RE: Commercial Real Estate Property
Phase I Environmental Site Assessment
City of San Jose Police Parking Lot
Hwy 87 at West Mission St
San Jose, CA 95110

Dear Ms. Fishleder;

RiskFacts is pleased to provide you with the following Phase I Environmental Site Assessment (ESA) for the above referenced commercial real estate property. RiskFacts was contracted by our sister company FirstCarbon Solution (FCS) on the behalf of Clear Channel Outdoor (herein referred to as "Client") to conduct an ESA on a Commercial Property located at Hwy 87 at West Mission St (Western Terminus of Asbury Street at Guadalupe Parkway), San Jose, CA 95811 (herein referred to as the "subject property"). RiskFacts received electronic authorization from the Client and FCS on August 14, 2023 to perform this ESA Report.

This ESA Report was performed in general accordance with the scope and limitations of American Society for Testing and Materials (ASTM E1527-21) and the agreed to Services Proposal executed by the Client. Exceptions to or deletions from this protocol are discussed in this report.

We appreciate your business. If you have any questions regarding the attached report, or if we can be of any further service to you, please do not hesitate to contact us at 607-306-2001.

Sincerely,

Robert Fagerness, PE
Senior Environmental Engineer

Executive Summary

RiskFacts has performed a Phase I Environmental Site Assessment (ESA) for the subject property located Hwy 87 at West Mission St, San Jose, CA 95811 dated October 4, 2023 (Figure 1). The main area of interest is a small location for a proposed billboard on the western portion of the parcel (Figure 2). This ESA was conducted at the request of the Client using procedures and practices conforming with the ASTM E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. Any exceptions to or deletions from this practice are described below.

Findings

The purpose of this ESA is to identify environmentally related risks to the subject property which, when performed in accordance with ASTM Practice E1527-21, constitutes an All Appropriate Inquiry (AAI) into the previous ownership and uses of the property consistent with good commercial or customary practice as defined at 42 U.S.C. §9601(35)(B). This ESA was performed to identify the presence or likely presence of hazardous substances or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of a future release of any hazardous substances or petroleum products in, on or, at a property. The findings of this report are summarized below and may include known or suspect recognized environmental conditions (RECs), historical RECs (HRECs), controlled RECs (CRECs), or *de minimis* conditions identified during the performance of this Phase I ESA.

REC: *A REC is defined as (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.*

- This assessment has not revealed evidence of RECs in connection with the subject property.

HREC: *A HREC is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established the applicable regulatory authority or authorities without subjecting the property to any additional controls (for example, activity and use limitations or other property use limitations).*

- This assessment has not revealed evidence of HRECs in connection with the subject property.

CREC: A CREC is defined a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitation or other property use limitations).

- This assessment has not revealed evidence of CRECs in connection with the subject property.

De Minimis Conditions are not considered RECs. Rather, De Minimis Conditions generally do not present an immediate threat to human health and/or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- No DeMinimis Conditions have been identified as part of this investigation.

Significant Data Gaps. During this investigation, the following Significant Data Gaps were identified:

- No Significant Data Gaps were revealed as part of this investigation.

Recommendations

Based on the information cited above and referenced in this ESA, RiskFacts recommends the following:

- **No further assessment is recommended.**

Certification

This report has been prepared under the supervision of an EP with a final review by an EP.

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) Part 312 and I have the specific qualifications based on education, training, and/or experience to assess a property of its setting, history, nature, and environmental influences.

Robert Fagerness, PE
Senior Environmental Engineer

The resume(s) of the overseeing EP or EPs is(are) provided in Appendix - Environmental Professional Resume.

Subject Property Information

The following subsections provide information presented by the client, a current description of the subject site, and a current description of the adjacent properties.

Client Provided Information

As part of the AAI process, RiskFacts forwarded to the Client's attention a subject property Environmental Questionnaire. RiskFacts additionally requested support information or previous reports that further help the EP to identify or alleviate possible RECs in connection with the subject property. Per ASTM E1527-21 and the EPA Standards and Practices for AAIs (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries provided to the Environmental Professional preparing the ESA for his/her consideration. At the time of preparing this report, the following information was or was not received from the client:

Document Requested	Received (Y/N)	Comments
Environmental Questionnaire	Y	No knowledge of environmental issues associated with this property.
Prior ESA, RSRA, ETS?	N	None provided
ALTA or other Surveys	N	None provided
UST/AST Compliance Material	N/A	Not Applicable
Title Records, Environmental Liens and/or AULs	N	None provided. No reason to believe there are AULs associated with this site.

Based on the quality of information obtained from the client as well as additional research, the EP considers the data complete. Additionally, it is the EP's opinion that the information provided does not suggest a potential for recognized environmental conditions to be present.

Please see Appendix - Client Provided Information to review this information in its entirety.

Subject Property Description/Attributes

The following property attributes are based on available information obtained from the Client, on-line assessor information, Google Earth, Google Street View, completed questionnaire(s), and subject property reconnaissance.

ATTRIBUTES	DESCRIPTION OF ATTRIBUTE
Land Use Type	The subject property presently supports an asphalt-concrete paved parking lot.
Subject Property Address	The property is at the western terminus of Asbury Street, located on the southern corner of West Mission Street and Guadalupe Parkway.
Current Owner(s)	The property is currently owned and maintained by the City of San Jose, California.
Property APN	The Assessor's Parcel Number (APN) is 259-04-019
Property Legal Description	N/A
SP Zoning	CP – Commercial Pedestrian
Acreage	0.62 Acres
Number of Buildings	None
Square Footage	N/A
Year of Construction	N/A
Current Use	Paved parking lot for City of San Jose Police Services
Current Occupant(s)	None. Used as parking lot for City employees/visitors
NAICS Codes if available	N/A
Subject Property Utilities	Water – San Jose Water Co. Sewer – City of San Jose. Electrical/Natural Gas – Pacific Gas & Electric (PG&E)

No RECS were identified as part of our review of the subject property attributes.

Please see Appendix - County Tax Office Information.

Adjacent Property Information

The adjacent property uses and attributes are based on available information obtained from on-line sources, completed questionnaire(s), and the subject property reconnaissance:

Direction	Address	Current Use	Current Occupant(s)
North	201 W Mission St	SJ Police Department/Parking	City of San Jose
East	197 Asbury	Parking Lot	City of San Jose
South	N/A	Fenced Parking Lot	City of San Jose
West & Southwest	Guadalupe Parkway & Highway 87	City and State Public Right of way, respectively.	N/A

No suspected recognized environmental conditions were identified as part of our review of the adjacent properties land use.

Please see *Appendix - Reconnaissance Photographs* for perspective of adjacent properties.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

Records Review

The following subsections summarize information obtained through the review of available records. The following subsections include physical settings, historical use information, environmental database search results, agency file review, and vapor migration.

Physical Settings

Physical settings associated with the subject property and general vicinity is summarized below:

TOPOGRAPHY	
Elevation	Approximately 70-feet, MSL
Topographic Quad(s)	San Jose, West
General Slope	Dipping shallowly towards the north in the region.
HYDROLOGY	
Nearest Surface Water Body	Guadalupe River is located approximately 500-feet to the west of the subject property and flows to the north.
Wetlands	None identified on or adjoining the subject property.
Flood Zone	The subject property appears to be outside of a 100-year flood plain, but potentially within a 500-year plain.
Estimated Depth to Groundwater	Based on California GeoTracker sites in the vicinity of the subject property, shallow groundwater is encountered approximately 15-20 feet below ground surface (bgs).
Estimated Groundwater Flow Direction	Likely to the north-northwest, following local topography. Westward flow direction closer towards Guadalupe River.
GEOLOGIC INFORMATION	
Geologic Units/Formation	Cenozoic Era, Quaternary deposits
Soils (Lithology)	Campbell Series Silt loam. This soil type is typically silt loam to silty clay from 0 to 15 feet bgs.
Radon Information	Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L

Historical Records Review

Multiple historical records been ordered, reviewed (where available), and interpreted by RiskFacts to establish the approximate history of the subject property and immediately adjoining/adjacent properties. The historical resources include Aerial Photography; City Directory, Historical Topographic Maps, and Sanborn/Fire Insurance Maps (FIMs).

Please see Appendix - Historical Resources to review these resources in their entirety.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

Historical Use of the Subject Property

Based on our review of the available historical resources, the prior uses of the subject property are summarized in the table below:

YEAR RANGE	HISTORICAL AERIALS	TOPOGRAPHIC MAPS	CITY DIRECTORIES	SANBORN/FIMS
Hwy 87 @ West Mission Street, APN 259-04-019				
1889-1899	N/A	Open undeveloped area	N/A	1891 – Grain Field 1915 – "No Exposure"
1931-1963	SP is vacant open field, possible dry farm	1943-Open undeveloped 1953-1961 City development surrounding site	N/A	1950 – "No Exposure"
1965-1974	SP is graded 1965 and sits vacant	No coverage	No listings	1969 – No coverage
1976-Present	SP appears to be used as a parking lot. Remains same use to present.	2012-2021 New maps show expanded Hwy 87. No Bldg. details.	No listings	N/A
2005-Present	Guadalupe Pkwy is realigned and now adjoins SP to west.	2012-2021 No Bldg. details.	No listings	N/A

Note: SP = Subject Property

A summary of the concerns specific to the subject property history is provided below:

- The historical topographic maps from 1889, 1897, 1899, 1943, and 1953 show the subject property and adjoining properties to be undeveloped. The topographic maps from 1961 to the present show evidence of encroaching city and residential development; however, the subject property location is devoid of structures.
- Historical aerial photographs and topographic maps identify the subject property to have supported a vacant field that appears to be dry farmed from as early as 1931 through at least 1963. By the 1965 aerial photograph, the subject property appears to have been graded and sits vacant to at least 1974. From 1976 to the present, the subject property appears to support a parking lot. In 2005, Guadalupe Parkway is widened and realigned adjacent to the western subject property boundary, shaving off the western portion of the site.
- Historic city directories were screened for addresses representative of the subject property location. These include two hundred West Mission, 750-800 Guadalupe Parkway, 200 Asbury. Review of the available directories from 1963-2018 did not identify any listings for the subject property.
- The Sanborn Fire Insurance Maps (FIM) provide coverage to the east and south of the subject property; however, cuts off just near the property boundary. The 1891 FIM captures the southern portion of the subject property and indicates "Grain Field".

Based on the historical review, no RECs or significant data gaps were identified on the subject property.

Historical Use of Adjacent Properties

A summary of the concerns specific to the adjoining/adjacent properties history is provided below:

- Per the historic topographic maps, the property surrounding the subject property to the west, north, and east were undeveloped from as early as 1889 to at least 1943. The properties to the south and southeast of the subject property were identified as an early Chinese community "Woolen Mills China Town" and the Garden City Cannery, respectively (1891 FIM). By the 1915 FIM, the southern Chinese community is gone, the southeast cannery is now listed as a vacant warehouse. By the 1950 FIM, the southeastern warehouse is listed as "Contractor Warehouse" at 213 Old Taylor Rd, while residential development is occurring south of this along West Taylor Rd.
- Historic aerial photographs show the subject property surrounded by open fields to the west, north, and east from 1931 to 1948. Single family residential development is observed adjacent to the east from 1954 through 1993. Property south, west, and north remain an open field through 1956. By 1960, the northern adjacent property supports a parking lot (same use to the present) with West Mission Street visible. By the 1967/1968 aerial photographs, Guadalupe Parkway is visible from West Mission to West Taylor Streets and is adjacent west and south of the subject property. By 1998, the residential homes adjacent to the east begin to be removed and by 2005, the entire residential development east of the subject property has been replaced with its current use as a parking lot for the City of San Jose Police and City Administrative Center to the north. Also notable in the 2005 aerial is that Guadalupe Parkway and Highway 87 have been realigned along the western and southwestern subject property boundary, remaining this way to the present.
- Historic city directories from 1963 through 2018 including Guadalupe Parkway, Asbury St, West Mission St, and West Taylor St were reviewed to aid in evaluation of historic adjacent land use. The northern adjacent property supported the City Police Department at 201 West Mission from 1973 through 2018. No address listing west of the subject property (Guadalupe Parkway) were identified. Numerous residential listing from 172 through 200 Asbury St. (adjacent to the east) were identified from 1963 through 1989. West Taylor St is located further than adjacent to the south but is identified to support residential listing from 1963 through 1973 and then a credit union/bank from 1978 through 2018.

Based on the historical review, no RECs or significant data gaps were identified on the adjacent properties.

Please see Appendix - Historical Resources to review these resources in their entirety.

Environmental Records Review

The RiskFacts environmental professional reviewed regulatory databases searched in general accordance with ASTM Standard E1527-21 criteria. RiskFacts utilized Envirosite as a third-party provider for the regulatory record search, with this report presented in *Appendix – Government Records Search Report*.

Per the RiskFacts EP opinion, sites which were identified in the Government Records Search Report but are not summarized below do not in the opinion of the EP pose an increased environmental risk to the subject property for the following reasons: a) site(s) had no documentation indicating it(they) impacted the subject property's soil, groundwater, and/or vapor media; b) site(s) only hold an operating permit with no documented violations and/or releases to the subsurface media; c) Site(s) have been granted "No Further Action" by applicable regulatory agency and/or corrective action is on-going under the guidance of applicable regulatory agency and/or subject property was not identified as a responsible party or contributor of the off-site impact; and/or, d) site(s) distance and/or topographic position relative to the subject property reduces the level of an environmental risk associated with the site(s).

Using the above guidance, the search results deemed notable by the environmental professional are discussed in greater detail below for the subject property and off-site properties, where identified.

Subject Property Environmental Records Summary

The following records were identified as being associated with the subject property:

- No Federal, State, or Local regulatory databases were identified on the subject property.

Off-Property Environmental Records Summary

The following records associated with facilities of environmental significance were identified on adjacent and/or surrounding off-site properties.

DATABASE	NAME	ADDRESS	DIST. (FT) / DIR.	COMMENTS (LOW/ELEVATED)
HAZNET/HWG	San Jose Pub Works	167-211 Asbury	Adjacent East	LOW – Multiple listings (Please see below discussion)
HAZNET/HWG	Cirque Du Soleil	176 Asbury	Adjacent East	LOW – Please see below discussion
HAZMAT/HAZNET/HIST UST/HWG/RCRA-NONGEN	San Jose Police Dept	201 W Mission	<200FT N	LOW – Please see below discussion
LOP/UST/HAZMAT/ HWG/HAZNET	City of SJ Communications Bldg.	171 W Mission	<400FT NNE	LOW – Please see below discussion
LOP/LUST/UST/AST/HAZ NET/HWG/HIST UST/RCRA SQG/GCC	City of SJ Police Garage	825 N San Pedro	<450FT NNE	LOW – Please see below discussion
HAZMAT/HAZNET/HIST UST/HWG/MANIFEST/ RCRA NONGEN	Santa Clara Co - FAF	840 Guadalupe Pkwy	<500FT NW	LOW – Please see below discussion

San Jose Public Works Department, Various Properties 167-211 Asbury Street.
This grouping of properties is located adjacent and easterly of the subject property. These sites were associated with the locations of preexisting residential properties that were acquired by the city and ultimately cleared and developed into a city employee parking lot. The regulatory records indicate asbestos containing waste was disposed in 1998 and 1999 through three separate temporary waste generator ID numbers and correlates with the residential structures demise. These sites are not considered a REC to the subject property.

Cirque Du Soleil, 176 Asbury Street.
This property is located adjacent to the east of the subject property. It is the location of a city parking lot that occasionally supports the traveling Cirque Du Soleil. Regulatory records indicate that the traveling circus generated waste oil which was disposed of through a temporary waste generator ID in February of 2010. A total of 0.89 tons of waste oil was manifested for disposal through the temporary waste generator ID. Based on a one-time disposal and not reported releases or spills, **this site is not considered a REC** to the subject property.

San Jose Police Department, 201 West Mission Street.
This site is located on the north side of West Mission Street roughly 200-feet north of the subject property. Multiple identified databases associated with this site include HAZMAT_CITY OF SAN JOSE - CA, HAZMAT_SANTA CLARA COUNTY - CA, HAZNET - CA, HIST HAZNET - CA, HIST UST - CA, HWG - CA, MANIFEST EPA, RCRA_NONGEN, RCRA_SQG. Records indicate the site is the location of an 8,000-gallon historic underground storage tank (UST). The records do not indicate the date of the UST installation but do indicate the UST was empty at the time of the June 1988 report. There is no record of this UST being removed; however, as this facility is permitted through San Jose Fire Department as well as Santa Clara County environmental health, the likelihood that this USYT is in the ground does not seem practical.

In addition to the historic UST listing, this facility is additionally listed as a hazardous waste generator from as early as 1993 to 2020. The waste profile indicates varying tonnage of “other inorganic waste, metal sludge, aged or surplus inorganic, and aqueous metal wastes.” The waste is attributed to the police photo crime lab and align with photographic waste generation.

There are no documented releases or spills associated with this permitted facility. While the status of the historic UST is a data gap, **this site is not considered a REC** to the subject property as it is at a topographic elevation that is lower than that of the subject property and is in the hydrogeologic downgradient direction from the subject property (groundwater moving in a direction away from the subject property).

City of San Jose Communication Building, 171 West Mission Street.
This site is located approximately four hundred feet north-northeast of the subject property. Multiple identified databases associated with this site include CALEPA SITES - CA, EPA UST, FID UST - CA, HAZMAT_CITY OF SAN JOSE - CA, HAZMAT_SANTA CLARA COUNTY - CA, HAZNET - CA, HIST UST - CA, HWG - CA, LOP_SANTA CLARA COUNTY - CA, UST – CA. The most notable databases is the LOP (Local Oversite Program). In 1993, a 3,000-gallon diesel UST was removed from the ground on the north side of the communications building. Approximately 252 CY of diesel-impacted soil were removed.

Groundwater was not observed impacted collected from 1991 through 1994. The LOP case file received closure in 1996.

This site is additionally listed as a chemical storage and UST location. Records show this site supports a double-wall 4,000-gallon diesel UST. This tank and facility was last inspected in November of 2022 and no violations were noted. The existing UST is used to fuel the emergency backup generator and both tank and generator are located on the northern portion of the communications building. Based on this point of interest being located at a topographic elevation that is lower than that of the subject property and being in the hydrogeologic downgradient direction from the subject property (groundwater moving in a direction away from the subject property), it is the EP's opinion that **this site is not considered a REC** to the subject property.

Santa Clara County – FAF, Juvenile Detention Facility, 840 Guadalupe Parkway.
This site is located approximately 500-feet north-northwest of the subject property. Multiple identified databases associated with this site include CALEPA SITES - CA, HAZMAT_CITY OF SAN JOSE - CA, HAZMAT_SANTA CLARA COUNTY - CA, HAZNET - CA, HIST UST - CA, HWG - CA, MANIFEST EPA, RCRA_NONGEN. This site is a chemical storage and hazardous waste generator. Review of waste generated appears to be predominantly asbestos containing material and photochemical waste removed from the site under various temporary waste generator IDs.

The most notable database is that of the historic UST. Records indicate a 550-gallon sump-type UST was used for diesel storage and was installed at the site in 1958. There is no record of final disposition of the UST in the database report which is a data gap. As this site is located approximately 500-feet from the subject property and is at a lower elevation and down gradient from the subject property, it is the EP's opinion that **this site is not a REC to the subject property**.

Please see Appendix – Government Records Search Report to review these resources in their entirety.

Interviews

Subject Property Owner/Occupants

The subject property owner, occupant and/or operator was asked to provide a completed User Questionnaire. A summary of the responses is provided in the *Client Provided Information* section, and a copy of the questionnaire is provided in *Appendix - Client Provided Information*.

- Based on the EP's review of the completed questionnaire, the physical subject property inspection, and historical review, **there are no significant data gaps or RECs** identified based on this information.

Past Owner, Operators, Occupants

Contact information on past owners, operators, or occupants of the subject property was not provided to RiskFacts. It is the EP's opinion that although this is a data gap, the abundance of other historic and environmental database information minimizes this data gap from being significant.

Government Officials

In addition to the government records search, select state and/or local government officials were also queried by RiskFacts with respect to their knowledge of past and/or current conditions of the subject property. The results of those queries is summarized below:

Date Requested	Agency Requested	Comments
09/13/23	United States Environmental Protection Agency	Review of the on-line system indicates no files associated with the subject property.
09/13/23	GeoTracker, Water Board's Data Management System	Review of the on-line system indicates no files associated with the subject property.
09/13/23	EnviroStor, Department of Toxic Substances Control's Data Management System	Review of the on-line system indicates no files associated with the subject property.
09/13/23	Santa Clara County Environmental Health	There are no files for this parcel.

Reconnaissance

RiskFacts conducted a field reconnaissance of the subject property and the shared peripheries of the adjacent properties on September 12, 2023. A summary of the subject property current land use and general attributes and those of the adjacent property land use have been previously discussed. The following subsections focuses on the limitations of the reconnaissance, visual observations specific to ASTM identified inspections noted concerns, and comments on ASTM noted items that were observed during the inspection.

General Reconnaissance Limitations

The following is a summary of the areas of the subject property that were or were not accessible during our site visit.

The following building(s), rooms, or exterior locations were not accessible at the time of the reconnaissance:

- The parking lot is fenced with a remote operable gate that was securely closed at the time of inspection. However, the subject property was viewable from the fenced exterior boundaries.

The following discrepancies were noted in the subject property boundary at the time of the reconnaissance:

- None.

The following notable limitations of the observations of the periphery of adjacent properties were noted:

- None.

Please see *Appendix - Reconnaissance Photographs* for perspective of the subject and adjacent properties.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

ASTM Notable Inspection Criteria

The following observations are specific to ASTM inspection criteria were noted within the interior or exterior of the subject property:

ASTM INSPECTION CRITERIA	OBSERVED
Hazardous Substances and Petroleum Products in Connection with Current Business Type	☐
Storage Tanks (Aboveground and/or underground)	☐
Strong, Pungent, or Noxious Odors	☐
Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products	☐
Drums, Totes, and Intermediate Bulk Containers	☐
Unidentified Substance Containers	☐
PCB Containing Items (electrical or old floor lifts/piston elevators)	☐
Heating/Cooling (specifically how heated/cooled)	☐
Stains or Corrosion on Floors, Walls, or Ceilings (Interior)	☐
Stained Soil or Pavement (exterior)	☐
Drains, Sumps, and Wastewater	☐
Pits, Ponds, or Lagoons	☐
Stressed Vegetation (other than insufficient water)	
Solid Waste (e.g., construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal). Not trash dumpsters.	☐
Wells (e.g., dry wells, irrigation wells, drinking water, injection wells, abandoned wells, or other wells)	☐
Septic Systems (on-site septic systems or cesspools)	☐

Summary and Opinion of the Reconnaissance

Unique ASTM inspection criteria noted as present in the above table is(are) described in greater detail with EP opinion if these items potentially represent a REC to the subject property.

- None of the ASTM site-specific criteria were observed on the subject property during the on-site inspection. Based on the observation, it is the EP's opinion **that no RECs or DeMinimis** conditions are present at this time.

Please see *Appendix - Reconnaissance Photographs* for additional perspective.

Conclusions and Recommendations

Pursuant to the investigation completed including review of historical data, government environmental databases, physical inspection of the property, and interviews, it is the EP's opinion and conclusion that there are no RECs, CRECs, HRECs, or DeMinimis conditions at the on the subject property or at the proposed location of the billboard (Figure 2). Additionally, it is the EP's opinion and conclusion that there are no off-site environmental concerns that may impact the subject property. No further assessment is recommended at this time.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

About this Phase I Environmental Site Assessment

This assessment was performed in general conformance with ASTM E1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," following all prescribed methodologies and protocols detailed in this Practice. Any environmental site assessment that meets or exceeds the above-described methods is presumed valid under all applicable standards. Any exceptions to, or deletions from, this Practice are described in this report. This report is valid for 180 days beginning October 4, 2023.

Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard Practice E1527-21) affecting the subject property that: 1) constitute or may result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances.

This ESA is thus intended to assist the user in satisfying "one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations (commonly known as landowner liability protections)" on CERCLA Liability as defined at 42 U.S.C. §9601 (35) (B). To maintain landowner liability protections, the user also has a "continuing obligation to not interfere with activity and use limitations associated with the property," must take "reasonable steps to prevent releases," and must "comply with legal release reporting obligations" (ASTM E1527-21).

Reliance

In accordance with the terms of RiskFacts' Agreement, which governs the nature, scope, and purpose of this ESA, all reports, both verbal and written, are for the sole benefit of Clear Channel Outdoor, its affiliates, successors, and assigns, as well as lending institutions involved in securing financing for the subject property. Other parties may not rely on this report without written consent from RiskFacts and approval of the Clear Channel Outdoor.

In the absence of a written agreement with RiskFacts, no third party shall have any right of recourse or recovery whatsoever under any course of action against RiskFacts, its officers, employees, vendors, successors or assigns. Unauthorized users shall be responsible to protect, indemnify and hold RiskFacts as well as Clear Channel Outdoor and their respective officers, employees, vendors, successors, and assigns harmless from all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such report reliance. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply for unauthorized use of this report.

Assumptions

It is assumed that all environmental site assessments contain data gaps. Data gaps that may be filled in by reasonable inference or that are unlikely to have a material effect on the environmental health of a property are considered insignificant and have been identified as such throughout this report. Significant data gaps, such as the current disposition of an environmental cleanup action or the number of hazardous materials used, stored, and/ or hazardous waste generated on the subject property, are also identified, and discussed. Significant data gaps may result in a recommendation for further assessment.

RiskFacts has assumed the veracity of sources of information widely considered within the industry to be authoritative, true, and correct. Nevertheless, RiskFacts has conducted no independent survey of the subject property nor made any independent investigation verifying the veracity of its sources. RiskFacts assumes no responsibility for the accuracy of these sources. All descriptions of dimensions, capacities, quantities, distances, historical site use, and ownership history information gathered from these sources are provided to assist the Client in visualizing the property and evaluating its likely exposure to environmental risk.

Limitations

The findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in ASTM Practice E1527-21. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. However, even with the proper application of these methodologies, conditions may exist on the subject property that could not be identified within the scope of the assessment, or which were not reasonably identifiable from available information.

ASTM Practice E1527-21 does not address the requirements of any state or local laws or of any federal laws other than the all-appropriate inquiry provisions of the landowner liability protections. Further, this report does not intend to address all possible safety concerns, if any, associated with the subject property. While RiskFacts may comment on such matters, this report may not be construed as or used to certify that conditions on the subject property do not pose safety or health risks to its occupants or their visitors.

Information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is therefore subject to the limitations and accuracy of pertinent records, and the personal recollections of those interviewed.

Limits of Liability

RiskFacts liability, if any, for any claim, costs, loss or damage resulting from RiskFacts negligence, if any, relating to this agreement or the work performed pursuant hereto shall not exceed the amount of the payment(s) actually received by RiskFacts hereunder; provided, however, RiskFacts liability, if any, for claims involving “professional liability”, “general liability” or “pollution liability” shall not exceed the amount of insurance maintained by RiskFacts. RiskFacts currently maintains professional liability insurance, general liability insurance, and errors and omissions professional liability insurance in the amount of $1,000,000 and an umbrella liability policy in the amount of $2,000,000.

APPENDIX- ENVIRONMENTAL PROFESSIONAL RESUME

Robert S Fagerness, PE

Senior Environmental Engineer

Education

M.S., Civil Engineering, California State University Sacramento, Sacramento, CA, 1995
B.S., Environmental Resources Engineering, California State University Humboldt, Arcata, CA, 1989

Project Experience

Due Diligence Environmental Site Assessments CA - Working with investors, and lending institutions, Mr. Fagerness has completed thousands of Phase I ESAs for property transactions as part of the due diligence process across the nation. This work was performed as part of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. Property types assessed include commercial, industrial, multi-family residential, self-storage facilities, gas stations, automotive service, dry cleaners, day cares and hotels. He has been involved with the development of prop-tech screening tools for environmental prescreening.

Construction Manager, Groundwater Extraction Wells, Conveyance Pipeline, and Remediation Treatment Systems, Aerojet-General Western Groundwater Operable Unit, Rancho Cordova, CA 2010-2014. Mr. Fagerness assisted Aerojet-General with construction management services needed for the installation of large-scale groundwater extraction wells, conveyance pipelines, and groundwater treatment facilities. Challenging project requiring installation of remediation system within built-out residential neighborhoods. This work required assistance and cooperation from local, state, and federal agencies. This work also required special use permitting for the installation of a groundwater treatment facility at a site which was zoned residential. Mr. Fagerness was responsible for all permitting, public participation, and field documentation associated with this project. The project was successfully implemented within portions of Rancho Cordova, Gold River, and Eastern Sacramento County.

Multiple LUST Case Closures City of Vallejo Public Works Department, Vallejo CA 2003-2006 - While with his previous firm, Mr. Fagerness was the project manager responsible for the investigation and closure of LUST Case files associated with multiple City of Vallejo properties under the management of the Public Works Department including:

INDUSTRY TENURE

Environmental: 1989
Construction Management: 2010

RELATED EXPERIENCE

- Phase I Environmental Site Assessments (ESAs)
- Phase II ESAs
- Limited ESAs
- Site Remediation

INDUSTRY EXPERIENCE

- Soil, groundwater, soil vapor sample collection and data interpretation.
- Government Liaison
- Environmental Compliance
- Human Health Risk Evaluation
- Permitting (construction)
- NPDES and Discharge Permits
- SPCC Plans
- Hazardous Waste Tank Assessments
- Industrial Wastewater Permits

LICENSES/REGISTRATION

- California Civil Engineer (Lic #C058220)

SPECIAL SKILLS & TRAINING

- Qualified SWPPP Developer (QSD) and Practitioner (QSP) – (CA Cert #01194)
- 40-Hr HAZWOPER H&S Training

REGIONAL LOCATION

Sacramento and Bay Area, CA

EP REVIEW EXPERIENCE

Nationwide

LUST Case Closure, Vallejo Sanitation and Flood Control District, Vallejo, CA - Mr. Fagerness was the project manager responsible for the investigation and closure of leaking underground storage tank (LUST) case file of the Vallejo Sanitation and Flood Control District (VSFCD). Mr. Fagerness successfully conducted additional subsurface investigations allowing a site conceptual model that sufficiently demonstrated there was minimal to no risk leaving residual contamination in place. Based on the model, Mr. Fagerness successfully negotiated LUST case closure with Solano County Local Oversight Program and the Regional Water Quality Control Board (Region 2). The closure saved the VSFCD tens of thousands of dollars with minimal disruption to its active wastewater treatment facility.

Investigation, Remediation, and Closure of Lead and Dioxin/Furan Contaminated Soil, Aerojet-General Site, Rancho Cordova, CA - Mr. Fagerness managed the site characterization, remediation, and confirmation sampling project associated with Aerojet-General Superfund Site in Rancho Cordova California. This work was required by the US EPA with additional oversight by the Regional Water Quality Control Board (Region 5) and Department of Toxic Substances Control (collectively, the Agencies). The work was necessary to allow this portion of the Aerojet Superfund (NPL) Site to be carved out of the contaminated land and cleaned to a level sufficient for future residential development. The remediation involved the removal of contaminated surface soils with disposal to designated TSD facility in southern California. Confirmation Sampling utilized an innovative Incremental Sample Methodology (IMS) which allowed for fewer analytical tests to be needed over the relatively large area remediated. Mr. Fagerness prepared the closure documentation required by the Agencies and was successful at helping Aerojet to carve out this site from the other Superfund properties.

Local Oversight Program, Project Engineer, Solano County, CA - Mr. Fagerness was the Project Engineer overseeing the Solano County Leaking Underground Storage Tank (LUST) Program. This work included the review of consultant's calculations and proposed work plan for the installation and operation of soil and groundwater remediation systems used to remove petroleum and other contaminants from the subsurface environment. Used engineering experience and calculations to verify the accuracy and thoroughness of consultant's groundwater monitoring reports. I provided approval or recommendations for revision based on my engineering review. Worked directly with Department Management, County Supervisors, State Regulatory program officials, and public (RPs) to ensure prompt response and accuracy within the LOP.

Local Oversight Program, Project Engineer, Environmental Site Assessment and Remediation, Abandoned Agricultural Sites, Central and San Joaquin Valleys, CA - Mr. Fagerness was responsible for the project management, site investigation and remediation of fourteen (14) separate abandoned farm sites located in the Central and San Joaquin Valleys. This work was completed for the Rural Economic and Community Development Division through the US Department of Agriculture (USDA) and the US Army Corp of Engineers (Sacramento Division). This work included the removal of underground and aboveground storage tanks (USTs/ASTs). The work additionally involved regulatory permitting for UST/AAT removals. Involved coordinating subcontractors, analytical laboratories, and site contact to ensure project goals and objectives were met successfully and within budget. Responsible for coordinating staff to write the results of the field investigations including (data review and qualification, interpretation and summation of the analytical data, field documentation, and project narrative.

NPDES Program, Water Resources Control Engineer, Discharge projects in the San Joaquin Valley, CA - Mr. Fagerness was responsible for managing National Pollutant Discharge Elimination System (NPDES) sites in San Joaquin County, California. Used engineering skills and experience to assist with review of appropriateness of NPDES treatment systems. Verified calculations submitted by engineering firms on behalf of NPDES dischargers. Performed annual compliance inspections of NPDES facilities. Performed joint inspections with local and EPA officials specific to Industrial Discharge Users of municipal sewer systems. Responsible for review and interpretation of dischargers including the cities of Stockton, Lodi, Lathrop as well as the Manteca Landfill, and CalAmco ammonia discharges.

Employment History

RiskFacts: Sacramento CA and Nationwide: July 2022 to Present: Senior Engineer

CREtelligent: Gold River CA: July 2016 to June 2022: Director Environmental Professionals

Central Valley Environmental, Inc: Fair Oaks, CA: April 2001 to July 2016: Principal Engineer

CA Regional Water Quality Control Board: Rancho Cordova, CA: Sept 1999 to April 2001: Water Resources Control Engineer.

Solano County Dept Environmental Health: Fairfield, CA Oct 1996 – Aug 1999: Environmental Engineer

Woodward Clyde Federal Services: Rancho Cordova, CA: Feb 1995 to Oct 1996: Assistant Project Manager

ICF Kaiser Engineer: Rancho Cordova, CA: May 1991 to Oct – Feb 1995: Staff Engineer

Raney Geotechnical: West Sacramento CA: December 1989 - May 1991: Staff Engineer

APPENDIX – CLIENT PROVIDED INFORMATION

PHASE I ESA - USER'S QUESTIONNAIRE

To qualify for protection from landowner liability under CERCLA as an *innocent landowner, bona fide prospective purchaser,* or *contiguous property owner*, ASTM standard practice E1527-21 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Property Information.

RiskFacts Project #: _RFE-081523-0001_ Property Name: _San Jose PD Parking Lot_____

Property Address: ___West Mission and CA-Hwy_____

City: __San Jose_____ State: _____CA_____ Zip: ___95110_____

Property Owner Name: ___City of San Jose_____

Please answer the following questions as completely as possible. Attach additional pages as needed.

1. **Reason for Completion.** Is the reason for performing the Phase I to satisfy one of the requirements for the innocent landowner defense under CERCLA AND/OR to understand potential environmental conditions that could materially impact the operation of the business associated with the parcel of commercial real estate?
   _____X_____ Yes _____ No

   Other: _Small western portion of the property is to support a billboard. Need to verify that this location has not experience environmental issues or concerns.

