Project Title: 669696_Group_Thums_PA

Project Applicant: THUMS Long Beach Co. (T2900)

Project Location: Los Angeles Offshore, Wilmington; 07/05S/12W/SB; 33.75950241 / -118.18267822

Project Description: THUMS proposes to abandon four idle existing oil and gas wells within Wilmington Oil Field. The abandonment entails removing existing equipment, cleaning the well out as deep as possible and plugging the well with cement.

The proposed project consists of the California Department of Conservation, Geologic Energy Management Division (CalGEM) approving four permits for THUMS Long Beach Co. (T2900) to abandon the wells listed below, in the Wilmington Oil Field.

API #	Well Name
0423720052	A-709
0423720237	A-664
0423722215	A-667
0423723441	A-834 I

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

Exemption Type	Statute (PRC)	Regulation (14 CCR)	
☐ **Statutory Exemption:**			

Exemption Type		Statute (PRC)	Regulation (14 CCR)	
☐	Ongoing Project (*pre-CEQA approval on April 5, 1973*)	21169	15261 (b)	
☐	Ministerial	21080 (b)(1)	15268	
☐	Declared Emergency	21080 (b)(3)	15269 (a)	
☐	Emergency Projects	21080 (b)(4)	15269 (b) or (c)	
☑	**Categorical Exemption:**	21084		
☑	**Class 1**: Existing Facilities		15301	1684.1
☑	**Class 2**: Replacement or Reconstruction		15302	
☐	**Class 3**: New Construction/Conversion of Small Structures		15303	
☑	**Class 4:** Minor Alterations to Land		15304	1684.2
☐	**Class 7**: Protection of Natural Resources		15307	
☐	**Class 8**: Protection of the Environment		15308	
☐	**Class 11:** Accessory Structures		15311	
☐	**Class 21**: Enforcement Actions to revoke a permit		15321	
☐	**Class 30**: Minor Actions to Prevent, Minimize, Stabilize, Mitigate, or Eliminate a Release (Actual or Threat) of Hazardous Substances (Waste or Material)		15330	
☐	**Class 33**: Small Habitat Restoration Projects		15333	
☐	**General Exemption** ("common sense")		15061 (b)(3)	
☐	**Not a "Project" subject to CEQA**		15378 (b)(2)	

CEQA Exceptions to the Exemptions (14 CCR § 15300.2)**:** where project is located (e.g., sensitive environment); Cumulative Impact; Significant Effect due to Unusual Circumstances; Scenic Highways; Hazardous Waste Sites; Historical Resources.

Reasons Why Project is Exempt: The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

Class 1, Existing Facilities (14 CCR §§ 15301, 1684.1): Class 1 applies to the "operation, repair, maintenance, or minor alteration" of existing facilities involving "negligible or no expansion of use beyond that existing previously." (§ 1684.1) The proposed Project is to abandon four existing production wells in the Wilmington field. This proposal involves removing existing equipment, cleaning out the wells, and plugging with cement to abandon the four wells. The abandonments will use temporary equipment, such as a workover rig, confirmed to fit within the existing wellpad. This proposed Project is a minor alteration involving negligible or no expansion of use beyond previously existing.

Class 2, Replacement or Reconstruction (14 CCR § 15302): Class 2 applies because the rework of the well could be considered "replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity." This abandonment only involves reconstructing to abandon four existing production wells

by removing equipment, cleaning out the wells, and plugging with cement. The proposal does not involve any changes to the well's structures (the wellbores).

Class 4, Minor Alterations to Land (14 CCR §§ 15304, 1684.2): Class 4 applies because the rework "consists of drilling operations that result in only minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation." The abandon is intended to maintain the current level of service and will not involve expanding the facility or operations. The proposed activities and temporary equipment will be contained within the existing well pads. As a result, there will be no new ground disturbances. There are no expected impacts on biological resources as the proposed Project will not disturb undisturbed areas.

Exceptions to Exemptions: CalGEM further finds that there are no exceptions to the application of the categorical exemptions (PRC § 21084; 14 CCR § 15300.2) referenced above. For example, there is no substantial evidence that there are any "unusual circumstances" associated with the proposed project that create a reasonable possibility that the activity will have a significant effect on the environment, and that there are no significant "cumulative impacts" resulting from successive projects of the same type in the same place. Therefore, reliance on the exemptions is appropriate.
