Certification:

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mike Nelson - Registered Environmental Property Assessor

2.0 EXECUTIVE SUMMARY

Nelson Enviro, LLC (Company) was retained by Topo Ventures LLC, its affiliates or assignees (hereafter referred to as Client), to perform a Phase I Environmental Site Assessment (ESA) of the property known as Yosemite Gold County Lodge & Campground located at 10407 California 49 in Coulterville, Mariposa County, CA (subject property). Nelson Enviro, LLC performed the ESA in conformance with the Scope of Work and the provisions of the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-21. Any exceptions to, or deletions from, this practice are described within this report.

2.1 Subject Property Description

The subject property is currently unoccupied with the exception of unauthorized individuals in two travel trailers and possibly in the lodge itself.

All of the buildings observed on the subject property are in poor condition as evidenced in the photo log in Appendix B.

No significant renovations are known to have occurred.

According the property owners responses on the Due Diligence Questionnaire, drinking water is supplied by an onsite well and sewer service is supplied by the Coulterville Wastewater Treatment Facility.

Electricity is provided to the subject property by Pacific Gas & Electric

2.2 Data Gaps

According to ASTM International Standard E1527-21, data gaps occur when the Environmental Professional is unable to obtain information required, despite good faith efforts to gather such information. No significant data gaps were identified. Full access to the buildings was not possible to the presence of unauthorized inhabitants and dogs. The lack of aerial photography in five-year increments constitute a data gap. Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other current and historical sources, these data gaps are not expected to alter the findings of this assessment.

2.4 Recommendations

No additional environmental assessment work is recommended by Nelson Enviro, LLC at this time.

3.0 INTRODUCTION

Nelson Enviro, LLC performed a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 10407 California 49 in Coulterville, Mariposa County County, CA (subject property). APN 002-220-001

3.1 Purpose

The purpose of this Phase I ESA is to investigate and identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), and historical recognized environmental conditions (HRECs) associated with the subject property and/or surrounding properties.

ASTM Standard Practice E1527-21 defines **REC**s as: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a REC. De minimis conditions relate to a release that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

ASTM Standard Practice E1527-21 defines **CREC**s as: REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls.

ASTM Standard Practice E1527-21 defines **HREC**s as: a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A HREC is not a REC.

3.2 Scope of Work

The Phase I ESA conducted at the subject property was in accordance with ASTM Standard E 1527-21 and included the following:

- · A site reconnaissance and visual survey of properties proximate to the subject property,
- Review of records and interviews with regulatory officials and representatives regarding current and former operations at the subject property,
- A review of historical resources, such as: property records, topographic maps, fire insurance maps, city directories, and aerial photographs,
- Review of previous environmental site assessments, if made available,
- Review of State and Federal environmental database information, and
- Evaluation of information and preparation of the report provided herein.

Typically, a Phase I ESA does not include sampling or testing of air, soil, groundwater, surface water, or building materials. These activities would be carried out under separate cover, if necessary.

3.3 Significant Assumptions

There is a possibility that even with the proper application of these methodologies conditions may exist that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Nelson Enviro, LLC believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Nelson Enviro, LLC cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of

this assessment are not intended to produce all inclusive or comprehensive results, but rather to provide Topo Ventures LLC, its affiliates or assignees with information relating to the subject property.

3.4 Limitations and Exceptions

No limitations or exceptions to ASTM Standard E1527-21 were noted during the course of this Phase I ESA.

3.5 Deviations

According to ASTM International Standard E1527-21, data gaps occur when the Environmental Professional is unable to obtain information required, despite good faith efforts to gather such information. No significant data gaps were identified. Full access to the buildings was not possible to the presence of unauthorized inhabitants and dogs. The lack of aerial photography in five-year increments constitute a data gap. Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other current and historical sources, these data gaps are not expected to alter the findings of this assessment.

3.6 Special Terms and Conditions

Authorization to perform this assessment was given by the client on January 10, 2024. Instructions as to the location of the subject property, access, and an explanation of the subject property and facilities to be assessed were provided by Topo Ventures LLC, its affiliates or assignees.

3.7 Reliance

This report has been prepared for the sole benefit of the client. The report may not be relied upon by any other person or entity without the express written consent of Topo Ventures LLC, its affiliates or assignees and Nelson Enviro, LLC.

