Type of Services	**Phase I Environmental Site Assessment**
Location	**451, 467, 469, 471, 475 and 479 El Camino Real Santa Clara, California**

SECTION 1: INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed at 451, 467, 469, 471, 475 and 479 El Camino Real in Santa Clara, California (Site) as shown on Figures 1 and 2. This work was performed for Bixby SPE Finance II, LLC (Bixby).

1.1 PURPOSE

The scope of work presented in the Agreement was prepared in general accordance with ASTM E1527-21 titled, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, "Standards and Practices for All Appropriate Inquiries; Final Rule" (AAI Rule, 40 CFR Part 312). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the Site.

As defined by ASTM E1527-21, the term Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition[1] is not a recognized environmental condition.

Bixby is considering redeveloping the Site for residential use. We performed this Phase I ESA to support Bixby in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

[1] A de minimis condition is defined by the ASTM Standard as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

1.2 SCOPE OF WORK

As presented in our Agreement, the scope of work performed for this Phase I ESA included the following:

- A reconnaissance of the Site to note readily observable indications of significant releases of hazardous materials to structures, soil, soil vapor or groundwater.
- Drive-by observation of adjoining properties to note readily apparent activities involving hazardous materials that have or could significantly impact the Site.
- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents on-Site or at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Historical research including review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Interviews with persons reportedly knowledgeable of current and/or prior Site uses, including the current Site owner and occupant(s).
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA are presented in Section 10.

1.3 ASSUMPTIONS

In preparing this Phase I ESA, Cornerstone can neither warrant nor guarantee that records obtained from or prepared by other parties, such as, but not limited to, regulatory agency records, interview responses, maps, related documents, and environmental reports prepared by others are accurate or complete. Cornerstone relied on the information obtained during this study unless we had actual knowledge that the information was incorrect or unless it was obvious that the information was incorrect based on other information obtained. We also assumed that the boundaries of the Site, based on information provided by Bixby, are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

1.4 ENVIRONMENTAL PROFESSIONAL

This Phase I ESA was performed by Stason I. Foster, P.E. and Peter M. Langtry, P.G., C.E.G. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 C.F.R. Part 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the All Appropriate Inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

SECTION 2: SITE DESCRIPTION

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

2.1 LOCATION AND OWNERSHIP

Table 1 describes the physical location, and ownership of the Site, based on information provided by Bixby.

Table 1. Location and Ownership

Assessor's Parcel No. (APN)	230-09-020 and 230-09-021*
Reported Address/Location	451, 467, 469, 471, 475 and 479 El Camino Real, Santa Clara California
Owner	Bixby SPE Finance 11, LLC
Approximate Lot Size	11 acres

* APN 230-09-021 is located with the City of San Jose, with no assigned street address.

In addition to the current addresses listed in Table 1, historical addresses for the Site of 701 and 825 Campbell Avenue were identified during our review of historical records. These historical addresses also were researched during this Phase I ESA.

2.2 CURRENT/PROPOSED USE OF THE SITE

The current and proposed uses of the Site are summarized in Table 2.

Table 2. Current and Proposed Uses

Current Use	Commercial office buildings and associated parking garages
Proposed Use	Residential

2.3 SITE SETTING AND ADJOINING PROPERTY USE

Land use in the general Site vicinity appears to be a mix of commercial and residential properties. During the Site visit, adjoining properties were observed from the Site and from adjacent public thoroughfares. Based on our Site vicinity reconnaissance, adjoining property uses are summarized below in Table 3. No features, activities, uses or conditions on the adjoining properties were observed that are considered indicative of Recognized Environmental Conditions at the Site.

Table 3. Adjoining Property Uses

Northeast	Sonesta Simply Suites Hotel and railroad right-of-way. Commercial office buildings are located east of the railroad tracks.
Northwest	Commercial businesses (bank and restaurants)
Southeast	Residential (University Villas)
Southwest	Santa Clara University (Guadalupe Hall and Stevens Stadium)

SECTION 3: USER PROVIDED INFORMATION

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is Bixby. The "All Appropriate Inquiries" Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions in connection with the Site, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to contamination. A search of title records for environmental liens and activity and use limitations also is required.

3.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property's use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

A Preliminary Title Report by First American Title Insurance Company (dated November 8, 2023) was provided for our review. The Preliminary Title Report referenced an Easement Agreement recorded January 31, 1997. This easement was granted to a purchaser of the Site by Mayfair Packing Company, Inc. (a former Site owner). Mayfair Packing Company was noted to be conducting remedial activities at the Site pursuant to an April 16, 1996 Revised Corrective Action Plan (CAP) that was approved by the Santa Clara Valley Water District (Valley Water). The easement allowed for Mayfair Packing Company to perform its remediation obligations including the installation of groundwater monitoring wells.

The Preliminary Title Report also referenced a deed restriction that was recorded in 2004 (for APN 230-09-020 and 021) to facilitate closure of a leaking underground storage tank (LUST) case following completion of the CAP noted above. Per the deed restriction, the disturbance of the subsurface, any construction on the surface, or change in land use requires the approval of the Valley Water, among other provisions. The deed restriction was amended in 2005 and now applies only to an approximately 100 by 100 foot portion of the Site. See Section 4.1.3.1 for further discussion of the on-Site LUST case.

3.2 SPECIALIZED KNOWLEDGE AND COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based on information provided by or discussions with Bixby, we understand that Bixby does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site, or other information that is material to Recognized Environmental Conditions, except for the information contained in the provided documents described in Section 3.3.

3.3 DOCUMENTS PROVIDED BY BIXBY

To help evaluate the presence of Recognized Environmental Conditions at the Site, Cornerstone reviewed and relied upon the documents provided by Bixby listed in Table 4. Please note that Cornerstone cannot be liable for the accuracy of the information presented in these documents. ASTM E1527-21 does not require the Environmental Professional to verify independently the information provided; the Environmental Professional may rely on the information unless they have actual knowledge that certain information is incorrect. A summary of the provided documents is provided below; please refer to the original reports for complete details.

Table 4. Documents Provided by Bixby

Date	Author	Title
September 24, 2015	CBRE, Inc., d/b/a IVI Assessment Services (CBRE-IVI)	Phase I Environmental Site Assessment, Bixby - University Station 451-495 El Camino Real, Santa Clara, CA

Based on the information reviewed, the California Cured Fruit Association built a large dried fruit warehouse on-Site in 1901. The Cured Fruit Association disbanded in 1903. In 1916, Rosenberg Brothers took over the warehouse for its dried prune and apricot operation. By 1939, the Site was occupied by several fruit packing and cold storage buildings. The facility was expanded during the 1940s and 1950s with the construction of additional associated buildings and building additions. Between 1974 and 1982, the cold storage and former fruit packing buildings on the central and east portions of the Site were demolished. Between 1982 and 1993, a rectangular building was constructed on the north portion of the Site. Between 1993 and 1998, the former structures on-Site were demolished to facilitate construction of the existing improvements, including four office buildings and two associated parking garages that were completed by 1999.

Two closed LUST cases were noted to be associated with the Site. CBRE-IVI (2015) identified one of the LUST cases as a Controlled Recognized Environmental Condition (CREC); the deed restriction discussed above was associated with the CREC. The other LUST case was identified as an Historical Recognized Environmental Condition (HREC). The two LUST cases are discussed further in Section 4.1.3.1.

SECTION 4: RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Cornerstone conducted a review of federal, state and local regulatory agency database records provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E1527-21. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix A.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with respect to the Site. The customary practice is to review information from standard sources that is reasonably ascertainable within reasonable time and cost constraints.

4.1.1 On-Site Database Listings

The Site addresses were identified in several of the researched regulatory agency databases as summarized below in Table 5. These database listings appear consistent with the Site history and conditions discussed in Section 3.3. Except for the closed LUST cases, the database listings identified for Site occupants relate primarily to regulatory filings associated with hazardous material use/storage and generation or disposal of hazardous wastes. Such listings are common for commercial facilities in urban settings, are not indicative of hazardous material releases.

Table 5. On-Site Database Listings

Facility Name and Address	Database Listings*
825 Campbell Avenue	
Walnut Operation	HIST UST (listing a 550 gallon gasoline UST)
469 El Camino Real	
Bixby SPE Finance 11	HWTS, ECHO, RCRA NonGen/NLR, FINDS
Panasonic R&D Company of America	HWTS
Blach Construction	HWTS, HAZNET
471 El Camino Real	
Magellan Corporation	HWTS, HAZNET
Macom Technology Solutions	CERS, HWTS, HAZNET, FINDS, ECHO, PFAS ECHO, RCRA NonGen/NLR
Thales Navigation, Inc.	HWTS, HAZNET
475 El Camino Real	
Mayfair Packing Site #2	LUST (closed case), CERS, CORTESE, FINDS
Mayfair Packing Plant #4	LUST (closed case), CORTESE, FINDS
Tech Station Associates LLC	CIWQS
Mayfair Packing Company	HWTS, HAZNET, HIST CORTESE, EMI
Randazzo	HWTS

* A description of the database sources is contained in the EDR database report attached in Appendix A.

4.1.2 Adjoining Property Database Listings

Database listings pertaining to spill incidents at adjoining properties are summarized in Table 6. Based on the information presented in the agency database report, no other off-Site spill incidents were reported that appear likely to significantly impact soil, soil vapor or groundwater beneath the Site. The potential for impact was based on our interpretation of the types of incidents, the locations of the reported incidents in relation to the Site and the assumed groundwater flow direction.

Table 6. Adjoining Property Database Listings

Facility Name and Address	Approximate Distance and Direction from Site	Database Listings/Comments
Bart System Silicon Valley Berryessa Extension Project	Adjacent to the northeast	Listed as an open case on the Water Board's Cleanup Program Site (CPS) database
Southern Pacific Transportation Company (SPTC)	Adjacent to the northeast	Listed as a closed case on the CPS database
Santa Clara University 455 El Camino Real	Adjacent to the southwest	Listed as a closed LUST case

4.1.3 Further Review of Database Listings

To obtain additional information regarding two on-Site LUST cases, and the LUST and CPS cases on adjoining properties, a cursory review of readily available documents obtained from the state Geotracker database (http://geotracker.waterboards.ca.gov) was performed. Geotracker is a database and geographic information system (GIS) that provides online access to environmental data. It tracks regulatory data about leaking underground storage tank (LUST), Department of Defense, Site Cleanup Program and Landfill sites. Brief summaries of the adjoining LUST and CPS cases are presented below.

4.1.3.1 On-Site LUST Cases

A 550-gallon gasoline UST was removed from the Site in 1987. In 1996, soil and groundwater sampling revealed elevated concentrations of petroleum hydrocarbons (concentrations that exceed current residential and commercial screening levels). In 1998, Oxygen Release Compound (ORC) was injected in this area of the Site to approximate depths of 10 to 65 feet to attempt to enhance bioremediation of fuel residuals.

During grading activities in 1998, two abandoned 12,000-gallon bunker oil USTs were encountered approximately 40 feet west of the 550 gallon UST; the bunker oil USTs and the associated piping were removed on February 23, 1998. The approximate locations of the USTs are shown on Figure 2. The Fire Department documented visible soil and groundwater contamination. Approximately 170 cubic yards (CY) of soil were over-excavated and disposed off-Site. Approximately 9,000 gallons of groundwater were pumped from the UST excavation, treated with activated carbon and reused on-Site during grading operations.

The deed restriction discussed in Section 3.3 was subsequently established and the Water Board issued a case closure letter dated June 10, 2004. The Water Board stated the following:

"*Residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The District and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement.*"

The second LUST case is associated with a 1,000-gallon gasoline UST and a 10,000-gallon diesel UST that were removed in 1991; the diesel UST was located on-Site and the gasoline UST was located off-Site on northwesterly adjoining property (Figure 2). One soil sample was collected from the gasoline UST excavation at a depth of 8½ feet; laboratory analyzes detected toluene at 0.006 mg/kg and xylenes at 0.005 mg/kg. Total petroleum hydrocarbons as gasoline (TPHg), TPH as diesel (TPHd), oil and grease, benzene, and ethylbenzene were not detected. Three soil samples were collected from the diesel UST excavation at depths of 13½ and 19 feet. In one of the three samples, TPHd was detected at 160 mg/kg; no other analytes were detected. Additional soil reportedly was removed from the diesel UST excavation. The subsequent analyses of confirmation soil samples did not detect petroleum hydrocarbons. The Water Board subsequently issued a September 12, 1991 No Further Action letter pertaining to the two USTs removed in 1991.

4.1.3.2 SPTC and Bart System Silicon Valley Berryessa Extension CPS Cases

The SPTC and Bart System Silicon Valley Berryessa Extension CPS cases pertain to the northeasterly adjoining railroad right-of-way that was formerly referred to as the Union Pacific Railroad (UPRR) Newhall Yard and historically used for maintenance, refueling and temporary storage of rail cars. Prior studies identified contaminants in soil on the property, predominantly TPH as oil (TPHo), lead and arsenic, at concentrations that exceed environmental screening levels (ESLs)[2]. The greatest concentrations were generally reported within the upper 3 feet. Remedial work conducted in 2007 and 2008 included the excavation of 13,634 cubic yards of impacted soil from 14 areas. Although impacted soil previously identified on the UPRR Newhall Yard appears unlikely to impact the Site, multiple railroad tracks historically traversed the Site. Thus, there is a potential for similarly impacted soil to be present on-Site.

Shallow groundwater at the Newhall Yard was found to be impacted by volatile organic compounds (VOCs) that reportedly represent residual groundwater contamination from the former FMC Corporation property located to the east (Arcadis, 2021). Based on groundwater monitoring reports associated with the FMC property and the reported northerly groundwater flow direction, VOC impacts at the nearby former FMC property appear unlikely to have significantly impacted the Site.

[2] Environmental Screening Levels (ESLs) established by the Water Board (January 2019) are used to screen sites for potential human health concerns where releases of chemicals have occurred. These screening levels are risk-based concentrations derived from standardized equations combining exposure information assumptions with toxicity data. Under most circumstances, the presence of a chemical at concentrations below the corresponding screening level can be assumed not to pose a significant health risk. Naturally occurring background concentrations of metals, such as arsenic, amongst others, in soil may exceed their respective screening levels. Cal/EPA generally does not require cleanup of soil to below background concentrations. This issue is frequently encountered with arsenic. Thus, arsenic data were compared to regional published background concentrations.

4.1.3.3 Santa Clara University LUST Cases

Two closed LUST cases are associated with the southwesterly adjoining property at 455 El Camino Real that currently is occupied by Santa Clara University Guadalupe Hall. Two 1,000-gallon USTs containing gasoline and diesel were removed from the property in 1988. Petroleum hydrocarbons were identified in soil and groundwater. Subsequently, approximately 1,000 tons of soil were excavated and disposed off-site, and multiple soil borings and groundwater monitoring wells were installed to evaluate the extent of impacts. Valley Water issued a case closure letter in 1996, stating that no further action was required.

The second LUST case is associated with a 1,000-gallon gasoline UST that was removed in 2000. No significant impacts to soil were identified, but TPHg, benzene, toluene, ethylbenzene and xylenes (BTEX) and methyl tert-butyl ether (MTBE) were identified in a groundwater grab sample collected from the UST excavation. Groundwater grab samples subsequently were collected from five borings to evaluate the extent of impact. The samples were analyzed for TPHg, BTEX and MTBE; these analytes were not detected. Valley Water issued a case closure letter in 2003, stating that no further action was required.

Based on the information reviewed, residual petroleum hydrocarbon impacts remain at the adjoining Santa Clara University property, however, the identified contaminants appear unlikely to have significantly impacted the Site.

Figures from 1988 associated with the Santa Clara University property depict the locations of the two USTs removed in 1988, as well as two additional USTs shown to be located on the southern and southeastern portions of the Site. The status of these depicted USTs is not known. The approximate locations are shown on Figure 2, and a copy of the 1988 figure is attached in Appendix E.

4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to the Site at the following public agencies: the Santa Clara Building Department and the Santa Clara Fire Department (SCFD). San Jose Building Department files also were searched for information pertaining to APN 230-09-021; no files were identified.

Santa Clara Building Department files contained a 1987 permit for construction of a new 1,345 square-foot building at Mayfair Packing, along with electrical permits from 1988. Permits from 1997 and 1998 pertained to the demolition of the prior on-Site structures and construction of the existing office buildings and parking garages. The prior structures were noted to have been occupied by Mayfair Packing Company (walnut division and cold storage building), Security Wholesale & Cold Storage, Santa Clara Frosted Foods, David Meat Packing and Rosenburg Brothers. Multiple permits dated from 2000 to the present pertained to various alterations and tenant improvements within the existing buildings.

The information reviewed from the SCFD is summarized in Table 6.

Table 6. File Review Information

Agency Name	Date	Occupant	Remarks
SCFD	Various	Mayfair Packing Co.	Various documents pertaining to the on-Site LUST cases discussed above in Section 4.1.3.1.
SCFD	1987-1993	Mayfair Packing Co.	Chemical inventories listing fumigants (methyl bromide), insecticides (malthion, pyrenone, vapona), propylene oxide, sulfuric acid, sodium hydroxide, sodium hypochlorite, kerosene, 1,1,1-trichloroethane, various petroleum based lubricants, diesel fuel, petroleum based solvent, Bay 555 aluminum cleaner, Vaporene B100 (sodium bichromate), lead chromate, adhesives, and paint related products, among others.
SCFD	1988 and 1990	Reliable Transportation	Chemical inventories listing diesel fuel (5 drums) and motor oil. A handwritten note states that "We no longer have oil shed. Underground tank has not been used by Reliable for about 5 years." Note that Reliable Transportation was at 701 Campbell Avenue, which appears to have been used by on-Site businesses, as well as businesses on the southwesterly adjoining parcel (currently 455 El Camino Real). Reliable Transportation may have been located off-Site.
SCFD	2012-2024	Macom	Chemical inventories noting the generations of wastes including isopropanol debris (wipes, tubes, Q-Tips), Q-Tips with solder paste containing copper, and epoxy waste containing silver.

