nahc@nahc.ca.gov
NAHC.ca.gov**Re: Native American Tribal Consultation, Pursuant to the Assembly Bill 52 (AB 52), Amendments to the California Environmental Quality Act (CEQA) (Chapter 532, Statutes of 2014), Public Resources Code Sections 5097.94 (m), 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2 and 21084.3, San José Billboards Project, Santa Clara County**

To Whom It May Concern:

Pursuant to Public Resources Code section 21080.3.1 (c), attached is a consultation list of tribes that are traditionally and culturally affiliated with the geographic area of the above-listed project. Please note that the intent of the AB 52 amendments to CEQA is to avoid and/or mitigate impacts to tribal cultural resources, (Pub. Resources Code §21084.3 (a)) ("Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource.")

Public Resources Code sections 21080.3.1 and 21084.3(c) require CEQA lead agencies to consult with California Native American tribes that have requested notice from such agencies of proposed projects in the geographic area that are traditionally and culturally affiliated with the tribes on projects for which a Notice of Preparation or Notice of Negative Declaration or Mitigated Negative Declaration has been filed on or after July 1, 2015. Specifically, Public Resources Code section 21080.3.1 (d) provides:

Within 14 days of determining that an application for a project is complete or a decision by a public agency to undertake a project, the lead agency shall provide formal notification to the designated contact of, or a tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, which shall be accomplished by means of at least one written notification that includes a brief description of the proposed project and its location, the lead agency contact information, and a notification that the California Native American tribe has 30 days to request consultation pursuant to this section.

The AB 52 amendments to CEQA law does not preclude initiating consultation with the tribes that are culturally and traditionally affiliated within your jurisdiction prior to receiving requests for notification of projects in the tribe's areas of traditional and cultural affiliation. The Native American Heritage Commission (NAHC) recommends, but does not require, early consultation as a best practice to ensure that lead agencies receive sufficient information about cultural resources in a project area to avoid damaging effects to tribal cultural resources.

The NAHC also recommends, but does not require that agencies should also include with their notification letters, information regarding any cultural resources assessment that has been completed on the area of potential effect (APE), such as:

1. The results of any record search that may have been conducted at an Information Center of the California Historical Resources Information System (CHRIS), including, but not limited to:

- A listing of any and all known cultural resources that have already been recorded on or adjacent to the APE, such as known archaeological sites;
- Copies of any and all cultural resource records and study reports that may have been provided by the Information Center as part of the records search response;
- Whether the records search indicates a low, moderate, or high probability that unrecorded cultural resources are located in the APE; and
- If a survey is recommended by the Information Center to determine whether previously unrecorded cultural resources are present.

2. The results of any archaeological inventory survey that was conducted, including:

- Any report that may contain site forms, site significance, and suggested mitigation measures.

All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum, and not be made available for public disclosure in accordance with Government Code section 6254.10.

3. The result of any Sacred Lands File (SLF) check conducted through the Native American Heritage Commission was positive. Please contact the tribes on the attached list for more information.

4. Any ethnographic studies conducted for any area including all or part of the APE; and

5. Any geotechnical reports regarding all or part of the APE.

Lead agencies should be aware that records maintained by the NAHC and CHRIS are not exhaustive and a negative response to these searches does not preclude the existence of a tribal cultural resource. A tribe may be the only source of information regarding the existence of a tribal cultural resource.

This information will aid tribes in determining whether to request formal consultation. In the event that they do, having the information beforehand will help to facilitate the consultation process.

If you receive notification of change of addresses and phone numbers from tribes, please notify the NAHC. With your assistance, we can assure that our consultation list remains current.

If you have any questions, please contact me at my email address: Cody.Campagne@nahc.ca.gov.

Sincerely,

Cody Campagne

Subject: Proposed San José Billboards Project

Dear Lillian Camarena:

FirstCarbon Solutions (FCS) is preparing an Environmental Impact Report (EIR) for the proposed San José Billboards Project in the City of San José. As part of the environmental review process, we are conducting a cultural resources assessment.