4.0 USER-PROVIDED INFORMATION

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the user of this Phase I Environmental Site Assessment must conduct the following inquiries required by 40 CFR 312.25, 312.28,312.29, 312.30, and 312.31. The User should provide the requested information to the environmental professional. Failure to conduct these inquiries could result in a determination that All Appropriate Inquiry is not complete.

As part of this Phase I ESA, Nelson Enviro, LLC requested certain information from the "User". This section describe tasks to be performed by the User. Mahesh Patel of Yosemite Motel Investments, LLC, completed the Due Diligence Questionnaire provided by Nelson Enviro, LLC.

4.1 Activity/Use Limitations

Topo Ventures LLC, its affiliates or assignees and Yosemite Motel Investments, LLC did not make Nelson Enviro, LLC aware of known Activity and Use Limitations (AUL) associated with the subject property.

4.2 Specialized Knowledge

Topo Ventures LLC, its affiliates or assignees did not report any specialized knowledge of this subject property. Nelson Enviro, LLC has no specialized knowledge of the subject property outside of the research which was conducted and reported as part of this report.

4.3 Valuation Reduction for Environmental Issues

Nelson Enviro, LLC has not been provided with information related to a valuation reduction due to environmental issues.

4.4 Owner, Subject Property Manager, and Occupant Information

<u>Owner</u>

Yosemite Motel Investments, LLC dba Yosemite Gold Country Lodge 10407 Hwy. 49 N. Coulterville, CA

Key Site Manager

None identified

Occupants

None identified although unauthorized individuals appear to be in residence

4.5 Reason For Performing Phase I ESA

Nelson Enviro, LLC understands that the findings of this study will be used to evaluate a pending financial transaction in connection with the subject property. The reason for conducting a Phase I Environmental Site Assessment is for the purpose of identifying, to the extent feasible pursuant to the processes described in ASTM International Standard 1527-21, recognized environmental conditions in connection with the property and within the agreed scope of work.

5.0 SUBJECT PROPERTY DESCRIPTION

The subject property is located at 10407 California 49, Coulterville, Mariposa County, CA APN: 002-220-001

5.1 Location and Legal Description

The subject property is known as Yosemite Gold County Lodge & Campground and is located at 10407 California 49, Coulterville, CA. Information obtained from the Mariposa County Assessor's Office indicated that the tax assessment parcel number for the subject property is 002-220-001.

5.2 Subject Property and Surrounding Area Description

The subject property consists of approximately 3.96 acres and is developed with an approximately 6,800 SF, nine room motel building. Assorted outbuildings and structure are on the subject property, all in poor condition. The motel building sits on a point that slopes downward on the east and west sides. Groundcover consists primarily of graded terraces where former residential structures were located. The campground has also been graded. The subject property can be accessed from California Highway 49.

The subject property is zoned Miscellaneous.

The area surrounding the subject property is primarily rural residential and native ground listed by the Mariposa County Assessor's Office as having "No Value".

5.3 Current Use of Subject Property

The subject property is currently unoccupied with the exception of unauthorized individuals in two travel trailers and possibly in the lodge itself.

5.4 Description of Structures and Other Improvements

All of the buildings observed on the subject property are in poor condition as evidenced in the photo log in Appendix B.

No significant renovations are known to have occurred.

According the property owners responses on the Due Diligence Questionnaire, drinking water is supplied by an onsite well and sewer service is supplied by the Coulterville Wastewater Treatment Facility.

Electricity is provided to the subject property by Pacific Gas & Electric

5.5 Adjoining Property Information

During the site reconnaissance, Nelson Enviro, LLC observed the following land use on properties in the immediate vicinity of the subject property:

Adjoining Property Information							
Direction From Subject Property	Occupant	Use	Comments				
North	unknown	Undeveloped					
South	unknown	Undeveloped					
East	unknown	Mixed Use	rural residential; undeveloped land				
West	unknown	Undeveloped					

6.0 SITE RECONNAISSANCE

The site reconnaissance was conducted on January 12, 2023 by Mike Nelson of Nelson Enviro, LLC. Weather conditions at the time of the site reconnaissance were cool and cloudy. Photographs of pertinent features identified during the site reconnaissance are included in Appendix B.

