Project Description (Proposed actions, location, and/or consequences).

The District is proposing to construct a new pump station at the Marin City Pond, which will divert flood waters to Richardson Bay via a culvert located within the Caltrans right-of-way. A new platform-type pump station would be constructed at the northeast corner of the Pond to provide a permanent solution to reduce flooding in Marin City and to maximize the limited flow capacity across U.S. Highway 101.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described on an attached sheet have been added to the project. A MITIGATED NEGATIVE DECLARATION will be prepared.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Provide a list of the responsible or trustee agencies for the project.