2. **Environmental Cleanup Liens**. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
   _____ Yes ____x_____ No

   If yes, describe or attach details of the lien_____

   _____

3. **Activity and Land Use Limitations**. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?
   _____ Yes _____**x**_____ No

   If yes, describe or attach details of the limitations_____

   _____

PHASE I ESA - USER'S QUESTIONNAIRE

4. **Specialized Knowledge or Experience**. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

   _____ Yes _____x____ No

   If yes, describe or attach details of your specialized knowledge or experience_____

   _____

5. **Relationship of Purchase Price to Fair Market Value of Property**. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

   _____ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

   _____ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

   ___x_____ Not applicable. User is not involved in a purchase of the property.

6. **Commonly Known or Reasonably Ascertainable Information**. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

   Do you know the past uses of the property?
   _____ Yes (describe) _____
   _____
   ____x____ No

   Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?
   _____ Yes (describe) _____
   ____x_____No

   Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?
   _____ Yes (describe) _____
   _____
   ___x_____ No

   Do you know of any environmental cleanups that have taken place at the property?
   _____ Yes (describe) _____
   _____
   ____x____ No

RISKFACTS

PHASE I ESA - USER'S QUESTIONNAIRE

7. **The Degree of Obviousness of Contamination.** E1527-21 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indictors that point to the presence or likely presence of contamination at the property?
   _____ Yes (describe) _____
   _____
   ___X____ No

8. **Availability of Previous Environmental Reports.** Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?
   _____ Yes (please identify and provide copies, if available) _____
   _____
   ___x_____ No

9. **Proceedings Involving the Property.** Are you aware of any proceedings involving the property? For example:
   Are you aware of any pending, threatened or past litigation relevant to hazardous substances or petroleum products in, on or from the property?
   _____ Yes (describe) _____
   _____
   ___x_____ No

   Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?
   _____ Yes (describe) _____
   _____
   ___x_____ No

   Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?
   _____ Yes (describe) _____
   _____
   ____x____ No

Date Created
08/16/2023

Historical Information Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

1891, 1915, 1950, 1969

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

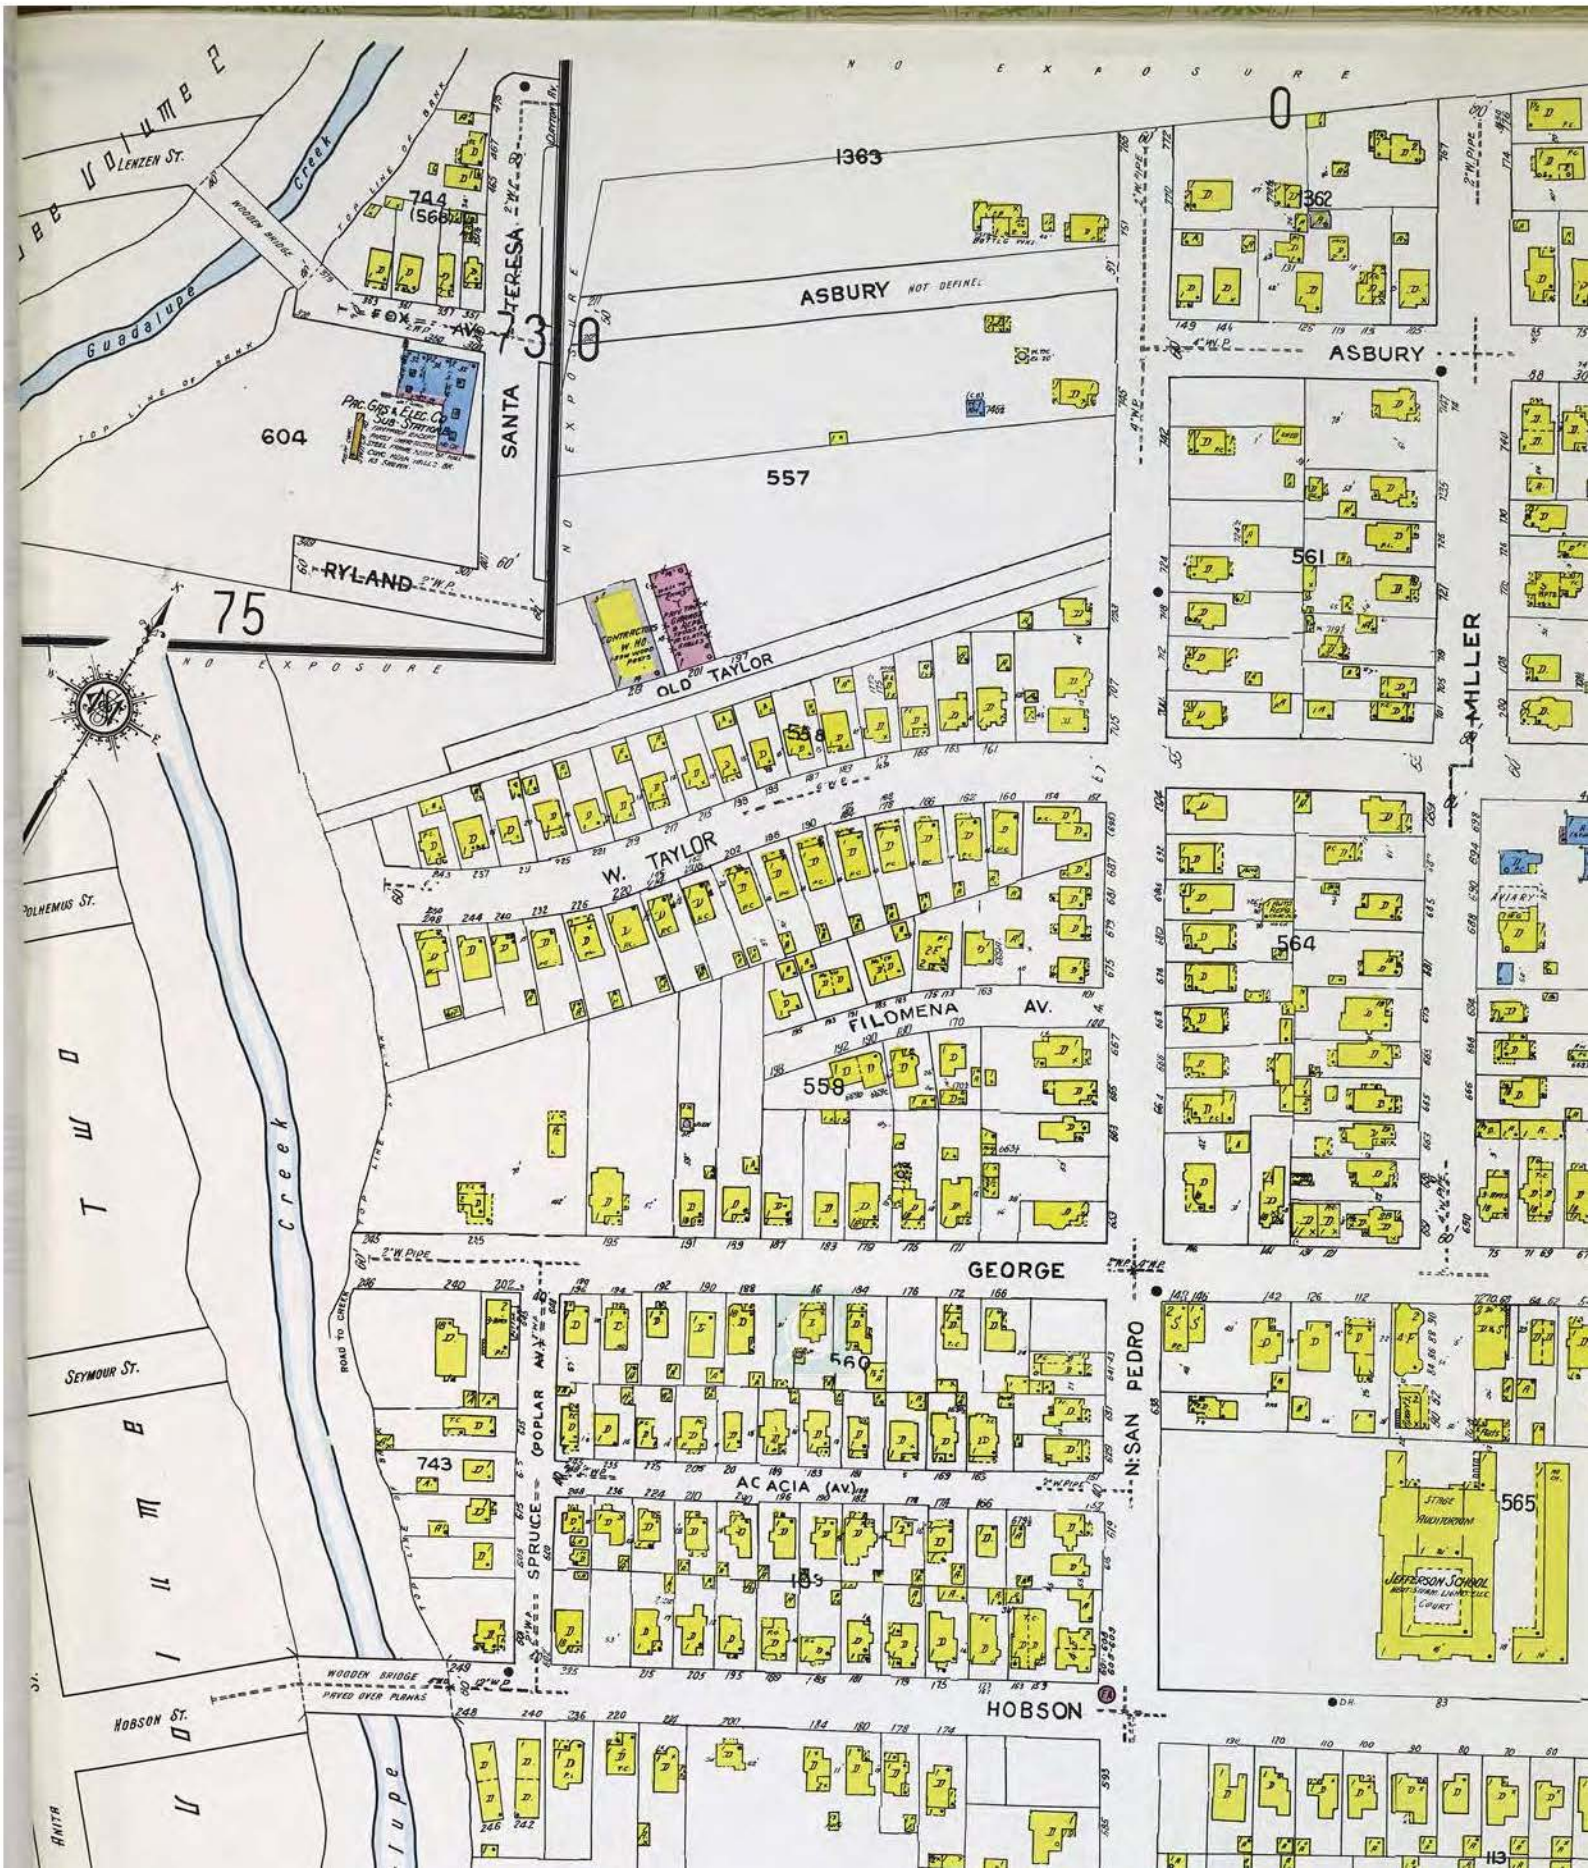

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2023 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

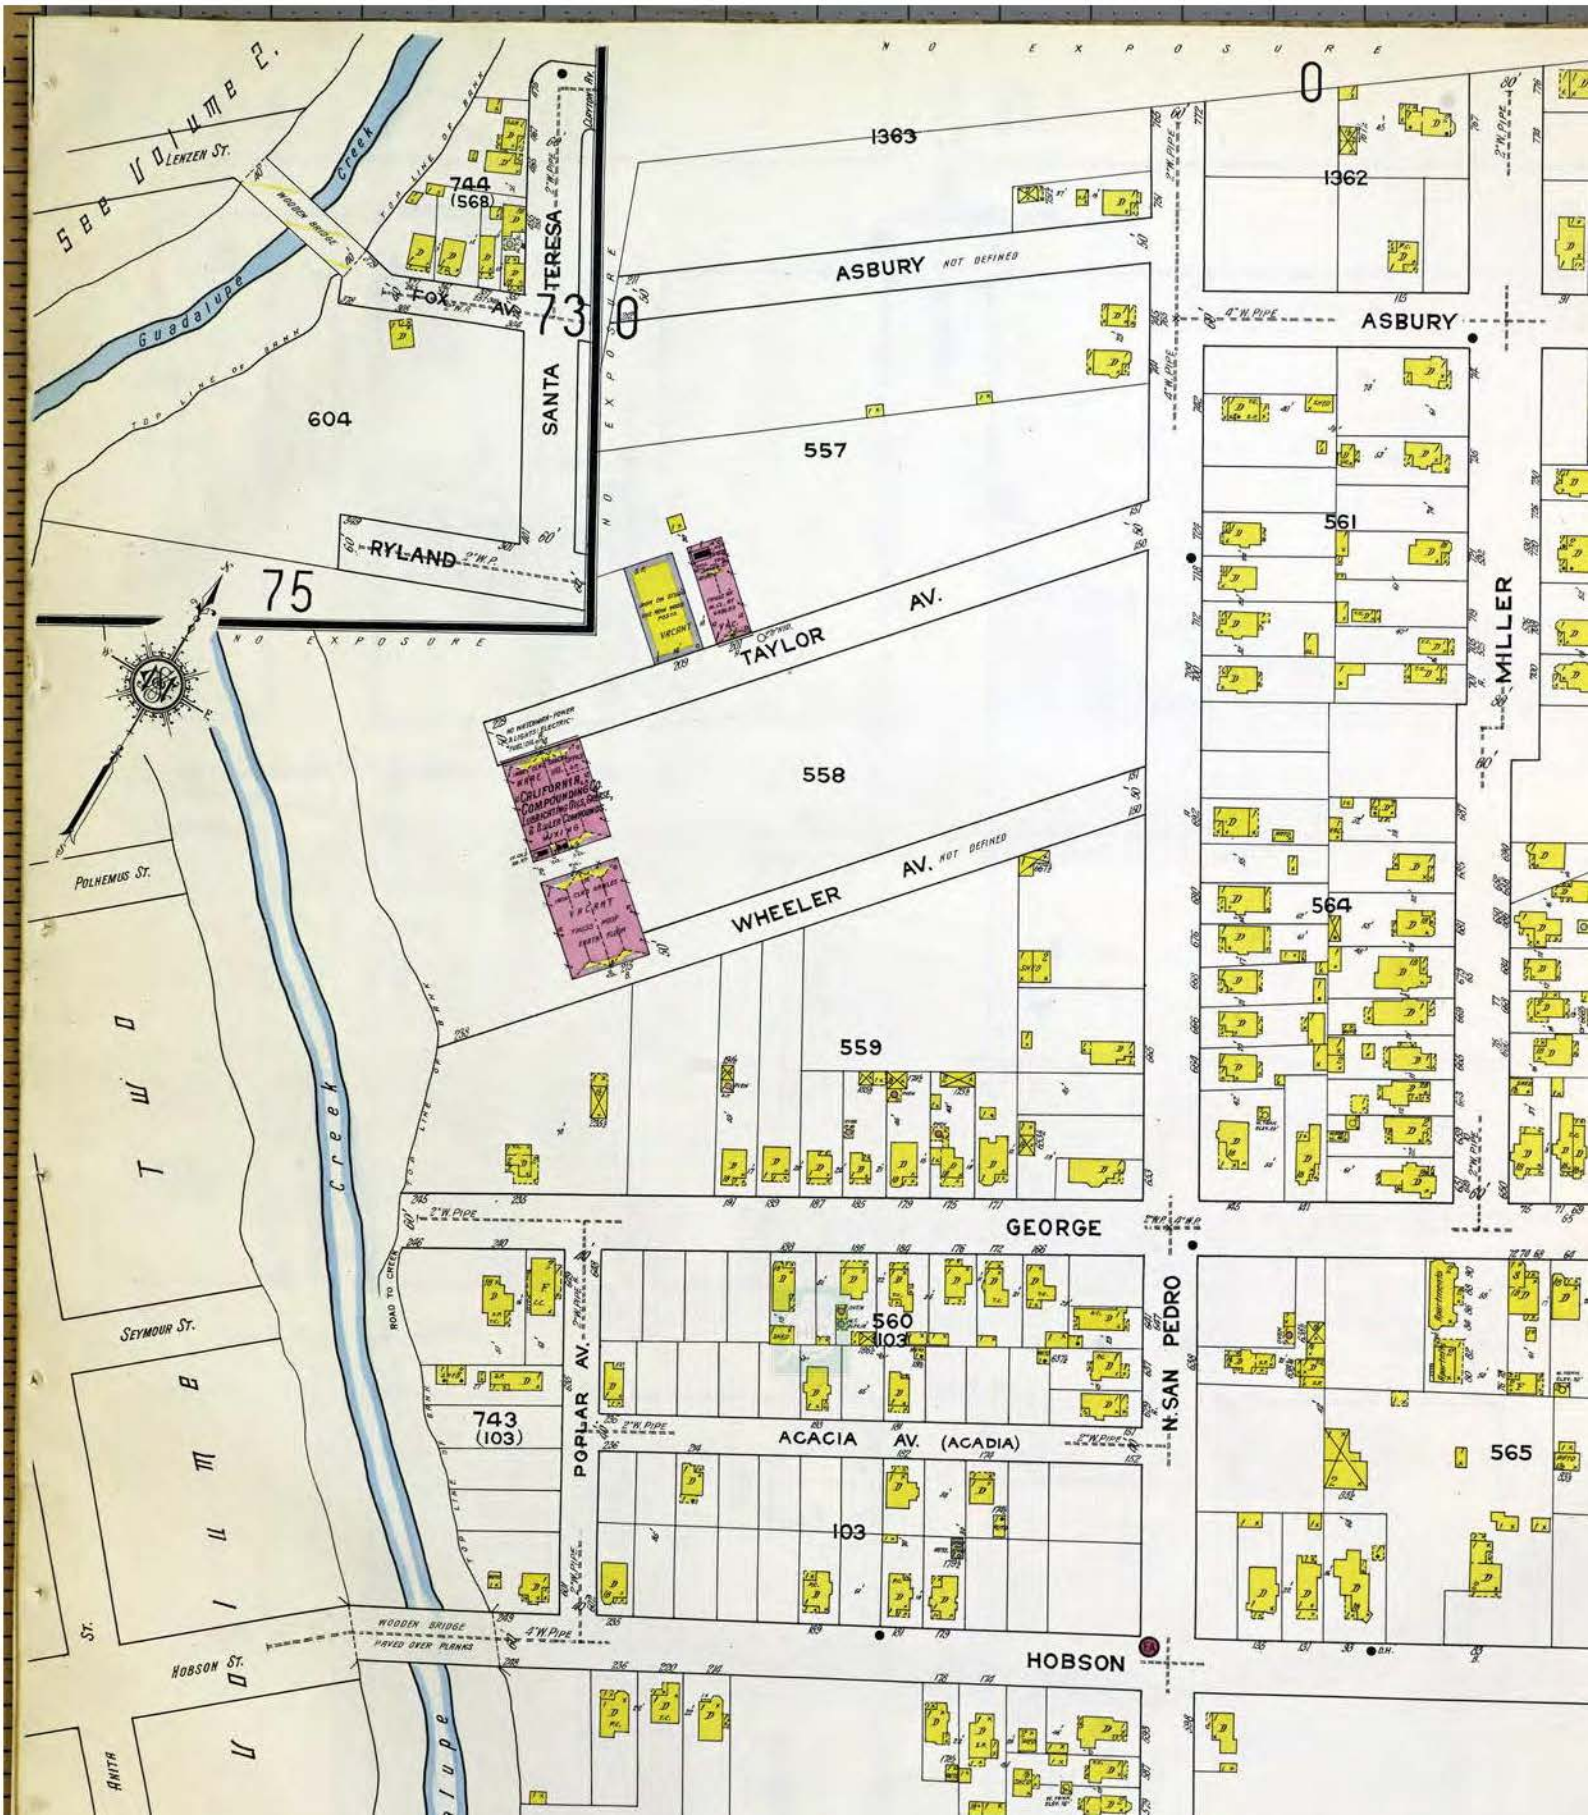

Licensing Agreement

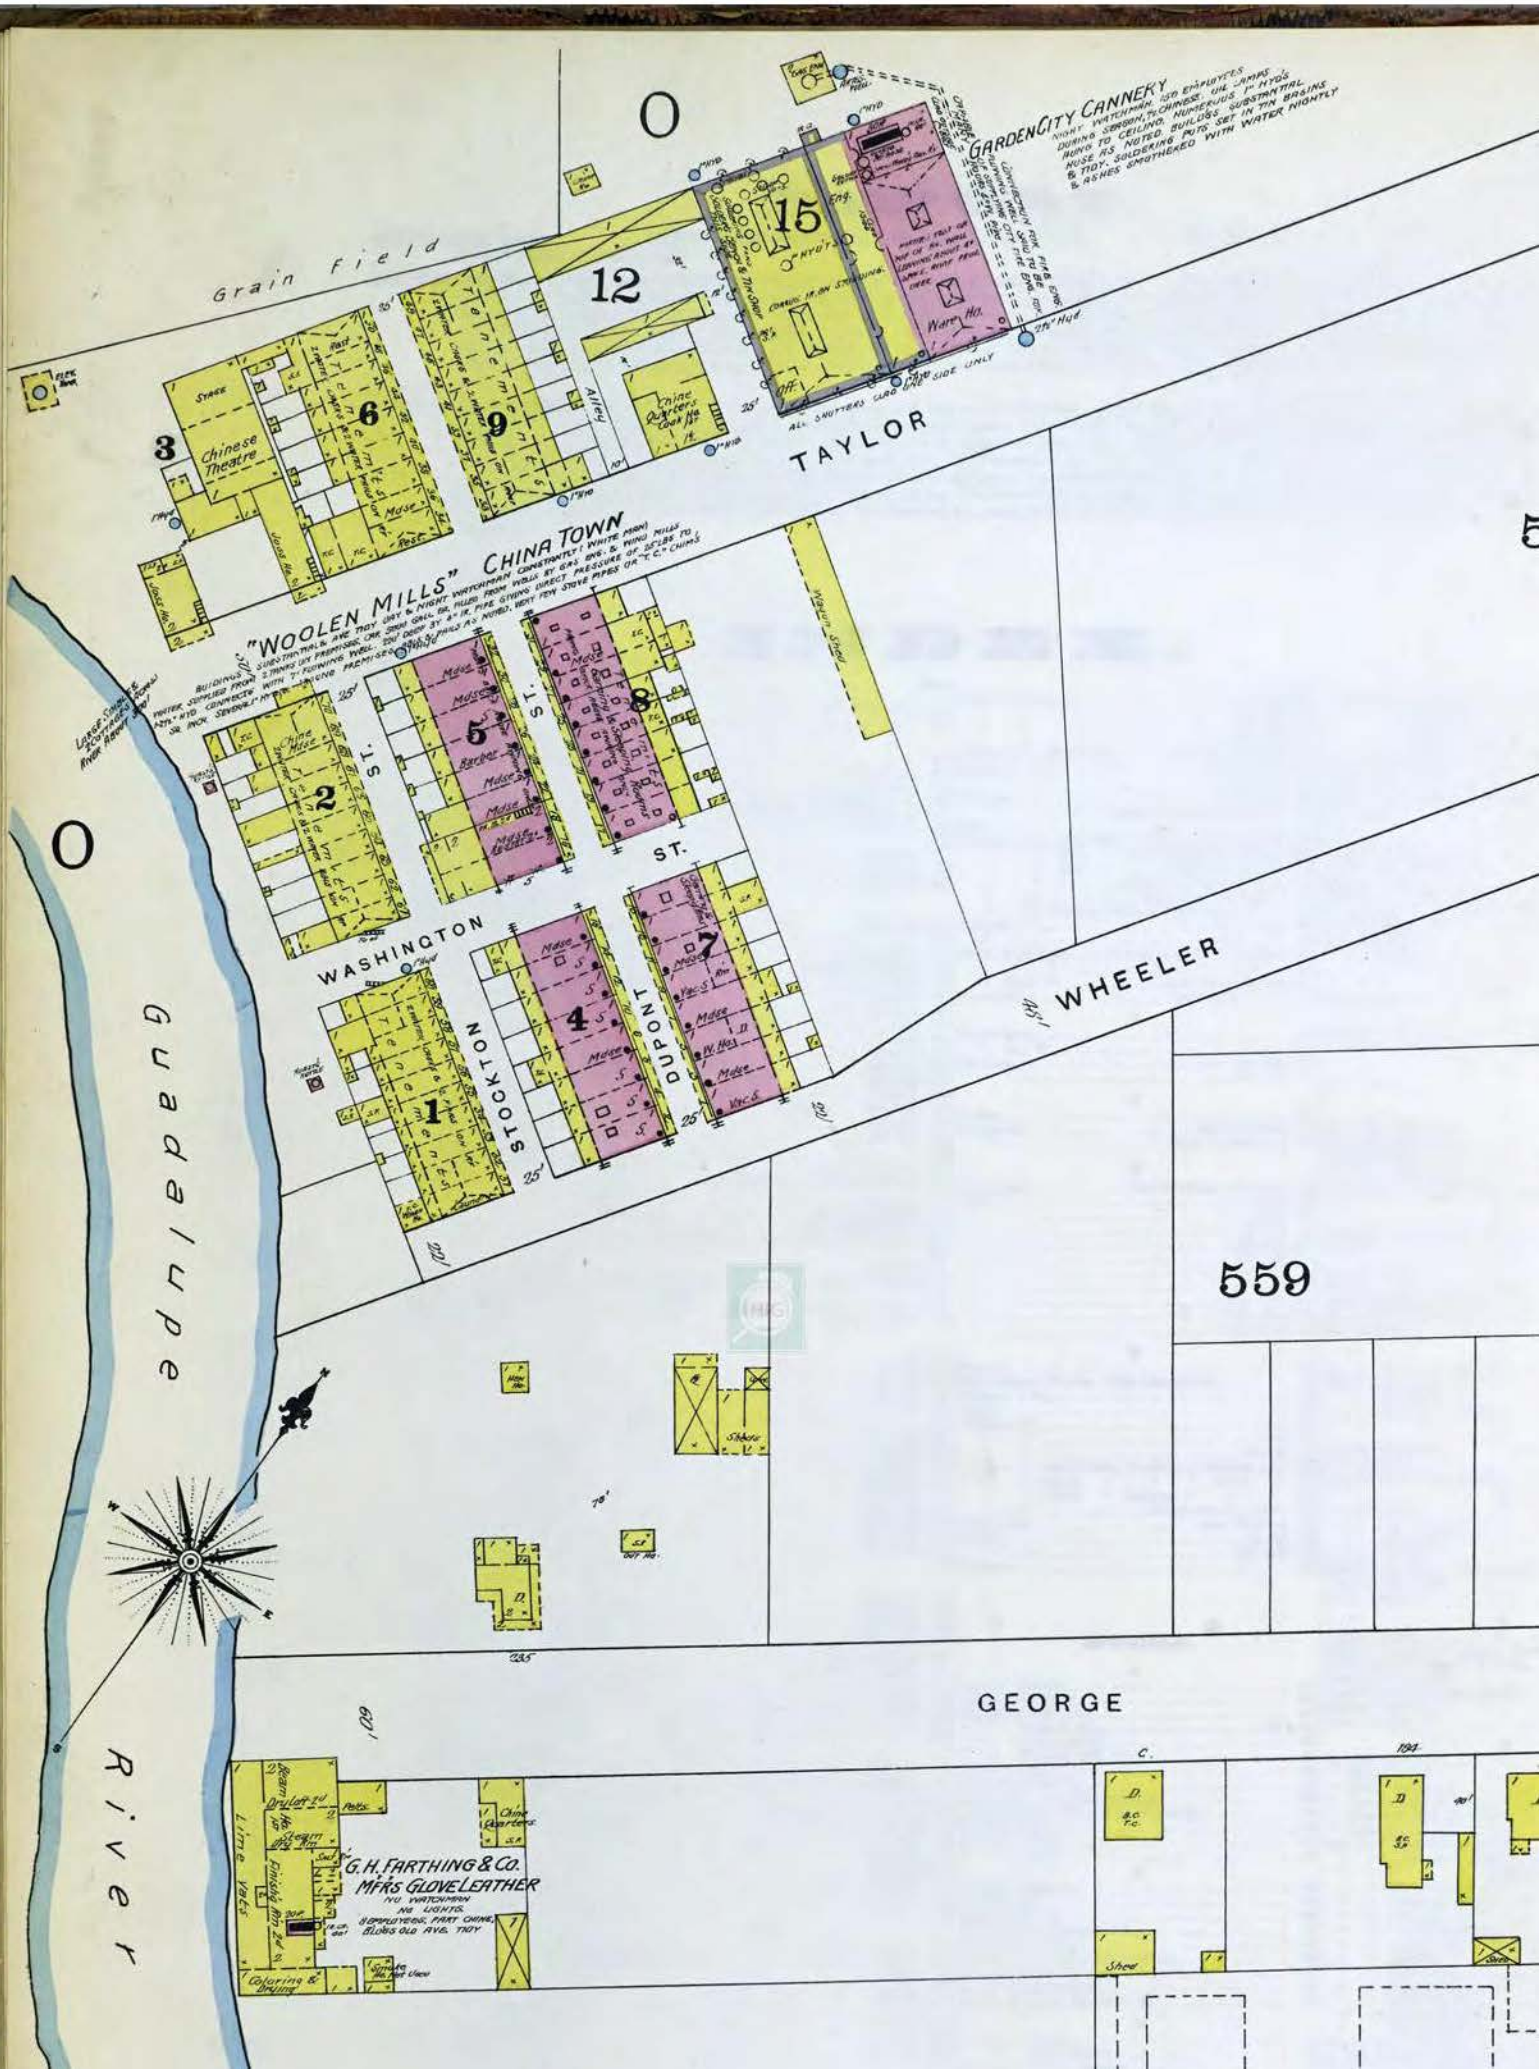

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

City Directory Report

Envirosite's Standard City Directory Report is a screening tool designed to assist in historical use determination of a subject property and adjacent properties. It includes a search of Property Archives digital datasets and national book collections including the Library of Congress and/or the Allen County Public Library at five year intervals or the closest available intervals.

RESEARCH SUMMARY:

The following research sources were consulted in the preparation of this report:

SOURCE:	***YEAR:***
Property Archives	2018, 2015, 2010, 2006, 2002, 1998, 1993
San Jose Criss Cross Directory	1989, 1983, 1978
San Jose City Directory	1973, 1968, 1963

Property Archives is a proprietary and comprehensive dataset of over 1.5 billion commercial, industrial and residential records, business names and uses and occupant records for every city and town in the United States, from recent years to the early 1990s. Property Archives dataset is wholly owned and operated by Property Archives, LLC

This report was prepared by Property Archives, LLC for Envirosite Corporation

Property Archives

SUBJECT PROPERTY:

All information contained in this report are based on data available from various public, government and other sources and are based upon the best data available from those sources. The information available in this report may be available from other sources and is not exclusive or the exclusive property of Envirosite Corporation.

NO WARRANTY EXPRESSED OR IMPLIED, IS MADE IN CONNECTION WITH THIS REPORT, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. ALL RISK IS ASSUMED BY USER AND Envirosite assumes no liability for faulty or inaccurate information. The Reports may utilize a variety of public and other sources reasonably available to Envirosite. Envirosite cannot, and does not assure, warrant, guarantee or assume any liability for the correctness, comprehensiveness, timeliness or completeness of any of such information, nor is the information in any Report to be construed as legal advice with respect to environmental risks associated with any property. Envirosite shall not be liable to anyone for any claims, causes of action, suits, damages, losses, costs and expenses (including, without limitation, attorneys' fees and costs) arising out of or caused by this report regardless of the acts, errors or omissions, or negligence of Envirosite. Any damages shall be limited to the purchase price of the report.

Purchaser of the report accepts the report "As Is". The report is intended only to provide information only and should not be considered as providing any legal advice, prediction, forecast, or fact as to the environmental risk for any specific property. Reports are proprietary to Envirosite, and contain copyrighted material and trademarks of Envirosite. All other trademarks used herein are the property of their respective owners. All rights of Envirosite as to the Reports are reserved.

Envirosite Corporation has conducted a search of all reasonably ascertainable records in accordance with EPA's AAI (40 CFR Part 312) requirements and the ASTM E-1527-21 Environmental Site Assessments standard.

Description : Failure to ensure that tanks are inspected and tested by an appropriately qualified person in accordance with industry standards.

Notes :

Returned to compliance on 12/08/2022. Facility inspection logs show weekly and monthly inspections of all tanks, but Mr. Scanlan was not aware of the requirements to inspect secondary containment. Observed oil in the secondary containment of the Versatrans tank, indicating that weekly and monthly tank inspections are not being conducted with sufficient detail. Begin conducting monthly and annual inspections in accordance with an industry standard. Ensure employee conducting the inspection is trained in specific equipment and requirements for each tank.

Division : Santa Clara County Environmental Health
Program : APSA
Source : CERS

Violation Date : 2022-11-08
Citation : N/R

Description : Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.

Notes : Returned to compliance on 12/08/2022. Eye wash in autoshop was not being inspected monthly. A thick layer of dust was observed on the eyewash. Fire extinguisher in the diesel fuel tank room in the parking garage was not serviced within the last year, per the service tag.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :
2019: 343 - Unspecified organic liquid mixture, 0.08000 tons to CAD008302903
2019: 331 - Off-specification, aged or surplus organics, 0.45850 tons to CAT080014079
2019: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.02500 tons to CAD008302903
2019: 791 - Liquids with pH <= 2, 0.01400 tons to CAT080014079
2019: 551 - Laboratory waste chemicals, 0.01750 tons to CAD008302903
2019: 331 - Off-specification, aged or surplus organics, 0.15500 tons to CAD008302903
2018: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.01300 tons to CAD008302903
2018: 331 - Off-specification, aged or surplus organics, 0.20750 tons to CAD008302903
2018: 141 - Off-specification, aged or surplus inorganics, 0.01250 tons to CAD008302903
2018: 352 - Other organic solids, 0.01200 tons to CAD008302903
2018: 723 - Liquids with chromium (VI) >= 500 Mg./L, 0.00250 tons to CAT080014079
2018: 331 - Off-specification, aged or surplus organics, 0.16200 tons to CAT080014079
2018: 343 - Unspecified organic liquid mixture, 0.00900 tons to CAD008302903
2018: 551 - Laboratory waste chemicals, 0.01000 tons to CAD008302903

Violations

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Violation Date :	2022-06-16
Citation :	N/R

Description :

Failure to include in the SPCC Plan: 1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge 2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.

Notes :	California Office of Emergency Services phone number in the SPCC Plan is incorrect. Include the phone number of the nearest hospital.

Violation Date : 2022-06-16
Citation : N/R

Description : Failure to complete and electronically submit a site map with all required content.

Notes : Site map does not include all required information including emergency equipment (including spill kits or utilities shut-offs), nearest storm drain, and evacuation assembly area. Revise and resubmit within 30 days.

Division : Santa Clara County Environmental Health
Program : HMRRP
Source : CERS

Violation Date : 2022-06-16
Citation : N/R

Description : Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records.

Notes : Facility is not maintaining records of periodic testing or tank integrity testing.

Site History :

Based on information provided in the May 15, 2009, Quarterly Report #45, 2nd Quarter 2009 Discharge of Treated Groundwater to Storm Drain prepared by Western Geo-Engineers for the groundwater extraction and treatment system at the site; groundwater extraction commenced at the site in 1991, approximately 4 million gallons of groundwater have been treated, and approximately 37 gallons of TPHg have been removed. However, the system was shut down on May 7, 2009, due to the relatively low petroleum hydrocarbon mass removal rate; deactivation of the system was approved by SCCDEH in an April 21, 2009 letter. Groundwater sampling procedures consist of initially measuring and documenting the water level in the well and checking the well for the presence of separate-phase hydrocarbon (SPH) using an oil/water interface probe or a clear Teflon bailer. If the well did not contain SPH, it was purged a minimum of three casing volumes or until dry. During purging, well stabilization parameters (temperature, pH, and electrical conductivity) were monitored and recorded. After 80% recovery of the water level, groundwater samples were collected with a new disposable polyethylene bailer or pre-cleaned reusable Teflon bailer and placed into the appropriate EPA-approved containers. Reusable sampling equipment was cleaned with trisodium phosphate solution and clean water between uses. The samples were labeled, logged onto chainof-custody documents, and transported on ice to the laboratory using appropriate chain-of-custody documentation. Groundwater samples were submitted to a California state-certified laboratory, and analyzed for TPHg, benzene, toluene, ethylbenzene, xylenes (collectively BTEX), methyl tertiary butyl ether, and tertiary butanol EPA Method 8260B. The results of the current monitoring event indicate that since shut down of the groundwater extraction and treatment system, dissolved concentrations of petroleum hydrocarbons, MtBE and TBA remain relatively stable and/or within historic ranges, except at wells MW07 and MW08. Continued evaluation of the concentrations will be conducted during ensuing monitoring events; the next event is scheduled for the second half of 2011.

Site History :

1987 - In February, a groundwater sample collected from an observation well adjacent to 2 underground storage tanks (USTs) was reported to have 580 parts per billion (ppb) of Total Petroleum Hydrocarbons as Gasoline (TPHg). 1988 - In April, it was discovered that 1 of the USTs (Tank B) onsite was leaking. It was taken out of service and it is estimated that 3,100 gallons of gasoline had leaked from a 10,000-gallon UST. The UST was ruptured during stick gauging. A trench was excavated to 15-16 feet below the ground surface (ft bgs), approximately 1-2 feet below the bottom of the tank in order to collect free product (FP). Approximately 1.5 ft of FP was measured in leak detection well GY2 adjacent to the UST, no FP collected in the trench. It is believed that the gasoline released migrated away from the tank through a native sand layer at a depth interval of 13-15 ft bgs and that intersects the bank backfill. In addition, gasoline appears to have migrated along a perforated tile drainage system for the adjacent below grade automotive repair garage. This drainage is located along the building wall. The base of the garage is approximately the same depth as the sand layer. High vapor concentrations were reported in the cleanouts for the

drainage system and it is reported that a blower was used to vent the fumes. In May, a soil gas survey was conducted. 18 soil gas samples were collected from 12-14 ft bgs onsite and reported to contain maximum concentrations of Total Hydrocarbons as Propane of 134,000 ppm. The highest concentrations were reported near the ruptured UST. In June, 3 monitoring wells (GX-130A through GX-130C) were installed to 35-40 ft bgs onsite. 12 soil samples were collected and reported to contain maximum concentrations of 190 ppm TPHg, 4.9 ppm Benzene, 19 ppm Toluene, 3.4 ppm Ethylbenzene, and 19 ppm Xylenes. Initial sampling of the wells reported up to 1,900,000 ppb TPHg, 45,000 ppb Benzene, 35,000 ppb Toluene, 2,700 ppb Ethylbenzene, and 16,000 ppb Xylenes in well GX-130B. In July, this same well was reported to have 4-inches of FP present in the well. Also at this time, leak detection well GY2 was destroyed. Also at this time, 5 soil borings (CCGSS1 through CCGSS5) were advanced to approximately 15 ft bgs onsite. 1 soil sample was collected from the bottom of each boring and reported to contain maximum concentrations of 730 ppm TPHg, 1.3 ppm Benzene, 26 ppm Toluene, 11 ppm Ethylbenzene, and 68 ppm Xylenes. These concentrations were reported for boring CCGSS4 located along the building wall and furthest away from the leaking UST. In August, 2 USTs were removed. 4 soil samples were collected from 12-13.5 ft bgs and were reported to contain maximum concentrations of 1,200 parts per million (ppm) TPHg, 2.3 ppm Benzene, 8 ppm Toluene, 8 ppm Ethylbenzene, and 180 ppm Xylenes. The highest concentrations were reported for the sample collected beneath Tank A, which is not the ruptured UST. 1989 - In April, 5 vapor extraction wells (VW130-1 through VW130-5) were installed onsite. 15 soil samples were collected and reported to contain maximum concentrations of 200 ppm TPHg, 2.4 ppm Benzene, 12 ppm Toluene, 5.5 ppm Ethylbenzene, and 25 ppm Xylenes in the sample collected at 21 ft bgs in well VW103-4. Following installation of these wells, a vapor extraction performance test was conducted. Based on the test results, it was determined that soil vapor extraction (SVE) would be a viable remedial alternative at the site. 2 groundwater wells (GX-130D and GX-130E) were installed on and offsite. 7 soil samples were collected and reported to contain maximum concentrations of 120 ppm TPHg, 3.6 ppm Benzene, 9.1 ppm Toluene, 1.7 ppm Ethylbenzene, and 12 ppm Xylenes in the sample collected at 25 ft bgs in GX-130D. Well GX-130B was destroyed to prevent migration of FP between the A1 and A2 zones. This well was reported to be screened across both water-bearing zones. In December, a slug test was conducted onsite. 1990 - In July, soil samples (VS1 through VS3) were collected following the removal of 2 hydraulic lifts and a common fluid reservoir located in the ramp leading to the subterranean automotive repair garage. The depth of these samples was not reported and the laboratory report for the analyses of these samples was not found in the file. It is reported in another report that the maximum concentration of TPH as Diesel (TPHd) was reported to be 1,400 ppm. Sample VS1 was not reported to have concentrations of TPHd, Benzene, Toluene, Ethylbenzene or Xylenes present above the laboratory reporting limits. 1991 - In March, 5 soil borings (DH1 through DH5) were advanced in the area of samples VS2 and VS3. Boring DH1 was advanced in the parking lot east of the ramp and elevated. This boring was advanced to 30.5 ft bgs, which is approximately 20 feet below the sunken ramp. The remaining borings were advanced in the ramp area to depths of 8.5-9.5 ft bgs. 6 soil samples were collected and reported to contain maximum concentrations of 930 ppm TPH as Motor Oil (TPHmo), 0.015 ppm Ethylbenzene, and 0.034 ppm Xylenes in the sample collected from boring DH4. A closure letter was issued for the hydraulic lift removal by the Regional Water Quality Control Board in August 1994. 1992 - In June, 3 wells (GX-130F through GX-130H) and 1 boring EB1 were advanced to a maximum depth of 40 ft bgs. GX-130F was installed to replace GX-130B, but was screened only across the A2 zone. 8 soil samples were collected and reported to contain maximum concentrations of 62 ppm TPHg, 0.43 ppm Benzene, 0.41 ppm Toluene, 3.7 ppm Ethylbenzene, and 3.5 ppm Xylenes. Initial groundwater samples collected from the new wells were reported to have maximum concentrations of 120,000 ppb TPHg, 20,000 ppb Benzene, 3,600 ppb Toluene, 4,500 ppb Ethylbenzene, and 7,300 ppb Xylenes. Also at this time a groundwater sample was collected from leak detection well GY-1 and it was reported to contain 1,300 ppb TPHg, 5.1 ppb Benzene, and 1.9 ppb Ethylbenzene. Sampling of site wells at this time reported FP to be present in well GX-130D. This well is located at the far corner of the building, likely just beyond the building drainage system. Also, 3 soil samples SS1 through SS3 were collected from within the building at a depth of approximately 1 foot below the subterranean building floor and 15 ft bgs. These samples were collected to evaluate the soil beneath the garage in the area of Tank B (ruptured UST). These soil samples were reported to have very low to non-detectable concentrations of the Constituents of Concern (COCs). 1993 - In February, a waste oil UST was removed from the site. 2 soil samples (SN1 and SS2) were collected and were not

GCC_SANTA CLARA VALLEY - CA ***(cont.)***

reported to have concentrations of the COCs present above the laboratory reporting limits. The depths of these samples were not reported and a figure illustrating the location of this UST was not found in the file. Groundwater was reported to have entered the excavation and a grab sample (W1) was collected. The water sample was reported to contain 21,000 ppb Total Oil and Grease (TOG). In August, groundwater extraction commenced onsite from wells GX-130F and GX-130-G. SVE operations were also reported to have been ongoing for one month before shutdown to change out the destruction method for the vapors. It was later reported that the system remained off due to high groundwater elevations. SVE operation data could not be found in the file. It is not clear when the groundwater extraction ceased onsite. The last time system operation was reported was in July 1995. And it reported that through May 1995, approximately 1,748,450 gallons of groundwater had been extracted. 1994 - In July, 2 deep zone wells (GX-130I and GX-130J) were installed utilizing conductor casing. GX-130I was advanced near well GX-130C, which was screened across both water-bearing zones and to assess if the deeper A2 zone had been impacted by the cross screened well GX-130C. Additionally, well GX-130C was destroyed at this time. 3 soil samples were collected from the new wells within the A2 zone and reported to contain 280 ppm TPHg, 2.8 ppm Benzene, 0.4 ppm Toluene, 6.7 ppm Ethylbenzene and 8 ppm Xylenes in the sample collected from 20 ft bgs in GX-130I. The 2 samples collected from GX-130J (located downgradient of GX-130D) were not reported to have concentrations of the COCs present above the laboratory reporting limits. A pump test was conducted on the A1 zone wells. During the tests, no appreciable influence from pumping could be detected in any of the nearby observation wells. Additionally, these wells were slow to recharge. The A1 zone occurs in the shallow sand layer between 11-15 ft bgs along with the underlying 4 feet of silty clay and clayey silt. This appears to be a perched water zone, which was dry during the initial investigations. The A2 water bearing zone consists of sands and gravels between the depths of approximately 30-50 ft bgs and appears to be confined. 1995 - In May, 2 wells (GX-130K and GX-130L) and 1 hydropunch boring (HP1) was advanced offsite. 3 soil samples were collected and were not reported to have concentrations of the COCs present above the laboratory reporting limits. Nor were concentrations of the COCs reported to be present in the groundwater samples collected from each. 2008 - In December, 5 wells (GY1, GX-130A, GX-130H, GX-130K, and GX-130L) were destroyed. 2010 - In March, the last groundwater monitoring event was conducted and reported maximum concentrations of 3,740 ppb TPHg, 345 ppb Benzene, 12.5 ppb Toluene, 6.8 ppb Ethylbenzene, 36.8 ppb Xylenes, 62.9 ppb MtBE, and 26.1 ppb Tert Butyl Alcohol (TBA). In April, an indoor vapor intrusion assessment was completed. 5 sub-slab soil gas samples were collected from under the now vacant automotive repair garage. These samples were reported to have concentrations of Ethanol, Acetone, 2-Hexanone, Carbon Disulfide, Methyl Ethyl Ketone, Tetrahydrofuran, 2,2,4-Trimethylpentane, 1,1,1-Trichloroethane, Trichloroethene (TCE), Toluene, 1,2,4-Trimethylbenzene, m,p-Xylenes, and o-Xylene. Benzene and Methyl tert-Butyl Ether (MtBE) were not reported to be present. Also at this time, 2 indoor air samples and an outdoor sample were collected. These samples were reported to contain similar concentrations of Benzene, Toluene, Ethylbenzene, m,p-Xylenes, and o-Xylene. It was concluded that "This finding is consistent with the grated but open construction of the garage access door which allows free passage of outdoor air into the structure. Benzene exceeded its ESL for indoor air under commercial use however the same concentration was present in outdoor air." And "The fuel-related compounds benzene, ethylbenzene, and MTBE detected in on-site shallow groundwater were not detected in the soil gas samples indicating that these compounds have either not partitioned to the gas-phase or that soil gas has not reached the area immediately below the concrete slab." And "The multiple lines of evidence presented above indicate that vapor intrusion by subsurface contaminants is not occurring at the Civic Center Garage." Again, it should be noted that this building is located below grade adjacent to a fueling facility.

Site History :

1987 - In February, a groundwater sample collected from an observation well adjacent to 2 underground storage tanks (USTs) was reported to have 580 parts per billion (ppb) of Total Petroleum Hydrocarbons as Gasoline (TPHg). 1988 - In April, it was discovered that 1 of the USTs (Tank B) onsite was leaking. It was taken out of service and it is estimated that 3,100 gallons of gasoline had leaked from a 10,000-gallon UST. The UST was ruptured during stick gauging. A trench was excavated to 15-16 feet below the ground surface (ft bgs), approximately 1-2 feet below the bottom of the tank in order to collect free product (FP). Approximately 1.5 ft of FP was measured in leak detection well GY2 adjacent to the UST, no FP collected in the trench. It is believed that the gasoline released migrated away from the tank through a native sand layer at a depth interval of 13-15 ft bgs and that intersects the bank backfill. In addition, gasoline appears to have migrated along a perforated tile drainage system for the adjacent below grade automotive repair garage. This drainage is located along the building wall. The base of the garage is approximately the same depth as the sand layer. High vapor concentrations were reported in the cleanouts for the drainage system and it is reported that a blower was used to vent the fumes. In May, a soil gas survey was conducted. 18 soil gas samples were collected from 12-14 ft bgs onsite and reported to contain maximum concentrations of Total Hydrocarbons as Propane of 134,000 ppm. The highest concentrations were reported near the ruptured UST. In June, 3 monitoring wells (GX-130A through GX-130C) were installed to 35-40 ft bgs onsite. 12 soil samples were collected and reported to contain maximum concentrations of 190 ppm TPHg, 4.9 ppm Benzene, 19 ppm Toluene, 3.4 ppm Ethylbenzene, and 19 ppm Xylenes. Initial sampling of the wells reported up to 1,900,000 ppb TPHg, 45,000 ppb Benzene, 35,000 ppb Toluene, 2,700 ppb Ethylbenzene, and 16,000 ppb Xylenes in well GX-130B. In July, this same well was reported to have 4-inches of FP present in the well. Also at this time, leak detection well GY2 was destroyed. Also at this time, 5 soil borings (CCGSS1 through CCGSS5) were advanced to approximately 15 ft bgs onsite. 1 soil sample was collected from the bottom of each boring and reported to contain maximum concentrations of 730 ppm TPHg, 1.3 ppm Benzene, 26 ppm Toluene, 11 ppm Ethylbenzene, and 68 ppm Xylenes. These concentrations were reported for boring CCGSS4 located along the building wall and furthest away from the leaking UST. In August, 2 USTs were removed. 4 soil samples were collected from 12-13.5 ft bgs and were reported to contain maximum concentrations of 1,200 parts per million (ppm) TPHg, 2.3 ppm

Benzene, 8 ppm Toluene, 8 ppm Ethylbenzene, and 180 ppm Xylenes. The highest concentrations were reported for the sample collected beneath Tank A, which is not the ruptured UST. 1989 - In April, 5 vapor extraction wells (VW130-1 through VW130-5) were installed onsite. 15 soil samples were collected and reported to contain maximum concentrations of 200 ppm TPHg, 2.4 ppm Benzene, 12 ppm Toluene, 5.5 ppm Ethylbenzene, and 25 ppm Xylenes in the sample collected at 21 ft bgs in well VW103-4. Following installation of these wells, a vapor extraction performance test was conducted. Based on the test results, it was determined that soil vapor extraction (SVE) would be a viable remedial alternative at the site. 2 groundwater wells (GX-130D and GX-130E) were installed on and offsite. 7 soil samples were collected and reported to contain maximum concentrations of 120 ppm TPHg, 3.6 ppm Benzene, 9.1 ppm Toluene, 1.7 ppm Ethylbenzene, and 12 ppm Xylenes in the sample collected at 25 ft bgs in GX-130D. Well GX-130B was destroyed to prevent migration of FP between the A1 and A2 zones. This well was reported to be screened across both water-bearing zones. In December, a slug test was conducted onsite. 1990 - In July, soil samples (VS1 through VS3) were collected following the removal of 2 hydraulic lifts and a common fluid reservoir located in the ramp leading to the subterranean automotive repair garage. The depth of these samples was not reported and the laboratory report for the analyses of these samples was not found in the file. It is reported in another report that the maximum concentration of TPH as Diesel (TPHd) was reported to be 1,400 ppm. Sample VS1 was not reported to have concentrations of TPHd, Benzene, Toluene, Ethylbenzene or Xylenes present above the laboratory reporting limits. 1991 - In March, 5 soil borings (DH1 through DH5) were advanced in the area of samples VS2 and VS3. Boring DH1 was advanced in the parking lot east of the ramp and elevated. This boring was advanced to 30.5 ft bgs, which is approximately 20 feet below the sunken ramp. The remaining borings were advanced in the ramp area to depths of 8.5-9.5 ft bgs. 6 soil samples were collected and reported to contain maximum concentrations of 930 ppm TPH as Motor Oil (TPHmo), 0.015 ppm Ethylbenzene, and 0.034 ppm Xylenes in the sample collected from boring DH4. A closure letter was issued for the hydraulic lift removal by the Regional Water Quality Control Board in August 1994. 1992 - In June, 3 wells (GX-130F through GX-130H) and 1 boring EB1 were advanced to a maximum depth of 40 ft bgs. GX-130F was installed to replace GX-130B, but was screened only across the A2 zone. 8 soil samples were collected and reported to contain maximum concentrations of 62 ppm TPHg, 0.43 ppm Benzene, 0.41 ppm Toluene, 3.7 ppm Ethylbenzene, and 3.5 ppm Xylenes. Initial groundwater samples collected from the new wells were reported to have maximum concentrations of 120,000 ppb TPHg, 20,000 ppb Benzene, 3,600 ppb Toluene, 4,500 ppb Ethylbenzene, and 7,300 ppb Xylenes. Also at this time a groundwater sample was collected from leak detection well GY-1 and it was reported to contain 1,300 ppb TPHg, 5.1 ppb Benzene, and 1.9 ppb Ethylbenzene. Sampling of site wells at this time reported FP to be present in well GX-130D. This well is located at the far corner of the building, likely just beyond the building drainage system. Also, 3 soil samples SS1 through SS3 were collected from within the building at a depth of approximately 1 foot below the subterranean building floor and 15 ft bgs. These samples were collected to evaluate the soil beneath the garage in the area of Tank B (ruptured UST). These soil samples were reported to have very low to non-detectable concentrations of the Constituents of Concern (COCs). 1993 - In February, a waste oil UST was removed from the site. 2 soil samples (SN1 and SS2) were collected and were not reported to have concentrations of the COCs present above the laboratory reporting limits. The depths of these samples were not reported and a figure illustrating the location of this UST was not found in the file. Groundwater was reported to have entered the excavation and a grab sample (W1) was collected. The water sample was reported to contain 21,000 ppb Total Oil and Grease (TOG). In August, groundwater extraction commenced onsite from wells GX-130F and GX-130-G. SVE operations were also reported to have been ongoing for one month before shutdown to change out the destruction method for the vapors. It was later reported that the system remained off due to high groundwater elevations. SVE operation data could not be found in the file. It is not clear when the groundwater extraction ceased onsite. The last time system operation was reported was in July 1995. And it reported that through May 1995, approximately 1,748,450 gallons of groundwater had been extracted. 1994 - In July, 2 deep zone wells (GX-130I and GX-130J) were installed utilizing conductor casing. GX-130I was advanced near well GX-130C, which was screened across both water-bearing zones and to assess if the deeper A2 zone had been impacted by the cross screened well GX-130C. Additionally, well GX-130C was destroyed at this time. 3 soil samples were collected from the new wells within the A2 zone and reported to contain 280 ppm TPHg, 2.8 ppm Benzene, 0.4 ppm Toluene, 6.7 ppm Ethylbenzene and 8 ppm Xylenes in the sample collected from 20 ft bgs in GX-

130I. The 2 samples collected from GX-130J (located downgradient of GX-130D) were not reported to have concentrations of the COCs present above the laboratory reporting limits. A pump test was conducted on the A1 zone wells. During the tests, no appreciable influence from pumping could be detected in any of the nearby observation wells. Additionally, these wells were slow to recharge. The A1 zone occurs in the shallow sand layer between 11-15 ft bgs along with the underlying 4 feet of silty clay and clayey silt. This appears to be a perched water zone, which was dry during the initial investigations. The A2 water bearing zone consists of sands and gravels between the depths of approximately 30-50 ft bgs and appears to be confined. 1995 - In May, 2 wells (GX-130K and GX-130L) and 1 hydropunch boring (HP1) was advanced offsite. 3 soil samples were collected and were not reported to have concentrations of the COCs present above the laboratory reporting limits. Nor were concentrations of the COCs reported to be present in the groundwater samples collected from each. 2008 - In December, 5 wells (GY1, GX-130A, GX-130H, GX-130K, and GX-130L) were destroyed. 2010 - In March, the last groundwater monitoring event was conducted and reported maximum concentrations of 3,740 ppb TPHg, 345 ppb Benzene, 12.5 ppb Toluene, 6.8 ppb Ethylbenzene, 36.8 ppb Xylenes, 62.9 ppb MtBE, and 26.1 ppb Tert Butyl Alcohol (TBA). In April, an indoor vapor intrusion assessment was completed. 5 sub-slab soil gas samples were collected from under the now vacant automotive repair garage. These samples were reported to have concentrations of Ethanol, Acetone, 2-Hexanone, Carbon Disulfide, Methyl Ethyl Ketone, Tetrahydrofuran, 2,2,4-Trimethylpentane, 1,1,1-Trichloroethane, Trichloroethene (TCE), Toluene, 1,2,4-Trimethylbenzene, m,p-Xylenes, and o-Xylene. Benzene and Methyl tert-Butyl Ether (MtBE) were not reported to be present. Also at this time, 2 indoor air samples and an outdoor sample were collected. These samples were reported to contain similar concentrations of Benzene, Toluene, Ethylbenzene, m,p-Xylenes, and o-Xylene. It was concluded that "This finding is consistent with the grated but open construction of the garage access door which allows free passage of outdoor air into the structure. Benzene exceeded its ESL for indoor air under commercial use however the same concentration was present in outdoor air." And "The fuel-related compounds benzene, ethylbenzene, and MTBE detected in on-site shallow groundwater were not detected in the soil gas samples indicating that these compounds have either not partitioned to the gas-phase or that soil gas has not reached the area immediately below the concrete slab." And "The multiple lines of evidence presented above indicate that vapor intrusion by subsurface contaminants is not occurring at the Civic Center Garage." Again, it should be noted that this building is located below grade adjacent to a fueling facility.

Global ID :	T0608500392

Site History :

The Site is located on the northern corner at the intersection of Coleman Avenue and West Taylor Street in San Jose, California. The Site is currently occupied by AJ Auto Detailing, an operating auto detailing shop. Land use near the Site consists primarily of commercial and industrial properties. Chevron site 306583 (former Unocal-branded service station #4427) is located at the eastern corner of the intersection of Coleman Avenue and West Taylor Street (southeast of the Site) and is also an open leaking underground storage tank (LUST) case (SCVWDID: 07S1E07D01f). Commencing First Quarter 2010, the Site and Chevron site 306583 were combined under a joint groundwater monitoring and sampling program. First Quarter 2012 groundwater monitoring and sampling event was conducted by Blaine Tech on February 28, 2012. A summary of First Quarter 2012 groundwater analytical results follows: * TPH-GRO was detected in one Site well this quarter, at a concentration of 31,000 micrograms per liter (ìg/L; well MW-3), which is within historical limits for this well. * Benzene was detected in one Site well this quarter, at a concentration of 580 ìg/L (well MW-3), which is within historical limits for this well. * Toluene was detected in one Site well this quarter, at a concentration of 220 ìg/L (well MW-3), which is within historical limits for this well. * Ethylbenzene was detected in one Site well this quarter, at a concentration of 2,100 ìg/L (well MW-3), which is within historical limits for this well. * Total Xylenes were detected in one Site well this quarter, at a concentration of 3,500 ìg/L (well MW-3), which is within historical limits for this well. * MtBE was not detected above the LRLs (0.5 ìg/L and 3 ìg/L) in any Site well sampled this quarter. Based on TPH-GRO and BTEX compound concentrations above ESLs, Stantec recommends the continuation of the current semi-annual groundwater monitoring and sampling program.

Site History :

The Site is located on the northern corner at the intersection of Coleman Avenue and West Taylor Street in San Jose, California. The Site is currently occupied by AJ Auto Detailing, an operating auto detailing shop. Land use near the Site consists primarily of commercial and industrial properties. Chevron site 306583 (former Unocal-branded service station #4427) is located at the eastern corner of the intersection of Coleman Avenue and West Taylor Street (southeast of the Site) and is also an open leaking underground storage tank (LUST) case (SCVWDID: 07S1E07D01f). Commencing First Quarter 2010, the Site and Chevron site 306583 were combined under a joint groundwater monitoring and sampling program. First Quarter 2012 groundwater monitoring and sampling event was conducted by Blaine Tech on February 28, 2012. A summary of First Quarter 2012 groundwater analytical results follows: * TPH-GRO was detected in one Site well this quarter, at a concentration of 31,000 micrograms per liter (ìg/L; well MW-3), which is within historical limits for this well. * Benzene was detected in one Site well this quarter, at a concentration of 580 ìg/L (well MW-3), which is within historical limits for this well. * Toluene was detected in one Site well this quarter, at a concentration of 220 ìg/L (well MW-3), which is within historical limits for this well. * Ethylbenzene was detected in one Site well this quarter, at a concentration of 2,100 ìg/L (well MW-3), which is within historical limits for this well. * Total Xylenes were detected in one Site well this quarter, at a concentration of 3,500 ìg/L (well MW-3), which is within historical limits for this well. * MtBE was not detected above the LRLs (0.5 ìg/L and 3 ìg/L) in any Site well sampled this quarter. Based on TPH-GRO and BTEX compound concentrations above ESLs, Stantec recommends the continuation of the current semi-annual groundwater monitoring and sampling program.

Site History :

The subject site area is located within the Santa Clara Valley Groundwater Basin approximately ten miles south of the San Francisco Bay. The regional geology of the San Francisco Bay Area, in most areas of urban development surrounding the Bay and within the valley floor of Santa Clara County, is defined by the United States Geological Survey as Holocene alluvial fan deposits. Regional groundwater flow within the shallow water bearing zones beneath this area of the Santa Clara Valley is predominantly and generally north towards the San Francisco Bay, except in specific locations where flow may be influenced by local phenomena, such as groundwater extraction or surface streams. In some locations of the valley floor, the groundwater gradient is essentially flat, resulting in great variability and/or significant seasonal changes in site specific groundwater flow directions. The site elevation is approximately 65 to 67 feet above mean sea level (msl). Previous subsurface investigations have indicated that soils beneath the site area consist mainly of silts and clays, with thin sand "stringers" or lenses encountered in several locations, to approximately 25 feet bgs (the total depth explored). These more permeable zones are transmissible where groundwater is found. A layer of sand, encountered from approximately 17 to 20 feet bgs, appears to be fairly continuous throughout the site area. The depth to first-encountered groundwater beneath the site area ranges from approximately 11 to 15 feet below ground surface (bgs), while static groundwater levels range from approximately 5 to 7 feet bgs. Site monitoring data indicates that the direction of groundwater flow is generally towards the north. This has been confirmed through several years of monitoring events. There have been some abnormal gradients such as last quarter (see Figure 3) but these are most likely artifacts of various remediation processes conducted on area groundwater contamination (on-site and Shell). The site is an automotive repair facility, located on the northwest corner of N. 4th Street and E. Taylor Street near downtown San Jose (see Figures 1 and 2). The site use was previously a retail gasoline station until 1998. The site encompasses approximately 8,500 square feet of land in an area of mixed commercial and residential use. To the west is a dentist's office and associated parking. To the north are single family residences, most of which have south-side driveways leading to detached garages behind the houses. Three 4,000-gallon gasoline tanks were removed from the site in 1998 and a 500-gallon waste oil tank was removed in 1999. The area surrounding these tanks was extensively excavated at the time of tank removal, but high concentrations of petroleum hydrocarbons have been found in the soil and groundwater up to several hundred feet from the former tank locations. An Interim Corrective Action Plan was submitted in May, 2004 and approved in July of 2004. The site is being remediated under the State Water Resources Control Board's Pay For Performance (PFP) Program. October 20, 2004 was the startup date for remedial action, so there was no operation at the site prior to that date. Prior activity consisted of baseline sampling (September 2004) and system reparation and installation. Despite a 90+ % reduction in on-site contamination levels (see latest groundwater quality data in Figures 4 through 6),off-site subsurface fuel contamination of concern remains.

Site History :

The Site is a former Unocal-branded service station, which was located at the eastern corner of the intersection of West Taylor Street and Coleman Avenue in San Jose, California. The service station operated from approximately 1956 to 1981. Previous Site features included a station building, two fuel dispenser islands, one 5,000-gallon and

two 4,000-gallon underground storage tanks (USTs), and one 550-gallon waste oil UST. In June 1980, the three gasoline USTs were removed and replaced by two 10,000-gallon fiberglass USTs. Historical reports indicate the station building and fuel dispenser islands were removed in March 1982, and the USTs and associated fuel lines were removed in 1985 (Gettler-Ryan, Inc. [G-R], 2000); however, Stantec could not locate documentation of the UST removal on file with the County of Santa Clara for confirmation. The Site has since remained vacant and is currently a fenced-in, unpaved lot. Land use near the Site consists primarily of commercial and industrial properties. Former Chevron-branded service station 9-9727 is located at the northern corner of West Taylor Street and Coleman Avenue (northwest of the Site) and is known to have had leaking USTs. Starting First Quarter 2010, former Chevron-branded service station 9-9727 is under a joint groundwater monitoring and sampling program with the Site. The Site elevation is approximately 75 feet above mean sea level. The Site is located in Santa Clara Valley, approximately 10 miles southeast of the San Francisco Bay and 1,200 feet west of Guadalupe River in Santa Clara County. The Santa Cruz Mountains are 10 miles southwest of the Site and the Diablo Range is approximately 7 miles northeast of the Site. In January 1986, EMCON Associates of Santa Clara, California (EMCON) advanced four soil borings (U-A through U-D) near the former UST excavation. The maximum hydrocarbon concentrations were observed in soil sampled above the first-encountered groundwater, approximately 29 feet below ground surface (bgs). In April 1986, EMCON installed six groundwater monitoring wells (U-1 through U-6). Separate-phase hydrocarbons (SPH) were observed in wells U-2, U-4, and U-5. EMCON conducted a well survey which identified six wells within 1/2-mile radius of the Site. At the time of their report, four wells were inactive water supply wells, one was an active municipal well, and one was an active domestic water supply well (ENSR, 2006). In March 1988, Pacific Environmental Group of Santa Clara, California (PEG) installed three groundwater monitoring wells (U-7, U-8, and U-9) (ENSR, 2006).From 1989 to 1992, GeoStrategies, Inc. of Rancho Cordova, California (GSI) installed seven groundwater monitoring wells (U-10 through U-16) and two groundwater recovery wells (UR-1 and UR-2) (ENSR, 2006). In September 1991, GSI performed a step-drawdown pump test and a constant-rate extraction test on groundwater recovery well UR-1 to obtain aquifer characteristics. Monitoring wells U-1, U-2, U-5, and U-6 were used as observation wells. No drawdown was observed in the four observation wells (ENSR, 2006). In March 1993, GSI collected eleven soil samples from beneath the fuel piping located on the western portion of the Site. Samples were collected from between 2.5 to 3 feet bgs. No petroleum hydrocarbons were detected in any soil sample. A groundwater extraction and treatment (GWET) system operated periodically from August 1995 to September 1998 utilizing wells U-4 (screened from 28.5 to 48.5 feet bgs), U-5 (screened from 28.5 to 48.5 feet bgs), and UR-1 (screened from 20 to 45 feet bgs) as groundwater extraction points. During its operation, the GWET system extracted approximately 668,690 gallons of groundwater and removed approximately 337 pounds of total petroleum hydrocarbons as gasoline range organics (TPH-GRO), 30 pounds of total petroleum hydrocarbons as diesel range organics (TPH-DRO), and 41 pounds of benzene (G-R, 2000). In October 1996, GSI installed monitoring well U-17. In August 2000, G-R submitted a corrective action plan (CAP) recommending natural attenuation as the most viable option for Site remediation. In February and March 2006, a remedial design investigation was conducted, which included the advancement of 17 membrane interface probe (MIP) borings and nine confirmation soil borings to further characterize the horizontal and vertical extent of the residual petroleum hydrocarbons beneath the Site, and to determine soil types associated with residual contamination to aid in evaluating alternative remedial strategies. The investigation indicated that residual hydrocarbons remain in the northeastern portion of the Site, and the vertical extent of residual petroleum hydrocarbons beneath the Site had been adequately characterized (ENSR, 2006). In December 2006 and January 2007, ENSR installed nine shallow screen interval groundwater monitoring wells (U-3A to U-6A, U-11A, U-12A, U-15A, U-16A, and UR-1A) in response to rising groundwater elevations, and installed one deep screen interval groundwater monitoring well (U-17B). ENSR also destroyed wells U-1, U-8, U-9, U-10, U-13, and U-14 (ENSR, 2007). A soil vapor intrusion assessment was conducted in 2007 and 2008 to evaluate potential vapor intrusion risks to human health in the business to the northeast of the Site. Three temporary sub-slab soil vapor sampling probes were installed on December 18, 2007. Soil vapor samples were collected from these probes on February 7, 2008, and July 1, 2008. In addition, indoor and outdoor air samples were collected during both soil vapor sampling events. Results of the investigation indicated that the vapor concentrations do not pose an increased risk to human health (ENSR, 2008). Groundwater monitoring has been performed at the Site since October 1988. A total of 23 active wells are currently monitored on a semi-annual or annual basis. Groundwater monitoring data indicates that groundwater elevations have risen by as much as 25 feet since monitoring began at the Site. Currently (as of First Quarter 2010), groundwater is encountered at approximately 8 to 11 feet bgs. Historically, the direction of groundwater flow has been towards the north-northeast (Stantec, 2010b). Historical monitoring reports prepared by previous consultants presented two distinct groundwater-bearing zones; a shallow groundwater-bearing zone from approximately 3 to 25 feet bgs, and a deep

Site History :

The Site is a former Unocal-branded service station, which was located at the eastern corner of the intersection of West Taylor Street and Coleman Avenue in San Jose, California. The service station operated from approximately 1956 to 1981. Previous Site features included a station building, two fuel dispenser islands, one 5,000-gallon and two 4,000-gallon underground storage tanks (USTs), and one 550-gallon waste oil UST. In June 1980, the three gasoline USTs were removed and replaced by two 10,000-gallon fiberglass USTs. Historical reports indicate the station building and fuel dispenser islands were removed in March 1982, and the USTs and associated fuel lines were removed in 1985 (Gettler-Ryan, Inc. [G-R], 2000); however, Stantec could not locate documentation of the UST removal on file with the County of Santa Clara for confirmation. The Site has since remained vacant and is currently a fenced-in, unpaved lot. Land use near the Site consists primarily of commercial and industrial properties. Former Chevron-branded service station 9-9727 is located at the northern corner of West Taylor Street and Coleman Avenue (northwest of the Site) and is known to have had leaking USTs. Starting First Quarter 2010, former Chevron-branded service station 9-9727 is under a joint groundwater monitoring and sampling program with the Site. The Site elevation is approximately 75 feet above mean sea level. The Site is located in Santa Clara Valley, approximately 10 miles southeast of the San Francisco Bay and 1,200 feet west of Guadalupe River in Santa Clara County. The Santa Cruz Mountains are 10 miles southwest of the Site and the Diablo Range is approximately 7 miles northeast of the Site. In January 1986, EMCON Associates of Santa Clara, California (EMCON) advanced four soil borings (U-A through U-D) near the former UST excavation. The maximum hydrocarbon concentrations were observed in soil sampled above the first-encountered groundwater, approximately 29 feet below ground surface (bgs). In April 1986, EMCON installed six groundwater monitoring wells (U-1 through U-6). Separate-phase hydrocarbons (SPH) were observed in wells U-2, U-4, and U-5. EMCON conducted a well survey which identified six wells within 1/2-mile radius of the Site. At the time of their report, four wells were inactive water supply wells, one was an active municipal well, and one was an active domestic water supply well (ENSR, 2006). In March 1988, Pacific Environmental Group of Santa Clara, California (PEG) installed three groundwater monitoring wells (U-7, U-8, and U-9) (ENSR, 2006).From 1989 to 1992, GeoStrategies, Inc. of Rancho Cordova, California (GSI) installed seven groundwater monitoring wells (U-10 through U-16) and two groundwater recovery wells (UR-1 and UR-2) (ENSR,

2006). In September 1991, GSI performed a step-drawdown pump test and a constant-rate extraction test on groundwater recovery well UR-1 to obtain aquifer characteristics. Monitoring wells U-1, U-2, U-5, and U-6 were used as observation wells. No drawdown was observed in the four observation wells (ENSR, 2006). In March 1993, GSI collected eleven soil samples from beneath the fuel piping located on the western portion of the Site. Samples were collected from between 2.5 to 3 feet bgs. No petroleum hydrocarbons were detected in any soil sample. A groundwater extraction and treatment (GWET) system operated periodically from August 1995 to September 1998 utilizing wells U-4 (screened from 28.5 to 48.5 feet bgs), U-5 (screened from 28.5 to 48.5 feet bgs), and UR-1 (screened from 20 to 45 feet bgs) as groundwater extraction points. During its operation, the GWET system extracted approximately 668,690 gallons of groundwater and removed approximately 337 pounds of total petroleum hydrocarbons as gasoline range organics (TPH-GRO), 30 pounds of total petroleum hydrocarbons as diesel range organics (TPH-DRO), and 41 pounds of benzene (G-R, 2000). In October 1996, GSI installed monitoring well U-17. In August 2000, G-R submitted a corrective action plan (CAP) recommending natural attenuation as the most viable option for Site remediation. In February and March 2006, a remedial design investigation was conducted, which included the advancement of 17 membrane interface probe (MIP) borings and nine confirmation soil borings to further characterize the horizontal and vertical extent of the residual petroleum hydrocarbons beneath the Site, and to determine soil types associated with residual contamination to aid in evaluating alternative remedial strategies. The investigation indicated that residual hydrocarbons remain in the northeastern portion of the Site, and the vertical extent of residual petroleum hydrocarbons beneath the Site had been adequately characterized (ENSR, 2006). In December 2006 and January 2007, ENSR installed nine shallow screen interval groundwater monitoring wells (U-3A to U-6A, U-11A, U-12A, U-15A, U-16A, and UR-1A) in response to rising groundwater elevations, and installed one deep screen interval groundwater monitoring well (U-17B). ENSR also destroyed wells U-1, U-8, U-9, U-10, U-13, and U-14 (ENSR, 2007). A soil vapor intrusion assessment was conducted in 2007 and 2008 to evaluate potential vapor intrusion risks to human health in the business to the northeast of the Site. Three temporary sub-slab soil vapor sampling probes were installed on December 18, 2007. Soil vapor samples were collected from these probes on February 7, 2008, and July 1, 2008. In addition, indoor and outdoor air samples were collected during both soil vapor sampling events. Results of the investigation indicated that the vapor concentrations do not pose an increased risk to human health (ENSR, 2008). Groundwater monitoring has been performed at the Site since October 1988. A total of 23 active wells are currently monitored on a semi-annual or annual basis. Groundwater monitoring data indicates that groundwater elevations have risen by as much as 25 feet since monitoring began at the Site. Currently (as of First Quarter 2010), groundwater is encountered at approximately 8 to 11 feet bgs. Historically, the direction of groundwater flow has been towards the north-northeast (Stantec, 2010b). Historical monitoring reports prepared by previous consultants presented two distinct groundwater-bearing zones; a shallow groundwater-bearing zone from approximately 3 to 25 feet bgs, and a deep groundwater-bearing zone from approximately 28 to 48 feet bgs. Observations made by Stantec during this additional Site assessment clarify Site lithology and are described in Section 3.1.1.

GCC_SANTA CLARA VALLEY - CA ***(cont.)***

Site History :

1990 - In January, a 550-gallon waste oil underground storage tank (UST) was removed. At the time of removal, soil was noted to be stained and have a "waste oil odor." Soil sample WO1 was collected from beneath the UST at 9 feet below the ground surface (ft bgs) and sample SW1 was collected from 8.5 ft bgs along the southwestern sidewall. These samples were not reported to have concentrations of Constituents of Concern (COCs) above the laboratory reporting limits. A composite soil sample (COMP WOA) was collected from the stockpiled soil and reported to contain Total Petroleum Hydrocarbons as Diesel (TPHd) and Total Oil and Grease (TOG) at concentrations of 1,700 parts per million (ppm) and 12,000 ppm, respectively. 1993 - In April, the Santa Clara Valley Water District (SCVWD) wrote a letter to the City of San Jose Fire Department requesting documents for this site. The SCVWD was concerned that contamination being detected in an upgradient well for a former Chevron station located at 1100 N. First Street (07S1E06C03f) was coming from the Unocal site. The former Chevron station is approximately 200 feet to the north-northwest of the site. 1995 - In November, product piping and dispensers were replaced. 6 soil samples (P1 and D1 through D5) were collected from 3.25-3.5 ft bgs and were reported to have maximum concentrations of 10 ppm TPH as Gasoline (TPHg), 0.034 ppm Benzene, 0.25 ppm Toluene, 0.2 ppm Ethylbenzene, and 1.2 ppm Xylenes. 2001 - In May, 3 exploratory borings (B1 through B3) were advanced to approximately 32 ft bgs. 9 soil samples were collected and reported to contain maximum concentrations of 255 ppm TPHg, 0.133 ppm Benzene, 9.63 ppm Toluene, 0.416 ppm Ethylbenzene, 1.15 ppm Xylenes, 0.826 ppm Methyl tert Butyl Ether (MtBE), 692 ppm TPHd and 2,690 ppm TOG. The TPHd and TOG were reported for samples collected from boring B1 located near the waste oil UST. Grab groundwater samples were collected from the borings and reported to contain maximum concentrations of 1,690 parts per billion (ppb) TPHg, 3.49 ppb Benzene, 25.3 ppb Toluene, 5.62 ppb Ethylbenzene, 3.27 ppb Xylenes, 18,500 ppb MtBE, and 175 ppb TPHd. In September, 3 monitoring wells (MW-1 through MW-3) were advanced to 25 ft bgs and 4 borings (B4 through B7) were advanced to 40 ft bgs. 18 soil samples were collected and reported to contain maximum concentrations of 55 ppm TPHg, 0.19 ppm Benzene, 0.99 ppm Toluene, 0.078 ppm Ethylbenzene, 0.26 ppm Xylenes, 0.54 ppm MtBE, and 7.6 ppm TPHd. 12 depth discrete grab groundwater samples were collected from the borings and reported to contain maximum concentrations of 100 ppb TPHg, 2.4 ppb Benzene, 31 ppb Toluene 0.67 ppb Xylenes, 6,100 ppb MtBE, 210 ppb TPHd, and 17,000 ppb TOG. In October, periodic sampling of the groundwater monitoring wells began. 2002 - In March, 2 extraction wells (EW-1 and EW-2) were installed to 25 ft bgs and a groundwater extraction feasibility study was completed. 10 soil samples were collected and reported to have low to non-detectable concentrations of the Constituents of Concern (COCs). In August - a clarifier was removed from the site. A sample of native soil (P1) was collected from beneath the clarifier. TPHg, Benzene, Toluene, Ethylbenzene and Xylenes (BTEX), and MtBE were not reported to be present above the laboratory reporting limits. TPHd was detected at 1.6 ppm. Chromium, nickel, lead, and zinc were detected at levels of 64 ppm, 98 ppm, 11 ppm, and 93 ppm respectively. Methylene chloride and tetrachloroethene (PCE) were detected at levels of 0.0089 and 0.0021 ppm respectively. In November, groundwater extraction began from well EW1 and continued through May 2004. In December, 7 offsite and 1 onsite well (MW-4 through MW-11) were installed. Wells MW8 through MW11 were completed to 40 ft bgs and wells MW4 through MW7 were completed to 25 ft bgs. Soil samples were collected from wells MW4 through MW7 for chemical analysis. 12 soilsamples were collected from the other wells and reported to have low to non-detectable concentrations of the COCs. 2004 - In February, 8 ozone microsparge wells (C-1 through C-8) were installed to 25 ft bgs at the site. Soil samples were not submitted for chemical analysis. In May, the interim groundwater extraction system was shut down. The system removed approximately 269,798 gallons of groundwater and approximately 4.47 pounds of TPHg and 7.85 pounds of MtBE. In June, the ozone microsparge system started onsite. 2005 - In June, a report was completed addressing the possible offsite contamination at the former Chevron station. In this report, it was concluded that TPHg concentrations in shallow groundwater have been elevated in groundwater in offsite wells MW5 and MW9 since they were first constructed in January 2003. In addition no other onsite or offsite wells, both currently or historically, have reported concentrations of TPHg as high as those observed in well MW5. Well MW5 is located near the former Chevron well C7, which contained 230 ppb TPHg the last time it was sampled on January 15, 2002 and had reported historical concentrations of TPHg as high as 4,000 ppb. The Chevron release was primarily high TPHg with little to no MtBE; whereas the Unocal site release has high MtBE with little TPHg. The report concluded that "...the TPPH (TPHg) observed in offsite wells MW-5 and MW-9 is most likely a remnant of the Chevron groundwater contamination plume, and is not likely a result of

downgradient migration of onsite groundwater impacts." The Chevron case (07S1E06C03f) was closed on January 24, 2002. 2006 - In August, the ozone microsparge system was shut down to monitor groundwater for possible rebound. 2007 - In May, the ozone microsparge system was re-started to address rebound observed to groundwater. 2008 - In May, the ozone microsparge system was shut down.

Site History :

1990 - In January, a 550-gallon waste oil underground storage tank (UST) was removed. At the time of removal, soil was noted to be stained and have a "waste oil odor." Soil sample WO1 was collected from beneath the UST at 9 feet below the ground surface (ft bgs) and sample SW1 was collected from 8.5 ft bgs along the southwestern sidewall. These samples were not reported to have concentrations of Constituents of Concern (COCs) above the laboratory reporting limits. A composite soil sample (COMP WOA) was collected from the stockpiled soil and reported to contain Total Petroleum Hydrocarbons as Diesel (TPHd) and Total Oil and Grease (TOG) at concentrations of 1,700 parts per million (ppm) and 12,000 ppm, respectively. 1993 - In April, the Santa Clara Valley Water District (SCVWD) wrote a letter to the City of San Jose Fire Department requesting documents for this site. The SCVWD was concerned that contamination being detected in an upgradient well for a former Chevron station located at 1100 N. First Street (07S1E06C03f) was coming from the Unocal site. The former Chevron station is approximately 200 feet to the north-northwest of the site. 1995 - In November, product piping and dispensers were replaced. 6 soil samples (P1 and D1 through D5) were collected from 3.25-3.5 ft bgs and were reported to have maximum concentrations of 10 ppm TPH as Gasoline (TPHg), 0.034 ppm Benzene, 0.25 ppm Toluene, 0.2 ppm Ethylbenzene, and 1.2 ppm Xylenes. 2001 - In May, 3 exploratory borings (B1 through B3) were advanced to approximately 32 ft bgs. 9 soil samples were collected and reported to contain maximum concentrations of 255 ppm TPHg, 0.133 ppm Benzene, 9.63 ppm Toluene, 0.416 ppm Ethylbenzene, 1.15 ppm Xylenes, 0.826 ppm Methyl tert Butyl Ether (MtBE), 692 ppm TPHd and 2,690 ppm TOG. The TPHd and TOG were reported for samples collected from boring B1 located near the waste oil UST. Grab groundwater samples were collected from the borings and reported to contain maximum concentrations of 1,690 parts per billion (ppb) TPHg, 3.49 ppb Benzene, 25.3 ppb Toluene, 5.62 ppb Ethylbenzene, 3.27 ppb Xylenes, 18,500 ppb MtBE, and 175 ppb TPHd. In September, 3 monitoring wells (MW-1 through MW-3) were advanced to 25 ft bgs and 4 borings (B4 through B7) were advanced to 40 ft bgs. 18 soil samples were collected and reported to contain maximum concentrations of 55 ppm TPHg, 0.19 ppm Benzene, 0.99 ppm Toluene, 0.078 ppm Ethylbenzene, 0.26 ppm Xylenes, 0.54 ppm MtBE, and 7.6 ppm TPHd. 12 depth discrete grab groundwater samples were collected from the borings and reported to contain maximum concentrations of 100 ppb TPHg, 2.4 ppb Benzene, 31 ppb Toluene 0.67 ppb Xylenes, 6,100 ppb MtBE, 210 ppb TPHd, and 17,000 ppb TOG. In October, periodic sampling of the groundwater monitoring wells began. 2002 - In March, 2 extraction wells (EW-1 and EW-2) were installed to 25 ft bgs and a groundwater extraction feasibility study was completed. 10 soil samples were collected and reported to have low to non-detectable concentrations of the Constituents of Concern (COCs). In August - a clarifier was removed from the site. A sample of native soil (P1) was collected from beneath the clarifier. TPHg, Benzene, Toluene, Ethylbenzene and Xylenes (BTEX), and MtBE were not reported to be present above the laboratory reporting limits. TPHd was detected at 1.6 ppm. Chromium, nickel, lead, and zinc were detected at levels of 64 ppm, 98 ppm, 11 ppm, and 93 ppm respectively. Methylene chloride and tetrachloroethene (PCE) were detected at levels of 0.0089 and 0.0021 ppm respectively. In November, groundwater extraction began from well EW1 and continued through May 2004. In December, 7 offsite and 1 onsite well (MW-4 through MW-11) were installed. Wells MW8 through MW11 were completed to 40 ft bgs and wells MW4 through MW7 were completed to 25 ft bgs. Soil samples were collected from wells MW4 through MW7 for chemical analysis. 12 soilsamples were collected from the other wells and reported to have low to non-detectable concentrations of the COCs. 2004 - In February, 8 ozone microsparge wells (C-1 through C-8) were installed to 25 ft bgs at the site. Comments :

Pursuant to the MOU, DTSC has reviewed a Phase I Environmental Site Assessment and other documents for the Family Health Foundation of Alviso, Inc., St. James Health Center (FHFA). The subject property is an existing health clinic which is owned and operated by FHFA. No change in use is being proposed. A Supplemental Phase I Environmental Assessment Report was prepared by DTSC and concluded that no action was needed for this property there is no contamination on the property.

Comments :

Originally, Cristina Warehouse operated as a storage facility for hazardous materials. In 1980, Cristina Warehouse submitted a Part A hazardous waste storage permit application to the U.S. Environmental Protection Agency (EPA). Due to economic reasons, Cristina Warehouse withdrew the Part A application and discontinued storing hazardous materials/wastes. In August 1987, the Department of Health Services, Toxic Substances Control Division notified Cristina Warehouse that its operation was no longer regulated as a treatment, storage or disposal facility under State law and regulations as authorized by EPA according to the provisions of the Resources Conservation and Recovery Act and its interim status document was rescinded. Two underground storage tanks, a 550-gallon gasoline tank and a 5,000 gallon diesel tank, were removed from the Site in 1988. On February 23, 1999, Santa Clara Valley Water District issued a Fuel Leak Site Case Closure letter. Based on the documentation found and reviewed during this site screening, DTSC has determined that no further action is needed for the Site.

Completed Date : 1997-08-12
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Technical Report

Comments :

The Report describes a Preliminary Site Assessment that was conducted on the Site on July 16, 1997. Work included advancement of five soil borings, completion of three groundwater monitoring wells, and collection and chemical analysis of soil and groundwater samples. The work was conducted in accordance with a work plan approved by the Santa Clara Valley Water District. The Report concluded that there were minimal subsurface impacts, no further action at the Site was warranted, and recommended a request for case closure be submitted to the Santa Clara Valley Water District.

Completed Date : 1987-08-19
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Correspondence

Comments : Letter was prepared by DHS to rescind Cristina Warehouse's Interim Status Document

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 07/07/2023

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 07/07/2023

EPA SAA: Listing of Sites with Superfund Alternative Approach Agreements.

Agency Version Date: 07/10/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/04/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 07/10/2023

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 07/07/2023
Agency Update Frequency: Varies
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8712
Most Recent Contact: 07/07/2023

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 07/07/2023

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 07/07/2023

FEDERAL RCRA CORRACTS FACILITIES LIST

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 06/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 09/01/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 06/07/2023

FEDERAL RCRA CORRACTS FACILITIES LIST (cont.)

HIST CORRACTS 2: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 10/25/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 08/01/2023

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 07/07/2023

DELISTED PROPOSED NPL: Sites that have been delisted from the proposed National Priority List

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 07/07/2023

SEMS_DELETED NPL: All Deleted National Priority List Sties

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 07/07/2023

FEDERAL LANDFILL AND/OR SOLID WASTE DISPOSAL SITE LISTS

EPA LF MOP: Sites in the EPA Landfill Methane Outreach Program

Agency Version Date: 06/06/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 08/31/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 06/06/2023

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

RE: Commercial Real Estate Property
City of San Jose Corporation Yard
1404 Mabury Road
San Jose, CA 95133

Dear Ms. Fishleder;

RiskFacts is pleased to provide you with the following Phase I Environmental Site Assessment (ESA) for the above referenced commercial real estate property. RiskFacts was contracted by our sister company FirstCarbon Solution (FCS) on the behalf of Clear Channel Outdoor (herein referred to as "Client") to conduct an ESA on a Commercial Property located at 1404 Mabury Road, San Jose, California 95133 (herein referred to as the "subject property"). RiskFacts received electronic authorization from the Client and FCS on August 14, 2023 to perform this ESA Report.

This ESA Report was performed in general accordance with the scope and limitations of American Society for Testing and Materials (ASTM E1527-21) and the agreed to Services Proposal executed by the Client. Exceptions to or deletions from this protocol are discussed in this report.

We appreciate your business. If you have any questions regarding the attached report, or if we can be of any further service to you, please do not hesitate to contact us at 607-306-2001.

Sincerely,

Robert Fagerness, PE
Senior Environmental Engineer

Executive Summary

RiskFacts has performed a Phase I Environmental Site Assessment (ESA) for the subject property located 1404 Mabury Road, San Jose, California 95133 dated October 4, 2023 (Figure 1). The main area of interest is a small location for a proposed billboard on the western portion of the parcel (Figure 2). This ESA was conducted at the request of the Client using procedures and practices conforming with the ASTM E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. Any exceptions to or deletions from this practice are described below.

Findings

The purpose of this ESA is to identify environmentally related risks to the subject property which, when performed in accordance with ASTM Practice E1527-21, constitutes an All Appropriate Inquiry (AAI) into the previous ownership and uses of the property consistent with good commercial or customary practice as defined at 42 U.S.C. §9601(35)(B). This ESA was performed to identify the presence or likely presence of hazardous substances or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of a future release of any hazardous substances or petroleum products in, on or, at a property. The findings of this report are summarized below and may include known or suspect recognized environmental conditions (RECs), historical RECs (HRECs), controlled RECs (CRECs), or *de minimis* conditions identified during the performance of this Phase I ESA.

REC: *A REC is defined as (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.*

- This assessment has not revealed evidence of RECs in connection with the subject property.

HREC: *A HREC is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established the applicable regulatory authority or authorities without subjecting the property to any additional controls (for example, activity and use limitations or other property use limitations).*

- This assessment has revealed evidence of an HREC in connection with the subject property associated with a closed Leaking Underground Storage Tank (LUST) case. Based on the EP's review of the closed LUST case file, this case remains "closed" by today's regulatory standards and is not considered a potential REC to the subject property or the proposed billboard location.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

CREC: A CREC is defined a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitation or other property use limitations).

- This assessment has not revealed evidence of CRECs in connection with the subject property.

Business Environmental Risk (BER) is not considered a REC, rather, can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate.

- The continued use of the subject property as the City Corporation Yard and fleet maintenance facility, including the storage and application of hazardous materials and petroleum products as well as the generation of hazardous wastes represents a BER.

Significant Data Gaps. During this investigation, the following Significant Data Gaps were identified:

- No Significant Data Gaps were revealed as part of this investigation.

Recommendations

Based on the information cited above and referenced in this ESA, RiskFacts recommends the following:

- This ESA did not identify evidence that the location of the proposed billboard has been impacted by past or present operations. No additional assessment of the project location is recommended.

Certification

This report has been prepared under the supervision of an EP with a final review by an EP.

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) Part 312 and I have the specific qualifications based on education, training, and/or experience to assess a property of its setting, history, nature, and environmental influences.

Robert Fagerness, PE
Senior Environmental Engineer

The resume(s) of the overseeing EP or EPs is(are) provided in Appendix - Environmental Professional Resume.

Subject Property Information

The following subsections provide information presented by the client, a current description of the subject site, and a current description of the adjacent properties.

Client Provided Information

As part of the AAI process, RiskFacts forwarded to the Client's attention a subject property Environmental Questionnaire. RiskFacts additionally requested support information or previous reports that further help the EP to identify or alleviate possible RECs in connection with the subject property. Per ASTM E1527-21 and the EPA Standards and Practices for AAIs (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries provided to the Environmental Professional preparing the ESA for his/her consideration. At the time of preparing this report, the following information was or was not received from the client:

Document Requested	Received (Y/N)	Comments
Environmental Questionnaire	Y	No knowledge of environmental issues associated with this property.
Prior ESA, RSRA, ETS?	N	None provided
ALTA or other Surveys	Y	Plan showing proposed billboard location.
UST/AST Compliance Material	Y	Site has active USTs and ASTs. Information was obtained from Santa Calara County CUPA.
Title Records, Environmental Liens and/or AULs	N	None provided. No listing of AULs associated with LUST closure documentation.

Based on the quality of information obtained from the client as well as additional research, the EP considers the data complete. Additionally, it is the EP's opinion that the information provided does not suggest a potential for recognized environmental conditions to be present.

Please see Appendix - Client Provided Information to review this information in its entirety.

Subject Property Description/Attributes

The following property attributes are based on available information obtained from the Client, on-line assessor information, Google Earth, Google Street View, completed questionnaire(s), and subject property reconnaissance.

ATTRIBUTES	DESCRIPTION OF ATTRIBUTE
Land Use Type	Commercial
Subject Property Address	1404 Mabury Road
Current Owner(s)	City of San Jose
Property APN	Santa Clara County APN: 254-01-004
Property Legal Description	N/A
SP Zoning	Light Industrial (LI)
Acreage	13.6 Acres/8.44 (Developable area)
Number of Buildings	One large two story office building, covered fuel island, four bay fleet maintenance shop, and solar panel-covered fleet and equipment parking.
Square Footage	N/A
Year of Construction	Per county records 1978
Current Use	Corporation yard for city of San Jose includes Public Works Offices, Fleet & Equipment Parking, Fleet Maintenance, Fleet Fueling, Material Storage.
Current Occupant(s)	Western half of the City of San Jose Corporation Yard
NAICS Codes if available	N/A
Subject Property Utilities	Water: San Jose Water Sewer: City of San Jose Electrical/Natural Gas – Pacific Gas & Electric (PG&E)

No RECS were identified as part of our review of the subject property attributes. However, items of potential environmental concern include observed USTs and ASTs associated with fleet operations, fleet repair shops, and eastern adjacent parcel that supports the eastern half of the corporation yard and includes Hazardous material storage building, and hazardous waste storage area. Please see Section – Environmental Records Review for additional discussion.

Please see Appendix - County Tax Office Information for additional information.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

Adjacent Property Information

The adjacent property uses and attributes are based on available information obtained from on-line sources, completed questionnaire(s), and the subject property reconnaissance:

Direction	Address	Current Use	Current Occupant(s)
North	N/A	Mabury Road/Corporation Yard	City of San Jose
East	1404 Mabury Rd. N/A	Eastern portion of Corporation Yard Bart Rail Line	City of San Jose Santa Clara Valley TA
South	N/A	Highway 101 (Bayshore Freeway)	Caltrans
West	N/A 1346 E. Taylor 1354 E Taylor	Coyote Creek Easy Fuels RV Storage	Water of the State Petroleum distributor RV Storage

The following concerns of the adjacent land use were identified:

- The eastern adjacent parcel constitutes the eastern portion of the city corporation yard and is discussed in detail in Section-Subject Property Environmental Records Summary.
- The current off-site use of 1346 E Taylor as a commercial fueling facility (Easy Fuel) is of potential environmental concern. Please see Section-Off-Property Environmental Records Summary for additional discussion of this identified off-site concern.

Please see *Appendix - Reconnaissance Photographs* for perspective of adjacent properties.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

Records Review

The following subsections summarize information obtained through the review of available records. The following subsections include physical settings, historical use information, environmental database search results, agency file review, and vapor migration.

Physical Settings

Physical settings associated with the subject property and general vicinity is summarized below:

TOPOGRAPHY	
Elevation	Approximately 75-80 feet, MSL across the subject property.
Topographic Quad(s)	San Jose, West/East
General Slope	Dipping shallowly towards the north-northwest in the region.
HYDROLOGY	
Nearest Surface Water Body	Coyote Creek, shares the western portion of the subject property.
Wetlands	Riverine features along Coyote Creek
Flood Zone	The subject property is situated in both 500- and 100-year flood plains.
Estimated Depth to Groundwater	Based on California GeoTracker sites in the vicinity of the subject property, shallow groundwater is encountered approximately 20-25 feet below ground surface (bgs).
Estimated Groundwater Flow Direction	Likely to the north-northwest in the region. Review of LUST cased in the vicinity via GeoTracker indicates a flat gradient with local surface water drainages influencing shallow flow directions.
GEOLOGIC INFORMATION	
Geologic Units/Formation	Mapped as Cenozoic Era Quaternary deposits.
Soils (Lithology)	Canine Creek and Urban Land Series. Investigations for the Closed LUST case at subject Property identified a silty gravel in the upper 5 feet, above clay to depths of 20 to 25 feet bgs.
Radon Information	Zone 2 indoor average level >= 2 pCI/L and <= 4 pCI/L.

Historical Records Review

Multiple historical records been ordered, reviewed (where available), and interpreted by RiskFacts to establish the approximate history of the subject property and immediately adjoining/adjacent properties. The historical resources include Aerial Photography; City Directory, Historical Topographic Maps, and Sanborn/Fire Insurance Maps (FIMs), where available.

Please see Appendix - Historical Resources to review these resources in their entirety.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

Historical Use of the Subject Property

Based on our review of the available historical resources, the prior uses of the subject property are summarized in the table below:

YEAR RANGE	HISTORICAL AERIALS	TOPOGRAPHIC MAPS	CITY DIRECTORIES
1404 Mabury Road, APN 254-014-004			
1889-1899	N/A	Open undeveloped area, creek to west, Mabury Rd to north, Railroad to the east.	Mabury Rd (1400-1440) not listed 1901-1927.
1931-1943	1931 – Open vacant, possible barn on southern boundary of SP, creek on west. 1939 – SP is vacant, Hwy 101 bridge over creek under construction.	1943-orchard land on south half of property, Hwy 101 present to south.	Mabury Rd (1400-1440) not listed 1932-1942.
1953-1960	1954 & 1960 - SP is vacant with dirt road running beneath Hwy 101 bridge.	1953 – undeveloped 1961 – Vacant with n-s dirt road passing under Hwy 101	Mabury Rd (1400-1440) not listed 1952-1962
1963-1969	SP appears to be graded south central bldg./shed. Dirt road passes beneath Hwy 101 bridge.	No coverage	Mabury Rd (1400-1440) not listed 1966
1970-1976	Eastern adjacent Corp yard hazardous material shed constructed, most of SP still undeveloped.	No coverage	No listings identified for SP 1971 and 1976
1980-1998	1980-SP fleet shop visible. 1983-Offices present/south end used as open parking/ storage.	No coverage	No listings identified for SP 1982, 1989, 1993, and 1998
2005-2012	2005-Southeastern SP now supporting solid/green waste storage area	2012-city yard access road shown. No bldg. features shown.	No listings identified for SP 2006 & 2011
2014-Present	2014-Solar Panels awnings added in storage parking. SP same to present.	2015/2018/2021 No Bldg. details shown.	No listings identified for SP 2015 & 2018

Note: SP = Subject Property

Note 2: No Fire Insurance Maps identified for this geographical portion of San Jose.

A summary of the concerns specific to the subject property history is provided below:

- The historical topographic maps from 1889-1899 suggest the subject property and surrounding properties are undeveloped with structures (assumed to be rural residential) aligned next to the northern road (Mabury Rd.). The topographic maps from 1943 shows possible orchard use of the southern half of the subject property and completion of Highway 101 to the immediate south. The 1953 and 1961 maps show the subject property undeveloped with dirt access road running north to south and beneath the Highway 101 bridge overpass of Coyote Creek. Additional maps from 2012, 2015, 2018 and 2021 show a developed access road of the now corporation yard, but no building details.
- Historical aerial photographs and topographic maps identify the subject property to have supported a vacant area from as early as the 1900s, with possible barn structure on southern portion of the site in 1931; however, this feature was removed for the Highway 101 bridge overpass of Coyote Creek in 1939. The subject property remains undeveloped other than the dirt

access road running through the property from north to south from 1953 through 1976; although, a possible shed structure and open storage space appears present in the 1965, 1969, and 1973 aerial photos.

- In the 1976 aerial photo, the subject property appears to be undergoing development with the previous shed structure no longer present and apparent grading activities occurring. In the 1980 aerial photo, the fleet shop is visible. By 1983-1985, the offices have been added to the fleet shop and hardcover surfaces across the subject property are more pronounced. Solar panels awnings that cover the paved parking area south of the repair garage are present in 2014 and the site remains primarily as observed today.
- Historic city directories did not provide listings for the current 1404 Mabury Road address from 1957 to the present and Mabury Road was not recognized in available city directories from as early as 1901 through 1995. A private residence was identified within the city directory on the north site of Mabury Road at 1411 Mabury from 1971 to 1976.
- The Sanborn Fire Insurance Maps (FIM) do not have coverage for this geographical area of San Jose.

Based on the historical data review of the subject property, data gaps are present in the historic city directory information. The EP does not feel these gaps to be significant as the use of the historic use of the subject property was discovered and is discussed in greater detail of Section - Subject Property Environmental Records Summary.

Historical Use of Adjacent Properties

A summary of the concerns specific to the adjoining/adjacent properties history is provided below:

- Comparable to the subject property, the historic aerial photos and topographic maps indicate the surrounding vicinity was predominantly undeveloped or used for agricultural activities form the 1900s to the early 1960s.
- The western adjacent property supported an orchard as seen in aerial photos from 1931 through 1960. In 1963, the orchard has been removed and apparent dirt access roads crisscross the property and remains vacant through 1970. The property begins its commercial/industrial development in 1972 and appears to be fully built out as currently used, as observed in the 1975/1976 aerial imagery. The current use supports a recreational vehicle storage (1354 East Taylor) identified in city directories from at least 1976 to 2018. The current use additionally supports a truck fueling facility (1346 East Taylor) identified in city directory as early as 2002 to as recent as 2018.
- The north adjacent property is an apparent open field on the southern side of Mabury Road and what appears to be rural residential and agricultural use north of Mabury Road as observed from 1931 through 1976 aerial photos. North of Mabury Road continues to support the rural residential and agricultural use from 1976 through 1993 and by 1998 this northern property becomes its current use as a paved parking lot. South of Mabury Road, the northern property supports open space/storage yard and an access road to the south (supporting the city corporation yard use of the eastern adjacent parcel) from 1980 through 2018; however, by 2020 this northern adjacent property becomes the present City of San Jose transitional housing

project. The north adjacent property (north of Mabury Road) is recognized in historic city directories as residential listing in 1970 and 1976, but provides no additional details prior to, or after this time range.

- The east adjacent property is unique in that it supports a thin narrow parcel that is situated east of the subject property and west of a railroad alignment (now BART – Bay Area Rapid Transit rail line). In 1931-1960 this eastern adjacent parcel supported an open field on the north, a possible barn and/or graded pad on the northeast central portion and wooded area along the central and southern portion. By 1963 the barn and/or pad area is no longer present and most of the vegetation is no longer present on a majority of the parcel. By the 1970 aerial photo, the central portion of the eastern parcel supports a paved area and the steel building that exists to date and supports the city's corporation yard hazardous material storage. From 1973 to the present the remainder of the southern portion of the eastern parcel appears to be used for miscellaneous open space storage of the corporation yard. Directories did not provide relevant data of the eastern adjacent parcel (eastern portion of the city corporation yard).
- In the 1931 aerial photo, the south adjacent property was part of a larger open field. By 1939, the early beginnings of Highway 101 is evident with the initial construction of the bridge overpass of Highway 101. By 1954, Highway 101 is present and borders the southern portion of the subject property with expansions wider in 1963, and 1993. Highway 101 remains present today.

Based on a review of the historical data of the surrounding adjacent properties, most relevant to the subject property appears to be the immediate eastern adjacent use of the city corporation yard. Of additional interest is the industrial properties west of Coyote Creek, the commercial fueling site at 1346 East Taylor from 2002 to the present. The city corporation yard and the off-site fueling facility are discussed in greater detail in Section – Environmental Records Review.

Please see Appendix - Historical Resources to review these resources in their entirety.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748

Environmental Records Review

The RiskFacts environmental professional reviewed regulatory databases searched in general accordance with ASTM Standard E1527-21 criteria. RiskFacts utilized Envirosite as a third-party provider for the regulatory record search, with this report presented in Appendix – Government Records Search Report.

Per the RiskFacts EP opinion, sites which were identified in the Government Records Search Report but are not summarized below do not in the opinion of the EP pose an increased environmental risk to the subject property for the following reasons: a) site(s) had no documentation indicating it(they) impacted the subject property's soil, groundwater, and/or vapor media; b) site(s) only hold an operating permit with no documented violations and/or releases to the subsurface media; c) Site(s) have been granted "No Further Action" by applicable regulatory agency and/or corrective action is on-going under the guidance of applicable regulatory agency and/or subject property was not identified as a responsible party or contributor of the off-site impact; and/or, d) site(s) distance and/or topographic position relative to the subject property reduces the level of an environmental risk associated with the site(s).

Using the above guidance, the search results deemed notable by the environmental professional are discussed in greater detail below for the subject property and off-site properties, where identified.

Subject Property Environmental Records Summary

The following records were identified as being associated with the subject property:

> The entirety of the subject property, APN: 254-01-004 and adjacent the adjacent eastern parcel APN: 254-01-0-23, make up the city of San Jose Corporation Yard, also referred to as the Mabury Service Yard, located at 1404 Mabury Road. The subject property and service yard is not identified on Federal recognized database lists associated with past DOD or NPL Superfund sites. However, the service yard is listed on multiple State and local environmental databases including CALEPA SITES - CA, ECHO, EMI - CA, EPA LUST, EPA UST, FRS, GCC_SANTA CLARA VALLEY - CA, HAZMAT_CITY OF SAN JOSE - CA, HAZMAT_SANTA CLARA COUNTY - CA, HAZNET - CA, HWG - CA, LOP_SANTA CLARA COUNTY - CA, LUST REG 2 - CA, MANIFEST EPA, RCRA_SQG, UST - CA, WDS – CA.
>
> Because the service yard site uses hazardous materials and generates hazardous wastes, it is permitted through the Santa Clara County CUPA for these types of activities. It is additionally permitted through the CUPA to operate active underground storage tanks. The site stores hazardous materials (road paints and thinners) in the hazardous material building located on the eastern parcel as well as in the fleet service shop on the supporting subject property parcel (Figure 2). The service yard was inspected for all three programs by the CUPA in June of 2023. Eighteen minor violations were noted by the CUPA (most administrative in nature) and were quickly resolved between June and July 2023. It is important to point out that the proposed location of the billboard is on the southern portion of the subject property approximately 200 feet south of the repair shop, 300-feet southeast of the hazardous waste storage area, and over 650 feet south of the hazardous material storage building (Figure 2).

Of greatest potential environmental concern is the past petroleum release from the first-generation USTs. These USTs were in the same location as the current tank envelope which is just north of the fleet service shop, approximately 250 feet north of the proposed billboard location (Figure 2). The following excerpt is taken directly from the leaking UST (LUST) case closure summary dated April 17, 2000:

V. ADDITIONAL COMMENTS, DATA, ETC.

Considerations and/or Variances:

October 16, 1996:	Four underground storage tanks (USTs) were removed. It was reported that three double wall, fiberglass tanks (two 12000-gallon diesel and one 12000-gallon gasoline) were installed at the former UST location as replacement on October 25, 1996. Analytical results for nine soil samples collected beneath the removed USTs indicated up to 140 ppm TPHG, 240 ppm TPHD, 4.1 ppm MTBE, 0.27 ppm Benzene, 1.7 ppm Toluene, 0.50 ppm Ethylbenzene, and 3.2 ppm Xylenes. The soil sample collected under the waste oil tank was also analyzed for motor oil; results did not indicate the presence of motor oil in this soil sample. Another soil sample was collected from the floor of the excavation pit; analytical results did not indicate the presence of contamination. It was also reported on the URF that the diesel impacted soil were excavated.
November 5, 1996:	Five soil samples were collected beneath the dispenser and piping; analytical results indicated up to 840 ppm TPHG and 7400 ppm TPHD; no MTBE was detected. Xylenes were detected at 0.09 ppm in one sample.
November 21, 1996:	Five soil samples collected from the sidewalls and bottom of the excavation pit; one soil sample was collected under the piping trench. No BTEX were detected; TPHG was detected at 1.6 ppm in one soil sample; TPHD was detected in three soil samples at concentrations of 29 ppm to 120 ppm.
December 2, 1996:	Two soil samples were collected from the excavation pit. Analytical results for one sample indicated the presence of 460 ppm TPHG, 16 ppm TPHD, 1.5 ppm Benzene, 11 ppm Toluene, 9.7 ppm Ethylbenzene, 53 ppm Xylenes, and 1.8 ppm MTBE.
February 1997:	It was reported in a February 19, 1997, memorandum that during the removal of the USTs, approximately 260 cubic yards of soil were excavated. It was also reported that the stockpiled soils were tested in January and February 1997 and approved for delivery to Nine Par Landfill. However, no waste manifests are available for the final location and disposal date for the excavated soil.
March 1999:	Three soil gas locations were sampled at a depth of 8 or 10 feet bgs near the UST complex. Results indicated the presence of 0.048 ppb MTBE, 0.025 ppb Benzene, 1 ppb Toluene, 0.082 ppb Ethylbenzene, 0.36 ppb Xylenes, and 0.11 ppb Xylenes. Six borings (BH-01 to BH-06) were drilled to depths of 22 to 37 feet bgs. Analytical results for the soil samples collected did not indicate the presence of TPHG, BTEX, or fuel oxygenates including MTBE, DIPE, ETBE, TAME, and TBA. Analytical results for grab groundwater samples collected from the borings also did not indicate detectable amount of TPHG, BTEX, or the fuel oxygenates.

Conclusion:

It appears that the majority of contamination had been excavated and removed from the site. Based on the most recent soil and groundwater sampling results which indicate the presence of only minimal residual contamination in the soil and non-detectable amount of petroleum compounds and fuel oxygenates in the groundwater, the Santa Clara Valley Water District staff does not believe that there is a significant impact to soil or groundwater at the site. Therefore, no further corrective action is necessary at this time.

The site presently support three active USTs that are in the same spot that first generation USTs were removed from in 1996. The existing USTs are double-walled, with double-wall product piping, overfill protection, and spill protection that provide secondary containment for petroleum fuel storage. Review of the most recent compliance information from Santa Clara County CUPA indicates the USTs, monitoring, and overfill protection (UST operating system) is compliant with state and federal operating criteria. Please see Appendix – Government Agency File Information for full details on the current UST operating system and the CUPA inspection report from June 2023.

Based on the review of the available database information, supplemental regulatory files, and visual observation during the site reconnaissance, the EP's provides the following opinions:

- The subject property was not identified as a NPL (Federal Superfund) site listing.
- The closed LUST case represents an HREC (historic recognized environmental condition) to the subject property which does not warrant additional assessment currently.
- The storage and use of hazardous materials, petroleum products, and the generation of hazardous waste constitutes an on-going BER to the subject property. However, there is no evidence of a release in connection to the BERs to indicate that a REC exists.
- The proposed location of the billboard is located 200-250 feet south of the fleet maintenance shop where the HREC and BERs are located. **Additional assessment of the proposed billboard location is not recommended.**

Off-Property Environmental Records Summary

The following records associated with facilities of environmental significance were identified on adjacent and/or surrounding off-site properties.

DATABASE	NAME	ADDRESS	DIST. (FT) / DIR.	COMMENTS (LOW/ELEVATED)
PFAS MANIFEST	DOT-City of San Jose	37.363624, -121.874078	0	ELEVATED – Non-RCRA Haz Waste Disposal (PFAS). **Please see additional discussion**.
HIST-UST	Cit of San Jose - Mabury Yard	1404 East Taylor	<100FT/E	LOW – Appears to be misaddressed and correlates to SP. **Please see additional discussion**
CALEPA	Coyote Creek Trail	N/R	<100FT/W	LOW – Water Quality permit to allow construction adjacent to Coyote Creek.
AST, UST, LUST, LOP, HAZNET, HWG, HAZMAT, MANIFEST	Easy Fuel Inc, Pacific National Lease, Dominguez & Sons	1346 E Taylor	150FT/E	LOW - Closed LUST investigation site. **Please see additional discussion.**
CALEPA, LUST, LOP, HAZMAT, HAZNET, HWG	Butler Johnson, Slakey Bros	1480 Nicora Ave	<220/E	LOW – Closed LUST Site, side gradient to SP. >900 feet form billboard location
CALEPA, LUST, LOP, HAZMAT, HAZNET, HWG	Tesla Motors, Graebel Movers	1460 Nicora Ave	<225/NNE	LOW – Closed LUST 1999 soils only case. Not considered a risk to SP.
CERLIS-NFRAP, SEMS, SLIC, LUST, HWG, HAZMAT, MANIFEST	DAP Inc, Transpak Inc	520 Marburg	1,225FT/SE	ELEVATED – Initially considered for NPL Listing. **Please see additional discussion.**
CERLIS-NFRAP, SEMS, SLIC, LUST, CALEPA, HWG, HAZMAT, MANIFEST, RCRA - NONGEN	Sanmina Corp, All Fab Precision Sheetmetal, Amoroso Construct.	1015 Timothy	1,500FT/NE	LOW – Initially considered for NPL Listing. Down gradient and distance make this low risk to SP.

SP = Subject Property

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

Department of Transportation – City of San Jose Lat 37.363624, Long -121.874078.
While no street address was provided for this waste generation notification, it appears to correlate with the City of San Jose Department of Transportation which operates material and equipment storage out of the corporation yard (subject property and/or eastern adjacent parcel). Review of this database listing indicates that the DOT disposed of 264 Kg of liquid AFFF (Aqueous Film Forming Foam) through non-hazardous waste manifest to off-site disposal in December 2020. No additional information was provided, and it appears the disposal was a one-time occurrence.

AFFF contains chemicals called per- and polyfluoroalkyl substances, or PFAS. Two of the most common types of PFAS found in AFFF are perfluoro-octane sulfonate (PFOS) and/or perfluoro-octanoic acid (PFOA). These chemicals are human-made compounds that don't naturally degrade in the environment if released. PFOA and PFOS are expected to be classified by the US EPA as hazardous substances in 2024.

Based on the proper management and disposal of these wastes and ne practice of continuing to receive and process this type of waste, it is the EP's opinion that this listing does not represent a significant environmental risk to the subject property and **is not considered a REC**.

Mabury Yard - 1404 East Taylor Road.
As currently addressed, this site would be located on less than 100-feet west of the subject property. This site is listed as HIST UST – CA. Review of the database information indicates that this listing is specific to the City of San Jose Mabury Yard. The listing accounts for the four first generation USTs associated with the subject property (1404 Mabury). It is evident that the address listing is in error and should be applied to the subject property located at 1404 Mabury Road.

The listing indicates that the USTs were installed at the site in 1979 and included a single 10,000-gallon, two 12,000-gallon, and one 500-gallon single-wall steel USTs. Please see Section – Subject property Environmental Records Summary which includes discussion of the removal of the first-generation USTs from the subject property. Based on the review, it is the EP's opinion that this listing **does not represent a REC** to the subject property.

Pacific National Lease, Easy Fuel Inc., and Dominguez & Sons - 1346 East Taylor Road.
This site address has historically contained multiple businesses and is located less than 150 feet west of the subject property's western boundary (Coyote Creek) at its closest point. Multiple identified databases associated with this site address include AST - CA, CALEPA SITES - CA, EPA LUST, EPA UST, GCC_SANTA CLARA VALLEY - CA, HAZMAT_CITY OF SAN JOSE - CA, HAZMAT_SANTA CLARA COUNTY - CA, HAZNET - CA, HIST HAZNET - CA, HWG - CA, LOP_SANTA CLARA COUNTY - CA, LUST REG 2 - CA, MANIFEST EPA, RCRA_NONGEN, RCRA_SQG, UST - CA.

Records indicate the site is an active commercial fueling facility operating under the business name of Easy Fuel Inc. the facility actively utilizes a combination of USTs and ASTs for fuel storage. Additionally, this site is a waste generator. The USTs were inspected without violations by County CUPA in December of 2022. The ASTs were inspected by CUPA in March 2023 with multiple minor violations noted, but no evidence of release.

Of greater interest is a closed-out LUST investigation associated with the site (Pacific National Lease) prior to being renamed Easy Fuel facility. Historic (first generation USTs) were removed from the site in 1995 and 1999. Residual soil contamination was identified at the time of the removals, however was not fully investigated until 2003. The additional investigation included groundwater assessment that identified trace levels of petroleum contamination moving in an apparent easterly direction towards Coyote Creek. However, based on multiple rounds of groundwater monitoring, this case was closed out by the Santa Clara Valley Water District in February 2005 as a low-risk site.

Based on the current updated petroleum storage system in use at this site, regulatory closure of the previous UST leak investigation, and Coyote Creek which serves as a hydrologic barrier to the subject property, it is the EP's opinion that **this site does not represent a REC** to the subject property.

DAP Inc., Transpak Inc. – 520 Marburg Way

This site is located approximately 1,225 feet southeast of the subject property. Multiple identified databases associated with this site include CALEPA SITES - CA, CERCLIS NFRAP, ENVIROSTOR - CA, EPA LUST, GCC_SANTA CLARA VALLEY - CA, HAZMAT_CITY OF SAN JOSE - CA, HAZMAT_SANTA CLARA COUNTY - CA, HAZNET - CA, HIST UST - CA, HWG - CA, INACTIVE PCS, LOP_SANTA CLARA COUNTY - CA, LUST REG 2 - CA, MANIFEST EPA, PCS ENF, PCS FACILITY, RCRA_NONGEN, RCRA_SQG, SEMS_8R_ARCHIVED SITES, SLIC REG 2 – CA.

Because this site was considered an initial candidate for a Federal Superfund site and since this site is located at a higher elevation and in the generally perceived upgradient direction for the subject property it was additionally reviewed here as part of this ESA investigation. Review of the database report indicated that the site was initially considered for superfund status in 1985. In August 1986, while transferring solvent from one subsurface underground tank to another, about 260 gallons solvent (Hi Sol #10) spill occurred in the underground storage tank (UST) farm. The subsequent investigation found levels of total hydrocarbons in the soil (7600 ppm) at the site and in the groundwater (56 ppb) below the site. SF Regional Water Quality Control Board (RWQCB) issued Cleanup and Abatement Order (CAO) No. 87-004 to Dap. Starting in August 1988, seven USTs and contaminated soil were removed. The soil analyses results showed ethyl benzene (5 to 14 ppb), 1,4-dichlorobenzene (15 ppb), toluene (0.8 to 20 ppb) and xylene (15 to 150 ppb). The site was designated an archived US EPA site, with determination that investigation and cleanup of this site could be adequately managed through state-run programs.

The site was continued to be managed by California through LUST and SLIC investigation accounts with state closures of each case January 1998 and September 2020, respectively. These site investigations identified that shallow groundwater flows to the southeast and southwest, likely influenced by the presence of Lower Silver Creek which is located adjacent and to the south-southeast of this site. Based on a review of the available information, it is the EP's opinion that this site **does not represent a REC** to the subject property at this time.

Please see Appendix – Government Records Search Report to review these resources in their entirety.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

Interviews

Subject Property Owner/Occupants

The subject property owner, occupant and/or operator was asked to provide a completed User Questionnaire. A summary of the responses is provided in Section - Client Provided Information section, and a copy of the questionnaire is provided in Appendix - Client Provided Information.

- Based on the EP's review of the completed questionnaire, the physical subject property inspection, and historical review, there are **potential environmental concerns.** Please see discussion Section – Subject Property Environmental Records Summary.

Past Owner, Operators, Occupants

Contact information on past owners, operators, or occupants of the subject property was not provided to RiskFacts. It is the EP's opinion that although this is a data gap, the abundance of other historic and environmental database information minimizes this data gap from being significant.

Government Officials

In addition to the government records search, select state and/or local government officials were also queried by RiskFacts with respect to their knowledge of past and/or current conditions of the subject property. The results of those queries is summarized below:

Date Requested	Agency Requested	Comments
10/03/23	United States Environmental Protection Agency	Review of the on-line system indicates no files associated with the subject property.
09/13/23 10/03/23	GeoTracker, Water Board's Data Management System	Review of the on-line file system indicates the subject property supports an active UST system and is the location of a past release (LUST) investigation.
10/03/23	EnviroStor, Department of Toxic Substances Control's Data Management System	Review of the on-line system indicates no files associated with the subject property.
09/27/23	Santa Clara County Environmental Health – On-Line File Request	A response was received and documentation specific to the most recent June 2023 CUPA inspection and UST compliance documentation was provided

Information and file documentation received as part of the interview requirement of the AAI due diligence process has been incorporated within the discussion of Section – Subject Property Environmental Records Review. Copies of supporting regulatory files (where not write protected) have been uploaded as documentation for this ESA and are provided in Appendix – Government Agency File Information.

Reconnaissance

RiskFacts conducted a field reconnaissance of the subject property and the shared peripheries of the adjacent properties on September 12, 2023. A summary of the subject property current land use and general attributes and those of the adjacent property land use have been previously discussed. The following subsections focuses on the limitations of the reconnaissance, visual observations specific to ASTM identified inspections noted concerns, and comments on ASTM noted items that were observed during the inspection.

General Reconnaissance Limitations

The following is a summary of the areas of the subject property that were or were not accessible during our site visit.

The following building(s), rooms, or exterior locations were not accessible at the time of the reconnaissance:

- Due to the focus of this investigation being a small portion of a large subject property, an inspection of interior buildings associated with the City Corporation Yard was not conducted. Instead, the reconnaissance was focused on documenting nearby yard operations that could potentially impact subsurface conditions of the proposed billboard location.

The following discrepancies were noted in the subject property boundary at the time of the reconnaissance:

- None – RiskFacts was able to visually observe all areas of potential concern.

The following notable limitations of the observations of the periphery of adjacent properties were noted:

- None.

Please see *Appendix - Reconnaissance Photographs* for perspective of the subject and adjacent properties.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

ASTM Notable Inspection Criteria

The following observations are specific to ASTM inspection criteria were noted within the interior or exterior of the subject property:

ASTM INSPECTION CRITERIA	OBSERVED
Hazardous Substances and Petroleum Products in Connection with Current Business Type	☒
Storage Tanks (Aboveground and/or underground)	☒
Strong, Pungent, or Noxious Odors	☐
Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products	☐
Drums, Totes, and Intermediate Bulk Containers	☒
Unidentified Substance Containers	☐
PCB Containing Items (electrical or old floor lifts/piston elevators)	☐
Heating/Cooling (specifically how heated/cooled)	☒
Stains or Corrosion on Floors, Walls, or Ceilings (Interior)	☐
Stained Soil or Pavement (exterior)	☐
Drains, Sumps, and Wastewater	☒
Pits, Ponds, or Lagoons	☐
Stressed Vegetation (other than insufficient water)	
Solid Waste (e.g., construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal). Not trash dumpsters.	☒
Wells (e.g., dry wells, irrigation wells, drinking water, injection wells, abandoned wells, or other wells)	☐
Septic Systems (on-site septic systems or cesspools)	☐

Summary and Opinion of the Reconnaissance

Unique ASTM inspection criteria noted as present in the above table are described in greater detail as follow:

- **Hazardous Substances/Petroleum Products** – The subject property parcel supports the city fleet service center (shop and fueling area). This area is located approximately 200 to 250 feet north of the proposed billboard location (Figure 2). Hazardous substances as well as petroleum products were observed to be stored, used, and managed in this area as part of the maintenance services. performed. Also of note, the city operates a hazardous materials storage building on the eastern adjacent parcel used for the storage of paints and other products associated with city DOT activities. The location of this building is over 650 feet north of the proposed billboard location. No evidence of spillage, stains, or ill storage practices were observed during the reconnaissance.

- **Storage Tanks & Drums, Containers, Totes** – As mentioned, the subject property operates the fleet services (shop area, Figure2). During the site inspection, the UST tank envelope, aboveground storage tanks (ASTs) for new petroleum lubricants/oils, coolant and used oil were observed. Because the main area of investigation is restricted to the proposed billboard location, an exhaustive search and manifest of stored materials and waste products was not completed as part of this investigation; however, in areas open for inspection, no evidence of spillage or gross mismanagement of materials and wastes was observed.
- **Heating Cooling** – The occupied on-site buildings are heated with natural gas furnaces and cooled with electrically powered air conditioners. There are no on-site boilers or heating oil storage tanks associated with the subject property.
- **Drains, Sumps, Wastewater** – Domestic sewage wastewater is collected from the buildings restrooms and sinks and discharged via underground piping to main collection line to the city of San Jose-Santa Clara Regional Wastewater Treatment Plant. The city corporation yard has several stormwater collection drains across the subject property with one such drain approximately 30 feet east of the proposed billboard location. Stormwater discharge to the municipal collection system is managed by the City of San Jose MRP which is further overseen by State of California Regional Water Quality Control Board.
- **Solid Waste** – The southern portion of the site was observed to be a collection and transfer point of various forms of solid waste including wood and green waste, mattresses, and scrap metal. The extent of the storage appears quite limited and well managed. The location of the storage area is roughly 150 feet east of the proposed billboard location.

The subject property supports the city fleet maintenance and fueling operations. The services involve the storage and/or use of hazardous substances and petroleum products on-site approximately 200 feet north of the proposed billboard location. A detailed discussion of a past documented release of the first generation USTs and current environmental operations at this location is discussed in Section – Subject property Environmental Records Review. Based on our observations of the subject property use as a city corporation yard, it is the EP's opinion that theses ongoing operations represent a BER (business environmental risk) to the subject property. Additionally, it is the EP's opinion that the proposed billboard location is located considerable distance from the observed BERs. The proposed billboard location is near a stormwater collection drain, but there was no evidence of spills or staining at this drain location and it is not considered a REC to the proposed location.

Please see *Appendix - Reconnaissance Photographs* for additional perspective.

RiskFacts Corporation | 56 Broome Corporate Parkway | Conklin, NY 13748
607.306.2001 | www.riskfacts.com | support@riskfacts.com

Conclusions and Recommendations

Pursuant to the investigation completed including review of historical data, government environmental databases, physical inspection of the property, and interviews, it is the EP's opinion and conclusion that the first-generation USTs that resulted in an unauthorized release and subsequent investigation, clean-up, and closure represent an HREC to the subject property. Additionally, the use of the subject property as an active corporation yard represent a BER to the subject property and proposed location of the billboard (Figure 2); however, other than these observations, it is the EP's opinion that the there are no current RECs at the proposed billboard location or subject property. Additionally, it is the EP's opinion and conclusion that there are no off-site environmental concerns that may impact the subject property. No further assessment is recommended.

About this Phase I Environmental Site Assessment

This assessment was performed in general conformance with ASTM E1527-21, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," following all prescribed methodologies and protocols detailed in this Practice. Any environmental site assessment that meets or exceeds the above-described methods is presumed valid under all applicable standards. Any exceptions to, or deletions from, this Practice are described in this report. This report is valid for 180 days beginning October 4, 2023.

Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard Practice E1527-21) affecting the subject property that: 1) constitute or may result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances.

This ESA is thus intended to assist the user in satisfying "one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations (commonly known as landowner liability protections)" on CERCLA Liability as defined at 42 U.S.C. §9601 (35) (B). To maintain landowner liability protections, the user also has a "continuing obligation to not interfere with activity and use limitations associated with the property," must take "reasonable steps to prevent releases," and must "comply with legal release reporting obligations" (ASTM E1527-21).

Reliance

In accordance with the terms of RiskFacts' Agreement, which governs the nature, scope, and purpose of this ESA, all reports, both verbal and written, are for the sole benefit of Clear Channel Outdoor, its affiliates, successors, and assigns, as well as lending institutions involved in securing financing for the subject property. Other parties may not rely on this report without written consent from RiskFacts and approval of the Clear Channel Outdoor.

In the absence of a written agreement with RiskFacts, no third party shall have any right of recourse or recovery whatsoever under any course of action against RiskFacts, its officers, employees, vendors, successors or assigns. Unauthorized users shall be responsible to protect, indemnify and hold RiskFacts as well as Clear Channel Outdoor and their respective officers, employees, vendors, successors, and assigns harmless from all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such report reliance. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply for unauthorized use of this report.

Assumptions

It is assumed that all environmental site assessments contain data gaps. Data gaps that may be filled in by reasonable inference or that are unlikely to have a material effect on the environmental health of a property are considered insignificant and have been identified as such throughout this report. Significant data gaps, such as the current disposition of an environmental cleanup action or the number of hazardous materials used, stored, and/ or hazardous waste generated on the subject property, are also identified, and discussed. Significant data gaps may result in a recommendation for further assessment.

RiskFacts has assumed the veracity of sources of information widely considered within the industry to be authoritative, true, and correct. Nevertheless, RiskFacts has conducted no independent survey of the subject property nor made any independent investigation verifying the veracity of its sources. RiskFacts assumes no responsibility for the accuracy of these sources. All descriptions of dimensions, capacities, quantities, distances, historical site use, and ownership history information gathered from these sources are provided to assist the Client in visualizing the property and evaluating its likely exposure to environmental risk.

Limitations

The findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in ASTM Practice E1527-21. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. However, even with the proper application of these methodologies, conditions may exist on the subject property that could not be identified within the scope of the assessment, or which were not reasonably identifiable from available information.

ASTM Practice E1527-21 does not address the requirements of any state or local laws or of any federal laws other than the all-appropriate inquiry provisions of the landowner liability protections. Further, this report does not intend to address all possible safety concerns, if any, associated with the subject property. While RiskFacts may comment on such matters, this report may not be construed as or used to certify that conditions on the subject property do not pose safety or health risks to its occupants or their visitors.

Information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is therefore subject to the limitations and accuracy of pertinent records, and the personal recollections of those interviewed.

Limits of Liability

RiskFacts liability, if any, for any claim, costs, loss or damage resulting from RiskFacts negligence, if any, relating to this agreement or the work performed pursuant hereto shall not exceed the amount of the payment(s) actually received by RiskFacts hereunder; provided, however, RiskFacts liability, if any, for claims involving “professional liability”, “general liability” or “pollution liability” shall not exceed the amount of insurance maintained by RiskFacts. RiskFacts currently maintains professional liability insurance, general liability insurance, and errors and omissions professional liability insurance in the amount of $1,000,000 and an umbrella liability policy in the amount of $2,000,000.

APPENDIX- ENVIRONMENTAL PROFESSIONAL RESUME

Robert S Fagerness, PE

Senior Environmental Engineer

Education

M.S., Civil Engineering, California State University Sacramento, Sacramento, CA, 1995
B.S., Environmental Resources Engineering, California State University Humboldt, Arcata, CA, 1989

Project Experience

Due Diligence Environmental Site Assessments CA **-** Working with investors, and lending institutions, Mr. Fagerness has completed thousands of Phase I ESAs for property transactions as part of the due diligence process across the nation. This work was performed as part of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. Property types assessed include commercial, industrial, multi-family residential, self-storage facilities, gas stations, automotive service, dry cleaners, day cares and hotels. He has been involved with the development of prop-tech screening tools for environmental prescreening.

Construction Manager, Groundwater Extraction Wells, Conveyance Pipeline, and Remediation Treatment Systems, Aerojet-General Western Groundwater Operable Unit, Rancho Cordova, CA 2010-2014**.** Mr. Fagerness assisted Aerojet-General with construction management services needed for the installation of large-scale groundwater extraction wells, conveyance pipelines, and groundwater treatment facilities. Challenging project requiring installation of remediation system within built-out residential neighborhoods. This work required assistance and cooperation from local, state, and federal agencies. This work also required special use permitting for the installation of a groundwater treatment facility at a site which was zoned residential. Mr. Fagerness was responsible for all permitting, public participation, and field documentation associated with this project. The project was successfully implemented within portions of Rancho Cordova, Gold River, and Eastern Sacramento County.

Multiple LUST Case Closures City of Vallejo Public Works Department, Vallejo CA 2003-2006 **-** While with his previous firm, Mr. Fagerness was the project manager responsible for the investigation and closure of LUST Case files associated with multiple City of Vallejo properties under the management of the Public Works Department including:

LUST Case Closure, Vallejo Sanitation and Flood Control District, Vallejo, CA **-** Mr. Fagerness was the project manager responsible for the investigation and closure of leaking underground storage tank (LUST) case file of the Vallejo Sanitation and Flood Control District (VSFCD). Mr. Fagerness successfully conducted additional subsurface investigations allowing a site conceptual model that sufficiently demonstrated there was minimal to no risk leaving residual contamination in place. Based on the model, Mr. Fagerness successfully negotiated LUST case closure with Solano County Local Oversight Program and the Regional Water Quality Control Board (Region 2). The closure saved the VSFCD tens of thousands of dollars with minimal disruption to its active wastewater treatment facility.

INDUSTRY TENURE
Environmental: 1989
Construction Management: 2010

RELATED EXPERIENCE
- Phase I Environmental Site Assessments (ESAs)
- Phase II ESAs
- Limited ESAs
- Site Remediation

INDUSTRY EXPERIENCE
- Soil, groundwater, soil vapor sample collection and data interpretation.
- Government Liaison
- Environmental Compliance
- Human Health Risk Evaluation
- Permitting (construction)
- NPDES and Discharge Permits
- SPCC Plans
- Hazardous Waste Tank Assessments
- Industrial Wastewater Permits

LICENSES/REGISTRATION
- California Civil Engineer (Lic #C058220)

SPECIAL SKILLS & TRAINING
- Qualified SWPPP Developer (QSD) and Practitioner (QSP) – (CA Cert #01194)
- 40-Hr HAZWOPER H&S Training

REGIONAL LOCATION
Sacramento and Bay Area, CA

EP REVIEW EXPERIENCE
Nationwide

Investigation, Remediation, and Closure of Lead and Dioxin/Furan Contaminated Soil, Aerojet-General Site, Rancho Cordova, CA **-** Mr. Fagerness managed the site characterization, remediation, and confirmation sampling project associated with Aerojet-General Superfund Site in Rancho Cordova California. This work was required by the US EPA with additional oversight by the Regional Water Quality Control Board (Region 5) and Department of Toxic Substances Control (collectively, the Agencies). The work was necessary to allow this portion of the Aerojet Superfund (NPL) Site to be carved out of the contaminated land and cleaned to a level sufficient for future residential development. The remediation involved the removal of contaminated surface soils with disposal to designated TSD facility in southern California. Confirmation Sampling utilized an innovative Incremental Sample Methodology (IMS) which allowed for fewer analytical tests to be needed over the relatively large area remediated. Mr. Fagerness prepared the closure documentation required by the Agencies and was successful at helping Aerojet to carve out this site from the other Superfund properties.

Local Oversight Program, Project Engineer, Solano County, CA **-** Mr. Fagerness was the Project Engineer overseeing the Solano County Leaking Underground Storage Tank (LUST) Program. This work included the review of consultant's calculations and proposed work plan for the installation and operation of soil and groundwater remediation systems used to remove petroleum and other contaminants from the subsurface environment. Used engineering experience and calculations to verify the accuracy and thoroughness of consultant's groundwater monitoring reports. I provided approval or recommendations for revision based on my engineering review. Worked directly with Department Management, County Supervisors, State Regulatory program officials, and public (RPs) to ensure prompt response and accuracy within the LOP.

Local Oversight Program, Project Engineer, Environmental Site Assessment and Remediation, Abandoned Agricultural Sites, Central and San Joaquin Valleys, CA **-** Mr. Fagerness was responsible for the project management, site investigation and remediation of fourteen (14) separate abandoned farm sites located in the Central and San Joaquin Valleys. This work was completed for the Rural Economic and Community Development Division through the US Department of Agriculture (USDA) and the US Army Corp of Engineers (Sacramento Division). This work included the removal of underground and aboveground storage tanks (USTs/ASTs). The work additionally involved regulatory permitting for UST/AAT removals. Involved coordinating subcontractors, analytical laboratories, and site contact to ensure project goals and objectives were met successfully and within budget. Responsible for coordinating staff to write the results of the field investigations including (data review and qualification, interpretation and summation of the analytical data, field documentation, and project narrative.

NPDES Program, Water Resources Control Engineer, Discharge projects in the San Joaquin Valley, CA **-** Mr. Fagerness was responsible for managing National Pollutant Discharge Elimination System (NPDES) sites in San Joaquin County, California. Used engineering skills and experience to assist with review of appropriateness of NPDES treatment systems. Verified calculations submitted by engineering firms on behalf of NPDES dischargers. Performed annual compliance inspections of NPDES facilities. Performed joint inspections with local and EPA officials specific to Industrial Discharge Users of municipal sewer systems. Responsible for review and interpretation of dischargers including the cities of Stockton, Lodi, Lathrop as well as the Manteca Landfill, and CalAmco ammonia discharges.

Employment History

RiskFacts: Sacramento CA and Nationwide: July 2022 to Present: Senior Engineer

CREtelligent: Gold River CA: July 2016 to June 2022: Director Environmental Professionals

Central Valley Environmental, Inc: Fair Oaks, CA: April 2001 to July 2016: Principal Engineer

CA Regional Water Quality Control Board: Rancho Cordova, CA: Sept 1999 to April 2001: Water Resources Control Engineer.

Solano County Dept Environmental Health: Fairfield, CA Oct 1996 – Aug 1999: Environmental Engineer

Woodward Clyde Federal Services: Rancho Cordova, CA: Feb 1995 to Oct 1996: Assistant Project Manager

ICF Kaiser Engineer: Rancho Cordova, CA: May 1991 to Oct – Feb 1995: Staff Engineer

Raney Geotechnical: West Sacramento CA: December 1989 - May 1991: Staff Engineer

APPENDIX – CLIENT PROVIDED INFORMATION

PHASE I ESA - USER'S QUESTIONNAIRE

To qualify for protection from landowner liability under CERCLA as an *innocent landowner, bona fide prospective purchaser,* or *contiguous property owner*, ASTM standard practice E1527-21 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Property Information.

RiskFacts Project #: _RFE-081523-0001_ Property Name: _City of San Jose Corp Yard _____

Property Address: __1404 Mabury Road_____

City: __San Jose_____ State: _____CA_____ Zip: ___95133_____

Property Owner Name: ___City of San Jose_____

Please answer the following questions as completely as possible. Attach additional pages as needed.

1. **Reason for Completion.** Is the reason for performing the Phase I to satisfy one of the requirements for the innocent landowner defense under CERCLA AND/OR to understand potential environmental conditions that could materially impact the operation of the business associated with the parcel of commercial real estate?
   _____X_____ Yes _____ No

   Other: Small southern portion of the property is to support a billboard. Need to verify that this location has not experience environmental issues or concerns.

2. **Environmental Cleanup Liens**. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
   _____ Yes ____x_____ No

   If yes, describe or attach details of the lien_____

   _____

3. **Activity and Land Use Limitations**. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?
   _____ Yes ___**x**_____ No

   If yes, describe or attach details of the limitations_____

   _____

PHASE I ESA - USER'S QUESTIONNAIRE

4. **Specialized Knowledge or Experience**. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

   _____ Yes _____x_____ No

   If yes, describe or attach details of your specialized knowledge or experience_____

   _____

5. **Relationship of Purchase Price to Fair Market Value of Property**. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

   _____ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

   _____ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

   ___x_____ Not applicable. User is not involved in a purchase of the property.

6. **Commonly Known or Reasonably Ascertainable Information**. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

   Do you know the past uses of the property?
   _____ Yes (describe) _____
   _____
   ___x_____ No

   Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?
   ____X____ Yes (describe) _____Facility is active corporation yard with hazardous material storage and hazardous waste generation._____
   _____ No

   Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?
   _____ Yes (describe) _____
   _____
   _____x___ No

   Do you know of any environmental cleanups that have taken place at the property?
   _____ Yes (describe) _____
   _____
   ____x____ No

PHASE I ESA - USER'S QUESTIONNAIRE

7. **The Degree of Obviousness of Contamination.** E1527-21 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indictors that point to the presence or likely presence of contamination at the property?
   _____ Yes (describe) _____
   _____
   ____x____ No

8. **Availability of Previous Environmental Reports.** Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?
   _____ Yes (please identify and provide copies, if available) _____
   _____
   ____x____ No

9. **Proceedings Involving the Property.** Are you aware of any proceedings involving the property? For example:
   Are you aware of any pending, threatened or past litigation relevant to hazardous substances or petroleum products in, on or from the property?
   _____ Yes (describe) _____
   _____
   ___x_____ No

   Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?
   _____ Yes (describe) _____
   _____
   ____x____ No

   Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?
   _____ Yes (describe) _____
   _____
   ____x____ No

APPENDIX – RECONNAISSANCE PHOTOGRAPHS

	
Entry point to SP from Mabury Road. Facing south into northern SP boundary.	Near entrance gate to city corporation yard and offices. Facing south from entrance road into supporting parcel of the SP.
	
Northwestern property boundary facing south along levy of Coyte Creek. Coyote Creek to the right (west), corporation yard and offices to the left (east).	Coyote Creek is situated within the supporting parcel and is located adjacent to the west of the levy and proposed billboard project location.
	
City Department of Public Works Offices located in the central portion of supporting parcel associated with the SP. Photo facing southwest to office building.	Four service bays are associated with fleet maintenance shop. This building is located adjoining an office building near the central portion of supporting parcel. Facing west-northwest.

	
Fuel dispensing pump island located between office building and fleet service bays. Facing northwest.	Double-walled ASTs store virgin petroleum product lubricants and coolant. Located adjoining east of service bays. Facing north-northwest.
	
Double-wall AST used for waste oil storage. Facing south from eastern-most corner of service bay.	Three permitted USTs are located west of the service bays. Photo faces southerly towards the UST enclosure.
	
The proposed billboard location (arrow) is just northwest of the truck scale which is located along the southern property boundary. Photo is facing west-northwest.	The proposed billboard location is on this side of the access gate just west of the truck scale. Photo faces west from Corp Yard towards levy and Coyote Creek.

	
Photo taken from proposed billboard location facing southeast towards the truck scale.	Photo taken from proposed billboard location facing east into Corp yard fleet parking area.
	
Southern boundary of supporting parcel facing west-northwest along southerly boundary	Photo taken near southwestern covered Corp Yard fleet parking facing south towards the proposed billboard location (arrow).
	
Southern portion of SP support parcel that stores misc. solid wastes and sandbags. Facing northwesterly.	From the southern portion of the eastern adjacent parcel which supports portions of the corporation yard. Photo is facing north into eastern portion of the Corp yard.

	
Eastern adjacent parcel, also associated with Corp Yard. Facing south from just east of the office building	Eastern adjacent parcel, also associated with Corp Yard. Facing south This is the Corp Yard's hazardous materials storage building (not associated with the SP).
	
Southern adjacent land use is US Highway 101. Facing northwesterly from north side of highway.	Western adjacent land use EasyFuel 1346 E Taylor Road. Active commercial fueling with AST and UST storage systems. Adapted from Google Street View.
	
Western adjacent land use – RV Storage Facility at 1354 East Taylor Road. Adapted from Google Street View.	North adjacent land use – Parking lot for Berryessa BART station and weekend Flea Market at 1411 Mabury Road. Adapted from Google Street View.

Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2023 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

Platinum City Directory Report

Envirosite's Premium City Directory Report is a screening tool designed to assist in historical use determination of a subject property and adjacent properties. It includes a search of Property Archives digital datasets, national book collections including the Library of Congress and/or the Allen County Public Library and nationwide microfilm collections at five year intervals or the closest available intervals.

RESEARCH SUMMARY:

The following research sources were consulted in the preparation of this report:

SOURCE:	***YEAR:***
Property Archives	2018, 2015, 2011, 2006, 2002, 2001, 1998, 1993
San Jose City Directory	1976, 1971, 1966, 1962, 1957, 1952, 1947, 1942, 1937, 1932, 1927, 1922, 1917, 1912, 1907, 1901
San Jose Criss Cross Directory	1989, 1982

Property Archives is a proprietary and comprehensive dataset of over 1.5 billion commercial, industrial and residential records, business names and uses and occupant records for every city and town in the United States, from recent years to the early 1990s. Property Archives dataset is wholly owned and operated by Property Archives, LLC

This report was prepared by Property Archives, LLC for Envirosite Corporation

Summary of Violations & Notice to Comply

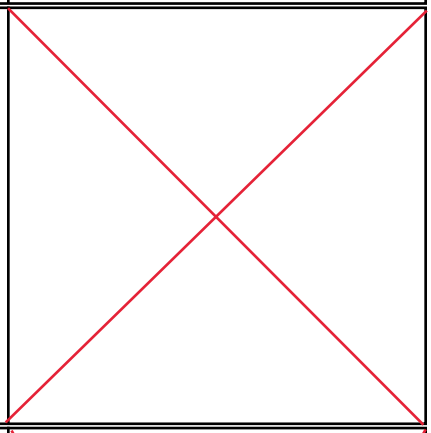

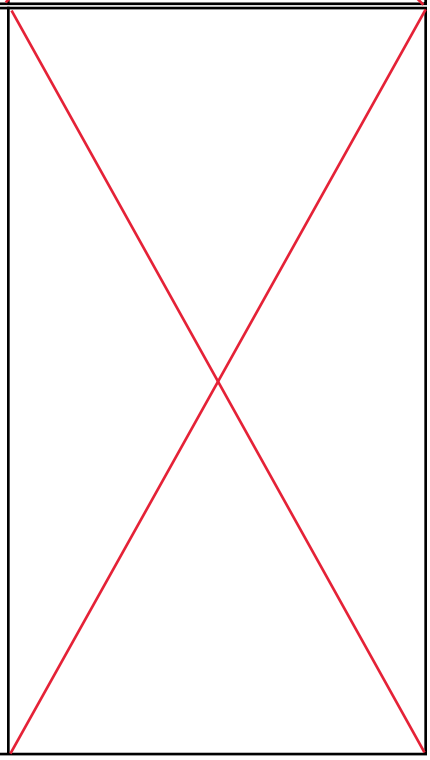

Program: PR0395948 - UNDERGROUND STORAGE TANK - 2399
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
T032	M	**DUSTO IDENTIFICATION [2010003]** Underground storage tank (UST) owner/operator failed to electronically submit a completed "Designated Underground Storage Tank Operator Identification Form" within 30 days of commencing the storage of hazardous material in a newly installed UST; or within 30 days of a change in the facility's DUSTO. ***The following individuals conducted DUSTO visual inspections but are not identified in the facility's most recently submitted DUSTO Identification Form:*** ***1) Brianna Pena- 6/1/2023, 5/4/2023*** ***2) Ed Chenoweth- 1/11/2023*** ***Within 30 days, submit a revised DUSTO Identification Form to CERS that includes all individuals who will potentially conduct the monthly visual inspections.*** Within 30 days, complete and upload and electronically submit a PDF copy of the form via the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. The form (UN-062) is available at www.EHinfo.org/hazmat. [23 CCR 2715(a)(1)(B), 2715(a)(3)]	
T035	M	**UST OWNER/OPERATOR ACKNOWLEDGEMENT OF INSPECTION RESULTS OR DESCRIPT OF FOLLOW-UP ACTIONS [2030013]** Underground storage tank (UST) owner/operator failed to, within 72 hours of receiving a "Designated UST Operator Visual Inspection Report" signed by the DUSTO, sign Section 6 of the report to acknowledge the inspection results and/or describe in Section 5 of the report follow-up actions taken in response to any compliance issue identified by the DUSTO in Section 3 of the report. ***The DUSTO visual inspection conducted on 5/4/2023 was not acknowledged (signed) by the UST owner/ operator within 72 hours of receipt.*** ***Mr. Johnson signed this report at the time of inspection. NO FURTHER ACTION IS NEED, THIS VIOLATION WILL BE CLOSED.*** Within 72 hours of receiving from the DUSTO a signed inspection report, the owner/operator must note in Section 5 of the report corrective actions taken or to be taken in response to each compliance issue identified in Section 3 of the report, and must complete Section 6 of the report by printing their name and adding their signature and the date signed. [23 CCR 2716(e)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
T090	II	**UNSAFE UST OPERATION [2030035]** Facility failed to operate an underground storage tank (UST) system in a manner that prevents leaks, spills, or overfills. ***The T1 (Diesel) UST Fill spill container was observed to have approx. 2-3 inches of diesel in it. According to the UST Service Technician, this is a recurring issue.*** ***This was cleaned up at the time of inspection, however, ensure that liquid in the spill container is immediately cleaned up and not allowed to accumulate.*** Immediately cease or modify UST operations that cause or increase the risk of an unauthorized release. [HSC 25292.1(a)]	
T100	M	**INSTALLATION, CALIBRATION, OPERATION AND MAINTENANCE OF UST MONITORING EQUIPMENT [2030043]** Underground storage tank (UST) owner/operator failed to ensure that UST system leak detection equipment is installed, calibrated, operated and maintained in accordance with manufacturers' instructions. ***It was noted at the time of inspection that the light bulb on the monitoring panel was out.*** ***The UST service technician replaced the bulb. NO FURTHER ACTION IS NEEDED, THIS VIOLATION WILL BE CLOSED.*** Ensure that all leak detection equipment is installed, calibrated, operated and maintained in accordance with the manufacturers' instructions. [23 CCR 2638(a), 2641(j)]	
T372	II	**PIPE MONITORING: PRESSURIZED DW PIPE LLD NON-FUNCTIONAL [2030025]** Line leak detector (LLD) monitoring double-wall underground pressurized piping failed to detect a simulated 3 gallons-per-hour leak at 10 pounds per square inch within an hour, failed to restrict or shut off flow of product through the piping when a leak was detected, or is otherwise non-functional. ***The VMI LD-2000 MLLD for T2 (Gasoline) failed to trigger slow-flow condition when a 3 gallon/ hour leak at 10 psi was simulated.*** ***The UST Service Technician made one adjustment to the MLLD and retested. Upon retest, the MLLD functioned as required. NO FURTHER ACTION IS NEEDED, THIS VIOLATION WILL BE CLOSED.*** Have a qualified UST Service Technician repair or replace the LLD as soon as possible. Submit documentation of the repair and startup testing results with your written response to this Notice to Comply. No permit is required for replacement of a mechanical LLD (MLLD) with another approved MLLD, or like-for-like replacement of an approved electronic LLD (ELLD). A UST repair/retrofit permit from HMCD is required before switching from MLLD to ELLD or non-like-for-like replacement of an ELLD. In that case, plans must be submitted in accordance with HMCD's "Plan Submittal Requirements for Hazardous Materials Systems" (HMCD-004) available at www.EHinfo.org/hazmat. Upon plan check approval, have the LLD installed as soon as possible and schedule an inspection so HMCD can witness testing. [23 CCR 2636(f)(2)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
T560	II	**SPILL CONTAINMENT [2060020]** One or more underground storage tank (UST) fill openings is not equipped with a spill container, or spill containment is not liquid-tight, or spill containment does not have the required minimum 5 gallon liquid capacity. ***The T3 (Diesel) UST Fill Spill Container was determined to fail and was not tested by the UST Service Technician due to a broken drain valve.*** ***According to Mr. Perez, it would be replaced and retested later on 6/21/2023, however this was not witnessed. Within 30 days, submit the UST Spill Container Testing Report Form to our office for review.*** Immediately cease filling the tank(s) at any fill location that cannot prevent the escape of hazardous substances into backfill. Have a qualified UST Service Technician repair and retest the spill containment. Submit a copy of the "Underground Storage Tank Spill Container Testing Report Form" within 30 days of testing. No permit is required to repair or replace drain valves or other internal components. If repair is not possible and replacement is necessary, obtain a UST minor repair/retrofit permit from HMCD as soon as possible. Permit application forms, guidance documents and the fee schedule are available at www.EHinfo.org/hazmat. Upon plan check approval, have the work done as soon as possible and schedule an inspection for HMCD to witness the installation testing per 23 CCR 2637.1. [23 CCR 2635(b), 2665(a), 2665(b)]	

Comments: On-site on 6/21/2023 to witness the Annual Monitoring System Certification testing. Inspection concludes today with issuance of this report. The lead UST service technician who conducted testing was Oscar Perez of TEC Accutite. Mr. Perez had the following required certifications:
- ICC UST Service Technician (exp. 5/12/2025)
- Veeder-Root ATG Technician (exp. 5/24/2024)
- Vaporless LDT-890 Tester (exp. 7/29/2024)

Facility has 3 USTs (2 x 12,000 gal Diesel USTs and 1 x 12,000 gal 87-Unleaded Gasoline UST), each supplying an individual dispenser. The following components were tested today and passed. Any failures observed are noted above:
- 3 annular sensors were tested by removing them from interstitial fluid to obtain "Low Liquid" audible/ visual alarm and then inverting them to obtain "High Liquid" audible/ visual alarm at the monitoring panel.
- 3 STP sump sensors and 3 Fill sump sensors were tested in water and triggered audible/ visual alarm at the monitoring panel. Positive shutdown was confirmed for the STP sump sensors.
- Fail-safe and sensor out turbine shutdown was confirmed.
- 3 Mechanical Line Leak Detectors (MLLDs) were tested by simulating a 3 gph leak at 10 psi. Slow-flow condition was demonstrated as required.
- 2 UST fill spill buckets were hydrostatically tested for 60 minutes per RP 1200. No drop in liquid was observed.
- 3 float and chain mechanisms were tested with water and tripped the shear valve. Nozzle test confirmed shut off of product flow.

UST element on CERS most recently submitted on 6/15/2022 has been ACCEPTED, however note related deficiency cited above (T032). The submitted UST Information & Monitoring Plans, Site Plan, Certification of Financial Responsibility, and Response Plan were reviewed.
Designated UST Operator (DUSTO) visual inspection reports (12 months), DUSTO facility employee training certification, a current copy of the local government bond rating, and alarm history were reviewed at the time of inspection.

ACTION ITEMS:
- Within 30 days, correct all violations and submit documentation of corrective actions taken as well as certification of compliance.
- Within 30 days, provide our agency with a copy of today's Monitoring System Certification and Spill Bucket test reports. Ensure copies of these reports are maintained on-site.

OTHER NOTES:

DocuSign Envelope ID: E5053AC8-BC3F-46F5-A558-B81CD520ACD6

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

- Facility's 5-Year Operating Permit is valid through 12/31/2024.
- Next testing due dates:
> next annual monitoring system certification testing- due in or before June 2024
> next every-36-month secondary containment (SB989) testing- due in or before October 2023
> next every-36-month overfill prevention inspection- T2 is due in or before June 2024; T1 and T3 are due in or before September 2025. **Recommend inspecting all 3 by June 2024 to have them all on the same cycle moving forward.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135 **Inspection Date:** 06/27/2023
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133

Summary of Violations & Notice to Comply

Program: PR0314855 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G020	M	**MARKING OF HAZARDOUS WASTE [3030007]** Facility failed to properly mark a hazardous waste tank and/or container. ***The following hazardous waste containers had missing or incomplete markings:*** ***- 2 mobile oil rollers in the repair shop were unmarked*** ***- 1 x 55 gal drum of drained/ undrained used oil filters and 1 x 55 gal drum of waste solid absorbent material in the storage area in the parking lot was not marked with the accumulation start date*** ***- 8 storage containers and 5 cardboard boxes of various waste oils, paints, and other hazardous wastes in the outdoor accumulation area were unmarked or not completely marked as specified below.*** ***Within 30 days, mark all hazardous waste containers with the required information specified below.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. If they contain used oil, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.16(b)(6), 66262.17(a)(5), 66279.21(b)]	
G102	M	**SEPARATION OF INCOMPATIBLE WASTES/MATERIALS [3030022]** Facility failed to separate a hazardous waste from incompatible wastes/materials. ***Observed incompatible hazardous wastes being stored together in the outdoor hazardous waste accumulation area:*** ***- 1 storage container contained 1 x approx. 7 gal bucket of a pool chemical (oxidizer) among various containers of motor oil (combustible) and other flammable liquids.*** ***- 1 pallet of waste automotive batteries (corrosive) is stored next to a 5-gal bucket of a material marked as an Oxidizer*** ***- Propane cylinders (flammable gas) are stored directly on the floor adjacent to storage containers containing misc. flammable liquids (paint thinners, cleaners, etc.)*** ***Though not every chemical and cardboard box of chemicals was inspected due to safety concerns, it is highly likely there are other instances of incompatible materials being stored together in this area. Make immediate arrangements to separate these materials, and ensure staff are provided with training/ guidance on how properly to do so.*** Do not place hazardous waste in a container that holds or held an incompatible material. Separate hazardous wastes from incompatible wastes/materials transferred or stored nearby by means of a dike, berm, wall, or other appropriate device. [CCR 66262.16(b)(2)(v), 66262.15(a)(3)(B)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G110	M	**MAINTENANCE AND OPERATION OF FACILITY [3030030]** Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment. ***Observed the following in the outdoor hazardous waste accumulation area:*** ***- evidence of staining on the dirt that indicate materials are spilled here and not properly attended to*** ***- storage of incompatible materials as noted in violation G102*** ***- waste propane, butane, and fire extinguishers are stored out in the open, not secured, and in direct sunlight*** ***Make immediate arrangements to ensure the materials in this area are maintained in a manner to minimize the possibility of any unplanned releases.*** Maintain and operate the facility to minimize the possibility of a fire, explosion, or unplanned release of hazardous waste to air, soil, or surface water. [CCR 66262.16(b)(8), 66262.251, 66262.15(a)(7)]	
G300	II	**ACCUMULATION TIME (LQG) [3030012]** Facility accumulated hazardous waste on-site for longer than 90 days. ***The time between hazardous waste pick-ups exceeded 90 days for the following hazardous wastes:*** ***- Waste Coolant: from11/15/2022 to 6/22/2023*** ***- Drained/ Undrained Used Oil Filters: from 2/25/2022 to 6/9/2022, 6/9/2022 to 9/28/2022, 9/28/2022 to 1/20/2023, and 1/20/2023 to 5/9/2023*** ***As a large quantity hazardous waste generator, hazardous wastes must not be accumulated for longer than 90 days.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not accumulated on-site for longer than 90 day for a generator who generates 1000 kilograms or more of per month. [CCR 66262.17(a), 66262.34(a), (b); HSC 25123.3(b)(1)]	
G320	M	**TRAINING [3020002]** Personnel are not adequately trained on managing hazardous waste. ***According to Mr. Penninger, staff receive hazardous waste training that is documented. This documentation, however, was not available for review during this inspection, and due to the nature and number of violations observed, it is evident that staff are not implementing proper hazardous waste management practices.*** ***Within 30 days, provide documentation of a training matrix that distinguishes which training every individual employee receives.*** Provide a program of instruction that: 1) is directed by a person trained in hazardous waste management procedures; 2) teaches waste management procedures relevant to the position of each employee; and 3) ensures facility personnel are able to respond effectively to emergencies, including shutdown of operations where applicable. Provide this training within 6 months of hire, and annually thereafter. [CCR 66262.17(a)(7)(A)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G405	M	**MARKING: CONTAMINATED CONTAINERS [3030058]** Facility did not mark an empty hazardous material/waste container larger than 5 gallons in capacity with the date it was emptied. ***Observed the following containers that previously held hazardous materials or waste that were empty and not marked with the date on which they were emptied:*** ***- 1 x aboveground used oil tank*** ***- approx. 9 x 55 gal drums that previously held lubricating oils*** ***Within 30 days, mark each container with the date in which it was emptied. Within 1 year of the date marked, make arrangements to have the containers reconditioned, recycled, reclaimed for its scrap value, or returned to the supplier to be refilled.*** Mark each empty hazardous material/waste container larger than 5 gallons in capacity with the date it was emptied. [CCR 66261.7(f)]	
G412	M	**CONTAINER MARKING: USED OIL/FUEL FILTERS [3030004]** Facility failed to properly mark a container of drained used oil/fuel filters. ***Observed 1 x 5 gal bucket of filters by the filter crusher that was not marked.*** ***Within 30 days, properly mark this container.*** Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266.130(c)(3), HSC 25250.22]	
G413	M	**CONTAINER REQUIREMENTS: USED OIL/FUEL FILTERS [3030004]** A container used to hold drained used oil/fuel filters was not closed, rainproof, capable of containing oil/fuel, and/or designed to prevent the ignition of gasoline vapors when holding gasoline filters. ***Observed 1 x 5 gal bucket of filters by the filter crusher that did not have a lid.*** ***Make immediate arrangements to transfer the filters to the main drum or a properly marked container that is able to be closed.*** Ensure that drained use oil/fuel filter containers are closed and meet the above requirements. Confirm that filter containers are sealed during transfer so that no oil and/or fuel can leak out when they are laid on their sides. [CCR 66266.130(c)(3), HSC 25250.22]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135 **Inspection Date:** 06/27/2023
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G612	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE [3030]** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Observed the following in the outdoor hazardous waste accumulation area:*** ***- approximately 4 fluorescent tubes stored in a 5-gal bucket*** ***- additional fluorescent tubes stored in an unmarked storage container among other misc. hazardous waste liquids*** ***Make immediate arrangements to segregate these fluorescent tubes from other hazardous wastes. Properly mark and containerize them as specified below.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	
G613	II	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE AEROSOL CANS [3030051]** Facility failed to meet the accumulation standards for universal waste aerosol cans. ***1 x 55 gal drum of Universal Waste (aerosol cans) was observed in the locked outdoor enclosure without a lid and the required markings.*** ***Within 30 days, ensure all requirements are met for this container.*** Ensure that containers holding UW aerosol cans are labeled or marked clearly with one of the following phrases: "Universal Waste-Aerosol Cans", "Waste Aerosol Cans", or "Used Aerosol Cans"; structurally sound, and compatible with the contents of the universal waste aerosol can; show no evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; are provided with a lid so that the container can (and shall) be covered at the end of each workday; are placed in a location that has sufficient ventilation to avoid formation of an explosive atmosphere; and are placed on or above a floor or other surface that is free of cracks or gaps and is sufficiently impervious and bermed to contain leaks and spills. If holding flammable wastes shall be kept at a safe distance from heat and open flames. Incompatible materials shall be kept segregated and managed appropriately in separate containers. [HSC 25201.16(f)]	

Comments: On-site on 6/21/2023 and 6/23/2023 to perform a routine Hazardous Waste Generator inspection. Inspection concludes today with issuance of this report. A facility walk-through was conducted with Equipment Mechanic, Eric Johnson, and Compliance Officer, Frank Penninger. Observed the following hazardous waste streams:

REPAIR/ MAINTENANCE ACTIVITIES
- used oil
- waste coolant
- used oil filters
- contaminated/ solid debris
- 1 parts washer
- brake cleaner

HAZARDOUS WASTE DROP-OFF/ ACCUMULATION AREA
- liquid hazardous wastes including, but not limited to: waste oils, coolant, paints, cleaning chemicals, pool chemicals, paint thinners
- waste automotive batteries

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

- compressed gas cylinders: fire extinguishers, propane, butane
- universal wastes: bulbs/ lamps, aerosol cans

EPA ID number: CAD983597469 is active.
TSDF-signed uniform hazardous waste manifests were reviewed from 2021-2023 and are retained as required. Pick-ups for wastes generally occur at least every month.
Review of disposal documentation and the State Hazardous Waste Tracking system confirm this business is a large quantity hazardous waste generator. Approximately 15 tons of hazardous waste were shipped in 2021 as well as 2022.

