Project Title: North County Recycling Center and Sanitary Landfill Permit Revision Project

Project Applicant: County of San Joaquin Public Works

Project Location (include county): North County Landfill (APN 065-12-004), San Joaquin County

Project Description:

The project site is located at 17720 East Harney Lane (Assessor's Parcel Number 065-12-004), east of the City of Lodi in San Joaquin County. The project site includes the North County Sanitary Landfill and Recycling Center, which operates under a Solid Waste Facilities Permit (SWFP) issued by the County's Environmental Health Department. The purpose of the project is to revise the provisions of the SWFP to increase the maximum allowed daily refuse disposal and the number of daily incoming refuse vehicles from 1,200 tons per day and 850 vehicles per day to 4,000 tons and 1,200 vehicles per day. This increase would involve a change in refuse truck routing; approximately 50 transfer trucks that currently go to the Foothill Landfill would be re-routed to the North County Landfill. The projected annual intake of the landfill would increase from 250,000 tons in 2024 to 660,000 tons in 2026, then increase 3 percent annually thereafter. The existing operating hours of 7:00 a.m. to 5:00 p.m. seven days per week would also be altered to 6:00 a.m. to 5:00 p.m. Up to six new employees would be needed for the increase in waste disposal and truck trip-related activity. No new construction is proposed as part of the project, and the landfill's capacity would not change. Thus, because of the permit modifications without expanding current capacity, the existing projected closure date of the landfill would move from 2048 to 2043. The rate of additional cell and module construction on the project site would increase to accommodate the amount of waste accepted. Existing temporary and permanent waste cover methods would remain unchanged, and the haul routes would remain the same.

This is to advise that the County of San Joaquin has approved the above (Lead Agency or Responsible Agency)

described project on 6/17/2025 and has made the following determinations regarding the above described project.

- 1. The project will not have a significant effect on the environment.
2. An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA. A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan was adopted for this project.
5. A statement of Overriding Considerations was adopted for this project.
6. Findings were made pursuant to the provisions of CEQA.

This is to certify that the final EIR with comments and responses and record of project approval, or the negative Declaration, is available to the General Public at:

1810 East Hazelton Avenue, Stockton, CA 95205