6.1 Methodology and Limiting Conditions

The site reconnaissance consisted of observing the boundaries of the subject property and systematically traversing the subject property to provide an overlapping field of view, wherever possible. The site reconnaissance consisted of walking the subject property perimeter and exterior areas. Building interiors were not entered due to safety concerns with the unauthorized individuals living on the subject property. Inaccessible areas of the subject property were not observed, such as beneath vehicles and areas of dense vegetation. The adjoining properties were visually observed from curbside, but were not entered. The inability to inspect these areas does not represent a significant data gap.

6.2 General Subject Property Setting

The subject property consists of approximately 3.96 acres and is developed with an approximately 6,800 SF, nine room motel building. Assorted outbuildings and structure are on the subject property, all in poor condition. The motel building sits on a point that slopes downward on the east and west sides. Groundcover consists primarily of graded terraces where former residential structures were located. The campground has also been graded. The subject property can be accessed from California Highway 49.

Other		X

6.3.1 Hazardous Substances

No hazardous substances were observed on the subject property during the site reconnaissance.

6.3.2 Petroleum Products

No petroleum products were identified on the subject property during the site reconnaissance.

6.3.3 Underground Storage Tanks (USTs)

No obvious evidence of underground storage tanks (USTs) was identified on the subject property during the site reconnaissance.

6.3.4 Aboveground Storage Tanks (ASTs)

Several propane tanks were observed adjacent to one of the travel trailers during the site reconnaissance.

ASSOCIATED PHOTOGRAPHS

Campground resident belongings and propane tanks

6.3.5 Strong, Pungent, or Noxious Odors

No strong, pungent, or noxious odors were observed on the subject property during the site reconnaissance.

6.3.6 Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products

No standing surface water or pools or sumps containing liquids likely to be hazardous substances or petroleum products were observed during the site reconnaissance.

6.3.7 Drums, Totes, and Intermediate Bulk Containers

No drums, totes, or intermediate bulk containers were identified on the subject property during the site reconnaissance.

6.3.8 Hazardous Substance and Petroleum Product Containers Not in Connection With Identified Uses

No evidence of hazardous substance or petroleum product containers, not in connection with identified uses, were observed on the subject property during the site reconnaissance.

6.3.9 Unidentified Substance Containers

No evidence of unidentified substance containers was observed on the subject property during the site reconnaissance.

6.3.10 PCB-Containing Items

Two pole-mounted PG&E transformers were observed in the area of the former mobile home. No presence of leaking, staining, or any other evidence that would suggest a release of PCBs was observed at the time of the site reconnaissance.

ASSOCIATED PHOTOGRAPHS

PG&E transformer at the former mobile home site

PG&E transformer at the former mobile home site

6.3.11 Stains or Corrosion on Floors, Walls, or Ceilings

Due to access issues previously noted, interior observations were not conducted during the site reconnaissance.

6.3.12 Drains and Sumps

No discharge features (floor drains, catch basins, oil/water separators, etc.) were observed on the subject property during the site reconnaissance.

6.3.13 Pits, Ponds, or Lagoons

Pits, ponds or lagoons were observed on the subject property during the site reconnaissance.

6.3.14 Solid Waste

Solid waste was observed in several areas of the subject property as shown in the photos below.

ASSOCIATED PHOTOGRAPHS

Solid waste at east end of Lodge building

Structure, unknown use, at the south side of the Lodge

6.3.15 Stained Soil or Pavement

No stained soil or pavement was observed on the subject property during the site reconnaissance.

6.3.16 Stressed Vegetation

No stressed vegetation, other than that stressed due to a lack of water, was identified on the subject property during the site reconnaissance.

6.3.17 Wells

A domestic well provides potable water for the subject property.

ASSOCIATED PHOTOGRAPHS

7.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs in connection with the subject property.

7.1 Standard Environmental Record Resources

Nelson Enviro, LLC contracted Environmental Data Resources, Inc. (EDR) to conduct a search of Federal and State databases containing known and suspected sites of environmental contamination. The number of listed sites identified within the approximate minimum search distance (AMSD) from the Federal and State environmental records database listings specified in ASTM Standard E 1527-21 are summarized in the following table. Detailed information for sites identified within the AMSDs is provided below, along with an opinion about the significance of the listing to the analysis of recognized environmental conditions in connection with the subject property. Copies of the EDR research data and a description of the databases are included in Appendix D of this report.