Other Notes:
Fire extinguishers are annually serviced.
Absorbent material is readily available.
Shop rags and uniforms are commercially laundered.
Daily and weekly inspections of tanks and container areas are conducted and logged as required.
Facilities Hazardous Waste Generator permit will be updated from 2205 (Generates >100 kg/ yr to <5 tons/ yr) to 2206 (Generates >5 tons/ yr to <25 tons/yr).

ACTION ITEMS
1) Within 30 days, correct all violations and submit documentation of corrective actions taken as well as certification of compliance.
2) Information Request: Please provide a copy of the last hazardous waste tank system assessment for the aboveground used oil tank.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135 **Inspection Date:** 06/27/2023
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133

Summary of Violations & Notice to Comply

Program: PR0395949 - HAZARDOUS MATERIALS BUSINESS PLAN - BP03
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B107	M	**HMBP SITE MAP MISSING / INCOMPLETE [1010005]** Facility operator failed to electronically submit a Site Map with all required content as part of the facility's Hazardous Materials Business Plan (HMBP). ***The site maps most recently submitted to CERS do not clearly identify the locations of the underground storage tanks and hazardous materials located within the repair shop (compressed gases, brake cleaner), in the parking lot (propane, filters, waste absorbent), and in the locked outdoor enclosure (universal waste aerosol cans).*** ***Within 30 days, revise and resubmit to CERS.*** Within 30 days, electronically submit an HMBP, including accurate facility Site Map(s), through the California Environmental Reporting System (https://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. The map must contain a north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. [HSC 25505(a)(2), HSC 25508(a)(1), HSC 25508(a)(3), 19 CCR 2652(a)(3)]	
B130	II	**HMBP EMERGENCY RESPONSE TRAINING DOCUMENTATION [1020002]** Facility operator failed to provide initial and annual training to all employees in emergency response and safety procedures or failed to document and maintain training records for a minimum of three years. ***Facility was unable to provide documentation that training in emergency response and safety procedures has been conducted and logged. Training must be documented electronically or in hard copy and must be kept available for inspection for a minimum of 3 years.*** ***Template form provided.*** Provide initial training for new employees and annual refresher training for all employees. The training shall cover emergency and safety procedures in the event of a release or threatened release of a hazardous material, as described in the facility's Hazardous Materials Business Plan. Training must be documented electronically or by hard copy. Make a minimum of three years of training records available for inspection by HMCD. [HSC 25505(a)(4), 19 CCR 2658, 19 CCR 2659]	

Comments: On-site on 6/21/2023 and 6/23/2023 to perform a routine Hazardous Materials Business Plan (HMBP) inspection. Inspection concludes today with issuance of this report. A facility walk-through was conducted with Equipment Mechanic, Eric Johnson, and Compliance Officer, Frank Penninger. Observed the following hazardous materials at or above State-reportable threshold quantities:

1) Diesel: 2 x 12,000 gal USTs + 1 x 100 gal belly tank for an aboveground generator
2) 87-Unleaded Gasoline: 1x 12,000 gal UST
3) Acetylene: 3 x 132 cubic ft.
4) Oxygen: 1 x 125 cubic ft. cylinder + 2 x approx. 300 cubic ft cylinders
5) Used Motor Oil: 1 x 110 gal aboveground tank + 2 mobile rollers
6) New Lubricating Oils:
- 15W-40: 110 gal
- 5W-20 Shield Oil: 110 gal

DocuSign Envelope ID: E5053AC8-BC3F-46F5-A558-B81CD520ACD6

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

- AW-46: 110 gal
- Transmission Oil: 110 gal
- ATF: 110 gal
- 5W-40: 110 gal
7) New Coolant: 1 x 55 gal aboveground tank + 1 x 110 gal aboveground tank
8) Waste Coolant: 1 x approx. 80 gal poly drum
9) Propane: 2 x 7 gal cylinders + approx. 120 gal in various sizes
10) Waste Paints: >55 gal in various sizes in the outdoor accumulation area*
11) Citrus Cleaner: 1 x 55 gal drum

HMBP was last submitted to CERS on 6/15/2022, CERS ID: 10130803. This has been ACCEPTED as verified during inspection, however note related violation cited above (B107).
Facility's HMBP permit will be adjusted from BP03 (handling between 7-9 reportable hazardous materials) to BP04 (handling between 10-15 hazardous materials).

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 07/27/2023, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator **Date**

Printed Name of Owner/Operator **Title**

DocuSign Envelope ID: E5053AC8-BC3F-46F5-A558-B81CD520ACD6

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716 or via e-mail to the inspector noted on the "Inspected By" line of the report.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
CERS	California Environmental Reporting System (cers.calepa.ca.gov)
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $50,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC §§25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i), 25289(b)].

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Spill Location Name :	1404 Mabury Road @ King Road
Spill Location Description :	N/R
Agency :	San Jose City
Collection System :	San Jose City CS
Overall Spill Description :	Pipe structural problem/failure;Cast Iron Pipe caused buildup of grease caused 2 gallons of sewage to spill from Building or structure at 1404 Mabury Road @ King Road to Building or structure. No surface water body affected.
Spill Cause :	Pipe structural problem/failure
Spill Cause Explaination :	Cast Iron Pipe caused buildup of grease
Where Failure Occur :	Main
Where Failure Occur Explaination :	N/R
Agency Notification Date :	2011.11.23 19.50.00
Operator Approval Date :	2011.11.23 19.50.00
Estimated End Date :	2011.11.23 19.50.00
Response Activities :	Cleaned-up (mitigated effects of spill);Contained all or portion of spill;Inspected sewer using CCTV to determine cause;Restored flow;Returned all or portion of spill to sanitary sewer system
Response Activities Explanation :	N/R
Response Complete Date :	N/R
Appearance Point :	Building or structure

Violation Date :	2021-10-28
Citation :	N/R
Description :	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Notes :

Returned to compliance on 11/11/2021. The following hazardous materials inventory quantities reported on the most recent HMBP submission to CERS on 10/28/2021 were incorrect based on today's observations: 1) Diesel: max daily amount should be 60,000 gal, not 54,000 gal 2) Waste Oily Water: only 2 x 55 gal drums were observed on-site today, not 800 gallons Additionally, the following reportable inventory was observed today but was not disclosed on the most recent HMBP submission to CERS on 10/28/2021: 1) Acetylene: 2 x 114 cubic ft cylinders 2) Waste Diesel: 1 x 55 gal drum 3) Waste Filters/ Absorbent/ Oily Debris: 10 x 55 gal drums Within 30 days, revise and resubmit to CERS. If you need assistance, please contact me at michelle.santos@cep.sccgov.org.

Description :

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Notes :

Returned to compliance on 11/11/2021. 1) The time between DUSTO inspections exceeded 30 days for the following dates: - from 12/16/2020 to 1/25/2021 - from 3/17/2021 to 4/21/2021 - from 9/15/2021 to 10/20/2021 Ensure that moving forward, the time between DUSTO inspections does not exceed 30 days. **Note this issue was also previously cited on the 10/20/2020 Official Notice of Inspection and remains unresolved. 2) The DUSTO inspection reports note that the last Overfill Prevention Equipment Test date was10/20/2020. This is INCORRECT, as this test was not performed on that date. Moving forward, ensure 10/28/2021 is the date used.

Division : Santa Clara County Environmental Health
Program : UST
Source : CERS

Violation Date : 2021-10-28
Citation : N/R

Description : Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.

Notes : Returned to compliance on 10/28/2021. The float and chain mechanism in the UDC of dispenser 9/10 failed to trip the shear valve when tested with water. The UST service technician adjusted the mechanism, and upon retest, it functioned as required. NO FURTHER ACTION IS REQUIRED, THIS VIOLATION WILL BE CLOSED.

Completed Date :	2019-02-12
Area Name :	Terrace Drive Properties
Sub Area Name :	456 Terrace Drive
Document Type :	Land Use Restriction Monitoring Report
Comments :	N/R

Completed Date :	2019-02-12
Area Name :	Terrace Drive Properties
Sub Area Name :	426 Terrace Drive
Document Type :	Land Use Restriction Monitoring Report
Comments :	N/R

Completed Date :	2018-12-04
Area Name :	Park
Sub Area Name :	N/R
Document Type :	Soils Management Plan

Comments :

The Site Management Plan: 1) presents general health and safety guidelines for Site construction or maintenance workers who may be exposed to soil that may contain residual constituents of concern; 2) presents soil management guidelines for the excavation, characterization, reuse of Site soil, and import of clean fill material; 3) summarizes portions of the Land Use Covenants for the homeowners at 414, 420, 426, 432, 438, 444, 450, 456, and 460 Terrace Drive that are relevant to management of soil generated in the course of future activities at the Site; and 4) provides ongoing requirements for inspections and/or repairs to the soil or paved cap areas.

Completed Date :	2016-09-22
Area Name :	Empire Gardens Elementary School
Sub Area Name :	N/R
Document Type :	Annual Oversight Cost Estimate
Comments :	DTSC letter with oversight cost estimate for project activities scheduled for fiscal year 2016/2017. The scheduled include the Operation and Maintenance Agreement and Plan.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2013: 331 - Off-specification, aged or surplus organics, 0.06 tons to CAD044429835
2013: N/R - Blank or unknown, tons to CAD044429835
2012: 132 - Aqueous solution with metals (< restricted levels and see 121), 10.77945 tons to CAD008488025
2012: 223 - Unspecified oil-containing waste, 0.22935 tons to CAD008302903
2012: 131 - Aqueous solution (2 < pH < 12.5) containing reactive anions ..., 0.39615 tons to CAD982052797
2012: 141 - Off-specification, aged or surplus inorganics, 0.1 tons to CAD008488025
2012: 551 - Laboratory waste chemicals, 0.858 tons to CAD044429835
2012: 171 - Metal sludge (see 121), 8.5852 tons to AZD980735500
2012: 181 - Other inorganic solid waste, 53.193 tons to NVT330010000
2012: 331 - Off-specification, aged or surplus organics, 0.25 tons to NVT330010000
2012: 181 - Other inorganic solid waste, 0.125 tons to CAD980884183
2012: 541 - Photochemicals/photoprocessing waste, 0.7506 tons to CAD982052797
2012: 343 - Unspecified organic liquid mixture, 0.1125 tons to ARD981057870
2012: 141 - Off-specification, aged or surplus inorganics, 0.1 tons to NVT330010000
2012: 711 - Liquids with cyanides >= 1,000 Mg./L, 0.35445 tons to CAD982052797
2012: 792 - Liquids with pH <= 2 with metals, 3.6279 tons to NVD980895338
2012: 121 - Alkaline solution (pH >= 12.5) with metals, 1.3761 tons to CAD008488025
2012: 792 - Liquids with pH <= 2 with metals, 11.9262 tons to CAD008488025

Hazardous Waste Summary
Waste Code / Name : D002 - CORROSIVE WASTE
D004 - ARSENIC
D007 - CHROMIUM
D008 - LEAD
D011 - SILVER
F006 - WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
F007 - SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2018: 741 - Liquids with halogenated organic compounds >= 1,000 Mg. /L, 0.45870 tons to NVT330010000
2018: 343 - Unspecified organic liquid mixture, 0.86700 tons to NVT330010000
2018: 134 - Aqueous solution with total organic residues less than 10 percent, 0.16800 tons to CA0000084517
2018: 223 - Unspecified oil-containing waste, 0.12500 tons to ORQ000025197
2017: 343 - Unspecified organic liquid mixture, 0.403 tons to CAD059494310
2017: 223 - Unspecified oil-containing waste, 0.125 tons to ORQ000025197
2017: 343 - Unspecified organic liquid mixture, 1.139 tons to NVT330010000
2017: 223 - Unspecified oil-containing waste, 0.3 tons to AZR000003681
2017: 223 - Unspecified oil-containing waste, 0.1 tons to AZR000515924
2017: 134 - Aqueous solution with total organic residues less than 10 percent, 0.7182 tons to CA0000084517
2017: 741 - Liquids with halogenated organic compounds >= 1,000 Mg. /L, 0.8757 tons to NVT330010000
2016: 741 - Liquids with halogenated organic compounds >= 1,000 Mg. /L, 1.06335 tons to NVT330010000
2016: 134 - Aqueous solution with total organic residues less than 10 percent, 1.05 tons to CA0000084517
2016: 331 - Off-specification, aged or surplus organics, 0.0225 tons to UTD981552177
2016: 343 - Unspecified organic liquid mixture, 0.2295 tons to CAD059494310
2016: 343 - Unspecified organic liquid mixture, 0.1 tons to AZR000515924
2016: 223 - Unspecified oil-containing waste, 0.075 tons to AZR000515924
2016: 331 - Off-specification, aged or surplus organics, 0.1155 tons to CAD059494310
2016: 343 - Unspecified organic liquid mixture, 1.683 tons to NVT330010000
2015: 223 - Unspecified oil-containing waste, 0.37947 tons to CAT080012602
2015: 134 - Aqueous solution with total organic residues less than 10 percent, 0.8358 tons to CA0000084517

Site Details

Status Date : 2021-06-29
Status : Completed - Case Closed
Begin Date : 1992-07-31
Global ID : T0608500896

Site History :

December 15, 2011, soil and groundwater investigation report Indicates that shallow soil and groundwater beneath the site is impacted with TPH-gasoline and benzene. Additional site characterization will be needed to define the extent of contamination. Based on the results, a feasibility study should be conducted to select the remedial alternatives and to prepare a corrective action plan. For information regarding the site conditions at the time the case was closed, refer to the Case Closure Documents dated June 30, 2021.

RB Case Number : 14-063
Potential Media Affected : Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern : Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Local Agency : SANTA CLARA COUNTY LOP
Local Case Number : 07S1E04C05f
Lead Agency : SANTA CLARA COUNTY LOP
File Location : All Files are on GeoTracker or in the Local Agency Database
CUF Case : YES
Caseworker : GOR
Case Type : LUST Cleanup Site
How Discovered : Tank Closure
How Discovered Description : N/R
Stop Method : Close and Remove Tank
Stop Method Description : N/R
Calwater Watershed Name : Santa Clara - Coyote Creek (205.30)
DWR Groundwater Sub-basin Name : Santa Clara Valley - Santa Clara (2-009.02)
Latitude : 37.359197
Longitude : -121.869792

Violation Date :	2021-06-30
Citation :	N/R
Description :	Failure to train each employee involved in maintaining the on-going integrity of process equipment on the following: 1. Overview of the process and its hazards. 2. Procedures applicable to the employee's job tasks to assure that the employee can perform the job tasks in a safe manner.

Notes :

Returned to compliance on 03/14/2022. Employees were not adequately trained to use and maintain ammonia wearable sensors in accordance with manufacturers requirements. Inspector notified facility during the 2/9/2021 onsite walkthrough that ammonia sensor manuals list a requirement for daily bump testing, but employees could not communicate how this testing was done, and results were not logged for completion of testing or training related to this requirement. On 2/16/2021, facility developed a procedure to complete bump testing and trained the refrigeration tech team onsite. Facility had another formal training with the ammonia contractor from CTI in March. Since 2/16/2021, employees have been conducting and logging results of daily bump tests of ammonia sensors before starting their shift. Current procedure requires use of a rag wetted with ammonia-based cleaning liquid. 1. Provide documentation of how use of this liquid meets manufacturers requirements for daily bump testing. 2. Provide documentation of [Truncated]

Violation Date : 2021-06-30
Citation : N/R

Description : Failure to correct deficiencies in equipment that are outside acceptable limits before further use or in a safe and timely manner when necessary means are taken to assure safe operation.

Notes :

Returned to compliance on 06/30/2021. Facility failed to correct deficiencies in equipment that are outside acceptable limits before further use or in a safe and timely manner. In addition to items below, facility failed to promptly correct deficiencies in equipment noted in violation C021 before further use. PIPING INSULATION DAMAGED Observed that piping located above SCHPL in the Mod 1 Pump Room showed crumpled installation and was sagging on top of the piping support. Annual Ammonia Refrigeration Safety Inspection Checklist for the Mod 1 Pump Room on 12/12/2020 notes that "Insulation near oil pot end of float colum is bad, needs replacement". 1. Provide an action plan with timelines for repair of damaged insulation to HMCD. TRAFFIC PROTECTION Facility currently does not have adequate traffic protection at this location of the ammonia system. Observed two damaged traffic barriers next to the outdoor storm drain and ecolab station 28 at the corner of the ammonia diffusion tank. Bollards were observed [Truncated]

Violation Date : 2021-06-30
Citation : N/R

Description :

Failure to: 1. Promptly determine and document an appropriate response to each of the findings of the compliance audit; 2. Enter into an agreement with the UPA on a timetable for resolution of these findings. Otherwise these responses shall be completed one and one-half (1.5) years after performing the compliance audit, or the next planned turnaround for items requiring a turnaround (these timelines shall not apply to any compliance audit completed prior to January 1, 2015); 3. Document the actual completion dates when deficiencies were corrected.

AST - CA ***(cont.)***

Notes :

Returned to compliance on 07/30/2021. The following issues noted in the December 2019 compliance audit were not corrected within 1.5 years as required. In addition, both open and closed action items in the register list a deadline, but do not specify the date of resolution for closed items. Audit Item: " §68.65(d)(1)(v) Ventilation in the Engine rooms does not meet the requirements outlined in IIAR 9. There is no intake air in the East Engine room to support emergency ventilation. Additionally, use of the scrubber in the East and West Engine rooms for emergency ventilation reduces airflow significantly below required air flows. Emergency ventilation is used in place of continuous ventilation as there is no additional ventilation source other than emergency ventilation." "Perform a thorough ventilation study for all the ammonia rooms and implement all the recommendations, ensuring they address all the following known issues: -There is no intake air in the East Engine room to support emergency ventilation. [Truncated]

Program : CalARP
Source : CERS

Violation Date : 2021-06-30
Citation : N/R

Description :

Failure to perform the following: 1. Obtain and evaluate information regarding the contract owner or operator's safety performance and programs when selecting a contractor. 2. Inform the contract owner or operator of the known potential fire, explosion, or toxic release hazards related to the contractor's work and the process. 3. Explain to the contract owner or operator the applicable provisions of Article 7 (Emergency Response Program). 4. Develop and implement safe work practices consistent with the Section 2760.3(d) (operating procedures), to control the entrance, presence, and exit of the contract owner or operator and contract employees in covered process areas.

Notes :

Returned to compliance on 07/30/2021. Facility could not provide adequate records to demonstrate that ammonia contractors working onsite are adequately trained. Incidents in 2019 and 2021 both involved onsite contractors that were not adequately trained. Training records for ammonia contractor (Stellar and Telstar) were not available at the time of inspection, and contractors were not able to answer specific questions about the ammonia system and operations onsite (see Notice of Inspection issued on 2/9/2021).

Description :

Failure to ensure the following: 1. Inspections and tests are performed on process equipment; 2. Inspection and testing procedures follow recognized and generally accepted good engineering practices; 3. The frequency of inspections and tests of process equipment is consistent with applicable manufacturers' recommendations and good engineering practices, and more frequently if determined to be necessary by prior operating experience; 4. Each inspection or test that has been performed on process equipment is documented and includes the date of inspection or test, name of the person who performed the inspection or test, serial number or other identifier of the equipment inspected or tested, description of the inspection or test performed, and the results of the inspection or test.

Notes :

Returned to compliance on 10/11/2022. SENSOR CALIBRATIONS Facility failed to calibrate ammonia sensor in accordance with manufacturers recommendations. Ammonia sensors were not calibrated in accordance with required schedules. Calibration logs in October 2020, January 2021 and February 2021 show that the Mod 1 Pump Room sensor 1 could not be accessed for testing. The 7/2/19 calibration record shows that 6 sensors were not tested due to limited lift access (Serial # 908821, 878507, 880554, 888598, 880546, 880558). Calibration on sensors in the Storage Warehouse (s &N), Penthouse (W & E), Marsh Area, and West Engine Room (1 & 2) were not completed on 7/22/20 due to insufficient electrolyte. Between 4/22/20 and 10/06/20, these sensors were not calibrated. 1. Provide written explanation of how facility will ensure testing of all sensors within required time periods. 2. Provide documentation that demonstrates that all sensors listed above have been properly calibrated. In addition, ammonia sensors in [Truncated]

Hazardous Waste Summary

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Waste Code / Name :
135 - Unspecified aqueous solution
141 - Off-specification, aged, or surplus inorganics
181 - Other inorganic solid waste
291 - Latex waste
331 - Off-specification, aged, or surplus organics
352 - Other organic solids
512 - Other empty containers 30 gallons or more
741 - Liquids with halogenated organic compounds > 1000 mg/l
792 - Liquids with pH < 2 with metals
D001 - IGNITABLE WASTE

Site Details

Status Date :	2022-03-28
Status :	Open - Verification Monitoring
Begin Date :	1986-01-01
Global ID :	SL0608593920
Site History :	TPH-G, TPH-D, CHLORINATED VOCS IN GROUNDWATER This site was formerly a manufacturing facility. Spills/leaks from aboveground and underground storage tanks has released contaminants to soil and groundwater.
RB Case Number :	43S0741
Potential Media Affected :	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern :	Gasoline, Diesel, * Solvents
Local Agency :	SAN JOSE, CITY OF
Local Case Number :	N/R
Lead Agency :	SAN FRANCISCO BAY RWQCB (REGION 2)
File Location :	Regional Board
CUF Case :	NO
Caseworker :	N/R
Case Type :	Cleanup Program Site
How Discovered :	Site Assessment/Site Investigation
How Discovered Description :	CONTAMINATION DISCOVERED DURING ENVIRONMENTAL INVESTIGATION.
Stop Method :	Other Means
Stop Method Description :	UST removal.
Calwater Watershed Name :	Santa Clara - Coyote Creek (205.30)
DWR Groundwater Sub-basin Name :	Santa Clara Valley - Santa Clara (2-009.02)
Latitude :	37.359908
Longitude :	-121.869042
Last Date in Agency List :	2023-06-16

Comments :

Completed SI. In August 1986, while transferring solvent from one subsurface underground tank to another, about 260 gallons solvent (Hi Sol #10) spill occurred in the underground storage tank (UST) farm. The subsequent investigation found levels of total hydrocarbons in the soil (7600 ppm) at the site and in the groundwater (56 ppb) below the site. SF Regional Water Quality Control Board (RWQCB) issued Cleanup and Abatement Order (CAO) No. 87-004 to Dap. Starting in August 1988, seven USTs and contaminated soil were removed. The soil analyses results showed ethyl benzene (5 to 14 ppb), 1,4-dichlorobenzene (15 ppb), toluene (0.8 to 20 ppb) and xylene (15 to 150 ppb).

Waste Generator Details

State Waste :

2004: 551 - Laboratory waste chemicals, 0.085 tons to WAD991281767
2004: 551 - Laboratory waste chemicals, 0.05 tons to NVD980895338
2004: 214 - Unspecified solvent mixture, 0.072 tons to NVD980895338
2004: 343 - Unspecified organic liquid mixture, 0.85 tons to WAD991281767
2004: 214 - Unspecified solvent mixture, 0.0675 tons to WAD991281767
2004: 291 - Latex waste, 0.105 tons to NVD980895338
2004: 343 - Unspecified organic liquid mixture, 0.025 tons to NVD980895338
2004: 551 - Laboratory waste chemicals, 0.0225 tons to NVD980895338
2004: 181 - Other inorganic solid waste, 0.06 tons to WAD991281767
2003: N/R - Blank or unknown, 0.36 tons to NVD980895338
2003: 331 - Off-specification, aged or surplus organics, 0.1375 tons to NVD980895338
2003: 352 - Other organic solids, 0.1375 tons to NVD980895338
2003: 343 - Unspecified organic liquid mixture, 0.17 tons to NVD980895338
2003: 741 - Liquids with halogenated organic compounds >= 1,000 Mg./L, 0.6255 tons to CAD009452657
2003: N/R - Blank or unknown, 0.325 tons to NVD980895338
2003: 791 - Liquids with pH <= 2, 0.02919 tons to NVD980895338
2003: 122 - Alkaline solution without metals pH >= 12.5, 0.2192 tons to NVD980895338

Document Type : Land Use Restriction Monitoring Report

Comments : As required by Section 4.5 of the Land Use Covenant, CB&I performed an annual site inspection on behalf of RE Diversified Holding LLC, the site owner, to verify compliance with the restrictions and requirements of the Land Use Covenant. CB&I concluded in the site inspection report that that no prohibited use of the site was observed and the site is in compliance with the Land Use Covenant.

Completed Date : 2016-12-27
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Correspondence

Comments : Letter to DTSC providing notification of change in ownership and purchase of the Site by RE Diversified Holdings LLC.

Completed Date : 2016-09-23
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Correspondence
Comments : Notification of change in Site ownership to Diversified Holdings LLC.

Completed Date : 2016-05-20
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Acknowledgement of Satisfaction

Comments :

The Land Use Covenant recommended by the Final Preliminary Endangerment Assessment report, approved by DTSC on September 21, 2015, was executed and recorded with Santa Clara County. DTSC determined and conveyed in a May 13, 2016 letter to the property owner/proponent that no further action is necessary with respect to the investigation and remediation of hazardous substances or wastes at the Elcon Precision facility, with the exception of the compliance with the requirements and restrictions of the Land Use Covenant. An Acknowledgment of Termination and Satisfaction was fully-executed on May 20, 2016.

Document Type : Community Profile
Comments : N/R

Completed Date : 2021-09-27
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Preliminary Endangerment Assessment Report

Comments :

The Report presents the history of the Site, evaluates nature and extent of chemicals of concern (COCs), calculates the risks to current and future users and workers of the Site, evaluates the need for remedial actions necessary to reduce or eliminate potential risks to human health and/or the environment and outlines a remediation strategy to allow for Site industrial redevelopment. The Report recommends preparing a Removal Action Workplan to mitigate the potential risks from COCs in soil and soil vapor.

Completed Date : 2020-06-17
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Monitoring Report

Comments :

DTSC approved two reports: the Report on 1-Year Sub-Barrier Soil Vapor Monitoring Results - Building A, Citation Townhomes/Onyx V, and the Report on 1-Year Sub-Barrier Soil Vapor Monitoring Results - Building B, Citation Townhomes/Onyx V (Reports) dated February 19, 2020 prepared by Haley & Aldrich, Inc. (HAI). The reports summarize the results of the soil vapor monitoring event that was conducted at the Site on December 27, 2019 to meet the requirements of the Vapor Mitigation Plan (VMP) approved by DTSC on November 22, 2017. Soil vapor samples were collected from vapor monitoring points below the vapor intrusion mitigation systems (VIMS) constructed beneath Buildings A and B at the Site. DTSC requested that RP submit a report that evaluates the first year of sub-barrier soil vapor monitoring results and including an evaluation/discussion of the effectiveness of the VIMS and plans for additional sampling. Also requested that RP submit the 2019 Annual Inspection Report.

Completed Date : 2019-12-23
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Monitoring Report

Comments :

The reports summarize the results of the soil vapor monitoring event that was conducted at the Former Serra Silicon Valley Company Site on June 11, 2019 (6-month monitoring event) to meet the requirements of the Revised Vapor Mitigation Plan for the Site. Soil vapor samples were collected from vapor monitoring points below the vapor intrusion mitigation systems (VIMS) constructed beneath Buildings A and B at the Site.

Completed Date : 2019-12-23

Database(s) : [ENVIROSTOR - CA] ***(cont.)***

Envirosite ID: 53787329
EPA ID: N/R

ENVIROSTOR - CA ***(cont.)***

Comments :

The reports summarize the results of the soil vapor monitoring event that was conducted at the Former Serra Silicon Valley Company Site on December 13, 2018 (Baseline monitoring event) to meet the requirements of the Revised Vapor Mitigation Plan for the Site. Soil vapor samples were collected from vapor monitoring points below the vapor intrusion mitigation systems (VIMS) constructed beneath Buildings A and B at the Site.

Completed Date : 2017-11-22
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Design/Implementation Workplan

Comments :

The Vapor Mitigation Plan includes the design and operation and maintenance procedures for the vapor intrusion mitigation systems to be installed at Buildings A and B at the Site. Buildings A and B are to be constructed within the "Volatile Organic Compound-Affected Area" that is defined by and subject to restrictions and requirements included in Section 4.4 of the Land Use Covenant for the Site between DTSC and Pulte Home Company, LLC, which was recorded with Santa Clara County on September 21, 2017. DTSC approved revisions to the sub-slab vapor barrier and venting system design drawings with a February 2, 2018 letter.

Completed Date : 2017-09-21
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Land Use Restriction

Comments :

The Land Use Covenant was recorded with Santa Clara County and includes restrictions on the type of residential land use on the Site. A portion of the Site has soil vapor impacted with volatile organic compounds, primarily tetrachloroethene. This portion of the Site is identified in the Covenant as the VOC-Affected Area and there is a restriction in the Covenant that no structures may be built on this area without a vapor intrusion mitigation system approved by DTSC.

Completed Date : 2017-04-14
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Supplemental Site Investigation Workplan

Comments :

The Work Plan describes additional sampling to be performed to characterize the residual volatile organic compounds (VOCs) in soil gas within an affected area that was identified during previous Site investigations. The soil gas sampling results will be used to assess whether there remains an unacceptable risk to human health via the vapor intrusion pathway and whether the residential buildings that are to be constructed in the VOC-affected area require a vapor intrusion mitigation system as recommended by the Preliminary Endangerment Assessment Report.

Document Type : Soils Management Plan

Comments :

The Soil Management Plan this SMP provides the environmental protections for the planned multifamily residential development of the Site, including excavation to remove soils with elevated hexavalent chromium in the vicinity of soil sample location SB-36, collection of additional samples to further characterize nickel concentrations in soil in the vicinity of soil sample locationsSB-36 and SB-37, and management of potential construction worker exposure to volatile organic compounds (VOCs) in areas with potentially-affected soil.

Completed Activities
Completed Date : 2002-03-15
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Site Screening
Comments : The site was referred to the Santa Clara Valley Water District.

Completed Date : 1990-03-20
Area Name : PROJECT WIDE
Sub Area Name : N/R
Document Type : Site Screening

Comments :

Completed Site Screening. In August of 1989, three underground storage fuel storage tanks were removed under the supervision of the San Jose Fire Department. Soil discoloration was observed. Eight soil samples detected elevated levels of total petroleum hydrocarbons as gasoline (TPHg); total petroleum hydrocarbons as diesel (TPHd); and benzene, toluene, ethylbenzene, and total xylenes (BTEX). The contaminated soil was excavated and disposed offsite. Residual levels are below residential screening levels.

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 07/07/2023

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 07/07/2023

EPA SAA: Listing of Sites with Superfund Alternative Approach Agreements.

Agency Version Date: 07/10/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/04/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 07/10/2023

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 07/07/2023
Agency Update Frequency: Varies
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8712
Most Recent Contact: 07/07/2023

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 07/07/2023

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 10/03/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 07/07/2023

FEDERAL RCRA CORRACTS FACILITIES LIST

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 06/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 09/01/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 06/07/2023

FEDERAL RCRA CORRACTS FACILITIES LIST (cont.)

