

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Encanto Park Regional Stormwater Capture Project

Lead Agency: Rio Hondo/ San Gabriel River Watershed Management Authority

Contact Name: Grace Kast

Email: grace@gkconsulting.com Phone Number: 626-485-0338

Project Location: Duarte, Los Angeles

*City*

*County*

Project Description (Proposed actions, location, and/or consequences).

The project entails constructing and operating a stormwater capture and treatment facility on the western side of Encanto Park, as well as other ancillary park improvements. The treatment facility would intercept stormwater and dry-weather flow from existing underground storm drain pipelines within the park and pump the water to a shallow underground reservoir beneath the multi-use field for infiltration into the groundwater basin. An outflow pipe would be installed to convey excess water from the reservoir during heavy storms when all the water is not able to infiltrate. This water would pass through a treatment unit before discharging to the San Gabriel River at the existing outfall that conveys water from the storm drain pipelines beneath the park. The project would replace the turf field surface and make improvements to the park's parking lot.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potential Impacts to Biological Resources: BIO-1 (Preconstruction Bat Survey), BIO-2 (Nesting Bird Avoidance), BIO-3 (Least Bell's Vireo Avoidance and Minimization), BIO-4 (Coastal California Gnatcatcher Avoidance and Minimization).  
 Potential Impacts to Cultural Resources: CR-2a (Workers Environmental Awareness Program), CR-2b (Archaeological Resource Monitor), CR-2c (Approved Native American Monitors), CR-2d (Cease of construction if archaeological resource is encountered), CR-2e (Discovery and Treatment Plan), CR-2f (storage of cultural resources at an accredited museum repository), CR-2g (Findings Report).

Potential Impacts to Geology and Soils: PAL-1 (Workers Environmental Awareness Program), PAL-1b (Qualified paleontological resource monitor), PAL-1c (Cease of construction if paleontological resource is encountered), PAL-1d, (Paleontologic Mitigation Plan preparation), PAL-1e, (Collect and prepare significant fossils in a properly equipped paleontology laboratory), PAL-1f, (Final Report).

Potential Impacts to Tribal Cultural Resources: See CR2a - CRg

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