4.2.2 Geologic Energy Management Division Maps

To evaluate the presence of oil or gas wells on-Site and in the immediate Site vicinity, maps available on-line at the California Department of Conservation, Geologic Energy Management Division (CalGEM) website were reviewed. Review of the available map for the Site area did not show oil or gas wells on-Site or on the adjacent properties.

SECTION 5: PHYSICAL SETTING

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

5.1 RECENT USGS TOPOGRAPHIC MAP

A 2021 USGS 7.5-minute topographic map was reviewed to evaluate the physical setting of the Site. The Site's elevation is approximately 70 feet above mean sea level; topography in the vicinity of the Site slopes downward gently to the north towards the San Francisco Bay.

5.2 HYDROGEOLOGY

Based on prior reports pertaining to the Site, groundwater beneath the Site is likely present at depths of approximately 8 to 10 feet. Groundwater reportedly flows toward the north.

SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and adjoining properties to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the Site. The ASTM standard requires the identification of all obvious uses of the Site from the present back to the Site's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources. The identification of obvious uses of adjoining properties also is required.

6.1 HISTORICAL SUMMARY

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 7.

- **Historical Aerial Photographs:** We reviewed aerial photographs dated between 1939 and 2020 obtained from EDR of Shelton, Connecticut; copies of aerial photographs reviewed are presented in Appendix B.
- **Historical Topographic Maps:** We reviewed USGS 15-minute and 7.5-minute historic topographic maps dated between 1889 and 2021; copies of historic topographic maps reviewed are presented in Appendix B.
- **Historical Fire Insurance Maps:** We reviewed Sanborn fire insurance maps dated 1950, 1961 and 1966 obtained from EDR; copies of Sanborn maps are presented in Appendix B. Additional color copies of the 1950 maps were obtained from the Library of Congress.

Table 7. Summary of Historical Source Information

Date	Source	Comments
1889, 1897 and 1899	Topographic maps	**Site:** No structures were depicted. **Adjoining Properties:** No structures were depicted. Railroad track were shown to the northeast.
1973 and 1980	Topographic maps	**Site:** Several commercial building were depicted on-Site that appear consistent with those shown on the Sanborn maps discussed below. Several railroad tracks were additionally shown to traverse the northeast, southeast and southwest portions of the Site. **Adjoining Properties:** University of Santa Clara, commercial buildings and railroad tracks were shown on adjoining properties.
1939, 1948, 1950, 1956, 1963, 1968 and 1974	Aerial photographs	**Site:** Several commercial building were shown on-Site that appear consistent with those depicted on the Sanborn maps discussed below. **Adjoining Properties:** University of Santa Clara, commercial buildings and railroad tracks were shown on adjoining properties.
1950, 1961 and 1966	Sanborn maps	**Site:** The northwest portion of the Site was shown to be developed with a fruit packing plant operated by Rosenburg Brothers & Company in 1950 and Mayfair Packing Company by 1961. A packing facility, warehouse, boiler room, black smith, sulphur kilns, and a label printing

Date	Source	Comments
		area were depicted. Fuel oil was noted to be used for power generation. The facility is shown to have expanded between 1950 and 1961. Structures on the central and southeast portions of the Site were shown to be occupied by Tri-Valley Meat Company (1950), David Meat Company (1961), an ice factory and ice houses, Security Warehouse & Cold Storage (1950), Merchants Refrigerating Company of California (1966), and Santa Clara Frosted Foods (1950). Boiler rooms (adjacent to David Meat Company and Santa Clara Frosted Foods), a cooling tower, a pump house, a lime house, a fenced transformer area, an auto garage, and a repair shop were depicted. On the 1966 map, oil storage is depicted at the boiler room location adjacent to Santa Clara Frosted Foods. Several railroad tracks were shown to traverse the northeast, southeast and southwest portions of the Site. **Adjoining Properties:** Fruit and vegetable packing facilities (Santa Clara Pear Association, and Day & Young) and University of Santa Clara were depicted to the southwest. Santa Clara Municipal Water Works was shown to the northwest, and a cold storage facility was shown to the southeast.
1982 to 2020	Aerial photographs	**Site:** The cold storage and ice factory structures on the central and southeast portions of the Site were shown to have been demolished by 1982 and a new commercial building was constructed by 1993. By 1998, all former structures were shown to have been removed and construction of the existing office buildings and parking garages appears to be in progress. **Adjoining Properties:** University of Santa Clara, commercial buildings and railroad tracks were shown on adjoining properties. The existing residential development was shown to have been constructed to the southeast by 2012.

6.1.1 City Directory Review

To obtain additional information regarding past uses of the Site and adjoining properties, business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five-year intervals for the years spanning 1922 through 2020. A summary of the city directory listings for Site occupants is presented in Table 8.

The listed business names at adjoining properties are not indicative of businesses that are typically associated with the use or storage of significant quantities of hazardous materials (e.g., gasoline stations, dry cleaners, manufacturing facilities, etc.). The acquired city directory report is presented in Appendix C.

Table 8. On-Site City Directory Listings

Date	Occupant
701 Campbell Avenue*	
1950 and 1955	Security Warehouse & Cold Storage Company
1957	Santa Clara Plant
1960	Refrigerated Food Services warehouse
1963	Beckman H V Pear Growers League, Central Coast Pear Association, and Wylie Packing Co.
1970	California Fruit Exchange shipper & growers, Central Coast Pear Association , Monteleone Michel Co. fruit buyers, Department of Agriculture inspection division, and Santa Clara Valley Fruit Exchange
1974	Merchants Refrigerating Company of California, and University of Santa Clara Campus
1975	Mayfair Refrigerating Co., Day & Young Inc., and Beckman Pear Growers League
1980	Reliable Transportation, Inc., Chiaramonte Citrus Co, Park Avenue Products, Inc., Santa Clara Distributors, and Sorci Produce
1985	Reliable Transportation, Inc. and Marchese Farming
1986	Lewis Pool Finishing
1991	Marchese Farms
825 Campbell Avenue	
1957	Pat Santucci
1970 and 1974	Mayfair Packing Company
465 El Camino Real	
1996	Bernies Restaurant Supply, Warewashin Service, and Will and Will Auctions
469 El Camino Real	
2020	Western Seminary, Safeview, Quest Software, Qubole, Inc., Mimosa Network, and Intermodal Data, Inc.
451 El Camino Real**	
2000	ABB Systems Control
2005	Alternative Financing Corporation, Parama Networks Inc., and Vivotech, Inc.
2010	Vivotech, Inc., Opnet Technologies, and Earthquakes Soccer LLC
2014	Earthquakes Soccer LLC, Next Bio and Opnet Technologies
469 El Camino Real**	
2005	Willow Technology, Inc., Silicon Valley Equipment Leasing, Sequence Design, Inc., Safe View, Inc., Community One Financial, and Blach Construction Company
2010	Quest Software and Frequency Technology
2014	Safe View, Quest Software, Opnet, Mameo, Inc., and Blach Construction Company
471 El Camino Real**	
2000	Magellan Corporation, and Ashtech Products
2005	Thales Navigation, Magellan Systems, and Ashtech, Inc.
2010	Mitac Digital Corporation
2014	Magellan Corporation, Mitac Digital Corporation, and Silver Peak Systems
2017	Magellan Corporation, and Mitac Digital Corporation
2020	Bixby Land Company and Si-Bone, Inc.
475 El Camino Real**	
1995	Mayfair Packing Company
2000	CPSA Commercial Real Estate

* The 701 Campbell Avenue address was used by on-Site businesses, as well as businesses on the southwesterly adjoining parcel (currently 455 El Camino Real). Some of the listed businesses at 701 Campbell Avenue were likely located off-Site.

** Reported listings between 2017 and 2020 include multiple individuals, which typically suggests residential use. These listings appear to be anomalous.

SECTION 7: SITE RECONNAISSANCE

We performed a Site reconnaissance to evaluate current site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 9. Photographs of the Site are presented in Section 7.2.1.

7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on April 4, 2024. The Site reconnaissance was conducted by walking representative interior tenant spaces, the parking garages, the periphery of the structures and the Site periphery. The Site also was observed from adjacent public thoroughfares. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects. Physical obstructions that limited our ability to view the ground surface at the Site included the existing building and associated asphalt paved vehicle drives and parking areas (typical of developed properties).

7.2 OBSERVATIONS

At the time of our visit, the Site was developed with four 2-story, multi-tenant office buildings and two associated parking garages. The buildings were observed to be used by multiple tenants for general office purposes. The building at 475 El Camino Real was vacant. Several vacant spaces also were present in the other buildings.

In addition to office space, Macom, an occupant of 451 El Camino Real, operated an electronics testing laboratory. Hazardous materials observed within the laboratory consisted mainly of acetone and isopropyl alcohol that were stored in 1-gallon containers within flammable materials storage cabinets. These products were used for cleaning of electronic components to facilitate soldering activities. The observed soldering work was limited to small desktop workstations with ventilation equipment; facility staff indicated that no lead containing solder was used.

A maintenance room within the parking garage at 467 El Camino Real was observed to contain several 1- and 5-gallon containers of paint and other building maintenance products.

General housekeeping of hazardous materials storage areas was observed to be orderly and no evidence of spills or leaks was apparent.

Electricity and/or natural gas fuel sources appeared to be used for building heating/cooling purposes. Potable water appeared to be supplied by the local water service provider. The buildings presumably are connected to the publicly owned sanitary sewer system; no on-Site septic systems were obvious. On-Site storm water catch basins appeared to discharge via below ground piping to the City's storm water drainage system. Three electrical transformers owned by Silicon Valley Power were observed on a concrete pads at the Site. No evidence of transformer oil leaks was observed.

Table 9. Summary of Readily Observable Site Features

General Observation	Comments
Aboveground Storage Tanks	Not Observed
Agricultural Wells	Not Observed
Air Emission Control Systems	Within electronics testing laboratory at Macom
Boilers	Not Observed
Burning Areas (waste burn pits or ash disposal areas)	Not Observed
Chemical Mixing Areas	Not Observed
Chemical Storage Areas	Observed as described above
Drainage Ditches	Not Observed
Drums, Totes, and Intermediate Bulk Containers	Not Observed
Elevators	Observed within each office building and the parking garage at 467 El Camino real
Emergency Generators	Not Observed
Equipment Maintenance Areas	Not Observed
Fill Placement (*i.e.,* fill used to build up the site elevations)	Not Observed
Groundwater Monitoring Wells	Not Observed
Hoods and Ducting (associated with chemical use)	Within electronics testing laboratory at Macom
Hydraulic Vehicle or Equipment Lifts	Not Observed
Incinerators	Not Observed
Petroleum Pipelines or Wells	Not Observed
Pits, Ponds, or Lagoons.	Not Observed
Railroad Lines	Not Observed
Row Crops or Orchards	Not Observed
Septic Systems or Cesspools	Not Observed
Solid Waste Disposal Areas (other than municipal trash containers)	Not Observed
Stained Soil or Pavement	Not Observed
Stains or Corrosion on Floors, Walls, or Ceilings	Not Observed
Standing Surface Water or Pools	Not Observed
Stockpiles of Soil or Debris	Not Observed
Stressed Vegetation (unrelated to the lack of water)	Not Observed
Strong, Pungent, or Noxious Odors	Not Observed
Sumps, Clarifiers, Oil-Water Separators, or similar structures	Not Observed
Transformers	Observed as described above
Underground Storage Tanks	Not Observed
Unidentified Substance Containers	Not Observed
Vehicle Maintenance Areas	Not Observed
Vehicle Wash Areas	Not Observed
Wastewater Neutralization Systems	Not Observed

The comment “Not Observed” does not warrant that these features are not present on-Site; it only indicates that these features were not readily observed during the Site visit.

7.2.1 Site Photographs

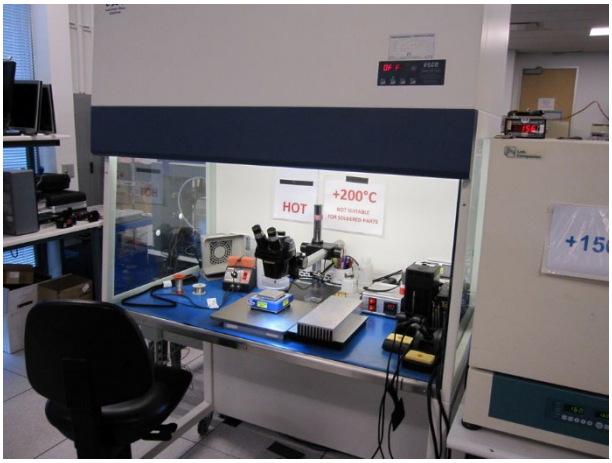

Photograph 1. View of 451 El Camino Real looking northeast.

Photograph 2. View of 469 El Camino Real looking east.

Photograph 3. View of 471 El Camino Real looking southwest.

Photograph 7. Interior office space.

Photograph 8. Vacant tenant space.

Photograph 9. Typical elevator equipement.

Photograph 10. Building maintenance products.

Photograph 11. Parking garage at 479 El Camino Real.

Photograph 12. Northeast side of the Site, looking southeast.

SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS

8.1 ENVIRONMENTAL QUESTIONNAIRE / CURRENT OWNER INTERVIEW

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire for completion by the Site owner (Bixby SPE Finance 11, LLC). The completed questionnaire is attached in Appendix D. The information provided on the questionnaire appears generally consistent with our on-Site observations and information obtained from other data sources. No information indicative of Recognized Environmental Conditions was reported on the questionnaire.

8.2 CURRENT OCCUPANT INTERVIEW

During our Site visit, Mr. Novak Farrington, Director Of Engineering, and Mr. Christopher Ngo, Lab Manager of Macom were interviewed regarding their knowledge of the Site and Macom's operations. The information provided is consistent with our observations as discussed in Section 7.2. These individuals were not aware of any environmental concerns at the Site. Based on the observed office uses, no other tenants were interviewed.

8.3 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

8.4 INTERVIEWS WITH STATE AND/OR LOCAL GOVERNMENT OFFICIALS

Per the ASTM Standard, a reasonable attempt should be made to interview at least one staff member of any one of the following types of state and/or local government agencies: fire department, health department, building department, or other agency having jurisdiction over hazardous waste disposal or other environmental matters in the area.

The Santa Clara Building Department, San Jose Building Department, and Santa Clara Fire Department were contacted during this study. The Fire Department is the Certified Unified Program Agency (CUPA) responsible for implementing California's Unified Hazardous Waste and Hazardous Materials Management regulatory program for properties within Santa Clara. Files pertaining to the Site were requested from each of these agencies; a summary of the information obtained was discussed in Section 4.2.1.

SECTION 9: FINDINGS, OPINIONS, AND CONCLUSIONS (WITH RECOMMENDATIONS)

Cornerstone performed this Phase I ESA in general conformance with ASTM E1527-21 to support Bixby in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

9.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, the California Cured Fruit Association built a large, dried fruit warehouse on-Site in 1901. The Cured Fruit Association disbanded in 1903. In 1916, Rosenberg Brothers acquired the warehouse for its dried prune and apricot operation.

By 1939, the Site was occupied by several fruit packing and cold storage buildings. The facility was expanded during the 1940s and 1950s with the construction of additional associated buildings and building additions. Rosenberg Brothers remained an occupant until at least 1950. By 1961, Mayfair Packing Company occupied by Site. Several other businesses were concurrent occupants, including Tri-Valley Meat Company (1950), Santa Clara Frosted Foods (1950), an ice factory and ice houses, Security Warehouse & Cold Storage (1950), David Meat Company (1961), and Merchants Refrigerating Company of California (1966), among others.

In addition to the fruit packing facility and warehouses, Site features included several boiler rooms, a black smith, sulphur kilns, a label printing area, a cooling tower, a pump house, a lime house, a fenced transformer area, an auto garage, and a repair shop.

Between 1974 and 1982, the cold storage and former fruit packing buildings on the central and southeast portions of the Site were demolished. Between 1982 and 1993, a rectangular building was constructed on the north portion of the Site. Between 1993 and 1998, the former structures on-Site were demolished to facilitate construction of the existing improvements, including four multi-tenant office buildings and two associated parking garages that were completed by 1999.

9.2 CHEMICAL STORAGE AND USE

Sanborn maps indicate that fuel oil was used for power generation at Rosenberg Brothers on the northwest portion of the Site. Oil storage also was depicted on a 1966 Sanborn map at the boiler room location adjacent to Santa Clara Frosted Foods on the southeastern portion of the Site.

Identified chemical inventories for Mayfair Packing Company listed fumigants (methyl bromide), insecticides (malthion, pyrenone, vapona), propylene oxide, sulfuric acid, sodium hydroxide, sodium hypochlorite, kerosene, 1,1,1-trichloroethane, various petroleum based lubricants, diesel fuel, petroleum based solvent, Bay 555 aluminum cleaner, Vaporene B100 (sodium bichromate), lead chromate, adhesives, and paint related products, among others.

