# 1 INTRODUCTION

The County of Monterey (County) is proposing the Prunedale Roundabout Project (project), which would replace the existing one-way stop-controlled intersection located at Castroville Boulevard and San Miguel Canyon Road with a single-lane roundabout in unincorporated Monterey County, California. The purpose of the proposed project is to provide a strategic solution to address existing safety concerns and vehicle congestion along the San Miguel Canyon Road corridor.

The proposed project is included in the Highway Safety Improvement Program (HSIP) Cycle 10 project list that was released by the California Department of Transportation (Caltrans) on March 30, 2021. According to the Transportation Agency for Monterey County (TAMC) *G12: Pajaro to Prunedale Corridor Study Final Report*, the proposed project was initially envisioned as a multi-lane roundabout (TAMC 2019). However, during an alternatives analysis, a multi-lane roundabout was found to be infeasible at this stage of the development of the corridor. Therefore, a single-lane roundabout with a right-turn bypass lane located just north of the existing intersection was selected. As a result, right-of-way (ROW) acquisitions and temporary construction easements (TCEs) would be required to construct the proposed intersection improvements, as well as a temporary signalized intersection to control traffic during construction. The project would be delivered within the funding constraints of HSIP Cycle 10.

The proposed project is intended to improve the safety of the existing intersection by reducing the speed of vehicles through the intersection and, therefore, reducing the risk and severity of vehicular collisions at the project location. The proposed project would also accommodate future travel demands in the region and decrease vehicle congestion along the corridor.

## 1.1 Project Location

The project site is located at the intersection of Castroville Boulevard and San Miguel Canyon Road in unincorporated Monterey County, California (Figure 1).

## 1.2 Environmental Setting

The project site consists of the one-way stop-controlled intersection of Castroville Boulevard and San Miguel Canyon Road. At the intersection, the terminus of Castroville Boulevard is controlled by a stop sign while San Miguel Canyon Road is uncontrolled in both the northbound and southbound directions. The segment of Castroville Boulevard in the project area consists of a single westbound and eastbound lane, the intersection with San Miguel Canyon Road consists of a single eastbound lane, a left turn lane, and right-turn lane. The segment of San Miguel Canyon Road in the project area consists of a two-lane road with bidirectional traffic. At the intersection, northbound traffic is served by a left-turn lane and a thru lane while the single southbound lane has a dedicated right turn. The posted speed limit is 55 miles per hour (mph) and approximately 2,000 vehicles utilize this intersection per hour.

The project site is characterized by gently to steeply sloping topography with paved roadways and road shoulders with ruderal vegetation and otherwise disturbed areas. Based on a review of the U.S. Fish and Wildlife Service (USFWS) National Wetlands Inventory (NWI) Surface Waters and Wetlands Mapper, there is a mapped freshwater emergent wetland located approximately 25 feet east of San Miguel Canyon Road at the southeastern edge of the proposed project area (USFWS 2024; Figure 2). According to Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) 06053C0091G (effective 4/2/2009), the project site is located in Zone X, an area with minimal flood hazard; however, areas designated Zone AE (100-year flood zone) are located approximately 25 feet east of San Miguel

Canyon Road at the eastern edge of the project area (FEMA 2023; Figure 3). The project site is located outside of the coastal zone of Monterey County.

Surrounding land uses include single-family residences within the Residential – Low Density 0.5-1 acres/unit (LDR/1) to the north, east, and west and Manzanita County Park within the Public/Quasi-Public (PQP) to the south.

## **1.3 Project Description**

The proposed project includes the replacement of the existing one-way stop-controlled intersection located at Castroville Boulevard and San Miguel Canyon Road with a single-lane roundabout with a right-turn bypass lane and the construction of associated roadway improvements, including installation of pedestrian crosswalks, lighting, signage, a potential retaining wall, flashing beacons with radar feedback signs, and a temporary signalized intersection to address traffic control during construction (Figure 4).

Project construction would occur during nighttime and daytime work hours with a phased approach to maintain vehicle access through the intersection and minimize impacts to traffic. Proposed construction activities that would occur during nighttime hours (9:00 p.m. to 7:00 a.m.) would include roadway improvements, embankment adjustments, and restriping. Periodic directional lane closures and detours would be limited to specific and necessary items of work and would be conducted through a traffic management plan. Construction activities would be conducted in the following four phases:

1. **Phase 1:** site preparation activities, including clearing and grubbing, earthwork, and installation of a temporary roadway and temporary traffic signals;
2. **Phase 2:** improvements to the eastbound approach;
3. **Phase 3:** construction of the roundabout and potential retaining wall; and
4. **Phase 4:** removal of temporary roadway, equipment, and supplies and returning the project site to preconstruction conditions.

The project may include the installation of one new retaining wall along the eastern side of San Miguel Canyon Road that would be approximately 175 feet in length and 10 feet in height.

Because the existing intersection experiences over 2,000 vehicle trips per hour during peak hour conditions (Kittleson & Associates 2024), closing the intersection is not a feasible option; therefore, a temporary signalized intersection would be necessary to facilitate construction of the proposed improvements. During construction, the existing Monterey-Salinas transit stop located directly south of the intersection may be temporarily relocated further south to allow the transit stop to remain open to the public during construction activities. Following construction activities, the transit stop would be relocated to the original location. The project would require ROW acquisitions and TCEs from four surrounding parcels—Assessor's Parcel Numbers (APNs) 129-083-031, 127-361-014, 127-361-013, and 127-361-007 (see Figure 4). ROW acquisitions and TCEs would be required to construct the proposed roadway improvements, including the construction of the single-lane roundabout with a right-turn bypass lane, pedestrian crosswalks, lighting, signage, a potential retaining wall, flashing beacons with radar feedback signs, and a temporary signalized intersection to handle traffic during construction. Following construction activities, the TCEs would be returned to preconstruction conditions.

There is existing utility infrastructure located within the project area, including American Telephone and Telegraph Company (AT&T), Pacific Gas and Electric Company (PG&E), and Comcast infrastructure. Both underground and aerial facilities would be impacted, and it is anticipated that all relocations would

remain within the public right-of-way. The project includes the relocation of three utility poles within the project area.

The project would result in approximately 3.16 acres of ground disturbance, including approximately 4,500 cubic yards of cut and 550 cubic yards of imported soil. The depth of excavation activities would generally vary throughout the project site with the maximum depth of excavation being 7 feet for installation of the relocated utility poles. Subsurface excavation would be required for roadway improvements, drainage facilities, utility pole relocations, and the potential retaining wall. The project would require the removal of 72 trees from the project area, including 27 oak trees, 42 willow trees, two eucalyptus trees, and one pine tree. Proposed tree removals would be conducted in accordance with the Monterey County Zoning Ordinance (Title 21, Chapter 21.64.260 – Preservation of Oak and Other Protected Trees [tree ordinance]). The four phases of project construction are anticipated to occur over a period of 7 to 8 months, beginning in spring/summer 2026, as feasible. Project construction is expected to require the use of excavators, dozers, cranes, pavers, dump trucks, concrete trucks, concrete pumps, excavation shoring systems, and drilling equipment.

## 1.4 Potential Authorizations, Permits, and Approvals

The potential authorizations, permits, reviews, and approvals from federal, state, and local agencies that would be required for the project are listed in Table 1.

**Table 1. Potential Authorizations, Permits, Reviews, and Approvals**

Authorizing Agency	Permit / Approval / Consultation
Monterey Bay Air Resources District	Authority to Construct/Permit to Operate
County of Monterey	Exclusion to Tree Removal Permit, Variance for Construction Noise

## 2 ENVIRONMENTAL CHECKLIST AND ENVIRONMENTAL EVALUATION

### Environmental Factors Potentially Affected

The proposed project could have a “Potentially Significant Impact” for environmental factors checked below. Please refer to the attached pages for discussion on mitigation measures or project revisions to either reduce these impacts to less than significant levels or require further study.

- |                                                             |                                                                     |                                                                        |

### Environmental Determination

On the basis of this initial evaluation:

- ☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- ☒ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- ☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- ☐ I find that the proposed project MAY have a “potentially significant impact” or “potentially significant unless mitigated” impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measure based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- ☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

## I. Aesthetics

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Except as provided in Public Resources Code Section 21099, would the project:</i>				
(a) Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

## Setting

The California Environmental Quality Act (CEQA) establishes that it is the policy of the state to take all action necessary to provide people of the state “with . . . enjoyment of aesthetic, natural, scenic and historic environmental qualities” (California Public Resources Code [PRC] Section 21001(b)). A scenic vista is generally defined as a high-quality view displaying good aesthetic and compositional values that can be seen from public viewpoints. Some scenic vistas are officially or informally designated by public agencies or other organizations. A substantial adverse effect on a scenic vista would occur if the project would significantly degrade the scenic landscape as viewed from public roads or other public areas. A proposed project’s potential effect on a scenic vista is largely dependent on the degree to which it would complement or contrast with the natural setting, the degree to which it would be noticeable in the existing environment, and whether it detracts from or complements the scenic vista.

The California Scenic Highway Program was created by the State Legislature in 1963 with the intention of protecting and enhancing the natural scenic beauty of California highways and adjacent corridors. A highway may be designated scenic depending on how much of the natural landscape can be seen by travelers, the scenic quality of the landscape, and the extent to which development intrudes upon the traveler’s enjoyment of the view. According to the Caltrans State Scenic Highway System Map, the nearest designated state scenic highway is State Route (SR) 156, approximately 1.35 miles south of the project site. In addition, U.S. Route 101 (US 101) is an eligible state scenic highway, approximately 1.3 miles southeast of the project site (Caltrans 2018).

The project site is located in a developed area within the North County Planning Area within the County ROW of Castroville Boulevard and San Miguel Canyon Road. The project site is characterized by gently sloping topography with paved roadways and road shoulders with ruderal vegetation and otherwise disturbed areas. According to the *2010 Monterey County General Plan*, the project site is not located along any existing or proposed scenic routes or within a designated sensitive or highly sensitive visual area (County of Monterey 2010).

## **Environmental Evaluation**

**a) Would the project have a substantial adverse effect on a scenic vista?**

According to the General Plan, the project site is not located along any existing or proposed scenic routes or within a designated sensitive or highly sensitive visual area; therefore, the project would not have a substantial adverse effect on a scenic vista, and *no impacts* would occur.

**b) Would the project substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?**

The nearest officially designated state scenic highway is SR 156, approximately 1.35 miles south of the project site, and the nearest eligible state scenic highway is US 101, approximately 1.3 miles southeast of the project site (Caltrans 2018). Due to distance as well as intervening topography and vegetation, the project site would not be visible from SR 156 or US 101; therefore, *no impacts* would occur.

**c) In non-urbanized areas, would the project substantially degrade the existing visual character or quality of public views of the site and its surroundings? (public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?**

The project site consists of an existing intersection within a developed area in the North County Planning Area in unincorporated Monterey County. The project site is not located along any existing or proposed scenic routes or within a designated sensitive or highly sensitive visual area (County of Monterey 2010). The project would not introduce new buildings, structures, or other features that would be subject to building design requirements included in the General Plan or County Municipal Code. The project includes the construction of a single-lane roundabout with a right-turn bypass lane and associated roadway improvements at an existing intersection. The proposed roundabout and associated roadway improvements would be constructed at grade and would not result in a substantial change in the visual character of the immediate or surrounding area. Proposed aboveground features would include directional signage, street lighting, a potential retaining wall, and flashing beacons with radar feedback signs. The potential retaining wall would be installed along the eastern side of San Miguel Canyon Road and would be approximately 175 feet in length and 10 feet in height. The potential retaining wall would be neutral toned and would not include architectural or design features that could substantially detract from the existing visual character of the project area. Proposed development would be consistent with the level of existing development associated with the current one-way stop-controlled intersection and would not result in a substantial change in the visual character of the immediate or surrounding area.

Construction activities would be visible from surrounding land uses during the 7- to 8-month-long construction period and would include the presence of construction equipment, vehicles, staging areas, construction materials, and a temporary signalized intersection. Additionally, associated signage or traffic cones may be necessary for safety during the construction period. Following construction activities, equipment, traffic signals, vehicles, and signage would be removed from the project site; therefore, proposed construction activities would not result in a permanent change in the visual character of the project area.

Based on the analysis provided above, the proposed project would not substantially degrade the existing character of the immediate or surrounding area; therefore, project impacts would be *less than significant*.

**d) Would the project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?**

Existing nighttime lighting in the project area consists of vehicle headlights and streetlights along Castroville Boulevard and San Miguel Canyon Road and lighting from surrounding residential land uses. The project includes the installation of street lighting and a temporary signalized intersection, which would contribute to nighttime lighting in the project area. In accordance with County Municipal Code Section 21.63.020, street lighting would be used for illumination purposes only and pointed downward to avoid light spillover to surrounding land uses. Construction activities would occur between 7:00 a.m. and 9:00 p.m. each day, and any nighttime lighting used during the construction period would be short term and exempt from the design guidelines for exterior lighting in accordance with County Municipal Code Section 21.63.020.D. Following construction, the temporary signalized intersection would be removed from the intersection. Based on required compliance with the County Municipal Code, the proposed project would not create a new source of substantial light or glare; therefore, impacts would be *less than significant*.

## Conclusion

The project would not substantially affect a scenic vista, damage a scenic resource, conflict with zoning, or create a source of new light or glare; therefore, impacts related to aesthetics would be less than significant.

## Mitigation Measures

Mitigation is not necessary.

## II. Agriculture and Forestry Resources

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:</i>				
(a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
(c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(d) Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## Setting

The California Department of Conservation (CDOC) Farmland Mapping and Monitoring Program (FMMP) produces maps and statistical data used for analyzing impacts on California's agricultural resources. Agricultural land is rated according to soil quality and current land use. For environmental review purposes under CEQA, the FMMP categories of Prime Farmland, Farmland of Statewide Importance, Unique Farmland, Farmland of Local Importance, and Grazing Land are considered "agricultural land." Other non-agricultural designations include, but are not limited to, Urban and Built-up Land, Other Land, and Water. According to the FMMP, the project site is located on land that is designated as Other Land (CDOC 2022).

According to the Natural Resources Conservation Service (NRCS) Web Soil Survey (NRCS 2023), the project site is underlain by the following soil type:

- **Arnold loamy sand, 9 to 20 percent slopes, Major Land resource Area (MLRA) 15.** This somewhat excessively drained soil has a low runoff class and a depth to restrictive feature of 40 to 60 inches to paralithic bedrock. The typical soil profile consists of loamy sand, loamy fine sand, and bedrock. This soil is considered Farmland of Statewide Importance by the NRCS.

The Land Conservation Act of 1965, commonly referred to as the Williamson Act, enables local governments to enter into contracts with private landowners for the purpose of restricting specific parcels of land to agriculture or related open space uses. In return, landowners receive property tax assessments that are much lower than normal because they are based on farming and open space uses as opposed to full market value. The project site and surrounding parcels are not subject to a Williamson Act contract.

According to PRC Section 12220(g), forest land is defined as land that can support 10% native tree cover of any species, including hardwoods, under natural conditions, and that allows for management of one or more forest resources, including timber, aesthetics, fish and wildlife, biodiversity, water quality, recreation, and other public benefits. Timberland is defined as land, other than land owned by the federal government and land designated by the State Board of Forestry and Fire Protection as experimental forest land, which is available for, and capable of, growing a crop of trees of a commercial species used to produce lumber and other forest products, including Christmas trees. The project site is not considered forestland by PRC Section 12220(g).

## **Environmental Evaluation**

- a) Would the project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?**

The project site is underlain by land designated as Other Land by the FMMP (CDOC 2022). The project site does not consist of Prime Farmland, Unique Farmland, or Farmland of Statewide Importance as designated by the FMMP; therefore, the proposed project would not result in conversion of Farmland, and *no impacts* would occur.

- b) Would the project conflict with existing zoning for agricultural use, or a Williamson Act contract?**

The project site consists of an existing intersection within the County's ROW, and surrounding land uses include single-family residences within the LDR/1 land use designation to the north, east, and west and Manzanita County Park within the PQP land use designation to the south. The project site and surrounding areas are not subject to a Williamson Act contract. Therefore, the project would not result in a conflict with existing zoning for agricultural use or a Williamson Act contract, and *no impacts* would occur.

- c) Would the project conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?**

The project site and surrounding area is not within forest land, timberland, or timberland production land use or zoning designations. Therefore, the proposed project would not conflict with the zoning, or cause rezoning of, designated forest land, timberland, or timberland production, and *no impacts* would occur.

- d) Would the project result in the loss of forest land or conversion of forest land to non-forest use?**

The project site consists of an existing roadway and is not considered forestland by PRC Section 12220(g). The project would require the removal of 72 trees for the construction of a temporary detour route. Since the project site does not support forest land, any tree removal required for the project would not result in the loss or conversion of forest land; therefore, *no impacts* would occur.

- e) Would the project involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?**

The project site is located in a previously developed area within unincorporated Monterey County and there are no commercial crop production or agricultural land uses within the vicinity of the project site. As previously evaluated, the project would not result in the conversion of Farmland or forest land and

would not interfere with zoning for agricultural or forest land uses. The proposed project would be limited to the construction of a roundabout and associated roadway improvements and would not result in new land uses that could reduce the availability of water for existing agricultural uses in the vicinity of the project site. In addition, proposed roadway improvements would be paved and would not increase dust that could inadvertently damage crops in the vicinity of the project site. Therefore, the project would not indirectly result in the conversion of Farmland or forest land, and *no impacts* would occur.

## Conclusion

The proposed project would not result in the conversion of Farmland or forest land and would not interfere with zoning for agricultural or forest uses. Therefore, the project would not result in impacts related to agriculture and forestry resources.

## Mitigation Measures

Mitigation is not necessary.

## III. Air Quality

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations. Would the project:</i>				
(a) Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(c) Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Setting

Monterey County is within the North Central Coast Air Basin (NCCAB) and is under the jurisdiction of the Monterey Bay Air Resources District (MBARD). According to the U.S. Environmental Protection Agency (USEPA), Monterey County is in attainment for all criteria air pollutants according to federal standards (USEPA 2022). According to the California Air Resources Board (CARB), Monterey County is not in attainment for particulate matter 10 microns or less in diameter (PM<sub>10</sub>) standards established by the state (CARB 2020b). According to the *2012-2015 Air Quality Management Plan* (MBARD AQMP), the NCCAB is not in attainment for the 8-hour ozone standards established by the state (MBARD 2017). The MBARD 2005 *Report on Attainment of the California Particulate Matter Standards in the Monterey Bay Region* (MBARD Particulate Matter Plan; MBARD 2005) includes reduction goals and strategies related to particulate matter emission standards, and the MBARD AQMP includes reduction goals and strategies related to the 8-hour ozone emission standards (MBARD 2017).

The Monterey Bay Air Resources District (MBARD) prepared *Guidelines for Implementing the California Environmental Quality Act* to identify procedures for complying with CEQA for permit issuance, rulemaking, and adoption of plans established by the MBARD (MBARD 2016). The MBARD has established air quality thresholds of significance for projects in Monterey, San Benito, and Santa Cruz Counties. A project will not have a significant air quality effect on the environment if the criteria identified in Table 2 are met (MBARD 2016).

**Table 2. Monterey Bay Air Resources District Thresholds**

Pollutant/Precursor	Construction Emissions (pounds per day)	Operational Emissions (pounds per day)
CO	550	550
NO <sub>x</sub>	137	137
ROG	137	137
PM <sub>10</sub>	82	82
PM <sub>2.5</sub>	55	55

Source: MBARD (2016)

Notes: CO = carbon monoxide; NO<sub>x</sub> = nitrogen oxides; ROG = reactive organic gases; PM<sub>2.5</sub> = particulate matter 2.5 microns or less in diameter

Sensitive receptors are people that have an increased sensitivity to air pollution or environmental contaminants, such as the elderly, children, people with asthma or other respiratory illnesses, and others who are at a heightened risk of negative health outcomes due to exposure to air pollution. Some land uses are considered more sensitive to changes in air quality than others due to the population that occupies the uses and the activities involved. Sensitive receptor locations include schools, parks and playgrounds, daycare centers, nursing homes, hospitals, and residences. There are single-family residences to the northeast and east of the project site. The nearest sensitive receptor is a single-family residence located approximately 150 feet east.

## ***Environmental Evaluation***

### **a) Would the project conflict with or obstruct implementation of the applicable air quality plan?**

The MBARD Particulate Matter Plan includes reduction goals and strategies related to particulate matter emission standards and the MBARD AQMP includes reduction goals and strategies related to the 8-hour ozone emissions standards (MBARD 2005, 2017). The MBARD Particulate Matter Plan identifies construction activities, agricultural activities, and vehicle use on unpaved roadways as the primary source of particulate matter emissions (MBARD 2005). In addition, the MBARD AQMP identifies mobile source emissions as the primary contributor to reactive organic gas (ROG) and nitrogen oxides (NO<sub>x</sub>) emissions, which are ozone precursor emissions (MBARD 2017).

The potential for the project to result in air pollutant emissions, including ROG, NO<sub>x</sub>, and PM, is described in detail in *Threshold Discussion III(b)*. The project does not include development of new land uses or transportation corridors that would be subject to land use and transportation strategies included in the MBARD AQMP or General Plan. Operation of the project would result in the operation of an existing intersection and would not generate new vehicle trips within the project area. Further, implementation of the proposed roundabout would improve vehicle flow at the intersection, which may ultimately reduce vehicle congestion and associated emissions. The project would not result in substantial pollutant emissions or interfere with land use and transportation strategies related to reduction of pollutant

emissions; therefore, the project would be consistent with the MBARD Particulate Matter Plan, MBARD AQMP, and General Plan, and potential impacts would be *less than significant*.

**b) Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?**

Monterey County is not in attainment for the PM<sub>10</sub> standards established by the state (CARB 2022). In addition, according to the MBARD AQMP, the NCCAB is not in attainment of the 8-hour ozone standards established by the state (MBARD 2017). The project would primarily generate emissions during construction of the proposed roundabout and associated roadway improvements.

**Short-Term Emissions**

Heavy equipment and earth-moving construction activities generate fugitive dust and combustion emissions; these may have substantial temporary impacts on local air quality. Fugitive dust emissions would result from land clearing, demolition, excavation, trenching, grading activities, and trip generation. Combustion emissions, such as NO<sub>x</sub> and PM<sub>10</sub>, are most significant when using large diesel-fueled scrapers, loaders, bulldozers, haul trucks, compressors, generators, and other types of equipment.

Estimated construction air emissions were calculated for the proposed project using the California Emissions Estimator Model (CalEEMod). The CalEEMod results are included in Appendix A, and the results of the unmitigated estimated construction emission calculations for the proposed project are shown in Table 3.

**Table 3. Annual Construction Emissions for the Proposed Project**

Source	Criteria Pollutant (pounds per day)				
	ROG	NO <sub>x</sub>	CO	PM <sub>10</sub>	PM <sub>2.5</sub>
Project Construction (2024)	1.33	13.84	8.97	7.74	3.97
Project Construction (2025)	1.41	12.45	13.18	7.66	3.90
<b>MBARD Threshold</b>	<b>137</b>	<b>137</b>	<b>550</b>	<b>82</b>	<b>55</b>
<b>Exceed threshold?</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>	<b>No</b>

Source: MBARD (2016)

Based on the results shown in Table 3, construction air emissions would be in compliance with the MBARD thresholds for all pollutants; therefore, construction-related impacts would be *less than significant*.

**Long-Term Emissions**

The project would be limited to the operation of an existing roadway intersection and does not include the establishment of new land uses or activities that could generate long-term air pollutant emissions in the region; therefore, the project would not be expected to exceed MBARD operational thresholds. Following construction activities, the roadway would be paved and would not generate long-term dust emissions that could exceed the MBARD threshold of significance for fugitive dust emissions. Further, the project would not increase roadway capacity in a manner that could increase the number of vehicle trips along this roadway or require long-term maintenance trips that could generate a new source of mobile-source

emissions. Therefore, the project would not be expected to exceed the MBARD threshold of significant for combustion emissions. Based on the limited amount of operational emissions generated by the project, potential impacts related to long-term air pollutant emissions would be *less than significant*.

**c) Would the project expose sensitive receptors to substantial pollutant concentrations?**

There are single-family residences to the northeast and east of the project site. The nearest sensitive receptor is a single-family residence located approximately 150 feet east of the project site. As described previously, the project would result in limited, short-term construction-related emissions, including ROG, NOx, and PM. Additionally, construction activities would be required to comply with diesel-idling requirements identified by the CARB, including limiting idling to 5 minutes or less, which would further reduce the potential for substantial construction-related emissions to occur during construction (CARB 2020a). Although the project would result in limited emissions, due to the proximity of the nearest sensitive receptor location, Mitigation Measure (MM) AQ-1 and MM AQ-2 have been included to further reduce the potential for construction-related emissions to affect nearby sensitive receptors. With adherence to the diesel idling restrictions identified by the CARB and implementation of MM AQ-1 and MM AQ-2, the project would not expose sensitive receptors to substantial pollutant concentrations; therefore, impacts would be *less than significant with mitigation*.

**d) Would the project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?**

Construction activities generally have the potential to emit odors from diesel equipment, paints, solvents, fugitive dust, and adhesives. Any odors generated by construction activities would be intermittent and temporary, and generally would not extend beyond the construction area. Any construction odors would be temporary and limited to the construction phase of the proposed project. The project does not include the establishment of new land uses or other activities that could generate long-term odors within the project area.

The project would not expose people to other emissions, such as naturally occurring asbestos (NOA), because the project site is not located in an area with the potential for NOA to occur (California Geological Survey [CGS] 2011). The project would require the demolition and removal of damaged portions of the roadway that have the potential to contain asbestos-containing material (ACM). MM AQ-3 has been identified to reduce the potential to release ACM during proposed demolition activities. Construction-related odors would be temporary, intermittent, and undetectable and with implementation of MM AQ-3, the project would not expose people to other emissions, including NOA or ACM; therefore, potential impacts would be *less than significant with mitigation*.

## **Conclusion**

The project would be consistent with the MBARD Particulate Matter Plan and AQMP and would not exceed established MBARD emissions thresholds during project construction or operation. MM AQ-1 and MM AQ-2 have been included to reduce diesel exhaust and fugitive dust exposure to sensitive receptors during construction. MM AQ-3 has been included to reduce the potential to disturb ACM and result in other air emissions. Upon implementation of the identified mitigation measures, potential impacts related to air quality would be less than significant.

## **Mitigation Measures**

- MM AQ-1** The following measures shall be implemented and shown on project specifications to minimize construction equipment-generated emissions:
1. Substitute alternative-fueled or catalyst-equipped diesel construction equipment, when available.
  2. Minimize idling time to not exceed 5 minutes, to the maximum extent feasible.
  3. Minimize the hours of operation of heavy-duty equipment and/or the amount of equipment in use to the greatest extent feasible.
  4. Replace fossil-fueled equipment with electrically driven equivalents (provided they are not run through a portable generator set) when available.
  5. Implement activity management (e.g., reschedule activities to reduce short-term impacts).
- MM AQ-2** The following measures shall be implemented and shown on project specifications to minimize construction-generated dust emissions:
1. Water unpaved construction areas as needed. Frequency should be based on the type of operation, soil, and wind exposure.
  2. Prohibit all grading activities during periods of high wind (over 15 miles per hour).
  3. Hydroseed exposed areas after cut and fill operations.
  4. Haul trucks shall maintain at least 2 feet of freeboard.
  5. Cover all trucks hauling dirt, sand, or loose materials.
  6. Cover inactive storage piles.
  7. Sweep streets if visible soil material is carried out from the construction site.
  8. Post a publicly visible sign that specifies the telephone number and person to contact regarding dust complaints. This person shall respond to complaints and take corrective action within 48 hours. The phone number of the Monterey Bay Air Resources District shall be visible to ensure compliance with Rule 402 (Nuisance).
- MM AQ-3** Prior to initiation of demolition and ground-disturbing activities, the County of Monterey shall retain a Certified Asbestos Consultant to conduct a thorough inspection of the roadway and culverts proposed for demolition and removal to determine if asbestos-containing material (ACM) is present. If asbestos is determined to be present within the materials proposed for demolition and/or removal, proposed activities shall be conducted in accordance with the requirements stipulated in the National Emission Standards for Hazardous Air Pollutants (NESHAP) (40 Code of Federal Regulations 61, Subpart M – Asbestos).

## IV. Biological Resources

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

### Setting

The Federal Endangered Species Act (FESA) of 1973 provides legislation to protect federally listed plant and animal species. The California Endangered Species Act (CESA) of 1984 ensures legal protection for plants listed as rare or endangered and animal species formally listed as endangered or threatened, and also maintains a list of California Species of Special Concern (SSC). SSC status is assigned to species that have limited distribution, declining populations, diminishing habitat, or unusual scientific, recreational, or educational value. Under state law, the California Department of Fish and Wildlife (CDFW) has the authority to review projects for their potential to impact special-status species and their habitats.

The Migratory Bird Treaty Act (MBTA) of 1918 protects all migratory birds, including their eggs, nests, and feathers, and was originally drafted to put an end to the commercial trade in bird feathers, popular in the latter part of the 1800s. The MBTA is enforced by the USFWS, and potential impacts to species protected under the MBTA are evaluated by the USFWS in consultation with other federal agencies and are required to be evaluated under CEQA.

## Existing Conditions

A reconnaissance-level field survey of the project area was conducted on November 8, 2023, to identify the existing conditions of the project area and evaluate the potential for special-status plant and animal species to occur in the project area. The project site predominantly consists of an existing paved roadway that experiences frequent vehicle disturbance. Undeveloped areas within the project area are limited to previously disturbed road shoulders. Table 4 identifies the conditions that were observed during the reconnaissance-level field survey.

**Table 4. Habitat Areas within the Project Area**

Roadway	Location	Habitat Conditions
San Miguel Canyon Road	Northeast shoulder	Highly disturbed ruderal habitat primarily composed of weeds, dead annual grasses, and bare dirt. Two driveways lined with ornamental trees and shrubs occur at north and south ends of project area.
San Miguel Canyon Road	Northwest shoulder	Disturbed ruderal habitat along roadside with arroyo willow ( <i>Salix lasiolepis</i> ) shrubland set approximately 20 feet from shoulder. Annual grasses and non-native weeds dominate ruderal areas. Arroyo willow, coast live oak ( <i>Quercus agrifolia</i> ), and poison oak ( <i>Toxicodendron diversilobum</i> ) dominate shrubland. Evidence of riparian hydrology and vegetation is apparent in lower elevations further into shrubland area.
San Miguel Canyon Road	Southwest shoulder	Highly disturbed ruderal habitat in turnout located southwest of intersection with poison oak shrubland on steeper slope to west. Shrubland habitat is dominated by poison oak and California blackberry ( <i>Rubus ursinus</i> ). Three coast live oak occur near stop sign and utility pole. Removal of these trees is anticipated for work on roundabout and access road.
Castroville Boulevard	North shoulder	Ruderal habitat dominated by weeds and annual grasses along shoulder and adjacent to intersection. Arroyo willow shrubland dominated by arroyo willow and poison oak with potential ephemeral riparian habitat farther back from road. One coast live oak occurs adjacent to road in western portion of project area and may require removal for installation of access road.
Castroville Boulevard	South shoulder	Shrubland dominated by California blackberry and annual grasses composes understory of coast live oak woodland farther up slope. Monterey pine ( <i>Pinus radiata</i> ) and coast live oak saplings occur throughout the project area.

As shown in Table 4, the project area consists of a developed roadway and otherwise disturbed areas. There are limited natural habitat areas in the project area.

## Special-Status Species

Based on a nine-quadrant query of the CDFW California Natural Diversity Database (CNDDDB), the special-status species discussed below have been previously documented in the project vicinity (CDFW 2023; Appendix B).

## Special-Status Plants

The following 10 special-status plant species have been previously documented in the project vicinity (CDFW 2023; CNPS 2023; see Appendix B):

- Monterey spineflower (*Chorizanthe pungens* var. *pungens*) is a California Rare Plant Rank (CRPR) 1B.2 species that typically occurs in chaparral, cismontane woodland, coastal dunes, coastal scrub, and valley and foothill grassland habitats. The nearest recorded occurrence (CNDDDB Occ. 7) is approximately 0.3 mile southwest of the project area.

- Robust spineflower (*Chorizanthe robusta* var. *robusta*) is a CRPR 1B.1 species that typically occurs in chaparral, cismontane woodland, coastal bluff scrub, and coastal dunes habitats. The nearest recorded occurrence (CNDDDB Occ. 33) is approximately 9 miles northwest of the project area.
- Seaside bird's-beak (*Cordylanthus rigidus* ssp. *littoralis*) is a CRPR 1B.1 species that typically occurs in chaparral, cismontane woodland, closed-cone coniferous forest, coastal dune, and coastal scrub habitats. The nearest recorded occurrence (CNDDDB Occ. 8) is approximately 4.3 miles northwest of the project area.
- Menzies' wallflower (*Erysimum menziesii*) is a CRPR 1B.1 species that typically occurs in coastal dune habitat. The nearest recorded occurrence (CNDDDB Occ. 16) is approximately 8.3 miles southwest of the project area.
- Monterey gilia (*Gilia tenuiflora* ssp. *arenaria*) is a CRPR 1B.2 species that typically occurs in chaparral, cismontane woodland, coastal dune, and coastal scrub habitats. The nearest recorded occurrence (CNDDDB Occ. 30) is approximately 6.4 miles southwest of the project area.
- Santa Cruz tarplant (*Holocarpha macradenia*) is a CRPR 1B.1 species that typically occurs in coastal prairie, coastal scrub, and valley and foothill grassland habitats. The nearest recorded occurrence (CNDDDB Occ. 19) is approximately 5.6 miles northwest of the project area.
- Contra Costa goldfields (*Lasthenia conjugens*) is a CRPR 1B.1 that typically occurs in alkali playa, cismontane woodland, valley and foothill grassland, vernal pool, and wetland habitats. The nearest recorded occurrence (CNDDDB Occ. 31) is approximately 12 miles southwest of the project area.
- Dudley's lousewort (*Pedicularis dudleyi*) is a CRPR 1B.2 species that typically occurs in chaparral, cismontane woodland, north coast coniferous forest, redwood, and valley and foothill grassland habitats. The nearest recorded occurrence (CNDDDB Occ. 6) is approximately 15.8 miles northwest of the project area.
- Yadon's rein orchid (*Piperia yadonii*) is a CRPR 1B.1 species that typically occurs in chaparral, closed-cone coniferous forest, and coastal bluff scrub habitats. The nearest recorded occurrence (CNDDDB Occ. 11) is approximately 0.3 mile southwest of the project area.
- San Francisco popcorn flower (*Plagiobothrys diffusus*) is a CRPR 1B.1 species that typically occurs in coastal prairie and valley and foothill grassland habitats. The nearest recorded occurrence (CNDDDB Occ. 16) is approximately 5.4 miles northeast of the project area.

No special-status plant species were observed during the reconnaissance-level field survey conducted on November 8, 2023, and none are expected to occur in the project area due to the absence of suitable habitat conditions.

### Special-Status Animals

The following 17 special-status animal species have been previously documented in the project vicinity (CDFW 2023):

- California tiger salamander – Central California Distinct Population Segment (DPS) (*Ambystoma californiense* pop. 1) is a federally and state threatened species that typically occurs in cismontane woodland, meadow and seep, riparian woodland, valley and foothill grassland, vernal pool, and wetland habitats. The nearest recorded occurrence (CNDDDB Occ. 752) is approximately 1.8 miles south of the project area. The project area supports a limited amount of mapped wetland and riparian habitat that could provide potentially suitable habitat for this species.

- Santa Cruz long-toed salamander (*Ambystoma macrodactylum croceum*) is a federally and state endangered species that typically occurs in freshwater marsh, swamp, and wetland habitats. The nearest recorded occurrence (CNDDDB Occ. 1) is approximately 2.9 miles southwest of the project area. The project area supports a limited amount of mapped wetland and riparian habitat that could provide potentially suitable habitat for this species.
- Foothill yellow-legged frog – Central Coast DPS (*Rana boylei* pop. 4) is a federally threatened and state endangered species that typically occurs in aquatic, riparian forest, riparian scrub, riparian woodland, and flowing water habitats. The nearest recorded occurrence (CNDDDB Occ. 123) is approximately 10.7 miles northwest of the project area. The project area supports a limited amount of mapped wetland and riparian habitat that could provide potentially suitable habitat for this species. However, the project area consists of previous development and experiences frequent human and vehicle disturbance, which limits the suitability of dispersal habitat for this species.
- California red-legged frog (*Rana draytonii*) is a federally threatened species that typically occurs in aquatic, artificial standing water, marsh, riparian forest, riparian scrub, riparian woodland, and flowing water habitats. The nearest recorded occurrence (CNDDDB Occ. 929) is approximately 1.6 miles southwest of the project area. The project area supports a limited amount of mapped wetland and riparian habitat that could provide potentially suitable habitat for this species. However, the project area consists of previous development and experiences frequent human and vehicle disturbance, which limits the suitability of dispersal habitat for this species.
- Crotch's bumble bee (*Bombus crotchii*) is a state candidate endangered species that typically occurs in grassland and scrub habitats. The nearest recorded occurrence (CNDDDB Occ. 437) is approximately 9.3 miles northwest of the project area. There are annual grasses and shrubland located in the project area that may provide marginally suitable habitat for Crotch's bumble bee.
- Western bumble bee (*Bombus occidentalis*) is a state candidate endangered species that typically occurs in grassland and scrub habitats. The nearest recorded occurrence (CNDDDB Occ. 306) is approximately 9.3 miles northwest of the project area. There are annual grasses and shrubland located in the project area that may provide marginally suitable habitat for western bumble bee.
- Tricolored blackbird (*Agelaius tricolor*) is a state threatened species that typically occurs in freshwater marsh, marsh, swamp, and wetland habitats. The nearest recorded occurrence (CNDDDB Occ. 853) is approximately 1.9 miles west of the project area. The project area supports a limited amount of mapped wetland and riparian habitat that could provide potentially suitable nesting habitat for this species.
- Western snowy plover (*Charadrius nivosus nivosus*) is a federally threatened species that typically occurs in Great Basin standing waters, sand shore, and wetland habitats. The nearest recorded occurrence (CNDDDB Occ. 57) is approximately 5.8 miles west of the project area. The project area supports a limited amount of mapped wetland and riparian habitat that could provide potentially suitable nesting habitat for this species.
- California Ridgway's rail (*Rallus obsoletus obsoletus*) is a federally and state endangered species that typically occurs in brackish marsh, swamp, salt marsh, and wetland habitats. The nearest recorded occurrence (CNDDDB Occ. 53) is approximately 3.2 miles west of the project area. The project area supports a limited amount of mapped wetland and riparian habitat that could provide potentially suitable nesting habitat for this species.
- Bank swallow (*Riparia riparia*) is a state threatened species that typically occurs in riparian scrub and riparian woodland habitats. The nearest recorded occurrence (CNDDDB Occ. 160) is

approximately 5.3 miles west of the project area. The project area supports a limited amount of riparian habitat that could provide potentially suitable nesting habitat for this species.

- Least Bell's vireo (*Vireo bellii pusillus*) is a federally and state endangered species that typically occurs in riparian forest, riparian scrub, and riparian woodland habitats. The nearest recorded occurrence (CNDDDB Occ. 503) is approximately 2.9 miles northeast of the project area. The project area supports a limited amount of riparian habitat that could provide potentially suitable nesting habitat for this species.
- Monarch butterfly – California overwintering population (*Danaus plexippus plexippus* pop. 1) is a federal candidate species that typically overwinters in closed cone coniferous forest habitats. The nearest recorded occurrence (CNDDDB Occ. 95) is approximately 5.3 miles west of the project area. The project area does not support coniferous forest habitat that could provide suitable overwintering habitat for this species.
- Smith's blue butterfly (*Euphilotes enoptes smithi*) is a federally endangered species that typically occurs in coastal dune and coastal scrub habitats. The nearest recorded occurrence (CNDDDB Occ. 16) is approximately 8.9 miles southwest of the project area. The project area does not support coniferous forest habitat that could provide suitable overwintering habitat for this species.
- Tidewater goby (*Eucyclogobius newberryi*) is a federally endangered species that typically occurs in flowing water habitat. The nearest recorded occurrence (CNDDDB Occ. 35) is approximately 5.3 miles west of the project area. The project area does not support aquatic habitat that could provide suitable habitat for this species.
- Steelhead – Central California Coast DPS (*Oncorhynchus mykiss irideus* pop. 8) is a federally threatened species that typically occurs in flowing water habitats. The nearest recorded occurrence (CNDDDB Occ. 14) is approximately 16.2 miles northwest of the project area. The project area does not support aquatic habitat that could provide suitable habitat for this species.
- Steelhead – South-Central California Coast DPS (*Oncorhynchus mykiss irideus* pop. 9) is a federally threatened species that typically occurs in flowing water habitats. The nearest recorded occurrence (CNDDDB Occ. 41) is approximately 17.5 miles northeast of the project area. The project area does not support aquatic habitat that could provide suitable habitat for this species.
- Longfin smelt (*Spirinchus thaleichthys*) is a federal candidate species that typically occurs in flowing water habitats. The nearest recorded occurrence (CNDDDB Occ. 18) is approximately 5.3 miles west of the project area. The project area does not support aquatic habitat that could provide suitable habitat for this species.

No special-status animal species were observed during the reconnaissance-level field survey conducted on November 8, 2023. As described above, there may be potentially suitable habitat for California tiger salamander – Central California DPS, Santa Cruz long-toed salamander, foothill yellow-legged frog, California red-legged frog, Crotch's bumble bee, and riparian and nesting bird species.

## **Environmental Evaluation**

- a) **Would the project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?**

### **Special-Status Plants**

The project includes ground-disturbing activities for proposed roadway improvements, which would have the potential to result in direct removal of special-status plant species if present within the proposed area of disturbance during construction. No special-status plant species were observed during the reconnaissance-level field survey conducted on November 8, 2023. Further, the proposed area of disturbance consists of a developed roadway and otherwise disturbed areas that experience frequent human and vehicle disturbance, which limits the availability of natural areas that could provide suitable habitat for special-status plant species. Based on the absence of special-status plants and the developed nature of the project area, special-status plant species are not expected to occur within the proposed area of disturbance due to the absence of suitable habitat conditions; therefore, the project would not adversely affect special-status plant species, and impacts would be *less than significant*.

### **Special-Status Animals**

Proposed construction activities have the potential to result in direct (i.e., take) or indirect (i.e., noise, dust, light pollution) disturbance to special-status animal species if present within the project area during project construction. As described above, the project area may provide potentially suitable habitat for California tiger salamander – Central California DPS, Santa Cruz long-toed salamander, foothill yellow-legged frog, California red-legged frog, Crotch's bumble bee, and riparian and nesting bird species. Potential impacts to special-status animal species are evaluated in detail, below.

### **Special-Status Amphibians**

The project area supports a limited amount of mapped wetland and riparian habitat that could provide potentially suitable habitat for California tiger salamander – Central California DPS, Santa Cruz long-toed salamander, foothill yellow-legged frog, and California red-legged frog. However, the extent of mapped wetland and riparian habitat within the project area is limited to areas located along the roadway shoulders and other areas located immediately adjacent to the existing roadway, which ultimately reduces the suitability of habitat for special-status amphibian species. Further, the project area consists of previously developed roadways and residences that experience frequent human and vehicle disturbance, which ultimately limits the suitability of dispersal habitat within the project area. MM BIO-1 has been identified to further reduce potential impacts to special-status amphibian species through the implementation of wildlife exclusion fencing to separate the project site from mapped wetland and riparian habitat areas if construction activities would occur during the wet season (November–April). Based on the limited amount of potentially suitable habitat areas and implementation of MM BIO-1, special-status amphibian species are not expected to occur within the project area; therefore, impacts would be *less than significant with mitigation*.

## Special-Status Invertebrates

There are annual grasses and shrubland located in the project area that may provide marginally suitable habitat for Crotch's bumble bee and western bumble bee. The annual grasses and shrubland habitat within the project area have been previously disturbed and are limited to areas located along the roadway shoulders and other areas located immediately adjacent to the existing roadway, which ultimately reduces the suitability of nesting habitat for Crotch's bumble bee and western bumble bee. There is some potential for individuals of this species to be feeding on flowering plants within the grassland habitat during proposed construction activities. However, due to the mobility of this species, vegetation removal and other construction activities would not result in disturbance to individuals that may periodically fly through the project site. Therefore, the project would not adversely affect special-status insects, and impacts would be *less than significant*.

## Special-Status and Migratory Birds

The project area supports a limited amount of mapped wetland and riparian habitat that could provide potentially suitable nesting habitat for special-status riparian bird species and also supports scattered native and ornamental trees that could provide nesting habitat for migratory bird species. The project would require the removal of 72 trees within the project area to implement proposed roadway improvements. MM BIO-2 has been identified to reduce potential impacts to nesting birds through preconstruction survey requirements and implementation of avoidance buffers if special-status or migratory birds are found nesting in trees within the project area. Based on implementation of MM BIO-2, the project would not adversely affect special-status or migratory bird species; therefore, impacts would be *less than significant with mitigation*.

## Conclusion

Based on the analysis provided above, potential impacts associated with substantial adverse effects on special-status species or their habitats would be *less than significant with mitigation*.

### **b) Would the project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?**

The project site supports annual grasses, ruderal vegetation, and scattered native and ornamental trees. There is riparian vegetation located within the project area; however, proposed ground-disturbing activities would not extend into the riparian habitat areas. The project site does not support other sensitive natural communities. Therefore, the project would not result in a substantial adverse effect on any riparian habitat or other sensitive natural community, and *no impacts* would occur.

### **c) Would the project have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?**

According to the USFWS NWI Surface Waters and Wetlands Mapper, there is a mapped freshwater emergent wetland located approximately 25 feet east of San Miguel Canyon Road at the southeastern edge of the proposed project area (USFWS 2024). However, proposed ground-disturbing activities would not extend into the mapped wetland area. Further, the project would disturb more than 1 acre of soils and

would be required to comply with State Water Resources Board (SWRCB) General Construction Permit requirements, which require the preparation and implementation of a Stormwater Pollution Prevention Plan (SWPPP) with best management practices (BMPs) to reduce erosive runoff during construction. In addition, the project would be required to comply with the Chapter 16.14 (Urban Stormwater Quality Management and Discharge Control) of the County Municipal Code (County Stormwater Ordinance), which identifies regulations to ensure compliance with the federal Clean Water Act (CWA) and Porter-Cologne Water Quality Control Act (Porter-Cologne Act). Based on required compliance with SWRCB and County requirements, the project would not result in a substantial adverse effect on a federally or state-protected wetland, and impacts would be *less than significant*.

**d) Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?**

The project site and surrounding area consists of existing development, including roadways, residences, and other features, which reduces terrestrial habitat connectivity within the area. There are no waterways within the project area that could provide migratory fish or breeding habitat. Since the project area does not provide terrestrial or aquatic habitat connectivity, the project would preclude use of the project site as a terrestrial or aquatic wildlife corridor. The project would require the removal of 72 trees from the project area, including 27 oak trees, 42 willow trees, two eucalyptus trees, and one pine tree; however, trees located outside of the project area would remain in place. Therefore, proposed tree removal would not interfere substantially with the movement of migratory species, and *no impacts* would occur.

**e) Would the project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?**

Protected trees within Monterey County are regulated by the County Zoning Ordinance (Title 21, Chapter 21.64.260 – Preservation of Oak and Other Protected Trees [tree ordinance]). The tree ordinance protects native trees 6 inches or more in diameter 2 feet above ground level. The project would require the removal of 72 trees from the project area, including 27 oak trees, 42 willow trees, two eucalyptus trees, and one pine tree. Based on conditions observed during the reconnaissance-level field survey, the oak trees proposed for removal have a diameter at breast height (dbh) greater than 6 inches. According to Section 21.64.260 F.2 of the County's Tree Ordinance, removal of protected trees by public agencies within the public ROW is exempt from the requirements of the County's Tree Ordinance. However, the removal of protected trees outside of the public ROW would be subject to the requirements of the County's Tree Ordinance. Proposed tree removal would be conducted in accordance with Section 21.64.260 of the County's Tree Ordinance. Based on required compliance with the County's Tree Ordinance, the project would not conflict with the tree ordinance, and impacts would be *less than significant*.

**f) Would the project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?**

The project area does not overlap with any adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other conservation plans. Therefore, the project would not conflict with any approved local, regional, or state habitat conservation plans, and *no impacts* would occur.

## Conclusion

MM BIO-1 and MM BIO-2 have been included to avoid and/or minimize potential impacts related to biological resources. Therefore, with implementation of MM BIO-1 and MM BIO-2 potential impacts related to biological resources would be less than significant.

## Mitigation Measures

**MM BIO-1 Wildlife Exclusion Fencing.** For any construction activities that occur during the wet season (November–April), the construction contractor shall install temporary wildlife exclusion fencing approved by the County of Monterey (County) along the northbound lane of San Miguel Canyon Road, entirely within the County right-of-way, to separate the project site from potential wetland and riparian habitat mapped to the southeast of the project site and prevent special-status amphibian species from entering the project site during construction activities.

**MM BIO-2 Nesting Birds.** Prior to initiation of any site preparation/construction activities, if work is planned to occur between February 1 and September 15, a qualified biologist shall survey the area for nesting birds within 1 week prior to initial project activity beginning, including ground disturbance and/or vegetation removal/trimming. If nesting birds are located on or near the proposed project site, they shall be avoided until they have successfully fledged, or the nest is no longer deemed active, as detailed below:

1. A 50-foot exclusion zone shall be implemented for non-listed, passerine species, and a 250-foot exclusion zone will be implemented for raptor species. Each exclusion zone shall encircle the nest and have a radius of 50 feet (non-listed passerine species) or 250 feet (raptor species). All project activities, including foot and vehicle traffic and storage of supplies and equipment, are prohibited inside exclusion zones. Exclusion zones shall be maintained until all exterior construction activities have been terminated for the current phase of work (e.g., if initial site improvements are completed, exclusion zones may be removed until initiation of site preparation for residence construction begins), or it has been determined by a qualified biologist that the young have fledged or that proposed project activities would not cause adverse impacts to the nest, adults, eggs, or young.
2. If special-status avian species are identified and nesting within the work area, no work will begin until an appropriate exclusion zone is determined in consultation with the County of Monterey and any relevant resource agencies.

The results of the survey shall be provided to the County of Monterey prior to initiation of site preparation/construction activities. The results shall detail appropriate fencing or flagging of exclusion zones and include recommendations for additional monitoring requirements. A map of the project site and nest locations shall be included with the results. The qualified biologist conducting the nesting survey shall have the authority to reduce or increase the recommended exclusion zone depending on site conditions and species (if non-listed).

## V. Cultural Resources

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(c) Disturb any human remains, including those interred outside of dedicated cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Setting

PRC Section 5024.1 requires that any properties that can be expected to be directly or indirectly affected by a proposed project be evaluated for California Register of Historical Resources (CRHR) eligibility. The purpose of the CRHR is to maintain listings of the state's historical resources and to indicate what properties are to be protected, to the extent prudent and feasible, from material impairment and substantial adverse change.

As defined by CEQA, a historical resource includes:

- A resource listed in or determined to be eligible for listing in the CRHR.
- Any object, building, structure, site, area, place, record, or manuscript that a lead agency determines to be historically significant or significant. The architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural records of California may be considered to be a historical resource, provided the lead agency's determination is supported by substantial evidence.

Resources are evaluated for eligibility for the CRHR under the following four criteria:

- **Criterion 1:** The resource is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
- **Criterion 2:** The resource is associated with the lives of persons important in our past;
- **Criterion 3:** The resource embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; and
- **Criterion 4:** The resource has yielded, or may be likely to yield, information important in prehistory or history.

A Cultural Resources Survey Report (CRSR) was prepared for the proposed project to determine the presence and the likelihood of presence of cultural resources within the project area (SWCA Environmental Consultants [SWCA] 2024). The CRSR includes the results and findings of background review and a pedestrian survey of the project area. A California Historical Resources Information System (CHRIS) records search was conducted at the Northwest Information Center (NWIC) at Sonoma State

University to identify any previously recorded cultural resources within the project area. The records search (NWIC File No.: 23-0541) revealed that there are eight previously conducted cultural resources studies within a 0.25-mile radius of the project area, two of which overlap the project area. The records search revealed that no previously documented archaeological resources are located within a 0.25-mile radius of the project area. In addition, SWCA contacted the California Native American Heritage Commission (NAHC) to request a search of their Sacred Lands File (SLF), which was negative for previously recorded resources. The pedestrian field survey was conducted within the project area on November 1, 2023 (SWCA 2024).

## **Environmental Evaluation**

### **a) Would the project cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5?**

The project site consists of an existing intersection located at Castroville Boulevard and San Miguel Canyon Road. Based on the records search conducted for the proposed project, no previously documented historical resources are located within a 0.25-mile radius of the project area (SWCA 2024); therefore, the project would not cause an adverse change in the significance of a historical resource, and *no impact* would occur.

### **b) Would the project cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?**

The proposed project would require ground-disturbing activities over the approximately 1.3-acre project site. Based on a records search conducted at the NWIC (NWIC File No.: 23-0541), no previously documented archaeological resources are located within a 0.25-mile radius of the project area and no archaeological resources or evidence of archaeological resources was observed during the pedestrian field survey (SWCA 2024). Based on the negative results of the records search and field survey, there is low potential for archaeological resources to be present within the project area. Further, the project area is characterized by previously developed roadways, residential development, and otherwise disturbed areas, which further reduces the potential for previously unidentified intact archaeological resources to be present within the project area. Further, MM CR-1 has been included in the unlikely event that previously unidentified cultural resources are uncovered during proposed ground-disturbing activities. Based on the low potential to uncover archaeological resources within the project area and implementation of MM CR-1, the project would not result in adverse impacts to known or unknown cultural resources, and impacts would be *less than significant with mitigation*.

### **c) Would the project disturb any human remains, including those interred outside of dedicated cemeteries?**

There are no known human remains or cemeteries located within or in the immediate vicinity of the project site and the project area is considered to have low sensitivity for the presence of unidentified human resources (SWCA 2024). The project would be required to comply with California Health and Safety Code Section 7050.5, which outlines the protocol for unanticipated discovery of human remains. Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to PRC Section 5097.98. The County Coroner must be notified of the find immediately. If the human remains are determined to be prehistoric, the coroner will notify the NAHC, which will determine and notify a Most Likely Descendant (MLD). The MLD shall complete the inspection of the project site within 48 hours of notification and may recommend scientific removal and nondestructive analysis of human remains and items associated with Native American

burials. Based on required compliance with California Health and Safety Code Section 7050.5, impacts related to disturbance of human remains would be *less than significant*.

## Conclusion

There are no historic resources located within the project area. With implementation of MM CR-1 and required compliance with California Health and Safety Code 7050.5, the proposed project would not adversely affect archaeological resources or human remains, and impacts related to cultural resources would be less than significant.

## Mitigation Measures

**MM CR-1** In the event that cultural resources are encountered during project activities, all ground-disturbing activities within a 25-foot radius of the find shall cease and the County of Monterey shall be notified immediately. Work shall not continue until a qualified archaeologist assesses the find and determines the need for further study. If the find includes Native American-affiliated materials, a local Native American tribal representative will be contacted to work in conjunction with the approved archaeologist to determine the need for further study. A standard inadvertent discovery clause shall be included in every grading and construction contract to inform contractors of this requirement.

## VI. Energy

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

## Setting

Pacific Gas and Electric Company (PG&E) is the primary energy provider in the project area. The 2022 PG&E electric power mix consists of 38% renewable energy sources and 57% greenhouse gas (GHG)-free energy sources (PG&E 2022).

## VEHICLE FUEL ECONOMY STANDARDS

In October 2012, the USEPA and National Highway Traffic Safety Administration (NHTSA), on behalf of the U.S. Department of Transportation (USDOT), issued final rules to further reduce GHG emissions and improve corporate average fuel economy (I) standards for light-duty vehicles for model years 2017 and beyond. The NHTSA's I standards have been enacted under the Energy Policy and Conservation Act since 1978. This national program requires automobile manufacturers to build a single light-duty national fleet that meets all requirements under both federal programs and the standards of California and other

states. This program would increase fuel economy to the equivalent of 54.5 miles per gallon (mpg), limiting vehicle emissions to 163 grams of carbon dioxide (CO<sub>2</sub>) per mile for the fleet of cars and light-duty trucks by the model year 2025.

In January 2017, USEPA Administrator Gina McCarthy signed a Final Determination to maintain the current GHG emissions standards for the model years 2022 through 2025 vehicles. However, on March 15, 2017, USEPA Administrator Scott Pruitt and USDOT Secretary Elaine Chao announced that the USEPA intends to reconsider the Final Determination. On April 2, 2018, USEPA Administrator Pruitt officially withdrew the January 2017 Final Determination, citing information that suggests that these current standards may be too stringent due to changes in key assumptions since the January 2017 Determination. According to the USEPA, these key assumptions include gasoline prices and overly optimistic consumer acceptance of advanced technology vehicles. The April 2, 2018, notice is not USEPA's final agency action, and the USEPA intends to initiate rulemaking to adopt new standards. Until that rulemaking has been completed, the current standards remain in effect.

As part California's overall approach to reducing pollution from all vehicles, the CARB has established standards for clean gasoline and diesel fuels and fuel economies of new vehicles. The CARB has also put in place innovative programs to drive the development of low-carbon, renewable, and alternative fuels, such as their Low Carbon Fuel Standard (LCFS) Program pursuant to California Assembly Bill (AB) 32 and the Governor's Executive Order S-01-07.

In January 2012, the CARB approved the Advanced Clean Cars Program, which combines the control of GHG emissions and criteria air pollutants, as well as requirements for greater numbers of zero-emission vehicles, into a single package of standards for vehicle model years 2017 through 2025. The new rules strengthen the GHG standard for 2017 models and beyond. This would be achieved through existing technologies, the use of stronger and lighter materials, and more efficient drivetrains and engines. The program's zero-emission vehicle regulation requires battery, fuel cell, and/or plug-in hybrid electric vehicles to account for up to 15% of California's new vehicle sales by 2025. The program also includes a clean fuels outlet regulation designed to support the commercialization of zero-emission hydrogen fuel cell vehicles planned by vehicle manufacturers by 2015 by requiring increased numbers of hydrogen fueling stations throughout the state. The number of stations would grow as vehicle manufacturers sell more fuel cell vehicles. By 2025, when the rules would be fully implemented, the statewide fleet of new cars and light trucks would emit 34% fewer global warming gases and 75% fewer smog-forming emissions than the statewide fleet in 2016 (CARB 2022).

All self-propelled off-road diesel vehicles 25 horsepower or greater used in California and most two-engine vehicles (except on-road two-engine sweepers) are subject to the CARB's Regulation for In-Use Off-Road Diesel Fueled Fleets (Off-Road regulation). This includes vehicles that are rented or leased (rental or leased fleets). The overall purpose of the Off-Road regulation is to reduce emissions of NO<sub>x</sub> and particulate matter from off-road diesel vehicles operating within California through the implementation of standards, including, but not limited to, limits on idling, reporting and labeling of off-road vehicles, limitations on use of old engines, and performance requirements.

## ***Environmental Evaluation***

### **a) Would the project result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?**

During construction, fossil fuels, electricity, and natural gas would be used by construction vehicles and equipment. The energy consumed during construction would be temporary in nature and typical of other

similar construction activities in the county. Federal and state regulations in place require the use of fuel-efficient equipment and vehicles and require wasteful activities, such as diesel idling, to be limited. Construction contractors, in an effort to ensure cost efficiency, would not be expected to engage in wasteful or unnecessary energy and fuel practices. Energy consumption during construction would not conflict with a state or local plan for renewable energy and would not be wasteful, unnecessary, or inefficient; therefore, would be *less than significant*.

Following construction, the project would operate as an existing roadway and would not require significant use of energy resources, such as electricity and natural gas. Long-term electricity use would be limited to the operation of new streetlights. Electricity would be provided by PG&E, which consists of 38% renewable energy sources and 57% GHG-free energy sources (PG&E 2022). By using electricity and natural gas from PG&E, the project would reduce the long-term use of non-renewable energy resources. The project would be limited to the operation of an existing intersection and would not include the establishment of new land uses or activities that could generate an increase in vehicle trips to and from the project site and would not otherwise increase the use of fossil fuels. Based on the nature of the proposed project, the project would not cause a substantial increase in energy use; therefore, operational impacts would be *less than significant*.

**b) Would the project conflict with or obstruct a state or local plan for renewable energy or energy efficiency?**

The 2010 Monterey County General Plan Conservation/Open Space Element identifies goals and policies to promote efficient energy use, including increasing use of renewable energy resources, directing new development toward existing urbanized areas, and increasing access to alternative forms of transportation (County of Monterey 2010). As previously identified, the project would operate as a roadway and would not require significant use of energy resources, such as electricity and natural gas, which would be consistent with the County's goal to promote efficient energy use. Therefore, the project would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency, and impacts would be *less than significant*.

**Conclusion**

The project would not result in excessive energy use during construction or operation and would be consistent with applicable energy efficiency plans; therefore, impacts related to energy would be less than significant.

**Mitigation Measures**

Mitigation is not necessary.

**VII. Geology and Soils**

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:				

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
(i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? (f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

## Setting

Ground shaking refers to the motion that occurs in response to regional and local earthquakes. Seismic ground shaking is influenced by the proximity of the project site to an earthquake fault, the intensity of the seismic event, and the underlying soil composition. Ground shaking can endanger life and safety due to damage or collapse of structures or lifeline facilities. Liquefaction is the sudden loss of soil strength due to a rapid increase in soil pore water pressure resulting from ground shaking during an earthquake. Landslides and slope instability can occur as a result of wet weather, weak soils, improper grading, improper drainage, steep slopes, adverse geologic structure, earthquakes, or a combination of these factors.

Monterey County is located in a seismically active region. According to the CDOC Fault Activity Map of California, the nearest fault is the Vergeles Fault, a late quaternary fault located approximately 3 miles northeast of the project site. In addition, the San Andreas Fault, an active fault, is located approximately 7.7 miles northeast of the project site (CDOC 2015).

Highly erodible soils are those that are easily carried by water and, to a lesser extent, by wind. Surface erosion is more commonly visible, but subsurface erosion can lead to damage to pipes, roads, foundations, and other structural elements. Expansive soils are largely comprised of clays, which expand in volume when water is absorbed and shrink as the soil dries. Expansion is measured by shrink-swell

potential, which is the volume change in soil with a gain in moisture. If the shrink-swell potential is rated moderate to high, then damage to buildings, roads, structural foundations, and pipes can occur. Expansive clay problems can be surmounted by appropriate engineering design and construction techniques. Typically, soils with high shrink-swell potential are comprised of clay and clay materials. According to NRCS, the project site is underlain by loamy sand and loamy fine sand, which are primarily comprised of sand and loam components; therefore, the project site is located in an area with low potential for expansion.

According to the U.S. Geological Survey (USGS), the project site is primarily underlain by alluvial pebble, gravel, sand, and clay of valley areas from the Holocene era (Qa) with components of Aromas sand from the late Pleistocene era (Qar) (USGS 2006). Qa is typically too young to contain paleontological resources of significance; however, due to the age of Qar, there is potential for paleontological resources to be present within the bedrock.

## **Environmental Evaluation**

### **a) Would the project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:**

#### **a-i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.**

According to the Geologic Hazards Map for Monterey County, the only Alquist-Priolo Fault Zone in Monterey County is the San Andreas Fault, located approximately 7.7 miles northeast of the project site (CDOC 2015). Because the project site would not be underlain by an Alquist-Priolo Fault, the project would not result in risk of loss, injury, or death involving rupture of an Alquist-Priolo Fault Zone, and *no impacts* would occur.

#### **a-ii) Strong seismic ground shaking?**

#### **a-iii) Seismic-related ground failure, including liquefaction?**

#### **a-iv) Landslides?**

Monterey County is located in a seismically active region; therefore, there is potential for ground shaking to occur. The nearest fault is the Vergeles Fault, a late quaternary fault located approximately 3 miles northeast of the project site. In addition, the San Andreas Fault, an active fault, is located approximately 7.7 miles northeast of the project site (CDOC 2015). According to the Geologic Hazards Map for Monterey County, the project site is located in an area with a low risk of landslide and low and high risks of liquefaction. The project includes the construction of a single-lane roundabout with a right-turn bypass lane and associated roadway improvements along an existing roadway and does not include the construction of new buildings or other structures that could result in the risk of loss, injury, or death involving seismic-related hazards. In addition, proposed roadway repairs would be required to be designed in accordance with the County's Roadway Design Standards and other applicable local and state engineering standards to avoid or minimize risk of loss, injury, or death as a result of seismic activity and related ground failure. Based on required compliance with applicable roadway design standards, the project would not result in the risk of loss, injury, or death as a result of seismic-related risk; therefore, impacts would be *less than significant*.

**b) Would the project result in substantial soil erosion or the loss of topsoil?**

Construction of the proposed project would result in approximately 3.16 acres of site disturbance. Proposed ground-disturbing activities have the potential to increase erosion at the project site, which could run off into surrounding areas. The project would disturb more than 1 acre of soils and would be required to comply with SWRCB General Construction Permit requirements, which require the preparation and implementation of a SWPPP with BMPs to reduce erosive runoff during construction. Following project construction, the project site would continue to be covered in hardscapes, which would reduce the long-term potential for erosion at the project site. Based on required compliance with SWRCB requirements, the project would not result in substantial erosion or loss of topsoil; therefore, impacts would be *less than significant*.

**c) Would the project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?**

As previously described, the project site is located in an area with low potential for landslide and liquefaction to occur. Additionally, the project site is not located in an area with known land subsidence (USGS 2023a). The project would be limited to the construction of a roundabout and associated roadway improvements along an existing roadway and does not include the construction of new buildings or other structures that could result in the risk involving ground-failure. In addition, the project would be designed in accordance with the County's Roadway Design Standards and other applicable state and local engineering practices to avoid or minimize risk as a result of potential ground-failure events. Based on required compliance with applicable roadway design standards, the project would not result in risk related to potential ground failure events; therefore, impacts would be *less than significant*.

**d) Would the project be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?**

Typically, expansive soils are comprised of clay. According to the NRCS, soils at the project site are primarily comprised of sand and loam components, which have a low potential for expansion (NRCS 2023). Further, the project would be designed in accordance with the County's Roadway Design Standards and other applicable state and local engineering practices to avoid or minimize risk as a result of potential ground-failure events, including expansion. Based on existing site conditions and required compliance with the applicable Roadway Design Standards, the project would not result in risk to life or property as a result of development on expansive soils; therefore, impacts would be *less than significant*.

**e) Would the project have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?**

The project does not include the installation of septic tanks or alternative wastewater disposal systems; therefore, *no impacts* would occur.

**f) Would the project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?**

According to the USGS, the project site is primarily underlain by Qa with components of Qar (USGS 2006). Qa is typically too young to contain paleontological resources of significance; however, due to the age of Qar, there is potential for paleontological resources to be present within the bedrock. The project site primarily consists of previously developed areas; therefore, there is low potential for intact paleontological resources to be present within the proposed area of disturbance. Construction activities are anticipated to be within the existing developed prism of the road and are not expected to disturb the underlying bedrock. Based on the limited excavation activity, the project would not disturb paleontological resources; therefore, impacts would be *less than significant*.

**Conclusion**

Proposed roadway repairs would be required to be designed and constructed according to the County's Roadway Design Standards and other state and local standards, which would reduce the potential for risk of loss, injury, or death as a result of seismic or other geologic stresses. Based on required compliance with SWRCB requirements, the project would not result in impacts related to substantial erosion. The project does not include the installation of septic tanks or alternative wastewater disposal systems. In addition, based on the limited excavation activity, the project would not disturb paleontological resources. Therefore, impacts related to geology and soils would be less than significant.

**Mitigation Measures**

Mitigation is not necessary.

**VIII. Greenhouse Gas Emissions**

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

**Setting**

GHGs are any gases that absorb infrared radiation in the atmosphere and are different from the criteria pollutants discussed in Section III, *Air Quality*. The primary GHGs that are emitted into the atmosphere as a result of human activities are CO<sub>2</sub>, methane (CH<sub>4</sub>), nitrous oxide (N<sub>2</sub>O), and fluorinated gases.

**CALIFORNIA GLOBAL WARMING SOLUTIONS ACT**

Under the California Global Warming Solutions Act, also known as AB 32, the CARB established a statewide GHG emissions cap for 2020, adopted mandatory reporting cards for significant sources of

GHG, and adopted a comprehensive plan, known as the Climate Change Scoping Plan, identifying how emission reductions would be achieved from significant GHG sources.

In 2016 Senate Bill (SB) 32 was signed into law, amending the California Global Warming Solutions Act. SB 32, and accompanying Executive Order B-30-15, requires the CARB to ensure that statewide GHG emissions are reduced to 40% below the 1990 level by 2030. The CARB updated its Climate Change Scoping Plan in December 2017 to express the 2030 statewide target in terms of million metric tons of CO<sub>2</sub> equivalent (MMTCO<sub>2</sub>e). Based on the emissions reductions directed by SB 32, the annual 2030 statewide target emissions level for California is 260 MMTOCO<sub>2</sub>e.

## **SUSTAINABLE COMMUNITIES STRATEGY AND CLIMATE PROTECTION ACT**

The Sustainable Communities Strategy and Climate Protection Act (SB 375) was signed into law in September 2008. SB 375 builds upon AB 32 by requiring the CARB to develop regional GHG reduction targets for automobile and light truck sectors for 2020 and 2035, as compared to 2005 emissions levels. Regional metropolitan planning organizations (MPOs) are responsible for preparing a Sustainable Communities Strategy (SCS) with their Regional Transportation Plans (RTPs).

## **MONTEREY BAY 2040 METROPOLITAN TRANSPORTATION PLAN/SUSTAINABLE COMMUNITIES STRATEGY**

The Association of Monterey Bay Area Governments (AMBAG) is the federally designated MPO for the three-county, 18-city Monterey Bay metropolitan region and is the transportation planning agency responsible for developing and implementing the long-range metropolitan transportation plan, known as the *2040 Metropolitan Transportation Plan / Sustainable Communities Strategy* (AMBAG MTP/SCS; AMBAG 2018). The AMBAG MTP/SCS combines the RTP contributions from three different county transportation planning agencies that represent San Benito, Santa Cruz, and Monterey Counties. The AMBAG MTP/SCS provides land use and transportation planning strategies, including transportation system management, transportation demand management, active transportation, telecommuting, and an increase in zero-emission vehicles, to reduce GHG emissions (AMBAG 2018).

## ***Environmental Evaluation***

### **a) Would the project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?**

During construction, fossil fuels, electricity, and natural gas would be used by construction vehicles and equipment that could generate GHG emissions. Federal and state regulations in place require the use of fuel-efficient equipment and vehicles and require wasteful activities, such as diesel idling, to be limited. Construction contractors, in an effort to ensure cost efficiency, would not be expected to engage in wasteful or unnecessary energy and fuel practices. Temporary traffic controls may temporarily increase traffic congestion and associated idling emissions during the 7- to 8-month-long construction period; however, following construction, traffic controls would be removed, and traffic flow would return to preconstruction conditions. Therefore, any increase in GHG emissions from vehicle idling would be temporary in nature and would not result in a new, permanent source of GHG emissions in the area. Construction activities are not anticipated to result in significant emissions, and construction-related impacts would be *less than significant*.

Typically, operational GHG emissions are generated from electricity and fossil fuel use. Electricity use during project operation would be limited to the installation of streetlights. Electricity would be provided by PG&E, which consists of 38% renewable energy sources and 57% GHG-free energy sources (PG&E

2022). By utilizing PG&E for electricity, 69% of the project's electricity demand would be sourced from GHG-free energy sources. The project would be limited to the operation of an existing intersection and would not include the establishment of new land uses or activities that could generate an increase in vehicle trips to and from the project site or would otherwise increase the use of fossil fuels. Further, the purpose of the proposed project is to reduce traffic congestion and associated vehicle idling at this intersection, which may facilitate a reduction in GHG emissions from vehicle use within the project area. Based on the nature of the proposed project, the project would not cause a substantial increase in GHG emissions; therefore, operational impacts would be *less than significant*.

**b) Would the project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?**

The AMBAG MTP/SCS outlines the region's plan for integrating the transportation network within an overall land use pattern that responds to projected growth, housing needs, changing demographics, and transportation demands while reducing GHG emissions. The proposed project would be limited to the operation of an existing roadway and does not include the development of new land uses that would be subject to mixed-land use development, transportation demand measures, or other planning strategies to reduce GHG emissions. Therefore, the project would not conflict with an applicable GHG-reduction plan or policy, and *no impacts* would occur.

## Conclusion

The project would be consistent with the AMBAG MTP/SCS and would not generate a substantial amount of short- or long-term GHG emissions; therefore, impacts related to GHG emissions would be less than significant.

## Mitigation Measures

Mitigation is not necessary.

## IX. Hazards and Hazardous Materials

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
(d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

## Setting

The Hazardous Waste and Substances Site (Cortese) List is a planning tool used by the state, local agencies, and developers to comply with CEQA requirements related to the disclosure of information about the location of hazardous materials release sites. California Government Code Section 65962.5 requires the California Environmental Protection Agency (CalEPA) to develop at least annually an updated Cortese List. Various state and local government agencies are required to track and document hazardous material release information for the Cortese List. The California Department of Toxic Substances Control (DTSC) EnviroStor database tracks DTSC cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known contamination, such as federal superfund sites, state response sites, voluntary cleanup sites, school cleanup sites, school investigation sites, and military evaluation sites (DTSC 2023). The SWRCB GeoTracker database contains records for sites that impact, or have the potential to impact, water in California, such as Leaking Underground Storage Tank (LUST) sites, Department of Defense sites, and Cleanup Program Sites (SWRCB 2023). The remaining data regarding facilities or sites identified as meeting the “Cortese List” requirements can be located on the CalEPA website (CalEPA 2023).

Based on a query of the DTSC EnviroStor and SWRCB GeoTracker databases, there are no hazardous materials sites located within or adjacent to the project site (DTSC 2023; SWRCB 2023).

## Environmental Evaluation

### a) Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

The project would require limited quantities of hazardous substances, including gasoline, diesel fuel, hydraulic fluid, solvents, oils, paints, etc. during construction, which has the potential to result in an accidental spill or release. Construction contractors would be required to comply with applicable federal and state environmental and workplace safety laws for the handling, transport, and storage of hazardous

materials, including California Code of Regulations (CCR) Title 22, Division 4.5. Operation of the project would be limited to the operation of an existing intersection and would not require the use of hazardous or acutely hazardous materials. Based on required compliance with 22 CCR Division 4.5, the project would not create a significant hazard associated with the routine transport, use, or disposal of hazardous materials; therefore, impacts would be *less than significant*.

**b) Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?**

The project does not include the handling or use of hazardous materials or volatile substances that would result in a significant risk of upset or accidental release conditions. As previously discussed, temporary construction activities would include the use of construction equipment, vehicles, and commonly used hazardous substances, including, but not limited to, paint, solvents, oils, fuel, and gasoline. Commonly used hazardous substances within the project site would be transported, stored, and used according to regulatory requirements and existing procedures for the handling of hazardous materials.

A Phase I Environmental Site Assessment (ESA) was conducted by Haro Environmental, Inc. (Haro Environmental; Appendix C) to identify any recognized environmental concerns (RECs) within the project area that could pose a significant environmental threat to subsurface soil, soil vapor, or groundwater. Based on the results of the Phase I ESA, there are no RECs within the project area that could result in adverse environmental effects (Haro Environmental 2024).

Aerially deposited lead (ADL) from the historical use of leaded gasoline exists along heavily traveled roadways throughout California (i.e., Principal Arterial roadways, freeways, and expressways). According to Caltrans California Road System – Functional Classification Mapper, Castroville Boulevard and San Miguel Canyon Road are designated as major collector roads (Caltrans 2023). Because Castroville Boulevard and San Miguel Canyon Road are not heavily traveled roadways, ADL is not expected to be found within the roadway or surrounding soils. As discussed in Section III, *Air Quality*, the project site is not located in an area with the potential for NOA to occur. However, the project would require the demolition and removal of damaged portions of the roadway and damaged culverts that have the potential to contain ACM. MM AQ-3 has been identified to reduce the potential to disturb ACM during proposed demolition activities.

Based on implementation of MM AQ-3 and required compliance with CCR Title 22, the project would not create significant hazard to the public or the environment through reasonably foreseeable upset or accident conditions involving the release of hazardous materials into the environment; therefore, impacts would be *less than significant with mitigation*.

**c) Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?**

The project site is located in a rural area and the nearest school is Liberty Family Academy, approximately 0.65 mile southeast of the project site. Therefore, the project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within 0.25 mile of a school, and *no impacts* would occur.

**d) Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?**

Based on a query of the DTSC EnviroStor and SWRCB GeoTracker databases, there are no hazardous materials sites located within or adjacent to the project site (DTSC 2023; SWRCB 2023). The project site is not located on or adjacent to a site that is on a list of hazardous materials sites pursuant to California Government Code Section 65962.5; therefore, the project would not create a significant hazard to the public or the environment related to disturbance in a hazardous materials site, and *no impacts* would occur.

**e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?**

The nearest airport is Watsonville Municipal Airport, located approximately 10.5 miles northwest of the project site; therefore, the project would not result in airport-related safety or noise hazards, and *no impacts* would occur.

**f) Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?**

The proposed project includes the construction of a roundabout and associated roadway improvements at the intersection of Castroville Boulevard and San Miguel Canyon Road. The project would require periodic closure of the existing intersection during the 7- to 8-month-long construction period. However, the project includes implementation of a temporary signalized intersection, which would maintain emergency access during short-term construction activities. In addition, the project would be conducted in phases to further maintain vehicle flow during temporary construction activities. Following project construction, roadway closures and temporary detour routes would be removed, and the intersection would be improved to a roundabout, which would ultimately improve vehicle flow and safety at the intersection. Therefore, the project would not impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan, and impacts would be *less than significant*.

**g) Would the project expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?**

The project site consists of relatively flat topography and is generally surrounded by low-density residential land uses to the east and undeveloped, open space uses to the west. The project site is located in a high Fire Hazard Severity Zone (FHSZ) within a State Responsibility Area (SRA) (California Department of Forestry and Fire Protection [CAL FIRE] 2023). The project would be limited to the construction of a roundabout and associated roadway improvements at an existing intersection and would not include the development of any structures or buildings that could increase the potential for a wildfire to occur in the immediate or surrounding area. Further, the project would be required to comply with the California Fire Code, which identifies fire safety protocol for construction and demolition activities.

Based on the nature of the proposed project and required compliance with the California Fire Code, the project would not expose nearby residents to wildfire, and impacts would be *less than significant*.

## Conclusion

Based on implementation of MM AQ-3 and required compliance with 22 CCR Division 4.5, the project is not anticipated to create significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials or through reasonably foreseeable upset or accident conditions involving the release of hazardous materials into the environment. The project would not be located within 0.25 mile of an existing or proposed school, within 2 miles of an airport, or located on or adjacent to an active hazardous materials site. Additionally, the project would not expose project occupants to risk associated with wildland fires. Construction and operation of the project would not interfere with an emergency response or evacuation plan. With implementation of MM AQ-3, potential impacts related to hazards and hazardous materials would be less than significant.

## Mitigation Measures

Implement MM AQ-3.

## X. Hydrology and Water Quality

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:				
(i) Result in substantial erosion or siltation on- or off-site;	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(iv) Impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

## Setting

The federal CWA mandates that any municipal, industrial, or commercial facility that discharges stormwater runoff must first obtain coverage under a National Pollutant Discharge Elimination System (NPDES) permit. In California, the SWRCB and nine Regional Water Quality Control Boards (RWQCBs) have been given regulatory authority by the federal government to manage NPDES programs. In July 2013, the Central Coast RWQCB adopted Order R3-2013-0032 with more stringent Post Construction Requirements (PCRs). The PCRs apply to projects located in the Urbanized Area that create or replace 2,500 square feet or more of impervious area.

According to FEMA FIRM 06053C0091G (effective 4/2/2009), the project site is located adjacent to Zone AE, an area with 1% chance of annual flooding; however, the project site is located entirely within Zone X, an area of minimal flood hazard (FEMA 2023).

## Environmental Evaluation

**a) Would the project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?**

Construction of the project would result in approximately 3.16 acres of ground disturbance. Proposed ground-disturbing activities and vehicle and equipment use would have the potential to result in erosion or other pollutants that could run off from the project site to surrounding areas. The project would disturb more than 1 acre of soils and would be required to comply with the SWRCB General Construction Permit requirements, which requires the preparation and implementation of a SWPPP with BMPs to reduce and/or eliminate pollutant discharge during construction activities. In addition, the project would be required to comply with the County Stormwater Ordinance, which identifies regulations to ensure compliance with the CWA and Porter-Cologne Act. Based on required compliance with existing SWRCB and County requirements, the project would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality, and impacts would be *less than significant*.

**b) Would the project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?**

The project site is located in the Langley Area Subbasin of the Salinas Valley Groundwater Basin, which extends over a 17,600-acre area in northeastern Monterey County, east of the Gabilan Range and south of the Elkhorn Slough (Salinas Valley Basin Groundwater Sustainability Agency [SVBGSA] 2022). The project includes improvements to an existing intersection that would result in a limited increase in impervious surface area within the project area; therefore, project activities would not substantially interfere with groundwater recharge in a manner that could impede sustainable groundwater management of the basin. In addition, the project does not require any connections to water and would not require any long-term operational water use. During construction, water may be used for dust suppression; however, any water used during construction would be limited in volume and supplied from off-site sources. The project would not decrease groundwater supply or interfere with groundwater recharge, and impacts would be *less than significant*.

**c) Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:**

**c-i) Result in substantial erosion or siltation on- or off-site?**

Construction of the project would result in approximately 3.16 acres of ground disturbance, which has the potential to increase erosion at the project site that could run off into surrounding areas. The project would disturb more than 1 acre of soils and would be required to comply with SWRCB General Construction Permit requirements, which requires the preparation and implementation of a SWPPP with BMPs to reduce and/or eliminate pollutant discharge during construction. The project would also be required to comply with the County Stormwater Ordinance, which identifies regulations to ensure compliance with the CWA and Porter-Cologne Act. Following project construction, the project site would continue to be covered in hardscapes, which would reduce the long-term potential for erosion at the project site. Based on required compliance with SWRCB and County requirements, the project would not result in substantial erosion or loss of topsoil; therefore, impacts would be *less than significant*.

**c-ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?**

The proposed project includes the construction of a roundabout and associated roadway improvements at the intersection of Castroville Boulevard and San Miguel Canyon Road. The project would be required to prepare and implement a SWPPP with BMPs to address surface water runoff during construction. The proposed project would result in a limited increase in permanent impervious surface area within the project area; therefore, the project would not be expected to substantially increase the rate of surface water in a manner that could lead to flooding on- or off-site. Further, the project site would be returned to preconstruction conditions following construction activities to avoid the long-term alteration of drainage patterns within the project area. Based on the nature of the proposed project and required compliance with SWRCB requirements, the project would not result in an increase in stormwater runoff in a manner that could lead to flooding, and impacts would be *less than significant*.

**c-iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?**

The project would result in a marginal increase in impervious surface area at the project site and would not be expected to substantially increase the rate or amount of polluted surface runoff. The project would be required to prepare and implement a SWPPP with BMPs to address polluted surface water runoff during construction activities. The project would also be required to comply with the County Stormwater Ordinance to ensure compliance with the CWA and Porter-Cologne Act. Following construction activities, the project site would be returned to preconstruction conditions and would continue to be covered in hardscapes, which would reduce the potential for a long-term increase in erosion and other pollutants at the project site. Based on required compliance with SWRCB and County requirements, the project would not create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff, and impacts would be *less than significant*.

**c-iv) Impede or redirect flood flows?**

According to FEMA FIRM 06053C0091G (effective 4/2/2009), the project site is located adjacent to Zone AE, an area with 1% chance of annual flooding; however, the project site is located entirely within Zone X, an area of minimal flood hazard (FEMA 2023). The project includes the construction of a single-lane roundabout with a right-turn bypass lane and associated roadway improvements, which would result in a minimal increase in impervious surface area within the project area. Further, the project site would be returned to preconstruction conditions following construction activities to avoid the long-term alteration of drainage patterns within the project area. Therefore, the project would not impede or redirect flood flows, and impacts would be *less than significant*.

**d) In flood hazard, tsunami, or seiche zones, would the project risk release of pollutants due to project inundation?**

According to FEMA FIRM 06053C0091G (effective 4/2/2009), the project site is located adjacent to Zone AE, an area with 1% chance of annual flooding; however, the project site is located entirely within Zone X, an area of minimal flood hazard (FEMA 2023). Additionally, the project site is not located in an area that would be subject to tsunami risk and is not located in proximity to any impounded waterbody that would be subject to seiche (CDOC 2021). The project is not within a flood hazard, tsunami, or seiche zone and would not risk release of pollutants due to project inundation, and *no impacts* would occur.

**e) Would the project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?**

As previously evaluated, the project would result in a marginal increase in impervious surface area within the Langley Area Subbasin of the Salinas Valley Groundwater Basin and would not substantially interfere with groundwater recharge in a manner that could impede sustainable groundwater management of the basin. In addition, the project does not require any connections to water and would not require any long-term operational water use. Therefore, the project would not interfere with sustainable management of the Central Coast Basin, and impacts would be *less than significant*.

The project site is under the jurisdiction of the Central Coast RWQCB and would be subject to the *Water Quality Control Plan for the Central Coastal Basin* (Central Coast Basin Plan), which sets water quality objectives and criteria to protect water quality in the Central Coast region (RWQCB 2019). The project would disturb more than 1 acre of soils and would be required to comply with the SWRCB General Construction Permit requirements, which requires the preparation and implementation of a SWPPP with BMPs to reduce and/or eliminate pollutant discharge during construction activities. Further, the project would be required to comply with the County Stormwater Ordinance, which established regulations to ensure compliance with the CWA and Porter-Cologne Act. Based on required compliance with SWRCB and County requirements, the project would be consistent with water quality protection efforts included in the Central Coast Basin Plan, and impacts would be *less than significant*.

**Conclusion**

Based on required compliance with SWRCB and County requirements, the project would not result in adverse impacts related to water quality, groundwater quality, or stormwater runoff. The project would not require connection to groundwater resources and would not be located in an area that would be subject to inundation. The project would be consistent with sustainable management of the Langley Area Subbasin and the Central Coast Basin Plan. Therefore, impacts related to hydrology and water quality would be less than significant.

## Mitigation Measures

Mitigation is not necessary.

## XI. Land Use and Planning

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Setting

Due to the diversity of Monterey County, smaller plan areas were created to provide more specific policies unique to particular geographical areas. The inland portion of unincorporated Monterey County is divided into seven Planning Areas—Cachagua, Central Salinas Valley, Greater Monterey Peninsula (including the non-coastal portion of the Del Monte Forest), Greater Salinas, North County, South County, and Toro. Area Plan policies may refine General Plan policies or provide unique policies specific to the particular geographic area. The project site is located within the North County Planning Area.

## Environmental Evaluation

### a) Would the project physically divide an established community?

The proposed project includes the construction of a roundabout and associated roadway improvements at the intersection of Castroville Boulevard and San Miguel Canyon Road. The project would require periodic closure of the intersection during the 7- to 8-month-long construction period; however, the project includes implementation of a temporary signalized intersection, which would maintain vehicle and other access during construction activities. During construction, the existing Monterey-Salinas transit stop located directly south of the intersection may be temporarily relocated further south to allow the transit stop to remain open to the public during construction activities. Following construction activities, the transit stop would be relocated to the original location to maintain long-term access and use of the transit stop. Proposed roadway improvements would ultimately improve intersection conditions in the area. The project would not result in the removal or blockage of existing public roadways or other circulation paths and would not otherwise include any features that would physically divide an established community; therefore, impacts would be *less than significant*.

### b) Would the project cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

As evaluated throughout this Initial Study, the project would be consistent with standards and policies set forth in the County's General Plan, Municipal Code, and North County Land Use Plan (County of

Monterey 1986); MBARD Particulate Matter Plan and AQMP; and AMBAG MTP/SCS. The project would be required to implement MM AQ-1 through MM AQ-3, MM BIO-1 and MM BIO-2, MM CR-1, and MM N-1 to mitigate potential impacts associated with air quality, biological resources, cultural and tribal cultural resources, hazards and hazardous materials, and noise, respectively, which is consistent with the identified plans and policies intended to avoid or mitigate adverse environmental effects. Upon implementation of identified mitigation, the project would not conflict with other local policies or regulations adopted for the purpose of avoiding or mitigating environmental effects; therefore, impacts would be *less than significant with mitigation*.

## Conclusion

The proposed project would not physically divide an established community. Upon implementation of mitigation measures identified throughout this document, the project would be consistent with the County's General Plan, Municipal Code, and North County Land Use Plan; MBARD Particulate Matter Plan and AQMP; and AMBAG MTP/SCS. Therefore, impacts would be less than significant upon implementation of the identified mitigation measures.

## Mitigation Measures

Implement MM AQ-1 through MM AQ-3, MM BIO-1 and MM BIO-2, MM CR-1, and MM N-1.

## XII. Mineral Resources

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(b) Result in the loss of availability of a locally- important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## Setting

The California Surface Mining and Reclamation Act (SMARA) of 1975 requires that the State Geologist classify land into mineral resource zones (MRZs) according to the known or inferred mineral potential of the land (PRC Sections 2710–2796).

The CGS *Special Report 251: Update of the Mineral Land Classification for Construction Aggregate Resources in the Monterey Bay Production-Consumption Region* (CGS 2021a) classifies land within the Monterey Bay Production-Consumption (P-C) Region into one of the following four categories:

- **MRZ-1:** Areas where available geologic information indicates that little likelihood exists for the presence of significant construction aggregate resources.
- **MRZ-2:** Areas where geologic information indicates the presence of significant construction aggregate resources.

- **MRZ-3:** Areas containing known or inferred construction aggregate resources of undetermined mineral resource significance.
- **MRZ-4:** Areas where available geologic information is inadequate to assign to any other mineral resource zone category.

## Environmental Evaluation

- Would the project result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?**
- Would the project result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?**

According to the CGS *Mineral Resource Zone Map for Construction Aggregate in the Monterey Bay Production-Consumption Region*, the project site does not contain any known or inferred mineral resources (CGS 2021b). In addition, the project site is not zoned or designated for mineral extraction. Therefore, the project would not result in the loss of availability of a known mineral resource or result in the loss of availability of a locally-important mineral resource recovery site, and *no impacts* would occur.

## Conclusion

No impacts to mineral resources would occur as a result of the project.

## Mitigation Measures

Mitigation is not necessary.

## XIII. Noise

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project result in:</i>				
(a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(b) Generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## Setting

Chapter 10.60 (Noise Control) of the County Municipal Code establishes standards and regulations for noise levels within the county. Table 5 defines the County's thresholds for nighttime exterior noise levels within Monterey County.

**Table 5. Exterior Noise Level Standards (Nighttime Only)**

	Standard
Nighttime hourly equivalent sound level ( $L_{eq}$ dBA)	45
Maximum level, dBA	65

Source: County of Monterey (2024)

Note: dBA = A-weighted decibels

According to Chapter 10.60 (Noise Control) of the County Municipal Code, the generation of any loud and unreasonable sound any day of the week between the hours of 9:00 p.m. and 7:00 a.m. is prohibited within the unincorporated area of Monterey County.

## Environmental Evaluation

- a) **Would the project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?**

Existing ambient noise levels in the project area consist of vehicle noise along Castroville Boulevard and San Miguel Canyon Road and surrounding low-density residential land uses. During project construction, noise from construction activities may intermittently dominate the noise environment in the immediate project area. The project would require the use of typical construction equipment (e.g., dozers, excavators, etc.) during proposed construction activities. According to the Federal Highway Administration (FHWA), noise from standard construction equipment generally ranges from 80 to 85 A-weighted decibels (dBA) at 50 feet from the source, as shown in Table 6 (FHWA 2018).

**Table 6. Construction Equipment Noise Emission Levels**

Equipment Type	Typical Noise Level (dBA) 50 Feet from Source
Concrete Mixer, Dozer, Excavator, Jackhammer, Man Lift, Paver, Scraper	85
Heavy Truck	84
Crane, Mobile	83
Concrete Pump	82
Backhoe, Compactor	80

Source: FHWA (2018)

The project site is located in a moderately developed area. The nearest sensitive receptor is a single-family residence located approximately 150 feet east. Construction-related noise would be short term and intermittent and would not result in a permanent increase in ambient noise within the project area. The project would require construction activities during nighttime hours (9:00 p.m. and 7:00 a.m.). Proposed

construction activities that would occur during nighttime hours would include roadway improvements, embankment adjustments, and restriping. An exception to the County's noise standards would be required to be obtained for the project prior to the commencement of construction activities. Further, due to the proximity of nearby sensitive receptors, MM N-1 has been identified to reduce construction-related noise. With implementation of MM N-1, construction-related noise would not exceed County noise standards; therefore, impacts would be *less than significant with mitigation*.

