

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Pantoja Trucking Project

Lead Agency: City of Oxnard Community Development Department

Contact Name: Jay Dobrowalski

Email: jay.dobrowalski@oxnard.org

Phone Number: 805-385-3948

Project Location: City of Oxnard, Ventura County

City

County

Project Description (Proposed actions, location, and/or consequences).

The proposed project by Pantoja Trucking Company involves expanding operations at their East Hueneme Road facility by adding a 0.77-acre paved truck parking area, new entry gate, fencing, landscaping, and a stormwater basin. The project supports increased truck activity from the Port of Hueneme, adding five drivers and raising daily truck trips from 24 to 72.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Biological Resources:

Mitigation Measure (MM) BIO-1 would reduce nesting birds impacts to a less than significant level through avoidance and minimization measures including carrying out initial ground disturbance activities related to the project outside of the bird breeding season if feasible; carrying out a pre-construction nesting bird survey if such activities are carried out during the bird breeding season; and various avoidance measures if nesting birds are found by the nesting bird survey.

MM BIO-2 would reduce potential lighting impacts on nearby sensitive species to a less than significant level by requiring motion detectors on perimeter lighting set for 10 minutes or less, and requiring all exterior lighting to include "Dark Sky Friendly" fixtures.

Cultural Resources:

MM CUL-1 would reduce potential impacts to archaeological resources to a less than significant level by establishing procedures for the proper handling and disposition of archaeological resources if they are found during ground-disturbing activities.

Noise:

MM BIO-1 (described above) would reduce potential noise impacts to nesting birds to a less than significant level.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None

Provide a list of the responsible or trustee agencies for the project.