Based on a review of this information, none of the identified concerns are expected to have an adverse impact on the subject property and are included only for reference consistent with ASTM Standard E1527-21.

No orphan sites were identified in the EDR Radius Map Report.

Map Findings Summary								
Database	Subject Property	Search Distance (Miles)	< 1/8	1/8 - 1/4	1/4 - 1/2	1/2 - 1	> 1	Total Plotted
SEMS-ARCHIVE		0.5	0	0	1	NR	NR	1
MINES MRDS		0.25	0	1	NR	NR	NR	1
LUST		0.5	0	1	3	NR	NR	4
AST		0.25	0	1	NR	NR	NR	1
CORTESE		0.5	0	1	2	NR	NR	3
HIST CORTESE		0.5	0	1	2	NR	NR	3
CERS TANKS		0.25	0	1	NR	NR	NR	1

Subject property listings are discussed further in Section 11.0 Conclusions.

7.1.1 Regulatory File Review

A search was conducted on the Cal-EPA Regulated Site Portal, the State Water Resources Control Board GeoTracker website, and the Department of Toxic Substances Control EnviroStor website. No information regarding the subject property was found.

7.2 Additional Environmental Record Resources

Nelson Enviro, LLC contracted Environmental Data Resources, Inc. (EDR) to conduct a search of Federal and State databases containing known and suspected sites of environmental contamination. The number of listed sites identified within the approximate minimum search distance (AMSD) from the Federal and State environmental records database listings specified in ASTM Standard E 1527-21 are summarized in the previous table. Detailed information for sites identified within the AMSDs is provided in Section 11 - Conclusions, along with an opinion about the significance of the listing to the analysis of recognized environmental conditions in connection with the subject property. Copies of the EDR research data and a description of the databases are included in Appendix D of this report.

7.3 Physical Setting

General site settings including topography, surface water bodies, geology and hydrology are detailed in the following sections.

7.3.1 Topography

Based on a review of groundwater remediation sites in the local area, groundwater generally flows toward the south.

7.3.2 Surface Water Bodies

The nearest surface water in the vicinity of the subject property is an unnamed reservoir located approximately 3/4-mile south of the subject property. No surface water is located on the subject property.

7.3.3 Geology and Hydrology

Based on information provided by ParcelQuest, soil types on the subject property are Auburn loam, 2 to 15 percent slopes and Maymen rocky loam, 15 to 30 percent slopes.

The depth to water is estimated to be greater than 58 feet below the surface of the soil. Groundwater generally flows toward the south from the subject property. An on-site water well provides potable water to the subject property. No springs were observed during the subject property reconnaissance. The nearest surface water in the vicinity of the subject property is an unnamed reservoir located approximately 3/4-mile south of the subject property.

No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

7.4 Historical Use

The objective of reviewing historical resources is to develop a history of the previous uses of the subject property and surrounding area, in order to help identify the likelihood of past uses which might have led to RECs in connection with the subject property.

7.4.1 Historical Summary

Historical information identifying the past use of the subject property was obtained from a variety of sources as detailed in Appendix C of this report and included: City Directories, Aerial Photographs, Sanborn Fire Insurance Maps, and/or Topographic Maps.

7.4.2 City Directories

Available city directories dated 1981 through 2020, provided by EDR, were reviewed for this Environmental Site Assessment. Copies of the city directory listings are included in Appendix C of this report.

7.4.3 Aerial Photos

Available aerial photographs dated 1940 through 2020, provided by EDR, were reviewed for this Environmental Site Assessment. Copies of selected photographs are included in Appendix C of this report.

7.4.4 Sanborn/Historical Maps

Sanborn Fire Insurance maps for the subject property and surrounding area were not readily available or reviewable.

7.4.5 Historical Topographic Maps

Available topographic maps dated 1893 through 2021, provided by EDR, were reviewed for this Environmental Site Assessment. Copies of selected maps are included in Appendix C of this report.