HIST CORRACTS 2: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 10/25/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667

Samp Collection Date :	2007-04-26
Chemical :	FC113 (1,1,2-Trichloro-1,2,2-Trifluoroethane (Freon 113)) < .00004 MG/L
CAS Number :	N/R
Reporting Limit :	.00004

Samp Collection Date :	2007-04-26
Chemical :	TCB124 (1,2,4- Trichlorobenzene (1,2,4 TCB)) < .12 UG/L
CAS Number :	N/R
Reporting Limit :	.12

Samp Collection Date :	2007-04-26
Chemical :	LI (Lithium) 7.69 UG/L
CAS Number :	N/R
Reporting Limit :	.6

Samp Collection Date :	2007-04-26
Chemical :	DICAMBA (Dicamba) < .08 UG/L
CAS Number :	N/R
Reporting Limit :	.08

Samp Collection Date :	2007-04-26
Chemical :	STY (Styrene) < .04 UG/L
CAS Number :	N/R
Reporting Limit :	.04

Samp Collection Date :	2007-04-26
Chemical :	H2H1RAT (delta H2/H1) -43.5 per mil
CAS Number :	N/R
Reporting Limit :	N/R

Samp Collection Date :	2007-04-26
Chemical :	CR (Chromium) < 1 UG/L
CAS Number :	N/R
Reporting Limit :	1

Q3 Flood Data

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

Summary of Violations & Notice to Comply

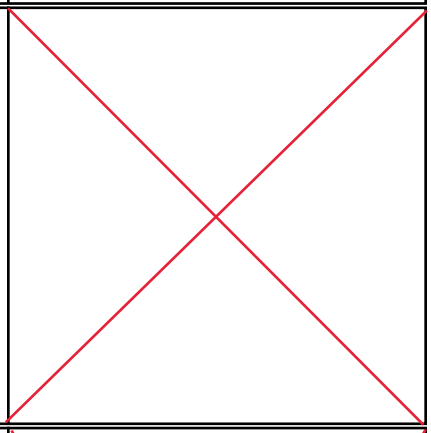

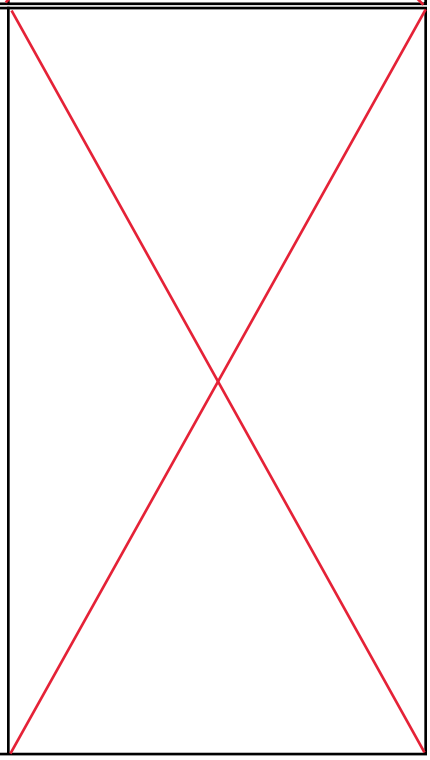

Program: PR0395948 - UNDERGROUND STORAGE TANK - 2399
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
T032	M	**DUSTO IDENTIFICATION [2010003]** Underground storage tank (UST) owner/operator failed to electronically submit a completed "Designated Underground Storage Tank Operator Identification Form" within 30 days of commencing the storage of hazardous material in a newly installed UST; or within 30 days of a change in the facility's DUSTO. ***The following individuals conducted DUSTO visual inspections but are not identified in the facility's most recently submitted DUSTO Identification Form:*** ***1) Brianna Pena- 6/1/2023, 5/4/2023*** ***2) Ed Chenoweth- 1/11/2023*** ***Within 30 days, submit a revised DUSTO Identification Form to CERS that includes all individuals who will potentially conduct the monthly visual inspections.*** Within 30 days, complete and upload and electronically submit a PDF copy of the form via the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. The form (UN-062) is available at www.EHinfo.org/hazmat. [23 CCR 2715(a)(1)(B), 2715(a)(3)]	
T035	M	**UST OWNER/OPERATOR ACKNOWLEDGEMENT OF INSPECTION RESULTS OR DESCRIPT OF FOLLOW-UP ACTIONS [2030013]** Underground storage tank (UST) owner/operator failed to, within 72 hours of receiving a "Designated UST Operator Visual Inspection Report" signed by the DUSTO, sign Section 6 of the report to acknowledge the inspection results and/or describe in Section 5 of the report follow-up actions taken in response to any compliance issue identified by the DUSTO in Section 3 of the report. ***The DUSTO visual inspection conducted on 5/4/2023 was not acknowledged (signed) by the UST owner/ operator within 72 hours of receipt.*** ***Mr. Johnson signed this report at the time of inspection. NO FURTHER ACTION IS NEED, THIS VIOLATION WILL BE CLOSED.*** Within 72 hours of receiving from the DUSTO a signed inspection report, the owner/operator must note in Section 5 of the report corrective actions taken or to be taken in response to each compliance issue identified in Section 3 of the report, and must complete Section 6 of the report by printing their name and adding their signature and the date signed. [23 CCR 2716(e)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
T090	II	**UNSAFE UST OPERATION [2030035]** Facility failed to operate an underground storage tank (UST) system in a manner that prevents leaks, spills, or overfills. ***The T1 (Diesel) UST Fill spill container was observed to have approx. 2-3 inches of diesel in it. According to the UST Service Technician, this is a recurring issue.*** ***This was cleaned up at the time of inspection, however, ensure that liquid in the spill container is immediately cleaned up and not allowed to accumulate.*** Immediately cease or modify UST operations that cause or increase the risk of an unauthorized release. [HSC 25292.1(a)]	
T100	M	**INSTALLATION, CALIBRATION, OPERATION AND MAINTENANCE OF UST MONITORING EQUIPMENT [2030043]** Underground storage tank (UST) owner/operator failed to ensure that UST system leak detection equipment is installed, calibrated, operated and maintained in accordance with manufacturers' instructions. ***It was noted at the time of inspection that the light bulb on the monitoring panel was out.*** ***The UST service technician replaced the bulb. NO FURTHER ACTION IS NEEDED, THIS VIOLATION WILL BE CLOSED.*** Ensure that all leak detection equipment is installed, calibrated, operated and maintained in accordance with the manufacturers' instructions. [23 CCR 2638(a), 2641(j)]	
T372	II	**PIPE MONITORING: PRESSURIZED DW PIPE LLD NON-FUNCTIONAL [2030025]** Line leak detector (LLD) monitoring double-wall underground pressurized piping failed to detect a simulated 3 gallons-per-hour leak at 10 pounds per square inch within an hour, failed to restrict or shut off flow of product through the piping when a leak was detected, or is otherwise non-functional. ***The VMI LD-2000 MLLD for T2 (Gasoline) failed to trigger slow-flow condition when a 3 gallon/ hour leak at 10 psi was simulated.*** ***The UST Service Technician made one adjustment to the MLLD and retested. Upon retest, the MLLD functioned as required. NO FURTHER ACTION IS NEEDED, THIS VIOLATION WILL BE CLOSED.*** Have a qualified UST Service Technician repair or replace the LLD as soon as possible. Submit documentation of the repair and startup testing results with your written response to this Notice to Comply. No permit is required for replacement of a mechanical LLD (MLLD) with another approved MLLD, or like-for-like replacement of an approved electronic LLD (ELLD). A UST repair/retrofit permit from HMCD is required before switching from MLLD to ELLD or non-like-for-like replacement of an ELLD. In that case, plans must be submitted in accordance with HMCD's "Plan Submittal Requirements for Hazardous Materials Systems" (HMCD-004) available at www.EHinfo.org/hazmat. Upon plan check approval, have the LLD installed as soon as possible and schedule an inspection so HMCD can witness testing. [23 CCR 2636(f)(2)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
T560	II	**SPILL CONTAINMENT [2060020]** One or more underground storage tank (UST) fill openings is not equipped with a spill container, or spill containment is not liquid-tight, or spill containment does not have the required minimum 5 gallon liquid capacity. ***The T3 (Diesel) UST Fill Spill Container was determined to fail and was not tested by the UST Service Technician due to a broken drain valve.*** ***According to Mr. Perez, it would be replaced and retested later on 6/21/2023, however this was not witnessed. Within 30 days, submit the UST Spill Container Testing Report Form to our office for review.*** Immediately cease filling the tank(s) at any fill location that cannot prevent the escape of hazardous substances into backfill. Have a qualified UST Service Technician repair and retest the spill containment. Submit a copy of the "Underground Storage Tank Spill Container Testing Report Form" within 30 days of testing. No permit is required to repair or replace drain valves or other internal components. If repair is not possible and replacement is necessary, obtain a UST minor repair/retrofit permit from HMCD as soon as possible. Permit application forms, guidance documents and the fee schedule are available at www.EHinfo.org/hazmat. Upon plan check approval, have the work done as soon as possible and schedule an inspection for HMCD to witness the installation testing per 23 CCR 2637.1. [23 CCR 2635(b), 2665(a), 2665(b)]	

Comments: On-site on 6/21/2023 to witness the Annual Monitoring System Certification testing. Inspection concludes today with issuance of this report. The lead UST service technician who conducted testing was Oscar Perez of TEC Accutite. Mr. Perez had the following required certifications:
- ICC UST Service Technician (exp. 5/12/2025)
- Veeder-Root ATG Technician (exp. 5/24/2024)
- Vaporless LDT-890 Tester (exp. 7/29/2024)

Facility has 3 USTs (2 x 12,000 gal Diesel USTs and 1 x 12,000 gal 87-Unleaded Gasoline UST), each supplying an individual dispenser. The following components were tested today and passed. Any failures observed are noted above:
- 3 annular sensors were tested by removing them from interstitial fluid to obtain "Low Liquid" audible/ visual alarm and then inverting them to obtain "High Liquid" audible/ visual alarm at the monitoring panel.
- 3 STP sump sensors and 3 Fill sump sensors were tested in water and triggered audible/ visual alarm at the monitoring panel. Positive shutdown was confirmed for the STP sump sensors.
- Fail-safe and sensor out turbine shutdown was confirmed.
- 3 Mechanical Line Leak Detectors (MLLDs) were tested by simulating a 3 gph leak at 10 psi. Slow-flow condition was demonstrated as required.
- 2 UST fill spill buckets were hydrostatically tested for 60 minutes per RP 1200. No drop in liquid was observed.
- 3 float and chain mechanisms were tested with water and tripped the shear valve. Nozzle test confirmed shut off of product flow.

UST element on CERS most recently submitted on 6/15/2022 has been ACCEPTED, however note related deficiency cited above (T032). The submitted UST Information & Monitoring Plans, Site Plan, Certification of Financial Responsibility, and Response Plan were reviewed.
Designated UST Operator (DUSTO) visual inspection reports (12 months), DUSTO facility employee training certification, a current copy of the local government bond rating, and alarm history were reviewed at the time of inspection.

ACTION ITEMS:
- Within 30 days, correct all violations and submit documentation of corrective actions taken as well as certification of compliance.
- Within 30 days, provide our agency with a copy of today's Monitoring System Certification and Spill Bucket test reports. Ensure copies of these reports are maintained on-site.

OTHER NOTES:

DocuSign Envelope ID: E5053AC8-BC3F-46F5-A558-B81CD520ACD6

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

- Facility's 5-Year Operating Permit is valid through 12/31/2024.
- Next testing due dates:
> next annual monitoring system certification testing- due in or before June 2024
> next every-36-month secondary containment (SB989) testing- due in or before October 2023
> next every-36-month overfill prevention inspection- T2 is due in or before June 2024; T1 and T3 are due in or before September 2025. **Recommend inspecting all 3 by June 2024 to have them all on the same cycle moving forward.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135 **Inspection Date:** 06/27/2023
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133

Summary of Violations & Notice to Comply

Program: PR0314855 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G020	M	**MARKING OF HAZARDOUS WASTE [3030007]** Facility failed to properly mark a hazardous waste tank and/or container. ***The following hazardous waste containers had missing or incomplete markings:*** ***- 2 mobile oil rollers in the repair shop were unmarked*** ***- 1 x 55 gal drum of drained/ undrained used oil filters and 1 x 55 gal drum of waste solid absorbent material in the storage area in the parking lot was not marked with the accumulation start date*** ***- 8 storage containers and 5 cardboard boxes of various waste oils, paints, and other hazardous wastes in the outdoor accumulation area were unmarked or not completely marked as specified below.*** ***Within 30 days, mark all hazardous waste containers with the required information specified below.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. If they contain used oil, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.16(b)(6), 66262.17(a)(5), 66279.21(b)]	
G102	M	**SEPARATION OF INCOMPATIBLE WASTES/MATERIALS [3030022]** Facility failed to separate a hazardous waste from incompatible wastes/materials. ***Observed incompatible hazardous wastes being stored together in the outdoor hazardous waste accumulation area:*** ***- 1 storage container contained 1 x approx. 7 gal bucket of a pool chemical (oxidizer) among various containers of motor oil (combustible) and other flammable liquids.*** ***- 1 pallet of waste automotive batteries (corrosive) is stored next to a 5-gal bucket of a material marked as an Oxidizer*** ***- Propane cylinders (flammable gas) are stored directly on the floor adjacent to storage containers containing misc. flammable liquids (paint thinners, cleaners, etc.)*** ***Though not every chemical and cardboard box of chemicals was inspected due to safety concerns, it is highly likely there are other instances of incompatible materials being stored together in this area. Make immediate arrangements to separate these materials, and ensure staff are provided with training/ guidance on how properly to do so.*** Do not place hazardous waste in a container that holds or held an incompatible material. Separate hazardous wastes from incompatible wastes/materials transferred or stored nearby by means of a dike, berm, wall, or other appropriate device. [CCR 66262.16(b)(2)(v), 66262.15(a)(3)(B)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G110	M	**MAINTENANCE AND OPERATION OF FACILITY [3030030]** Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment. ***Observed the following in the outdoor hazardous waste accumulation area:*** ***- evidence of staining on the dirt that indicate materials are spilled here and not properly attended to*** ***- storage of incompatible materials as noted in violation G102*** ***- waste propane, butane, and fire extinguishers are stored out in the open, not secured, and in direct sunlight*** ***Make immediate arrangements to ensure the materials in this area are maintained in a manner to minimize the possibility of any unplanned releases.*** Maintain and operate the facility to minimize the possibility of a fire, explosion, or unplanned release of hazardous waste to air, soil, or surface water. [CCR 66262.16(b)(8), 66262.251, 66262.15(a)(7)]	
G300	II	**ACCUMULATION TIME (LQG) [3030012]** Facility accumulated hazardous waste on-site for longer than 90 days. ***The time between hazardous waste pick-ups exceeded 90 days for the following hazardous wastes:*** ***- Waste Coolant: from11/15/2022 to 6/22/2023*** ***- Drained/ Undrained Used Oil Filters: from 2/25/2022 to 6/9/2022, 6/9/2022 to 9/28/2022, 9/28/2022 to 1/20/2023, and 1/20/2023 to 5/9/2023*** ***As a large quantity hazardous waste generator, hazardous wastes must not be accumulated for longer than 90 days.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not accumulated on-site for longer than 90 day for a generator who generates 1000 kilograms or more of per month. [CCR 66262.17(a), 66262.34(a), (b); HSC 25123.3(b)(1)]	
G320	M	**TRAINING [3020002]** Personnel are not adequately trained on managing hazardous waste. ***According to Mr. Penninger, staff receive hazardous waste training that is documented. This documentation, however, was not available for review during this inspection, and due to the nature and number of violations observed, it is evident that staff are not implementing proper hazardous waste management practices.*** ***Within 30 days, provide documentation of a training matrix that distinguishes which training every individual employee receives.*** Provide a program of instruction that: 1) is directed by a person trained in hazardous waste management procedures; 2) teaches waste management procedures relevant to the position of each employee; and 3) ensures facility personnel are able to respond effectively to emergencies, including shutdown of operations where applicable. Provide this training within 6 months of hire, and annually thereafter. [CCR 66262.17(a)(7)(A)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G405	M	**MARKING: CONTAMINATED CONTAINERS [3030058]** Facility did not mark an empty hazardous material/waste container larger than 5 gallons in capacity with the date it was emptied. ***Observed the following containers that previously held hazardous materials or waste that were empty and not marked with the date on which they were emptied:*** ***- 1 x aboveground used oil tank*** ***- approx. 9 x 55 gal drums that previously held lubricating oils*** ***Within 30 days, mark each container with the date in which it was emptied. Within 1 year of the date marked, make arrangements to have the containers reconditioned, recycled, reclaimed for its scrap value, or returned to the supplier to be refilled.*** Mark each empty hazardous material/waste container larger than 5 gallons in capacity with the date it was emptied. [CCR 66261.7(f)]	
G412	M	**CONTAINER MARKING: USED OIL/FUEL FILTERS [3030004]** Facility failed to properly mark a container of drained used oil/fuel filters. ***Observed 1 x 5 gal bucket of filters by the filter crusher that was not marked.*** ***Within 30 days, properly mark this container.*** Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266.130(c)(3), HSC 25250.22]	
G413	M	**CONTAINER REQUIREMENTS: USED OIL/FUEL FILTERS [3030004]** A container used to hold drained used oil/fuel filters was not closed, rainproof, capable of containing oil/fuel, and/or designed to prevent the ignition of gasoline vapors when holding gasoline filters. ***Observed 1 x 5 gal bucket of filters by the filter crusher that did not have a lid.*** ***Make immediate arrangements to transfer the filters to the main drum or a properly marked container that is able to be closed.*** Ensure that drained use oil/fuel filter containers are closed and meet the above requirements. Confirm that filter containers are sealed during transfer so that no oil and/or fuel can leak out when they are laid on their sides. [CCR 66266.130(c)(3), HSC 25250.22]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135 **Inspection Date:** 06/27/2023
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G612	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE [3030]** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Observed the following in the outdoor hazardous waste accumulation area:*** ***- approximately 4 fluorescent tubes stored in a 5-gal bucket*** ***- additional fluorescent tubes stored in an unmarked storage container among other misc. hazardous waste liquids*** ***Make immediate arrangements to segregate these fluorescent tubes from other hazardous wastes. Properly mark and containerize them as specified below.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	
G613	II	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE AEROSOL CANS [3030051]** Facility failed to meet the accumulation standards for universal waste aerosol cans. ***1 x 55 gal drum of Universal Waste (aerosol cans) was observed in the locked outdoor enclosure without a lid and the required markings.*** ***Within 30 days, ensure all requirements are met for this container.*** Ensure that containers holding UW aerosol cans are labeled or marked clearly with one of the following phrases: "Universal Waste-Aerosol Cans", "Waste Aerosol Cans", or "Used Aerosol Cans"; structurally sound, and compatible with the contents of the universal waste aerosol can; show no evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; are provided with a lid so that the container can (and shall) be covered at the end of each workday; are placed in a location that has sufficient ventilation to avoid formation of an explosive atmosphere; and are placed on or above a floor or other surface that is free of cracks or gaps and is sufficiently impervious and bermed to contain leaks and spills. If holding flammable wastes shall be kept at a safe distance from heat and open flames. Incompatible materials shall be kept segregated and managed appropriately in separate containers. [HSC 25201.16(f)]	

Comments: On-site on 6/21/2023 and 6/23/2023 to perform a routine Hazardous Waste Generator inspection. Inspection concludes today with issuance of this report. A facility walk-through was conducted with Equipment Mechanic, Eric Johnson, and Compliance Officer, Frank Penninger. Observed the following hazardous waste streams:

REPAIR/ MAINTENANCE ACTIVITIES
- used oil
- waste coolant
- used oil filters
- contaminated/ solid debris
- 1 parts washer
- brake cleaner

HAZARDOUS WASTE DROP-OFF/ ACCUMULATION AREA
- liquid hazardous wastes including, but not limited to: waste oils, coolant, paints, cleaning chemicals, pool chemicals, paint thinners
- waste automotive batteries

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

- compressed gas cylinders: fire extinguishers, propane, butane
- universal wastes: bulbs/ lamps, aerosol cans

EPA ID number: CAD983597469 is active.
TSDF-signed uniform hazardous waste manifests were reviewed from 2021-2023 and are retained as required. Pick-ups for wastes generally occur at least every month.
Review of disposal documentation and the State Hazardous Waste Tracking system confirm this business is a large quantity hazardous waste generator. Approximately 15 tons of hazardous waste were shipped in 2021 as well as 2022.

Other Notes:
Fire extinguishers are annually serviced.
Absorbent material is readily available.
Shop rags and uniforms are commercially laundered.
Daily and weekly inspections of tanks and container areas are conducted and logged as required.
Facilities Hazardous Waste Generator permit will be updated from 2205 (Generates >100 kg/ yr to <5 tons/ yr) to 2206 (Generates >5 tons/ yr to <25 tons/yr).

ACTION ITEMS
1) Within 30 days, correct all violations and submit documentation of corrective actions taken as well as certification of compliance.
2) Information Request: Please provide a copy of the last hazardous waste tank system assessment for the aboveground used oil tank.

Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B107	M	**HMBP SITE MAP MISSING / INCOMPLETE [1010005]** Facility operator failed to electronically submit a Site Map with all required content as part of the facility's Hazardous Materials Business Plan (HMBP). ***The site maps most recently submitted to CERS do not clearly identify the locations of the underground storage tanks and hazardous materials located within the repair shop (compressed gases, brake cleaner), in the parking lot (propane, filters, waste absorbent), and in the locked outdoor enclosure (universal waste aerosol cans).*** ***Within 30 days, revise and resubmit to CERS.*** Within 30 days, electronically submit an HMBP, including accurate facility Site Map(s), through the California Environmental Reporting System (https://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. The map must contain a north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. [HSC 25505(a)(2), HSC 25508(a)(1), HSC 25508(a)(3), 19 CCR 2652(a)(3)]	
B130	II	**HMBP EMERGENCY RESPONSE TRAINING DOCUMENTATION [1020002]** Facility operator failed to provide initial and annual training to all employees in emergency response and safety procedures or failed to document and maintain training records for a minimum of three years. ***Facility was unable to provide documentation that training in emergency response and safety procedures has been conducted and logged. Training must be documented electronically or in hard copy and must be kept available for inspection for a minimum of 3 years.*** ***Template form provided.*** Provide initial training for new employees and annual refresher training for all employees. The training shall cover emergency and safety procedures in the event of a release or threatened release of a hazardous material, as described in the facility's Hazardous Materials Business Plan. Training must be documented electronically or by hard copy. Make a minimum of three years of training records available for inspection by HMCD. [HSC 25505(a)(4), 19 CCR 2658, 19 CCR 2659]	

Comments: On-site on 6/21/2023 and 6/23/2023 to perform a routine Hazardous Materials Business Plan (HMBP) inspection. Inspection concludes today with issuance of this report. A facility walk-through was conducted with Equipment Mechanic, Eric Johnson, and Compliance Officer, Frank Penninger. Observed the following hazardous materials at or above State-reportable threshold quantities:

1) Diesel: 2 x 12,000 gal USTs + 1 x 100 gal belly tank for an aboveground generator
2) 87-Unleaded Gasoline: 1x 12,000 gal UST
3) Acetylene: 3 x 132 cubic ft.
4) Oxygen: 1 x 125 cubic ft. cylinder + 2 x approx. 300 cubic ft cylinders
5) Used Motor Oil: 1 x 110 gal aboveground tank + 2 mobile rollers
6) New Lubricating Oils:
- 15W-40: 110 gal
- 5W-20 Shield Oil: 110 gal

DocuSign Envelope ID: E5053AC8-BC3F-46F5-A558-B81CD520ACD6

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0206135
Facility Name: CITY OF SAN JOSE - MABURY SERVICE YARD
Site Address: 1404 MABURY RD, SAN JOSE, CA 95133
Inspection Date: 06/27/2023

Summary of Violations & Notice to Comply

- AW-46: 110 gal
- Transmission Oil: 110 gal
- ATF: 110 gal
- 5W-40: 110 gal
7) New Coolant: 1 x 55 gal aboveground tank + 1 x 110 gal aboveground tank
8) Waste Coolant: 1 x approx. 80 gal poly drum
9) Propane: 2 x 7 gal cylinders + approx. 120 gal in various sizes
10) Waste Paints: >55 gal in various sizes in the outdoor accumulation area*
11) Citrus Cleaner: 1 x 55 gal drum

HMBP was last submitted to CERS on 6/15/2022, CERS ID: 10130803. This has been ACCEPTED as verified during inspection, however note related violation cited above (B107).
Facility's HMBP permit will be adjusted from BP03 (handling between 7-9 reportable hazardous materials) to BP04 (handling between 10-15 hazardous materials).

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 07/27/2023, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator **Date**

Printed Name of Owner/Operator **Title**

DocuSign Envelope ID: E5053AC8-BC3F-46F5-A558-B81CD520ACD6

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716 or via e-mail to the inspector noted on the "Inspected By" line of the report.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
CERS	California Environmental Reporting System (cers.calepa.ca.gov)
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $50,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC §§25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i), 25289(b)].

Re: Plan Check Review: SR0869864

Facility Name: City of San Jose – Mabury Service Yard
Project Location: 1404 Mabury Rd, San Jose
Project Description: Replace Mechanical Overfill Prevention Valve for Tank #1 and #3 Diesel Fuel Underground Storage Tanks.

Santa Clara County Hazardous Materials Program has reviewed the submittal for the project referenced above and **approves the plans with the following conditions**:

1. Equipment shall be configured as described in the enclosed approved Hazardous Materials Construction Permit Application and Equipment List for Underground Storage Tank Systems.
2. The contractor shall follow manufacturers' installation, inspection, and testing requirements.
3. Installation and testing of overfill prevention equipment shall be performed or directly supervised by an individual with current ICC California UST Service Technician certification and manufacturers' training certifications.
4. Copies of tank charts, measurements, and calculations associated with installation of overfill prevention valves shall be kept available on-site until final inspection sign-off and shall be submitted as attachments with the Overfill Prevention Equipment Inspection Report Form via email to USTinspector@deh.sccgov.org within 30 days of the installation inspection.
5. The contractor shall demonstrate, at the time of final inspection, that new mechanical overfill prevention valves are properly installed to positively shut-off flow at no more than 95% of tank capacity.
6. Contact inspector **Loren Lim** a minimum of 2 working days in advance at **(408) 918-1915** or **loren.lim@cep.sccgov.org** to schedule an inspection to witness installation inspection of the new overfill prevention equipment in accordance with 23 CCR §2637.2.
7. Businesses shall remain alert to changes and modify actions as necessary to maintain compliance with the health orders related to COVID-19. Current information and FAQs are available at **www.sccgov.org/sites/phd**.

A copy of this letter and all attachments shall remain on the job site until final inspection sign-off by HMCD.

Any substitution of equipment as described in approved plans requires prior approval from HMCD.

Board of Supervisors: Mike Wasserman, Cindy Chavez, Otto Lee, Susan Ellenberg, Joe Simitian
County Executive: Jeffrey V. Smith

Plan check approval by the City of San Jose Building Department and San Jose Fire Department may also be required prior to beginning work.

A copy of this letter and all attachments shall remain on the job site until final inspection sign-off by HMCD.

Should you have any questions, please contact the undersigned at (408) 918-1915 or loren.lim@cep.sccgov.org.

SCOPE OF WORK
Overfill Valve Replacement

City of San Jose – Mabury Service Yard
1404 Mabury Rd.
San Jose, CA 95133

Overfill Valve Replacement

- Obtain permit from the Santa Clara County Environmental Health Department to install two new overfill prevention valve for the diesel tanks.
- Remove existing valves from tank #1 and tank #3.
- Provide and install two new OPW 71SO testable overfill prevention valves.
- Perform testing as described below:
  - Removal of the drop tube to confirm operability of the float and shutoff mechanism.
  - Verify proper device activation height for volume of tank at shutoff.
- Reinstallation of the drop tube, and tightness test to confirm system is “vapor tight,” if required.

Underground Storage Tank
Overfill Prevention Equipment Inspection Report

6. OVERFILL PREVENTION EQUIPMENT DETAILS				
Tank ID *(one OPE per column)*	**T1 - Diesel**	**T3 - Diesel**		
Are both vent and tank riser piping secondarily contained?	☐ Yes ☒ No	☐ Yes ☒ No	☐ Yes ☐ No	☐ Yes ☐ No
OPE Model	**OPW**	**OPW**		
What is the OPE response when activated? *(Check all that apply.)*	☒ Shut off Flow ☐ Restricts Flow ☐ Audible Alarm ☐ Visual Alarm	☒ Shut off Flow ☐ Restricts Flow ☐ Audible Alarm ☐ Visual Alarm	☐ Shut off Flow ☐ Restricts Flow ☐ Audible Alarm ☐ Visual Alarm	☐ Shut off Flow ☐ Restricts Flow ☐ Audible Alarm ☐ Visual Alarm
Are flow restrictors installed on vent piping that may interfere with the OPE operation?	☐ Yes* ☒ No	☐ Yes* ☒ No	☐ Yes* ☐ No	☐ Yes* ☐ No
At what level in the tank is the OPE set to activate? *(Inches from bottom of tank)*	**69"**	**68.5"**		
What is the percent capacity of the tank at which the OPE activates?	**83.3%**	**82.7%**		
Is the OPE in proper operating condition to respond when the stored substance reaches the designated regulatory level?	☒ Yes ☐ No	☒ Yes* ☐ No	☐ Yes* ☐ No	☐ Yes* ☐ No

7. SUMMARY OF TESTING RESULTS				
OPE Inspection Results	☒ Pass ☐ Fail	☒ Pass ☐ Fail	☐ Pass ☐ Fail	☐ Pass ☐ Fail

8. COMMENTS

Describe all answers marked "No" or "Fail" and proposed remedy.
List all monitoring equipment either replaced or repaired.

-This was for the permit sign-off for permit SR0869864.

* Mark here if:
☐ Flow restrictors interfere with overfill prevention and equipment repairs required.

Additional copies of this page may be attached.

Attach tank chart(s), measurements, calculations, and In-Tank Setup report(s)

Appendix B

71SO Overfill Valve in Tank Shut off Level Worksheet

Important: This is meant to be supplemental worksheet and not a substitute to following the installation manual instructions. All length measurements are in inches. Please contact the Authority Having Jurisdiction (AHJ) and review local, state, and national codes to determine the regulatory requirements governing shut-off capacity in your region, as well as take into account other considerations such as extreme tank tilt.

Take the following measurements with the valve installed in the tank:

Distance from the 71SO inlet tube flange to the cast lug in the 71SO body (see figures), upper tube length.
Note: the Upper Tube Length must be at least 16" to include the protective bend in the tube.

(D) = 80.5"

Distance from the 71SO inlet tube flange to the top and bottom of lower tube, valve length.

(W) = 146.5"

(U) = 150"

Distance from the 71SO inlet tube flange to the bottom of the tank. Note: If a tank bottom protector is present it may be necessary to add this thickness to dimension (OPW 6111 & 61TP models add 0.6")

(B) = 151.5"

From the tank calibration chart provided by tank manufacturer find the dipstick number (Y) which corresponds to the 100% volume.

(Y) = 89.75"

1. To determine shut-off percentage:
Subtract upper tube length (D) from distance to tank bottom (B)

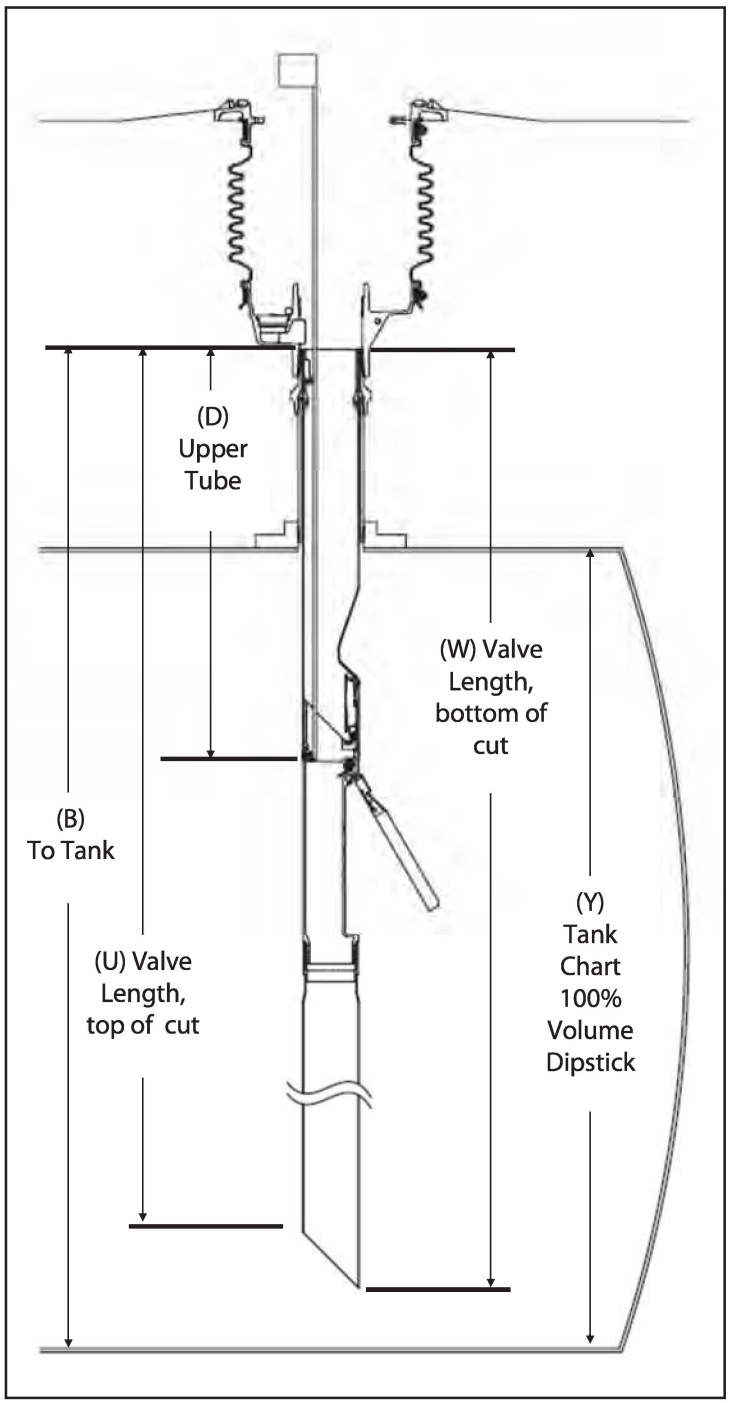

(X) = (B) – (D) - 2" = 69"

Using the tank calibration chart provided by the tank manufacturer determine the tank capacity at the calculated (X) dimension and the 100% volume (Y) tank capacity.

(X) tank capacity in gallons = 9604

(Y) tank capacity in gallons = 11527

SO% = (X) capacity / (Y) capacity x100 = 83.3%

Note: The overfill valve must be installed per AHJ requirements and all applicable local, state, and national codes. If the overfill valve is set above the allowable shut-off percentage the overfill valve must be removed and replaced. For reference 40 CFR part 280 Subpart B Section 280.20 overfill valves should be set to a maximum of 95%.

Appendix B

71SO Overfill Valve in Tank Shut off Level Worksheet

Important: This is meant to be supplemental worksheet and not a substitute to following the installation manual instructions. All length measurements are in inches. Please contact the Authority Having Jurisdiction (AHJ) and review local, state, and national codes to determine the regulatory requirements governing shut-off capacity in your region, as well as take into account other considerations such as extreme tank tilt.

Take the following measurements with the valve installed in the tank:

Distance from the 71SO inlet tube flange to the cast lug in the 71SO body (see figures), upper tube length.
Note: the Upper Tube Length must be at least 16" to include the protective bend in the tube.

(D) = 85.5"

Distance from the 71SO inlet tube flange to the top and bottom of lower tube, valve length.

(W) = 151.5"

(U) = 154.5"

Distance from the 71SO inlet tube flange to the bottom of the tank. Note: If a tank bottom protector is present it may be necessary to add this thickness to dimension (OPW 6111 & 61TP models add 0.6")

(B) = 156"

From the tank calibration chart provided by tank manufacturer find the dipstick number (Y) which corresponds to the 100% volume.

(Y) = 89.75"

1. To determine shut-off percentage:
Subtract upper tube length (D) from distance to tank bottom (B)

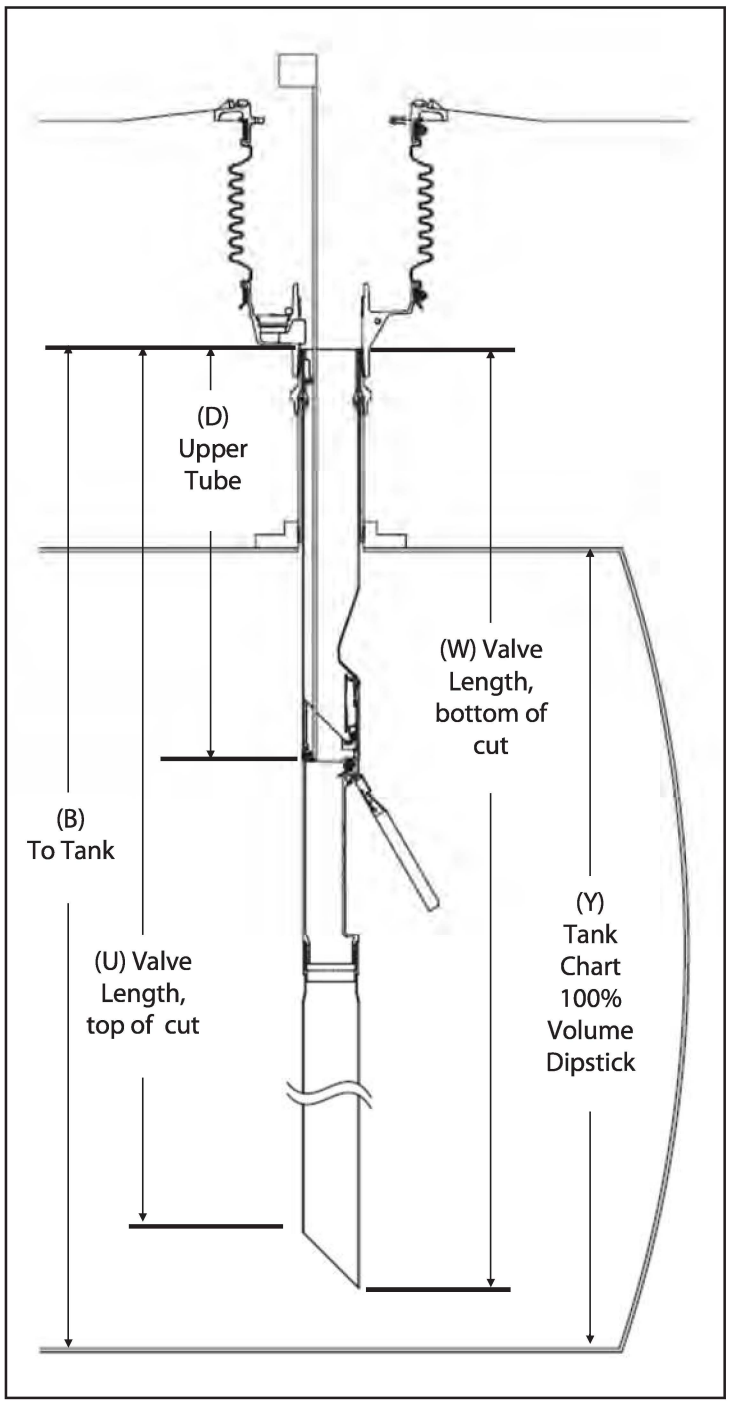

(X) = (B) – (D) - 2" = 68.5"

Using the tank calibration chart provided by the tank manufacturer determine the tank capacity at the calculated (X) dimension and the 100% volume (Y) tank capacity.

(X) tank capacity in gallons = 9535

(Y) tank capacity in gallons = 11527

SO% = (X) capacity / (Y) capacity x100 = 82.7%

Note: The overfill valve must be installed per AHJ requirements and all applicable local, state, and national codes. If the overfill valve is set above the allowable shut-off percentage the overfill valve must be removed and replaced. For reference 40 CFR part 280 Subpart B Section 280.20 overfill valves should be set to a maximum of 95%.

OPW Installation & Maintenance Instructions

ASSEMBLY, INSTALLATION, AND MAINTENANCE INSTRUCTIONS FOR OPW 61SO VAPOR TIGHT, OVERFILL PREVENTION VALVES.

IMPORTANT: Please read these assembly and installation instructions completely and carefully before starting.

Vapor Tight Overfill Prevention Valves

GENERAL INSTRUCTIONS

The OPW 61SO Overfill Prevention Valve is designed for tight fill, gravity drop applications to help prevent accidental or intentional overfilling of underground storage tanks. It is installed in the UST drop tube in place of a standard drop tube. The main 61SO valve closes when liquid level is at 95% of the top of the tank. A small bypass valve remains open to allow the delivery hose to drain at 3-5 gallons per minute. If the delivery truck valve is not closed after initial shut-off, the bypass valve will close and will restrict all fuel delivery.

The 61SO EVR approved models of the 61SO are designed to be installed with the following OPW products: Face Seal Adapter, Spill Container or Multi-port, Jack Screw Kit, Rotatable Product Adaptor, and Product Cap.

IMPORTANT
Read these assembly and installation instructions completely and carefully prior to starting. Check to make sure all parts have been provided. Use only the parts supplied; substitution of parts may cause product failure.

Failure to follow instructions may cause improper product operation or premature failure which may permit storage tank overfill. An overfilled storage tank may create hazardous conditions and/or environmental contamination.

CAUTION
Do not remove elastic band from around float until instructed to do so, as damage to valve may result.

WARNING
Failure to properly connect delivery hose and elbow, and/or disconnecting a liquid filled delivery hose or elbow will result in a hazardous spill, which may result in personal injury, property damage, fire, explosion, and water and soil pollution.

* Make sure all connections, including the hose and elbow connections, between storage tank and transport are securely coupled.
* Make sure the lip seal and/or all gaskets in the delivery elbow are properly in place to prevent spills.
* Do not operate with damaged or missing parts, which prevent tight connections.

Normal Operation: A Hose "Kick" and reduced flow signal that the tank is full. Close transport delivery valve and drain hose into tank before disconnecting any hose fitting.

Overfilled Tank: Failure of the hose to drain after closing the delivery valve signals an overfilled tank. Do Not Disconnect any delivery hose fitting until the liquid level in the tank has been lowered to allow the hose to drain into the tank. Attention: In the event you are splashed, remove all wetted clothing immediately. Do not go into an enclosed area and stay away from ignition sources.

IMPORTANT
Determine if the underground storage tank is equipped with a ball float vent valve, as illustrated in Figure 16. In all systems, the shut-off point of the 61SO must be reached before the ball float reduces flow to ensure proper overfill valve operation.

TOOLS NEEDED FOR INSTALLATION AND ASSEMBLY:

1. Drill
2. A sharp 1/8" pilot drill bit
3. A sharp 5/16" drill bit
4. Tape measure
5. Hacksaw or cut-off saw, fine tooth; 24 teeth/inch
6. Fine half round file
7. Screwdriver - Phillips blade
8. ½" Wrench or socket
9. Two-part sealant (Supplied)
10. Torque Wrench

WARNING
Using electrically operated equipment near gasoline or gasoline vapors may result in fire or explosion, causing personal injury and property damage. Check to assure the working area is free from such hazards, and always use proper precautions.

IMPORTANT: The figures in this installation and maintenance instruction may contain vapor recovery equipment (including model numbers) that is not certified by the California Air Resources Board (CARB) for a specific Phase I Vapor Recovery System. Please refer to Exhibit 1 of the appropriate CARB Phase I Executive Order for a list of certified Phase I Vapor Recovery System Equipment.