Hazardous materials observed with the existing commercial buildings included acetone and isopropyl alcohol that were stored in 1-gallon containers within flammable materials storage cabinets at Macom. A maintenance room within the parking garage at 467 El Camino Real was observed to contain several 1- and 5-gallon containers of paint and other building maintenance products. General housekeeping of hazardous materials storage areas was observed to be orderly and no evidence of spills or leaks was apparent.

9.3 FORMER USTS

Two closed LUST cases are associated with the Site. The first case resulted from the removal of a 550-gallon gasoline UST in 1987 and two 12,000-gallon bunker oil USTs that were removed in 1998. Following the implementation of remedial activities, a deed restriction, discussed in Section 3.3, was recorded for the Site. Per the deed restriction, the disturbance of the subsurface, any construction on the surface, or change in land use requires the approval of the Valley Water[3], among other provisions. The deed restriction was amended in 2005 and

[3] Oversight responsibility for investigations and clean-up of releases from UST was transferred from Valley Water to the Santa Clara County Department of Environmental Health as of July 1, 2004.

now applies only to an approximately 100 by 100 foot portion of the Site (Figure 2). In their case closure letter dated June 10, 2004, the Water Board stated the following Site management requirements:

"*Residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The District and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement.*"

We recommend that compliance with the provisions of the deed restriction and the above Site management requirements be maintained.

The second LUST case resulted from the removal of a 1,000-gallon gasoline UST and a 10,000-gallon diesel UST in 1991. The diesel UST was located on-Site and the gasoline UST was located off-Site on northwesterly adjoining property. Following the excavation of impacted soil, the Water Board issued a September 12, 1991 No Further Action letter pertaining to the two USTs removed in 1991. Note that groundwater sampling was not conducted. The approximate locations of these USTs are shown on Figure 2.

In addition to the USTs noted above, figures from 1988 associated with the adjoining Santa Clara University property at 455 El Camino Real depict the locations of two additional USTs shown to be located on the southern and southeastern portions of the Site (see Figure 2 and Appendix E). The status of these depicted on-Site USTs is not known.

9.4 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Based on the information obtained during this study, no hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact the Site.

9.5 ASBESTOS CONTAINING BUILDING MATERIALS (ACBMS)

Due to the age of the on-Site structures, it is unlikely that the building materials contain asbestos. However, if demolition, renovation, or re-roofing of the building is planned, an asbestos survey may be required by local authorities or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP guidelines require the removal of potentially friable ACBMs prior to building demolition or renovation that may disturb the ACBM.

9.6 LEAD-BASED PAINT

In 1978, the Consumer Product Safety Commission banned lead-containing paints and coatings sold for consumer use. Some lead-containing products, such as industrial coatings, however, are still allowed. Based on the age and type of the existing structures, lead-containing paint is not likely to be present.

9.7 DATA GAPS

ASTM Standard E1527-21 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by the ASTM Standard despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data gaps were identified:

- Contact information for the former occupants and owners of the Site was not provided to us; thus, no interviews with former occupants and owners were conducted during this study. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. However, these individuals may have knowledge of the Site that is not otherwise readily available or apparent. Thus, the absence of these interviews may diminish our ability to identify Recognized Environmental Conditions.

9.8 DATA FAILURES

As described by ASTM Standard E1527-21, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five-year intervals back to the first use or to 1940 (whichever is earlier). The ASTM Standard requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data failures were identified:

- The ASTM standard requires the identification of all obvious uses of the Site from the present back to the Site's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources. Based on the information reviewed during the Study, the California Cured Fruit Association built a dried fruit warehouse on-Site in 1901. Information pertaining to the use of the Site prior to 1901 was not identified, but topographic maps from the late 1800s do not depict any on-Site structures. Thus, the dried fruit warehouse likely was the first developed use of the Site. This data failure is not considered to be significant.

9.9 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E1527-21 of 451, 467, 469, 471, 475 and 479 El Camino Real, Santa Clara, California. This assessment identified the following Recognized Environmental Conditions[4].

[4] Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- Several railroad track spurs historically traversed the Site. Assorted chemicals historically were commonly used for dust suppression and weed control along rail lines. Residual contaminants may remain in Site soil.

- Figures from 1988 associated with the adjoining Santa Clara University property at 455 El Camino Real depict the locations of two USTs shown to be located on the southern and southeastern portions of the Site (see Figure 2 and Appendix E). The status of these depicted on-Site USTs is not known.

- There is an increased potential for residual contaminants to be present in soil, soil vapor and groundwater on properties that have a long developed history. Reported prior Site uses have the potential to have impacted the Site.

This assessment identified the following Controlled Recognized Environmental Condition[5]:

- A 550-gallon gasoline UST was removed from the Site in 1987 and two 12,000-gallon bunker oil USTs were removed in 1998. Following the implementation of remedial activities, a deed restriction was recorded for the Site in 2004; it was amended in 2005. Additional Site management requirements were stipulated in the Water Board's LUST case closure letter dated June 10, 2004.

This assessment identified the following Historical Recognized Environmental Condition[6]:

- A 1,000-gallon gasoline UST and a 10,000-gallon diesel UST were removed in 1991. The diesel UST was located on-Site and the gasoline UST was located off-Site on northwesterly adjoining property. Following the excavation of impacted soil, the Water Board issued a September 12, 1991 No Further Action letter.

SECTION 10: LIMITATIONS

Cornerstone performed this Phase I ESA to support Bixby in evaluation of Recognized Environmental Conditions associated with the Site. Bixby understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. nd Bixby understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from

[5] A Recognized Environmental Condition that has been addressed to the satisfaction of the applicable regulatory agency with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

[6] A previous release of hazardous substances or petroleum products affecting the Site that has been addressed to the satisfaction of the applicable regulatory agency and meeting unrestricted use criteria established by the applicable regulatory agency without subjecting the Site to any controls.

interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater, soil vapor and/or air samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E1527-21, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

Bixby may have provided Cornerstone environmental documents prepared by others. Bixby understands that Cornerstone reviewed and relied on the information presented in these reports and cannot be responsible for their accuracy.

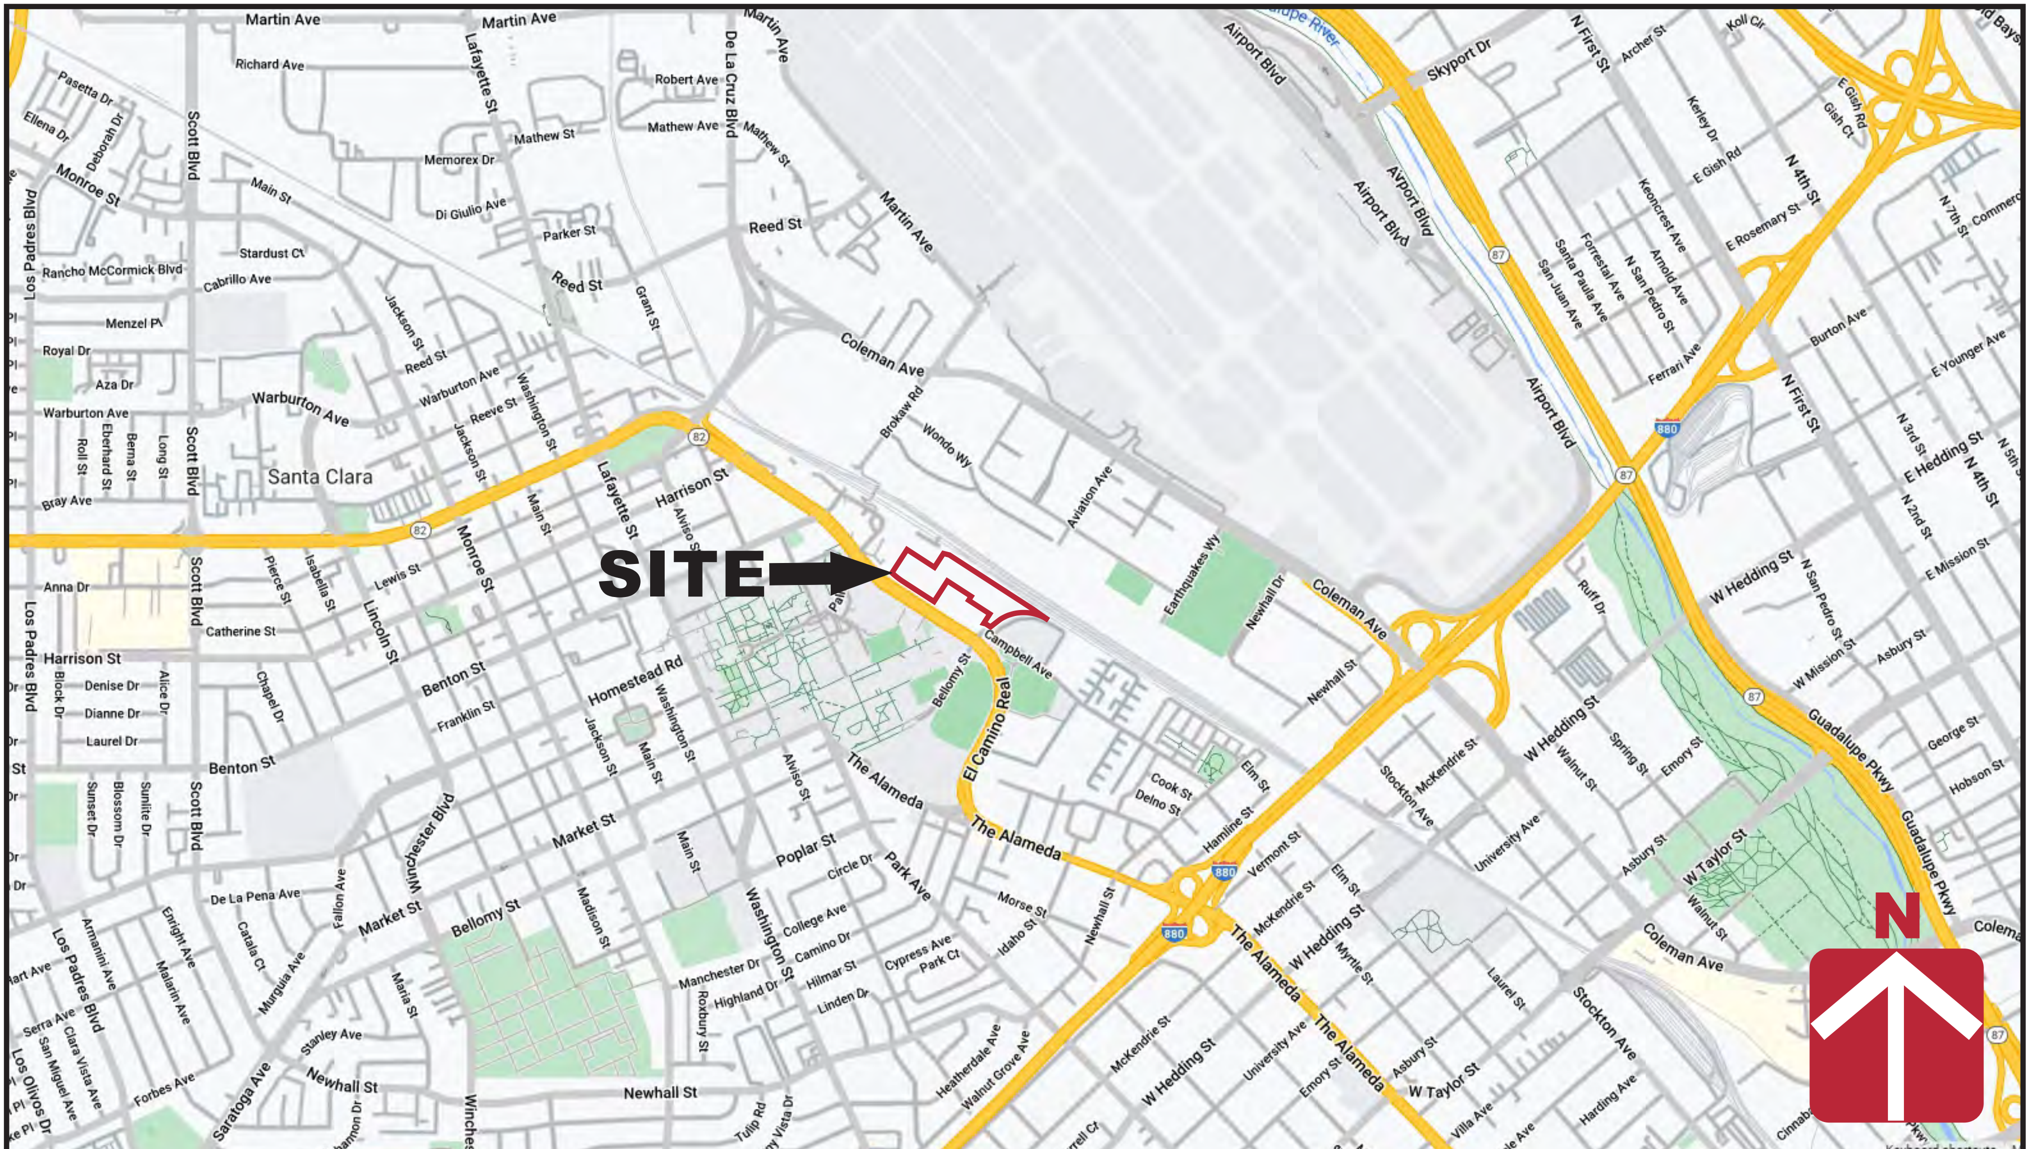

This report, an instrument of professional service, was prepared for the sole use of Bixby and may not be reproduced or distributed without written authorization from Cornerstone. Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

10.1 REPORT VIABILITY

Per ASTM E1527-21 and 40 CFR Part 312, a Phase I Environmental Site Assessment report is presumed to be viable when it is conducted within one year prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction), provided that the following components of the inquiries were conducted or updated within 180 days prior to the date of purchase or the date of the intended transaction:

Task	Date Completed
Interview with current owner (owner questionnaire)	March 28, 2024
Interview with current occupant	April 4, 2024
Review of standard government environmental record sources	March 20, 2024
Visual observation of the Site and of adjoining properties	April 4, 2024
Declaration by the Environmental Professional	April 16, 2024
Searches for recorded environmental cleanup liens	User responsibility[7]

[7] ASTM E1527-21 categorizes the requirement to conduct a search for Environmental Liens and AULs as a User responsibility.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/29/2024 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Site ID: 0901596
EPA Id: CAD077184745

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 6 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 10/26/2023 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/23/2023 has revealed that there are 27 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 14 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 4 CA UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CA CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CA CERS HAZ WASTE list, as provided by EDR, and dated 10/16/2023 has revealed that there are 10 CA CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 34 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAC002989460

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 09/28/2023 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
FMC CORPORATION		E 1/4 - 1/2 (0.260 mi.)	179	652

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/03/2023 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/28/2023 has revealed that there are 5 PFAS ECHO sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 15 CA CUPA

EXECUTIVE SUMMARY

Listings sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 31 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

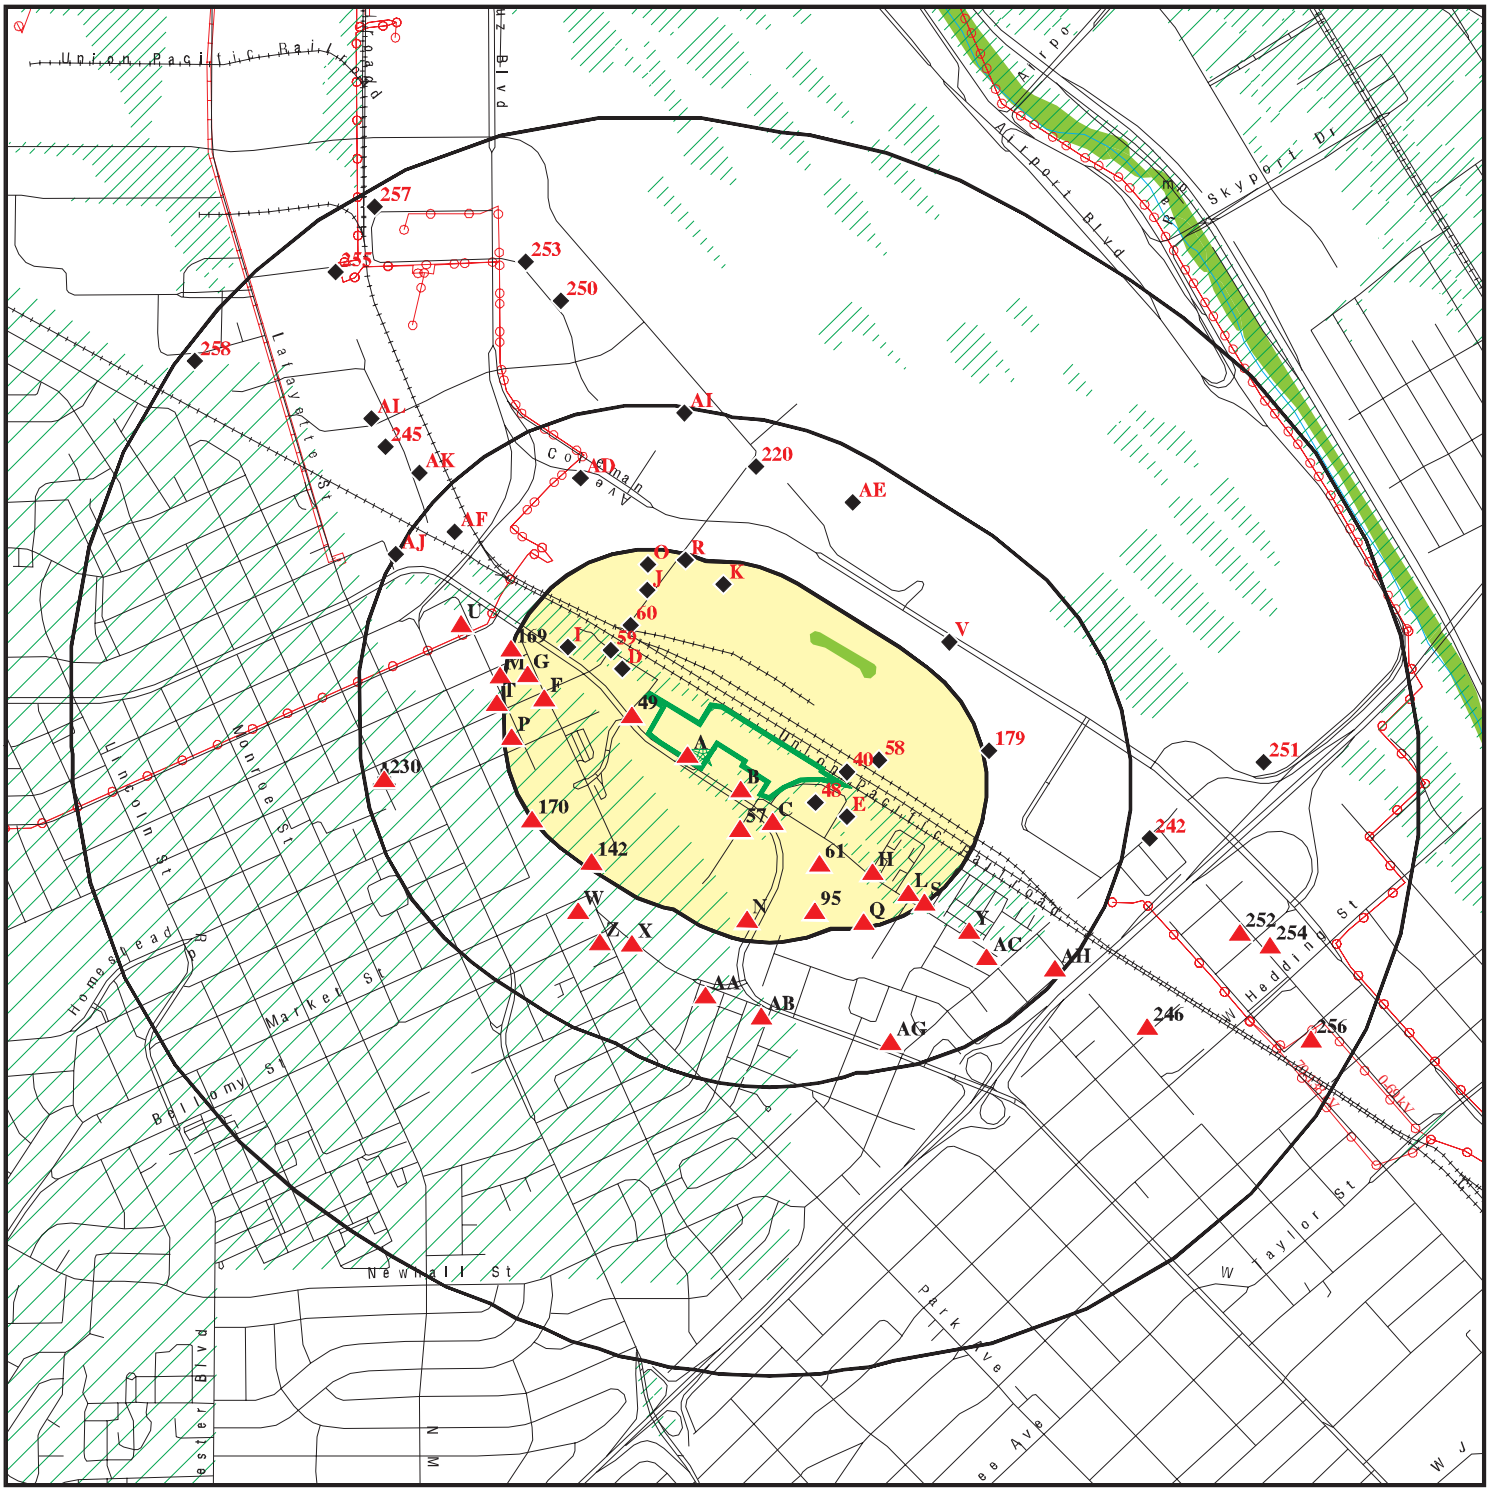

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The case includes oversight during the Santa Clara Valley Transportation Authority's (VTA) Silicon Valley Rapid Transit (SVRT) project that will extend the existing BART system from Fremont to Milpitas, San Jose and Santa Clara. In 2020, Phase I is complete through Berryessa in San Jose. Phase 2 will start from Berryessa to Santa Clara. The design includes plans for a new BART maintenance facility and a Santa Clara Station to be built on the former UPRR yard. VTA purchased the Site from UPRR and is now the current owner. The Site is approximately 47.5 acres of land that straddles the city limits of San Jose and Santa Clara. The Site is more than one mile in length and is bounded on the north by Brokaw Road and on the south by Newhall Street (see Site Location Map). The Site formerly had numerous sets of rails on the western side, which were removed. Land use in the surrounding area is a mix of residential, commercial, and industrial use. In 2002, 2003, and 2007, the Authority conducted soil and groundwater investigations on the Site. Soils on the Site, generally within the upper 3 feet, were found to contain petroleum hydrocarbons and certain heavy metals, including arsenic, lead, and mercury. The concentrations of these chemicals of potential concern (COPCs) in shallow soil generally exceed environmental regulatory screening levels (ESLs). Below approximately 3 feet across the Site, the levels are generally below their ESLs. Shallow groundwater at the Site was found to be impacted by volatile organic compounds from an off-site source. Shallow groundwater beneath the Site is not currently used as a source of drinking water. The San Jose Water Company supplies drinking water to the area. Construction activities at the Project will likely expose contaminated soils, groundwater, and/or other hazardous materials where they could be a potential concern to human health and the environment; therefore, management plans and/or remedial action plans have been prepared and completion reports will be submitted. The Regional Water Board s August 12, 2013, February 2, 2012, July 26, 2011, and October 21, 2008, letters (Letters) approved the remediation activities during the Project. The letters require a completion report. The February 2, 2012, letter also required a deed restriction to ensure that future workers and

BART SYSTEM SILICON VALLEY BERRYESSA EXTENSION PROJECT (Continued) **S107619996**

others are aware of post-construction conditions. Phase I BART extension completed in 2017 for Fremont, Milpitas and Berryessa/San Jose (aka C700 project). In 2018, a completion report documenting the excavation areas, and soil encapsulated areas was submitted and is under review by the Regional Water Board. Two deed restrictions have been recorded in Alameda and Santa Clara County. One deed restriction is pending. Case closure letter will be issued after all deed restrictions are recorded. Future BART extension construction will have a site management plan and remedial action plan. The remedial action plan was implemented during construction. Phase II BART extension is underway, and a remedial action plan and contaminant management plan have been approved by the Regional Water Board. A fact sheet was issued to the general public, which received no comments.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D008
Waste Description: Lead

Waste Code: D011
Waste Description: Silver

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006

HADCO SANTA CLARA INC (Continued) **1000336467**

Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Comments: The City of Santa Clara submitted its Annual Summary Report as

SANTA CLARA POLICE STATION (Continued) **S102860957**

required by the Land Use Covenant and Operation and Maintenance Agreement. The cap was observed to be in good condition during a January 24, 2012 inspection.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 02/19/2013
Comments: The City of Santa Clara conducted an annual inspection and submitted the annual summary report as required by section 1.02 of the Land Use Covenant and section 2.4 of the Operation and Maintenance Agreement. About 20 feet of small cracks were observed in the asphalt of the parking lot over the cells where contaminated soil is contained. The cracks are small and will not let significant water penetrate the asphalt. The City Street Department plans to seal the cracks when the weather is drier and warmer.

Completed Area Name: PROJECT WIDE

Completed Date: 01/26/1998
Comments: Sample results from a soil quality evaluation conducted in 1997 under DTSC oversight indicated lead, nickel, and polynuclear aromatic hydrocarbons (PAHs) including but not limited to anthracene, benzo(a)pyrene, and pyrene were found in soil. Lead contaminated soil was found to be the major issue, with concentrations up to 4,100 mg/kg. The RAW required consolidation and capping of impacted soil as well as underground tank removal and capping.

CUSTOM FOOD MACHINERY (Continued) **S106896814**

Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 12/14/2011
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 05/11/2006
Comments: The final groundwater sampling was conducted on May 11, 2006 to verify Hydrogen Release (HRC's) effectiveness. Previous sampling results indicate HRC is reducing concentrations on chemicals of concern including, perchloroethylene and tricholorethylene. However, the trichlorobenzenes concentrations have stayed the same. The breakdown of these contaminants can also take longer.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 07/29/2005
Comments: The RAW requires a deed restriction preventing digging in the area where PCBs are at depth and treatment of contaminated groundwater with HRC and Bio-Innoculum. No comments were received during the public comment period.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 08/11/2006
Comments: Completion report approved. During implementation of the final remedy, additional PCB contaminated soil was encountered at another area on the site. Excavation of this PCB impacted soil occurred to the top of the groundwater table (approximately 9 feet below ground surface). Confirmation sampling verified that the PCB cleanup goal in this area was achieved in the upper 10 feet, but PCBs remain below 10 feet. A deed restriction will be required. The groundwater cleanup goal established in the RAW has not been met. Ongoing groundwater monitoring will be required until cleanup goals have been achieved.

Completed Area Name: PROJECT WIDE

Comments:	Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	05/11/2006
Comments:	The final groundwater sampling was conducted on May 11, 2006 to verify Hydrogen Release (HRC's) effectiveness. Previous sampling results indicate HRC is reducing concentrations on chemicals of concern including, perchloroethylene and tricholorethylene. However, the trichlorobenzenes concentrations have stayed the same. The breakdown of these contaminants can also take longer.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	07/29/2005
Comments:	The RAW requires a deed restriction preventing digging in the area where PCBs are at depth and treatment of contaminated groundwater with HRC and Bio-Innoculum. No comments were received during the public comment period.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	08/11/2006
Comments:	Completion report approved. During implementation of the final remedy, additional PCB contaminated soil was encountered at another area on the site. Excavation of this PCB impacted soil occurred to the top of the groundwater table (approximately 9 feet below ground surface). Confirmation sampling verified that the PCB cleanup goal in this area was achieved in the upper 10 feet, but PCBs remain below 10 feet. A deed restriction will be required. The groundwater cleanup goal established in the RAW has not been met. Ongoing groundwater monitoring will be required until cleanup goals have been achieved.

CA Enviroscreen 4 Score:	40-45%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The Irvine Company s Mission Town Center is currently on hold and inactive. The proposed project is located on an approximately 5.7-acre project site at the intersection of Benton Street and El Camino Real in the southeastern portion of the City of Santa Clara. The site is presently occupied by a mix of land uses, including light industrial uses such as a self-storage complex and auto repair shop, single and multifamily residential uses, office, and a restaurant. The applicant proposed to demolish the existing buildings on the project site and construct a mixed-use residential development project that would consist of 385 apartment units, approximately 10,000 square feet of conditioned amenity and leasing space, three distinct private open space areas, and about 27,000 square feet of ground floor retail. Parking would be provided in a 6 story parking structure, with one story below grade. The residential building would be slab-on-grade construction, while the commercial building would be podium construction with wood framing above. The project included a General Plan Amendment (to Santa Clara Station Very High Density Residential), a rezoning to Planned Development, and vacation of two streets (Sherman and Fremont). The project Environmental Impact Report was scheduled to be distributed for review in mid November 2015 with approval obtained in early January 2016. The project would then go to Planning Commission in early February 2016 with City Council approval scheduled for February 23, 2016. Project construction was scheduled to begin demolition on August 1, 2016 with project completion in February 2019. The project includes improvements to off-site utilities, including construction of 12 and 24-inch water mains in The Alameda and Harrison Street; rerouting a storm drain around the project site to the east along Benton Street

MISSION TOWN CENTER (Continued) **S118504780**

and then to the north along El Camino Real. The new segment of storm drain would be upsized as part of the proposed project to 72 inches to maintain prior capacity. Finally, the project would extend the 8 inch recycled water main approximately 500 linear feet within Fremont Street from the intersection of Fremont and Alviso Street to the project frontage on the east side of the intersection of The Alameda and Fremont Street.

Violation Date:	08-04-2021
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 08/30/2021. Owner/operator did not acknowledge the monthly DO inspections on 12/2020, 1/2021, 3/2021 and 6/2021 within 48 hours of receiving the report. Submit a copy of the August DO monthly inspection with a signed acknowledgement by the owner/operator regardless of if compliance issues were observed.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The Site was used for agricultural purposes prior to its industrial development in the early 1950's by predecessors of Federal Pacific Electric (FPE). The Site was used by FPE and its predecessors to manufacture electrical components (e.g., air switches, circuit

FMC 333 WEST BROKAW ROAD (Continued) **S106235043**

breakers and components, and transformers). FMC purchased the Site in 1964 and began operations associated with manufacturing of artillery shells and then assembly and painting of military tracked vehicles. FPE retained a portion of the Site and continued transformer manufacturing until 1968, when FMC purchased the remainder of the Site. Soil and groundwater characterization was initiated in May 1989, and revealed concentrations of trichloroethene (TCE) in groundwater above its State of California Environmental Protection Agency (CalEPA) maximum contaminant level (MCL) of 5 micrograms per liter (ug/L) in the A-level aquifer. On February 20, 1991, the State of California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) adopted Site Cleanup Requirement Order No. 91-020 (RWQCB, 1991). The RWQCB adopted Order No. 92-132 (RWQCB, 1992) on October 21, 1992, which amended Order No. 91-020. On February 17, 1993, the RWQCB adopted Order No. 93-018 (RWQCB, 1993), amending Orders No. 91-020 and 92-132. On March 16, 1994, the RWQCB adopted Order No. 94-043 (RWQCB, 1994), amending Orders No. 91-020, 92-132, and 93-018. Demolition activities occurred at the Site in 1995 and 1996 as part of redevelopment activities. Plant 31 (the Armor Building) and Plant 22 are no longer present. Approximately 13 acres of the property were sold to Costco Wholesale Corporation (Costco), and a warehouse with associated parking lots and gasoline fueling station were constructed on that parcel in 1995 (currently 1601 Coleman Avenue). Additionally, approximately 12-acres (former Plant 22) were sold to Swenson Development, LP in August 1996, and a warehouse and associated parking lots (currently 335 West Brokaw Road) were constructed in 1996-1997. Swenson Development, LP sold this portion of the property to K.J.L. Associates in 1997. The remaining 3.8-acres of the Site were sold to Hunter/Storm/Coleman, LLC in November 1996 (currently 1331 through 1351 and 1451 Coleman Avenue). Construction of various retail services and associated parking lots occurred in this area during 1997. The portion of the site currently occupied by Costco has been impacted with petroleum constituents, including methyl tertiary-butyl ether (MTBE), caused by a leaking fuel tank operated by Costco. In a letter dated September 18, 2001 (FMC, 2001), FMC requested a revision to the Self-Monitoring Program (SMP) for the Site. The RWQCB conditionally accepted the modification in a letter dated November 6, 2001 (RWQCB, 2001). Monitoring well W- 42A was added to the sampling schedule by the RWQCB. In July 2002, FMC requested Site curtailment and rescission of Site Cleanup Requirements Orders No. 91-020, 92-132, 93-018, and 94-043 based on long-term groundwater monitoring data confirming constituents of concern are well below healthbased target levels (HBTLs). FMC also requested abandonment of ten groundwater monitoring wells located on or adjacent to the Site. FMC proposed to retain five extraction wells, five monitoring wells, and three piezometers for use as part of FMC s remedial measures under RWQCB Order No. 96-024 at the adjacent 328 West Brokaw Road facility. During October 2003, FMC requested an additional reduction in monitoring frequency, and proposed to abandon eight groundwater wells as the collection of chemical and groundwater elevation data from these wells was no longer necessary. The RWQCB approved the modification to the SMP and FMC s proposal to abandon the wells in their October 30, 2003 letter (RWQCB, 2003), with one revision: retaining monitoring well W- 31A and abandoning W-27A instead. FMC chose to retain W-27A for future monitoring purposes. The GWETS was shut down on February 27, 2015, after the baseline water level elevations and groundwater samples

FMC 333 WEST BROKAW ROAD (Continued) **S106235043**

were collected.the post GWETS shut down monitoring schedule is now quarterly. The next monitoring events will be conducted in November 2015 and February 2016. The summary report will be submitted to the Regional Water Board by March 31, 2016.

Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 02/27/2020. Used and new oil tanks should be marked on site plan
Violation Division: Santa Clara City Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 388311
Site Name: Building 604: Facilities
Violation Date: 10-19-2020
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records.
Violation Notes: Returned to compliance on 11/02/2020. Tanks for oil (2x 110 gal) and waste oil (1x 110 gal + 55 gal drum) are not being inspected monthly in accordance with the plan. Discussed tanks are empty and if so, amend the plan accordingly and conduct inspections of the waste oil drum.