7.4.6 Previous Environmental Reports

No previous environmental reports were identified or made available by the client/user during the Phase I ESA.

7.4.7 Building Department Records

Records from the Mariposa County Building Department were not readily available for review. Based on information obtained from other current and historical sources, the lack of building permit review is not expected to alter the findings of this assessment.

7.4.8 Title Records

No title records were provided by the user/client. Please refer to the Records Review section for current and historical use of the subject property.

7.4.9 Other Historical Records

No other historical records were reviewed.

7.5 Environmental Liens and Activity/Use Limitations

The User has no knowledge of environmental liens or land use limitations on the property.

7.6 Vapor Encroachment Evaluation

A Tier I Vapor Encroachment Screen was conducted. The screen findings showed that Vapor Encroachment Concerns can be ruled out for all the sites listed. The Vapor Encroachment Screen can be found in Appendix F: Vapor Encroachment Evaluation.

8.0 INTERVIEWS

Mahesh Patel completed the Due Diligence Questionnaire provided by Nelson Enviro, LLC.

Interviews with past owners and operators were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

Interviews with local government officials were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources. However, Nico Turek of Topo Ventures, LLC provided information from the Mariposa County Code Enforcement Division regarding compliance issues at the subject property in 2019.

Interviews with others were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

9.0 NON-SCOPE CONSIDERATIONS

No additional services beyond the scope of ASTM E1527-21 were included in the scope of work for this ESA.

10.0 FINDINGS AND OPINIONS

Areas of Concern

No areas of concern were observed.

De minimis conditions

No de minimis conditions were observed.

Based on the following definition, no known or suspected recognized environmental conditions are noted.

A Recognized Environmental Condition is defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

Based on the following definition, no known or suspected historical recognized environmental conditions are noted.

A Historical Recognized Environmental Condition is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required control, (e.g., property use restrictions, activity and use limitations(AUL's), institutional controls, or engineering controls). Before calling the past release a Historical Recognized Environmental Condition, the Environmental Professional must determine whether the past release is a Recognized Environmental Condition at the time the Phase I Environmental Site Assessment is conducted (e.g., if there has been a change in the regulatory criteria). If the Environmental Professional considers this past release to be a Recognized Environmental Condition at the time the Phase I Environmental Site Assessment is conducted, the condition shall be included in the conclusions section of the report as a Recognized Environmental Condition.

Based on the following definition, no known or suspected controlled recognized environmental conditions are noted.

A Controlled Recognized Environmental Condition is defined as a Recognized Environmental Condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AUL's, institutional controls, or engineering controls). A condition considered by the Environmental Professional to be a Controlled Recognized Environmental Condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a Recognized Environmental Condition in the conclusions section of the Phase I Environmental Site Assessment report.

Opinion

Based on the results of the Phase I Environmental Assessment, it is my opinion that this assessment has revealed no evidence of Recognized Environmental Conditions (RECs), Historical Recognized Environmental Conditions (HRECs), or Controlled Recognized Environmental Conditions (CRECs) in connection with the subject property. No additional environmental assessment work is recommended by Nelson Enviro, LLC at this time.

11.0 CONCLUSIONS

Mike Nelson of Nelson Enviro, LLC conducted a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM International Standard Practice E-1527-21 of the subject property located at 10407 California 49, Coulterville, Mariposa County, CA, APN 002-220-001

The subject property was not identified in any of the databases searched by EDR.

A search was conducted on the Cal-EPA Regulated Site Portal, the State Water Resources Control Board GeoTracker website, and the Department of Toxic Substances Control EnviroStor website. No information regarding the subject property was found.

Based upon a review of the current regulatory agency data and assessment of the subject property, it appears that the potential for adverse impacts to the subject property due to current or past activities at the subject property is low.

Properties adjoining the subject property and properties in the general area were evaluated for potential or existing environmental concerns. No Recognized Environmental Conditions were found that are likely to have an impact on the subject property.

Based upon a review of the current regulatory agency data and assessment of sites in the general area, it appears that the potential for adverse impacts to the subject property due to current or past activities in the general vicinity is low.

A Tier I Vapor Encroachment Screen was conducted. The screen findings showed that Vapor Encroachment Concerns can be ruled out for all the sites listed.

