

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Grove Basin Outlet Storm Drain Improvement Project

Lead Agency: San Bernardino County Flood Control District

Contact Name: Ayida Smith, M.P.A

Email: Ayida.Smith@dpw.sbcounty.gov

Phone Number: 909-387-1864

Project Location: Ontario

*City*

San Bernardino

*County*

Project Description (Proposed actions, location, and/or consequences).

The proposed project involves construction of new underground storm drain infrastructure to improve regional flood control in the Ontario area. The project includes installation of an 84-inch and 96-inch reinforced concrete pipe (RCP) from Edison Avenue to Chino Avenue, and replacement of an existing 66-inch RCP with a 72-inch RCP from Chino Avenue to just south of the Grove Basin. Additional improvements include removal and replacement of manholes and junction structures, roadway and driveway reconstruction, and removal of outlet structures. The pipeline spans approximately 6,583 feet with a maximum excavation depth of 27 feet.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant impacts were identified in the areas of biological resources, cultural resources, air quality, and noise. Specifically, the project could affect nesting birds and riparian habitat, as well as subsurface tribal cultural materials. Construction activities may result in temporary increases in air emissions and noise levels. To address these impacts, mitigation measures have been proposed, including pre-construction biological surveys, avoidance of nesting seasons, archaeological monitoring, dust suppression practices, and restrictions on construction timing.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None known at this time. No major issues were raised by agencies or the public during outreach or review.

Provide a list of the responsible or trustee agencies for the project.
