PROJECT TITLE: Environmental Assessment No. 2025-03
11th Street Improvements

PROJECT LOCATION: Street segment of 11th Street, between Reed Avenue and East Avenue, as well as work within the railroad right of way at 7 separate locations: on Manning Avenue at Manning Avenue and I Street, on North Avenue at North and Reed Avenue, on 8th Street at 8th and I Street, on 10th Street at 10th and I Street, on 13th Street at 13th and I Street, and on Dinuba Avenue at Dinuba and I Street (see Vicinity map for exact locations)

EXEMPT STATUS: Categorical Exemption

PROJECT DESCRIPTION: This project includes, in general, 6" HMA dig out, grind and overlay with pavement fabric, pavement reconstruction, pavement overlay, construction of concrete curb ramps, curb and gutter, sidewalks, and driveway approaches, loop detector replacement, adjusting manhole and water valve frame and cover to grade, signage and striping. The project is consistent with the 2030 General Plan Update, Circulation Element.

This project is exempt under Section 15301 (Class 1/Existing Facilities) and Section 15332 (Class 32/Infill Development Projects) of the California Environmental Quality Act (CEQA) Guidelines.

EXPLANATION: Section 15301(c) (Class 1/Existing Facilities), exempts from the provisions of CEQA projects characterized as repair of existing highways and streets, sidewalks, gutters, and bicycle and pedestrian trails, and other alterations such as the addition of bicycle facilities and other similar alterations that do not create additional automobile lanes. The proposed project is designed consistent with the City of Reedley Standard Specifications and Standard Drawings. The proposed project includes the repair of existing streets, sidewalks, and gutters, which would not create additional automobile lanes. Therefore,

**City of Reedley
Categorical Exemption
Environmental Assessment No. 2025-03**

E202510000136

this project is exempted under this Section.

Section 15332 (In-Fill Development Projects) of the CEQA Guidelines also exempts projects that are consistent with the General Plan and zoning; occur within the city limits on a site less than five acres; contain no habitat for endangered species; would not result in any significant effects relating to traffic, noise, air quality or water quality; and can be adequately served by all required utilities and public services.

The proposed project is consistent with the 2030 General Plan Update, Chapter 3, Circulation Element, Figure 3.1 – Circulation Diagram, the purpose of which is to provide a surface transportation system for the general welfare of the community. The project occurs in the city limits of Reedley and is on an affected area that is less than five acres with no habitat for endangered species on the site. The project site is existing streets in an urban area, which has a high level of disturbance within, and adjacent to the project area, therefore it lacks suitable habitat for endangered species. The project would be required to comply with general plan policies and mitigation measures addressed in the Reedley General Plan 2030 Program EIR (SCH# 2010031106), which would determine that the project would not result in any significant effects related to traffic, noise, air quality or water quality.

The proposed project is an exemption characterized under Section 15301 (Class 1/Existing Facilities) and Section 15332 (Class 32/Infill Development Projects) of the California Environmental Quality Act (CEQA) Guidelines.

Date: June 2, 2025