12.0 RECOMMENDATIONS

No additional environmental assessment work is recommended by Nelson Enviro, LLC at this time.

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities.EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk,Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Nelson Enviro, LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results: Certification # 8979-4542-B245 PO# NA NA Project

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results Certification #: 8979-4542-B245

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/19/2023 has revealed that there

is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SOLAMBO MINE (AKA SO	NEAREST CITY LA GRAN	ESE 1/4 - 1/2 (0.463 mi.)	9	36

City	EDR ID	Site Name	Site Address	Zip	Database(s)

NO SITES FOUND

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: N/A Last EDR Contact: 01/02/2024 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Quarterly

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: N/A Last EDR Contact: 01/02/2024 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/02/2024 Next Scheduled EDR Contact: 04/22/2024 Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/02/2024 Next Scheduled EDR Contact: 04/22/2024 Data Release Frequency: Quarterly

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/06/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/06/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/04/2023 Date Data Arrived at EDR: 12/06/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/06/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/23/2023 Date Data Arrived at EDR: 10/24/2023 Date Made Active in Reports: 01/11/2024 Number of Days to Update: 79 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 10/24/2023 Next Scheduled EDR Contact: 02/05/2024 Data Release Frequency: Quarterly

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or i nactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 08/15/2023 Date Data Arrived at EDR: 08/30/2023 Date Made Active in Reports: 12/01/2023 Number of Days to Update: 93 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 12/14/2023 Next Scheduled EDR Contact: 03/25/2024 Data Release Frequency: Semi-Annually

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Lists of Registered Storage Tanks

SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994	Source: State Water Resources Control Board

CA FID UST: Facility Inventory Database

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994 Date Data Arrived at EDR: 09/05/1995 Date Made Active in Reports: 09/29/1995 Number of Days to Update: 24

Source: California Environmental Protection Agency Telephone: 916-341-5851 Last EDR Contact: 12/28/1998 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

CERS TANKS: California Environmental Reporting System (CERS) Tanks

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

Date of Government Version: 10/16/2023 Date Data Arrived at EDR: 10/17/2023 Date Made Active in Reports: 01/09/2024 Number of Days to Update: 84 Source: California Environmental Protection Agency Telephone: 916-323-2514 Last EDR Contact: 10/17/2023 Next Scheduled EDR Contact: 01/29/2024 Data Release Frequency: Quarterly

Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 08/22/2023 Date Data Arrived at EDR: 08/24/2023 Date Made Active in Reports: 11/07/2023 Number of Days to Update: 75 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 11/21/2023 Next Scheduled EDR Contact: 03/11/2024 Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 12/04/2023 Next Scheduled EDR Contact: 04/08/2024 Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 08/28/2023 Date Data Arrived at EDR: 08/29/2023 Date Made Active in Reports: 11/13/2023 Number of Days to Update: 76 Source: DTSC and SWRCB Telephone: 916-323-3400 Last EDR Contact: 11/22/2023 Next Scheduled EDR Contact: 03/11/2024 Data Release Frequency: Semi-Annually

Records of Emergency Release Reports

HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 09/18/2023 Date Data Arrived at EDR: 09/20/2023 Date Made Active in Reports: 12/12/2023 Number of Days to Update: 83 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 12/13/2023 Next Scheduled EDR Contact: 04/01/2024 Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 10/31/2023 Next Scheduled EDR Contact: 02/12/2024 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 11/03/2023 Next Scheduled EDR Contact: 02/12/2024 Data Release Frequency: Varies

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2020 Date Data Arrived at EDR: 06/14/2022 Date Made Active in Reports: 03/24/2023 Number of Days to Update: 283 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 12/14/2023 Next Scheduled EDR Contact: 03/25/2024 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2021 Date Data Arrived at EDR: 08/18/2023 Date Made Active in Reports: 11/07/2023 Number of Days to Update: 81 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 11/13/2023 Next Scheduled EDR Contact: 02/26/2024 Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 09/01/2023 Date Data Arrived at EDR: 09/27/2023 Date Made Active in Reports: 12/21/2023 Number of Days to Update: 85 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 09/26/2023 Next Scheduled EDR Contact: 01/29/2024 Data Release Frequency: Varies

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35 Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