The project proposed two billboards with a back-to-back design with north - and south-facing displays that would be visible to vehicles traveling on Highway 87 (Guadalupe Parkway) and Highway 101. Billboard No. 1 would be located at the southeast corner of Highway 87 and West Mission Street. Billboard No 2 would be located at 1404 Mabury Road. Billboard No. 1 would be 14 feet by 48 feet height by width) and Billboard No. 2 would be 17 feet by 58 feet (height by width). The billboard frame is assumed to be equipped with upper and lower rear catwalks measuring approximately 2.5 feet wide and extending along the length of the back of the billboards. Access to the catwalks would be by an access ladder attached to the structure.

Records Search maps with a 0.5-mile buffer around the site are enclosed for your reference.

As part of the cultural resources assessment, FCS conducted a Sacred Lands File (SLF) search and a California Historical Resource Information System (CHRIS) search. The results of the SLF records search was positive. The results of the CHRIS search indicated that there are no historic resources within the Billboard No. 1 project site. However, there are 78 resources within a 0.5-mile radius of the project site, 6 of which are prehistoric, 69 of which are historic, and 3 of which are both historic and prehistoric. In addition, there are no reports recorded within the Billboard No. 1 project site and 10 reports within a 0.5-mile radius of the project site. The results of the CHRIS search indicated that there are 3 historic resources within the Billboard No. 2 project site. It also found that there are 24 resources within a 0.5-mile radius of the project site, all of which are historic. In addition, there are no reports recorded within the Billboard No. 2 project site and 8 reports recorded within the Billboard No. 2 project site. The Native American Heritage Commission (NAHC) suggested you might be able to provide further information. If you have any additional information regarding potential historic or cultural resources in proximity or relation to the proposed project area, we would greatly appreciate your input.

Billboard No. 1 would be located at the southeast corner of Highway 87 and West Mission Street. Billboard No 2 would be located at 1404 Mabury Road. Billboard No. 1 would be 14 feet by 48 feet height by width) and Billboard No. 2 would be 17 feet by 58 feet (height by width). The billboard frame is assumed to be equipped with upper and lower rear catwalks measuring approximately 2.5 feet wide and extending along the length of the back of the billboards. Access to the catwalks would be by an access ladder attached to the structure.

Records Search maps with a 0.5-mile buffer around the site are enclosed for your reference.

As part of the cultural resources assessment, FCS conducted a Sacred Lands File (SLF) search and a California Historical Resource Information System (CHRIS) search. The results of the SLF records search was positive. The results of the CHRIS search indicated that there are no historic resources within the Billboard No. 1 project site. However, there are 78 resources within a 0.5-mile radius of the project site, 6 of which are prehistoric, 69 of which are historic, and 3 of which are both historic and prehistoric. In addition, there are no reports recorded within the Billboard No. 1 project site and 10 reports within a 0.5-mile radius of the project site. The results of the CHRIS search indicated that there are 3 historic resources within the Billboard No. 2 project site. It also found that there are 24 resources within a 0.5-mile radius of the project site, all of which are historic. In addition, there are no reports recorded within the Billboard No. 2 project site and 8 reports recorded within the Billboard No. 2 project site. The Native American Heritage Commission (NAHC) suggested you might be able to provide further information. If you have any additional information regarding potential historic or cultural resources in proximity or relation to the proposed project area, we would greatly appreciate your input.

Subject: Proposed San José Billboards Project

Dear Chairperson Lopez:

FirstCarbon Solutions (FCS) is preparing an Environmental Impact Report (EIR) for the proposed San José Billboards Project in the City of San José. As part of the environmental review process, we are conducting a cultural resources assessment.

The project proposed two billboards with a back-to-back design with north - and south-facing displays that would be visible to vehicles traveling on Highway 87 (Guadalupe Parkway) and Highway 101. Billboard No. 1 would be located at the southeast corner of Highway 87 and West Mission Street. Billboard No. 2 would be located at 1404 Mabury Road. Billboard No. 1 would be 14 feet by 48 feet (height by width) and Billboard No. 2 would be 17 feet by 58 feet (height by width). The billboard frame is assumed to be equipped with upper and lower rear catwalks measuring approximately 2.5 feet wide and extending along the length of the back of the billboards. Access to the catwalks would be by an access ladder attached to the structure.