HOW TO LOCATE THE POSITION OF THE 61SO AT 95% TANK CAPACITY

The length of the upper tube and the placement of the 61SO valve body determine the shut-off point. Following the standard instructions for the OPW 61SO will provide for initial shutoff at 95%. In all cases, the upper tube length must be a minimum of 6-1/2" plus the length of the riser pipe. All length measurements are in inches.

INSTRUCTIONS

1.) Find tank capacity (in gallons) from tank calibration chart provided by tank manufacturer.

2.) Calculate 95% of capacity.

3.) Locate the 95% volume number on the tank calibration chart.

4.) Find the dipstick number (X) which corresponds to the 95% tank volume. And, find the dipstick number (Y) which corresponds to the 100%volume.

5.) Subtract the dipstick number (X) from the tank diameter (Y) to find the upper tube reference number (Z).
(Y) - (X) = (Z)

6.) Subtract 2" from (Z) to find the upper tube depth (C).
(Z) - 2" = C

7.) Is C less than 6-1/2"?

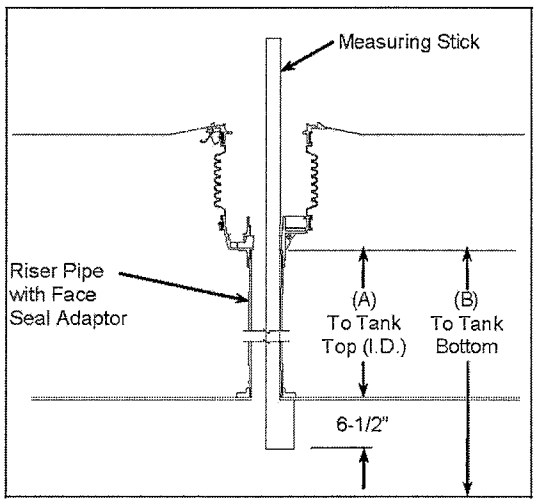

NO Upper tube length is C plus the distance from the top of the FSA-400 Face Seal Adaptor installed on the riser pipe to the inside, top lip of the storage (A).

Upper Tube Length = C + (A)

YES Upper tube length is 6-1/2" plus the riser pipe measurement (A).

Upper Tube Length = 6-1/2" + (A)

NOTE: You must find the actual tank capacity number that correlates to the 6-1/2" + (A) depth for the station records. This number may also be used for the purposes of calibrating an electronic tank level system.

EXAMPLE

1.) For an Owens-Corning Model G-3 Fiberglass® Tank Calibration Chart:
Tank Capacity - 10,000 gal., nominal 9,403 gal.
NOTE: Use actual capacity only

2.) 95% of actual tank capacity = 0.95 x 9403 gal. = 8933 gal.

3.) The closest number which is less than 8933 gal. Is 8910 gal. Choosing the closest number less than 95% of actual capacity ensures that the initial shutoff will occur when the tank is no more than 95% full.

4.) The calibration chart reading of 8910 gal. corresponds to a dipstick measurement of 82".

5.) Dipstick number (X) = 82"
Tank diameter (Y) = 92"
(Y) - (X) = (Z) (92 "- 82" = 10")
(Z) = 10"

6.) (Z) - 2" = C (10" - 2" = 8")
C = 8"

7.) Is 8" less than 6-1/2"?

NO Measure the distance from the top of the Face Seal Adaptor installed on the riser pipe to the inside, top lip of the storage tank and obtain measurement (A).

Upper tube length = C + (A)

® Registered T.M. - Owens Corning Fiberglass Corporation

ASSEMBLY INSTRUCTIONS

IMPORTANT: Each of the numbered steps in the installation instructions are designed as a CHECK LIST to insure proper installation and trouble free operation of the OPW 61SO Overfill Prevention Valve.

Read and follow these steps carefully, checking them off as you proceed.

Figure numbers correspond to step numbers for easy reference.

STEP 1: MEASURE
Install the OPW Face Seal Adaptor and the Thread-on Spill Container on the Fill Riser (Refer to the Installation Instructions Supplied with the Spill Container). Insert the 61SO measuring stick through the riser pipe and hook it under the inside of the tank in the lengthwise direction. Mark the measuring stick at the top of the Face Seal Adaptor threads inside the base of the spill container bucket just below the drain valve outlet window (See Figure 1 &1A). The top flange on the 61SO will rest on the Face Seal Adaptor just below the drain valve outlet, and be locked in place between the Face Seal Adaptor and the 4" nipple that is installed in the spill container with the Jack Screw Kit (See Figure 1A). (For riser pipe configurations other than that shown, consult installation drawings or use other necessary means to measure Dimension "A").

Using a tape measure, measure the distance from the top of the Face Seal Adaptor in the spill container to the bottom of the tank (Dim. "B").

IMPORTANT: Inspect the riser pipe for any foreign material. Over spray from tank relining or any internal burrs inside of pipe must be removed prior to installation. Failure to have an unobstructed riser pipe may prevent proper installation and operation of the valve. The 61SO is designed to be installed into schedule 40 riser pipes. The 61SO cannot be installed into schedule 80 riser pipes.

STEP 2: MARK THE TUBE
Use the result from STEP 1 and HOW TO LOCATE THE POSITION OF THE 61SO AT 95% TANK CAPACITY to mark the upper tube. Measure the distance from the point where the upper tube and valve body meets. For "C" measurements lass than or equal to 6-1/2" see Figure 2. For "C" measurements greater than 6-1/2" use tape measure to mark the calculated upper tube length onto the upper tube.

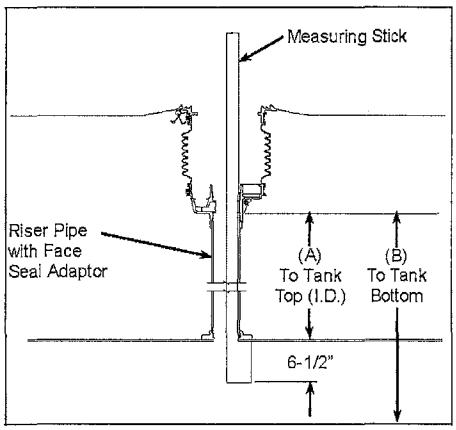

Figure 1

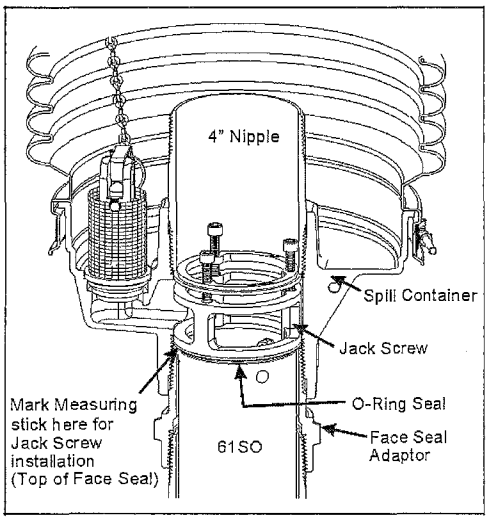

Figure 1A

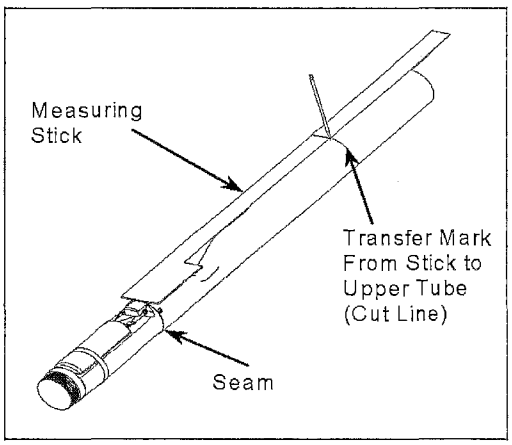

Figure 2 (For "C" less than or equal to 6-1/2 " only)

STEP 3: CUT THE UPPER DROP TUBE
Carefully saw through the tube squarely, at the mark made in Step 2. Use a hacksaw with a new fine-tooth blade. Rotating the upper tube as the sawing progresses will minimize run out and ensure a square 90-degree cut. A piece of paper, taped square with the tube or a hose clamp can be used as guides for making a square cut.
CAUTION -DO NOT use a pipe or tubing cutter to cut the upper drop tube, this may damage the tube, causing it to be out of round thereby prohibiting assembly of the unit.

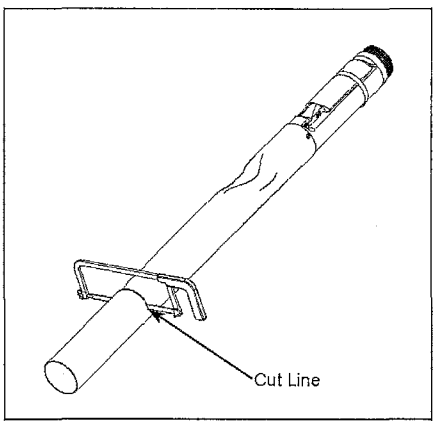

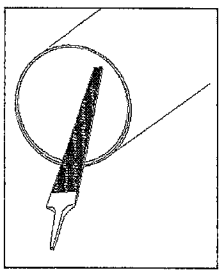

Figure 3

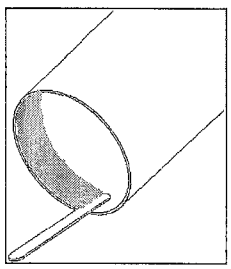

STEP 4: FILE THE DROP TUBE
File the upper tube square and remove any burrs or rough edges. Make sure the cut is flat and square.

Figure 4

IMPORTANT: Carefully file a **good chamfer** on the inside of the drop tube to provide a lead-in for the o-ring and inlet tube to be installed in step 6.

Caution: Failure to properly apply and cure sealant may result in a failure of a pressure decay leak test.

STEP 5: APPLY SEALANT
Prepare sealant by thoroughly mixing 1/3 of each packet together until color is uniform. Generously apply sealant to the inside diameter of the upper drop tube. Make sure coverage is completely around the tube as shown in Fig. 5.

Figure 5

STEP 6: INSTALL INLET TUBE
Install o-ring in the o-ring groove of inlet tube (DO NOT USE GREASE). Insert the inlet tube into the upper tube until it seats against the flange on the upper inlet tube.

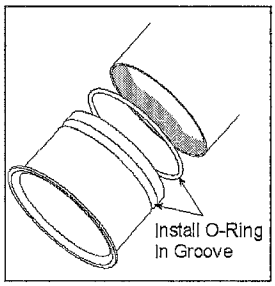

Figure 6

STEP 7: DRILL HOLES
With the inlet tube in place, carefully drill (3) 1/8" diameter pilot holes through the drop tube and inlet tube at three locations at 120 degree intervals around the tube, 1 inch below the flange. Using the pilot holes, drill (3) 5/16" dia. holes through the tubes. Remove the burrs from the drilling operation from the inside of the drop tube assembly with a fine half round file.
IMPORTANT: A 5/16" drill bit must be used. Do not substitute any other size drill bit.

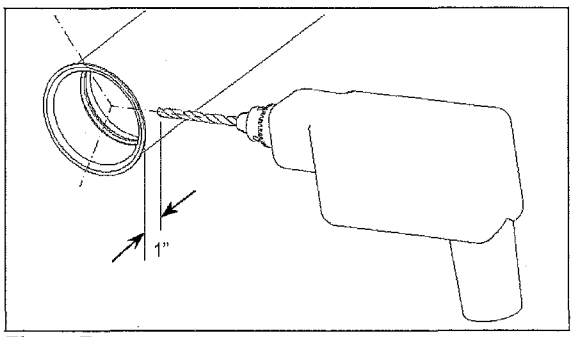

Figure 7

STEP 8: ASSEMBLE AND SEAL CLINCH STUDS
Loosely assemble the three (3) clinch studs, lock washers, and nuts in holes. Do not tighten at this time. Mix up a small amount of sealant. Generously apply sealant underneath each clinch stud head, each nut, and on the outside of the tube around the holes.

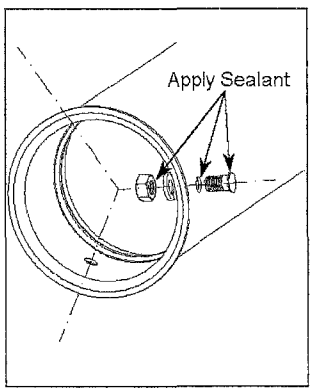

Figure 8

STEP 9: TIGHTEN SELF-CLINCHING STUDS
Tighten clinch studs securely with a ½" wrench. Use only the self-clinching studs that are supplied with the unit. Seating torque is 11.5 ft-lbs min. to 13.5 ft-lbs max. Do not over tighten.
Note: Failure to properly apply and cure the sealant may result in a failure of a pressure decay leak test.

STEP 10: LOWER TUBE ASSEMBLY
If a vise is used, clamp on the valve body casting only to avoid damage to the float. Mix the remaining sealant until the color is uniform. Using the mixing stick, **generously apply sealant to the first 6 male threads on the valve body** as shown in figure 10. Make sure coverage is completely around the threads, and work the sealant down into the thread profile. Quickly thread the lower tube onto the valve body. Tighten the tube securely by hand or with a strap wrench. Remove excess sealant and smooth sealant bead with water moistened mixing stick.

Important: Allow sealant (epoxy) to cure for 24 hours before installing into tank.

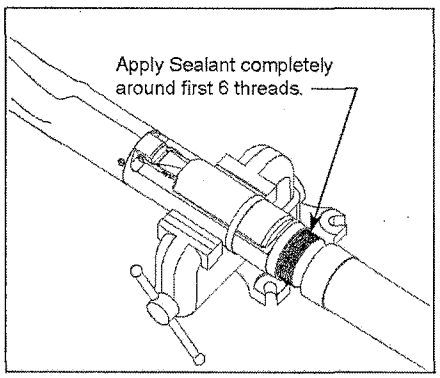

Figure 10

Note: Before installing the valve in the tank, a pressure test can be performed on the valve to check for vapor tightness. Seal off both ends of the tube with inflatable plumber's plugs. Apply a maximum 10" W.C. (1/3 PSI) air pressure. If pressure does not hold and a leak can be located with soap solution, do not install the valve. Send the valve back to OPW for warranty evaluation.
Caution: Do not over-pressure. Excess pressure can damage the valve

STEP 11: CUT LOWER TUBE AT 45° ANGLE
Measuring from the underside of the inlet tube flange, mark the overall length of the drop tube a distance of (B) minus 6". Determine dimension (B) from the measurements taken in Step 1, Figure 1 (Top of the Face Seal Adaptor below the drain valve outlet in the spill container to the bottom of the tank). Saw off the excess tube at a 45-degree angle or per local codes or requirements, and file off any sharp burrs (Refer to Figure 16). Optional: Install the OPW Tank Bottom Protector on the lower tube (Refer to Installation instructions supplied with the Tank Bottom Protector).

STEP 12: PREPARE FILL RISER FOR VALVE INSERTION

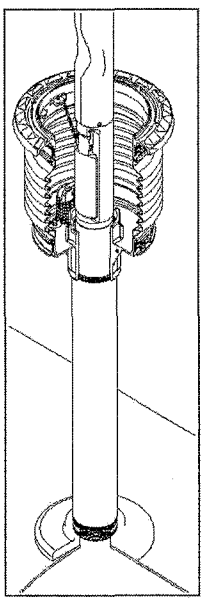

IMPORTANT: Inspect the riser pipe for any foreign material. Over spray from tank relining or any internal burrs inside of pipe must be removed prior to installation. Failure to have an unobstructed riser pipe may prevent proper installation or operation of the valve. Thoroughly clean top of riser pipe.

Important: Before installing the valve, allow sealant to cure for 24 hours.

STEP 13: REMOVE ELASTIC BAND
Remove the elastic band securing the float to the valve body. The float will move into an outward position.

STEP 14: INSERT DROP TUBE
Make sure the O-Ring gasket is under the flange of the inlet tube. Hold the float down against the valve body and slowly insert the drop tube overfill valve into the riser pipe. Do not force valve into the riser pipe. If any obstruction or foreign matter interferes with smooth insertion of the valve, the riser pipe must be cleared.

WARNING
Failure to follow the assembly and installation instructions or use of excessive force to insert the OPW 61SO will VOID THE WARRANTY!

Figure 14

Difficulty in removing the existing fill tube (if there is one) means there may be an obstruction in the riser pipe. Look for burrs, deformations, excess tank lining material or other projections that may interfere with easy insertion of the OPW 61SO. The 61SO is designed for insertion into schedule 40 pipe. If schedule 80 pipe has been

used for the riser, the 61SO can not be installed. If seamed pipe has been used, the internal weld bead may interfere with the OPW 61SO and prevent installation. If the OPW 61SO won't slip in easily DON'T FORCE IT! Damage to the valve may result if excess force is used. Examine the riser pipe carefully; determine the nature of the obstruction; take appropriate steps to remove it.

STEP 15: CHECK INSTALLATION

Insert the drop tube all the way into the tank until the flange and gasket seat onto the top of the Face Seal Adaptor. The float will swing out into the operating position as it passes into the tank. Make sure that the float is aligned along the length of the tank. The length of the tank can easily be determined by locating other manholes or pump boxes that are installed around other tank fittings. Look into the drop tube and align the deflector with the length of the tank. **CAUTION:** No obstruction in the tank can be within 13" from the center of the riser pipe or the valve may not operate properly.

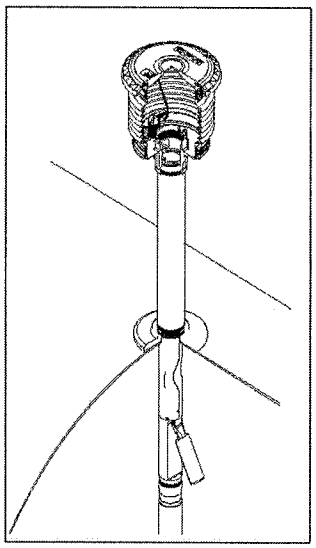

Figure 15

STEP 16: ALIGN VALVE

Install the OPW Jack Screw Kit and a 4" nipple to lock the valve in place. Refer to the Installation Instructions supplied with the Jack Screw Kit. Install the Rotatable Product Adaptor (Refer to Installation Instructions supplied with the Rotatable Product Adaptor.) Make sure that the valve does not rotate while tightening the adaptor by observing the position of the deflector. **The valve must remain aligned along the length of the tank as in Step 15**. Repeat this step as necessary to assure proper valve alignment.

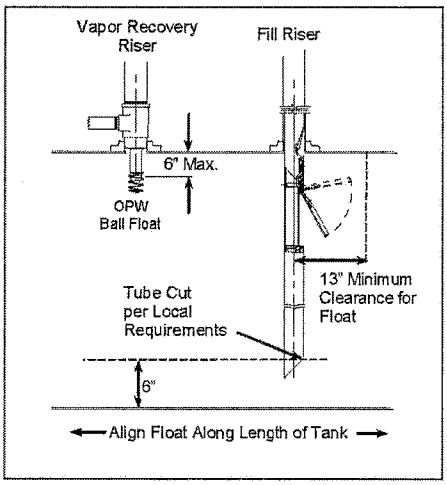

Figure 16

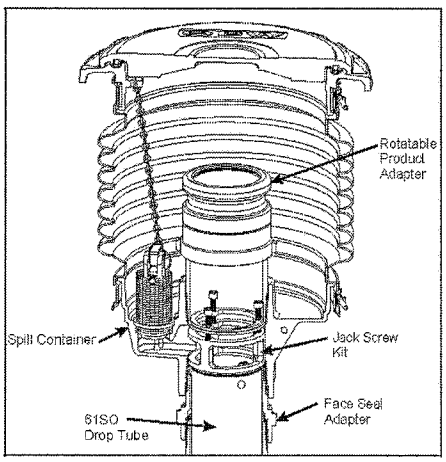

Figure 16A

STEP 17: INSTALL WARNING PLATE

Slide the tie wrap over the warning plate ears and position warning plate against riser pipe approximately 1" below the adaptor. Tighten the tie wrap securely. The valve is now fully installed and in operating position.

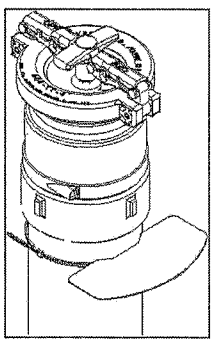

Figure 17

STEP 18: VALVE REMOVAL

The valve can be removed for tank leak testing, inspection, etc., by removing the Rotatable Product Adaptor, the 4" nipple, and the Jack Screw Kit. Reinstall per the above instructions.

Step 19: Electronic Liquid Level Monitoring
If an electronic level monitor is installed, it must be calibrated to match the top of the 61SO valve body, which must correlate with 95% of the actual tank capacity.

PREVENTATIVE MAINTENANCE
Annually, inspect the flapper in the 61SO to see that it is open by looking down the drop tube opening. Test the 61SO drop tube seals with CARB procedure TP-201.1D. If the drop tube seal passes testing, no further maintenance is required. If the drop tube fails testing, replace the drop tube seal with OPW P/N: H11931M for 4" Tubes. Re-test the 61SO drop tube with CARB procedure TP-201.1D. If this does not correct the leak the 61SO needs to be replaced.

CAUTION: Do not insert any foreign object into drop tube if flapper is in the closed position. For example a tank level measuring stick. This will damage the valve and void the Warranty. ALWAYS check flapper location before "sticking" the tank. If flapper is in the closed position the tank is either over filled and you need to wait until the liquid level goes down or the 61SO is damaged and needs to be replaced.

61SO Performance Specifications:
This Overfill Prevention Valve has been manufactured and tested to, and met, the following California specifications. Performance Requirement: Leak rate to be less than or equal to 0.17 CFH @ 2.0" W.C.

Torque Specification:
Self-Clinching Studs, 5/16-8 UN thread, 11.5 ft-lbs minimum to 13.5 ft-lbs maximum.

Important: Leave these installation instructions and maintenance procedures with the station operator.

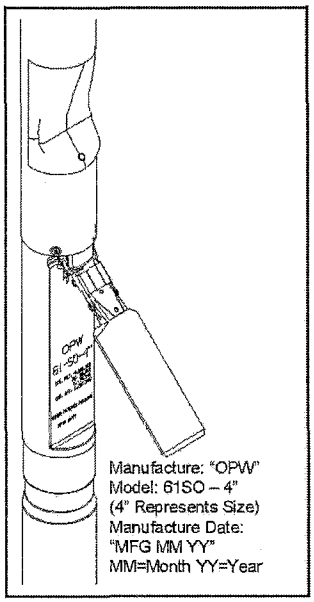

Notice: OPW products must be used in compliance with applicable federal, state, and local laws and regulations. Product selection should be based on physical specifications and limitations and compatibility with the environment and material to be handled. All illustrations and specifications in this literature are based on the latest production information available at the time of publication. Prices, materials, and specification are subject to change at any time, and models may be discontinued at any time, in either case, without notice or obligation.

Standard Product Warranty

OPW warrants that products sold by it are free from defects in materials and workmanship for a period of one year from the date of manufacture by OPW (ECO products two years from date of manufacture.) Proof of purchase may be required. As the exclusive remedy under this limited warranty, OPW, will at its sole discretion, repair, replace, or issue credit for future orders for any product that may prove defective within the one year date of manufacture period (repairs, replacements, or credits may be subject to prorated warranty for remainder of the original warranty period, complete proper warranty claim documentation required.) This warranty shall not apply to any product that has been altered in any way, which has been repaired by any party other than a service representative authorized by OPW, or when failure is due to misuse, or improper installation or maintenance. OPW shall have no liability whatsoever for special, incidental or consequential damages to any party, and shall have no liability for the cost of labor, freight, excavation, clean up, downtime, removal, reinstallation, loss of profit, or any other cost or charges.

For any product certified to California 2001 standards, OPW warrants that product sold by it are free from defects in material and workmanship for a period of one year from date of manufacture or one year from date of registration of installation not to exceed 15 months from date of manufacture by OPW.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, AND SPECIFICALLY THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THERE ARE NO WARRANTIES, WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF.

Test End Time (T_F):	10:00 AM	10:00 AM	2:00 PM	
Final Reading (R_F):	11.500"	11.500"	11.500"	
Test Duration ($T_F - T_I$):	1 hour	1 hour	1 hour	
Change in Reading ($R_F - R_I$):	0"	0"	0"	
Pass/Fail Threshold or Criteria:	<1/8"	<1/8"	<1/8"	
Test Result:	☑ **Pass** ☐ Fail	☑ **Pass** ☐ Fail	☑ **Pass** ☐ Fail	

Comments – *(include information on repairs made prior to testing, and recommended follow-up for failed tests)*

T3 Spill bucket failed due to bad drain valve, replaced drain valve and retested the spill bucket with passing

6. SPILL BUCKET AND CONTAINMENT SUMP TESTING

6.1 General. Spill buckets and containment sumps for tank systems are neither intended nor designed for the storage of petroleum products, but rather to contain small leaks and spills for short periods of time. This section describes the procedures used to test the integrity of spill buckets and containment sumps to ensure that they do not leak.

6.2 Spill Bucket Integrity Testing — Hydrostatic Test Method.

WARNING: Do not use fuels such as gasoline, E85 or diesel as a test fluid because they present a serious fire and safety hazard. Gasoline vapors are flammable and can explode if exposed to an ignition source such as a spark or open flame. If a tank or containment area is not tight, using fuel as the test fluid will cause a release into the soil or groundwater.

6.2.1 Purpose. This method is used to test the integrity of single-walled spill buckets or the primary containment of secondarily contained spill buckets.

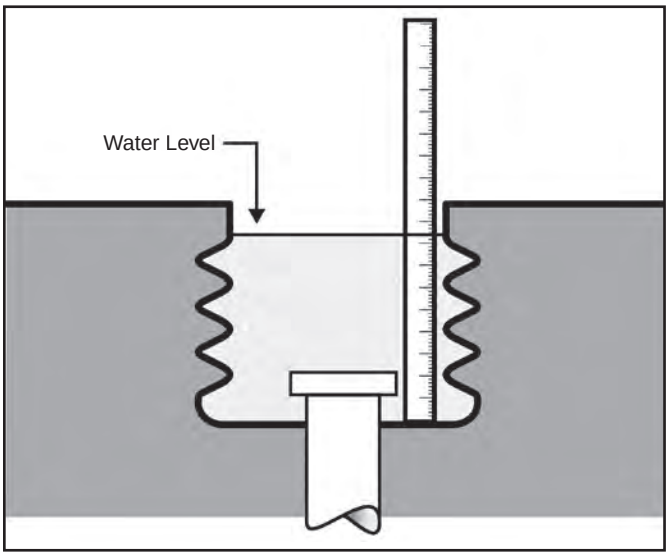

FIGURE 6-1. *The hydrostatic method of determining spill bucket integrity uses water to detect leaks. The measuring stick must be placed in the same location at the beginning and end of the test period to ensure accurate water level readings.*

6.2.2 Description of Test. The spill bucket is filled with water. The water level is measured at the beginning and end of the test.

6.2.3 Test Equipment. Test equipment shall include:

- water;
- measuring stick that is accurate to within 1/16 (0.063) inch and of sufficient length;
- plumber's plug (appropriate size, if used);
- stopwatch or other time-measurement device capable of measuring a 1-second increment.

6.2.4 Preparation.

1. Care should be taken when conducting the test in the rain or during freezing weather conditions.
2. Remove and properly dispose of any liquid and debris (leaves, sediment and trash) in the spill bucket. Clean the spill bucket and examine it for damage, defects or improperly installed components. If there are loose components (e.g., loose band clamps or bolts), tighten these items before conducting the integrity test. If there are items that must be repaired or replaced (e.g., deteriorated gaskets/seals or drain valves), notify the owner/operator.
3. Examine the fill cap and adapter fitting for loose, missing or damaged parts, and make necessary repairs. Complete any repairs before putting water in the spill bucket. Make sure that the seal on the fill cap is present and in good condition. The cap must fit securely and be leak-tight on the riser. The water level during the test typically will be above the cap, so a leaking cap will result in a failed test. As an alternative to a tight-fill cap, use a plumber's plug in the fill riser if approved by the authority having jurisdiction (AHJ) and tank owner.
4. The spill bucket drain valve, if present, must be leak-tight to pass the test. If it is not leak-tight, it may be possible to simply remove and permanently plug the drain valve. However, if you choose to permanently plug, ensure that the local regulations allow this modification.
5. If the spill bucket is found to have cracks, loose parts or separation of the bucket from the fill pipe, it is not considered to be liquid-tight. This visually indicates a test failure.

Copyrighted material licensed to Maha Jabari on 2017-07-19 for licensee's use only.
No further reproduction or networking is permitted. Distributed by Clarivate Analytics (US) LLC, www.techstreet.com.

NOTE: If the fill cap is not included in the spill bucket test and/or the cap is not tight, it could be the source of potential fuel contamination from water intrusion.

NOTE: Before permanently plugging, ensure that local regulations allow the drain valve to be permanently plugged.

6.2.5 Test Procedure.

1. Add water to the spill bucket to a level within 1.5 inches of the top of the spill bucket. Allow the water to settle for 5 minutes before the initial water level measurement is taken.
2. Place the measuring stick vertically at the lowest point in the spill bucket and extending above the water level to allow for an accurate measurement to be taken. The location of the measuring stick must remain the same for each water level measurement. Document the initial water level measurement as measured from the bottom of the spill bucket. Alternative measurement methods may be used provided that measurement to 1/16 (0.063) inch can be made.
3. Take all precautions to prevent the water level from being disturbed during the duration of the test.
4. After 1 hour, document the ending water level measurement.
5. Upon completion of the test, remove and dispose of the water according to Section 6.7, and dry the inside of the spill bucket before returning it to service.

6.2.6 Pass/Fail Criteria. If the water level has dropped less than 1/8 (0.125) inch, the spill bucket passes the integrity test.

If the water level has dropped 1/8 (0.125) inch or greater, the spill bucket fails the integrity test.

6.3 Spill Bucket Integrity Testing — Vacuum Test Method.

6.3.1 Purpose. This method is used to test the integrity of single-walled spill buckets or the primary containment of secondarily contained spill buckets.

6.3.2 Description of Test. Using a specially equipped test cover, a partial vacuum is applied to the spill bucket. The vacuum level is monitored for a 1-minute period.

6.3.3 Test Equipment. Test equipment shall include:

- vacuum test apparatus (The test apparatus may be available from the spill bucket manufacturer. It includes an air pressure regulator, a vacuum source, a vacuum gauge with a minimum 0-50 inch water column range and a control valve. The control valve is used to adjust the vacuum level.);
- test cover (The cover is equipped with a test fitting.);
- plumber's plug (appropriate size, if used);
- stopwatch or other time-measurement device capable of measuring a 1-second increment;
- gasketing material (The purpose of the gasketing material is to provide an air-tight seal between the test cover and the spill bucket.).

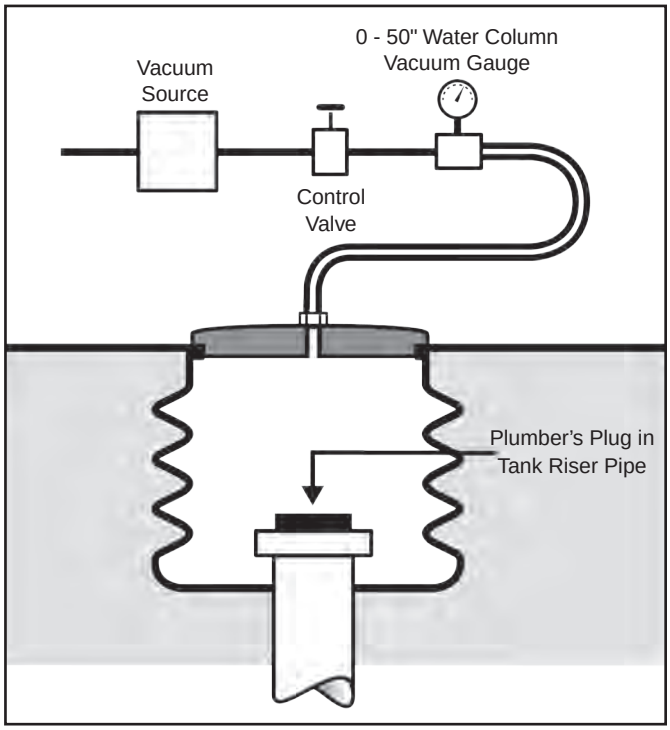

FIGURE 6-2. *The cover must make a tight seal with the spill bucket to prevent leakage when the vacuum is pulled during the test.*

WARNING: Use only an air-operated vacuum source or a vacuum pump powered by an explosion-proof motor. Vacuum pumps with electric motors that are not

**** DETERMINATION OF NO HAZARD TO AIR NAVIGATION ****

The Federal Aviation Administration has conducted an aeronautical study under the provisions of 49 U.S.C., Section 44718 and if applicable Title 14 of the Code of Federal Regulations, part 77, concerning:

Structure:	Billboard Mission 20x60
Location:	San Jose, CA
Latitude:	37-20-53.90N NAD 83
Longitude:	121-54-20.90W
Heights:	67 feet site elevation (SE)
	60 feet above ground level (AGL)
	127 feet above mean sea level (AMSL)

This aeronautical study revealed that the structure does not exceed obstruction standards and would not be a hazard to air navigation provided the following condition(s), if any, is(are) met:

It is required that FAA Form 7460-2, Notice of Actual Construction or Alteration, be e-filed any time the project is abandoned or:

_____ At least 10 days prior to start of construction (7460-2, Part 1)
__X__ Within 5 days after the construction reaches its greatest height (7460-2, Part 2)

Based on this evaluation, marking and lighting are not necessary for aviation safety. However, if marking/ lighting are accomplished on a voluntary basis, we recommend it be installed in accordance with FAA Advisory circular 70/7460-1 M.

This determination expires on 12/04/2025 unless:

(a) the construction is started (not necessarily completed) and FAA Form 7460-2, Notice of Actual Construction or Alteration, is received by this office.
(b) extended, revised, or terminated by the issuing office.
(c) the construction is subject to the licensing authority of the Federal Communications Commission (FCC) and an application for a construction permit has been filed, as required by the FCC, within 6 months of the date of this determination. In such case, the determination expires on the date prescribed by the FCC for completion of construction, or the date the FCC denies the application.

NOTE: REQUEST FOR EXTENSION OF THE EFFECTIVE PERIOD OF THIS DETERMINATION MUST BE E-FILED AT LEAST 15 DAYS PRIOR TO THE EXPIRATION DATE. AFTER RE-EVALUATION OF CURRENT OPERATIONS IN THE AREA OF THE STRUCTURE TO DETERMINE THAT NO SIGNIFICANT AERONAUTICAL CHANGES HAVE OCCURRED, YOUR DETERMINATION MAY BE ELIGIBLE FOR ONE EXTENSION OF THE EFFECTIVE PERIOD.

This determination is based, in part, on the foregoing description which includes specific coordinates, heights, frequency(ies) and power. Any changes in coordinates, heights, and frequencies or use of greater power, except those frequencies specified in the Colo Void Clause Coalition; Antenna System Co-Location; Voluntary Best Practices, will void this determination. Any future construction or alteration, including increase to heights, power, or the addition of other transmitters, requires separate notice to the FAA.This determination includes all previously filed frequencies and power for this structure.

If construction or alteration is dismantled or destroyed, you must submit notice to the FAA within 5 days after the construction or alteration is dismantled or destroyed.

This determination does include temporary construction equipment such as cranes, derricks, etc., which may be used during actual construction of the structure. However, this equipment shall not exceed the overall heights as indicated above. Equipment which has a height greater than the studied structure requires separate notice to the FAA.

This determination concerns the effect of this structure on the safe and efficient use of navigable airspace by aircraft and does not relieve the sponsor of compliance responsibilities relating to any law, ordinance, or regulation of any Federal, State, or local government body.

If we can be of further assistance, please contact our office at (424) 405-7641, or tameria.burch@faa.gov. On any future correspondence concerning this matter, please refer to Aeronautical Study Number 2024-AWP-5349-OE.

**** DETERMINATION OF NO HAZARD TO AIR NAVIGATION ****

The Federal Aviation Administration has conducted an aeronautical study under the provisions of 49 U.S.C., Section 44718 and if applicable Title 14 of the Code of Federal Regulations, part 77, concerning:

Structure:	Billboard Mabury Rd 14x48
Location:	San Jose, CA
Latitude:	37-21-35.20N NAD 83
Longitude:	121-52-22.60W
Heights:	77 feet site elevation (SE)
	60 feet above ground level (AGL)
	137 feet above mean sea level (AMSL)

This aeronautical study revealed that the structure does not exceed obstruction standards and would not be a hazard to air navigation provided the following condition(s), if any, is(are) met:

It is required that FAA Form 7460-2, Notice of Actual Construction or Alteration, be e-filed any time the project is abandoned or:

_____ At least 10 days prior to start of construction (7460-2, Part 1)
__X__ Within 5 days after the construction reaches its greatest height (7460-2, Part 2)

Based on this evaluation, marking and lighting are not necessary for aviation safety. However, if marking/ lighting are accomplished on a voluntary basis, we recommend it be installed in accordance with FAA Advisory circular 70/7460-1 M.

This determination expires on 12/04/2025 unless:

(a) the construction is started (not necessarily completed) and FAA Form 7460-2, Notice of Actual Construction or Alteration, is received by this office.
(b) extended, revised, or terminated by the issuing office.
(c) the construction is subject to the licensing authority of the Federal Communications Commission (FCC) and an application for a construction permit has been filed, as required by the FCC, within 6 months of the date of this determination. In such case, the determination expires on the date prescribed by the FCC for completion of construction, or the date the FCC denies the application.

NOTE: REQUEST FOR EXTENSION OF THE EFFECTIVE PERIOD OF THIS DETERMINATION MUST BE E-FILED AT LEAST 15 DAYS PRIOR TO THE EXPIRATION DATE. AFTER RE-EVALUATION OF CURRENT OPERATIONS IN THE AREA OF THE STRUCTURE TO DETERMINE THAT NO SIGNIFICANT AERONAUTICAL CHANGES HAVE OCCURRED, YOUR DETERMINATION MAY BE ELIGIBLE FOR ONE EXTENSION OF THE EFFECTIVE PERIOD.

This determination is based, in part, on the foregoing description which includes specific coordinates, heights, frequency(ies) and power. Any changes in coordinates, heights, and frequencies or use of greater power, except those frequencies specified in the Colo Void Clause Coalition; Antenna System Co-Location; Voluntary Best Practices, will void this determination. Any future construction or alteration, including increase to heights, power, or the addition of other transmitters, requires separate notice to the FAA.This determination includes all previously filed frequencies and power for this structure.

If construction or alteration is dismantled or destroyed, you must submit notice to the FAA within 5 days after the construction or alteration is dismantled or destroyed.

This determination does include temporary construction equipment such as cranes, derricks, etc., which may be used during actual construction of the structure. However, this equipment shall not exceed the overall heights as indicated above. Equipment which has a height greater than the studied structure requires separate notice to the FAA.

This determination concerns the effect of this structure on the safe and efficient use of navigable airspace by aircraft and does not relieve the sponsor of compliance responsibilities relating to any law, ordinance, or regulation of any Federal, State, or local government body.