Date of Government Version: 09/23/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 12/21/2023 Number of Days to Update: 79 Source: Environmental Protection Agency Telephone: 202-272-0167 Last EDR Contact: 12/28/2023 Next Scheduled EDR Contact: 04/15/2024 Data Release Frequency: Varies

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS		

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation:	1810 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50003786 COULTERVILLE, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

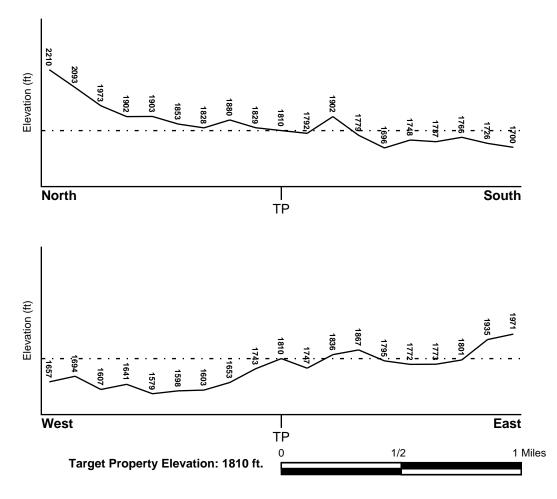

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

	INVVI Electronic
NWI Quad at Target Property	Data Coverage
COULTERVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:			
Search Radius:	1.25 miles		
Status:	Not found		

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	MAYMEN
Soil Surface Texture:	gravelly loam
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Well drained
Hydric Status: Not hydric	
Corrosion Potential - Uncoated Steel:	Low
Depth to Bedrock Min:	> 51 inches
Depth to Watertable Min:	> 0 inches

	Βοι	indary		Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	3 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0.01	Max: Min:
2	3 inches	9 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0.01	Max: Min:
3	9 inches	16 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0.01	Max: Min:
4	16 inches	59 inches	unweathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0.01	Max: Min:

Soil Map ID: 2	
Soil Component Name:	AUBURN

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division Telephone: 916-323-1779 Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon Source: Department of Public Health Telephone: 916-210-8558 Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information Source: USGS Telephone: 703-356-4020 The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Appendix E:

Regulatory File Review

Site Summary:

Improvements to the property include a hotel office/single family dwelling, a mobile home (not located within the mobile home park), a nine (9) room hotel, an unpermitted storage/utility building originally intended to be used as additional hotel rooms, a legally established "grandfathered" mobile home/recreational vehicle park (RV) with a total of 12 units, several outbuildings, restroom/ shower buildings to service the RV park and an unpermitted tent campground.

The site is located within the Coulterville Town Planning Area. The parcel consists of 3.96 acres which has a split zoning. Land use is subject to the Coulterville Town plan (See Attachment "A"). The area adjacent to State Highway 49 North is zoned "Highway Service Commercial" (HSC), which encompasses approximately ½ of the property. In the HSC zoning, permitted uses include one single family dwelling per parcel and accessory buildings pertinent to the permitted uses. Conditional uses within the HSC zoning include dwellings and dwelling groups subject to the building area, lot width and yard requirements specified for medium density residential districts; hotels, motels, clubs, lodge halls, hospitals, sanitariums and clinic; retail stores and shops of highway commercial service character and conducted within a building, includes restaurants and cafes, drive-ins restaurants, refreshment stands, gift or curio shops, antique stores, bars or cocktail lounges, food stores and other uses which are of similar character; outdoor advertising signs, public and quasi-public, including churches; service stations.

The west approximately ½ of the property located directly behind the HSC on the same assessor's parcel number is zoned "Rural Residential" (RR). That zoning allows for one single family residence per parcel, one guest house per parcel; one permanently maintained large animal for each one (1) acre of land. Conditional uses include; public or quasi-public facilities such as schools, parks, utility substations designed to serve the adjacent area; and churches.

Records indicate that the single family home/office and hotel operation on the property was established sometime in the 1970's and has operated as a hotel since. The hotel is currently permitted for 9 rooms, and operates under Mariposa County Transient Occupancy Tax Certificate 2017-001.