The project includes the construction of a single-lane roundabout with a right-turn bypass lane and associated roadway improvements at an existing intersection and does not include the establishment of new land uses that could permanently increase ambient noise levels within the project area. Therefore, operational noise generated by the project would be consistent with the existing level of noise within the project area, and potential impacts would be *less than significant*.

**b) Would the project result in generation of excessive groundborne vibration or groundborne noise levels?**

The proposed project has the potential to generate limited groundborne vibration during demolition of the existing roadway. Construction activities would not require any pile driving or high impact construction activities that could result in substantial groundborne vibration. Equipment for proposed demolition activities would be most similar to a large bulldozer and a jackhammer, which would generate a vibration level of approximately 0.089 inches per second at 25 feet from the source and 0.035 inches per second at 25 feet from the source, respectively. These vibration levels would fall below the 0.3 inch per second building damage criterion established by Caltrans (Federal Transit Administration [FTA] 2018). Operation of the project does not include new features that could generate substantial long-term groundborne noise above existing conditions. Therefore, impacts related to exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels would be *less than significant*.

**c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?**

The project site is not located within the vicinity of a private airstrip, within an airport land use plan, or within 2 miles of an airport; therefore, the project would not expose people residing or working in the project area to excessive noise levels, and *no impacts* would occur.

## **Conclusion**

With implementation of MM N-1, the project would not generate a substantial increase in temporary or permanent ambient noise levels or generate groundborne noise in a manner that would result in disturbance. The project site is not located within an airport land use plan or within 2 miles of an airport. Therefore, with implementation of MM N-1, impacts related to noise would be less than significant.

## **Mitigation Measures**

**MM N-1** For the entire duration of the construction phase of the project, the following noise reduction measures shall be implemented to ensure that noise levels are maintained within levels allowed by Chapter 10.60 (Noise Control) of the County of Monterey Municipal Code:

1. Stationary construction equipment that generates noise that exceeds 65 A-weighted decibels (dBA) at the project boundaries shall be shielded with the most modern noise control devices (i.e., mufflers, lagging, and/or motor enclosures).
2. Impact tools (e.g., jackhammers, pavement breakers, rock drills, etc.) used for project construction shall be hydraulically or electrically powered wherever possible to avoid noise associated with compressed air exhaust from pneumatically powered tools.
3. Where use of pneumatic tools is unavoidable, an exhaust muffler on the compressed air exhaust shall be used.
4. All construction equipment shall have the manufacturers' recommended noise abatement methods installed, such as mufflers, engine enclosures, and engine vibration insulators, intact and operational.
5. All construction equipment shall undergo inspection at periodic intervals to ensure proper maintenance and presence of noise control devices (e.g., mufflers, shrouding, etc.).
6. The project contractor shall inform residents at properties within 300 feet of the project of proposed construction timelines and noise compliant procedures to minimize potential annoyance related to construction noise.

## XIV. Population and Housing

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

### Setting

According to the U.S. Census Bureau, as of 2022, Monterey County had a population of approximately 432,858 persons. The average household size was approximately 3.24 persons (U.S. Census Bureau 2022).

## Environmental Evaluation

- a) **Would the project induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?**

The proposed project would be limited to the construction of a roundabout and associated roadway improvements along an existing roadway to improve safety and reduce vehicle congestion. The project does not include the construction of new residences, businesses, or other uses that could directly include population growth within the county. Proposed construction activities have the potential to generate short-term employment opportunities; however, project construction is expected to use workers from the local employment force and would not require workers to relocate to the project area. Therefore, the project would not induce substantial or unplanned population growth, and impacts would be *less than significant*.

- b) **Would the project displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?**

The project includes the ROW acquisition of four surrounding parcels; however, the project would not require the removal or demolition of existing residences or other structures; therefore, the project would not require the construction of replacement housing elsewhere, and *no impacts* would occur.

## Conclusion

The project would not induce substantial or unplanned population growth and does not require the removal of existing residences; therefore, impacts related to population and housing would be less than significant.

## Mitigation Measures

Mitigation is not necessary.

## XV. Public Services

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
Fire protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Police protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## Setting

The Monterey County Regional Fire District (MCRFD) provides fire protection services to approximately 400 square miles and 40,000 residents within Monterey County. The MCRFD staffs seven fire stations with 70 full-time employees that are supported by three volunteer firefighters. CAL FIRE also provides fire protection services within the county from seven fire stations and one conservation camp located in Monterey County, and there are additional volunteer fire protection services located within the county. The nearest fire station to the project site is the North County Fire District, located approximately 5.5 miles southwest of the project site.

Police services are provided by the Monterey County Sheriff's Office, which has approximately 450 employees and provides law enforcement and emergency response to approximately 110,000 residents in Monterey County. The nearest sheriff's station is the Monterey County Sheriff's Department Headquarters, approximately 7.85 miles southeast of the project site.

The Monterey Peninsula Regional Park District (MPRPD) operates approximately 24 parks and open spaces over an approximately 500-square-mile area in Monterey County. Manzanita County Park is located adjacent to the southern portion of the project site.

## Environmental Evaluation

- a) **Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:**

### ***Fire Protection?***

The project does not include the construction of new buildings or structures that would directly increase demand on existing fire protection services. The proposed project would be limited to the construction of a roundabout and associated roadway improvements along an existing roadway and would not facilitate unplanned or substantial population growth in a manner that would increase demand on existing fire protection services. Therefore, the project would not require new or physically altered governmental facilities for fire protection services, and *no impacts* related to fire protection would occur.

### **Police Protection?**

The project does not include the construction of new residences, businesses, or other uses that would directly increase demand on existing police protection services. The project would be limited to the construction of a roundabout and associated roadway improvements along an existing roadway and would not facilitate unplanned or substantial population growth in a manner that would increase demand on existing police protection services. Therefore, the project would not require new or physically altered governmental facilities for police protection services, and *no impacts* would occur.

### **Schools?**

As discussed in Section XIV, *Population and Housing*, the project would not induce direct or indirect population growth. The project would not result in an increase in school-aged children in the area. Therefore, the project would not create an increased demand on local schools, and *no impacts* would occur.

### **Parks?**

As discussed in Section XIV, *Population and Housing*, the project would not induce direct or indirect population growth. The project would not result in a population increase that could result in deterioration of existing recreation facilities or require the expansion of new facilities. Therefore, the project would not create an increased demand on public recreation facilities, and *no impacts* would occur.

### **Other Public Facilities?**

As discussed in Section XIV, *Population and Housing*, the project would not induce direct or indirect population growth. The project does not propose features that would significantly increase the demand on public facilities, such as libraries or post offices, or result in the need for new or physically altered governmental facilities; therefore, *no impacts* would occur.

### **Conclusion**

The project would not increase demand for fire or police protection services, schools, parks, libraries, or other public facilities; therefore, no impacts related to public services would occur as a result of the project, and mitigation measures are not necessary.

### **Mitigation Measures**

Mitigation is not necessary.

## **XVI. Recreation**

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
(a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
(b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## Setting

The MPRPD operates approximately 24 parks and open spaces over an approximately 500-square-mile area in Monterey County. Manzanita County Park is located adjacent to the southern portion of the project site.

## Environmental Evaluation

### a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

As discussed in Section XIV, *Population and Housing*, the project would be limited to the construction of a roundabout and associated roadway repairs along an existing rural roadway and would not induce substantial or unplanned population growth in the county. Based on the negligible population growth associated with the proposed project, the project would not increase the use of existing recreational facilities in a manner that would lead to substantial deterioration of existing recreational facilities, and *no impacts* would occur.

### b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

The project does not include the construction of new recreational facilities, including bike lanes, nor would it require the construction or expansion of recreational facilities elsewhere, and *no impacts* would occur.

## Conclusion

The project would not directly or indirectly increase the use of existing recreational facilities in a manner that would result in substantial physical deterioration of these facilities or require the construction of new or expanded facilities that could result in adverse physical effects on the environment. Therefore, no impacts related to recreation would occur, and mitigation measures are not necessary.

## Mitigation Measures

Mitigation is not necessary.

## XVII. Transportation

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(d) Result in inadequate emergency access?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Setting

The 2010 Monterey County General Plan Circulation Element identifies goals and policies to provide adequate transportation systems to serve the unincorporated lands of Monterey County through the year 2030. These goals and policies are intended to achieve an acceptable level of service (LOS) along roadways, optimize the use of transportation facilities, reduce adverse environmental impacts associated with transportation planning, provide for safe movement of people and goods, protect scenic roadways, and promote alternative modes of transportation (County of Monterey 2010). In addition, the AMBAG MTP/SCS provides land use and transportation planning strategies, including transportation system management, transportation demand management, active transportation, telecommuting, and an increase in zero-emission vehicles, intended to reduce GHG emissions (AMBAG 2018).

The project site consists of the intersection of Castroville Boulevard and San Miguel Canyon Road. The intersection is controlled by a stop sign at the terminus of Castroville Boulevard. The segment of Castroville Boulevard in the project area consists of a single westbound lane and a single eastbound lane with a dedicated right-turn lane. The segment of San Miguel Canyon Road in the project area consists of a single northbound lane with a dedicated left-turn lane at the intersection, a merge lane directly north of the intersection, and a single southbound lane with a dedicated right-turn lane at the intersection. The posted speed limit is 55 mph, and approximately 2,000 vehicles utilize this intersection per hour.

### Environmental Evaluation

#### a) Would the project conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

The project includes the construction of a single-lane roundabout with a right-turn bypass lane and associated roadway improvements at an existing intersection and would not include the development of new land uses or transportation corridors that would be applicable to transportation and/or land use planning strategies included in the County Circulation Element or the AMBAG MTP/SCS. During construction, the existing Monterey-Salinas transit stop located directly south of the intersection may be temporarily relocated further south to allow the transit stop to remain open to the public during

construction activities. Following construction activities, the transit stop would be relocated to the original location to maintain long-term access and use of the transit stop, which would be consistent with goals related to maintaining a safe and efficient transportation system. The project would ultimately improve vehicle flow and safety at the intersection of Castroville Boulevard and San Miguel Canyon Road, which would be consistent with goals and policies included in the County Circulation Element related to providing safe and optimal travel along County roadways. The project does not propose features that would increase capacity of the existing roadway or increase long-term circulation to and from the project site; therefore, the project would not result in a substantial increase in long-term vehicle trips that could reduce the existing LOS or result in adverse environmental impacts, which is consistent with the County Circulation Element. Further, the project would install pedestrian facilities within at the intersection to improve pedestrian facilities. Therefore, the project would be consistent with the goals and policies of the County Circulation Element and the AMBAG MTP/SCS, and impacts would be *less than significant*.

**b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?**

According to the *Technical Advisory on Evaluating Transportation Impacts in CEQA* (California Governor's Office of Planning and Research [OPR] 2018), projects that would not generate a potentially significant level of vehicle miles traveled (VMT), that are consistent with an SCS or general plan, or that would generate or attract fewer than 110 trips per day would not result in significant transportation impacts. The project does not propose features that would increase long-term circulation to or from the project site. The project would continue to operate as a roadway and would not generate new vehicle trips that could meet or exceed 110 trips per day and would not generate a significant increase in VMT; therefore, project impacts would be *less than significant*.

**c) Would the project substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?**

The project includes the construction of a single-lane roundabout with a right-turn bypass lane and associated roadway improvements at the intersection of Castroville Boulevard and San Miguel Canyon Road. Proposed roadway improvements, including proposed pedestrian walkways, would be constructed in compliance with County Roadway Design Standards and other applicable engineering practices to avoid risk associated with hazardous roadway design. In addition, the project does not include the development of new land uses that could introduce incompatible uses along Castroville Boulevard, San Miguel Canyon Road, or the associated intersection. Based on required compliance with County Roadway Design Standards and other applicable engineering practices, the project would not result in hazardous roadway design features; therefore, impacts would be *less than significant*.

**d) Would the project result in inadequate emergency access?**

The proposed project includes the construction of a roundabout and associated roadway improvements at the intersection of Castroville Boulevard and San Miguel Canyon Road. The project would require periodic closure of the existing intersection during the 7- to 8-month-long construction period. However, the project includes implementation of a temporary signalized intersection, which would maintain emergency access during construction activities. Additionally, project construction would be conducted in a phased approach to further maintain vehicle flow during temporary construction activities. Following project construction, roadway closures and temporary detour routes would be removed, and the intersection would be improved to a roundabout, which would ultimately improve vehicle flow and safety

at the intersection. Therefore, the project would not result in inadequate emergency access, and impacts would be *less than significant*.

## Conclusion

The project would be consistent with the County Circulation Element and the AMBAG MTP/SCS. The project does not propose features that would increase long-term circulation to or from the project site and would not exceed the established VMT threshold of 110 trips per day. Proposed intersection and roadway improvements would be subject to the County Roadway Design Standards and other applicable engineering practices and would not result in hazardous features. The project would ultimately improve emergency response and evacuation efforts within the project area. Therefore, impacts related to transportation would be less than significant.

## Mitigation Measures

Mitigation is not necessary.

## XVIII. Tribal Cultural Resources

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
(a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
(i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Setting

Approved in 2014, AB 52 added tribal cultural resources to the categories of resources that must be evaluated under CEQA. Tribal cultural resources are defined as either of the following:

1. Sites, features, cultural landscapes, sacred places, and objects with cultural value to a California Native American tribe that are either of the following:
  - a. Included or determined to be eligible for inclusion in the CRHR; or
  - b. Included in a local register of historical resources as defined in PRC Section 5020.1(k).

2. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in PRC Section 5024.1(c). In applying these criteria for the purposes of this paragraph, the lead agency shall consider the significance of the resource to a California Native American Tribe.

Recognizing that tribes have expertise with regard to their tribal history and practices, AB 52 requires lead agencies to provide notice to tribes that are traditionally and culturally affiliated with the geographic area of a proposed project if they have requested notice of projects proposed within that area. If the tribe requests consultation within 30 days upon receipt of the notice, the lead agency must consult with the tribe regarding the potential for adverse impacts on tribal cultural resources as a result of a project. Consultation may include discussing the type of environmental review necessary, the presence and/or significance of tribal cultural resources, the level of significance of a project's impacts on the tribal cultural resources, and available project alternatives and mitigation measures recommended by the tribe to avoid or lessen potential impacts on tribal cultural resources.

## ***Environmental Evaluation***

- a) **Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:**

- a-i) Listed or eligible for listing in the California Register of Historical Resources or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)?*

Based on the records search conducted for the proposed project, there are no previously documented historical tribal cultural resources located within the project area (SWCA 2024). Therefore, the project would not cause an adverse change in the significance of a historical tribal cultural resource, and *no impact* would occur.

- a-ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.*

Pursuant to AB 52, the County provided notice to local California native tribes with geographic and/or cultural ties to the project region. Referral letters were sent to tribal representatives on March 25, 2024. No tribes have requested consultation or provided information regarding significant tribal cultural resources to date.

The proposed project would require ground-disturbing activities over the approximate 1.3-acre project site. Based on a records search conducted at the NWIC (NWIC File No.: 23-0541), no previously documented archaeological resources are located within a 0.25-mile radius of the project area, and no archaeological resources or evidence of archaeological resources were observed during the pedestrian

field survey; therefore, there is low potential for archaeological resources to be present within the project area (SWCA 2024). Further, MM CR-1 has been included in the unlikely event that previously unidentified cultural resources are uncovered during proposed ground-disturbing activities. In the unlikely event that human remains are encountered during proposed ground-disturbing activities, the project would be required to comply with California Health and Safety Code Section 7050.5, which outlines the protocol for unanticipated discovery of human remains. Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to PRC Section 5097.98. The County Coroner must be notified of the find immediately. If the human remains are determined to be prehistoric, the coroner will notify the NAHC, which will determine and notify an MLD. The MLD shall complete the inspection of the project site within 48 hours of notification and may recommend scientific removal and nondestructive analysis of human remains and items associated with Native American burials. Based on the low potential to uncover cultural resources within the project area, implementation of MM CR-1, and required compliance with California Health and Safety Code Section 7050.5, the project would not result in adverse impacts to known or unknown tribal cultural resources; therefore, impacts would be *less than significant with mitigation*.

## Conclusion

Based on the low potential to uncover cultural resources within the project area, implementation of MM CR-1, and required compliance with California Health and Safety Code Section 7050.5, the project would not result in adverse impacts to known or unknown tribal cultural resources. Therefore, with implementation of MM CR-1, impacts related to tribal cultural resources would be less than significant.

## Mitigation Measures

Implement MM CR-1.

## XIX. Utilities and Service Systems

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>Would the project:</i>				
(a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
(d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

## Setting

The project site is located in the Langley Area subbasin of the Salinas Valley Groundwater Basin (California Department of Water Resources [DWR] subbasin number 3-004.09). The Langley Area subbasin encompasses an area of northeastern Monterey County, east of the Gabilan Range and south of the Elkhorn Slough. The primary water uses in the subbasin are rural residential uses, and some agricultural uses are located along the southern boundary of the subbasin. The main water source in the subbasin is groundwater that is supplemented by surface water diversions. The Langley subbasin is entirely within the jurisdiction of the SVBGSA (SVBGSA 2022).

There are three landfills located in Monterey County, including Johnson Canyon Sanitary Landfill, approximately 25 miles southeast of the project site; Monterey Regional Waste Management District (MRWMD; ReGen Monterey Landfill), approximately 8.5 miles southwest of the project site; and Salinas Transfer Station and Recycling Center, approximately 8 miles south of the project site.

There is existing utility infrastructure located within the project area, including AT&T, PG&E, and Comcast infrastructure.

## Environmental Evaluation

### a) **Would the project require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?**

The project would require the relocation of existing utility infrastructure during proposed construction activities, which would be conducted within the footprint of the proposed project. As evaluated throughout this Initial Study, the project has the potential to result in adverse impacts related to air quality, biological resources, cultural and tribal cultural resources, hazards and hazardous materials, and noise. MM AQ-1 through MM AQ-3, MM BIO-1 and MM BIO-2, MM CR-1, and MM N-1 have been included to avoid and/or minimize adverse impacts to less-than-significant levels. Therefore, upon implementation of the identified mitigation measures, relocation of utility infrastructure would not result in adverse impacts to the environment; therefore, potential impacts would be *less than significant with mitigation*.

**b) Would the project have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?**

The project does not require any connections to water and would not require any long-term operational water use. During construction, water may be used for dust suppression; however, any water used during construction would be limited in volume and supplied from off-site sources. Therefore, *no impacts* would occur.

**c) Would the project result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?**

Operation of the project does not include connection to any public or private wastewater treatment providers. Portable restrooms would likely be used by workers and other personnel throughout the construction period; therefore, the project would not require short- or long-term connections to wastewater treatment providers, and *no impacts* would occur.

**d) Would the project generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?**

Construction of the project may result in a temporary increase in solid waste, which would be disposed of in accordance with applicable state and local laws and regulations, such as California Green Building Standards Code (CALGreen) Sections 4.408 and 5.408, which requires diversion of at least 75% of construction waste. Based on required compliance with CALGreen regulations, construction of the project would not generate solid waste in excess of local infrastructure capacity. Solid waste landfills within Monterey County have adequate capacity to dispose of the marginal amount of solid waste generated by the project. Operation of the project would result in the continued operation of a roadway and would not generate waste in excess of state or local standards or in excess of the capacity of local infrastructure; therefore, impacts would be *less than significant*.

**e) Would the project comply with federal, state, and local management and reduction statutes and regulations related to solid waste?**

As previously described, operation of the project would not result in the long-term generation of solid waste. Construction-related waste (i.e., excavated soils) would be disposed of according to federal and state regulations, including CALGreen standards for diversion of construction waste. Therefore, the project would not generate long-term solid waste and would be compliant with solid waste reduction statutes and regulations, and impacts would be *less than significant*.

## **Conclusion**

Implementation of MM AQ-1 through MM AQ-3, MM BIO-1 and MM BIO-2, MM CR-1, and MM N-1 would reduce potential adverse environmental impacts related to relocation of utility infrastructure within the project area to less-than-significant levels. The project does not require connection to groundwater resources or a local water or wastewater provider. The project would not generate solid waste in exceedance of state or local regulations. Therefore, with implementation of MM AQ-1 through

MM AQ-3, MM BIO-1 and MM BIO-2, MM CR-1, and MM N-1, impacts related to utilities and service systems would be less than significant.

## Mitigation Measures

Implement MM AQ-1 through MM AQ-3, MM BIO-1 and MM BIO-2, MM CR-1, and MM N-1.

## XX. Wildfire

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<i>If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:</i>				
(a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

## Setting

A wildfire is any uncontrolled fire occurring on undeveloped land that requires fire suppression. Wildfires put lives and property at risk and compromise rivers and watersheds, open space, timber, range, recreational opportunities, wildlife habitats, historic and cultural areas assets, scenic assets, and local economies. The potential for significant damage to life and property increases in areas where development is adjacent to dense vegetation, known as wildland urban interface (WUI) areas. The severity of the wildland fire hazard is determined by the relationship between three factors: fuel classification, topographic slope, and critical fire weather frequency (County of Monterey 2023b).

The history of wildfires in Monterey County is significant. Since 1911, there has been an average of four wildfires per year, with an average of 17,000 acres burning annually. Each area of the county consists of unique variations of topography, fuel, and weather that impact wildfire behavior. According to the CAL FIRE FHSZ Viewer, the project site is located in a high FHSZ within an SRA (CAL FIRE 2023).

## **Environmental Evaluation**

- a) If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project substantially impair an adopted emergency response plan or emergency evacuation plan?**

The project site is located within a high FHSZ within an SRA (CAL FIRE 2023). The project includes the construction of a single-lane roundabout with a right-turn bypass lane and associated roadway improvements at an existing intersection. The project would require temporary closure of the existing intersection during the 7- to 8-month-long construction period. However, the project includes implementation of a temporary signalized intersection, which would maintain emergency and other access during construction activities. Project construction would also be conducted in a phased approach to further maintain vehicle flow during short-term construction activities. Following project construction, roadway closures would be removed, and the intersection would be improved to a roundabout, which would ultimately improve vehicle flow and safety at the intersection. Therefore, the project would not impede an emergency response or evacuation plan, and impacts would be *less than significant*.

- b) Due to slope, prevailing winds, and other factors, if located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?**

The project site consists of relatively flat topography and is generally surrounded by low-density residential land uses to the east and undeveloped open space uses to the west. The project site is located in a high FHSZ within an SRA (CAL FIRE 2023). The project would be limited to the construction of a roundabout and associated roadway improvements at an existing intersection and would not include the development of any structures or buildings that could increase the potential for a wildfire to occur in the immediate or surrounding area. Further, the project would be required to comply with the California Fire Code, which identifies fire safety protocols for construction and demolition activities. Therefore, the project would not expose nearby residents to wildfire, and impacts would be *less than significant*.

- c) If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?**

The project site is located within a high FHSZ (CAL FIRE 2023). The project includes the construction of a single-lane roundabout with a right-turn bypass lane and associated roadway improvements at an existing intersection and would not result in the construction of new or expanded roadways that could exacerbate wildfire risk within the project area. The project would be required to comply with the California Fire Code, which identifies fire safety protocol for construction and demolition activities. In addition, proposed roadway improvements would be conducted in accordance with the County Roadway Design Standards and other applicable engineering practices, which would reduce the potential to increase wildfire risk within the project area. Based on the nature of the proposed project and required compliance

with County requirements, the project would not exacerbate wildfire risk; therefore, impacts would be *less than significant*.

**d) If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?**

According to the Geologic Hazards Map for Monterey County, the project site is located in an area with a low risk of landslide and low and high risks of liquefaction. In addition, the project site is located adjacent to a 100-year flood zone; however, it is not located within a 100-year flood zone (FEMA 2023). The project would not include the development of any structures or buildings that could expose people or structures to post-fire risks. The project includes the construction of a single-lane roundabout with a right-turn bypass lane and associated roadway improvements at an existing intersection, which would be constructed in compliance with the County Roadway Design Standards and other applicable engineering practices to avoid risk associated with post-fire flooding and ground-failure events. Based on required compliance with the County Roadway Design Standards and other applicable engineering practices, the project would not expose people or structures to post-fire risks; therefore, impacts would be *less than significant*.

## Conclusion

The project would not expose people or structures to new or exacerbated wildfire risks or require the development of new or expanded infrastructure or maintenance to reduce wildfire risks, and impacts related to wildfire would be less than significant.

## Mitigation Measures

Mitigation is not necessary.

## XXI. Mandatory Findings of Significance

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
(a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Environmental Issues	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
(b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Environmental Evaluation

- a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?**

Based on the analysis provided in the resource sections above, the project has the potential to disturb sensitive biological resources and unknown cultural and/or tribal cultural resources. MM BIO-1 and MM BIO-2 have been identified and would reduce potential impacts related to nesting birds and removal of oak trees to less than significant. Additionally, MM CR-1 has been identified to reduce impacts to unknown cultural and/or tribal cultural resources if present within the project area. Therefore, potential impacts would be *less than significant with mitigation*.

- b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?**

Based on the nature of the proposed development and the analysis provided in the resource sections above, the project would have the potential to result in environmental impacts associated with air quality, biological resources, cultural and tribal cultural resources, hazards and hazardous materials, and noise that could have a cumulative effect with other development projects in the project region. MM AQ-1 through MM AQ-3, MM BIO-1 and MM BIO-2, MM CR-1, and MM N-1 have been identified to reduce potential environmental impacts associated with the project to a less-than-significant level. Other past and future development projects requiring a discretionary permit in the project region would also be subject to applicable mitigation measures to reduce potential impacts associated with these impact issue areas. Therefore, based on implementation of project-level mitigation measures, discretionary review, and CEQA review of other projects within the project area, potential impacts would be *less than cumulatively considerable with mitigation*.

**c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?**

Based on the nature and scale of the proposed project and the analysis provided in the resource sections above, the project has the potential to cause environmental effects that could result in substantial adverse effects on human beings. Potential impacts associated with air quality, hazards and hazardous materials, and noise would be reduced to less-than-significant levels with implementation of MM AQ-1 through MM AQ-3 and MM N-1. Therefore, potential impacts associated with environmental effects that would cause substantial adverse effects on human beings would be *less than significant with mitigation*.

**Conclusion**

Based on implementation of MM AQ-1 through MM AQ-3, MM BIO-1 and MM BIO-2, MM CR-1, and MM N-1, all potential impacts associated with the construction and operation of the proposed project would be mitigated to less-than-significant levels.

## EXECUTIVE SUMMARY

---

This Phase I Environmental Site Assessment (Phase I ESA) of the property identified as the Prunedale Roundabout Project (Project) located in Monterey County, California was performed by Haro Environmental in conjunction with SWCA Environmental Consultants (SWCA) for the County of Monterey. A site vicinity map is provided on Plate 1. Haro Environmental performed this Phase I ESA consistent with the American Society for Testing and Materials (ASTM) Practice E-1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM Standard). Exceptions to, or deletions from, this practice are described in this report.

The purpose of this assessment was to identify known, potential or historic recognized environmental conditions (RECs) resulting from historic and/or current uses of hazardous substances or petroleum products at the Project Area. We understand the County of Monterey is planning to reconstruct the Project Area intersection with a roundabout and is interested in identifying environmental concerns associated with the Project Area. The findings of this environmental assessment are based on Haro Environmental's knowledge of the Project Area from observations and information gathered during this Phase I ESA.

The Project Area is an approximately 0.35-acre area currently developed with San Miguel Canyon Road and Castroville Boulevard. The Project will include partial take of a portion of Monterey County Assessor's Parcel Numbers 129-083-031, 129-051-033, and 127-361-007, and the area of potential effects (APE) will include additional parcels 127-361-026, 127-361-013, 127-361-014, and 127-361-015.

Haro Environmental contracted a government agency database search from Environmental Data Resources (EDR). Government agency database records are sources of information that may be helpful in evaluating activities that may have contributed to a release of hazardous substances or petroleum products to soil and/or groundwater. The Project Area and adjacent properties were not listed in the databases searched by EDR. Two nearby properties were listed within the approximate minimum search distances; however, based on the distance from the Project Area, these nearby listed properties would not be expected to pose an environmental concern to the Project Area.

A review of historic aerial photographs, topographic maps, and city directories listings show the Project Area has been developed with roads since at least 1915 (first topographic map reviewed), and had residential structures developed on properties adjacent to the Project area by at least 1917. The nearby structures appear to have been solely used for residence, and were only documented as residences in the city directories with exception to the county park on the southeast portion of the Project area. A seasonal

creek is depicted parallel to the east of San Miguel Canyon Road. No mapped oil wells are located within a 1-mile radius of the Project Area. A review of the National Pipeline Mapping System indicates one active natural gas pipeline is located approximately ½ mile north of Castroville Boulevard, running east to west; however, based on the distance from the Project Area and the contents, this pipeline is not expected to pose an environmental concern to the Site.

A reconnaissance of the Project Area was conducted by a Haro Environmental representative on January 5, 2024. During the reconnaissance, Haro Environmental did not observe hazardous materials or petroleum products at or adjacent to the Project Area that would be expected to pose an environmental concern to the Project.

Based on the data gathered and reviewed during this Phase I ESA, Haro Environmental did not identify recognized environmental conditions or concerns that have impacted, or pose a significant environmental threat to subsurface soil, soil vapor, or groundwater beneath the Project Area.

Because we have no evidence indicating that the Site has been impacted by hazardous materials or petroleum products, no additional assessment appears warranted at this time.

## 1.0 INTRODUCTION

---

This Phase I Environmental Site Assessment (Phase I ESA) of the property identified as the Prunedale Roundabout Project (Project) located in Monterey County, California was performed by Haro Environmental in conjunction with SWCA Environmental Consultants (SWCA) for the County of Monterey. A site vicinity map is provided on Plate 1. Haro Environmental performed this Phase I ESA consistent with the American Society for Testing and Materials (ASTM) Practice E-1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM Standard). Exceptions to, or deletions from, this practice are described in Section 7.0 this report.

### 1.1 PURPOSE

This Phase I ESA was conducted in an effort to identify known, potential or historic recognized environmental conditions (RECs) resulting from historic and/or current uses of the Project Area. We understand this information will be used to qualify for the liability protections granted under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The ASTM Standard defines a REC as:

“The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.” The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions”

The ASTM Standard defines a historical REC as:

“An environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently.” For example, a historical REC could be identified if a past release of any hazardous substances or petroleum products has occurred in connection with the property and has

been remediated to the satisfaction of the lead regulatory agency as evidenced by a no further action letter or a case closure determination.

At the request of SWCA, on behalf of County of Monterey who we understand is planning to improve the Project Area with a roundabout, Haro Environmental has completed this Phase I ESA. This report is subject to the limitations presented in this Phase I ESA report.

This report describes Haro Environmental's assessment methodology, presents our findings, and provides our opinion as to the potential presence of RECs in connection with the Project Area.

## **1.2 SCOPE OF SERVICES**

The scope of services conducted for this study included the following tasks:

- Perform an on-site reconnaissance to identify indicators of the existence of hazardous materials or petroleum products.
- Observe adjacent or nearby properties from the Project Area and public thoroughfares in an attempt to see if such properties are likely to use, store, generate, or dispose of hazardous materials or petroleum products.
- Obtain and review an environmental records database search from Environmental Data Resources, Inc. (EDR) to acquire information about the potential for hazardous materials to exist at on-site or at nearby properties.
- Review the current U.S. Geological Survey (USGS) topographic map to obtain information about topography and uses of the Project Area and nearby properties.
- Review historic aerial photographs, topographic maps, and city directories listings to obtain information about historic uses of the Project Area and adjacent properties.
- Review California Division of Oil and Gas records to obtain information about historic oil and gas activity in the vicinity of the Project Area.

- Conduct interviews with persons familiar with the Project Area development and local and/or State government agencies to obtain information about current and historic uses of the property.
- Prepare this report documenting the findings of the Phase I study.

Our scope of services did not include any inquiries with respect to non-scope ASTM considerations including but not limited to asbestos containing materials, radon gas, lead-based paint, lead in drinking water, mold, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, Per- and Polyfluoroalkyl substances (PFAS), ecological resources, endangered species, indoor air quality, electromagnetic fields or geologic hazards.

## **2.0 PROJECT DESCRIPTION AND SETTING**

---

The County of Monterey is proposing to replace the existing one-way stop-controlled intersection of San Miguel Canyon Road and Castroville Boulevard with a single lane roundabout. The Project is located in unincorporated Prunedale within northern Monterey County. The proposed project has been identified as a strategic solution to address safety and congested traffic conditions experienced along the San Miguel Canyon Road corridor. The Project is included in the Highway Safety Improvement Program (HSIP) Cycle 10 project list released on March 30, 2021. The County is the Lead Agency pursuant to the California Environmental Quality Act (CEQA).

San Miguel Canyon Road and Castroville Boulevard are both classified as Major Collectors according to the California Road System (CRS). Existing San Miguel Canyon Road is free flowing with a posted speed of 55 miles per hour (mph) at the project site. Castroville Boulevard is one-way stop-controlled which requires vehicles turning from eastbound Castroville Boulevard to find a gap in vehicles traveling on San Miguel Canyon Road.

The purpose of the Project is to improve the safety of the existing intersection by reducing vehicular collision severity (broadside collisions) and reducing the speed of vehicles through the intersection. The Project will also accommodate future travel demands in the region and decrease congestion along the corridor. Once complete, the yield-controlled intersection will allow consistent traffic flow from all directions.

The area of potential effects (APE) from construction of the Project was assessed as part of this Phase I ESA, and is defined as the Project Area (see Plate 2 for the mapped Project Area). The Project Area setting presented in this section describes the condition of the Project Area at the time of the Phase I ESA. Tables 2-1 and 2-2 summarize the physical characteristics of the Project Area and adjoining properties. A Project Area and Adjacent Land Use Map is provided on Plate 2.

### **2.1 PROJECT AREA DESCRIPTION**

Table 2-1 provides a summary of the physical location and size of the Project Area, as well as the current uses. This information was obtained from review of various maps (such as topographic maps and tax assessor maps), aerial photographs, and a site visit. Additional Project Area description information was

obtained during the site visit; please refer to the Section 5.0 of the report that covers site reconnaissance information.

<b>TABLE 2-1</b> <b>PROJECT AREA LOCATION AND LAND USE</b>	
<b>Parameter</b>	<b>Information/Comments</b>
Location	The Project Area includes the intersection of Castroville Boulevard and San Miguel Canyon Road in Prunedale, in an area of undeveloped and residential land uses.
Assessor's Parcel Nos. (APNs)	Portion of 129-083-031, 129-051-033, 127-361-007, 127-361-026, 127-361-013, 127-361-014, and 127-361-015.
Section, Township, and Range	Section 18, Township 13 South, Range 2 East of the Mount Diablo Base and Meridian.
Current Use	The Project Area is currently developed with San Miguel Canyon Road and Castroville Boulevard, and surrounding areas within the Project Area.
Current Property Owners	Gin York F. Family Partnership (-031), Monterey County (-033), Rocha Alma D. Garcia (-007), Victor C Bizzaro (-026), Jose Pantoja (-013), Eusebio Diaz (-014), and Raquel Luna (-015)

## 2.2 REGIONAL GEOLOGY AND HYDROGEOLOGY

Information on regional geology and hydrogeology is presented in Table 2-2. This information was obtained from published data and maps of the Project Area vicinity.

**TABLE 2-2**  
**PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS**

<b>Geologic/Hydrogeologic Parameter</b>	<b>Information/Comments</b>
Project Area Topography	Based on a review of the USGS Prunedale, California 7.5-Minute Topographic Quadrangle Map dated 2015, the mean elevation at the Project Area is approximately 180 feet above Mean Sea Level (MSL), and the relief across the Project Area slopes gently to the south-southeast. Surface water runoff follows the local topography and eventually empties into a seasonal creek that runs parallel to San Miguel Canyon Road.
Project Area Geology and Soil Types	The Project Area is located within the Salinas Valley. The geology of the Project Area is comprised of Pleistocene-Holocene-aged marine and nonmarine (continental) sedimentary rocks. These sedimentary rocks include alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. The Project Area is mostly made up on nonmarine rocks (GAMA, 2024).

	<p>According to the Geologic Map of the Montrey Quadrangle and Adjacent Areas (CGS, 2002), geologic deposits beneath the Project Area consist of Holocene-aged alluvium and Pleistocene-aged aromas sand (undivided).</p> <p>According to the Geocheck® section of the EDR report (Appendix A), soils at the Project Area include the Arnold Series. The Arnold soils have a loamy fine sand surface texture, and are characterized by moderate infiltration rates and are somewhat excessively drained.</p>
Project Area Hydrogeologic Setting	<p>The Project Area is located within the Salinas Valley Groundwater Basin, Langley Area Subbasin (DWR, 2004). The Salinas Valley – Langley Area Subbasin is a series of low hills bounded to the east by the geologic contact of Tertiary sediments with granitic bedrock and to the north by a drainage divide in the Carneros Hills. North of this divide is the Elkhorn Slough and to the south are the Moro Cojo Slough and lower Salinas River valley. The western and southern boundaries approximately coincide with the slope break at the base of the Carneros Hills, generally marked by the 200-foot elevation contour interval. The west and south boundaries are shared with the Salinas Valley – 180/400-Foot Aquifer and the –Eastside Aquifer Subbasins, respectively. The southern boundary also generally coincides with the northern boundary of the Salinas Valley drainage subbasin. The western portion of the subbasin is drained by west flowing creeks in Langley, Vijerra, Berta, and Pesante Canyons, all of which intersect a south flowing creek in San Miguel Canyon. The eastern subbasin is drained by south flowing creeks, which enter the southwest flowing Gabilan Creek.</p> <p>According to the GeoCheck® section of the EDR report (Appendix A), there is one groundwater well located within a one-quarter mile radius of the Project Area. No groundwater wells were observed at the Project Area during the site reconnaissance.</p>

## 2.3 ADJOINING AREA LAND USE

A drive-by survey of the area adjoining to the Project Area was performed by Haro Environmental personnel on January 5, 2024. The results of this survey indicate undeveloped land, and rural residential land uses surround the Project Area. The Project Area and adjoining land uses are depicted on Plate 2.

## 2.4 LOCATION AND LEGAL DESCRIPTIONS

The Project Area includes the intersection of Castroville Boulevard and San Miguel Canyon Road and surrounding land in Prunedale. The project will include partial take of three County of Monterey Assessors Office Assessor Parcel Numbers (APN) including 129-083-031, 129-051-033, and 127-361-007. In addition, the APE may also impact portions of APN 127-361-026, 127-361-013, 127-361-014, and 127-361-015.

## **2.5 USER PROVIDED INFORMATION**

Ms. Maribel Ramos-Peredia, Assistant Engineer / Project Manager with the County of Monterey, was interviewed for actual knowledge pertaining to the Site to help identify the possibility of RECs in connection with the Site. Ms. Ramos-Peredia indicated the following:

### **2.5.1 Title Records**

Title records for roads are not available.

### **2.5.2 Environmental Liens or Activity and Use Limitations**

Ms. Ramos-Peredia did not provide information pertaining to environmental liens or activity and use limitations for the Site. Haro Environmental was not provided a copy of an environmental lien records search for the Site.

### **2.5.3 Specialized Knowledge**

Ms. Ramos-Peredia was unaware of specialized knowledge or experience regarding the Site.

### **2.5.4 Commonly Known or Reasonably Ascertainable Information**

Ms. Ramos-Peredia was unaware of commonly known or reasonably ascertainable information about the Site.

### **2.5.5 Owner, Property Manager, and Occupant Information**

Ms. Ramos-Peredia indicated that, based on her knowledge and experience related to the property, there are no obvious indicators that point to the presence or likely presence of contamination at the Site.

### **2.5.6 Other**

No other information pertaining to environmental issues related to the Site was provided by Ms. Ramos-Peredia.

## **2.6 ENVIRONMENTAL LIENS**

No environmental lien search was conducted by the preparer or the user of this Phase I report.

### **3.0 RECORDS REVIEW**

---

Government agency database records are sources of information that may be helpful in evaluating activities that may have contributed to a release of hazardous substances or petroleum products to soil and/or groundwater. Haro Environmental contracted a government agency database search from EDR. A copy of the EDR report, which specifies the approximate minimum search distance for each public list as defined in the ASTM Standard, is included as Appendix A.

The subject Project Area was not listed in the databases searched by EDR. Two nearby properties were listed in the Environmental Data Resources, Inc. Exclusive Historical Cleaners (EDR HIST CLEANER), Facility and Manifest Data (HAZNET), and Hazardous Waste Tracking System (HWTS) databases searched by EDR.

#### **3.1 RESULTS OF DATABASE SEARCH**

The following sections contain information on the results of the government records search conducted by EDR. Opinions presented below are based on information provided in EDR's report (unless otherwise noted) and on criteria such as distance from the Project Area, anticipated groundwater movement direction in the vicinity of the Project Area, and the nature of any reported unauthorized releases. In assessing the potential impact to buildings materials, soil, soil vapor, and/or groundwater beneath the Project Area, the shallowest groundwater was considered to be approximately 8 feet below ground surface (bgs) with an anticipated groundwater movement direction following the local topographic gradient to the southeast. The groundwater information was obtained from the Exxon Service Station located approximately ¼ mile south of the Project area and identified by Geotracker as case T0605300331.

##### **3.1.1 Subject Property**

The Project Area was not listed in any of the databases searched by EDR.

##### **3.1.2 Adjacent Properties**

No adjacent properties were listed in the databases searched by EDR.

### **3.1.3 Nearby Properties**

Two nearby properties were listed within the approximate minimum search distance and included the Harts Cleaners located at 2358 San Miguel Canyon Road, and Bruce Dunn located at 1084 San Miguel Canyon Road. Based on the distance from the Project Area (both more than ½ mile away from the Project Area), the Harts Cleaners and Bruce Dunn would not be expected to pose an environmental concern to the Project Area.

### **3.1.4 Orphan List**

Sites not plotted by EDR due to poor or inadequate address information are referred to as orphan sites. The orphan summary/unmapped sites report was reviewed by Haro Environmental to assess the potential for off-site properties to affect the subject Project Area. Because they have incomplete addresses, orphan sites are not practically reviewable as defined by the ASTM standard. There were no orphan/unmapped sites identified by EDR.

### **3.1.5 Non-ASTM Issues**

Assessment of non-ASTM issues including but not limited to asbestos containing materials, radon gas, lead-based paint, lead in drinking water, mold, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, Per- and Polyfluoroalkyl substances (PFAS), indoor air quality, electromagnetic fields or geologic hazards were not included as part of this Phase I ESA.

## **3.2 OTHER RECORDS REVIEWED**

The following additional sources of information were reviewed as part of this Phase I ESA.

### **3.2.1 Public Agency Records**

The County of Monterey Environmental Health Services provided several files for the Project Area including a well permit for the APN 127-361-007. In June 1990, a new 350-foot domestic well was drilled 159 feet to the east of San Miguel Canyon Road. This is the extent of information obtained from the files provided from the County of Monterey Environmental Health Services related to potential environmental concerns.

The Monterey County Planning and Building Department provided several files for the Project Area, and additional files were viewed at the Monterey County office. The files included grading permits, use permits, planned burns, housing improvements, Pacific Gas and Electric underground power installations, and several administrative citations. None of the records reviewed within proximity to the Project Area would be expected to pose an environmental concern to the Project Area.

The following additional public agencies were contacted regarding files for the Project Area and indicated they do not maintain files:

- Central Coast Regional Water Quality Control Board (e-mail; November 27, 2023)
- California Department of Toxic Substances Control (Envirostor Website; accessed November 28, 2023)
- Monterey Bay Air Resources District (e-mail; November 27, 2023)

### **3.2.2 Previous Environmental Reports**

No previous environmental reports were provided for review as part of this Phase I ESA.

## 4.0 PROJECT AREA HISTORY

---

The history of the Project Area was researched to identify obvious uses of the Project Area back to the first developed use, or at least 40 years ago, whichever is earlier or readily available.

Several data gaps since 1940 of greater than 5 years were identified in the historical records reviewed and included the years from 1940 to 1947, from 1956 to 1968, and from 1975 to 1981. These data gaps are considered insignificant because the Project Area use appears to be similar during the data gaps.

### 4.1 AERIAL PHOTOGRAPHS

A review of historical aerial photography may indicate past activities at a property that may not be documented by other means, or observed during a site visit. The effectiveness of this technique depends on the scale and quality of the photographs and the available coverage. Aerial photographs were obtained from several historical photograph collections through EDR. A tabulation of the aerial photographs reviewed is presented in Table 4-1.

**TABLE 4-1  
HISTORICAL AERIAL PHOTOGRAPHS REVIEWED**

Date	Approximate Scale	Source
1937	1" = 500'	USDA
1949	1" = 500'	USDA
1956	1" = 500'	USDA
1968	1" = 500'	USGS
1971	1" = 500'	USDA
1982	1" = 500'	USDA
1998	1" = 500'	USGS/DOQQ
2005	1" = 500'	USDA/NAIP
2009	1" = 500'	USDA/NAIP
2012	1" = 500'	USDA/NAIP
2016	1" = 500'	USDA/NAIP
2020	1" = 500'	USDA/NAIP

**Note:** Aerial photographs only provide information on indications of land use and no conclusions regarding the release of hazardous substances or petroleum products can be drawn from the review of photographs alone.

Copies of the reviewed aerial photographs are included in Appendix A. The following is a summary of our review of these photographs.

- **1937** – The Project Area is depicted with a residential structure on the western portion of the Project Area. San Miguel Canyon Road appears in its present-day location, but Castroville Boulevard curves farther south than its present-day alignment. A driveway extends east from the intersection and two residential structures appear at the end of the driveway. The surrounding area appears to be mostly undeveloped land, with some areas developed for residential use or in use as orchards.
- **1949** – The Project Area and surrounding properties appear similar to the 1937 aerial photograph with the exception that the surrounding area has been further developed with residential structures.
- **1956** – The quality of the photograph is low. The Project Area and surrounding properties appear similar to the 1949 aerial photograph.
- **1968** – The Project Area and surrounding properties appear similar to the 1956 aerial photograph with the exception of the residential structure on the western portion of the Project Area no longer appearing and Castroville Boulevard now appearing in its present-day location.
- **1971** – The quality of the photograph is very low. The Project Area and surrounding properties appear similar to the 1968 aerial photograph.
- **1982** – The Project Area and surrounding properties appear similar to the 1971 aerial photograph.
- **1998** – The Project Area and surrounding properties appear similar to the 1982 aerial photograph.
- **2005** – The Project Area and surrounding properties appear similar to the 1998 aerial photograph with exception to further residential development in the surrounding area.
- **2009** – The Project Area and surrounding properties appear similar to the 2005 aerial photograph.
- **2012** – The Project Area and surrounding properties appear similar to the 2009 aerial photograph.
- **2016** – The Project Area and surrounding properties appear similar to the 2012 aerial photograph.
- **2020** – The Project Area and surrounding properties appear similar to the 2016 aerial photograph.

## 4.2 HISTORICAL TOPOGRAPHIC MAPS

Haro Environmental contacted EDR for information regarding historical topographic maps of the Project Area vicinity. The topographic maps reviewed for this assessment are listed below in Table 4-2. Copies of the maps are included in Appendix A.

**TABLE 4-2  
HISTORICAL TOPOGRAPHIC MAPS REVIEWED**

<b>Year</b>	<b>Quadrangle</b>	<b>Series</b>	<b>Scale</b>
1915	San Juan Bautista	15 minute	1:48,000
1917	San Juan Bautista	15 minute	1:62,500
1939	San Juan Bautista	15 minute	1:62,500
1947	San Juan Bautista	15 minute	1:50,000
1954	Prunedale	7.5 minute	1:24,000
1968	Prunedale	7.5 minute	1:24,000
1975	Prunedale	7.5 minute	1:24,000
1981	Prunedale	7.5 minute	1:24,000
1987	Prunedale	15 minute	1:50,000
1993	Prunedale	7.5 minute	1:24,000
2012	Prunedale	7.5 minute	1:24,000
2015	Prunedale	7.5 minute	1:24,000
2018	Prunedale	7.5 minute	1:24,000

The Project Area is located in Prunedale at an elevation of approximately 180 feet above MSL. The nearest surface water body is a seasonal creek located adjacent to the east of the Project Area, parallel to San Miguel Canyon Road. Highway 101 is located approximately 0.75 miles to the south of the Project Area. Copies of the reviewed historic topographic maps are included in Appendix A. The following is a summary of our review of the maps.

- **1915** – The Project Area is depicted as the area surrounding the intersection of San Miguel Canyon Road and Castroville Boulevard. San Miguel Canyon Road is depicted in its present-day location, and Castroville Boulevard is in a fairly similar position to its present-day location with slightly different alignment to present-day. No structures are depicted at the Project Area or nearby, and hills are depicted on each side of the roads.
- **1917** – The Project Area and surrounding properties are depicted similar to the 1915 map with the exception of a seasonal creek along the eastern side of San Miguel Canyon Road, and two structures now depicted to the east of the Project Area across the seasonal creek.

- **1939** – The Project Area and surrounding properties are depicted similar to the 1917 map with the exception of San Miguel Canyon Road and Castroville Boulevard now being depicted as heavily trafficked roads.
- **1947** – The Project Area and surrounding properties are depicted similar to the 1939 map.
- **1954** – The Project Area is depicted similar to the 1947 map. The surrounding area is now depicted with several structures near the Project Area. One structure is now depicted to the north of Castroville Boulevard and to the west of San Miguel Canyon Road. Five additional structures are depicted to the north of the pre-existing structures east of San Miguel Canyon Road. Lastly, an unpaved road is depicted running east of the intersection between San Miguel Canyon Road and Castroville Boulevard.
- **1968** – The Project Area and surrounding properties are depicted similar to the 1954 map with exception of more structures appearing south of the unpaved driveway extending from the intersection between San Miguel Canyon Road and Castroville Boulevard.
- **1975** – The Project Area and surrounding properties are depicted similar to the 1968 map.
- **1981** – The Project Area and surrounding properties are depicted similar to the 1978 map, with the exception that Castroville Boulevard has been realigned into its present-day position.
- **1987** – The Project Area and surrounding properties are depicted similar to the 1981 map.
- **1993** – The Project Area and surrounding properties are depicted similar to the 1987 map with the exception of San Miguel Canyon Road now depicted as a heavily trafficked road.
- **2012** – Individual structures are no longer depicted. The Project Area and surrounding properties are depicted similar to the 1993 map.
- **2015** – The Project Area and surrounding properties are depicted similar to the 2012 map.
- **2018** – The Project Area and surrounding properties are depicted similar to the 2015 map.

#### **4.3 SANBORN® FIRE INSURANCE MAPS**

Sanborn® Fire Insurance Maps provide historical land use information in some metropolitan areas and small, established towns. There was no Sanborn® Fire Insurance Maps coverage for the Project Area, and a copy of the no coverage letter is included in Appendix A.

#### **4.4 CITY DIRECTORIES**

Haro Environmental contacted EDR to obtain a historical City Directory Abstract, which lists the names and/or businesses that historically occupied an address. The City Directory Abstract, which covers the period from 1992 to 2020, provides tenant information for an address and/or adjoining streets. The City Directories reviewed indicated the properties east of San Miguel Canyon Road were listed as residences from 1992 to 2020, and the Manzanita Park (located at the southeast portion of the Project Area) was listed from 1995 until 2020. No listings were noted that would be expected to pose an environmental concern to the Project Area. The complete EDR City Directory Abstract listing results is provided in Appendix A.

#### **4.5 OIL AND GAS MAPS**

Maps provided online by the California Department of Conservation, Division of Oil, Gas, and Geothermal Resources were reviewed to determine the current or historic presence of oil or gas wells in the vicinity of the Project Area (CalGEM, 2023). The maps reviewed indicated that there were no oil and gas wells within a 1-mile radius of the Project Area.

#### **4.6 CRUDE OIL PIPELINES**

The National Pipeline Mapping System maintained by the Pipeline and Hazardous Materials Safety Administration was reviewed for the presence of gas and hazardous liquid transmission pipelines. The results indicate there is one active natural gas pipeline located approximately ½ mile north of Castroville Boulevard, running east to west (PHMSA, 2023). Information indicates this pipeline carries natural gas and is owned and operated by Pacific Gas & Electric Company; however, based on the contents, this pipeline is not anticipated to pose an environmental concern to the Project Area.

#### **4.7 CHAIN OF TITLE RECORDS**

Haro Environmental was not provided and therefore did not review a 50-year chain-of-title report for the Project Area.

## **5.0 SITE RECONNAISSANCE AND INTERVIEWS**

---

Haro Environmental's assessment activities included a site reconnaissance. This section summarizes the findings from the site reconnaissance.

### **5.1 SITE RECONNAISSANCE**

#### **5.1.1 Methodology and Limiting Conditions**

Haro Environmental personnel performed an unaccompanied reconnaissance of the Project Area on January 5, 2024. The site reconnaissance was conducted by: 1) observing the Project Area from public thoroughfares, 2) observing the adjoining properties from public thoroughfares, and 3) observing the Project Area from walking paths. The purpose of the site reconnaissance was to identify the presence or likely presence of hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or threat of release into soil, groundwater, or surface water at the Project Area (recognized environmental conditions). Observations from the site reconnaissance are summarized in the following sections. A photolog of photographs taken during the site reconnaissance is included as Appendix C.

#### **5.1.2 Current Use of the Property and Adjoining Properties**

The Project Area is currently developed with a road, and bordered by undeveloped land that is the edge of rural residential properties and a county recreational park (see Photo #1).

The Project Area does not appear to be serviced by any utilities.

Surrounding properties are rural residential properties and a county recreational park (see Photos #2, 3, and 4). Nearby land uses are depicted on Plate 2.

#### **5.1.3 General Description of Structures**

The Project Area is currently developed with San Miguel Canyon Road and Castroville Boulevard (see Photo #1). No additional structures are present at the Project Area.

#### **5.1.4 Interior and Exterior Observations**

No structures are present within the Project Area.

#### **5.1.5 Hazardous Substances and Petroleum Products**

No hazardous substances or petroleum products were observed during the site reconnaissance.

#### **5.1.6 Unidentified Substance Containers**

Unidentified hazardous substance containers or unidentified containers that might contain hazardous substances were not observed during the site reconnaissance.

#### **5.1.7 Storage Tanks**

During the site reconnaissance, Haro Environmental did not observe evidence of above-ground storage tanks (ASTs) or USTs.

#### **5.1.8 Odors**

During the site reconnaissance, Haro Environmental did not identify any strong, pungent, or noxious odors.

#### **5.1.9 Pools of Liquid**

During the site reconnaissance, Haro Environmental did not identify any pools of liquid including standing surface water. In addition, sumps containing liquids likely to be hazardous substances or petroleum products were not observed.

#### **5.1.10 Drums**

During the site reconnaissance, Haro Environmental did not observe evidence of drums onsite.

### **5.1.11 Indications of Polychlorinated Biphenyls (PCBs)**

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to USEPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Since January 1, 1977, the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner has been prohibited. The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB-containing while transformers installed after 1977 are unlikely to be PCB-containing.

During the site reconnaissance, Haro Environmental observed two pole mounted transformers at the Project Area (see Photo #5).

### **5.1.12 Other Conditions of Concern**

During the site reconnaissance Haro Environmental did not note any of the following:

- Corrosion
- Clarifiers, and/or sumps
- Pits, ponds, and/or lagoons
- Stressed vegetation
- Waste water
- Septic tanks
- Water wells

A storm water drain was observed at the Project Area and was located approximately 50 feet north of the intersection of Castroville Boulevard and San Miguel Canyon Road on the west side of San Miguel Canyon Road (see Photo #6). The drain then appears to be funneled underneath the road and comes out on the east side of the road.

## 5.2 INTERVIEWS

Ms. Maribel Ramos-Peredia, Assistant Engineer and Project Manager for the County of Monterey, was interviewed as part of this Phase I ESA to inquire about the current and historic uses of the Project Area, specifically related to the parcels where partial take of the APNs is planned.

Ms. Ramos-Peredia indicated that she is unaware of the on-site current or historic presence of:

- Industrial or automotive batteries,
- Pesticides,
- Fill dirt,
- Pits, ponds, or lagoons,
- Stained soil,
- Vent pipes, fill pipes, or access ways,
- Groundwater wells,
- ASTs or USTs,
- PCBs.

Ms. Ramos-Peredia also indicated that she is unaware of any environmental liens, environmental deed restrictions, land use regulations, engineering controls, environmental violations, environmental assessments, or past, threatened, or pending lawsuits concerning releases of hazardous materials relating to the specific APNs where partial take of the APN is planned.

## 6.0 FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

---

This Phase I ESA of the property identified as the Prunedale Roundabout located in Prunedale, California was performed by Haro Environmental in conjunction with SWCA for the County of Monterey. Haro Environmental performed this Phase I ESA consistent with ASTM Practice E-1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM Standard). Exceptions to, or deletions from, this practice are described in this report.

Based on the data gathered and reviewed during this Phase I ESA, Haro Environmental did not identify recognized environmental conditions or concerns that have impacted, or pose a significant environmental threat to subsurface soil, soil vapor, or groundwater beneath the Project Area.

Because we have no evidence indicating that the Site has been impacted by hazardous materials or petroleum products, no additional assessment appears warranted at this time.

## 7.0 STANDARD OF CARE

---

The findings and conclusions contained in this Phase I ESA are based upon professional opinions with regard to the subject matter. These opinions have been arrived at in accordance with currently accepted industry standards and practices applicable to this location and are subject to the following inherent limitations:

**Accuracy of Information.** Certain information utilized by Haro Environmental in this assessment has been obtained, reviewed, and evaluated from various sources believed to be reliable. Although Haro Environmental's conclusions, opinions, and recommendations are based, in part, on such information, Haro Environmental's services did not include the verification of the information's accuracy or authenticity. Should such information prove to be inaccurate or unreliable, Haro Environmental reserves the right to amend or revise its conclusions, opinions and/or recommendations.

**Reconnaissance.** Haro Environmental performed a reconnaissance of the Project Area that is the subject of this assessment to document current conditions. Haro Environmental focused on areas deemed more likely to exhibit hazardous materials conditions while other areas received limited attention. No known areas were inaccessible at the time of our reconnaissance.

**Limitations.** Haro Environmental does not guarantee that the Project Area is free of hazardous or potentially hazardous materials or conditions, or that latent or undiscovered conditions will not become evident in the future. This assessment has been prepared in accordance with currently accepted industry standards, and no other warranties, representations, or certifications are made. Unless stated otherwise herein, this report is intended for and restricted to the sole use of SWCA and County of Monterey. Any other use, interpretation, or reliance upon this assessment is at the sole risk of the user and Haro Environmental shall have no liability for such unauthorized use, interpretation or reliance.

**Qualifications of Environmental Professionals.** Mr. Elliot Haro representing Haro Environmental performed this ESA. Mr. Haro is an environmental consultant who has performed over 100 ESAs for a variety of clients. Mr Haro's resume is provided in Appendix D.

**Reliance.** This ESA report has been prepared for the exclusive use and reliance of SWCA and County of Monterey. Use or reliance by any other party is prohibited without the written authorization of SWCA, County of Monterey and Haro Environmental.

**Scope Limitations and ASTM Exceptions.** This ESA did not include any inquiries with respect to non-scope ASTM considerations (including but not limited to asbestos containing materials, radon gas, lead-based paint, lead in drinking water, mold, wetlands, regulatory compliance, Per- and Polyfluoroalkyl

substances (PFAS), cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality or electromagnetic fields), subsurface or other invasive assessments, business environmental risk evaluations or other services not particularly identified and discussed herein.

Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested may not be received by the issuance date of the report. In the event information obtained from sources mentioned previously alters the findings stated in this report, an addendum letter will be forwarded to SWCA and County of Monterey under separate cover providing Haro Environmental's findings and conclusions. Additional Phase I ESA limitations include:

- Several data gaps since 1940 of greater than 5 years were identified in the historical records reviewed and included the years from 1940 to 1947, from 1956 to 1968, and from 1975 to 1981. These data gaps are considered insignificant because the Project Area use appears to be similar during the data gaps.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the Project Area's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable or not present during the reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

**Certification.** I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Haro Environmental, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

## EXECUTIVE SUMMARY

### **TARGET PROPERTY SEARCH RESULTS**

The target property was not listed in any of the databases searched by EDR.

### **DATABASES WITH NO MAPPED SITES**

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Lists of Federal NPL (Superfund) sites***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

#### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

#### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing  
SEMS..... Superfund Enterprise Management System

#### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

#### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS..... Corrective Action Report

#### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

#### ***Lists of Federal RCRA generators***

RCRA-LQG..... RCRA - Large Quantity Generators  
RCRA-SQG..... RCRA - Small Quantity Generators  
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

#### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

## EXECUTIVE SUMMARY

US ENG CONTROLS..... Engineering Controls Sites List  
US INST CONTROLS..... Institutional Controls Sites List

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

### ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE..... State Response Sites

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR..... EnviroStor Database

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF..... Solid Waste Information System

### ***Lists of state and tribal leaking storage tanks***

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land  
CPS-SLIC..... Statewide SLIC Cases

### ***Lists of state and tribal registered storage tanks***

FEMA UST..... Underground Storage Tank Listing  
UST..... Active UST Facilities  
INDIAN UST..... Underground Storage Tanks on Indian Land

### ***Lists of state and tribal voluntary cleanup sites***

INDIAN VCP..... Voluntary Cleanup Priority Listing  
VCP..... Voluntary Cleanup Program Properties

### ***Lists of state and tribal brownfield sites***

BROWNFIELDS..... Considered Brownfields Sites Listing

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

US BROWNFIELDS..... A Listing of Brownfields Sites

### ***Local Lists of Landfill / Solid Waste Disposal Sites***

WMUDS/SWAT..... Waste Management Unit Database  
SWRCY..... Recycler Database  
HAULERS..... Registered Waste Tire Haulers Listing  
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands  
ODI..... Open Dump Inventory  
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations  
IHS OPEN DUMPS..... Open Dumps on Indian Land

## EXECUTIVE SUMMARY

### ***Local Lists of Hazardous waste / Contaminated Sites***

US HIST CDL.....	Delisted National Clandestine Laboratory Register
HIST Cal-Sites.....	Historical Calsites Database

#### ***Exclusive Recovered Govt. Archives***

RGA LF..... Recovered Government Archive Solid Waste Facilities List  
RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of state and tribal leaking storage tanks***

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Hazardous waste / Contaminated Sites**

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 07/17/2023 has revealed that there is 1 CERS HAZ WASTE site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

#### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
DOUGHERTY PUMP & DRI	2108 SAN MIGUEL CANY	NW 1/8 - 1/4 (0.161 mi.)	B3	10

## EXECUTIVE SUMMARY

EPA ID:: CAL000262507

PFAS: A listing of PFAS contaminated sites included in the GeoTracker database.

A review of the PFAS list, as provided by EDR, and dated 06/02/2023 has revealed that there is 1 PFAS site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WELL 02		NNE 1/8 - 1/4 (0.238 mi.)	11	27

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 06/14/2023 has revealed that there are 2 Cortese sites within approximately 0.5 miles of the target property.

<b>PRUNEDALE SHOPPING C</b>	<b>7905 SAN MIGUEL CANY</b>	<b>SE 1/4 - 1/2 (0.477 mi.)</b>	<b>13</b>	<b>48</b>

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 2 CUPA Listings sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>DOUGHERTY PUMP AND D</b> Database: CUPA MONTEREY, Date of Government Version: 10/04/2021	<b>2108 SAN MIGUEL CYN</b>	<b>NW 1/8 - 1/4 (0.161 mi.)</b>	<b>B5</b>	<b>13</b>
<b>C &amp; C TANK CO. INC.</b> Database: CUPA MONTEREY, Date of Government Version: 10/04/2021	<b>2106 SAN MIGUEL CANY</b>	<b>NNW 1/8 - 1/4 (0.221 mi.)</b>	<b>C9</b>	<b>25</b>

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

## EXECUTIVE SUMMARY

HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the HWTS list, as provided by EDR, and dated 08/04/2023 has revealed that there is 1 HWTS site within approximately 0.001 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>BRUCE DUNN</b>	<b>1084 SAN MIGUEL CANY</b>	<b>0 - 1/8 (0.000 mi.)</b>	<b>A2</b>	<b>9</b>

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2021 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: N/A
Date Made Active in Reports: 10/19/2023	Last EDR Contact: 11/01/2023
Number of Days to Update: 16	Next Scheduled EDR Contact: 01/08/2024
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: N/A
Date Made Active in Reports: 10/19/2023	Last EDR Contact: 11/01/2023
Number of Days to Update: 16	Next Scheduled EDR Contact: 01/08/2024
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: No Update Planned

### ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/19/2023

Data Release Frequency: Quarterly

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2023  
Date Data Arrived at EDR: 06/23/2023  
Date Made Active in Reports: 09/20/2023  
Number of Days to Update: 89

Last EDR Contact: 09/26/2023  
Next Scheduled EDR Contact: 01/08/2024  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 09/19/2023  
Date Data Arrived at EDR: 10/03/2023  
Date Made Active in Reports: 10/19/2023

Last EDR Contact: 11/02/2023  
Next Scheduled EDR Contact: 01/22/2024  
Data Release Frequency: Quarterly

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: 800-424-9346
Date Made Active in Reports: 10/19/2023	Last EDR Contact: 11/02/2023
Number of Days to Update: 16	Next Scheduled EDR Contact: 01/22/2024
	Data Release Frequency: Quarterly

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 07/24/2023	Source: EPA
Date Data Arrived at EDR: 07/31/2023	Telephone: 800-424-9346
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023  
Date Data Arrived at EDR: 07/31/2023  
Date Made Active in Reports: 08/14/2023  
Number of Days to Update: 14

Source: Environmental Protection Agency

Last EDR Contact: 09/20/2023  
Next Scheduled EDR Contact: 01/01/2024  
Data Release Frequency: Quarterly

### RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023  
Date Data Arrived at EDR: 07/31/2023

Data Release Frequency: Quarterly

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/03/2023  
Date Data Arrived at EDR: 08/07/2023  
Date Made Active in Reports: 10/10/2023  
Number of Days to Update: 64

Source: Department of the Navy  
Telephone: 843-820-7326  
Last EDR Contact: 11/02/2023  
Next Scheduled EDR Contact: 02/19/2024  
Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/21/2023  
Date Data Arrived at EDR: 08/21/2023  
Date Made Active in Reports: 11/07/2023

Telephone: 703-603-0695  
Last EDR Contact: 08/21/2023  
Next Scheduled EDR Contact: 12/04/2023  
Data Release Frequency: Varies

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/21/2023  
Date Data Arrived at EDR: 08/21/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 07/24/2023

Date Data Arrived at EDR: 07/25/2023

Date Made Active in Reports: 10/11/2023

Number of Days to Update: 78

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 10/24/2023

Next Scheduled EDR Contact: 02/05/2024

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 07/24/2023

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Data Release Frequency: Varies

### Local Lists of Hazardous waste / Contaminated Sites

#### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 08/21/2023

Date Data Arrived at EDR: 08/21/2023

Date Made Active in Reports: 11/07/2023

Number of Days to Update: 78

Source: Drug Enforcement Administration

Telephone: 202-307-1000

Last EDR Contact: 08/21/2023

Next Scheduled EDR Contact: 12/04/2023

Data Release Frequency: No Update Planned

#### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005

Date Data Arrived at EDR: 08/03/2006

Date Made Active in Reports: 08/24/2006

Number of Days to Update: 21

Source: Department of Toxic Substance Control

Telephone: 916-323-3400

Last EDR Contact: 02/23/2009

Next Scheduled EDR Contact: 05/25/2009

Data Release Frequency: No Update Planned

#### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 07/24/2023

Date Data Arrived at EDR: 07/25/2023

Date Made Active in Reports: 10/11/2023

Number of Days to Update: 78

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 10/24/2023

Next Scheduled EDR Contact: 02/05/2024

Data Release Frequency: Quarterly

#### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2020

Date Data Arrived at EDR: 11/30/2022

Date Made Active in Reports: 02/09/2023

Number of Days to Update: 71

Last EDR Contact: 01/26/2009

Next Scheduled EDR Contact: 04/27/2009

Data Release Frequency: No Update Planned

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 07/17/2023	Source: CalEPA
Date Data Arrived at EDR: 07/18/2023	Telephone: 916-323-2514
Date Made Active in Reports: 10/06/2023	Last EDR Contact: 10/17/2023
Number of Days to Update: 80	Next Scheduled EDR Contact: 01/29/2024
	Data Release Frequency: Quarterly

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/21/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 08/21/2023	Telephone: 202-307-1000

Number of Days to Update: 78	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Quarterly

### Local Lists of Registered Storage Tanks

#### SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994	Source: State Water Resources Control Board
Date Data Arrived at EDR: 07/07/2005	Telephone: N/A
Date Made Active in Reports: 08/11/2005	Last EDR Contact: 06/03/2005
Number of Days to Update: 35	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

#### HIST UST: Hazardous Substance Storage Container Database

The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990	Source: State Water Resources Control Board
Date Data Arrived at EDR: 01/25/1991	Telephone: 916-341-5851
Date Made Active in Reports: 02/12/1991	Last EDR Contact: 07/26/2001
Number of Days to Update: 18	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

#### SAN FRANCISCO AST: Aboveground Storage Tank Site Listing

Aboveground storage tank sites

Date of Government Version: 08/04/2023	Source: San Francisco County Department of Public Health
Date Data Arrived at EDR: 08/08/2023	Telephone: 415-252-3896
Date Made Active in Reports: 10/25/2023	Last EDR Contact: 10/25/2023
Number of Days to Update: 78	Next Scheduled EDR Contact: 02/12/2024
	Data Release Frequency: Varies

#### CA FID UST: Facility Inventory Database

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Data Release Frequency: Semi-Annually

#### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 05/25/2023

Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### **Other Ascertainable Records**

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 10/31/2023
Number of Days to Update: 88	Next Scheduled EDR Contact: 02/12/2024
	Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 07/17/2023	Source: EPA
Date Data Arrived at EDR: 07/18/2023	Telephone: 202-564-4203
Date Made Active in Reports: 10/10/2023	Last EDR Contact: 10/20/2023
Number of Days to Update: 84	Next Scheduled EDR Contact: 01/29/2024
	Data Release Frequency: Annually

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: 703-416-0223
Date Made Active in Reports: 10/19/2023	Last EDR Contact: 11/01/2023
Number of Days to Update: 16	Next Scheduled EDR Contact: 12/11/2023
	Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 05/09/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/29/2023	Telephone: 202-564-8600
Date Made Active in Reports: 09/25/2023	Last EDR Contact: 09/26/2023
Number of Days to Update: 88	Next Scheduled EDR Contact: 01/29/2024
	Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

### PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: 202-564-6023
Date Made Active in Reports: 10/19/2023	Last EDR Contact: 11/01/2023
Number of Days to Update: 16	Next Scheduled EDR Contact: 02/12/2024
	Data Release Frequency: Quarterly

### PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 03/20/2023	Source: EPA
Date Data Arrived at EDR: 04/04/2023	Telephone: 202-566-0500
Date Made Active in Reports: 06/09/2023	Last EDR Contact: 10/06/2023
Number of Days to Update: 66	Next Scheduled EDR Contact: 01/15/2024
	Data Release Frequency: Annually

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 11/18/2016

Date Data Arrived at EDR: 11/23/2016

Date Made Active in Reports: 02/10/2017

Number of Days to Update: 79

Source: Environmental Protection Agency

Telephone: 202-564-2501

Last EDR Contact: 09/27/2023

Next Scheduled EDR Contact: 01/15/2024

Data Release Frequency: Quarterly

### FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009

Date Data Arrived at EDR: 04/16/2009

Date Made Active in Reports: 05/11/2009

Number of Days to Update: 25

Source: EPA/Office of Prevention, Pesticides and Toxic Substances

Telephone: 202-566-1667

Last EDR Contact: 08/18/2017

Next Scheduled EDR Contact: 12/04/2017

Data Release Frequency: No Update Planned

### MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 07/20/2023

Date Data Arrived at EDR: 09/01/2023

Date Made Active in Reports: 09/20/2023

Number of Days to Update: 19

Source: Nuclear Regulatory Commission

Telephone: 301-415-0717

Last EDR Contact: 10/10/2023

Next Scheduled EDR Contact: 01/29/2024

Data Release Frequency: Quarterly

### COAL ASH DOE: Steam-Electric Plant Operation Data

A listing of power plants that store ash in surface ponds.

Date of Government Version: 12/31/2021

Date Data Arrived at EDR: 04/14/2023

Date Made Active in Reports: 07/10/2023

Number of Days to Update: 87

Source: Department of Energy

Telephone: 202-586-8719

Last EDR Contact: 09/01/2023

Next Scheduled EDR Contact: 12/11/2023

Data Release Frequency: Varies

### COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 01/12/2017

Date Data Arrived at EDR: 03/05/2019

Date Made Active in Reports: 11/11/2019

Number of Days to Update: 251

Source: Environmental Protection Agency

Telephone: N/A

Last EDR Contact: 08/28/2023

Next Scheduled EDR Contact: 12/11/2023

Data Release Frequency: Varies

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 09/13/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/06/2019	Telephone: 202-566-0517
Date Made Active in Reports: 02/10/2020	Last EDR Contact: 11/03/2023
Number of Days to Update: 96	Next Scheduled EDR Contact: 02/12/2024
	Data Release Frequency: Varies

### RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 09/22/2023
Number of Days to Update: 84	Next Scheduled EDR Contact: 01/08/2024
	Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

### PFAS TRIS: List of PFAS Added to the TRI

Section 7321 of the National Defense Authorization Act for Fiscal Year 2020 (NDAA) immediately added certain per- and polyfluoroalkyl substances (PFAS) to the list of chemicals covered by the Toxics Release Inventory (TRI) under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and provided a framework for additional PFAS to be added to TRI on an annual basis.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

### PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

### PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

### PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

### PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

### PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

### PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

### PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

### AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

### CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Financial Assurance 1: Financial Assurance Information Listing

#### Financial Assurance information

Date of Government Version: 09/13/2023  
Date Data Arrived at EDR: 09/14/2023  
Date Made Active in Reports: 09/21/2023  
Number of Days to Update: 7

Source: Department of Toxic Substances Control  
Telephone: 916-255-3628  
Last EDR Contact: 09/13/2023  
Next Scheduled EDR Contact: 01/29/2024  
Data Release Frequency: Varies

### Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 08/03/2023  
Date Data Arrived at EDR: 08/16/2023  
Date Made Active in Reports: 11/01/2023  
Number of Days to Update: 77

Source: California Integrated Waste Management Board  
Telephone: 916-341-6066  
Last EDR Contact: 11/02/2023  
Next Scheduled EDR Contact: 02/19/2024  
Data Release Frequency: Varies

### ICE: Inspection, Compliance and Enforcement

Contains data pertaining to the Permitted Facilities with Inspections / Enforcements sites tracked in Envirostor.

Date of Government Version: 08/14/2023  
Date Data Arrived at EDR: 08/14/2023  
Date Made Active in Reports: 10/31/2023  
Number of Days to Update: 78

Telephone: 916-323-3400  
Last EDR Contact: 01/22/2009  
Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

### HWP: EnviroStor Permitted Facilities Listing

Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

Date of Government Version: 08/14/2023  
Date Data Arrived at EDR: 08/14/2023  
Date Made Active in Reports: 10/31/2023  
Number of Days to Update: 78

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 08/14/2023  
Next Scheduled EDR Contact: 11/27/2023  
Data Release Frequency: Quarterly

### HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

Date of Government Version: 06/29/2023  
Date Data Arrived at EDR: 06/29/2023  
Date Made Active in Reports: 09/19/2023  
Number of Days to Update: 82

Last EDR Contact: 10/04/2023  
Next Scheduled EDR Contact: 01/15/2024  
Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### HWTS: Hazardous Waste Tracking System

DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 08/04/2023  
Date Data Arrived at EDR: 08/09/2023  
Date Made Active in Reports: 10/26/2023  
Number of Days to Update: 78

Source: Department of Toxic Substances Control  
Telephone: 916-324-2444  
Last EDR Contact: 09/27/2023  
Next Scheduled EDR Contact: 01/15/2024  
Data Release Frequency: Varies

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2021

Data Release Frequency: Varies

### WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### **EDR MGP: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### **EDR Hist Auto: EDR Exclusive Historical Auto Stations**

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### **EDR Hist Cleaner: EDR Exclusive Historical Cleaners**

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/07/2023

Date Data Arrived at EDR: 08/08/2023

Date Made Active in Reports: 10/24/2023

Number of Days to Update: 77

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

UTM Y (Meters):	4074235.8
Elevation:	184 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	12021515 PRUNEDALE, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

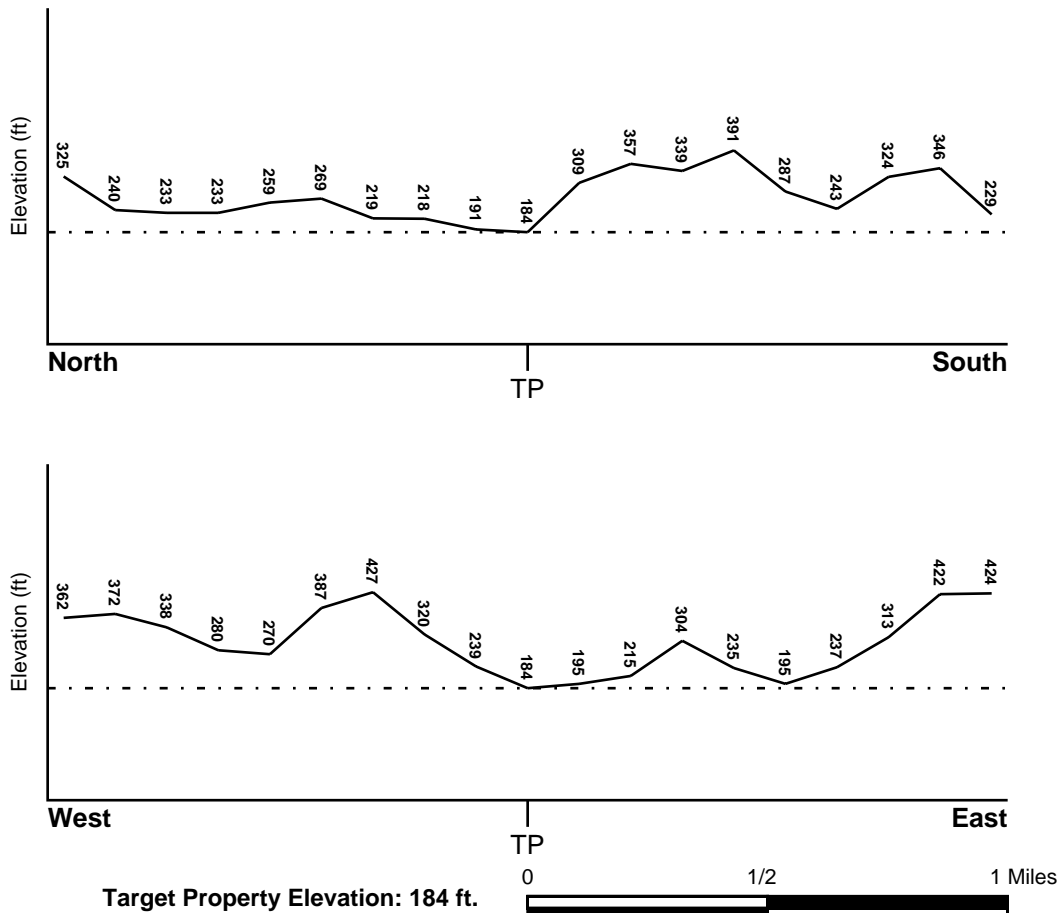

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

### NATIONAL WETLAND INVENTORY

#### NWI Quad at Target Property

PRUNEDALE

#### NWI Electronic

#### Data Coverage

YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

Search Radius: 1.25 miles

Status: Not found

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: Arnold

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	48 inches	loamy fine sand	Not reported	Not reported	Max: 4 Min: 1.4	Max: Min:
2	48 inches	51 inches	weathered bedrock	Not reported	Not reported	Max: 4 Min: 1.4	Max: Min:

#### Soil Map ID: 2

Soil Component Name: Arnold

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United States Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

### **QUALIFICATIONS**

## **ELLIOT R. HARO**

Principal Scientist

Mr. Haro is the founding principal of Haro Environmental, Inc. With over 17 years of experience in the environmental consulting field, Mr. Haro has directed, managed and performed environmental site assessments, as well as site investigation and remediation activities. As Principal Scientist, Mr. Haro's responsibilities include project management, proposal and cost estimate preparation, design of soil and groundwater investigation and remediation programs, staff and subcontractor coordination, technical report preparation, and permit acquisition. Mr. Haro has managed and performed numerous Phase I and Phase II Environmental Site Assessments (ESAs) as well as site investigation and remediation field activities including air, soil, groundwater, and surface water sampling, groundwater monitoring well installations, and remediation system operations and maintenance. He has prepared various environmental reports including site assessment reports, feasibility studies, remedial/corrective action plans, remedial work plans and health-based risk evaluations. Mr. Haro is familiar with the regulatory process and has consulted with both local and regional agencies on Client's behalf for work plan approvals and modifications. Mr. Haro's technical expertise includes evaluation, design and implementation of innovative in-situ groundwater treatment technologies including enhanced bioremediation and in-situ chemical oxidation.

## **EXPERTISE**

## EDUCATION AND CERTIFICATIONS

- Registered Environmental Assessor I (REA I), California, No. 30228 (Former; DTSC discontinued the REA program effective July1, 2012)
- M.S., Agriculture – Soil Science Specialization, California Polytechnic State University, San Luis Obispo, CA
- B.S., Soil Science, California Polytechnic State University, San Luis Obispo, CA
- OSHA and EPA 40-hour safety training and 8-hour hazardous materials refresher courses

## PROJECT DESCRIPTIONS

### Groundwater Remediation and Agency Closure, SRI PADMA LLC, Santa Barbara, CA

- |                                                  |                                        |                                            |
|--------------------------------------------------|----------------------------------------|--------------------------------------------|
| • Groundwater Monitoring and Sampling Management | • Remediation Reporting                | • Remediation System Design                |
| • In-Situ Bioremediation                         | • Target compounds: PCE & TCE          | • Groundwater Monitoring Well Destructions |
| • Permitting                                     | • In-Situ Chemical Reduction Work Plan |                                            |
| • Regulatory Agency Negotiations                 | • Health and Safety                    |                                            |

Mr. Haro is the program manager for the remediation of the chlorinated solvents TCE and PCE in groundwater at a former manufacturing facility in Santa Barbara, CA. The site is located in a historic industrial area, which has recently been transformed into an urban wine trail area known as the “Funk Zone”. Haro Environmental worked with the remediation contractor, Regenesi, to perform a soil assessment to gather detailed information regarding the lithology beneath the site, and to develop an appropriate injection program based on the findings. For this site, a combined remedy was selected and included the injection of Plumestop, Hydrogen Release Compound, and BDI Plus, a bioaugmentation formulation. After two months, wells within the treatment zone exhibited reductions of TCE and PCE to non-detectable concentrations. The case is currently being considered for closure under oversight by the CCRWQCB.

### Retail Service Station Portfolio, Various Locations, CA

- |                                                  |                                           |                                                |
|--------------------------------------------------|-------------------------------------------|------------------------------------------------|
| • Groundwater Monitoring and Sampling Management | • Target compounds: Hydrocarbons and MTBE | • Health and Safety                            |
| • In-Situ Bioremediation                         | • Interim Remedial Action Plans           | • Remediation System Design                    |
| • Permitting                                     | • Remedial and Corrective Action Plans    | • Multiphase and Dual Phase Extraction Systems |
| • Regulatory Agency Negotiations                 |                                           |                                                |
| • Quarterly Reporting                            |                                           |                                                |

Managed project activities for monitoring and cleanup of multiple gas station facilities throughout Northern, Central and Southern California. Evaluated in-situ and ex-situ treatment options for source zone reduction and off-site containment of contaminants.

Performed and managed operations and maintenance activities on remediation systems and prepared quarterly remediation reports. Prepared quarterly groundwater monitoring reports for agency submittal and approval. Prepared corrective actions plans and remedial action plans for implementation of mobile high vacuum dual phase extraction, multi-phase extraction, and dual-phase extraction systems. Designed and permitted innovative groundwater remediation approaches including enhanced aerobic bioremediation using ORC®. Negotiated with overseeing agencies for acceptance of proposed remedial actions.

**Phase I Environmental Site Assessment, Remediation Engineering Evaluation, & Indoor Air Quality Assessment, Former Aircraft Manufacturing Facility, Playa Vista, CA**

- Phase I ESA
- Remediation System Performance Evaluation
- Historic Chlorinated VOC and Hydrocarbon Use
- 550,000 Square Feet of Building Space

Performed a Phase I ESA for an approximately 38-acre site developed with 8 historic structures totaling approximately 550,000 square feet. Historic aircraft manufacturing resulted in chlorinated VOCs and petroleum hydrocarbon impacts to soil and groundwater. Identified recognized environmental conditions (RECs) at 11 source areas. Consulted client on extent of environmental liabilities and potential environmental costs. Evaluated the performance of the on-site dual-phase extraction system targeting identified source areas. Developed potential life-cycle costs for the existing remediation system, and costs for remediation of metals contaminated soil. Performed an indoor air survey to assess potential impacts from the historic aircraft manufacturing operations on indoor air quality. Indoor air study results were compared to published regulatory thresholds and calculated site-specific health risks.

**Soil, Soil Vapor, and Groundwater Investigation – Buckley Road Area TCE Investigation, San Luis Obispo, CA**

- Phase II ESA
- Multiple Potential Responsible Parties
- TCE In Groundwater
- Other COCs: PFAS

A regional TCE plume located south of the San Luis Obispo County Regional Airport is being investigated to identify a possible source. Haro Environmental, Inc. was contracted with one of the potentially responsible parties to investigate the property as a possible source of the TCE in groundwater. A work plan was developed and approved by the lead regulatory agency, Central Coast Regional Water Quality Control Board, for the advancement of two soil borings and the collection and analysis of soil, soil vapor, and groundwater samples. The results were used to clear the client as a responsible party.

**Soil and Groundwater Investigation of Per- and Polyfluoroalkyl Substances (PFAS), Meadows Field Airport, Bakersfield, CA**

- Soil Sampling Work Plan
- Well Investigation
- Soil Borings and Sampling
- Data Report and Data Analysis
- Target compounds: PFAS
- Health and Safety Plan Preparation
- Lead Agency: Central Valley Regional Water Quality Control Board

PFAS compounds are an emergent set of chemicals that have come to the forefront of environmental concern due to their toxicity and stability in the environment. To evaluate the distribution of PFAS in the environment, the State Water Resources Control Board through their nine regional boards required multiple airports within California perform site investigation for PFAS compounds based on the high concentration of PFAS used in firefighting foams [also known as aqueous film forming foams (AFFF)]. The Meadows Field Airport was one of the airports listed in the requirements order. Haro Environmental prepared a work plan to investigate PFAS in soil which included a sampling and analysis program to sample soil at multiple potential release points as wells at multiple depths. A soil sampling report was prepared for the CVRWQCB and will be followed up with a groundwater investigation work plan based on the soil sampling results.

**Soil and Groundwater Remediation of Chlorinated Solvents using Chemical Oxidation, Former Aerospace Manufacturing Facility, Newbury Park, CA**

- Groundwater Monitoring and Sampling Management
- In-Situ Chemical Oxidation using Potassium Permanganate
- Injection and Monitoring Well Installations
- Quarterly WDR Reporting
- Target compounds: Chlorinated VOCs
- Health and Safety Plan Preparation
- Lead Agency Negotiations

Managed in-situ chemical oxidation injections for remediation of soil and groundwater impacted with the chlorinated solvents TCE and PCE. Negotiated with the lead agency (LARWQCB) for revised Waste Discharge Requirements (WDR) and amendments to the original work plan. Developed and implemented a site-specific health and safety plan to protect the health and safety of workers and the environment from accidental exposure to the chemical oxidant. Oversaw the installation of 35 injection wells and 14 dual-nested monitoring wells, and the injection of approximately 12,000 pounds of potassium permanganate. Conducted performance evaluation sampling per WDR requirements, and prepared and submitted quarterly WDR monitoring reports to the regulatory agency.

**Soil and Groundwater Remediation of Chlorinated Solvents, Soil Source Zone Removal and In-Situ Bioremediation, Former Industrial Facility, Los Angeles, CA.**

- Groundwater Monitoring and Sampling Management
- Large Diameter Auger Excavation
- Enhanced Anaerobic Bioremediation
- Soil Vapor Survey
- Injection and Monitoring Well Installations
- Quarterly WDR Reporting
- Target compounds: Chlorinated VOCs
- Health and Safety Plan Preparation
- Lead Agency Negotiations

Managed soil and groundwater investigation and remediation activities for a site with soil and perched groundwater water zone with chlorinated hydrocarbons present. A Remedial Action Plan (RAP) was developed and approved by the LARWQCB to remediate soil and groundwater at the site. Because site constraints precluded the use of conventional excavation approaches without extensive shoring requirements, soil remediation activities included the design and implementation of source area soil removal using large diameter augers. Groundwater remediation activities included acquisition of a Waste Discharge Requirement (WDR) permit from the LARWQCB for injection of HRC® into the perched zone, injection design, and implementation of an Enhanced Anaerobic Biodegradation approach to stimulate by injecting HRC®.

**RCRA Facility Closure, Former Hazardous Waste Handling Facility, Wilmington, CA**

- Lead Agency: DTSC
- RCRA Hazardous Waste Permit Closure
- Port of Los Angeles Permitting
- Health and Safety Plan Preparation
- DTSC Approval of Work Plan Updates and Modifications

Managed work plan modification/updating and permitting for a closure of a RCRA hazardous waste permit under DTSC oversight. This former hazardous waste handling facility was the subject of an enforcement action by the lead regulatory agency and resulted in the conviction of the former operator. The chemicals associated with the facility included VOCs and petroleum hydrocarbons. Negotiated with DTSC for work plan modification resulting in a reduction of \$70,000 in the sampling costs.

**Feasibility Study, Former Aerospace Testing Facility, CA**

- Chlorinated VOCs
- Emergent Compounds 1,4-dioxane and NDMA
- In-Situ and Ex-Situ Treatment Options
- Conforming to Lead Agency Requirements

Provided technical assistance for preparation of a feasibility study for remediation of a 2,800-acre former test site facility being closed after 50 years of storied operations. The feasibility study in part addressed the emergent chemicals 1,4-dioxane and N-nitrosodimethylamine (NDMA). These chemicals are somewhat recalcitrant in the environment and are the subject of research at many DOD-sponsored projects. Evaluated innovative remedial alternatives including enhanced aerobic bioremediation

and in-situ chemical oxidation. Prepared a bench-scale work plan and reported the findings evaluating sodium persulfate and propane to reduce NDMA concentrations in groundwater.

### **Former Oil Field Sumps Assessment and Remediation, Santa Maria Valley, CA**

- Sump Assessment and Remediation
- Remediation construction
- Target compounds: Metals, volatile and semi-volatile organics, hydrocarbons,
- Soil Excavation
- Health and Safety Plan Preparation

Project manager for sump assessment and remediation activities for multiple land leases within the Santa Maria Valley. Former oil field features were identified by reviewing historic maps and aerial photographs. The lateral and vertical limits of identified features were assessed in the field using direct push technology. Non-hazardous sump material was excavated and transported to a local landfill for reuse. Confirmation samples were collected and based on the results, closure reports were prepared and submitted to the lead oversight agency (County Santa Barbara Fire Prevention Division).

### **Operations and Maintenance, Ex-situ Bioremediation, San Luis Obispo, CA**

- Groundwater monitoring well installation
- Groundwater sampling
- Remediation construction
- Vapor extraction system O&M
- Soil Excavation
- Field safety coordinator

### **Feasibility Study and Remedial Action Plan, Thousand Oaks, CA**

- Project Coordinator
- Oversee field activities
- Permitting
- Conducted dual phase extraction events
- Managed and performed O & M

### **Site Investigations, Multiple Clients**

- Oversee well installation
- Oversee boring installation
- Remediation construction
- Perform Monitoring and Optimization.
- Soil and Soil Vapor Sampling
- Risk Analysis
- Managed Subcontractors
- Construction
