments: Not reported
Description: Per NRC: "Caller stated that while fueling their vehicle at a station, there was a release of approximately 20 gallons of gasoline onto the concrete due to an issue with the fuel tank. Remedial Actions: station personnel contained and cleaned up the material."

violations have been made.
Violation Division: Riverside County Department of Env Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 56338
Site Name: Perris High School
Violation Date: 04-18-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 05/23/2018. OBSERVATION: Site map submitted in CERS was missing the evacuation staging area, emergency shut off switches, fire extinguishers, and label the chemical on the map. CORRECTIVE ACTION: Owner/operator shall complete an annotated site map which includes all elements outlines in CA Health and Safety Code and submit into the statewide information management system at <http://cers.calepa.ca.gov>.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

1439 ft.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 07-10-2018
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).
Violation Notes: Returned to compliance on 10/02/2018.

Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)

Violation Description: Failure to maintain records of repairs and upgrades on site, or off site if approved by the UPA, for the life of the UST.
Returned to compliance on 12/05/2019. OBSERVATION: Observed that facility has completed a permit application for the replacement of the annular sensor for Tank T-2 (87 Syphon tank) that took place on 4/30/19 by Island Petroleum. Sensor replacement was not like-for-like. UST Plan Check Lester Powell delivered a notice on 6/3/19 to have the owner/operator submit plans for the annular sensor replacement. To this date, the owner/operator has not submitted plans for the sensor replacement. The sensor was tested and passed today. CORRECTIVE ACTION: Owner/operator shall provide all maintenance, monitoring, repair and/or upgrade records. Maintain copies on site and available for review. Submit missing documentation to the CUPA.

S123504344

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overflow prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overflow prevention equipment that does not use flow restrictors on vent piping to meet overflow prevention equipment requirements when the overflow prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overflow prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overflow prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 08/22/2019. OBSERVATION: Observed installed overflow equipment that doesn't meet current requirements. Overflow was set at 96% (above allowable limit on ball floats) for Tanks T-1 and T-4, and the ball floats were inaccessible on tanks T-2 and T-3. CORRECTIVE ACTION: Owner/operator shall ensure that overflow requirements are being met by adjusting/replacing overflow equipment. Any adjustment or replacement of overflow equipment may require a plan check. Permit plans (SR0044628) have been submitted and accepted to replace ball floats with fill tube shutoff valves. Work has not been completed as of today.

Citation: HSC 6.7 25290.1(c),25290.2(c),25291(a)(2),2529.1(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c),25290.2(c),25291(a)(2),2529.1(e)

Violation Description: Failure to maintain secondary containment (e.g., failure of secondary containment testing).

Violation Notes: Returned to compliance on 10/04/2019. OBSERVATION: SB 989 testing conducted on 2/28/2019 revealed failed secondary components. The following components failed testing: 87, 91 and Diesel product piping and UDCs 3/4, 5/6, 7/8 and 9/10. CORRECTIVE ACTION: Owner/operator shall make the necessary repairs to the failed secondary components and re-test failed components to ensure secondary containment is maintained tight. Note: Plans may be required for repairs; check with the HMMB area plan checker to determine if the submission of plans is necessary prior to starting repairs.

FINDS:

Registry ID: 110033207143
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110033207143

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS:

Name: LES SCHWAB TIRE CENTER #572
Address: 1697 N PERRIS BLVD
City,State,Zip: PERRIS, CA 92571
Site ID: 370262
CERS ID: 10672228
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 370262
Site Name: Les Schwab Tire Center #572
Violation Date: 10-17-2019
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 10/17/2019. OBSERVATION: Observed aerosol can drum and filter drum without cover/lid in place. CORRECTIVE ACTION: Owner/operator shall maintain all hazardous waste containers closed when not adding/removing hazardous waste. **Corrected on site**

Violation Division: Riverside County Department of Env Health
Violation Program: HW
Violation Source: CERS

Site ID: 370262
Site Name: Les Schwab Tire Center #572
Violation Date: 09-20-2016
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)

Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.

Violation Notes: Returned to compliance on 10/25/2016.
Violation Division: Riverside County Department of Env Health
Violation Program: HW

Violation Description: Chapter 16, Section(s) 2712(b)(1)(G)
Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 01/10/2019. OBSERVATION: Observed installed overfill equipment that doesn't meet current requirements. Overfill was set above allowable limit for the 87 West tank. CORRECTIVE ACTION: Owner/operator shall ensure that overfill requirements are being met by adjusting/replacing overfill equipment. Any adjustment or replacement of overfill equipment may require a plan check. Submit state required forms within 30 days to this department

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail_disp_program_facility?p_registry_id=110006481994

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 12/30/2019. OBSERVATION: Observed that Designated Operator inspections are being improperly performed. Owner/Operator is not signing the DO reports every month within 48 hours. CORRECTIVE ACTION: Owner/operator shall ensure that the Designated Operator is properly conducting inspections, noting observations, reviewing paperwork and alarm history reports, attaching required documentation and any other DO required functions.

triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months. Returned to compliance on 11/28/2018.

Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: OBSERVATION: Observed installed spill bucket at the Diesel fill sump not able to hold a minimum of 5 gallons due to failing o-ring in the bucket. CORRECTIVE ACTION: Owner/operator shall make the necessary adjustments to the fill tube and riser so that spill bucket is installed so that it is capable of holding a minimum of 5 gallons. Submit passing results to darios@rivco.org

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: ***Site data prior to 2005 not uploaded to GeoTracker *** SITE HISTORY/RELEASE INFORMATION October 2002 The product piping and dispensers were upgraded and approximately 347 tons of soil was recycled at TPS Technologies in Adelanto. Soil sample PL5d8 collected from the bottom of the excavation had detections of benzene at 0.039 ppm and MTBE at 0.77 ppm. March 2003 - One soil boring (SB-1) was drilled to 75 feet below grade (ft bg) as part of the Shell Groundwater Assessment Program (GRASP). One soil sample was collected at 75 ft bg and the lab detected 0.17 ppm MTBE in the sample. Groundwater (gw) was encountered during drilling at approximately 70 to 75 ft bg and a gw grab sample was collected from the borehole. The gw sample had concentrations of: 200000 ppb TPHg, 200000 ppb MTBE and 37000 ppb TBA. The site was put into the LOP in May 2003. ASSESSMENT January 2004 Four on-site gw monitoring wells (MW-1 through MW-4) were installed to evaluate gw conditions at the site and six soil borings (SB-3 through SB-8) were drilled near the USTs and dispensers. Borings SB-5 through SB-8 were angle-drilled under the dispensers. Soil impacts were detected at concentrations up to 6.1 ppm TPHg and 10 ppm MTBE (SB-3 at 20 ft bg). Groundwater depths ranged from 65 to 67 feet bg with flow to the northwest. GW from all four wells was impacted with the highest concentrations in the wells adjacent to the USTs: 14000 ppb TPHg (MW-2), 110 ppb B (MW-2), 2.8 ppb T (MW-3), 6.7 ppb X (MW-3), 37000 ppb MTBE (MW-2), 1000 ppb TBA (MW-1), and 160 ppb TAME (MW-2). December 2004 - Seven additional gw monitoring wells were installed: MW-5 through MW-8 were located on-site and MW-9 through MW-11 were located east of the site in Redlands Ave. Minimal soil impacts were detected, however, groundwater was impacted in all seven wells with a high of 4500 ppb TPHg (MW-6), 2.2 ppb benzene (MW-9), 23000 ppb MTBE (MW-6), and 6800 ppb TBA (MW-10). May 2005 - Eight soil borings (SB-9 through SB-16) were drilled near the dispenser islands, piping and clarifier for a Phase II Environmental Site Assessment. All of the soil borings were

EPA ID Number

SHELL SERVICE STATION (Continued)

1006805308

non-detect for constituents tested except boring SB-15, drilled near the clarifier, which had TRPH concentrations up to 30 ppm TRPH. January / April 2006 - Eight additional off-site gw monitoring wells (MW-12 through MW-19) were installed north and northeast of the site to further delineate the gw plume. Wells MW-15 and MW-16 located ~120 ft north of the USTs had the highest soil and gw impacts with soil concentrations up to 5.5 ppm MTBE (MW-16 at 65 ft bg) and 4.3 ppm TBA (MW-15 at 70 ft bg) and gw concentrations up to 42000 ppb TPHg (MW-16), 97000 ppb MTBE (MW-16), and 36000 ppb TBA (MW-15). The northern gw plume was delineated with wells MW-18 and MW-19 located ~330 ft north of the USTs. February / March 2006 Six sparge wells (SP-3, SP4, and SP-6 through SP-9) and three vapor extraction wells (SVE-1 through SVE-3) were installed for remedial testing and operations. May to November 2007 Additional off-site work was conducted north of the site to further characterize subsurface conditions and expand the remediation well network. Work included installation of four additional monitoring wells (MW-20 through MW-23) and fifteen sparge wells (SP-10 through SP-24) as well as drilling four CPT borings (CPT-1 through CPT-4). GW from SP-23 had the highest concentrations (12000 ppb TPHg, 17000 ppb MTBE, and 59000 ppb TBA). July 2008 and June 2009 Four additional off-site gw monitoring wells (MW-24 through MW-27) were installed to further characterize gw conditions north and northeast of the site. July 2010 Eight additional sparge wells (SP-25 through SP-32) were installed and connected to the OPIS. January and February 2012 One on-site monitoring well (MW-32), four off-site monitoring wells (MW-28 through MW-31), and seven piezometers (PZ-1 to PZ-7) were installed to enhance the gw sampling network and enable shallow gw sampling in key areas where monitoring well screens were submerged. In addition, three Hydropunch borings (HP-1 to HP-3) were drilled northeast of the site and gw characterization between MW-14 and MW-27 in Redlands Ave was considered complete. GROUNDWATER MONITORING GW monitoring has been conducted since 2004. The depth to gw has fluctuated from 41.21 to 67.97 ft bg with a 13 to 26 ft rise in the water table. Current depth to gw is 49.89 to 53.96 ft bg. GW flow direction prior to 2009 was predominantly to the northwest and after 2009, it has been variable. The current flow direction to the southeast with a gradient of 0.0024 ft/ft. Wells MW-1 through MW-11 have had submerged well screens since 2005, so in early 2012, replacement wells MW-28 through MW-32 were installed to facilitate gw sampling in key locations. Remediation has been effective and dissolved contaminant concentrations in the gw have decreased significantly as seen by the drop in TPHg concentrations from 200,000 ppb (MW-23) to 420 ppb (MW-10), benzene concentrations from 110 ppb to <0.5 ppb, MTBE concentrations from 180,000 ppb (MW-2) to 510 ppb (MW-10), and TBA concentrations from 470,000 ppb (MW-5) to 35 ppb (MW-10). REMEDIATION Excavation: October 2002 347 tons of petroleum hydrocarbon-impacted soils were removed during product piping and dispenser upgrade activities. Soil recycled at TPS Technologies in Adelanto. Pilot Testing: February 2006 - An 8-hour SVE pilot test was conducted using on-site wells SVE-1 and SVE-3. The radius of influence (ROI) was calculated to be 83 to 85 ft. Mass removed was 0.45 lbs TPHg & MTBE with a removal rate of 0.722 lb/day. Soil Vapor Extraction (SVE): August 2006 to January 2007 A SVE system was operated using on-site wells SVE-1 through SVE-3. Influent TPHg decreased from a high of 23 ppmV to <3 ppmV. SVE-1 had the highest concentration at 21 ppmV. Influent MTBE decreased from a high of 13 ppmV to 0.0094 ppmV. SVE-3

SHELL SERVICE STATION (Continued)

1006805308

had the highest MTBE concentration at 19 ppmV. A total of 84.4 lbs TPHg, 0.0012 lb benzene, and 21.2 lbs MTBE were removed during SVE operations. Oxygen Sparging: November 2006 to September 2011 - An oxygen pulse injection system (OPIS) was operated to reduce elevated off-site gw impacts. A total of 6 on-site and 23 off-site sparge wells were utilized for the injection of the oxygen. Monitored Natural Attenuation (MNA) & O-Sox: November 2012 to February 2015 - MNA was implemented with specified monitoring parameters. February 2013 to January 2015 - O-Sox were installed in off-site wells MW-11, MW-15 and MW-23 to enhance oxygen levels and increase natural degradation of residual impacts in the gw. VERIFICATION Vapor Verification: January 2007 - SVE rebound testing was conducted after a 2-month system shutdown. Vapor samples were collected at system shutdown (November 7, 2006), at restart, and at 2-, 8- and 24-hours after restart. Rebounding of vapor concentrations was not detected. Soil Verification: June 2007 Seven confirmation soil borings (CB-1 through CB-7) were drilled on-site to 80 feet bg to verify post-remedial (SVE) soil conditions. The maximum soil concentrations detected were: 0.22 ppm TPHg (CB-4@60), 110 ppm TPHd (CB-5@40), 0.57 ppm MTBE (CB-4@60), and 5.3 ppm TBA (CB-6@65). No BTEX was detected. The depth to groundwater in 2007 was approximately 50 feet bg, therefore the detections at or below 50 feet bg were likely due to dissolve hydrocarbons in the pore spaces of the saturated soils. Groundwater Verification: The gw has been sampled three times since the O-Sox were removed in January 2015. The most recent sampling in September 2015 had the following maximum gw concentrations: 420 ppb TPHg, ND<0.5 ppb benzene, 510 ppb MTBE, and 35 ppb TBA. Case closure evaluation based on the SWRCBs Low-Threat UST Case Closure Policy: General Criteria Criteria MET: a. The unauthorized release is located within the service area of a public water system (EMWD) b. The unauthorized release consists of only petroleum c. The unauthorized release has been stopped (piping & dispensers upgraded Oct 2002) d. Free product has been removed to the maximum extent possible (never detected) e. A conceptual site model that assesses the nature, extent and mobility of the release has been developed f. Secondary source has been removed to the maximum extent possible (excavation, SVE, OPIS, O-Sox) g. Soil and groundwater have been tested for MTBE h. A nuisance does not exist at the site, as defined by the Water Code Section 13050 1. Media-Specific Criteria: Groundwater Criteria MET: Groundwater specific scenario 1.4: The contaminant plume shows a decreasing trend and: The contaminant plume that exceeds water quality objectives is <1000 feet in length. There is no free product (never detected). The nearest existing water supply well or surface water body is >1000 feet from the defined plume boundary. Benzene and MTBE in the gw are <1000 ug/L. 2. Media Specific Criteria: Petroleum Vapor Intrusion to Indoor Air Criteria MET: Although the site is an active fueling facility and this would exempt it from this criteria, the gw plume has migrated off-site, so off-site conditions were also evaluated. Off-site conditions meet the Petroleum Vapor Intrusion to Indoor Air specific criteria 2a Scenario 3i: benzene in gw only, no O2 measurements, benzene <100 ug/L (currently ND), there is >5 ft vertical separation between dissolved phase benzene and the foundation of potential buildings (depth to gw currently ~50 ft bg), and off-site soil is <100 mg/kg total TPH. 3. Media Specific Criteria: Direct Contact and Outdoor Air Exposure Criteria MET: Direct Contact and Outdoor Air Exposure criteria exemption: the upper 10 ft of soil is free of petroleum contamination.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail_disp_program_facility?p_registry_id=110013292150

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Date form received by agency: 2015-06-10 00:00:00.0
Site name: WALMART SUPERCENTER #1747
Classification: Small Quantity Generator

Hazardous Waste Summary:

- . Waste code: 122
- . Waste name: Alkaline solution without metals (pH > 12.5)

- . Waste code: 141
- . Waste name: Off-specification, aged, or surplus inorganics

- . Waste code: 181
- . Waste name: Other inorganic solid waste

- . Waste code: 213
- . Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

- . Waste code: 214
- . Waste name: Unspecified solvent mixture

- . Waste code: 221
- . Waste name: Waste oil and mixed oil

- . Waste code: 223
- . Waste name: Unspecified oil-containing waste

- . Waste code: 232
- . Waste name: Pesticides and other waste associated with pesticide production

- . Waste code: 311
- . Waste name: Pharmaceutical waste

- . Waste code: 331
- . Waste name: Off-specification, aged, or surplus organics

- . Waste code: 352
- . Waste name: Other organic solids

- . Waste code: 541
- . Waste name: Photochemicals / photo processing waste

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID: 38139
Site Name: Inland Auto, Boat, & RV Sales Inc.
Violation Date: 07-25-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 07/25/2018. OBSERVATION: The Business Activities page included in the hazardous materials business plan contained incorrect information. Specifically, "Does your facility consolidate hazardous waste generated at a remote site?" This facility does not meet the definition of a remote consolidator. Mark "no" for this question. CORRECTIVE ACTION: Complete and submit an updated Business Activities page in the statewide information management system at <http://cers.calepa.ca.gov>.
Violation Division: Riverside County Department of Env Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 38139

INLAND AUTO BOAT & RV SALES INC (Continued)

S113146824

Violation Notes: Returned to compliance on 08/24/2018. OBSERVATION: Observed one 55 gallon blue plastic drum which was empty and not labeled properly. CORRECTIVE ACTION: Owner/operator shall properly label all empty containers larger than 5 gallons with the dates they were emptied.

Violation Division: Riverside County Department of Env Health
Violation Program: HW
Violation Source: CERS

Site ID: 38139
Site Name: Inland Auto, Boat, & RV Sales Inc.
Violation Date: 07-25-2018
Citation: Un-Specified
Violation Description: Business Plan Program - Operations/Maintenance - General Local Ordinance

Violation Notes: Returned to compliance on 08/24/2018. OBSERVATION: Observed Propane cylinders loose on the ground and two Argon/CO2 cylinders without chains to secure them. CORRECTIVE ACTION: Owner/operator shall store all hazardous materials in a manner which will prevent unauthorized fire, explosion, or release. All compressed gases shall be secured (ex. storage rack or chained to a stationary object).

Violation Division: Riverside County Department of Env Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 38139
Site Name: Inland Auto, Boat, & RV Sales Inc.
Violation Date: 07-25-2018
Citation: 40 CFR 1 265.201(c)(5) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(5)
Violation Description: Failure to inspect hazardous waste tanks for the following, when present: 4) The construction materials of the tank at least weekly to detect corrosion or leaking of fixtures or seams. 5) The construction materials of, and the area immediately surrounding, discharge confinement structures (e.g., dikes) at least weekly to detect erosion or obvious signs of leakage (e.g., wet spots or dead vegetation).

Violation Notes: Returned to compliance on 08/24/2018. OBSERVATION: Observed the presence of multiple hazardous waste violations at this facility. The presence of multiple violations indicates that inspections of the hazardous waste areas are not being conducted. CORRECTIVE ACTION: Owner/operator shall conduct weekly inspections of all hazardous waste storage areas.

Violation Division: Riverside County Department of Env Health
Violation Program: HW
Violation Source: CERS

Site ID: 38139
Site Name: Inland Auto, Boat, & RV Sales Inc.
Violation Date: 07-25-2018
Citation: 40 CFR 1 265.171 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.171
Violation Description: Failure to accumulate hazardous waste in a container that is in good condition.

Violation Notes: Returned to compliance on 08/24/2018. OBSERVATION: Observed two 55 gallon metal drums, one contained used diesel fuel and water (no label on drum), other other 55 gallon drum was stored with the new oil and also did not have a label being stored in dented containers, which may increase the likelihood of a release. CORRECTIVE ACTION:

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 08/24/2018. OBSERVATION: Observed (3) three 55 gallon metal drums that were missing proper labels. CORRECTIVE ACTION: Owner/operator shall label hazardous waste containers with all the required information. Label shall include at least: the words ""hazardous waste"", generator name and address, accumulation start date, composition and physical state of waste, and hazardous property statement. Submit photos to this department, if applicable.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110008277854
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110008277854

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

CERS Description: Hazardous Waste Generator

FINDS:

Registry ID: 110057036354
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110057036354

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 05-15-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 06/28/2018. OBSERVATION: No training records observed/provided during inspection. CORRECTIVE ACTION: Owner/operator shall provide training to all employees. Documentation shall be retained and be made available for inspection for a minimum period of 3 years from the date of the training. Once training has been completed, please email to the department, the documentation that was covered and the signatures with the dates that the employees were trained.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