A mobile home/Recreational Vehicle Park (RV) was established during the same time period as the hotel. The park operates under State of California Department of Housing and Community Development (HCD) permit number 22-0022-MP. The permitted mobile home park consists of 10 RV units or spaces, six with drains, four without drains and two mobile home spaces. In addition, there are several accessory buildings associated with the RV park. The accessory structures include restrooms and shower buildings.

Compliance Issues:

There is an open compliance case on the subject site. Compliance issues are as follows:

- 1. The tent campground operating on the site is not an allowed land use in the HSC zone.
 - a. While HCD does not distinguish between an RV space being utilized for an RV or up to two tents per space (tents must be located within the space), the parcels zoning today does not allow for tents or commercial camping. The campground created by the current operator is not a permitted land use, and has only been in operation since 2017.
- 2. The patio structure/eating area canopy located adjacent to the hotel is unpermitted. A permit for this structure should have been obtained from the Mariposa County Building Department prior to construction.
- 3. Construction of a building adjacent to the hotel without permits. The original plan for this structure was as additional rooms for the hotel. The Mariposa County Building Department contacted the owner in 2016 and advised them that permits must be obtained to bring the building into compliance or demolish it. The owner subsequently hired a consultant to bring this building into compliance. The consultant started the process, however, as of the date of this letter nothing has been done to permanently resolve the issue. The status and use of this structure has not recently been confirmed.
- 4. The two park model trailers were installed on the two mobile home spaces in the approved mobile home park area located to the left of the driveway. The installation of these park models were permitted by HCD. However, while allowed by HCD, the operator should have first cleared the zoning through Mariposa County Planning. The installation of these units is not allowed by zoning. In addition, it is believed these units are being utilized as transient rentals. In which case they do not have transient rental certificates, nor would they be allowed under 17.108.180.T which states that "Transient occupancy uses shall be prohibited in a mobile home

5. A third mobile home exists on the site in the RR zoning. The mobile home that was orgininally permitted in this location was removed and replaced by another mobile home. The replacement mobile home was not been permitted. This unit is located outside of the mobile home park

Diane Blalock Page 2 of 3 October 09, 2019

boundaries recognized by HCD. Based on this fact the replacement mobile should have obtained required permits through the Mariposa County Building Department.

6. The site is subject to Design Review requirements. The only design review that exists for the site, was for the former owner's signage on the property. When the current owner changed the name and replaced the signage, a Design Review was not applied for or approved. Signage on the parcel is subject to design review.

Thank you and please do not hesitate to contact me should you have any additional questions or concerns.

Respectfully Submitted,

nder

Qualifications

Qualification(s) of Environmental Professional(s)

The Code of Federal Regulations (40 CFR.10, Part 312) spells out the definition of an Environmental Professional (EP). I meet the stated qualifications, as highlighted below.

DEFINITION OF ENVIRONMENTAL PROFESSIONAL, PURSUANT TO 40 CFR.10

Environmental Professional means:

(1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see \$312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in \$312.20(e) and (f).

(2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience.

(3) An environmental professional should remain current in his or her field through participation in continuing education or other activities.

(4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b).

(5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

Bachelor of Science, Crop Science - California State Polytechnic University, San Luis Obispo, California, 1980

Certified Environmental Hazardous Materials Technician - Merced College, Merced, CA, 1994

Due Diligence Questionnaire

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the user of this Phase I Environmental Site Assessment must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "All Appropriate Inquiry" is not complete.

Please complete the entire questionnaire carefully and to the best of your knowledge. Attach extra sheets of paper as necessary.

YES NO

		Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law? If yes, please explain.
	X	To the best of my knowledge
	Y	Did a search of recorded land title records indentify any activity and land use limitations (AUL's), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? To the best of my knowledge
		Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? If yes, please explain.
\times		Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? If no, please describe. To the best of my knowledge
	X	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, a) Do you know the past uses of the property? b) Do you know of specific chemical that are present or once were present at the property? c) Do you know of spills or other chemical releases that have taken place at the property? d) Do you know of any environmental cleanups that have taken place at the property? If yes, please describe. To the best describe.
	X	Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or like presence of releases at the property? If yes, please describe.

Nelson Enviro, LLC 103 Laurel Ave., Atwater, CA 95301 Office 209-769-7460 Fax (775) 254-3748 mike@nelsonenviro.com

Current Site Operations and Conditions

Please describe current site operations:
