Project Description: (please use a separate page if necessary)

The project entails constructing and operating a stormwater capture and treatment facility on the western side of Encanto Park, as well as other ancillary park improvements. The treatment facility would intercept stormwater and dry-weather flow from existing underground storm drain pipelines within the park and pump the water to a shallow underground reservoir beneath the multi-use field for infiltration into the groundwater basin. An outflow pipe would be installed to convey excess water from the reservoir during heavy storms when all the water is not able to infiltrate. This water would pass through a treatment unit before discharging to the San Gabriel River at the existing outfall that conveys water from the storm drain pipelines beneath the park. The project would replace the turf field surface and make improvements to the park's parking lot.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
