Project Description: (please use a separate page if necessary)

The District seeks to install a new well at one of the two proposed locations as part of their CIP, which would both aid the District in meeting current and future demand, and minimize Chromium-6 concentrations in the District's water supply. Well No. 18 is proposed to be located on 2.2-acre parcel (Assessor's Parcel Number [APN] at APN 3100-561-14) in the northern portion of the District, along Beekley Road, south of Begonia Road and north of Highway 18. A backup location for Well 18 (Backup Well site) is proposed to be located on a 2.2-acre parcel (APN 3101-381-25) in the northern portion of the District, at the northeast corner of Barker Road and Camellia Road, east of Sheep Creek Road and North of Highway 18. ****Please Refer to Page 2 for the remainder of the project description.****

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Notice of Completion, Page 2.

Project Description, continued.

This Initial Study analyzes the impacts of installing one well, but analyzes the site constraints associated with developing the well at the Well 18 or Backup Well site. At each of the well locations, pipeline would need to be installed to connect the new water supply to the District's existing supply system. The Well 18 site would require installation of about 600 lineal feet (LF) of water pipeline from the project site north along Beekley Road to an existing District water distribution pipeline at Begonia Road. The Backup Well site would require installation of about 1,800 lineal feet (LF) of water pipeline from the project site west along Camellia Road to an existing District water distribution pipeline at Sheep Creek Road. The pipeline, at either site, is anticipated to be 12" diameter in size. The site would include the following features: a 4" drain line to the retention basin; a 10' x 10' chlorination building adjacent to the proposed well; and, a 4" conduit, switch gear, and transformer to connect to the existing powerline pole.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
