Project Title: 702690_Group_CRPC_OG

Project Applicant: California Resources Production Corporation (CRPC)

Project Location: Kern County, Kern Front; Sec. 23, Twn. 28S, Rng. 27E, Base MD; Latitude: 35.4805831, Longitude: -119.0366897

Project Description: CRPC proposes to rework Lehmann 32 in the Kern Front field to improve well performance and/or condition. No permanent facilities will be constructed. No expansion of associated facilities will be required. Various mobile temporary equipment will be used including, but not limited to, workover rig, etc., and vehicles to transport personnel and materials to/from the site. There will not be new ground surface disturbance associated with this project. The proposed project consists of the California Department of Conservation, Geologic Energy Management Division (CalGEM) approving 1 permit for California Resources Production Corporation to rework the well(s) listed below, in the Kern Front Oil Field, to address well integrity issues.

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

Reasons Why Project is Exempt: The basis for CalGEM’s determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

Class 1, Existing Facility (14 CCR §§ 15301, 1684.1): The “Class 1” (14 CCR §15301) exemption is applicable per the CEQA Guidelines and CalGEM’s regulations (14 CCR §1684.1) because the proposed work consists of repair, maintenance, or minor alteration of an existing previously permitted well involving no expansion of former use. The Class includes, but is not limited to: remedial, maintenance, conversion, and abandonment work on oil, gas, injection, and geothermal wells. The well would maintain its existing well type and the use of the well would remain the same as before.

Class 2, Replacement or Reconstruction (14 CCR §15302): Class 2 applies because it consists of “replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially
