Project Description

Caltrans proposes a District Director’s Order to repair bridge column fenders on column 19 of the Coronado Bridge (State Route 75). Work includes replacing the failed, corroded cables and cable anchor assemblies with corrosion resistant cables and stainless-steel cable anchor hardware. The bridge foundation has a protective barrier (fender) around it that has been damaged and broken loose. Should the fender break free, it would be a hazard to maritime traffic and leave the column and foundation exposed to impact damage. Environmental commitments for biological resources, NPDES/Stormwater, and cultural resources are included in the Environmental Commitments Record (ECR).