Violation Date: 01-11-2021
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 04/20/2021. The DO monthly inspection report was not signed by the owner or operator within 72 hours of receipt of the report from the DO. Within 72 hours of being provided a signed copy of the Designated Underground Storage Tank Operator Visual Inspection Report, the owner or operator shall sign and date the report, acknowledging the results of the inspection. Carlos Olmos emailed a copy of the DO monthly inspections signed by the owner/operator to C. Lee 04/20/2021.

Violation Date: 03-27-2014
Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)
Violation Description: Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the CUPA, for the life of the underground storage tank and/or failure to maintain written monitoring and maintenance records on site, or off site if approved by the CUPA, for a period of 3 years, 6 1/2 years for cathodic protection, and 5 years for written performance claims pertaining to release detection systems and calibration and maintenance records for such systems.
Violation Notes: Returned to compliance on 04/21/2014.
Violation Division: Santa Clara City Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 388311
Site Name: Building 604: Facilities
Violation Date: 01-09-2019
Citation: HSC 6.7 252959(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 252959(a)(1)
Violation Description: Failure to notify and/or prepare a report to the UPA upon discovery of a reportable or failed to record unauthorized release.
Violation Notes: Returned to compliance on 01/18/2019. On 1/4/2019, the diesel tank (Tank ID 2) was overfilled and fuel was released from the UST. At the time of inspection (1/8/2019), approximately 25 gallons of diesel was observed in the fill sump, the fill spill bucket was completely full of diesel and two absorbent pads, and the fill pipe was filled to the top with diesel. The monitoring console was in L3 (piping sump) fuel, high product, and overfill alarm, but the audible alarm portion had been silenced. The facility did not notify SCFD of the release without 24 hours after the release had been detected. IMMEDIATE CORRECTIVE ACTIONS: Within 24 hours after an unauthorized release or condition has been detected, (Truncated)...

Violation Date: 01-06-2022
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 01/24/2020. An overfill prevention inspection was conducted and the service technician confirmed that the flapper valve for the diesel UST (tank ID 1) is set higher than 95%. No audible/visual alarm to alert the transfer operator when the tank is 90% full exists and per the as-built plans, ball floats are not installed. Make arrangements to have an overfill prevention method meeting applicable requirements installed (e.g. 90% audible/visual alarm alerting transfer operator or repair flapper valve to provide positive shut-off at 95% capacity).

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends

SANTA CLARA UNIVERSITY (Continued) **1014386644**

Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: P108
Waste Description: Strychnidin-10-One, & Salts (Or) Strychnine, & Salts

Waste Code: P120
Waste Description: Vanadium Oxide V2o5 (Or) Vanadium Pentoxide

Waste Code: U133
Waste Description: Hydrazine (R,T)

Waste Code: U135
Waste Description: Hydrogen Sulfide (Or) Hydrogen Sulfide H2s

Waste Code: U188
Waste Description: Phenol

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	A previous Fuel Leak Case (07S1W02K01f) was opened at this site. This case was associated with the removal of 4 underground storage tanks (USTs) at a former gasoline retail station in 1986 and 1994. The case was closed on 10/23/00. At the time of closure, residual contamination remained in soil (4,700 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 3.5 ppm Benzene, 50 ppm Toluene, 25 ppm Ethylbenzene, and 260 ppm Xylenes) and groundwater (1,200 parts per billion (ppb) TPHg, 24 ppb Benzene, 3.3 ppb Toluene, 38 ppb Ethylbenzene, and 99 ppb Xylenes) at the site. 2003 In May, a 1,000-gallon UST was found onsite and removed. 4 soil samples (P-1 through P-4) were collected from the excavation; 2 from each end at 6-inches and 2 feet below the bottom of the UST. The soil samples were analyzed for TPHg, TPH as Diesel (TPHd), TPH as Motor Oil (TPHmo), Oil and Grease (O&G), Pesticides, Polychlorinated Biphenyls (PCBs), LUFT Metals, Volatile Organic Compounds (VOCs) and Semi-Volatile Organic Compounds (SVOCs). The maximum concentrations reported were 5,900 ppm TPHg, 1,400 ppm TPHd, 81 ppm Ethylbenzene, 32 ppm Toluene, 44 ppm Naphthalene, 500 ppm Trichlorofluoromethane, 390 ppm 1,2,4-Trimethylbenzene, 120 ppm 1,3,5 trimethylbenzene, 46 ppm n-Propylbenzene, 3.7 ppm p-isopropyl benzene, 22 ppm 2 Methylnaphthalene, 1.6 ppm Cadmium, 38 ppm Chromium, 67 ppm Lead, 60 ppm Nickel, and 37 ppm Zinc. All other constituents were not reported to be present above the laboratory reporting limits. In June, 6 hand auger borings (B1 through B6) were advanced between 13 and 16 feet below the ground surface (ft bgs). Two soil samples were collected from each boring at varying depths and were analyzed for TPHg, TPHd, TPHmo, VOCs, SVOCs and LUFT Metals. Maximum concentrations reported

SANTA CLARA UN PROPERTY (Continued) **S103473165**

were 11,000 ppm TPHg, 1,200 ppm TPHd, 55 ppm Ethylbenzene, 48 ppm Naphthalene, 510 ppm 1,2,4-Trimethylbenzene, 170 ppm 1,3,5-Trimethylbenzene, 45 ppm n-Butyl Benzene, 76 ppm n-Propyl Benzene, 26 ppm p-Isopropyl Benzene, 0.34 ppm Tert-butyl Benzene, and 4.7 ppm 2-Methylnaphthalene. Metals were detected at similar levels to the previous soil samples. All other constituents were not reported to be present above the laboratory reporting limits. Groundwater was encountered in the borings and grab groundwater samples were collected from each open boring and analyzed for TPHg, TPHd, TPHmo, VOCs, SVOCs, and LUFT Metals. The maximum concentrations reported were 38,000 ppb TPHg, 13,000 ppb TPHd, 3,500 ppb Benzene, 4,200 ppb Ethylbenzene, 450 ppb Toluene, 11,000 ppb Xylenes, 580 ppb n Butylbenzene, 760 ppb Isopropylbenzene, 540 ppb p-Isopropylbenzene, 720 ppb Naphthalene, 1,500 ppb n-Propylbenzene, 9,100 ppb 1,2,4-Trimethylbenzene, 2,700 ppb 1,3,5 Trimethylbenzene, 51 ppb 2-Methylnaphthalene, 22 ppb Benzoic Acid, 210 ppb Cadmium, 2,600 ppb Chromium, 730 ppb Lead, 3,900 ppb Nickel, and 3,500 ppb Zinc. All other constituents were not reported to be present above the laboratory reporting limits. 2004 In July, 4 groundwater monitoring wells (MW-1 through MW-4) were installed onsite. 5 soil samples were collected from each boring at various depths. Soil samples were reported to have up to 150 ppm TPHg, 21 ppm TPHd, 0.3 ppm Benzene, 1.9 ppm Ethylbenzene, 32 ppm Toluene, 1.6 ppm Naphthalene, 8.9 ppm Trichlorofluoromethane, 0.26 ppm Isopropylbenzene, 7.6 ppm 1,2,4-Trimethylbenzene, 2.1 ppm 1,3,5-Trimethylbenzene, 0.8 ppm n-Propylbenzene, 0.26 ppm p-Isopropyl Benzene. Metals were reported at similar concentrations as previous soil samples. All other constituents were not reported to be present above the laboratory reporting limits. Quarterly groundwater monitoring began at this site in July 2004 and continued through February 2006. In July, the maximum concentrations reported in groundwater were 2,000 ppb TPHg, 480 ppb TPHd, 11 ppb Benzene, 54 ppb Ethylbenzene, 96 ppb Xylenes, 0.71 ppb 1,2-Dichloroethane (DCA), 8.6 ppb sec-Butylbenzene, 13 ppb Isopropylbenzene, and 17 ppb n-Propylbenzene. 2006 In February, groundwater samples collected at the site during the last groundwater monitoring event were reported to have up to 700 ppb TPHg, 190 ppb TPHd, 2.2 ppb Benzene, 14 ppb Ethylbenzene, 6.9 ppb Xylenes, 1 ppb DCA, 4.4 ppb sec-Butylbenzene, 4.7 ppb Isopropylbenzene, and 3.7 ppb n-Propylbenzene. 2007 In October, a soil vapor study was completed and the groundwater monitoring wells were sampled. Maximum concentrations reported for groundwater were 930 ppb TPHg, 260 ppb TPHd, 260 ppb Benzene, 52 ppb Ethylbenzene, 5.9 ppb Toluene, 0.71 ppb DCA, 5 ppb sec-Butylbenzene, 6.5 ppbIsopropylbenzene, and 1.8 ppb n-Propylbenzene. The constituents detected in the soil gas did not exceed the Environmental Screening Levels.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
California's Department of Toxic Substances Control's (DTSC's)-EnviroStor database is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.
Registry ID: 110002635195

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Eval General Type: Other/Unknown
Eval Date: 07-24-2019
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site with Hazardous Materials Specialist 1 Yoni Fajardo to conduct a permit investigation for the Hazardous Waste Generator (HWG) program. Facility is a medical cell culture laboratory. Facility walk-through was conducted with Ms. Fu. Observed the following waste streams on-site: - 4 liters (L) methanol/ ethanol waste. - waste buffer solutions - Cell culture media waste. Based on what has been observed, facility will be permitted for 2202 (<100 kgs/ year) hazardous waste generator. Note: Ms. Fu said that the facility generates about 15 gallons per half a year to a year. aihuafu@nvigen.com yanchun.li@nvigen.com weiwei.gu@nvigen.com

NVIGEN INC. (Continued) **S124437590**

Eval Notes: On-site with Hazardous Materials Specialist 1 Yoni Fajardo to conduct a permit investigation for the Hazardous Material Business Plan program (HMBP). Facility is a medical cell culture laboratory. Permission was obtained from Ms. Fu to conduct a facility walk-through. The following was observed at or above the HMBP thresholds during the walk-through: -1 X 250 cubic feet (cu ft) cylinder of nitrogen gas - 1 X 30 gallons (or 80 pounds) of liquid nitrogen Ms. Fu stated that the nitrogen dewar was about 80 pounds or 30 gallons. The conversion for both amount are: 80 pounds X 12.7 cu ft/ lbs = 1,016 cu ft of nitrogen gas. Also, 30 gallons X 85.7 cu ft/ gals= 2, 571 cu ft of nitrogen gas. Based on what has been observed, facility will be permitted for handling 1-3 hazardous materials above reporting thresholds. Notes: Facility has been advised to submit a Hazardous Material Business Plan (HMBP) on CERS and/or Frontcounter within 30 days. Facility was [Truncated]

Hazardous Waste Summary:
Waste Code: D000

BAE SYSTEMS (Continued) **1001217422**

Waste Description: Not Defined

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D010
Waste Description: Selenium

Waste Code: D018
Waste Description: Benzene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And

BAE SYSTEMS (Continued) **1001217422**

Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F019
Waste Description: Wastewater Treatment Sludges From The Chemical Conversion Coating Of Aluminum, Except From Zirconium Phosphating In Aluminum Can Washing When Such Phosphating Is An Exclusive Conversion Coating Process.

CA Enviroscreen 3 Score:	76-80%
CA Enviroscreen 4 Score:	55-60%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The Site is a 27-acre parcel located in a primarily industrial area of Santa Clara, California. It is bounded by the Union Pacific Railroad right-of-way and maintenance yardto the south, West Brokaw Road to the west, Coleman Avenue to the north, and the SantaClara/San Jose boundary to the east. There are three primary structures on the Site designated as the Corporate Technology Center, Plant 12, and the Stores and ReceivingBuilding. BAE Systems (formerly United Defense LP) leases certain Site buildings forresearch and development activities. Land use at the Site was primarily agricultural before its purchase by FMC in 1953. FMC began construction in the 1950 s and various construction activities continued through the 1980 s. FMC originally used the Site for design, development, and manufacture of custom packaging machinery. The Site was used for manufacturing military tracked vehicles,including assembly and painting operations, from 1963 through 1995. Manufacturingoperations were discontinued in 1996 and the Site is currently being remediated in anticipation of future commercial/industrial redevelopment. Approximately 20 acres of the Site were sold to LNR California Investments, Inc. in 1999. In August 2005, the property was purchased by Coleman Road Partners, LLC (Coleman) and H/S Bradley, LLC (H/SBradley). Subsequently, Coleman and H/S Bradley transferred the property to BFV, LLC,which was renamed TOD Brokaw, LLC.On November 21, 1991, the State of California Regional Water Quality Control Board, San Francisco Bay Region

FMC 328 WEST BROKAW ROAD (Continued) **S106235042**

(RWQCB), adopted Site Cleanup Requirements Order Number 91-164 for the FMC Corporation - Ground Systems Division, 328 West Brokaw Road facility,located in Santa Clara, Santa Clara County, California (RWQCB, 1991). On February 21,1996, the RWQCB adopted Order Number 96-024 Final Site Cleanup Requirements for:FMC Corporation and United Defense LP, Ground Systems Division, for the Property Located at 328 West Brokaw Road, Santa Clara, Santa Clara County, California. FMC has completed significant remedial investigations and remediation activities at the Site, including dual phase extraction with pneumatic fracturing in source area soils, and continues to operate a groundwater extraction and treatment system (GWETS) to contain downgradient migration of Site constituents. The GWETS consisted of ten extraction wells, two collection trenches, and two air strippers in a series. Sequestering agent is metered into the influent stream at a rate of two gallons per day to control scaling. The GWETS was shut down on February 27, 2015, and additional remedial actions are scheduled to be conducted in 2021.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

SAN JOSE HAZMAT:
Name: JLRG INC DBA PRECISION SPE
Address: 1158 CAMPBELL AV
City,State,Zip: SAN JOSE, CA 95126
Region: SAN JOSE
File Num: 410149
Class: Furniture refinishing/Machine Shop

CERS:
Name: PRECISION SPECIALTIES
Address: 1158 CAMPBELL AV
City,State,Zip: SAN JOSE, CA 95126
Site ID: 58559
CERS ID: 10344691
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 58559
Site Name: PRECISION SPECIALTIES
Violation Date: 12-11-2013
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: OBSERVED ONE 55-GALLON DRUM OF WASTE COOLANT WITH PAPER TOWELS STUFFED IN POUR SPOUT. REMOVE PAPER TOWELS AND USE PROPER LID TO KEEP CONTAINER PROPERLY CLOSED WHEN NOT IN USE.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 58559
Site Name: PRECISION SPECIALTIES
Violation Date: 12-11-2013
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: EMPLOYEES ARE NOT AWARE OF PROPER HAZARDOUS WASTE MANAGEMENT PROCEDURES INCLUDING LABELING REQUIREMENTS, CONTAINER REQUIREMENTS,

PRECISION SPECIALTIES (Continued) **S107448086**

ACCUMULATION TIME RESTRICTIONS, TRAINING REQUIREMENTS AND EMERGENCY RESPONSE. ENSURE THAT TRAINING IS PROVIDED WITHIN 6 MONTHS FOR NEW EMPLOYEES AND ANNUALLY THEREAFTER FOR EMPLOYEES WITH HAZARDOUS WASTE MANAGEMENT DUTIES. SANTA CLARA COUNTY HAZARDOUS WASTE MANAGEMENT TRAINING INFORMATION FLYER WAS PROVIDED TODAY.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-02-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: EPA ID: CAL000200894 is active. Observed the following containers inside the locked storage area in the back corner of the parking lot: Waste coolant, 2 x 55 gallons New coolant (marked as empty), 3 x 55 gallons Note: The key to the lock of the outside storage area could not be located. Per Jacquelyn, the two waste coolant drums are currently empty. The last pickup date for waste coolant was 7/26/18. Hazardous waste manifests were reviewed. Observed emergency response

PRECISION SPECIALTIES (Continued) **S107448086**

equipment including fire extinguishers and spill absorbent. Emergency information is posted.

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-11-2013
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: ROUTINE HAZARDOUS WASTE GENERATOR INSPECTION. THIS INSPECTION BEGAN ON 12/6/2013 AND CONCLUDED TODAY. EPA ID # CAL000200894 OBSERVED THREE 55-GALLON DRUMS OF WASTE COOLANT IN OUTSIDE STORAGE AREA AND TWO 10-GALLON BUCKETS OF WASTE COOLANT IN SHOP. BASED ON HAZARDOUS WASTE PICKUP RECEIPTS, FACILITY GENERATES APPROXIMATELY 110 GALLONS OF HAZARDOUS WASTE PER YEAR.

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-02-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Observed the following hazardous materials at or above HMBP state-reportable thresholds onsite: Coolant, 2 x 55 gallons The Hazardous Materials Business Plan (HMBP) submitted via the CERS website was reviewed. Facility has notified the property owner in writing that it is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements.

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-11-2013
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: ROUTINE HAZARDOUS MATERIALS BUSINESS PLAN (HMBP) INSPECTION. FACILITY HAS AN HMBP ESTABLISHED AND NEEDS TO TRANSFER THE INFORMATION TO THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) WEBSITE. PROVIDED INFORMATION SHEET ON CREATING AN ACCOUNT AND GETTING STARTED ON CERS. OBSERVED THE FOLLOWING HAZARDOUS MATERIALS INVENTORY: - ONE 55-GALLON DRUM OF WAY PURE 68 COOLANT - EIGHT MACHINE TOOLS CONTAINING APPROXIMATELY 150 GALLONS COMBINED OF WAY PURE 68 COOLANT - THREE 55-GALLON DRUMS OF WASTE COOLANT

Site History: The site was the location of a plating shop that recently closed. Shallow soil samples beneath the plating shop location reported cyanide and other metals above screening levels. Additionally, grab groundwater and soil vapor samples throughout the property reported detections of VOCs. The RP plans to remediate the soil hot spots through excavation.

Year: 2011
Gepaid: CAD981572530
TSD EPA ID: CAD980884183
CA Waste Code: 171 - Metal sludge (Alkaline solution (pH >= 12.5) with metals)
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 1.9599

Year: 2011
Gepaid: CAD981572530
TSD EPA ID: CAD980884183
CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 13.4905

Year: 2011
Gepaid: CAD981572530
TSD EPA ID: CAD980884183
CA Waste Code: 121 - Alkaline solution (pH >= 12.5) with metals
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 6.6303

Year: 2011
Gepaid: CAD981572530
TSD EPA ID: CAD980884183
CA Waste Code: 491 - Unspecified sludge waste
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.2085

Year: 2011
Gepaid: CAD981572530

VARIETY METAL FINISHING INC (Continued) **S113007406**

TSD EPA ID: CAD980884183
CA Waste Code: 792 - Liquids with pH <= 2 with metals
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 43.43472

Year: 2011
Gepaid: CAD981572530
TSD EPA ID: RID059735761
CA Waste Code: 711 - Liquids with cyanides >= 1,000 Mg./L
Disposal Method: H010 - Metals Recovery Including Retoring,Smelting,Chemicals,Ect
Tons: 2.52285

Year: 2011
Gepaid: CAD981572530
TSD EPA ID: CAD980884183
CA Waste Code: 723 - Liquids with chromium (VI) >= 500 Mg./L
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 3.31515

Year: 2011
Gepaid: CAD981572530
TSD EPA ID: NVT330010000
CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 50.568

Year: 2011
Gepaid: CAD981572530
TSD EPA ID: NHD510177926
CA Waste Code: -
Disposal Method: H010 - Metals Recovery Including Retoring,Smelting,Chemicals,Ect
Tons: 5.1999

Year: 2011
Gepaid: CAD981572530
TSD EPA ID: CAD059494310
CA Waste Code: 791 - Liquids with pH <= 2
Disposal Method: H077 - Other Chemical Precipitation With Or Without Pre-Treatment
Tons: 16.263

Environmental Interest/Information System:
California's Department of Toxic Substances Control's (DTSC's)-EnviroStor database is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Feature Description:	According to the Inventory Project Report (INPR) prepared by the Earth Technology Corporation for the United States Army Corps of Engineers (USACE), Sacramento District, dated October 1990, the Food Machinery and Chemical Corporation (FMCC) purchased the site property from the City of San Jose on 29 October 1946. FMCC manufactured food processing equipment, agricultural machinery, recreational vehicles, and military vehicles. Under their contract with the DoD, FMCC produced military tracked vehicles at Plants 1 through 6. Therefore, only Plants 1 through 6 are included in this FUDS. FMCC began manufacturing military vehicles on 19 March 1952. Plants 2, 4, 5, and 6 were owned by the U. S. Government. Plants 1 and 3 were constructed by FMCC. The governmentowned buildings were designated as: the Consolidated Western Steel Building (Plant 2), the Soule Rigid Steel Frame Buildings (Plants 4 and 5), and the Spare Parts Building (Plant 6). The Consolidated Western Steel Building was dismantled and removed from the Consolidated Western Steel Company in Berkeley, California, and re-erected and renovated at FMCC in 1953. The Soule Rigid Steel Frame Buildings were removed from Berkeley, California, and re-erected at FMCC in 1953. The Spare Parts Building was built by the United States for FMCC in 1952. FMCC constructed Buildings 1 and 3 in 1953. Ownership of Plants 2, 4, 5, and 6 was transferred by purchase from the United States to FMCC on 31 March 1960. The City of San Jose purchased the property from FMCC in 2005. The City planned to use the property as an extension to the adjacent San Jose International Airport, and called the property Airport West. However, the planned expansion never took place. The property is currently in development as the site of the New Earthquakes Stadium for San Jose s Major League Soccer team, the San Jose Earthquakes.

AJ COMMERCIAL LAUNDRY/ALL CHEM SUPPLY (Continued) **S107735811**

Comments:	The Groundwater Monitoring Report, First Semi-Annual 2015 summarizes groundwater monitoring activities completed in May 2015. Select monitoring wells in areas with remaining elevated volatile organic compounds were sampled to evaluate current groundwater conditions and to provide a baseline to track progress for the remediation that was restarted in May 2015. Wells with a total depth of 20 feet or less were dry or had small amounts of groundwater and were not sampled.

Completed Date:	02/10/2016
Comments:	Letter from GeoRestoration details the proposed schedule for shutdown

AJ COMMERCIAL LAUNDRY/ALL CHEM SUPPLY (Continued) **S107735811**

of the dual phase extraction system and soil gas and groundwater sampling and reporting.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 05/02/2016
Comments: DTSC sent a letter to 1175 Campbell Avenue, LLC, the responsible party, that approved the updated project schedule outlined in a February 10, 2016 letter from GeoRestoration, Inc. DTSC agreed that the dual-phase extraction system should run until the Bay Area Air Quality District permit expired at the end of May 2016. After system shutdown, soil sampling would be performed after a one-month period to provide data to assess the progress of remedation.

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

FMC CORP ORDNANCE PLT (Continued) **1000840778**

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D018
Waste Description: Benzene

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2,

FMC CORP ORDNANCE PLT (Continued) **1000840778**

Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F019
Waste Description: Wastewater Treatment Sludges From The Chemical Conversion Coating Of Aluminum, Except From Zirconium Phosphating In Aluminum Can Washing When Such Phosphating Is An Exclusive Conversion Coating Process.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Central Plant Area
Completed Document Type: Monitoring Report
Completed Date: 09/29/2017
Comments: The downgradient investigation was implemented to determine the extent of the volatile organic compound (VOC) plume to the north of the Central Plant Area. The groundwater samples collected from hydropunch locations at the San Jose International Airport confirmed that VOCs have migrated beyond the sentinel wells and into the Airport. Additional investigation at the Airport is not planned due to access limitation due to the Airport runways. FMC plans to continue monitoring the sentinel wells as part of their groundwater monitoring program.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 09/08/2016
Comments: The report describes the groundwater monitoring well abandonment and reinstallation activities that were necessary due to the proposed development of the soccer fields and parking area at the Site. The monitoring wells were relocated closer to the property boundary.

Completed Document Type: Operation and Maintenance Report
Completed Date: 05/10/2010
Comments: From January 15th through February 11th, the system was off for short periods of time due to power failures. Each time this occurred, a technician was sent to the site to restart the system as soon as possible. These power failures corresponded with severe weather events. Additionally, on March 17th, the system was off for 18 hours due to an overloaded variable frequency drive (VFD). The VFD was repaired and the system was restarted on March 18th. The total flow volume discharged to the storm drain from the system during this quarter, based on daily average flow volumes, was 2,077,904 gallons. No exceedances to the NPDES permit were observed.

Completed Area Name: Sites With No Operable Unit

FMC PLANT #2 & #7 (Continued) **S101482317**

Completed Sub Area Name: Central Plant Area
Completed Document Type: Operation and Maintenance Report
Completed Date: 07/20/2010
Comments: Discharge from the Basement Groundwater Dewatering System for the quarter was 3,496,616 gallons to the storm drain. There were no exceedances to the RWQCB permit. There were no unplanned shutdowns. Discharge from the Northern Boundary Groundwater Treatment System was 8,590,725 gallons to the storm drain. There were no exceedances to the NPDES permit. System was shutdown due to failure of the carbon filtration system on June 17, 2010. System was restarted on July 1, 2010.

Completed Date: 09/19/2014
Comments: Work Notice mailed on Sept 19, 2014 informing neighboring area of construction activities on the former Test Track Area. Soil Management Plan will be implemented during the construction.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Central Plant Area
Completed Document Type: Technical Workplan
Completed Date: 06/10/2014
Comments: The Work Plan presents details for the destruction and replacement of groundwater monitoring wells TW2-55 and TW59-SC in the Central Plant Area. These two monitoring wells were buried and damaged during activities related to the construction of the San Jose Earthquakes soccer stadium. The monitoring wells were located, but could not be repaired. Two new monitoring wells are to be installed near the original wells.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Central Plant Area
Completed Document Type: Financial Assurance Documentation
Completed Date: 06/02/2014
Comments: DTSC conducted a financial responsibility review to determine whether an adequate financial assurance mechanism and amount are in place for operation and maintenance activities at the Site. DTSC concluded that adequate financial assurance is in place.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Central Plant Area
Completed Document Type: Operation and Maintenance Report
Completed Date: 07/08/2016
Comments: The 2015 Annual Groundwater Verification Monitoring Report presents the data collected during the April and October 2015 groundwater sampling events at the Central Plant Area, including depth-to-water measurements in monitoring, extraction, and temporary wells, monitoring of extraction flow rates from extraction wells, and monitoring of volatile organic compound and 1,4-dioxane concentrations in groundwater. DTSC approved the Report, with a modification of the sampling frequency of monitoring well MW5B-CA from biennial to annual.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Central Plant Area
Completed Document Type: Operation and Maintenance Report
Completed Date: 06/22/2017
Comments: The 2016 Annual Groundwater Monitoring Report summarized the groundwater monitoring activities and the groundwater extraction and treatment operations for the year 2016 at the former Central Plant Area.

Comments: Not reported

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Central Plant Area
Completed Document Type: Operation and Maintenance Report
Completed Date: 12/16/2019
Comments: DTSC conditionally approved the 2018 Central Plant Area Groundwater Monitoring Report. The Report did not adequately address our comment regarding groundwater containment (General Comment 2 and Specific Comment 1). While the Report does not require further revision, DTSC recommend that the 2019 Annual Groundwater Monitoring Report discuss how the containment of the existing groundwater extraction and treatment system will be evaluated beyond the hand-drawn groundwater elevation contours. This may include hydraulic modeling or aquifer testing. A plan for evaluating the continued effectiveness of the remedy was recommended.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Central Plant Area
Completed Document Type: Soils Management Plan
Completed Date: 11/14/2007
Comments: The Soil Management Plan outlines the procedures for management of subsurface soil and groundwater that may brought to the surface and is intended to provide for the protection of workers and occupants during construction and redevelopment activities. The Plan identifies the location of the groundwater extraction and treatment system and monitoring wells in order to protect their integrity, presents general health and safety guidelines for Site construction or maintenance workers, and summarizes the portions of the Land Use Covenant that are relevant to the management of soil groundwater, and soil vapor that may be generated by future activities at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 05/31/2017
Comments: FMC completed the fieldwork at the airport for the downgradient groundwater investigation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Financial Assurance Documentation
Completed Date: 09/23/2016
Comments: DTSC accepted FMC’s financial assurance for an amount of $4,474,000 through a Corporate Self-Guaranty. The financial assurance will be increased to $17,387,856 in March 2017 to reflect the updated 30-year cost estimate for operation and maintenance of the Test Track Area and Central Plant Area groundwater extraction and treatment systems.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Central Plant Area
Completed Document Type: Technical Workplan
Completed Date: 06/15/2016

FMC PLANT #2 & #7 (Continued) **S101482317**

Comments:	The Work Plan for Offsite Plume Definition describes a groundwater investigation to determine the extent of the volatile organic compound plume to the north of and downgradient from the Central Plant Area of the former FMC Corporation property. The groundwater investigation will be performed on City of San Jose property within the southeastern portion of the San Jose International Airport, and is to consist of hydropunch sampling at six locations and installation of three monitoring wells.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	No Water Board oversight of cleanup at this site. This case is included in Geotracker because the site is covered by the Water Board s NPDES general permits for discharges from pump and treat systems to surface waters (one each for fuels- and VOC-impacted sites). This can happen for two reasons: (i) the site is overseen by another agency (e.g., USEPA or DTSC) and needs coverage under one of the NPDES general permits or (ii) construction dewatering in an area of groundwater contamination necessitates NPDES general permit coverage. Including this case in Geotracker helps staff to receive and review required NPDES reports.

Quarterly Update:	This property is the former site of the FMC Corporation. FMC operated a facility for the design, production, and testing of military tracked vehicles under US DOD contracts from 1951 to 1997. FMC was a hazardous waste storage and treatment facility under an interim status and certified closed in November 1996. Closure of the site involved dividing the site into areas. The Test Track Area and the Central Plant Area have been closed to industrial standards. Groundwater is impacted with organic contaminants and continues to be pumped and treated by FMC with oversight from DTSC. Both the Test Track Area and the Central Plant Area are now owned by the City of San Jose. The Plant 7 Area on the eastern portion of the site is now owned by Arcadia. On the western end is the last remnant of the FMC Corporation, an industrial facility run by the BAE Corporation which took over operations from FMC.

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

FMC PLANT #2 & #7 (Continued) **S101482317**

Primary Waste:	CNWTRS
Waste Type2:	Not reported
Waste2:	Contaminated Ground Water
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	1988 In May, a leak was found during piping modification work. It is

UNOCAL #0715 (Continued) **1000167087**

stated that the leak appeared to be old. A soil sample was collected and reported to contain 48 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 1,400 ppm TPH as Diesel (TPHd), and 0.3 ppm Toluene. A report of this sampling was not found in the file. 1991 In June, 4 groundwater monitoring wells (U1 through U4) were installed to depths of 60-65 feet below the ground surface (ft bgs). 17 soil samples were collected and reported to contain maximum concentrations of 4,400 ppm TPHg, 4.1 ppm TPHd, 21 ppm Benzene, 95 ppm Toluene, 40 ppm Ethylbenzene, and 160 ppm Xylenes. Periodic sampling of the monitoring wells began at this time. At this time, the report stated that this gas station has been in operation for approximately 45 years. 1992 In February, 5 monitoring wells (U5 through U9) were installed to 40 ft bgs on and offsite. 17 soil samples were collected and reported to have low to non-detectable concentrations of the Constituents of Concern (COCs). The new wells were incorporated into the monitoring program. In February, well U1 was reported to have measurable Free Product (FP) on the groundwater. In August, 19 groundwater wells (U10 through U18) and 1 soil vapor extraction well (UV1) were installed to maximum depths of 40 ft bgs. The soil vapor well was completed to 30 ft bgs. 48 soil samples were collected and reported to contain maximum concentrations of 5,400 ppm TPHg, 71 ppm Benzene, 280 ppm Toluene, 77 ppm Ethylbenzene, and 400 ppm Xylenes for samples collected from well U13 located near the USTs and along the piping. In October, a soil vapor extraction (SVE) test was conducted onsite. Additionally, an air sparge test was also conducted at this time. 1993 In May, 4 underground storage tanks (USTs) and associated piping and dispensers were removed from the site. The service station was demolished following UST removal. During station demolition, another unknown 100-gallon UST was found near the station building and removed. Also removed was a concrete oil/water separator. 6 soil samples were collected from the fuel UST excavation from depths of 14-14.5 ft bgs. These samples were reported to have maximum concentrations of 1,800 ppm TPHg, 5.9 ppm Benzene, 2.1 ppm Toluene, 3.3 ppm Ethylbenzene, 2.5 ppm Xylenes and 95 ppm TPH as Oil (TPHo). 10 soil samples were collected along the piping from 3-6.5 ft bgs. And were reported to contain maximum concentrations of 5,300 ppm TPHG, 0.27 ppm Benzene, 39 ppm Toluene, 78 ppm Ethylbenzene, 710 ppm Xylenes and 57 ppm TPHo. 1 soil sample was collected from 8.5 ft bgs beneath the waste oil UST and reported to contain 15 ppm TPHg,19, ppm Toluene, 0.08 ppm Xylenes, 5 ppm TPHo, 120 ppm Total Oil and Grease (TOG), 59 ppm Acetone, and 6 ppm Tetrachloroethene (PCE). 1 soil sample was collected from 6 ft bgs beneath the oil/water separator and was not reported to have concentrations of the COCs present above the laboratory reporting limits. 1 soil sample was collected from 5 ft bgs beneath the unknown UST and reported to contain 260 ppm TPHg, 0.35 ppm Toluene, 1.8 ppm Ethylbenzene, 480 ppm Xylenes, 7,200 ppm TPHo, 15,000 TOG, 380 ppm Acetone, and 520 ppm Naphthalene. Soil was excavated and 2 additional samples were collected from 10.5 ft bgs. These deeper samples were reported to have maximum concentrations of 46 ppm TPHg, 0.43 ppm Benzene, 0.42 ppm Toluene, 0.27 ppm Ethylbenzene, 1.5 ppm Xylenes, 1,100 ppm TPHo, and 1,000 ppm TOG. The analysis of the deeper samples did not include Volatile Organic Compounds (VOCs). Approximately 532 cubic yards of soil were removed from the site in association with the UST removals. Prior to backfilling the fuel UST excavation, perforated horizontal PVC piping was placed within the excavation with vertical risers exposed at the ground surface. In December,

UNOCAL #0715 (Continued) **1000167087**

wells U12, U13, U14 and U18 were reported tohave FP present on the groundwater. 1995 In June, groundwater extraction operations began at the site and continued through December 1997. It is estimated that 924,481 gallons of groundwater were treated and 227 pounds of TPH and 46 pounds of Benzene were removed. In October, a SVE system began operations at the site and continued through March 1998. It is estimated that the SVE removed 762 pounds of TPH and 6.1 pounds of Benzene. 1996 It is noted during the June groundwater sampling event that ORC socks were in wells U8, U9 and U17. The socks were mentioned in the groundwater monitoring reports until the December 1997 sampling event where there was no mention of socks. In November, 5 shallow soil vapor extraction wells (UV2 through UV6) were installed due to rising groundwater across the site. 15 soil samples were collected and reported to have maximum concentrations of 860 ppm TPHg, 4.8 ppm Benzene, 2.1 ppm Toluene, 2 ppm Ethylbenzene, 8.1 ppm Xylenes, and 150 ppm TPH as Diesel (TPHd). 1998 In September, air sparging was started onsite through August 2001. 2001 A Corrective Action Plan (CAP) was prepared. In the CAP it is stated that groundwater across the site has risen approximately 13 feet over the last 7 years. It also states that there is a groundwater ridge running east-west across the site. The CAP recommended the use of air sparge with SVE to remediate the site. A subsequent review of the CAP by another consultant recommended ozone sparge to remediate the site. 2002 In November, 4 ozone sparge wells (SP1 through SP4) were installed to depths of 42-62 ft bgs. Well U19 was installed near well U1 and screened from 57-62 ft bgs. This well was installed to assess whether well U1 was acting as a conduit for FP movement up the soil column. Soils encountered in U19 were a continuous sequence of clays, which was not consistent with the interbedded soils encountered in previous investigations. The lack of FP and similar dissolved hydrocarbon concentrations in well U19 suggests that the accumulation of FP in well U1 is not due to high dissolved hydrocarbon concentrations in the lower plume. 6 soil samples were collected from U19 and the reporting limit for most sample was raised significantly. The maximum detections reported were 850,000 ppm TPHg, 20,000 ppm Ethylbenzene, 53,000 ppm Xylenes, and 0.054 ppm Methyl tert-Butyl Ether (MtBE). 2003 In February, an ozone injection system was started onsite and operated through October 2006. 2004 In May, a resistivity and induced polarization survey was completed at the site. The survey was conducted to see if this method could identify areas of contamination. 2008 In October, wells U2 and U5 were destroyed due to a long history of low or non-detectable concentrations of COCs. Well UV4 was destroyed due to an obstruction. And wells U6, U9 and U16 were destroyed due to their location in the public right-of-way.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CA Enviroscreen 3 Score:	76-80%
CA Enviroscreen 4 Score:	55-60%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Site Management Requirements: Residual contamination in soil, groundwater, and soil vapor remains at the site that could pose an unacceptable risk under certain site development activities such as, but not limited to, site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time. Site History: The site is an active Costco Wholesale facility. The former USTs were removed in October 2017 in association with the relocation of the fueling facility from the eastern corner of the property to the southern corner of the property. Elevated soil concentrations remain immediately below the former UST(s), but the lateral extent is defined. Soil vapor was not assessed, because the

COSTCO WHOLESALE #0129 (Continued) **S121470335**

former fueling facility is now a parking lot and no building overlies the area. The plume has been adequately assessed and satisfies all LTCP criteria.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The former Stanford Applied Engineering site is located at 282 Brokaw Road in the City of Santa Clara, The Santa Clara Sporting Club currently occupies the property. Stanford Applied Engineering was a printed circuit board manufacturing facility that operated at this facility from the mid-1970's to 1992. The original unauthorized release was discovered in November 1991 when three small sumps were removed as part of a facility closure project for the manufacturing operation. Soil underlying the sumps was found to be contaminated with heavy metals and with volatile organic compounds (VOCs) that were used by others firms in similar manufacturing operations, but not by Stanford Applied Engineering. The Santa Clara Fire Department, lead agency for the facility closure project, required that VOC-contaminated soil be excavated to concentrations below 1 part per million (ppm) of total VOCs. The Fire Department also required that a groundwater grab sample be collected from the open excavation. This sample was found to contain elevated concentrations of VOCs, so a site assessment program was initiated to determine the extent of groundwater contamination. Three monitoring wells were installed from December 1994 to February 1995. Groundwater at the site is monitored semi-annually since 1996 (February and August) with a single report to be submitted by April 1st of each year. Additional investigation to define the extent of residual contamination in soil and groundwater will be conducted in June/July 2017.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-14-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection walk-through commenced on 3/13/19 and report was issued on 3/14/19. Facility is located at 1250 Aviation Av. and is owned by Atlantic Aviation. This area of the facility consists of Hangars A-E but excludes hangar B, which is operated by another permitted company that completes more in-depth airplane mechanical maintenance (Corp. Air Tech.). South hangar located at 1165 Aviation can be accessed by driving on the airport tarmac. Facility currently consolidates hazardous waste at the 1250 Aviation Av. location under EPA ID CAL000348079. Facility provides space and hazardous waste management for tenants to store and maintain airplanes. Shop floor has a trench drain with oil water separator beneath the floor that is electronically monitored. Other oil water separator on the tarmac are outside the hangar A is used only as a wash rack for planes but no fueling is allowed over these racks. Facility has not needed to empty this separator of any wastes since [Truncated]

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility last submitted their hazardous materials business plan via CERS ID 10155855 on 12/10/2018. Employee training logs for all emergency response trainings were reviewed at the time of inspection. Facility has the following reportable hazardous materials in this hangar: 1.) 2704 cf of nitrogen gas* 2.) 3504 cf of oxygen gas* 3.) 220 gallons of waste Jet A storage capacity (only 110 gallons was stored at time of inspection) 4.) 675 gallons of waste turbine oil storage capacity (only 110 gallons was stored at time of inspection) 5.) 430 cf of dissolved acetylene* 6.) 55 gallons of new coolant 7.) 110 gallons of de-icing solution 8.) 1369 gallons of AFFF fire suppressant stored in containers* 9.) 80000 gallons of Jet A Fuel 10.) 15000 gallons of Avgas* The following items were below reporting thresholds: 4x55 gallon containers of flammable solids, 2 of which were in use, estimated to hold less than 500 pounds at the time of inspection 2x55 gallon [Truncated]
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-21-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: *****UNRESOLVED ISSUES***** Respond to the following unresolved issues in writing: 1. It is currently unclear how inspection documentation requirements for monthly and annual inspections of 15,000-20,000 gallon fuel tanks (as required by the STI SP001) are being met. Daily, monthly, quarterly, and annually logged inspection forms for ATA103 are being kept. These forms cover some, but not all required inspection elements, particularly some related to tank structure and specific apparatus conditions. Certifying professional engineer stated in the plan that these tanks with be inspected in accordance with STI SP001, but no specific inspection forms are included in the SPCC plan. Provide further clarification on what forms must be completed per this standards. If forms are different that those provided by STI, demonstrate how alternative forms meet each requirement of STI SP001. 2. It is currently unclear when sensors for oil water separators are tested for functionality. [Truncated]

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	1987 In October, underground storage tanks (USTs) were removed and replaced. Removed two 8,000-gallon and two 5,000-gallon USTs, and replaced them with three 12,000-gallon USTs. Eight soil samples were collected from the excavation. Total petroleum hydrocarbons as gasoline (TPH-g) and benzene were detected in all eight soil samples. An unauthorized release report (URR) was prepared and filed by the City of San Jose fire Department on December 17, 1987, however no additional action was required by the oversight agency at that time. 1998 In October, UST, dispenser and product piping were upgraded. Seven soil samples were collected from the soil beneath the dispenser and piping. Xylenes detected in one soil sample at 0.011 milligrams per kilogram (mg/kg). MTBE was not detected in soil samples. An unauthorized release form was prepared by San Jose fire Department; however no additional action was required by the oversight agency at that time. 2002 In July, four groundwater monitoring wells (MW-1 through MW-4) were installed onsite. Maximum concentration of 46,000 micro grams per liter (ug/L) of MTBE was detected in on-site

SHELL SERVICE STATION (Continued) **1005904527**

monitoring well MW-3. An unauthorized release form dated September 13, 2002 was prepared by Shell and a fuel leak investigation case as opened. Periodic groundwater monitoring started in July 2002. 2003 In July, semi-monthly groundwater extraction (GWE) started from wells MW-3, MW-4, and MW-3A by using a vacuum truck. Approximately 29,000 gallons of groundwater were extracted. A total of 1.33 pounds of TPH G and 3.15 pounds of MTBE were removed between July 29, 2003 and August 31, 2005. Groundwater extraction (GWE) activities were discontinued in September 2005 based on MTBE concentrations reaching asymptotic levels. In September, seven off-site direct push borings (SB-1 through SB-7; 24 soil samples, and 7 water samples were collected and analyzed. In December, groundwater pumping tests were performed on monitoring wells MW-3 and MW-4 to evaluate full scale GWE. 2004 In February, two monitoring wells MW-5 and MW-6 were installed in off-site locations. MTBE was detected in MW-6 at a concentration of 40 ug/L. MTBE was not detected in MW-5. In May, an oil water separator was removed from the site. Two soil samples (Pit 1 and Pit 2) were collected from the excavation. TPH as diesel was detected at a concentration of 3.2 mg/kg. In August, monitoring well MW-3A was installed. This was due to the concern that MW-3 and MW-4 provided hydraulic connection between two water-bearing zones. MW-3A was installed near MW-3 and was a screened across the shallower water bearing zone from 9 to 19 feet below ground surface (bgs). 2005 In February, upon confirmation that monitoring wells MW-3 and MW-4 were hydraulically connected, between their 2 water bearing zones, both wells were destroyed. Monitoring well MW-3A was installed to replace MW-3. MW-3B was screened across the deeper water-bearing zone from 21 to 24 feet bgs. August Bi-monthly groundwater extraction events were discontinued. 2006 In April, the waste oil tank was removed. Two excavation sidewall soil samples, one piping trench sample and one groundwater sample were collected. Maximum concentrations of 30 mg/kg TPH d, and 54 mg/kg oil and grease were detected in soil sample WO-3-5. In groundwater, 770 ug/L TPH D, 28 ug/L MTBE and1,30 ug/L were detected. 2010 In February, a hoist was removed from the site. One bottom soil sample was collected. TPHd was detected at 53 mg/kg and TPH-hydraulic oil was detected at 70 mg/kg. In March, the latest groundwater monitoring event was conducted at the site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
Registry ID: 110002798465

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous

FEDERAL EXPRESS (Continued) **1000214110**

waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	*Correspondence - Received
Completed Date:	10/07/2010
Comments:	The extension is being requested because delays in completing the building demolition and debris disposal continue to prevent access to soil sampling locations. Extension request was granted. New due date for the Supplemental Site Investigation Report is December 1, 2010.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Workplan
Completed Date:	03/09/2011
Comments:	Groundwater Investigation Workplan was prepared to fill in data gaps necessary to help define the extent of TPH contamination in the groundwater in the Northeastern portion of the Site.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Integrated Compliance Information System (ICIS) provides a

ALL METALS DBA ECS REFINERY (Continued) **1000129686**

database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Commercial Offsite Facility Types: Not reported
Quarterly Update: FACILITY CLOSURE COMPLETED MARCH 2021 DTSC received the final certified closure report and accepted the closure certification. Hazardous waste is no longer being treated or stored at this location and the final facility closure is complete. The facility previously operated under a Standardized Hazardous Waste Facility permit that expired on January 8, 2019. The facility ceased operations on June 29, 2018 during bankruptcy proceedings. FACILITY DESCRIPTION/HISTORY ECS Refining was located at 705 Reed Street in Santa Clara. ECS was a metal recycler that operated a hazardous waste storage and treatment facility to reclaim precious and base metals from photochemical wastes, metal-bearing wastewaters, tin/lead solder dross and related wastes from electronic manufacturing, and other metal-bearing solid hazardous waste. The site was entirely paved and fenced. The facility was located in a developed industrialized area near the San Jose International Airport. The area is zoned for heavy industry by the City of Santa Clara. The facility transported hazardous wastes to the facility for recycling. Two company trucks picked up hazardous and non-hazardous wastes throughout Northern California daily. In addition, third party trucks made pickups and deliveries of hazardous and non-hazardous wastes several times daily. ECS had been operating at this location since 1979. The City of Santa Clara Historical District, a mixed use residential and commercial area, is located approximately 0.5 mile southwest, the University of Santa Clara is located within 1 mile southeast, and there are a few residences located 0.25 mile from this former facility. PERMITTING REGULATORY DESCRIPTION/HISTORY ECS received Standardized Permit Interim Status in 1993 and was issued a Standardized Hazardous Waste Facility Permit with an effective date of December 30, 1997. The permit expired on December 30, 2007. ECS submitted a timely renewal application in December 2006 . A renewal Standardized Permit was issued on January 9, 2009 with an expiration of Jan

Due Date: Not reported
Comments: Closure activities completed in August (pandemic caused schedule delays), final wastes removed 9/14/2020; closure report & certs received via email on 10/20/2020. Revised pages received 2/17/2021.
Unit Names: CRUCIBLEFURNACE 600, CrucibleFurnace 430, E-Waste/Printed Circuit Board Shredder, HOTPOTFURANCE, Photochemical Processing Unit, STORAGEAREA1, STORAGEAREA11a, STORAGEAREA11b, STORAGEAREAIV, TRAYFURNACE, VACUUMEVAPORATION
Event Description: Closure - RECEIVE CLOSURE CERTIFICATION
Actual Date: 02/17/2021

EPA ID: CAD003963592
Facility Type: Permitted - Operating
Facility Name: FORMER ECS 705 REED ST
Project Manager: ELENA ESPADA
Project Manager Lead: ELENA ESPADA
Supervisor: TARYN STOKELL BUCK
Facility Size: Not reported
Facility Status: OPERATING PERMIT
Activity Type: Closure Administrative
Final Date: Not reported
Type: STND
Title Description: Administrative closure of unit not operated nor built
Due Date: 07/08/2013
Comments: Unit closed was never built as a unit nor operated under a RCRA permit.
Unit Names: CONTAIN1
Event Description: Closure Administrative - ISSUE CLOSURE VERIFICATION
Actual Date: 07/08/2013

EPA ID: CAD003963592
Facility Type: Permitted - Operating
Facility Name: FORMER ECS 705 REED ST
Project Manager: ELENA ESPADA
Project Manager Lead: ELENA ESPADA
Supervisor: TARYN STOKELL BUCK
Facility Size: Not reported
Facility Status: OPERATING PERMIT
Activity Type: Closure
Final Date: Not reported
Type: STND
Title Description: Evaporator Equipment Removal, Partial Unit Closure
Due Date: 07/10/2014
Comments: Closure of Evaporator, delay due to enforcement action, needed to assure letter would not have negative impact on enforcement action.

ECS REFINING INC (Continued) **S112998980**

Consent Order Docket HWCA20147109 signed 4/8/15 penalized/fined ECS for failure to follow closure requirements (ref. sections 2.1.8, 2.1.10). Associated tank closures are attached to Photochemical Processing Unit. Closure sampling (pad, subsurface) yet to be performed in Area IIb.

Unit Names: VACUUMEVAPORATION
Event Description: Closure - ISSUE CLOSURE VERIFICATION
Actual Date: 07/10/2014

EPA ID: CAD003963592
Facility Type: Permitted - Operating
Facility Name: FORMER ECS 705 REED ST
Project Manager: ELENA ESPADA

Description:	Per NRC report: "A fire started in an outdoor cardboard storage box at an electronics and photographic waste recycling company, sending clouds of black smoke into the air. A shelter-in-place was issued for the surrounding area; the blaze was controlled by later afternoon. REMEDIAL ACTIONS: Santa Clara Fire Dept. responded, also firefighters from San Jose and Mountain View; blaze controlled by using up to 4, 000 gallons of water per minute; shelter-in-place issued using the "alertscc" system. ESTIMATED DURATION: "3 hour" ADDITIONAL INFORMATION: "EPA Reg 9 EOC learned of the release via news reports but has not received any reports from the NRC or Cal EMA on the incident".

Completed Date: 08/17/1995
Comments: RWQCB is overseeing the site

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 04/08/1993
Comments: The Lombardo site is approximately 2 acres in size and used for parking and storage of vehicles, heavy equipment and supplies by the company in its concrete cutting business. Lombardo has owned this property since April 1985. Historical information indicates that from the 1960's to the 1970's, metal coating company, a galvanizing facility operated onsite. Available information likewise indicates that metal coating may have discharged waste pickling and washing solution on-site, resulting to soil and ground- water contamination prior to Lombarbo's purchase of the property in 1985. Sampling results in 1991 showed zinc in soil as high as 34,000 ppm; and 364 ppm in groundwater. The San Francisco Regional Water Quality Control Board (SF RWQCB) is currently providing direct oversight in remedial activities at the site. Site cleanup requirements (order 92-052) was issued on May 20, 1992 to Lombardo and outlines specific tasks needed to be complied with.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

USGS TOPOGRAPHIC MAP

Target Property Map:	50003395 SAN JOSE WEST, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

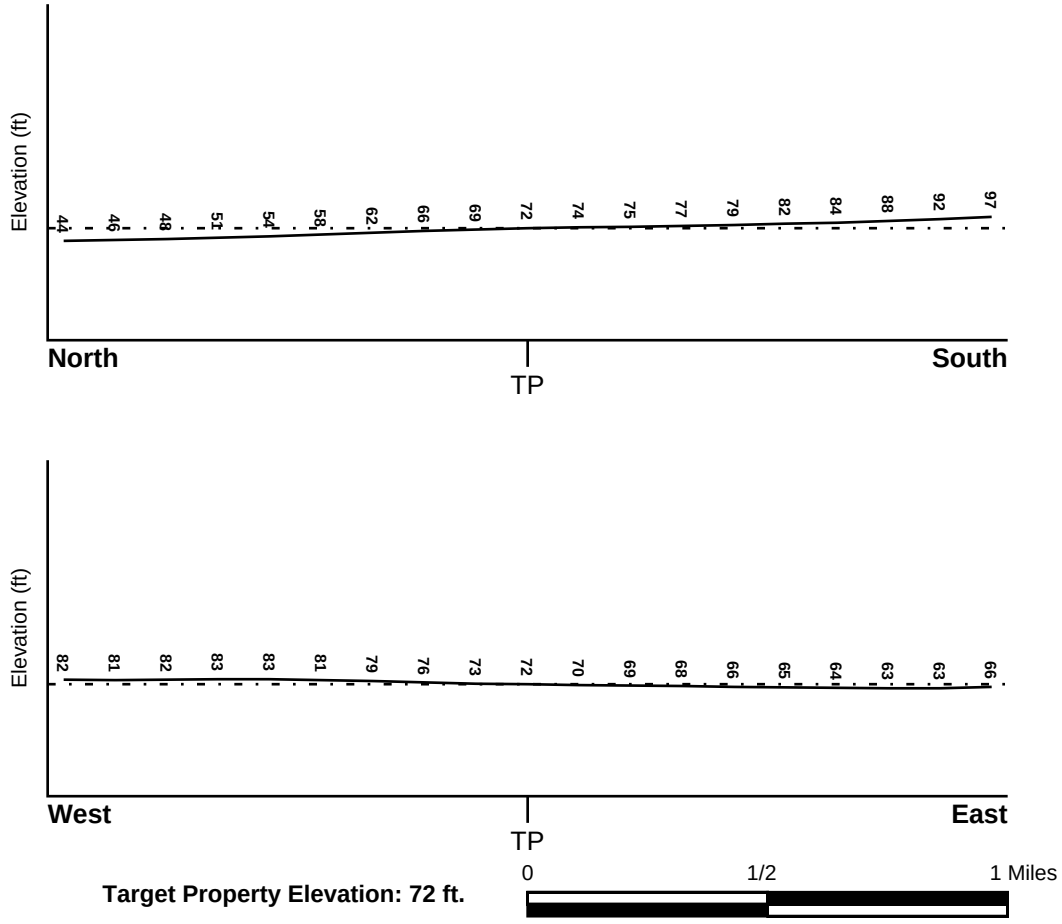

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles NW
Site Name:	Unisys
Site EPA ID Number:	CAD982400392
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	15 feet.
Hydraulic Connection:	The surficial and lower aquifers are hydraulically connected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Contact: Stason Foster

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

APPENDIX D – QUESTIONNAIRE

CORNERSTONE EARTH GROUP

Environmental Questionnaire
(User Questionnaire)

The ASTM Standard E1527-21 defines the User as the party seeking to use a Phase I Environmental Site Assessment to evaluate the presence of Recognized Environmental Conditions associated with a property. Per the ASTM Standard, the User should provide certain information to the environmental professional. Please provide the following information. Responses should be provided in good faith and to the extent of your knowledge. **Enter "unknown" if the requested information is not known.**

PROJECT DETAILS

1) **Describe the reason for performing the requested Phase I ESA.** For example, property acquisition/lender requirement, evaluation of business environmental risks, seeking to qualify for Landowner Liability Protections under CERCLA, etc.

   Evaluation of property for redevelopment

2) **Please describe your intended use of the property.** For example, commercial office space, residential, mixed-use, etc. If the property is planned to be redeveloped, briefly describe the development plans.

   residential

3) **Will the development plans include excavation and off-site soil removal or the import of soil? If yes, please briefly describe.** Yes ☑ No ☐

   General grading and site prep for development

SITE DETAILS

4) **Please list all current and former addresses, along with each assessor's parcel number (APN). Some sites have multiple addresses; all are needed, even if they are not in current use.**

Address(es)	APN Number(s)	Lot Size (acres)
451 El Camino Real	23-09-020 230-09-021	
469 El Camino Real		
471 El Camino Real		
475 El Camino Real		

5) **Please provide/attach a site plan that accurately shows the property boundaries.**

6) **Please list current site tenant(s), site use, and years of occupancy:**

Tenant	Site Use	Years of Occupancy (*e.g.*, From 1995 to 2007)
Si-Bone	Office/R&D	2018-Present
Leantaas	Office	2017-Present
MACOM	Office/R&D	2017-Present
HITT Contracting	Office	2020-Present

7) **Please list prior site tenant(s), site use, and years of occupancy:**

Tenant	Site Use	Years of Occupancy (*e.g.*, From 1975 to 1983)
Progressive Insurance	Office	2016-2024
Clara Analytics	Office	2016-2023

CORNERSTONE EARTH GROUP

8) Please indicate if you are aware of any of the following features <u>currently or formerly</u> at the site.

Structure/Feature (Select All ⇨)	Yes	No	Do Not Know
Aboveground Storage Tanks		X	
Agricultural Wells		X	
Air Emission Control Systems		X	
Boilers		X	
Burning Areas (waste burn pits or ash disposal areas)		X	
Chemical Mixing Areas		X	
Chemical Storage Areas		X	
Drainage Ditches		X	
Drums, Totes, and Intermediate Bulk Containers		X	
Elevators	X		
Emergency Generators		X	
Equipment Maintenance Areas		X	
Fill Placement (*i.e.,* fill used to build up the site elevations)		X	
Groundwater Monitoring Wells		X	
Hoods and Ducting (associated with chemical use)		X	
Hydraulic Vehicle or Equipment Lifts		X	
Incinerators		X	
Petroleum Pipelines or Wells		X	
Pits, Ponds, or Lagoons.		X	
Railroad Lines		X	
Row Crops or Orchards		X	
Septic Systems or Cesspools		X	
Solid Waste Disposal Areas (other than municipal trash containers)		X	
Stained Soil or Pavement		X	
Stains or Corrosion on Floors, Walls, or Ceilings		X	
Standing Surface Water or Pools		X	
Stockpiles of Soil or Debris		X	
Stressed Vegetation (unrelated to the lack of water)		X	
Strong, Pungent, or Noxious Odors		X	
Sumps, Clarifiers, Oil-Water Separators, or similar structures		X	
Transformers		X	
Underground Storage Tanks		X	
Unidentified Substance Containers		X	
Vehicle Maintenance Areas		X	
Vehicle Wash Areas		X	
Wastewater Neutralization Systems		X	

If you checked yes to any of the above, please provide a brief additional description here:

There is an elevator is each two story building.

9) Please indicate if, to your knowledge, any of the following documents exist:

Document	Yes	No	Do Not Know
Environmental site assessments	X		
Environmental permits or violation notices			X
Underground or above ground storage tank documents/permits			X
Geotechnical reports or hydrogeologic studies	X		
Risk assessments			X
Hazardous materials management plans or chemical inventories			X
Safety/emergency response plans or spill prevention plans			X
Compliance audits or community right-to-know plans			X
Asbestos or lead based paint surveys			X

If you checked yes to any of the above, please indicate the location of the documents.

Can copies be provided? Yes ☑ No ☐

10) Have significant quantities of hazardous materials been used, stored, or generated on-site?

Yes ☐ No ☑

If so, please describe the types and quantities and where these materials are or were located.

11) Environmental Liens and AULs: To meet the requirements of 40 CFR § 312.25, a search for the existence of Environmental Liens and Activity and Use Limitations (AULs) (such as engineering controls, land use restrictions, or institutional controls) must be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User). Users may rely on transaction-related title insurance documentation such as Preliminary Title Reports and Title Commitments. ASTM E 1527-21 categorizes the requirement to conduct a search for Environmental Liens and AULs as a User responsibility.

Did a search of land title records identify any environmental liens or AULs that are in place or filed or recorded against the subject property under federal, tribal, state, or local law?

Yes ☑ No ☐ Search not yet completed ☐

Is a Preliminary Title Report or Title Commitment available? If yes, please attach a copy.

Yes ☑ No ☐

CORNERSTONE EARTH GROUP

12) **Are you aware of commonly known or reasonably ascertainable information about the site or adjoining properties that would help the environmental professional to identify conditions indicative of releases or threatened releases?** For example, do you know of 1) past uses involving hazardous materials at the site or adjoining properties, 2) specific chemicals that were or are present at the site or adjoining properties, 3) spills or other chemical releases at the site or adjoining properties, or 4) any environmental cleanups at the site or adjoining properties?

Yes ☐ No ☑

If so, please briefly describe below, including whether reports documenting the activities are available for review by Cornerstone Earth Group.

13) **Are you aware of 1) any pending, threatened or past litigation, or administrative proceedings relevant to hazardous substances or petroleum products at the site, or 2) any notices from any governmental entity regarding possible violations of environmental laws or possible liability related to hazardous substances or petroleum products?**

Yes ☐ No ☑

If so, please briefly describe below.

14) **Do you have any specialized knowledge or experience related to the site or nearby properties that is material to environmental conditions at the site? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?**

Yes ☐ No ☑

If so, please briefly describe below.

15) **In a transaction involving the purchase of commercial real estate, the User must consider the relationship of the purchase price of the property to the fair market value of the property if the property were not affected by hazardous substances. Do you believe that the purchase price of the subject property is lower than the fair market value due to contamination?**

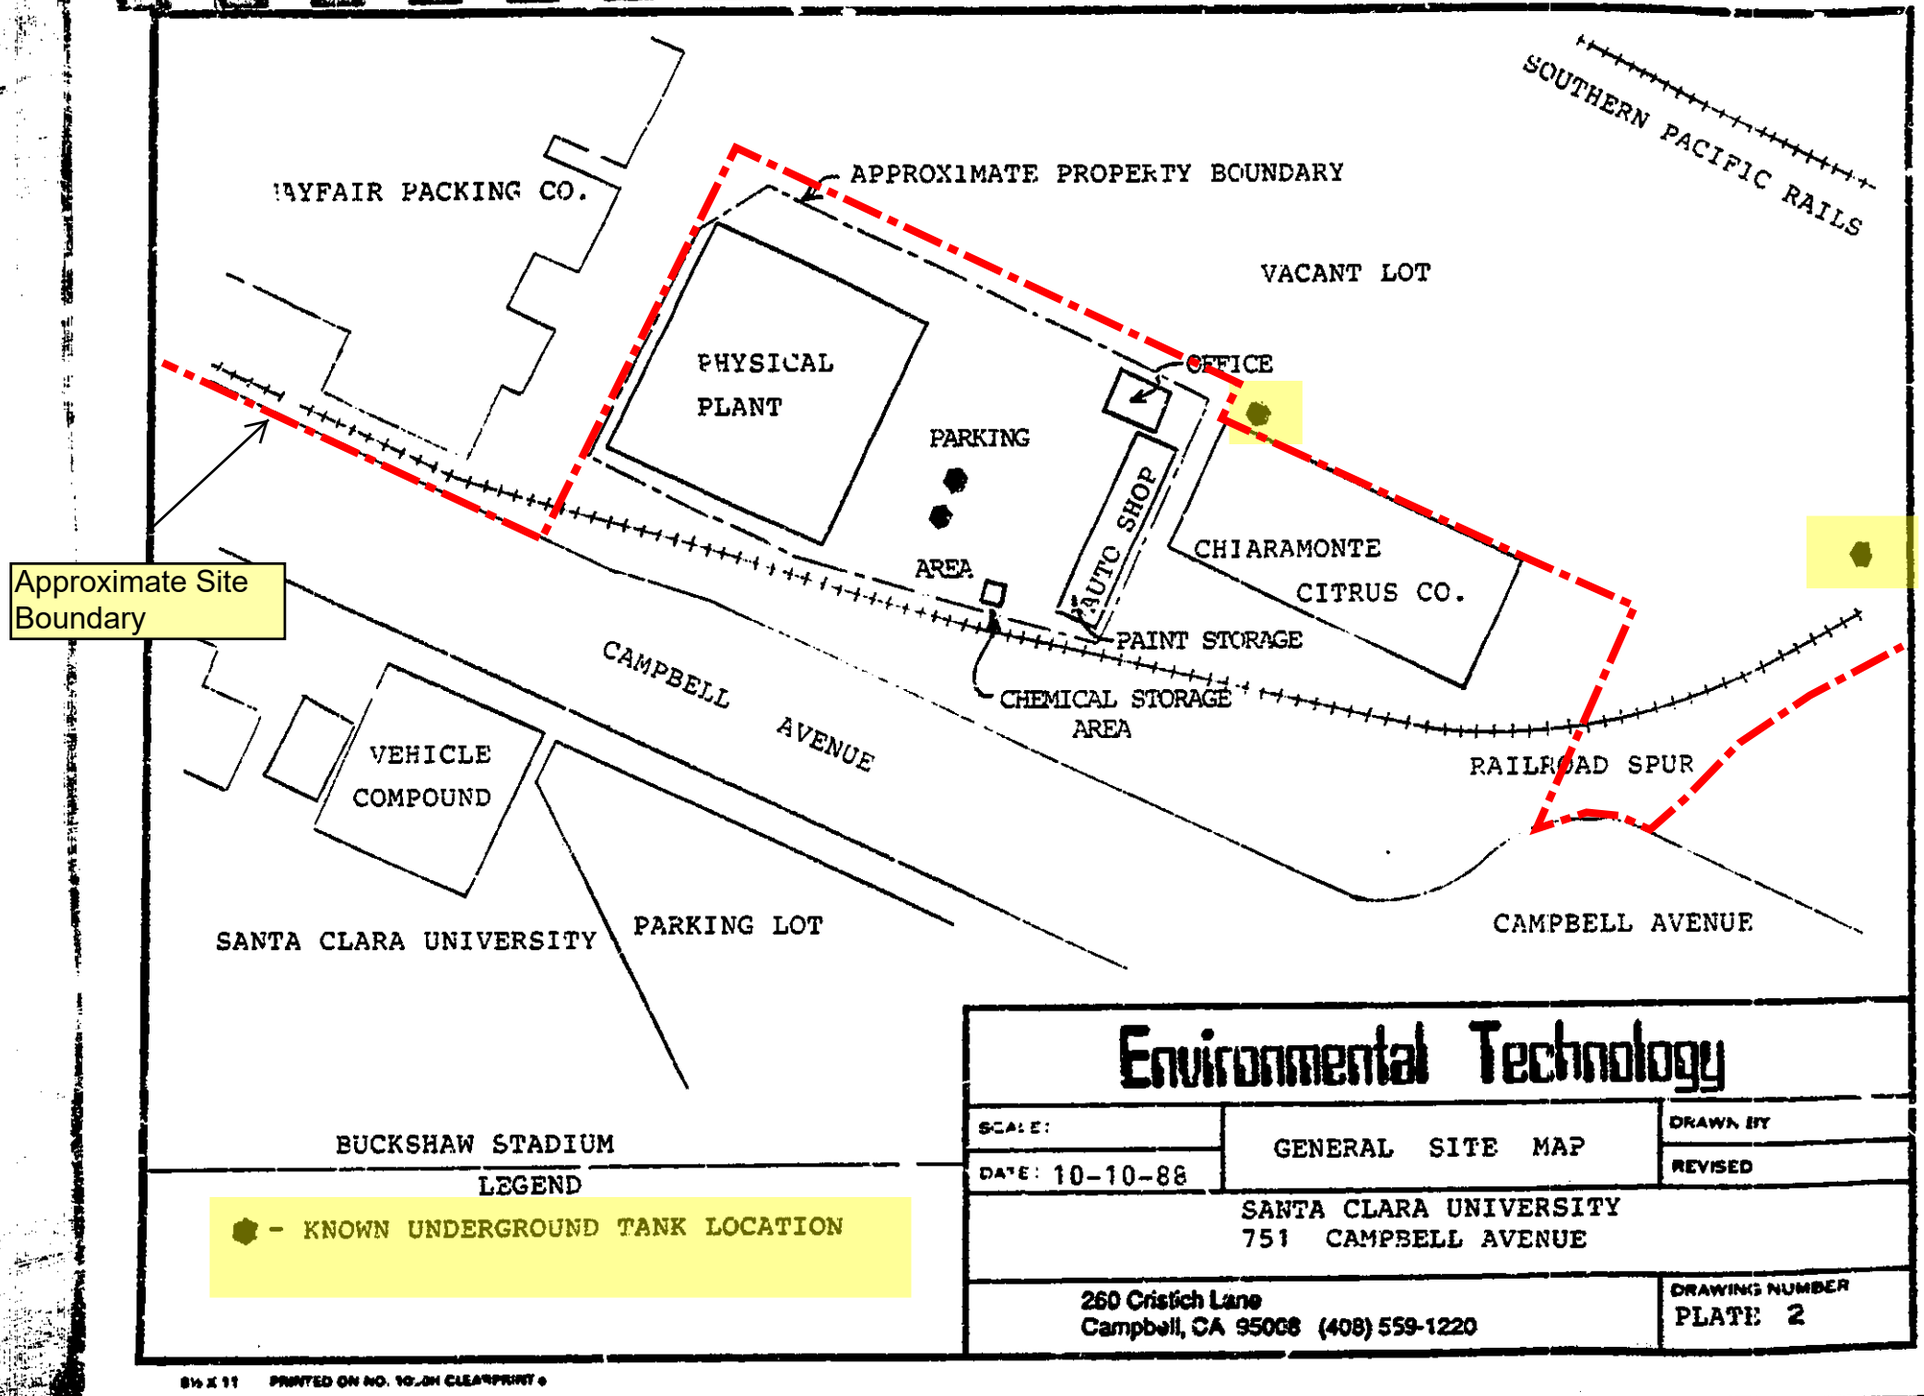

Yes ☐ No ☑ Not Applicable (no purchase involved) ☐

16) **Completed by:**
