Section 3.0: Errata to the Draft Focused EIR

3.1 Introduction to the Errata 3.0-1

3.2 Changes to the Draft Focused EIR 3.0-2

Section 1.0 Introduction

1.1 INTRODUCTION

The Final Environmental Impact Report (Final Focused EIR) for the CenterPark Specific Plan Project has been prepared in accordance with the California Environmental Quality Act (CEQA) and CEQA Guidelines. CEQA Guidelines Section 15132 indicates that the contents of a Final EIR shall consist of:

(a) Environmental Impact Reports shall contain the information outlined in this article, but the format of the document may be varied. Each element must be covered, and when these elements are not separated into distinct sections, the document shall state where in the document each element is discussed.

(b) The EIR may be prepared as a separate document, as part of a general plan, or as part of a project report. If prepared as a part of the project report, it must still contain one separate and distinguishable section providing either analysis of all the subjects required in an EIR or, as a minimum, a table showing where each of the subjects is discussed. When the Lead Agency is a state agency, the EIR shall be included as part of the regular project report if such a report is used in the agency's existing review and budgetary process.

(c) Draft EIRs shall contain the information required by Sections 15122 through 15131. Final EIRs shall contain the same information and the subjects described in Section 15132.

(d) No document prepared pursuant to this article that is available for public examination shall include a "trade secret" as defined in Section 6254.7 of the Government Code, information about the location of archaeological sites and sacred lands, or any other information that is subject to the disclosure restrictions of Section 6254 of the Government Code.

The Final Focused EIR includes all of these required components.

In accordance with § 15088 of the State CEQA Guidelines, the City of Ontario (City), as the lead agency for the proposed Project, evaluated comments received on the Draft Focused EIR (State Clearinghouse No. 2025060731) and has prepared responses to the comments received. The preceding Table of Contents and Section 1.0 provides a list of all persons, organizations, and public agencies commenting on the Draft Focused EIR. Section 2.0 includes the Responses to Comments received on the Draft Focused EIR. It should be noted that responses to comments also result in various editorial clarifications and corrections to the original Draft Focused EIR text. Added or modified text is shown in Section 3.0: Errata, by underlining (<u>example</u>) while deleted text is shown by striking (~~example~~). The additional information, corrections, and clarifications are not considered to substantively affect the conclusions within the Focused EIR. This Response to Comments document is part of the Final Focused EIR, which includes the Focused EIR pursuant to § 15132 of the State CEQA Guidelines.

After review and discussion by City staff and the City Planning Commission, responses to comments will be sent to commenting agencies and individuals. This satisfies the requirement of Section 21092.5 of CEQA to send responses to the public agency comments received on the Draft Focused EIR at least 10 days prior to Project approval. This document includes responses to all written and verbal comments received on the Draft Focused EIR.

1.2 ORGANIZATION OF THE FINAL FOCUSED EIR

This Final Focused EIR provides the requisite information required under CEQA and is organized as follows:

- **Section 1.0 Introduction.** This section provides an introduction to the Final Focused EIR, including the requirements under CEQA, the organization of the document, as well as brief summary of the CEQA process activities to date.
- **Section 2.0 Response to Comments.** This section provides a list of agencies and interested persons commenting on the Draft Focused EIR; copies of comment letters received during the public review period, and individual responses to written comments. To facilitate review of the responses, each comment letter has been reproduced and assigned a number. Individual comments have been numbered for each letter, and the letter is followed by responses with references to the corresponding comment number.
- **Section 3.0 Errata to the Draft Focused EIR.** This section details changes to the Draft Focused EIR.

1.3 CEQA REQUIREMENTS FOR A FINAL FOCUSED EIR

As described in CEQA Guidelines Sections 15088, 15089, 15090 and 15132, the Lead Agency must evaluate comments received on the Draft Focused EIR and prepare written responses and consider the information contained in a Final Focused EIR before approving a project.

CEQA Guidelines Section 15204(a) outlines parameters for submitting comments, and reminds persons and public agencies that the focus of review and comment of Draft Focused EIRs should be:

> *"…on the sufficiency of the document in identifying and analyzing possible impacts on the environment and ways in which significant effects of the project might be avoided or mitigated. Comments are most helpful when they suggest additional specific alternatives or mitigation measures that would provide better ways to avoid or mitigate the significant environmental effects. At the same time, reviewers should be aware that the adequacy of a Focused EIR is determined in terms of what is reasonably feasible. …CEQA does not require a lead agency to conduct every test or perform all research, study, and experimentation recommended or demanded by commenters. When responding to comments, lead agencies need only respond to significant environmental issues and do not need to provide all information requested by reviewers, as long as a good faith effort at full disclosure is made in the Focused EIR."*

CEQA Guidelines Section 15204(c) further advises:

> *"Reviewers should explain the basis for their comments, and should submit data or references offering facts, reasonable assumptions based on facts, or expert opinion supported by facts in support of the comments. Pursuant to Section 15064, an effect shall not be considered significant in the absence of substantial evidence."*

Section 15204(d) also states:

> *"Each responsible agency and trustee agency shall focus its comments on environmental information germane to that agency's statutory responsibility."*

Section 15204(e) states:

> *"This section shall not be used to restrict the ability of reviewers to comment on the general adequacy of a document or of the lead agency to reject comments not focused as recommended by this section."*

State CEQA Guidelines Section 15088 recommends that where a response to comment makes important changes in the information contained in the text of the Draft Focused EIR, the Lead Agency either revise the text of the Draft Focused EIR or include marginal notes showing that information. The Final Focused EIR for the Project has been prepared in accordance with CEQA. CEQA Guidelines Section 15132 indicates that the contents of a Final Focused EIR shall consist of:

- "The Draft Focused EIR or a revision of the draft;
- Comments and recommendations received on the Draft Focused EIR either verbatim or in summary;
- A list of persons, organizations, and public agencies commenting on the Draft Focused EIR;
- The responses of the Lead Agency to significant environmental points raised in the review and consultation process; and
- Any other information added by the Lead Agency."

The City has evaluated comments on environmental issues from persons who reviewed the Draft Focused EIR and has prepared a written response, pursuant to CEQA Guidelines Section 15088(a). Pursuant to CEQA Guidelines Section 15088(b), the City provided written responses to comments to any public agency that commented on the Draft Focused EIR, at least ten (10) days prior to the City Council consideration of certifying the Focused EIR as adequate under CEQA. Written responses to comments will also be provided to non-public agency individuals, organizations, and entities that commended on the Draft Focused EIR. In addition, the Final Focused EIR will be made available to the general public at the City's Planning Division office and on the City's website a minimum of 10 days prior to the City Council public hearing.

The Final Focused EIR, along with other relevant information and public testimony at the Planning Commission and City Council public hearings, will be considered by the City's Council.

1.4 CLARIFICATIONS, AMPLIFICATIONS AND MODIFICATIONS TO THE DRAFT FOCUSED EIR

Section 3.0, Errata to the Draft Focused EIR, details the proposed changes to the Draft Focused EIR. In response to public comments, text changes have been made to Draft Focused EIR sections to clarify and amplify the analysis or mitigation measures, and to make insignificant modifications to the Draft Focused EIR. This information does not rise to the level of significant new information as the resulting impact analysis and alternatives considered remain essentially unchanged, and no new or more severe impacts

have been identified. These changes do not warrant Draft Focused EIR recirculation pursuant to California Public Resources Code §21092.1 and CEQA Guidelines §15088.5.

CEQA Guidelines §15088.5 describes when a Focused EIR requires recirculation prior to certification, stating in part:

"(a) A lead agency is required to recirculate a Focused EIR when significant new information is added to the Focused EIR after public notice is given of the availability of the Draft Focused EIR for public review under Section 15087 but before certification. As used in this section, the term "information" can include changes in the project or environmental setting as well as additional data or other information. New information added to an Focused EIR is not "significant" unless the Focused EIR is changed in a way that deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the project or a feasible way to mitigate or avoid such an effect (including a feasible project alternative) that the project's proponents have declined to implement. "Significant new information" requiring recirculation include, for example, a disclosure showing that:

(1) A new significant environmental impact would result from the project or from a new mitigation measure proposed to be implemented.

(2) A substantial increase in the severity of an environmental impact would result unless mitigation measures are adopted that reduce the impact to a level of insignificance.

(3) A feasible project alternative or mitigation measure considerably different from others previously analyzed would clearly lessen the environmental impacts of the project, but the project's proponents decline to apply it.

(4) The Draft Focused EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded (Mountain Lion Coalition v. Fish and Game Com. (1989) 214 Cal.App.3d 1043).

(b) Recirculation is not required where the new information added to the Focused EIR merely clarifies or amplifies or makes insignificant modifications in an adequate Focused EIR."

As discussed herein and as elaborated upon in the respective Response to Comments, none of the clarifications or changes made in the Errata reflect a new significant environmental impact, a "substantial increase" in the severity of an environmental impact for which mitigation is not proposed, or a new feasible alternative or mitigation measure that would clearly lessen significant environmental impacts but is not adopted, nor do the Errata reflect a "fundamentally flawed" or "conclusory" Draft Focused EIR. In all cases, as discussed in individual responses to comments, master responses and Draft Focused EIR Errata, these minor clarifications and modifications do not identify new or substantially more severe environmental impacts that the City has not committed to mitigate. Here, the public has not been deprived of a meaningful opportunity to comment upon a substantial adverse environmental effect of the Project or an unadopted feasible Project alternative or mitigation measure. Instead, the information added supports the existing analysis and conclusions, and responds to inquiries made from commenters. Therefore, this Final Focused EIR is not subject to recirculation prior to certification.

Section 2.0 Comments and Responses to Draft Focused EIR

CEQA Guidelines Section 15088(a) states that: "The lead agency shall evaluate comments on environmental issues received from persons who reviewed the Draft Focused EIR and shall prepare a written response. The Lead Agency shall respond to comments that were received during the noticed comment period and any extensions and may respond to late comments." In accordance with these requirements, this section of the Final Focused EIR provides the City of Ontario's responses to each of the comments on the Draft Focused EIR received during the public comment period.

Comment letters and specific comments are given letters and numbers for reference purposes. Where sections of the Draft Focused EIR are excerpted in this document, the sections are shown indented. Changes to the Draft Focused EIR text are shown in underlined text for additions and strikeout for deletions.

The following is a list of agencies and persons that submitted comments on the Draft Focused EIR during the public review period: December 29, 2025, through February 12, 2026.

2.1 INTRODUCTION TO COMMENTS AND RESPONSES

Comments have been numbered as shown below, with responses to each comment following the respective comment letter.

Letter	Date Received	Organization/Name
Local		
L1	December 30, 2025	Mary Ann Ruiz
L2	February 13, 2026*	City of Chino *Warren Morelion, Director of Development Services*

Re: NOTICE OF AVAILABILITY OF A DRAFT FOCUSED ENVIRONMENTAL IMPACT REPORT Center Park Specific Plan Project State Clearinghouse No. 2025060731

Dear Rafael:

This letter is in response to an email regarding a Notice of Availability of a Draft Focused EIR for the Center Park Specific Plan. Thank you for giving the City of Chino the opportunity to review the information and provide comments. a

The City of Chino requests that the City of Ontario continue to comply with all mitigation measures outlined in The Ontario Plan (TOP) 2050 Mitigation Monitoring and Reporting Plan (MMRP) related to the Center Park Specific Plan area. We also ask that the City of Chino continues to be notified of public hearings pertaining to any legislative or entitlement actions related to the Center Park Specific Plan. b

If you have any questions, please contact Chris Cortez, Assistant Planner, by email at ccortez@cityofchino.org, or by phone at 909-334-3525. c

Sincerely,

Warren Morelion, AICP
Director of Development Services

Responses to Comment Letter L2 – City of Chino

Response L2 – a

Comment is introductory and general in nature and does not raise a significant environmental issue or concerns about the adequacy of the Draft Focused EIR. Therefore, no further action needed.

Response L2 – b

Comment is noted for the record. The comment makes no specific claim regarding the validity of the Draft Focused EIR. Pursuant to State CEQA Guidelines Section 15088(a), a lead agency is only required to evaluate and respond to comments raised on environmental issues, and thus no further response is necessary. The City of Ontario will coordinate with the City of Chino regarding the CenterPark Specific Plan. Therefore, no further revision to the analysis in the Draft Focused EIR is required.

Response L2 – c

This comment summarizes the comments that proceeded and does not raise a significant environmental issue or concerns about the adequacy of the Draft Focused EIR. As such, no further response is necessary.

RE: NOTICE OF AVAILABILITY (NOA) FOR THE CENTER PARK SPECIFIC PLAN DRAFT ENVIRONMENTAL IMPACT REPORT

Dear Mr. Torres:

Thank you for the opportunity to comment on the Notice of Availability (NOA) for the City of Ontario's Specific Plan Project Draft Environmental Impact Report (DEIR). Eastvale values its relationship with neighboring jurisdictions and is not opposed to development of this site; however, this project has the potential to generate traffic and air quality impacts in Ontario and Eastvale. The City of Eastvale offers the following comments for your consideration:

- **CEQA Guidelines Section 15183 Exemption Checklist:** The NOA states that the "DEIR and all documents referenced in the DEIR are available for public review" on the City's website. The CEQA Guidelines Section 15183 Consistency Analysis for the project is listed as Appendix F in the Draft Focused EIR. However, this document is not included in the appendices available on the City of Ontario's website. Please provide the 15183 Consistency Analysis for the City of Eastvale's review. a

- **Transportation:** Senate Bill 743 eliminates level of service (LOS) as a basis for determining significant transportation impacts under CEQA and provides a new performance metric, vehicle miles traveled (VMT). However, it is understood that the City of Ontario uses LOS to assess a project's consistency with TOP 2050 Mobility Element Policy M-1.5, and to determine project-specific transportation improvements. The City of Eastvale provided a comment on the NOP that the City of Ontario should consider the project's potential impact on Eastvale's maintained roadways and intersections. Based on our review, the Focused EIR did not analyze roadway and intersection impacts. As the 15183 Consistency Analysis is not provided, it is undetermined whether or not this analysis was conducted. The City of Ontario should consider the project's potential to impact City of Eastvale maintained roadways and intersections, mainly Limonite Avenue and Archibald Avenue. b

- **Cumulative Impacts:** Eastvale provided a comment on the NOP that the City of Ontario should consider and incorporate the City of Eastvale's recently adopted General Plan update ("Eastvale 2040") when reviewing cumulative effects of the specific plan. After reviewing the Draft Focused EIR, it appears the cumulative analysis did not incorporate Eastvale 2040. The City should consider Eastvale 2040 in its analysis of cumulative impacts. Eastvale 2040 is available on the City of Eastvale's website at: https://www.eastvaleca.gov/our-city/what-s-new/eastvale-2040. c

If needed, City of Eastvale staff would be happy to meet to discuss these comments, potential solutions that address concerns for both cities, and initiate dialogue concerning fare share costs for any potential mitigations. Please feel free to contact me at (951) 703-0488 or dmurray@eastvaleca.gov with any follow up. d

We look forward to working cooperatively with the City of Ontario on regional issues that affect our respective communities.

Sincerely,

David Murray
City Planner

Responses to Comment Letter L3 – City of Eastvale

Response L3 – a

Comment is noted for the record. The City has provided access for the CenterPark Specific Plan (File No. PSP24-002) Draft Focused Environmental Impact Report Appendix F: CEQA Guidelines 15183 Consistency Analysis, under "Center Park Specific Plan Draft Focused EIR Appendices 1b" on the City's website; see here for access: https://www.ontarioca.gov/government/community-development/planning/environmental-documents.

Response L3 – b

Comment is noted for the record. The City has provided access for the CenterPark Specific Plan (File No. PSP24-002) Draft Focused Environmental Impact Report Appendix F: CEQA Guidelines 15183 Consistency Analysis, under "Center Park Specific Plan Draft Focused EIR Appendices 1b" on the City's website; see here for access: https://www.ontarioca.gov/government/community-development/planning/environmental-documents. See Appendix I: Traffic Analysis of Appendix F, for the Project's potential impacts on roadways and intersections within the City of Eastvale. As shown in Table 1-3 of the Traffic Analysis, Archibald Avenue and Limonite Avenue were shown to perform at acceptable levels of service (LOS), until 2050 without and with Project, which forecast LOS deficiencies. Therefore, the recommended improvement strategies identified within the Traffic Analysis would be implemented to achieve acceptable LOS at these intersections. The Project responsibility towards these improvements is a fair share payment and implementing the recommended improvements needed to accommodate site access and maintain acceptable peak hour operations for the Project; see Table 1-4 of the Traffic Analysis for the recommended improvements.

Additionally, the City received the City of Eastvale's comment letter on July 14, 2025. The comments provided were addressed and included within the Draft Focused EIR Appendix F

Response L3 – c

On July 14, 2025, the City of Eastvale commented on the Project's Notice of Preparation (NOP) during the public scoping period for the Focused EIR. The comment is provided in Draft Focused EIR Appendix A: Notice of Preparation and Scoping Meeting Materials. The NOP comment states that: "The Focused EIR and CEQA Guidelines Section 15183 Exemption Analysis should describe potential cumulative impacts resulting from the proposed project together with all other reasonably foreseeable, planned, and approved future projects producing related or cumulative impacts. To that end, the DEIR should consider and incorporate the City of Eastvale's General Plan ("Eastvale 2040") when evaluating cumulative effects of the Specific Plan Amendment" (City of Eastvale, 2025). Pursuant to CEQA Guidelines Section 15183, an assessment of traffic within the Draft Focused EIR would only be required should there be substantial evidence that the Project may have a significant effect on that environmental resource. As discussed in the CEQA Guidelines Section 15183 Consistency Analysis, provided as Draft Focused EIR Appendix F, the Project is consistent with the land use and development intensity envisioned by the City's TOP 2050 Land Use Plan. Therefore, Project impacts concerning traffic were anticipated by the TOP 2050 Supplemental

EIR. As further described in Draft Focused EIR Appendix F, the Project would not result in any peculiar or cumulatively considerable traffic impacts beyond those analyzed in the TOP 2050 Supplemental EIR.

The commenter states the Draft Focused EIR appears to not have incorporated the Eastvale 2040 General Plan into the cumulative analysis. See Appendix I of the Draft Focused EIR Appendix F for analysis of cumulative impacts including the Project. A cumulative project list was developed for the purposes of the Traffic Analysis through consultation with planning and engineering staff from the City of Ontario and the neighboring jurisdictions of the City of Chino and City of Eastvale. The cumulative projects listed are those that would generate traffic and would contribute to study area intersections. Exhibit 4-6 of the Traffic Analysis illustrates the cumulative development location map. A summary of cumulative development projects and their proposed land uses are shown in Table 4.3 of the Traffic Analysis. Cumulative projects have been included for the long-range forecasts developed from San Bernardino County Transportation Analysis Model (SBTAM) based on a comparison of a project's location within a Transportation Analysis Zone (TAZ) and the current socio-economic data (SED) within the TAZ. The SED data was reviewed to ensure that the cumulative projects are accounted for within the traffic model.

Response L3 – d

This comment summarizes the comments that proceeded and does not raise a significant environmental issue or concerns about the adequacy of the Draft Focused EIR. As such, no further response is necessary.

Comment Letter T4 – Gabrieleño Band of Mission Indians – Kizh Nation

From: Andy Salas <admin@gabrielenoindians.org>
Sent: Thursday, January 8, 2026 4:52 PM
To: Rafael Torres <RTorres@ontarioca.gov>
Cc: Andy Salas <chairman@gabrielenoindians.org>; Sophia Pina <sophia_pina@gabrielenokizh.org>
Subject: Draft Focused EIR – Center Park SP Project | Tribal Consultation and Mitigation Measures

CAUTION – EXTERNAL SENDER

Dear Rafael,

Following a review of the Draft Focused Environmental Impact Report (EIR) for the Center Park SP Project, the Gabrieleño Band of Mission Indians – Kizh Nation notes that the document does not reference tribal consultation or include the mitigation measures previously submitted under AB 52. a

To ensure the accuracy of the administrative record, please provide clarification on the following:

1. Confirmation that the City received the Kizh Nation's substantial evidence and AB 52 mitigation measures transmitted on August 13, 2025. a
2. Whether the omission of the tribal consultation discussion and Kizh Nation mitigation measures from the Draft Focused EIR was intentional or inadvertent. b
3. The City's reasoning for not incorporating the Tribe's confirmed mitigation measures into the Draft Focused EIR, or an explanation of how and where the City intends to address them prior to certification. c

As consultation and agreed-upon mitigation measures are essential components of the CEQA record, their absence raises concerns regarding the completeness of the environmental document. d

We look forward to your prompt response to ensure this matter is addressed appropriately.

Best regards,
Sophia Pina

Office: 844-390-0787
website: www.gabrielenoindians.org [gabrielenoindians.org]

The region where Gabrieleño culture thrived for more than twelve thousand years encompassed most of Los Angeles County, more than half of Orange County and portions of Riverside and San Bernardino counties. It was the labor of the Gabrieleño who built the missions, ranchos and the pueblos of Los Angeles. They were trained in the trades, and they did the construction and maintenance, as well as the farming and managing herds of livestock. The Gabrieleño are the ones who did all this work, and they really are the foundation of the early economy of the Los Angeles area. That's a contribution that Los Angeles has not recognized--the fact that in its early decades, without the Gabrieleño, the community simply would not have survived.

Responses to Comment Letter T4 - Gabrieleño Band of Mission Indians – Kizh Nation

Response T4 – a

Comment noted for the record. The City evaluated the applicability of AB 52 consultation in connection with preparation of the Draft Focused EIR. Assembly Bill (AB) 52 dictates a government-to-government consultation process that applies at the project level when a project may result in a significant impact to Tribal Cultural Resources, as defined by Public Resources Code Section 21074. The Project's less than significant impacts related to Tribal Cultural Resources are analyzed in the Draft Focused EIR Appendix F: CEQA Guidelines Section 15183 Consistency Analysis. Additionally, the Project includes a Specific Plan and, as such, is subject to consultation requirements under Senate Bill (SB) 18, which applies to the adoption or amendment of general plans and specific plans.

As of August 13, 2025, the City of Ontario (City) received the Gabrieleño Band of Mission Indians – Kizh Nation's substantial evidence and requested mitigation measures. On August 13, 2025, the City followed up with the Gabrieleño Band of Mission Indians – Kizh Nation on the request to consult for the above Project (PSP-24-002) in the City. The City stated that on April 4, 2025, the City was able to complete consultation with Gabrieleno Band of Mission Indians – Kizh Nation under SB 18, referencing the provided mitigation measures utilized for a nearby project (Walker Ranch Specific Plan). The City asked if these same mitigation measures provided by the Gabrieleño Band of Mission Indians – Kizh Nation, could be utilized as part of this consultation request. On August 13, 2025, the Gabrieleño Band of Mission Indians – Kizh Nation responded, stating that the City can utilize the same mitigation measures used for the nearby project, for the CenterPark Project, and provided the same measures just titled with the correct project name.

Response T4 – b

Comment noted for the record. As discussed in Draft Focused EIR Section 4.2: Historic Resources, this section analyzes historic resources only, as impacts to archaeological and tribal cultural resources were determined to be adequately addressed in the City's TOP 2050 and associated Supplemental EIR ("TOP EIR"). Historic resources are cultural resources that are considered significant and eligible for listing on the California Register of Historical Resources (CRHR). Refer to Section 4.2.6: Impacts and Mitigation, for legal definitions and significance thresholds associated with historic resources. Archaeological resources, paleontological resources (which are the fossilized remnants of plants and animals), and Tribal Cultural Resources are analyzed in the Project's Draft Focused EIR Appendix F: CEQA Guidelines Section 15183 Consistency Analysis; see Draft Focused EIR Section 4.2: Historic Resources and Draft Focused EIR Appendix F: CEQA Guidelines Section 15183 Consistency Analysis, Sections 4.5: Cultural Resources and 4.18: Tribal Cultural Resources, for further information.

As discussed in the Draft Focused EIR Appendix F, in accordance with SB 18, the City sent Tribal consultation letters to the Native American Tribes, including the Gabrieleño Band of Mission Indians–Kizh Nation. The Gabrieleño Band of Mission Indians – Kizh Nation responded and has requested mitigation measures, in conformance with the mitigation requirements set forth in the TOP 2050 Supplemental EIR, be applied to the Project. The recommended mitigation measures provided by the Gabrieleño Band of Mission Indians – Kizh Nation are included as MM TCR-3 through MM TCR-5 within Appendix F. Project findings are consistent with those of TOP 2050. In compliance with State law, the mitigation measures

requested for inclusion by the Consulting Tribes are intended to implement the policies and mitigation requirements set forth in the TOP 2050 Supplemental EIR. No substantial new information has been identified which results in an impact which is new or substantially more severe than anticipated by the TOP 2050 Supplemental EIR, and feasible mitigation measures contained within or consistent with the TOP 2050 Supplemental EIR (MMs 5-3, 5-4, TCR-1, and TCR-2), would be applied to the Project.

Response T4 – c

See Response T4 – b above.

Response T4 – d

See Response T4-a and T4-b, above. As noted above, the City has imposed all requested mitigation measures consistent with the TOP 2050 Supplemental EIR on the Project.

RE: DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE CENTERPARK SPECIFIC PLAN DATED DECEMBER 24, 2025, STATE CLEARINGHOUSE NUMBER 2025060731

Dear Rafael Torres ,

The Department of Toxic Substances Control (DTSC) reviewed the Draft Environmental Impact Report (DEIR) for the CenterPark Specific Plan (Project). The Project consists of a Specific Plan to allow for residential and mixed-used retail/office development on 29 parcels covering approximately 257.34 acres. The development would include up to 250,919 square feet of commercial retail/office uses, up to 4,293 residential units across medium density and mixed-use residential uses, 67.26 acres of open space parkland/non-recreation uses and associated on-site and off-site infrastructure improvements. DTSC recommends and requests consideration of the following comments:

1. When agricultural crops and/or land uses are proposed or rezoned for residential use, several contaminants of concern (COCs) can be present. The Lead Agency shall identify the amounts of Pesticides and Organochlorine Pesticides (OCPs) historically used on the property. If present, OCPs requiring further analysis are dichloro-diphenyl-trichloroethane, toxaphene, and dieldrin. Additionally, any level

a

of arsenic present would require further analysis and sampling and must meet approved local area baselines or thresholds. If they do not, remedial action must take place to mitigate them below those thresholds. Additional COCs may be found in mixing/loading/storage areas, drainage ditches, farmhouses, or any other outbuildings and should be sampled and analyzed. If smudge pots had been routinely utilized, additional sampling for Polycyclic Aromatic Hydrocarbons and/or Total Petroleum Hydrocarbons may be required. These recommendations should be adhered to and become part of the environmental document. Please refer to the DTSC's Human and Ecological Risk Office (HERO) webpage for the most recent guidance and screening levels.

a cont.

2. DTSC recommends all imported soil/fill material be tested to ensure all COCs meet screening levels as outlined in DTSC's Preliminary Endangerment Assessment Guidance Manual. Furthermore, DTSC advises referencing the DTSC Information Advisory Clean Imported Fill Material Fact Sheet if importing soil/fill is necessary. To minimize the possibility of introducing contaminated soil/fill material, there should be documentation of the origins of the soil/fill material and, if applicable, sampling be conducted to ensure that the imported soil/fill material is suitable for the intended land use. The sampling should include analysis based on the source of the soil/fill and knowledge of prior land use.

b

3. The City of Ontario should consider soil testing as mentioned in comment #1. If, in the event any COC results are above DTSC residential screening levels, DTSC recommends the City of Ontario address the contaminations within the Project area through an Environmental Site Assessment and/or receive oversight from a self-certified local agency, DTSC or Regional Water Quality Control Board. If entering into one of DTSC's voluntary agreements, please note that DTSC uses a single standard Request for Lead Agency Oversight Application for all agreement types. Please apply for DTSC oversight using this link: Request for Agency Oversight Application. Submittal of the online application includes an agreement to pay costs incurred during agreement preparation. If you have any

c

questions about the application portal, please contact the relevant Regional Brownfield Coordinator for your Project.

c cont.

DTSC would like to thank you for the opportunity to comment on the DEIR for the CenterPark Specific Plan. Thank you for your assistance in protecting California's people and environment from the harmful effects of toxic substances. If you have any questions or would like clarification on DTSC's comments, please respond to this letter or via our CEQA Review email for additional guidance.

CAUTION – EXTERNAL SENDER

Dear Rafael Torres ,

The Department of Toxic Substances Control (DTSC) reviewed the Draft Environmental Impact Report (DEIR) for the CenterPark Specific Plan. Attached are DTSC's comments for consideration.

DTSC would like to thank you for the opportunity to comment on the DEIR for the CenterPark Specific Plan. Thank you for your assistance in protecting California's people and environment from the harmful effects of toxic substances.

Responses to Comment Letter S1 – California Department of Toxic Substances Control

Response S1 – a

A Phase I Environmental Site Assessment (ESA) was completed in March 2025 for the Ownership Area 1 development area in accordance with most recent guidelines and screening levels provided by the Department of Toxic Substances Control at the time of completion. As identified in the Draft Focused EIR Appendix F: CEQA Guidelines Section 15183 Consistency Analysis, the amount of OCPs historically used on the property were recorded and documented within Appendix F: Phase I Environmental Site Assessment of Draft Focused EIR Appendix F. Ownership Area 2 is being evaluated only at a programmatic level based on available information from TOP 2050, and there are no specific development proposals at this time.

For Ownership 1, limited soil sampling was conducted and reported slightly elevated levels of dieldrin. However, it was determined that clearing and grading of the property would reduce the dieldrin level below screening levels, therefore unrestricted use of the property is warranted. Therefore, the Project's impacts with respect to Ownership Area 1 would be within the limit of impacts identified in the TOP 2050 Supplemental EIR.

Response S1 – b

Comment noted for the record. As discussed in the Draft Focused EIR Appendix F: CEQA Guidelines Section 15183 Consistency Analysis, earthwork for the Project would include grading, trench excavation, pipe subgrade preparation, pipeline bedding placement and trench backfill, as well as roadway pavement construction; see Appendix E: Geotechnical Investigation of Draft Focused EIR Appendix F. The Project is required to adhere to the recommendations listed within Appendix E, on treatment of imported soil/fill material and outlines procedures for the fill material ensuring it suitability for the intended land use. These recommendations are incorporated as Conditions of Approval. See Section 3.0: Errata of the Final Focused EIR.

Response S1 – c

See Response S1-a above. A Phase I Environmental Site Assessment was completed for Ownership Area 1 of the Project site and soil testing was conducted; see Appendices E and F to Draft Focused EIR Appendix F. Trace to low concentrations of OCPs were detected in the sampled locations, below residential screening levels, except for one location which reported slightly elevated dieldrin. However, considering this was an isolated area, the clearing and grading of the property was determined to reduce the dieldrin level below screening levels.

Response S1 – d

This comment summarizes the comments that proceeded and does not raise a significant environmental issue or concerns about the adequacy of the Draft Focused EIR. As such, no further response is necessary.

To: Rafael Torres <RTorres@ontarioca.gov>
Cc: Thomas Lambertson <TLambertson@ontarioca.gov>
Subject: RE: City of Ontario, Central Park Specific Plan, Specific Reservoir, Well, and Treatment Water System Infrastructure analysis

CAUTION – EXTERNAL SENDER

Rafael,

Thanks for this information!

The Central Park Specific Plan Environmental Impact Report mentions that as a part of the Backbone Infrastructure, the master planned 925 PZ reservoir shall be constructed on the City-owned reservoir site as directed by the City (PDF page 43). And well supply and any drinking water treatment necessary for the 925 PZ shall be constructed to supply the 925 PZ reservoir (PDF page 43).

The well and treatment location and number was unspecified, but it seems like construction and operation of this infrastructure (925 Reservoir, well, and treatment) would be further analyzed in your City's City of Ontario Water, Recycled Water, Sewer, and Drainage Master Plans Updates, MND now in circulation here: https://ceqanet.lci.ca.gov/2025120702 [ceqanet.lci.ca.gov]

Please let me know if that is not otherwise the case or if this infrastructure's construction and operation has been analyzed or will be analyzed in another document.

Thanks!

Lori Schmitz

Caution: External Email. Use caution when clicking links or opening attachments. When in doubt, contact DIT or use the Phish Alert Button.

Hello Lori,

1

Pursuant to California Code of Regulations Section 15063(a), an Initial Study is not required for a project where an agency has decided to prepare an EIR. Additionally, the City used a CEQA Guidelines Section 15183 environmental checklist to document how other environmental topics (with the exception of historic resources and biological resources) are adequately addressed in the City's TOP 2050 EIR and are therefore not necessary to address in the Draft Focused EIR.

Below is the link to the documents associated with the Project (CenterPark Specific Plan).

https://ceqanet.lci.ca.gov/2025060731/2 [ceqanet.lci.ca.gov]

Under attachment *CenterPark Specific Plan Draft Focused EIR Appendices*, direct to **Appendix F - CEQA Guidelines Section 15183 Consistency Analysis** (Page 1983) of the document.

Let me know if you have any further questions.

Sincerely,

Rafael Torres

CAUTION – EXTERNAL SENDER

Rafael,

The City of Ontario circulated a Notice of Preparation through the State Clearinghouse for the Center Park Specific Plan. The initial study was not attached to the circulation. The City is now circulating the EIR but still has not attached the initial study for the Project.

Please send me the initial study for the Central Park Specific Plan.

Thanks!

Lori Schmitz

Responses to Comment Letter S2 – State Water Resources Control Boards

Response S2 – a

Comment noted for the record. The construction and operation of required water infrastructure is analyzed within the City's Water Master Plan Update, for which an MND is now in circulation (State Clearinghouse #2025120702). These are regional facilities for which the Project will be contributing fair share/fees (addressed in the City's Development Agreement with the Project Applicant). Further, the Euclid Mixed Use Specific Plan EIR (State Clearinghouse #2023020281), along with the broader The Ontario Plan 2050 Supplemental EIR, addresses connections to the 925 PZ reservoir. As determined in the City's Water, Recycled Water, Sewer, and Drainage Master Plans Updates Initial Study and Mitigated Negative Declaration (IS/MND), impacts to utilities were determined to have a less than significant impact.

Dear Mr. Torres:

CENTERPARK SPECIFIC PLAN (PSP24-002) (PROJECT)
DRAFT FOCUSED ENVIRONMENTAL IMPACT REPORT (DFEIR)
SCH# 2025060731

The California Department of Fish and Wildlife (CDFW) received a Notice of Availability of a DEIR from the City of Ontario for the Project pursuant the California Environmental Quality Act (CEQA) and CEQA Guidelines.[1] CDFW previously submitted comments in response to the Notice of Preparation of the DEIR.

Thank you for the opportunity to provide comments and recommendations regarding those activities involved in the Project that may affect California fish and wildlife. Likewise, we appreciate the opportunity to provide comments regarding those aspects of the Project that CDFW, by law, may be required to carry out or approve through the exercise of its own regulatory authority under the Fish and Game Code.

CDFW ROLE

CDFW is California's **Trustee Agency** for fish and wildlife resources and holds those resources in trust by statute for all the people of the State. (Fish & G. Code, §§ 711.7, subd. (a) & 1802; Pub. Resources Code, § 21070; CEQA Guidelines § 15386, subd. (a).) CDFW, in its trustee capacity, has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species. (*Id.*, § 1802.) Similarly, for purposes of CEQA, CDFW is charged by law to provide, as available, biological expertise during public agency environmental review efforts, focusing specifically on projects and related activities that have the potential to adversely affect fish and wildlife resources. a

CDFW is also submitting comments as a **Responsible Agency** under CEQA. (Pub. Resources Code, § 21069; CEQA Guidelines, § 15381.) CDFW expects that it may need to exercise regulatory authority as provided by the Fish and Game Code. As proposed, for example, the Project may be subject to CDFW's lake and streambed alteration regulatory authority. (Fish & G. Code, § 1600 et seq.) Likewise, to the extent implementation of the Project as proposed may result in "take" as defined by State law of any species protected under the California Endangered Species Act (CESA) (Fish & G. Code, § 2050 et seq.), the project proponent may seek related take authorization as provided by the Fish and Game Code.

PROJECT DESCRIPTION SUMMARY

Location: The Project site is located on 29 existing parcels totaling 257.34 acres in the southwestern portion of the City of Ontario, in San Bernardino County. The proposed Project site is bound to the north by a Southern California Edison (SCE) easement located approximately 330 feet north of Edison Avenue, Walker Avenue on the east, Eucalyptus Avenue on the south, Campus Avenue on the west, and bisected by Edison Aveue.

Project Description: The Project consists of a Specific Plan to allow for a residential and mixed-used retail/office development across 29 parcels and 22 planning

[1] CEQA is codified in the California Public Resources Code in section 21000 et seq. The "CEQA Guidelines" are found in Title 14 of the California Code of Regulations, commencing with section 15000.

areas within a 257.24-acre site. The Project site is comprised of two "Ownership Areas". Ownership Area 1 of the Project includes Planning Areas 5 and 7 through 18, which would allow for the development of up to 3,095 residential dwelling units, 210,544 square feet of mixed-use commercial/retail uses, and 55.98 acres of open-space parkland and non-recreational uses. Ownership Area 2 of the Project includes Planning Areas 1 through 4, 6, and 19 through 22, which would allow for the development of up to 1,198 residential dwelling units and 11.28 acres of open-space parkland and non-recreational uses. No development has been proposed for Planning Areas within Ownership Area 2 at this time and are anticipated to be developed at a future date.

a cont.

Timeframe: Anticipated timeline: 2026 - 2029

COMMENTS AND RECOMMENDATIONS

CDFW offers the comments and recommendations below to assist the City of Ontario in adequately identifying and/or mitigating the Project's significant, or potentially significant, direct and indirect impacts on fish and wildlife (biological) resources. Editorial comments or other suggestions may also be included to improve the document.

Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by CDFW or USFWS?

COMMENT 1: Table 4.1-2: Special Status Wildlife Species Potentially Occurring in the Site Vicinity

Section #4.1.2 Environmental Setting, Page # 4.1-6 - 4.1-10

Issue: The DFEIR does not accurately identify the status of certain special-status wildlife species that the Project may have a significant, or potentially significant, impacts on.

Specific impact: Table 4.1-2 depicting the special-status wildlife species that have the potential to occur on the Project site has incorrect status listings for multiple species. The following species have an incorrect Federal or State Status listed: Burrowing owl (*Athene cunicularia*), Northerwestern San Diego pocket mouse (*Chaetodipus fallax fallax),* San Bernardino kangaroo rat *(Dipodomys merriami parvus),* Stephens' kangaroo rat *(Dipodomys stephens), and* San Diego black-tailed jackrabbit *(Lepus californicus bennettii).*

b

The above species' incorrect status listing may result in inadequate analysis of certain species and/or may result in a less meaningful consideration of significant impacts to the special-status wildlife species under CEQA.

Evidence impact would be significant: Compliance with CEQA is predicated on a complete and accurate description of the environmental setting that may be affected by the proposed Project. CDFW is concerned that the assessment of the existing environmental setting with respect to special-status wildlife species has not been adequately analyzed in the DFEIR. Consistent with CEQA Guidelines, Section 15380, Cal. Code Regs., tit. 14, § 670.5 and Title 50, Code of Federal Regulations Sections 17.11 or 17.12, the status of certain species under the California Endangered Species Act (Fish & G. Code, § 2050 *et seq.*) and Federal Endangered Species Act qualifies those species as an endangered, rare, or threatened species under CEQA.

Recommended Revision: CDFW recommends the list be reassessed and updated. Specifically, CDFW recommends the following revisions: update burrowing owl to be identified as a Candidate species pursuant to CESA, remove state status of Species of Special Concern from Northwestern San Diego pocket mouse and San Diego black-tailed jackrabbit, update San Bernardino kangaroo rat to be identified as an Endangered species pursuant to CESA, and update Stephens' kangaroo rat to be

identified as a Federally Threatened species under the Federal Endangered Species Act (in addition to its status under CESA). b cont.

COMMENT 2: California Endangered Species Act

Section 4.1.3, Regulatory Setting, Page 4.1-13

Issue: The DFEIR does not adequately identify the Project's significant, or potentially significant, impacts to species pursuant to the California Endangered Species Act.

Specific impact: The DFEIR's California Endangered Species Act paragraph states that, "CESA does not include listing provisions for invertebrate species". On May 31, 2022, California's Third District Court of Appeal issued a published opinion reversing the judgement of Almond Alliance of California et al. v. Fish and Game Commission et al. The appeal determined that invertebrate species may be listed as endangered or threatened species under CESA. Invertebrate species, specifically those that fall under CESA protection, have not been identified and discussed in this Draft Focused Environmental Impact Report (DFEIR) and thus were not thoroughly reviewed nor surveyed within the proposed Project area. Table 4.1-2 of the DFEIR does correctly list the status of Crotch's bumble bee as a state candidate, but it is not discussed elsewhere within the remaining document. The Project may result in temporal or permanent, and potentially significant, impacts to invertebrate species listed under CESA.

Certain invertebrate species, such as Crotch's bumble bee (*Bombus crotchii*), have been granted CESA candidacy under the 2022 appeal and therefore receive the same protections as threatened and endangered species. As mentioned in the 2025 CDFW comment letter to the NOP for this Project, there are documented sightings of Crotch's bumble bee near the proposed Project area. However, the only mention of Crotch's bumble bee is in Table 4.1-2 and it presumes the species to have no potential for occurrence because of the lack of suitable food sources. Because of the incorrect statement of invertebrate species under the Regulatory Setting of the DFEIR, certain species may not have been correctly identified as Special-Status Wildlife Species and therefore, were not fully analyzed and surveyed to determine if the project would have a substantial adverse effect on the species. Lastly, Crotch's bumble bee are generalist foragers documented to use a wide variety of flowering plants for their nectar and pollen sources. If flowering vegetation exists within the Project area, there is suitable foraging habitat for Crotch's bumble bee. c

Evidence impact would be significant: Compliance with CEQA is predicated on a complete and accurate description of the environmental setting that may be affected by the proposed Project. CDFW is concerned that the assessment of the existing environmental setting with respect to species pursuant CESA has not been adequately analyzed in the DFEIR due to its inaccuracy.

The California Court of Appeal ruled in *Almond All. Of California v. Fish and Game Comm'n* (2022),79 Cal.App.5th 337,336 (Case No.C093542) that, "the Commission may list any invertebrate as an endangered or threatened species under [Fish and Game Code sections] 2062 and 2067, if the invertebrate meets the requirements of those statues, and thus may also designate any invertebrate as a candidate species under section 2068, if the species or subspecies may otherwise qualify as endangered or threated species". Take of any endangered, threatened, or candidate species that results from the Project is prohibited, except as authorized by State law (Fish & G. Code, §§ 86, 2062, 2067, 2068, 2080, 2085; Cal. Code Regs., tit. 14, § 786.9). Consistent with CEQA Guidelines, Section 15380, and Cal. Code Regs., tit. 14, § 670.5, the status of the certain invertebrate species under the California Endangered Species Act (Fish & G. Code, § 2050 *et seq.*) qualifies those species as an endangered, rare, or threatened species under CEQA. Inadequate avoidance, minimization, and mitigation measures for impacts to sensitive or special status species could result in the Project having a substantial adverse direct, indirect, and cumulative

effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species by CDFW.

Recommended Revision: CDFW recommends that the DFEIR revise the California Endangered Species Act section of the Regulatory Setting, 4.1.3, to include invertebrate species. CDFW also recommends that a habitat assessment and species-specific surveys be conducted for CESA invertebrate species that may occur within the proposed Project area. If invertebrate species are detected, an impact analysis, along with the appropriate minimization and avoidance measures should be included in the FDEIR. If invertebrate species under CESA cannot be fully avoided, Project activities shall be postponed until appropriate authorization (i.e., a finalized CESA ITP under Fish and Game Code section 2081) is obtained. c cont.

COMMENT 3: Biological Resource Survey

Section # 4.1.4, Impact Thresholds and Significance Criteria, Page # 4.1-17

Issue: The DFEIR does not adequately identify the Project's significant, or potentially significant, impacts to biological resources.

Specific impact: The DFEIR analysis and conclusion relies on one general reconnaissance level survey of the Project site to identify special status species, vegetation communities, and habitats that could support special status species.

Per the *Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Natural Communities* (CDFW, March 2018)[2], botanical field survey visits should be spaced throughout the growing season and multiple visits to the project area are usually required to capture the floristic diversity at a level necessary to determine the presence of special-status plant species. The 2024 June general field investigation of Ownership Area 1 was outside the bloom period, and towards the end of the bloom period, for several of the special-status plant species.

CDFW is concerned that the singular field investigation on June 13, 2024, is insufficient in timing and outdated, and thus is inadequate to rely upon to properly identify special status species, vegetation communities, and habitats that support special status wildlife and may not reflect current occupancy of sensitive or listed species. d

CDFW maintains, as noted in the Center Park Specific Plan NOP Comment Letter, that focused species-specific surveys should be conducted by a qualified biologist at the appropriate time of year and day when the sensitive species are active or otherwise identifiable. In addition to rare plants and sensitive vegetation communities, species-specific surveys should be conducted for special status species that may occur within the Project site, including burrowing owl, Crotch's bumblebee, and tricolored blackbird.

Recent surveys during the appropriate times of the year are needed to identify potential impacts to biological resources; inform appropriate avoidance, minimization, and mitigation measures; and determine whether impacts to biological resources have been mitigated to a level that is less than significant. Additionally, the DFEIR should acknowledge that if any areas within the Project site are left vacant or left graded and inactive in the interim period between construction phases, environmental conditions may change. Grading and leaving a site inactive may result in the area becoming occupied by wildlife that utilize disturbed areas.

The lack of focused surveys does not provide the DFEIR an adequate biological baseline due to its inadequate plant and wildlife inventory, observation of migratory birds that utilize the site, and observation of nesting or breeding species that utilize the site. Additionally, the lack of focused surveys hinders the analysis of impacts to special-status species. Reconnaissance surveys can be used to gather general information

[2] California Department of Fish and Wildlife. March 20, 2018. Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities. Special Status Native Plant Populations and Sensitive Natural Communities (ca.gov).

about habitat, but it should not be used to determine the presence or absence of candidate, sensitive, or special status species. The failure to locate a known special status species occurrence during one field season does not constitute evidence that the species' occurrence no longer exists at a location, particularly if adverse conditions are present.

Evidence impact would be significant: Compliance with CEQA is predicated on a complete and accurate description of the environmental setting that may be affected by the proposed Project. CDFW is concerned that the assessment of the existing environmental setting with respect to biological resources has not been adequately analyzed in the DFEIR. Impacts to special status species should be considered significant under CEQA unless they are clearly mitigated below a level of significance. Without an accurate biological baseline of present candidate, sensitive, or special status species and the delay in development of species avoidance, minimization, and mitigation measures, it is unclear if the mitigation measures proposed to be implemented for the Project will avoid, minimize, or mitigate the impacts to a level below significant adverse effect

Recommended Potentially Feasible Mitigation Measure(s) to reduce impacts to less than significant: CDFW recommends the inclusion of the following new mitigation measure, BIO-6 in the DFEIR (edits are in bold):

Mitigation Measure MM BIO-6 (New):

Prior to commencing ground-disturbing activities within the Center Park Specific Plan, including staging and storage, a complete and recent inventory will be completed, including rare, threatened, endangered, and candidate species, Species of Special Concern (SSC) and California Fully Protected Species (Fish and Game Code § 3511), and any other species not included in a specific listing but that can be shown to meet the criteria of a rare or endangered species (CEQA Guidelines § 15380), for which suitable habitat is present within or adjacent to the Project. The inventory should address seasonal variations in use of the Project area and should not be limited to resident species. Focused species-specific surveys, completed by a qualified biologist and conducted at the appropriate time of year and time of day when the sensitive species are active or otherwise identifiable are required. Acceptable species-specific survey procedures should be developed in consultation with CDFW and the U.S. Fish and Wildlife Service, where necessary. Note that CDFW generally considers biological field assessments for wildlife to be valid for a one-year period, and assessments for rare plants may be considered valid for a period of up to three years. Some aspects of the proposed Project may warrant periodic updated surveys for certain sensitive taxa, particularly if the Project is proposed to occur over a protracted time frame, or in phases, or if surveys are completed during periods of drought.

d cont.

COMMENT #4: Burrowing Owl (*Athene cunicularia)*

Section 4.1.6, Impacts and Mitigation Measures, Page 4.1-21 – 4.1-25

Issue: The DFEIR does not adequately identify the Project's significant, or potentially significant, impacts to burrowing owl.

Specific impact: The 2025 DFEIR includes impacts to biological resources identified in the biological report prepared by Cadre Environmental in 2024. However, the DFEIR fails to update burrowing owl (BUOW) as a candidate species under the California Endangered Species Act (CESA) in the DFEIR's following sections: Special-Status Wildlife Species, Impact Thresholds and Significance Criteria, Impacts and Mitigation Measures, and Cumulative Impacts. Specifically, Pg. 4.1-22 of the DFEIR states that, "While the species [BUOW] is not protected by state or federal endangered species acts…" which is contradictory to BUOW's current status as a candidate species under

e

CESA. CDFW is concerned that the DFEIR does not adequately assess impacts to BUOW as a CESA candidate species and is also concerned that the associated mitigation measures were not updated to reflect BUOW's CESA candidacy status.

CDFW agrees with the consultant's analysis that BUOW has a moderate potential for occurring on the Project site. However, CDFW is concerned that the single field investigation on June 13, 2024 did not adequately account for potential burrowing owl on site and that the survey is outdated to reflect current potential occupancy. Burrowing owls frequently move into disturbed areas since they are adaptive to highly modified habitats[3,4]. Focused surveys for the species following a CDFW approved guideline, or similar approach, were not conducted prior to the release of the DFEIR and therefore the DFEIR does not adequately analyze impacts, nor provide adequate minimization and mitigation measures, to the candidate species which is afforded the same protections of an endangered or threatened species under CESA.

As noted in the DFEIR, BUOW use predominantly open land such as grassland, agriculture, and play habitats, and can often occur in less than optimal habitat. The 2024 Biological Resource Technical Report noted that suitable burrows larger than 4 inches in diameter and foraging habitat for BUOW were documented within and adjacent to the east of Ownership Area 1. The DFEIR, under MM BIO-4, states that 4 focused BUOW surveys will be conducted prior to construction, anticipated to begin 2026, between the months of February and July. While CDFW agrees that focused surveys should be conducted prior to construction, this level of surveys should also be conducted in advance of the CEQA document to aid in the determination of impacts and to identify appropriate and commensurate mitigation.

The current Mitigation Measure BIO-4 (MM BIO-4) will not adequately reduce impacts to BUOW to less than significant. Given the proposed Project activities, anticipated timeline, and current minimization measures, to the Project may not be able to fully avoid take as defined in Fish and Game Code section 86.

e cont.

Evidence impact would be significant: Compliance with CEQA is predicated on a complete and accurate description of the environmental setting that may be affected by the proposed Project. CDFW is concerned that the assessment of the existing environmental setting with respect to burrowing owl has not been adequately analyzed in the DFEIR.

On October 10, 2024, the California Fish and Game Commission accepted a petition to list Western Burrowing Owl as endangered under CESA, determining the listing "may be warranted" and advancing the species to the candidacy stage of the CESA listing process. As a candidate species, Western Burrowing Owl is granted full protection of a threatened species under CESA. If Project activities could result in take, appropriate CESA authorization (i.e., Incidental Take Permit under Fish and Game Code section 2081) should be obtained prior to commencement of Project activities. Take of any endangered, threatened, or candidate species that results from the Project is prohibited, except as authorized by State law (Fish & G. Code, §§ 86, 2062, 2067, 2068, 2080, 2085; Cal. Code Regs., tit. 14, § 786.9). Take of individual burrowing owls and their nests is defined by Fish and Game Code section 86, and prohibited by sections 3503, 3503.5 and 3513. Inadequate avoidance, minimization, and mitigation measures for impacts to sensitive or special status species could result in the Project having a substantial adverse direct, indirect, and cumulative effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species by CDFW.

Recommended Potentially Feasible Mitigation Measure to reduce impacts to less than significant: CDFW recommends that prior to adoption of the DFEIR, focused

[3] Chipman, E. D., N. E. McIntyre, R. E. Strauss, M. C. Wallace, J. D. Ray, and C. W. Boal. 2008. Effects of human land use on western burrowing owl foraging and activity budgets. Journal of Raptor Research 42(2): 87-98.
[4] Coulombe, H. N. 1971. Behavior and population ecology of the Burrowing Owl, *Speotyto cunicularia*, in the Imperial Valley of California. Condor 73:162–176

breeding and non-breeding surveys for burrowing owl be conducted on the Project site by a qualified biologist to establish the environmental baseline of resident and migratory individuals. It is important to note that according to the 2012 Staff Report, passive relocation (also known as exclusion) is not a take avoidance, minimization, or mitigation method and is considered a potentially significant impact under CEQA. Because appropriate focused surveys were not conducted prior to circulation of the DFEIR, the DFEIR may not adequately identify potentially significant impacts. CDFW recommends the DFEIR be revised and recirculated following completion of surveys so that results and appropriate specific avoidance, minimization, and mitigation measures can be included, to ensure that impacts to burrowing owls are reduced to less than significant. However, if the City chooses not to follow this path, CDFW recommends the following revisions to MM BIO-4 (edits are in ~~strikethrough~~ and **bold**) to ensure an adequate assessment is completed and CESA authorization is obtained, if needed. If the DSEIR is recirculated without addressing these mitigation concerns, CDFW recommends the impact analysis to BUOW be elevated to Potentially Significant Impacts.

e cont.

Mitigation Measure # BIO-4:

Focused and Preconstruction Burrowing Owl Surveys. Focused surveys for burrowing owl will be conducted in accordance with the March 7, 2012~~2~~2, CDFW staff report on Burrowing Owl Mitigation **prior to vegetation removal or ground-disturbing activities for all phases of Project construction.** Specifically, a total of four (4) surveys will be conducted: 1) at least one site visit between February 15th and April 15th, and 2) a minimum of three (3) surveys, at least three weeks apart, between April 15th and July 15th, with at least one visit after June 15th. A report of the findings prepared by a qualified biologist shall be submitted to the City of Ontario prior to any permit or approval for ground disturbing activities. **The Designated Biologist shall provide CDFW a GIS or KMZ map of BUOW burrow complex(es) and atypical burrows (e.g. culverts, buckled concrete, etc.) The map shall be at a scale of 1:24,000 or finer to show details and shall show locations of all BUOW sightings and labeled if sightings were potential burrows, occupied burrows, satellite burrows, areas of concentrated burrows, and BUOW sign. Locations documented by use of GPS coordinates must be collected in NAD83 datum. The map shall include an outline of the Project Area, a title, north arrow, scale bar, and legend.**

A 14-day burrowing owl preconstruction survey will also be conducted immediately prior to the initiation of ground-disturbing construction to ensure protection for this species. The survey will be conducted in compliance with CDFW guidelines (CDFW 2012). A report of the findings prepared by a qualified biologist shall be submitted to the City of Ontario prior to any permit or approval for ground disturbing activities.

~~If burrowing owls are detected on-site during the focused surveys or 14-day preconstruction survey efforts, during the breeding season (February 1st to August 31st) then construction activities shall be limited to beyond 300 feet of the active burrows until a qualified biologist has confirmed that nesting efforts are complete or not initiated. In addition to monitoring breeding activity, if construction is proposed to be initiated during the breeding season or active relocation is proposed, a burrowing owl relocation plan will be developed and approved by the City of Ontario, CDFW and USFWS.~~

If burrowing owl occupancy is confirmed, and if Project activities may impact burrowing owl, including burrow exclusion and closure, the Project Proponent shall begin early coordination with CDFW for appropriate CESA authorization (i.e., Incidental Take Permit (ITP) under Fish and Game Code section 2081) prior to commencement of Project activities. The ITP application shall describe, at a minimum, project activities and equipment, proposed avoidance/buffers, temporary and permanent impacts, monitoring, relocation and/or translocation, and minimization and compensatory mitigation actions. ITP compensatory mitigation will be fulfilled by one or more of following options: 1) Permittee-

responsible mitigation land acquisition or 2) Conservation or Mitigation Bank credits (if available).

e cont.

COMMENT # 5: Crotch's bumble bee (*Bombus crotchii*)

Section 4.1.6, Impacts and Mitigation Measures

Issue: The DFEIR does not adequately identify the Project's significant, or potentially significant, impacts to Crotch's bumble bee.

Specific impact: Crotch's bumble bee was not identified as a CESA candidate species within the DFEIR and was not specifically surveyed for prior to the distribution of the DFEIR. CDFW is concerned that the DFEIR does not sufficiently identify potential Project impacts to Crotch's bumble bee and does not provide appropriate mitigation measures to fully mitigate impacts to less than significant. The Project has the potential to result in take of Crotch's bumble bee and has the potential to cause permanent or temporary loss of Crotch's bumble bee habitat.

Table 4.1-2 concludes that the species has no potential to occur on-site based on the assumed lack of suitable food sources and heavily disturbed conditions. CDFW notes that there are 2 CNDDB occurrences for crotch's bumble bee within 1 mile of the project area. A queen's dispersal distance averages around 10 km (6.2 miles)[5,6,7] and the foraging range for bumble bee's is averaged at roughly 1-2 km (0.62-1.24 miles) from the nest in a single trip[8,9,10]. As noted in comment #3 above, CDFW is concerned that the general field investigation conducted in June 2024 may not have thoroughly inspected the area for both Crotch's bumble bee and the plants the species relies upon for habitat and therefore a full impact analysis, and associated mitigation measures are not included in the DFEIR. Project activities may result in take of Crotch's bumble bee from collapsing burrows, entombment, displacement, dust from Project operations, and vegetation removal that reduces foraging and nesting habitat. The Projects DFEIR's lack of impact analysis and associated mitigation measures may result in significant impacts to Crotch's bumble bee under CEQA.

f

Crotch's bumble bee occurs primarily in California, including the Mediterranean region, Pacific Coast, Western Desert, Great Valley and adjacent to foothills through most of southwestern California[11]. Crotch's bumble bee are generalist foragers and have been reported visiting a wide variety of flower plants. The plant families most commonly associated with Crotch's bumble bee observations or collections from California include Fabaceae, Apocynaceae, Asteraceae, Lamiaceae, Boraginaceae and Asclepiadaceae. This is not a comprehensive list, and the species has been observed foraging and utilizing areas with high levels of disturbance and nonnative plant species. Ground disturbance (e.g., trenching, grading, soil compaction, and earth-moving activities) and vegetation removal have the potential to destroy Crotch's bumble bee burrows. Additionally, these activities create elevated levels of noise, human activity, dust, ground vibrations, and vegetation disturbance which may also impact the species if found within the Project site.

Evidence impact would be significant: Compliance with CEQA is predicated on a complete and accurate description of the environmental setting that may be affected by the proposed Project. CDFW is concerned that the assessment of the existing environmental setting with respect to Crotch's bumble bee has not been adequately analyzed in the DFEIR. Crotch's bumble bee is a candidate species for listing under CESA; therefore, it receives the same legal protection afforded to endangered or threatened species under CESA pursuant to Fish & G. Code §§ 2074.2 & 2085. If found on-site, the Project could result in crushing or killing Crotch's bumble bees, reduction in sufficient food resources such as nectar and pollen, and/or removal of nesting and overwintering sites. Many bumble bee species, once common in the western United States, have undergone a dramatic decline in both distribution and abundance and are now extirpated from much of their historic ranges[12]. Many bumble bees are threatened with extinction due primarily to reductions in habitat from urbanization, intensive agriculture, and invasive species introductions[13]. If Crotch's bumble bee occurs at the Project site and Project impacts to Crotch's bumble bee occur, this could result in a substantial reduction in the species' population, which could be a significant impact. f cont.

Recommended Potentially Feasible Mitigation Measure to reduce impacts to less than significant: CDFW recommends the inclusion of the following new mitigation measure, BIO-7 in the DFEIR to ensure an adequate assessment is completed and CESA authorization is obtained, if needed

Mitigation Measure #: BIO-7 (New)

(MM-BIO 7.1) A qualified entomologist familiar with the species behavior and life history shall conduct surveys to determine the presence/absence of Crotch's bumble bee. Surveys should follow CDFW's *Survey Considerations for California Endangered Species Act (CESA) Candidate Bumble Bee Species*[14]. If no CESA-protected bumble bees are found during the surveys, but the habitat assessment identified suitable nesting, foraging, or overwintering habitat within the project site, it is recommended that a biological monitor be onsite during vegetation or ground disturbing activities that take place during any of the Queen and Gyne flight Period and Colony Active Period to ensure continued avoidance of this hjghly mobile species. Survey results, including negative findings, should be submitted to CDFW prior to implementing Project-related ground disturbing activities. At minimum, a survey report should provide the following:

a) A description and map of the survey area, focusing on areas that could provide suitable habitat for Crotch's bumble bee. CDFW recommends the map show surveyor(s) track lines to document that the entire site was covered during field surveys.

b) Field survey conditions that should include name(s) of qualified entomologist(s) and brief qualifications; date and time of survey; survey duration; general weather conditions; survey goals, and species searched.

c) Map(s) showing the location of nests/colonies.

d) A description of physical (e.g., soil, moisture, slope) and biological (e.g., plant composition) conditions where each nest/colony is found. A sufficient description of biological conditions, primarily impacted habitat, should include native plant composition (e.g., density, cover, and abundance) within impacted habitat (e.g., species list separated by vegetation class; density,

[12] Hatfield, R., Jepsen, S., Foltz Jordan, S., Blackburn, M., Code, Aimee. 2018. A Petition to the State of California Fish and Game
Commission to List Four Species of Bumblebees as Endangered Species
[13] Ibid

Act (CESA) Candidate Bumble Bee Species.

cover, and abundance of each species).

(MM-BIO- 7.2) If Crotch's bumble bee is detected and if impacts to Crotch's bumble bee cannot be feasibly and fully avoided during Project construction and activities, the Project proponent shall coordinate with CDFW to obtain appropriate permits for incidental take of Crotch's bumble bee and provide appropriate mitigation for impacts to Crotch's bumble bee habitat.

f cont.

ENVIRONMENTAL DATA

CEQA requires that information developed in environmental impact reports and negative declarations be incorporated into a database which may be used to make subsequent or supplemental environmental determinations. (Pub. Resources Code, § 21003, subd. (e).) Accordingly, please report any special status species and natural communities detected during Project surveys to the California Natural Diversity Database (CNDDB). The CNNDB field survey form can be filled out and submitted online at the following link: https://wildlife.ca.gov/Data/CNDDB/Submitting-Data. The types of information reported to CNDDB can be found at the following link: https://www.wildlife.ca.gov/Data/CNDDB/Plants-and-Animals.

ENVIRONMENTAL DOCUMENT FILING FEES

The Project, as proposed, would have an impact on fish and/or wildlife, and assessment of environmental document filing fees is necessary. Fees are payable upon filing of the Notice of Determination by the Lead Agency and serve to help defray the cost of environmental review by CDFW. Payment of the environmental document filing fee is required in order for the underlying project approval to be operative, vested, and final. (Cal. Code Regs, tit. 14, § 753.5; Fish & G. Code, § 711.4; Pub. Resources Code, § 21089.)

CONCLUSION

g

Due to the issues presented in this letter, CDFW concludes that the DFEIR does not adequately identify or mitigate the Project's significant, or potentially significant, impacts on biological resources. Deficiencies in the Lead Agency CEQA document can affect later project approvals by CDFW in its role as a Responsible Agency. In addition, because of these issues, CDFW has concerns that Lead Agency may not have the basis to approve the project or make "findings" as required by CEQA unless the environmental document is modified to eliminate and/or mitigate significant impacts, as reasonably feasible (CEQA Guidelines, §§ 15074, 15091 & 15092).

Questions regarding this letter or further coordination should be directed to Amelia Viera, Environmental Scientist at Amelia.Viera@wildlife.ca.gov or (909) 544 – 2528.

Sincerely,

Responses to Comment Letter S3 - California Department of Fish and Wildlife

Response S3 – a

Comment is introductory and general in nature. Therefore, no further action needed.

Response S3 – b

Comment requests update of species' status on Draft Focused EIR Table 4.1-2: Special Status Wildlife Species Potentially Occurring in the Site Vicinity (pages 4.1-6 through 4.1-10) for burrowing owl (*Athene cunicularia*), Northwestern San Diego pocket mouse (*Chaetodipus fallax fallax*), San Bernardino kangaroo rat (*Dipodomys merriami parvus*), Stephens' kangaroo rat (*Dipodomys stephens*), and San Diego black-tailed jackrabbit (*Lepus californicus bennettii*). The recommendations have been adopted as follows:

- The California Endangered Species Act (CESA) listing of Burrowing owl has been updated and Burrowing owl is now considered by CDFW as a Candidate species;
- Northwestern San Diego pocket mouse and San Diego black-tailed jackrabbit are no longer listed as a Species of Special Concern under state status;
- The CESA listing of San Bernardino kangaroo rat has been updated as an Endangered species; and,
- The Federal Endangered Species Act (FESA) listing of Stephens' kangaroo rat (*Dipodomys stephens*) has been updated and Stephens' kangaroo rat is now considered by CDFW as a Federally Threatened species).

As discussed in Draft Focused EIR Appendix C1: Biological Resources Technical Report (page 5), the reconnaissance survey of the Ownership Area 1 conducted on June 13, 2024, was used to characterize and identify potential sensitive plant and wildlife habitats, and to establish the accuracy of the data identified in the literature search. Habitat assessments were conducted for, but not limited to, the following target species/groups: Delhi sands flower loving fly, coastal California gnatcatcher, burrowing owl, common and sensitive bat species, and sensitive plants.

Petitioned in March 2024, western burrowing owl (*Athene cunicularia hypugaea*) was designated as a candidate species on October 25, 2024. In early 2022, western burrowing owl was previously designated by CDFW as a Species of Special Concern. As mentioned above, the reconnaissance survey conducted a habitat assessment for burrowing owl for Ownership Area 1, and the western burrowing owl was analyzed under the Draft Focused EIR (See pages 4.1-18, 4.1-21, and 4.1-22). With the revised burrowing owl mitigation outlined in Response S3 – e, below, impacts to burrowing owl would remain less than significant with Mitigation Measure (MM) BIO-4.

Northwestern San Diego pocket mouse and San Diego black-tailed jackrabbit were previously listed as State Species of Special Concern in the Draft Focused EIR (page 4.1-9) but did not have State special species status at the time of publication of the Draft Focused EIR. This has been corrected below and is reflected in **Section 3.0: Errata to the Draft Focused EIR** of this Final EIR. Nonetheless, the Draft Focused EIR conducted a habitat assessment on Ownership Area 1 to determine the occurrence potential for northwestern San Diego pocket mouse and found that it is not expected to occur on-site based on a lack of suitable undisturbed habitats including coastal sage scrub and associations (Draft Focused EIR page 4.1-9). The Draft Focused EIR also found that San Diego black-tailed jackrabbit is not expected to occur

on-site based on a lack of suitable undisturbed habitats (Draft Focused EIR page 4.1-9). Impacts to northwestern San Diego pocket mouse and San Diego black-tailed jackrabbit would not constitute as an impact to special-status species. However, future development of Ownership Area 2 would need to undergo a Programmatic Assessment Area CEQA Analysis consistent with MM BIO-5 for any special-status species changes for northwestern San Diego pocket mouse and San Diego black-tailed jackrabbit in addition to other special-status protected species.

The San Bernardino kangaroo rat was listed under the FESA on September 24, 1998. In early 2022, the San Bernardino kangaroo rat was a CDFW Species of Special Concern. Under the CESA, it was added to the endangered species list on November 22, 2023. Therefore, as mentioned above, the San Bernardino kangaroo rat has been updated as an Endangered species pursuant to CESA. As discussed in Draft Focused EIR Section 4.1: Biological Resources (page 4.1-9), San Bernardino kangaroo rat is not expected to occur on Ownership Area 1 based on a lack of suitable undisturbed habitats including Riversidean alluvial fan sage scrub and associations. As analyzed in the Draft Focused EIR, Ownership Area 1 does not contain suitable habitat for this species, and this species is not considered to be present. Impacts to San Bernardino kangaroo rat would remain less than significant for Ownership Area 1. Impacts to San Bernardino kangaroo rat would be reduced with MM BIO-5, Programmatic Assessment Area CEQA Analysis, for Ownership Area 2.

Stephens' kangaroo rat was listed as federally endangered under the FESA on September 30, 1988. On February 17, 2022, Stephens' kangaroo rat was downlisted to federally threatened. As discussed in Draft Focused EIR Section 4.1: Biological Resources (page 4.1-9), Stephens' kangaroo rat is not expected to occur on Ownership Area 1 based on a lack of suitable undisturbed habitats. As analyzed in the Draft Focused EIR, Ownership Area 1 does not contain suitable habitat for this species, and this species is not considered to be present. Impacts to Stephens' kangaroo rat would remain less than significant for Ownership Area 1. Impacts to Stephens' kangaroo rat would be reduced with MM BIO-5, Programmatic Assessment Area CEQA Analysis, for Ownership Area 2.

In consideration of the above, revisions to special species status for the above identified species do not constitute a substantial change to the approved Project as described by CEQA Guidelines Section 15088.5 and therefore do not necessitate recirculation of the EIR.

Refer to **Section 3.0: Errata to the Draft Focused EIR** of this Final EIR and below for the revisions to Draft Focused EIR Table 4.1-2 (pages 4.1-6 through 4.1-10) concerning revisions of special species status:

Table Error! No text of specified style in document.**-2: Special-Status Wildlife Species Potentially Occurring in the Site Vicinity**

Common Name Scientific Name	Status		Habitat Requirements	Occurrence Potential
	Federal	State		
Invertebrates				
Crotch's bumble bee (*Bombus crotchii*)	--	SC	Inhabits grasslands and shrublands and requires a hotter and drier environment than other bumblebee species.	**No Potential:** Not expected to occur on-site based on lack of suitable food sources and heavily disturbed conditions.
Delhi Sands flower-loving fly (*Rhaphiomidas terminatus abdominalis*)	FE	--	Restricted to Delhi sand formations in Riverside and San Bernardino Counties.	**Low Potential.** The Delhi Sands flower-loving fly is not expected to occur on-site based on the historic and ongoing impacts to the Project site respective of active dairy and

Common Name Scientific Name	Status		Habitat Requirements	Occurrence Potential
	Federal	State		
				agricultural use. However, approximately 19-acres of the eastern region of the Project site and Ownership Area 2 are mapped as Delhi soils.
Reptiles and Amphibians				
Western spadefoot (*Spea hammondii*)		SSC	Primary habitat for this species includes suitable breeding habitat below 1500 meters (i.e., vernal pools or other standing water that is free of exotic species) with secondary habitats including adjacent chaparral, sage scrub, grassland, and alluvial scrub habitats.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed soils and continuous dairy and agricultural activities conducted.
Southern California legless lizard (*Anniella stebbinsi*)		SSC	Broadleaved upland forest, chaparral, coastal dunes, and coastal scrub. Occurs in sandy or loose loamy soils under sparse vegetation, generally in moist, loose soil.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation or soils.
California glossy snake (*Arizona elegans occidentalis*)		SSC	Generalist reported from a range of scrub and grassland habitats, often with loose or sandy soils.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation or soils.
Coastal western whiptail (*Aspidoscelis tigris stejnegeri*)		SSC	The coastal western whiptail occurs in a wide variety of habitats including coastal sage scrub, desert scrub, Riversidean alluvial fan scrub, woodlands, grasslands, playas, and respective ecotones between these habitats.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation **or soils.**
San Bernardino ringneck snake (*Diadophis punctatus modestus*)	--	--	Chaparral, coastal sage scrub, grassland, riparian, and woodlands.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation or soils.
Western pond turtle (*Actinemys marmorata*)	--	SSC	The western pond turtle inhabits slow moving permanent or intermittent streams, small ponds, small lakes, reservoirs, abandoned gravel pits, permanent and ephemeral shallow wetlands, stock ponds, and sewage treatment lagoons.	**Not Detected.** Not expected to occur on-site based on a lack of suitable undisturbed basking sites and permanent water.
Coast horned lizard (*Phrynosoma blainvillii*)	--	SSC	Open areas of sandy soil with coastal sage scrub, chaparral, grassland, riparian, and washes and watercourses.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation or soils.
Coast patch-nosed snake (*Salvadora hexalepis virgultea*)	--	SSC	The coast patch-nosed snake prefers brushy coastal sage scrub/ chaparral habitats.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation or soils.
Two-striped gartersnake (*Thamnophis hammondii*)	--	SSC	Marsh and swamp, riparian scrub, riparian woodland, and wetland. Highly aquatic, found in or near permanent fresh water. Often along streams with rocky beds and riparian growth.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation, soils or permanent water.
Birds				
Cooper's hawk (*Accipiter cooperii*)	--	SSC	Cooper's hawk is most commonly found within or adjacent to riparian/oak forest and woodland habitats. This uncommon resident of California increases in numbers during winter migration.	**Low Potential** – May occasionally forage on-site and breed within the mature Eucalyptus trees**.**
Sharp-shinned hawk (*Accipiter striatus*)	--	CWL	Potential habitat for the sharp-shinned hawk includes montane coniferous forest for potential breeding areas and riparian	**Low Potential** – May occasionally forage on-site.

Common Name Scientific Name	Status		Habitat Requirements	Occurrence Potential
	Federal	State		
			scrub, woodland, and forest habitat, oak woodland and forest, chaparral, coastal sage scrub, desert scrub, and Riversidean alluvial fan sage scrub for foraging.	
Tri-colored blackbird (*Agelaius tricolor*)	--	ST/SSC	Marshes and grasslands. Breeding colonies require nearby water, nesting substrate, and foraging habitat of grassland, woodland, or agricultural cropland.	**No Potential.** Not expected to occur on-site based on a lack of nesting habitat (cattail, rushes, and willows) within or adjacent to the Project site.
Golden eagle (*Aquila chrysaetos*)	--	CWL, SFP	Within southern California, the species prefers grasslands, brushlands (coastal sage scrub and chaparral), deserts, oak savannas, open coniferous forests, and montane valleys.	**Low Potential** – May occasionally forage on-site.
Great egret (*Ardea alba*)	--	Nesting Colony	Wet areas, fields, margins of open water.	**Moderate Potential** – Expected to occasionally forage on-site but not breed.
Great blue heron (*Ardea herodias*)	--	Nesting Colony	Wet areas, fields, margins of open water.	**Moderate Potential** – Expected to occasionally forage on-site but not breed.
Burrowing owl (*Athene cunicularia*)	--	SC~~SSC~~	The burrowing owl uses predominantly open land, including grassland, agriculture, playa, sparse coastal sage scrub, desert scrub habitats. Some breeding burrowing owls are year-round residents and additional individuals from the north may winter throughout the region.	**Moderate Potential** – Suitable burrows larger than 4 inches in diameter and foraging habitat documented within the fallow fields on-site.
Ferruginous hawk (*Buteo regalis*)	--	CWL	Grasslands and other open terrain of the plains and foothills. Wintering species. Primarily open fields with low vegetation.	**Low Potential** – May occasionally forage on-site.
Swainson's hawk (*Buteo swainsoni*)	--	ST	Grasslands and other open terrain.	**Low Potential** – May occasionally forage on-site.
Mountain plover (*Charadrius montanus*)	--	SSC	Dry upland prairies and plains, semidesert, bare dirt fields.	**No Potential**. Not expected to occur on-site based on a lack of suitable undisturbed vegetation.
Northern harrier (*Circus cyaneus*)	--	SSC	The northern harrier frequents open wetlands, wet/lightly grazed pastures, fields, dry uplands/prairies, mesic grasslands, drained marshlands, croplands, meadows, grasslands, open rangelands, fresh and saltwater emergent wetlands.	**High Potential.** Observed adjacent to and on-site during previous surveys of adjacent properties in 2022.
Western yellow-billed cuckoo (*Coccyzus americanus occidentalis*)	FT	SE	Riparian. Uncommon to rare summer resident of valley foothill and desert riparian habitats.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed riparian scrub, forest or woodland vegetation.
Snowy egret (*Egretta thula*)	--	Nesting Colony	Wet areas, fields, margins of open water.	**Moderate Potential** – Expected to occasionally forage on-site but not breed.
White-tailed kite (*Elanus leucurus*)	--	SFP	The white-tailed kite is found in riparian, oak woodlands adjacent to large open spaces including grasslands, wetlands, savannahs and agricultural fields. This non-migratory bird species occurs throughout the lower elevations of	**Low Potential** – May occasionally forage on-site.

Common Name Scientific Name	Status		Habitat Requirements	Occurrence Potential
	Federal	State		
			California and commonly nests in coast live oaks.	
California horned lark (*Eremophila alpestris actia*)	--	CWL	Variety of open habitats, usually where trees and large shrubs are absent.	**Moderate Potential** – Expected to occasionally forage and breed on-site.
Merlin (*Falco columbarius*)	--	CWL	Grasslands, coastal sage scrub and estuaries, windrows, open fields.	**Low Potential** – May occasionally forage on-site.
Prairie falcon (*Falco mexicanus*)	--	CWL	Habitat use of the prairie falcon includes annual grasslands to alpine meadows. The prairie falcon is associated primarily with perennial grasslands, savannahs, rangeland, some agricultural fields during the winter season, and desert scrub areas, all typically dry environments of western North American where there are cliffs or bluffs. for nest sites.	**Low Potential** – May occasionally forage on-site.
American peregrine falcon (*Falco peregrinus anatum*)	--	SFP	Throughout the species' range, peregrine falcons are found in a large variety of open habitats, including tundra, marshes, seacoasts, savannahs and high mountains.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation.
Loggerhead shrike (*Lanius ludovicianus*)	--	SSC	This species of shrike hunts in open or grassy areas and nests in large chaparral shrubs such as ceanothus and lemonade berry.	**Low Potential** – May occasionally forage on-site.
California gull (*Larus californicus*)	--	CWL	Nearly all types of fresh and salt water, cropland, landfills, refuse areas, open lawns.	**Moderate Potential** – Expected to occasionally forage on-site.
California black rail (*Laterallus jamaicensis coturniculus*)	--	ST/SFP	Brackish marsh, freshwater marsh, marsh and swamp, salt marsh, wetland. Inhabits freshwater marshes, wet meadows and shallow margins of saltwater marshes bordering large bays.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Long-billed curlew (*Numenius americanus*)	--	CWL	Coastal estuaries, upland herbaceous areas, croplands, wet areas, open fields, shores of open water.	**Moderate Potential** – Expected to occasionally forage on-site.
Double-crested cormorant (*Nannopterum auritum*)	--	CWL	Lakes, fresh, salt, and estuarine waters.	**Moderate Potential** – Expected to occasionally forage on-site.
White-faced ibis (*Plegadis chihi*)	--	CWL	Freshwater marshes and brackish areas.	**High Potential.** Observed adjacent to and on-site during previous surveys of adjacent properties in 2022.
Coastal California gnatcatcher (*Polioptila californica californica*)	FT	SSC	The coastal California gnatcatcher is a nonmigratory bird species that primarily occurs within sage scrub habitats in coastal southern California dominated by California sagebrush.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats including coastal sage scrub and associations.
Mammals				
Pallid bat (*Antrozous pallidus*)	--	SSC	Chaparral, coastal scrub, desert wash, Great Basin grassland, Great Basin scrub, Mojavean desert scrub, riparian woodland, Sonoran desert scrub, upper montane coniferous forest, and valley and foothill grassland. Oak and grassland ecotones. Prefers foraging in the open. Roosts in attics or rock cracks; in the open, near foliage at night.	**Low Potential.** Expected to occasionally forage on-site

Common Name Scientific Name	Status		Habitat Requirements	Occurrence Potential
	Federal	State		
Northwestern San Diego pocket mouse (*Chaetodipus fallax fallax*)	--	-- ~~SSC~~	The northwestern San Diego pocket mouse occurs in coastal sage, upland sage scrubs, and alluvial fan sage scrub, sage scrub/grassland ecotones, chaparral, and desert scrubs at all elevations up to 6,000 feet.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats including coastal sage scrub and associations.
Townsend's big-eared bat (*Corynorhinus townsendii*)	--	SSC	A wide variety of habitats including woodlands and arid grasslands. Roosts in mines and caves.	**Low Potential.** Expected to occasionally forage on-site.
San Bernardino kangaroo rat (*Dipodomys merriami parvus*)	FE	SE ~~SSC~~	Prefers alluvial scrub, coastal sage scrub habitats with sandy and gravelly substrates.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats including Riversidean alluvial fan sage scrub and associations.
Stephens' kangaroo rat (*Dipodomys stephensi*)	FT ~~FE~~	ST	The Stephens' kangaroo rat is found almost exclusively in open grasslands or sparse shrublands with cover of less than 50 percent during the summer.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Western mastiff bat (*Eumops perotis californicus*)	--	SSC	Roosts in rocky areas and forages in grassland, shrublands, and woodlands.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Western yellow bat (*Lasiurus xanthinus*)	--	SSC	Roosts in the skirts of palm trees and forages in adjacent habitats.	**Low Potential.** Scattered palm trees representing potential roosting habitat documented within the central region on-site.
San Diego black-tailed jackrabbit (*Lepus californicus bennettii*)	--	-- ~~SSC~~	The San Diego blacktailed jackrabbit in open habitats, primarily including grasslands, sage scrub, alluvial fan sage scrub, and Great Basin sage scrub.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Western small-footed myotis *(Myotis ciliolabrum*)	--	--	Feeds among trees or over brush. Roosts in caves, mines, and in cliff or rock openings.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Yuma myotis (*Myotis yumanensis*)	--	--	Water and wooded canyon bottoms. Roosts in caves and abandoned buildings.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
San Diego desert woodrat (*Neotoma lepida intermedia*)	--	SSC	Riversidean and coastal sage scrub, chaparral and nonnative grasslands. Shrub and desert habitats, primarily associated with rock outcroppings, boulders, cacti, or areas of dense undergrowth.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Pocketed free-tailed bat (*Nyctinomops femorosaccus*)	--	SSC	Desert habitats. Roosts in rock crevices in cliffs.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Big free-tailed bat (*Nyctinomops macrotis*)	--	SSC	Desert habitats. Roosts in rock crevices in cliffs.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Los Angeles pocket mouse (*Perognathus longimembris brevinasus*)		SSC	Low elevation grassland alluvial sage scrub and coastal sage scrub habitats.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.

Federal (USFWS) Protection and Classification
FE – Federally Endangered
FT – Federally Threatened
FC – Federal Candidate for Listing

State (CDFW) Protection and Classification
SE – State Endangered
SSC – State Species of Special Concern
CWL – California Watch List
SFP – State Fully Protected
SC – State Candidate for Listing

Response S3 – c

Comment requests correction of Draft Focused EIR Section 4.1.3: Regulatory Setting (pages 4.1-13 and 4.1-14) to include invertebrate species under CESA. While a 2020 Sacramento Superior Court ruling initially held that invertebrates were not eligible for protection under CESA, the 2022 decision in *Almond Alliance of California et al. v. Fish and Game Commission et al.* (2022) by the Third Appellate District Court reversed this, ruling that invertebrates—including terrestrial insects like bumble bees—are eligible for listing as threatened or endangered. Comment also requests a habitat assessment and species-specific surveys to be conducted for CESA invertebrate species that may occur within the Project site. Although invertebrate species were not explicitly listed on pages 4.1-13 and 4.1-14, invertebrate species assigned special species status were considered in the Draft Focused EIR, and the habitat assessments were inclusive of invertebrate species containing both FESA and CESA listed invertebrates as demonstrated in Draft Focused EIR Table 4.1-2 (page 4.1-6), Draft Focused EIR Appendix C1 (page 29), and in Draft Focused EIR Appendix C2: Delhi Sands Flower-Lowing Fly Habitat Suitability Assessment (page i).

Draft Focused EIR Appendices C1 and C2 identified Crotch's bumble bee (SC) and Delhi Sands flower-loving fly (FE) as potentially occurring in the site vicinity. However, Draft Focused EIR Appendix C1 (page 29) concluded that there is no potential for Crotch's bumble bee to occur on Ownership Area 1 due to disturbed conditions; refer to Response S3 – f, below, for additional discussion on Crotch's bumble bee. Draft Focused EIR Appendix C2 (pages 9 and 10) also concluded that the Project site no longer supports clean Delhi Sand soils and is rated as unsuitable habitat. All Delhi Sand soils that may have occurred on the project site have either been removed by maintenance of the stock ponds or is so contaminated with cow mature and other waste products that clean Delhi Sand soils needed by Delhi Sands flower-loving fly no longer exist with the project site.

Impacts to special status invertebrates would be reduced for Ownership Area 1. Furthermore, as mentioned in Draft Focused EIR Section 4.1: Biological Resources (page 4.1-23), a focused biological resources assessment and impact analysis consistent with CEQA would be conducted for future development areas prior to approval of any development within Ownership Area 2 to ensure potential adverse effects to sensitive species and resources would be minimized. Furthermore, any focused surveys and required mitigation measures would be implemented prior to Project approval and construction initiation. Refer to MM BIO-5, Programmatic Assessment Area CEQA Analysis. No changes are necessary.

Refer to **Section 3.0: Errata to the Draft EIR** of this Final EIR to see the update as follows:

California Endangered Species Act

The California Endangered Species Act (CESA), enacted in 1970 and amended in 1984, is a California law that conserves and protects plant and animal species at risk of extinction. It generally parallels the main provisions of the FESA and is administered by the CDFW. Plant and animal species may be designated threatened or endangered under CESA after a formal listing process by the CFGC. With already approximately 250 species currently listed, a CESA-listed

species, or any part or product of the plant or animal, may not be imported into the state, exported out of the state, "taken" (i.e., killed), possessed, purchased, or sold without proper authorization. Implementation of CESA has reduced and avoided impacts to California's most imperiled plants, ~~and~~ animals, and invertebrates, has protected hundreds of thousands of acres of vital habitat, and has led to a greater scientific understanding of California's incredible biodiversity. Candidate species may be afforded temporary protection as though they were already listed as threatened or endangered at the discretion of the Fish and Game Commission. ~~Unlike the FESA, CESA does not include listing provisions for invertebrate species.~~ Under certain conditions and if the take is incidental to otherwise lawful activities, CESA has provisions for take through Incidental Take Permits (ITP) or memorandum of understanding (MOU). In addition, some sensitive mammals and birds are protected by the state as "fully protected species." California "species of special concern" are species designated as vulnerable to extinction due to declining population levels, limited ranges, and/or continuing threats. This list is primarily a working document for the CDFW's California Natural Diversity Database (CNDDB), which maintains a record of known and recorded occurrences of sensitive species. Informally listed taxa are not protected per se but warrant consideration in the preparation of biological resources assessments.

Response S3 – d

In this comment, CDFW requests additional mitigation for focused surveys to determine the presence or absence of candidate, sensitive, or special status species. However, a biological resources survey was conducted to include existing habitat conditions, obtain plant and animal species information, view the surrounding uses, assess the potential for state and federal waters, assess potential for wildlife movement corridors, and if critical habitat is present, assess for the presence of constituent elements (Draft Focused EIR Page 4.1-17). Therefore, the City finds that additional biological resources surveys would not be required for Ownership Area 1 and impacts to special-status species would maintain less than significant levels with MM BIO-1 through MM BIO-4. Furthermore, as mentioned in Draft Focused EIR Section 4.1: Biological Resources (page 4.1-23), a focused biological resources assessment and impact analysis consistent with CEQA would be conducted for future development areas prior to approval of any development within Ownership Area 2 to ensure potential adverse effects to sensitive species and resources would be minimized. Furthermore, any focused surveys and required mitigation measures would be implemented prior to Project approval and construction initiation. Refer to **MM BIO-5**, Programmatic Assessment Area CEQA Analysis. No changes are necessary.

Response S3 – e

As outlined in Response S3 – b, burrowing owl has been updated as a Candidate species pursuant to CESA. Refer to **Section 3.0: Errata to the Draft Focused EIR** of this Final EIR and below for the revisions to the Draft Focused EIR page 4.1-21:

Burrowing Owl

BUOW is a CDFW Candidate species pursuant to CESA ~~Species of Special Concern~~. The BUOW uses predominantly open land, including grassland, agriculture, playa, sparse coastal sage scrub, and

desert scrub habitats. The BUOW (low-occurrence potential) often occur in less than optimal and/or disturbed conditions. Suitable burrows larger than 4 inches in diameter and foraging habitat for the BUOW were documented within and adjacent to the east of Ownership Area 1. However, despite the fact that the site has been exposed to long-standing disturbances, suitable BUOW habitat, including burrows larger than 4-inches in diameter, was observed within the fallow fields on Ownership Area 1. Although there is suitable BUOW habitat, potential impacts to refugia, nesting, and foraging habitat for this species would be mitigated to a level of less than significant following implementation of **MM BIO-4**, which would ensure BUOW surveys are completed prior to construction. **MM BIO-4** would implement focused and preconstruction surveys to ensure potential impacts to refugia, nesting, and foraging habitat for the BUOW would be reduced to less than significant levels. Upon arrival at the survey area and prior to initiating the walking surveys, the biologist would use binoculars and/or spotting scope to scan suitable habitat. A total of four surveys would be conducted with at least one site visit between February 15th and April 15th, and a minimum of three surveys at least three weeks apart between April 15th and July 15th. Furthermore, one site visit would occur after June 15th.

Refer to **Section 3.0: Errata to the Draft Focused EIR** of this Final EIR and below for the revisions to the Draft Focused EIR page 4.1-18:

Burrowing Owl Survey

The BUOW (SC ~~SSC~~) uses predominantly open land, including grassland, agriculture, playa, sparse coastal sage scrub, and desert scrub habitats. The consultant concluded there would be a moderate potential for BUOW within the Project site. Suitable habitat including burrows larger than 4-inches in diameter, which is suitable habitat for the BUOW, was observed within the Project site.

The City has accepted the recommendation to revise MM BIO-4 (pages 4.1-24 and 4.1-25) to maintain less than significant impact levels with mitigation. Refer to **Section 3.0: Errata to the Draft Focused EIR** of this Final EIR and below for the revisions:

MM BIO-4 **Focused and Preconstruction Burrowing Owl Surveys.** Focused surveys for burrowing owl will be conducted in accordance with the March 7, 2012~~2022~~, CDFW staff report on Burrowing Owl Mitigation prior to vegetation removal or ground-disturbing activities for all phases of Project construction. Specifically, a total of four (4) surveys will be conducted: 1) at least one site visit between February 15th and April 15th, and 2) a minimum of three (3) surveys, at least three weeks apart, between April 15th and July 15th, with at least one visit after June 15th. A report of the findings prepared by a qualified biologist shall be submitted to the City of Ontario prior to any permit or approval for ground disturbing activities. The Designated Biologist shall provide CDFW a GIS or KMZ map of BUOW burrow complex(es) and atypical burrows (e.g. culverts, buckled concrete, etc.) The map shall be at a scale of 1:24,000 or finer to show details and shall show locations of all BUOW sightings and labeled if sightings were potential

burrows, occupied burrows, satellite burrows, areas of concentrated burrows, and BUOW sign. Locations documented by use of GPS coordinates must be collected in NAD83 datum. The map shall include an outline of the Project Site, a title, north arrow, scale bar, and legend.

A 14-day burrowing owl preconstruction survey will also be conducted immediately prior to the initiation of ground-disturbing construction to ensure protection for this species. The survey will be conducted in compliance with CDFW guidelines (CDFW 2012). A report of the findings prepared by a qualified biologist shall be submitted to the City of Ontario prior to any permit or approval for ground disturbing activities.

~~If burrowing owls are detected on-site during the focused surveys or 14-day preconstruction survey efforts, during the breeding season (February 1st to August 31st) then construction activities shall be limited to beyond 300 feet of the active burrows until a qualified biologist has confirmed that nesting efforts are complete or not initiated. In addition to monitoring breeding activity, if construction is proposed to be initiated during the breeding season or active relocation is proposed, a burrowing owl relocation plan will be developed and approved by the City of Ontario, CDFW and USFWS.~~

If burrowing owl occupancy is confirmed, and if Project activities may impact burrowing owl, including burrow exclusion and closure, the Project Proponent shall begin early coordination with CDFW for appropriate CESA authorization (i.e., Incidental Take Permit (ITP) under Fish and Game Code section 2081) prior to commencement of Project activities. The ITP application shall describe, at a minimum, project activities and equipment, proposed avoidance/buffers, temporary and permanent impacts, monitoring, relocation and/or translocation, and minimization and compensatory mitigation actions. ITP compensatory mitigation will be fulfilled by one or more of following options: 1) Permittee-responsible mitigation land acquisition or 2) Conservation or Mitigation Bank credits (if available).

Response S3 – f

As outlined in Response S3 – b and Draft Focused EIR Table 4.1-2: Special Status Wildlife Species Potentially Occurring in the Site Vicinity (page 4.1-6), Crotch's bumble bee (*Bombus crotchii*) has been previously identified as a CESA candidate species denoted with SC, State Candidate for Listing. According to CDFW, the Project site is within the historic geographic range for Crotch's bumble bee, which generally extends from San Diego, CA to Redding, CA in a variety of habitats including open grasslands, shrublands, chaparral, desert margins including Joshua tree and creosote scrub, and semi-urban settings within California. Crotch's bumble bee is a candidate species under the CESA, meaning it is afforded the same protections as those listed threatened or endangered species while the listing review process is underway by CDFW. Crotch's bumble bee became a candidate species for listing under CESA on June 12, 2019. This status was reinstated on September 30, 2022, following a decision by the California Fish and Game Commission.

Crotch's bumblebee, however, is presumed absent from the Project site based on lack of suitable food sources and heavily disturbed conditions. According to CDFW[1], nesting and overwintering sites for candidate bumble bee species occur in undisturbed soils such as abandoned rodent burrows, root masses, or loose soil cavities; frequent disturbance or compaction reduces habitat suitability. However, as mentioned in Draft Focused EIR Section 3.0: Project Description (page 3-1), the Project site currently comprises agricultural uses, including the raising of livestock, field crop farming, dairy farming activities, and rural residences scattered throughout the area. Therefore, soil compaction, tilling, or frequent ground disturbance within the Project site may reduce the likelihood of suitable nesting sites for candidate bumble bee species. The Project site generally represents low biological resource value due to highly disturbed site conditions and historic daily/agricultural use, resulting in low biological diversity. No changes are necessary. Furthermore, as outlined in Response S3 – b, habitat assessments were conducted for target species/groups and included Crotch's bumble bee as outlined in Draft Focused EIR Table 4.1-2 (page 4.1-6). Therefore, additional focused Crotch's bumble bee surveys would not be necessary for Ownership Area 1 and impacts to Crotch's bumble bee would be less than significant. Furthermore, impacts to Crotch's bumble bee would be reduced with implementation of MM BIO-5, Programmatic Assessment Area CEQA Analysis, for Ownership Area 2.

Response S3 – g

This comment states that information development in environmental impact reports must be incorporated into a database to be used for determinations. It also includes a reminder to report special-status species to the California Natural Diversity Database. This comment is consistent with standard professional practice for consulting biologists and does not raise any specific issues or questions on the environmental analysis provided in the Draft Focused EIR.

This comment mentions the required CDFW filing fee the Project Applicant would be required to pay when filing the Notice of Determination for the EIR. This comment is noted for the record and will be provided to decision makers for consideration; no further response is warranted.

As discussed in the responses above, the Final Focused EIR incorporates revisions to MM BIO-4 for burrowing owl, asserts that no additional focused mitigation is necessary for Crotch's bumble bee, and asserts that no additional general biological surveys are necessary based on the previous habitat assessment. Impact 4.1-1 (Ownership Area 1) would maintain less than significant levels with mitigation incorporated. As for Impact 4.1-1 for Ownership Area 2, Mitigation Measures MM BIO-1 through MM BIO-4 would reduce potential impacts to special status wildlife species. Furthermore, a programmatic assessment area CEQA analysis of Ownership Area would be incorporated as MM BIO-5, Programmatic Assessment Area CEQA Analysis. Nonetheless, as concluded in Draft Focused EIR Section 4.1: Biological Resources (page 4.1-23) the Project is not anticipated to significantly impact sensitive species. MM BIO-1 through MM BIO-5 would be required to reduce impacts to special-status species. For the Ownership Area 1 portion of the Project, impacts would be reduced to less than significant levels. However, because the extent of impacts within Ownership Area 2 cannot be known at this time, Project impacts relating to biological resources within Ownership Area 2 are considered potentially significant and unavoidable even with the implementation of recommended mitigation. Therefore, as discussed in Responses S3 – b

[1] California Department of Fish and Wildlife. 2023. *Survey Considerations for California Endangered Species Act (CESA) Candidate Bumble Bee Species*, page 3. https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=213150&inline (Accessed February 2026).

through Responses S3 – f, the changes in FESA/CESA status for certain species, identified above, would not constitute significant new information as described by CEQA Guidelines Section 15088.5, which would require recirculation of a Draft EIR should new information show new significant impacts or impacts substantially more severe than previously disclosed. This comment is noted for the record and will be provided to decision makers for consideration; no further response is warranted.

Comment Letter P1 – Edison Ranch LLC

Edison Ranch LLC

7914 Edison Ave, Ontario, CA 91762
APN: 1053-321-02; 03 & 1053-171-01

Date: February 3, 2026

To: Rafael Torres, Assistant Planner
City of Ontario, Planning Department
303 East B Street
Ontario, CA 91764
P: (909) 395-2036
E: rtorres@ontarioca.gov

Subject: Comments on the Notice of Availability (NOA) for the Draft Focused Environmental Impact Report (DEIR) for the CenterPark Specific Plan (PSP24-002; SCH No. 2025060731)

Dear Mr. Torres,

Edison Ranch LLC hereby submits a formal objection to the Draft Focused Environmental Impact Report (DEIR) for the CenterPark Specific Plan, specifically regarding the "programmatic" residential designations placed upon our property within **Ownership Area 2**. As a primary stakeholder in the southwestern portion of the City, we assert that the proposed plan to develop **1,198 residential units** on these parcels is fiscally and operationally inferior to a high-value commercial and industrial alternative. a

1. Formal Objection to Residential Land Use in Ownership Area 2 Edison Ranch LLC objects to the inclusion of our parcels in a plan that prioritizes high-density residential development. The DEIR evaluates Ownership Area 2 at a programmatic level for residential use without our consent as the property owners. We request that the Final EIR analyze a **"Job-Centric Alternative"** that re-zones these parcels for **Industrial (IND), Business Park (BP), or Data Center** uses to better align with the City's goal of creating a "central business center" as outlined in our prior TOP 2050 comments. b

2. Fiscal Incompatibility with the Utilities Master Plan The concurrent **Water, Recycled Water, Sewer, and Drainage Master Plans Updates IS/MND** details a massive infrastructure burden, including 42-inch transmission mains and new reservoirs required to service this region.

- **Revenue Gap:** The tax revenue from 1,198 residential units in Ownership Area 2 will not cover the long-term maintenance and lifecycle costs of these utilities.
- **Industrial Support:** High-value industrial and e-commerce uses generate the property and sales tax necessary to subsidize the infrastructure required by the broader NMC/Ontario Ranch area. By designating our land as residential, the City is removing a critical funding source for its own 2040 Utilities Master Plan.

c

Edison Ranch LLC

7914 Edison Ave, Ontario, CA 91762
APN: 1053-321-02; 03 & 1053-171-01

3. Biological and Agricultural Concerns The DEIR identifies **Significant and Unavoidable Impacts** to biological resources within Ownership Area 2 because specific site conditions cannot be verified.

- **Interim Use:** Our property currently supports agricultural operations. We object to any mitigation measures that would force the premature cessation of these nurseries.
- **Phased Transition:** We demand a **Phased Transition Plan** that allows our existing tree and plant cultivation to continue until industrial or commercial development is ready to commence, rather than idling the land for residential projects that may not be built for a decade or more.

d

4. Optimized Goods Movement The DEIR fails to account for the strategic value of the **Edison Avenue and Eucalyptus Avenue** corridors as optimized truck routes. Introducing over 4,000 total residential units into this sector creates unnecessary conflict between domestic traffic and the job-creating logistics industry. Ownership Area 2 should be reserved for industrial uses that utilize these arterials for the efficient movement of goods.

e

Conclusion Edison Ranch LLC requests that the City remove the residential designations from our property in Ownership Area 2 and re-evaluate the Specific Plan to support commercial and industrial rezoning. We intend to preserve our right to pursue land uses that ensure the fiscal sustainability of our property and the City of Ontario.

f

Sincerely,

Edison Ranch LLC

Attached please find the formal comments from **Edison Ranch LLC** regarding the Draft Focused Environmental Impact Report (DEIR) for the **CenterPark Specific Plan (PSP24-002; SCH No. 2025060731)**.

As a primary stakeholder, our comments specifically address:

- Our formal **objection to the residential land use designations** placed upon our parcels within **Ownership Area 2**.
- The fiscal incompatibility of high-density residential development with the City's **2040 Utilities Master Plan**.
- The necessity of a **Phased Transition Plan** for our existing agricultural operations.
- Concerns regarding **Biological Resources** and the impact on optimized truck routes.

Please confirm receipt of this email and ensure these comments are incorporated into the Final EIR record. We look forward to the City's formal response.

Sincerely,

Eric S. Chavez Manager/Agent, Edison Ranch

Responses to Comment Letter P1 – Edison Ranch LLC

Response P1 – a

Comment is noted for the record. As stated within Draft Focused EIR Section 3.0: Project Description, the Project is consistent with the City's The Ontario Plan (TOP) 2050 land use and zoning designations. The Project would not change the existing land use and zoning designations of residential, commercial/mixed-use, retail, office, parks and open space, within TOP 2050, including the referenced property within Ownership Area 2; see the Project Specific Plan for additional information. The Project (Ownership Areas 1 and 2) consists of 22 planning areas accommodating a variety of land uses including residential, commercial/mixed-use, retail, office, parks and open space, and community facility components, and other similar uses that are compatible with the Project site's location and surrounding existing and proposed land uses. The Project Specific Plan's Land Use Plan implements the vision of TOP 2050 by providing a designed natural open space framework, interacting with mixed retail and office centers which anchor traditional residential neighborhoods. The Land Use Plan identifies the location of the land use designations for the Project site. The Project zoning via the Specific Plan mirrors TOP 2050 Land Use designations and is identified along the 22 planning areas (see Draft Focused EIR Figure 3 8: Land Use Plan). The proposed residential development within the Ownership Area 2 is consistent with the City's TOP 2050 Policy CE1-6 Diversity of Housing. Adherence to Policy CE1-6 would ensure collaboration with residents, housing providers and the development community to provide housing opportunities for every stage of life, as well allow for a variety of housing types and price points to encourage the development of housing supportive of the City's efforts to attract business in growing sectors of the community while being respectful of existing viable uses. The Specific Plan allows for the development of up to 4,293 residential dwelling units comprised of a variety of single-family attached and detached homes. Residential land use areas are linked by a network of street-separated sidewalks and Multipurpose Trails connecting all neighborhoods to parks. Residential development is designed to address a variety of lifestyles and economic segments of the marketplace.

Response P1 – b

The comment is noted for the record. Pursuant to California Government Code Section 65450, a city may initiate and prepare a Specific Plan for all or any portion of the area covered by the General Plan in order to systematically implement General Plan policies. The preparation of a Specific Plan is a legislative planning action initiated by the City and is not dependent on property owner application or consent. The inclusion of privately owned parcels within the Specific Plan planning area does not alter property ownership rights and does not, by itself, approve development or confer entitlements.

Further, there is no requirement that a lead agency obtain a property owner's permission to evaluate environmental impacts of a site for CEQA purposes (State CEQA Guidelines Section 15063 and 15125). CEQA is a procedural statute requiring environmental review of discretionary projects, but it does not grant or require property access rights. The City has complied with all applicable state and local noticing and public participation requirements, including notification to affected property owners and opportunities for public review and comment through noticed public hearings before the Planning Commission and City Council, consistent with California planning law and CEQA requirements.

The Project Specific Plan has been prepared in conformance with the goals and policies of the City's TOP 2050. The TOP 2050 analysis in Table 9-1, Policy Plan Consistency describes the manner in which the Project Specific Plan complies with TOP 2050 policies applicable to the Project; see the Project Specific Plan for further information.

The Project is consistent with the City's TOP 2050 land use and zoning designations. TOP 2050 Exhibit LU-01, Land Use Plan designates the Project Specific Plan area as Mixed-Use, Medium Density Residential (11.1 - 25.0 dwelling units per acre) and Open Space/Parkland. The Project Specific Plan area is within the Chino Airport Overlay Zone. The Project Specific Plan area is zoned SP/AG (Specific Plan AG preserve), which requires approval of a specific plan from the City for development. Therefore, by including the commenter's parcels within the Project's Specific Plan, future development of these parcels consistent with the adopted TOP 2050 Land Use Plan is made possible without requiring a new or amended Specific Plan, provided that the land uses proposed under future development applications are consistent with those envisioned by TOP 2050.

Additionally, see Draft Focused EIR Section 6.0: Alternatives for a list of alternatives to the Project in accordance with State CEQA Guidelines Section 15126.6. CEQA does not require the analysis of every conceivable alternative. Rather, an EIR is required to evaluate a reasonable range of project alternatives that would feasibly attain most of the basic objectives of the proposed project while avoiding or substantially lessening the project's identified significant environmental effects – i.e., the Project's significant impacts to biological resources and historic resources (CEQA Guidelines Section 15126.6[a]–[b]).

Response P1 – c

Comment is noted for the record. The Project is consistent with the City's TOP 2050 land use and zoning designations. As discussed within the Project Specific Plan, master planned utilities serving the development, as identified in the approved respective Master Plan, shall be constructed prior to issuance of first occupancy. Exhibits shall show all frontage improvement requirements per the City's adopted Master Plans. The Project shall comply with the requirements as set forth in the Standard Conditions of Approval adopted by the City Council (Resolution No. 2017-027). The ultimate sizing and alignment of utilities (potable water, recycled water, sewer, and storm drain) will follow the most current approved Master Plan and/or hydraulic analysis approved by the City. Additionally, the proposed development was previously considered as part of the TOP 2050 Supplemental EIR, and therefore the master plans are consistent with this development.

Response P1 – d

Comment is noted for the record. The Project is consistent with the findings of the TOP 2050 Supplemental EIR. According to the TOP 2050 Supplemental EIR, agricultural land within the Ontario Ranch area has the potential to be converted to non-agricultural uses, upon buildout of TOP 2050 and the Specific Plan overlay. This was identified as a significant cumulative impact in TOP 2010 Certified EIR and TOP 2050 Final Supplemental EIR. Implementation of the Project would contribute to the reduction of agricultural resources in the region and cumulatively contribute to the loss of agricultural resources. However, in

accordance with the Project Specific Plan's Allowable Uses, temporary and interim agricultural uses would be permitted within the Medium Density Residential and Mixed-Use land use areas.

Furthermore, the Project would adhere to the following policies from the TOP 2050 Environmental Resources Element, pertaining to existing farms and improving the transition of farms to urban uses:

- Goal ER-5 Protected high value habitat and farming and mineral resource extraction activities that are compatible with adjacent development.
- Policy ER-5.3 Right to Farm. We support the right of existing farms to continue their operations within the Ontario Ranch.
- Policy ER-5.4 Transition of Farms. We protect both existing farms and sensitive uses around them as agricultural areas transition to urban uses

Additionally, the Project would adhere to the City's Municipal Code containing regulations pertaining to agricultural resources in the City, including:

- Ontario Development Code, Chapter 6, Development and Subdivision Regulations, Division 6.01, District Standards and Guidelines, Division 6.01, Section 6.01.035, Overlay Zoning Districts. The purpose of the SP-AG Overlay District is to accommodate the continuation of agricultural uses within the City, on an interim basis, and to allow for the establishment of general agricultural uses, such as dairies, within certain areas of concentrated agricultural use. This section regulates development in the Ontario Ranch area to create compatibility between agricultural and non-agricultural uses. It recognizes that specific plans would guide the development of the Ontario Ranch area. The overall goal of the ordinance is to prevent unnecessary urban development in the area unless the development has been planned. New construction, except for agricultural uses or agricultural-related activities, and single-family homes and building ancillary thereto, shall first require the adoption of a Specific Plan, which prescribes the allowed land uses, development regulations and guidelines, and sign regulations applicable to the Project.

Response P1 – e

See Response P1 – b. The Project Specific Plan is consistent with the City's TOP 2050 land use and zoning designations. As discussed in Draft Focused EIR Section 3.0: Project Description, the Project Specific Plan would be designed as a living community and create a comprehensive system for multiple modes of travel by implementing the following objectives related to traffic and reducing potential conflict between domestic traffic and the job-creating logistics industry:

- Streets incorporating traffic-calming techniques such as landscaped areas adjacent to roadways and City approved intersection chokers intended to encourage drivers to reduce their speed and create a pedestrian friendly environment.
- Neighborhood street patterns that provide access between neighborhoods and discourage through traffic.
- A local street system that is logical and understandable for the user avoiding circuitous and confusing travel paths between internal neighborhood areas and adjacent arterials.

- Streets designed to include landscaped parkways and pedestrian walkways separated from the street encourage walking and social interaction.
- Local streets designed to slow vehicular traffic to promote walkability through the use of traffic-calming devices, landscaped areas adjacent to streets and narrowed intersections to influence a driver's peripheral vision and encourage drivers to proceed more slowly.
- A system of City-wide and local bike ways integrated into the design of the community to encourage bicycle travel as an alternative to the automobile.
- Neighborhoods and parks that are linked by pedestrian paths and greenways which also serve to establish connective and gathering features within and between neighborhoods in the Project Specific Plan area.

Additionally, in accordance with TOP 2050 Policies CD1-2, CD3-1, and CD3-5, the Project Specific Plan includes Design Guidelines to guide the physical character of all future residential development and all community and neighborhood features, including the overall landscape treatment within the Project; promote street-facing front entries and architectural elements visible from adjacent streets, sidewalks and parks within the Project to allow for a safe and aesthetically pleasing vibrant human-scale experience; and provide bike and pedestrian accessibility throughout the community through a network of off-street bike and pedestrian trails within the neighborhood edges of major arterial streets. Connectivity to this network of off-street trails from all residential Planning Areas is provided through the local street system.

Response P1 – f

The comment is noted for the record. This comment does not raise any substantive issues regarding the adequacy of the Draft Focused EIR. Therefore, no further response is needed.

Re: Comment on Draft Focused Environmental Impact Report, CenterPark Specific Plan Project (PSP24-002; SCH 2025060731)

Dear Mr. Torres:

This comment is submitted on behalf of Supporters Alliance for Environmental Responsibility ("SAFER") regarding the Draft Focused Environmental Impact Report ("DEIR") prepared for the CenterPark Specific Plan Project (SCH 2025060731), which proposes the development of up to 250,919 square feet of commercial retail/office uses, up to 4,293 residential units across medium density and mixed-use residential uses, 67.26 acres of open space parkland/non-recreation uses, and associated on-site and off-site infrastructure improvements, located on 29 parcels totaling 257.34 acres in the southwestern portion of the City of Ontario ("Project"). a

SAFER is concerned that the DEIR fails as an informational document and fails to impose all feasible mitigation measures to reduce the Project's impacts to biological resources and historic resources. Moreover, the EIR needs to be amended because the Project may have additional impacts that are peculiar to the project beyond just those discussed in the focused DEIR. SAFER requests that the Planning Department address these shortcomings in a revised draft environmental impact report and recirculate it prior to considering approvals for the Project. b

SAFER reserves the right to supplement these comments during the administrative process. *Galante Vineyards v. Monterey Peninsula Water Management Dist.*, 60 Cal. App. 4th 1109, 1121 (1997). c

Responses to Comment Letter O1 – SAFER, c/o Kylah Staley Lozeau Drury, LLP

Response O1 – a

This comment is noted for the record. This comment does not raise any substantive issues regarding the adequacy of the Draft Focused EIR. Therefore, no further response is needed.

Response O1 – b

The commenter concludes that the Draft Focused EIR fails to impose all feasible mitigation measures to reduce the Project's biological and historic resources impacts. The Draft Focused EIR identifies numerous biological resources and historic resources mitigation measures to minimize impacts to the extent feasible. Furthermore, Draft Focused EIR Sections 4.1: Biological Resources and 4.2: Historic Resources provide an analysis for the potential feasible mitigation measures that would substantially lessen impacts. In addition, see Appendix F: CEQA Guidelines Section 15183 Consistency Analysis for further analysis and discussion on potential impacts associated with the Project, and its findings that are consistent with the TOP 2050 Supplemental EIR.

CEQA does not require adoption of every imaginable feasible mitigation measure. CEQA's requirement applies only to feasible mitigation that will "substantially lessen" a project's significant effects (Public Resources Code, Sections 21002 and 21002.1(b)). As explained by one court: A lead agency's "duty to condition project approval on incorporation of feasible mitigation measures only exists when such measures would [avoid or] 'substantially lessen' a significant environmental effect…Thus, the agency need not, under CEQA, adopt every nickel and dime mitigation scheme brought to its attention or proposed in the project EIR." (San Franciscans for Reasonable Growth v. City and County of San Francisco (1989) 209 Cal.App.3d 1502, 1519.) Rather, an EIR should focus on mitigation measures that are feasible, practical, and effective. (Napa Citizens for Honest Government v. Napa County Board of Supervisors (2001) 91 Cal.App.4th 342, 365.).

Response O1 – c

The comment is noted for the record. This comment does not raise any substantive issues regarding the adequacy of the Draft Focused EIR. Therefore, no further response is needed.

RE: City of Ontario – Draft Focused Environmental Impact Report for CenterPark Specific Plan Project (SCH No. 2025060731) (PSP24-002)

Dear Planning Department and Staff,

On behalf of the Western States Regional Council of Carpenters ("**Western Carpenters**" or "**WSRCC**") and pursuant to California Environmental Quality Act ("**CEQA**") Guidelines Section 15087, our Office is submitting these comments regarding the Draft Focused Environmental Impact Report ("**DEIR**") for the proposed development project known as the "CenterPark Specific Plan Project" (SCH No. 2025060731) (PSP24-002) ("**Project**").

The Western States Regional Council of Carpenters is a labor union representing almost 90,000 union carpenters in 12 states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects.

According to the DEIR, the proposed Project "consists of a Specific Plan to allow for a residential and mixed-use retail/office development on 29 parcels covering approximately 257.34 acres in the City. The development would include up to 250,919 square feet of commercial retail/office uses, up to 4,293 residential units across, and mixed-use residential uses, 67.26 acres of open space parkland/non-recreation uses, and associated on-site and off- site infrastructure improvements… The Project site is comprised of two 'Ownership Areas' (representing different ownership conditions) with 22 planning areas." (*See* Project DEIR, SCH No. 2026060731, Project Description, p. 1-5.)

a

Individual members of the Western Carpenters live, work, and recreate in the City and surrounding communities and would be directly affected by the Project's environmental impacts.

The Western Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

a cont.

Moreover, the Western Carpenters requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (**CEQA**) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law ("**Planning and Zoning Law**") (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency's governing body.

I. THE CITY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY'S ECONOMIC DEVELOPMENT AND ENVIRONMENT

The City should require the Project to be built using a local workers who have graduated from a Joint Labor-Management Apprenticeship Program approved by the State of California, have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a state-approved apprenticeship training program, or who are registered apprentices in a state-approved apprenticeship training program.

b

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

> [A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

> [L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California's workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.[1]

b cont.

Furthermore, workforce policies have significant environmental benefits given that they improve an area's jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (GHG) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that that the "[u]se of a local state-certified apprenticeship program" can result in air pollutant reductions.[2]

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

> People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced

[2] South Coast Air Quality Management District (May 7, 2021) Certify Final Environmental Assessment and Adopt Proposed Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions Program, and Proposed Rule 316 – Fees for Rule 2305, Submit Rule 2305 for Inclusion Into the SIP, and Approve Supporting Budget Actions, *available at* http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf?sfvrsn=10.

> communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.[3]

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (VMT). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.[4] Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

> In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city's First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

b cont.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 ("**AB2011**"). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

[3] California Planning Roundtable (2008) Deconstructing Jobs-Housing Balance at p. 6, *available at* https://cproundtable.org/static/media/uploads/publications/cpr-jobs-housing.pdf

[4] Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? Journal of the American Planning Association 72 (4), 475-490, 482, *available at* http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf.

The City should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

b cont.

II. **THE CITY SHOULD IMPOSE TRAINING REQUIREMENTS FOR THE PROJECT'S CONSTRUCTION ACTIVITIES TO PREVENT COMMUNITY SPREAD OF COVID-19 AND OTHER INFECTIOUS DISEASES**

Construction work has been defined as a Lower to High-risk activity for COVID-19 spread by the Occupations Safety and Health Administration. Recently, several construction sites have been identified as sources of community spread of COVID-19.[5]

Western Carpenters recommend that the Lead Agency adopt additional requirements to mitigate public health risks from the Project's construction activities. Western Carpenters requests that the Lead Agency require safe on-site construction work practices as well as training and certification for any construction workers on the Project Site.

In particular, based upon Western Carpenters' experience with safe construction site work practices, Western Carpenters recommends that the Lead Agency require that while construction activities are being conducted at the Project Site:

c

Construction Site Design:

- The Project Site will be limited to two controlled entry points.
- Entry points will have temperature screening technicians taking temperature readings when the entry point is open.
- The Temperature Screening Site Plan shows details regarding access to the Project Site and Project Site logistics for conducting temperature screening.
- A 48-hour advance notice will be provided to all trades prior to the first day of temperature screening.

[5] Santa Clara County Public Health (June 12, 2020) COVID-19 CASES AT CONSTRUCTION SITES HIGHLIGHT NEED FOR CONTINUED VIGILANCE IN SECTORS THAT HAVE REOPENED, *available at* https://www.sccgov.org/sites/covid19/Pages/press-release-06-12-2020-cases-at-construction-sites.aspx.

- The perimeter fence directly adjacent to the entry points will be clearly marked indicating the appropriate 6-foot social distancing position for when you approach the screening area. Please reference the Apex temperature screening site map for additional details.
- There will be clear signage posted at the project site directing you through temperature screening.
- Provide hand washing stations throughout the construction site.

Testing Procedures:

- The temperature screening being used are non-contact devices.
- Temperature readings will not be recorded.
- Personnel will be screened upon entering the testing center and should only take 1-2 seconds per individual.
- Hard hats, head coverings, sweat, dirt, sunscreen or any other cosmetics must be removed on the forehead before temperature screening.
- Anyone who refuses to submit to a temperature screening or does not answer the health screening questions will be refused access to the Project Site.
- Screening will be performed at both entrances from 5:30 am to 7:30 am.; main gate [ZONE 1] and personnel gate [ZONE 2]
- After 7:30 am only the main gate entrance [ZONE 1] will continue to be used for temperature testing for anybody gaining entry to the project site such as returning personnel, deliveries, and visitors.
- If the digital thermometer displays a temperature reading above 100.0 degrees Fahrenheit, a second reading will be taken to verify an accurate reading.
- If the second reading confirms an elevated temperature, DHS will instruct the individual that he/she will not be allowed to enter the Project Site. DHS will also instruct the individual to promptly

c cont.

notify his/her supervisor and his/her human resources (HR) representative and provide them with a copy of Annex A.

Planning

- Require the development of an Infectious Disease Preparedness and Response Plan that will include basic infection prevention measures (requiring the use of personal protection equipment), policies and procedures for prompt identification and isolation of sick individuals, social distancing (prohibiting gatherings of no more than 10 people including all-hands meetings and all-hands lunches) communication and training and workplace controls that meet standards that may be promulgated by the Center for Disease Control, Occupational Safety and Health Administration, Cal/OSHA, California Department of Public Health or applicable local public health agencies.[6]

c cont.

The United Brotherhood of Carpenters and Carpenters International Training Fund has developed COVID-19 Training and Certification to ensure that Carpenter union members and apprentices conduct safe work practices. The Agency should require that all construction workers undergo COVID-19 Training and Certification before being allowed to conduct construction activities at the Project Site.

Western Carpenters has also developed a rigorous Infection Control Risk Assessment ("**ICRA**") training program to ensure it delivers a workforce that understands how to identify and control infection risks by implementing protocols to protect themselves and all others during renovation and construction projects in healthcare environments.[7]

ICRA protocols are intended to contain pathogens, control airflow, and protect patients during the construction, maintenance and renovation of healthcare facilities.

[6] *See also* The Center for Construction Research and Training, North America's Building Trades Unions (April 27 2020) NABTU and CPWR COVIC-19 Standards for U.S Constructions Sites, *available at* https://www.cpwr.com/sites/default/files/NABTU_CPWR_Standards_COVID-19.pdf; Los Angeles County Department of Public Works (2020) Guidelines for Construction Sites During COVID-19 Pandemic, *available at* https://dpw.lacounty.gov/building-and-safety/docs/pw_guidelines-construction-sites.pdf.

[7] For details concerning Western Carpenters's ICRA training program, *see* https://www.swmsctf.org/courses/icra-best-practices-in-health-care-construction/

ICRA protocols prevent cross contamination, minimizing the risk of secondary infections in patients at hospital facilities.

The City should require the Project to be built using a workforce trained in ICRA protocols.

c cont.

III. THE CALIFORNIA ENVIRONMENTAL QUALITY ACT

CEQA is a California statute designed to inform decision-makers and the public about the potential significant environmental effects of a project. 14 California Code of Regulations ("**CEQA Guidelines**"), § 15002, subd. (a)(1).[8] At its core, its purpose is to "inform the public and its responsible officials of the environmental consequences of their decisions *before* they are made. Thus, the EIR 'protects not only the environment but also informed self-government[.]'" *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564 (internal citation omitted).

To achieve this purpose, CEQA mandates preparation of an Environmental Impact Report ("**EIR**") for projects so that the foreseeable impacts of pursuing the project can be understood and weighed. *Communities for a Better Environment v. Richmond* (2010) 184 Cal. App. 4th 70, 80. The EIR requirement "is the heart of CEQA." CEQA Guidelines, § 15003(a).

d

CEQA directs public agencies to avoid or reduce environmental damage, when possible, by requiring alternatives or mitigation measures. CEQA Guidelines, § 15002, subds. (a)(2)-(3); see also *Berkeley Keep Jets Over the Bay Committee v. Board of Port Commissioners of the City of Oakland* (2001) 91 Cal.App.4th 1344, 1354; *Laurel Heights Improvement Assn. v. Regents of University of California* (1988) 47 Cal.3d 376, 400. The Environmental Impact Report (EIR) serves to provide public agencies and the public in general with information about the effect that a proposed project is likely to have on the environment and to "identify ways that environmental damage can be avoided or significantly reduced." CEQA Guidelines, § 15002, subd. (a)(2).

A public agency must prepare an EIR whenever substantial evidence supports a "fair argument" that a proposed project "may have a significant effect on the

[8] The CEQA Guidelines, codified in Title 14 of the California Code of Regulations, section 15000 et seq., are regulatory guidelines promulgated by the state Natural Resources Agency for the implementation of CEQA. Pub. Res. Code, § 21083. The CEQA Guidelines are given "great weight in interpreting CEQA except when . . . clearly unauthorized or erroneous." *Center for Biological Diversity v. Dept. of Fish & Wildlife* (2015) 62 Cal.4th 204, 217.

environment." Pub. Res. Code, §§ 21100, 21151; CEQA Guidelines, §§ 15002, subds. (f)(1)-(2), 15063; *No Oil, supra,* 13 Cal.App.3d at p. 75; *Communities for a Better Environment v. California Resources Agency* (2002) 103 Cal.App.4th 98, 111-112. If the project has a significant effect on the environment, the agency may approve the project only upon finding that it has "eliminated or substantially lessened all significant effects on the environment where feasible" and that any unavoidable significant effects on the environment are "acceptable due to overriding concerns" specified in Public Resources Code section 21081. See CEQA Guidelines, §§ 15092, subds. (b)(2)(A)-(B).

Essentially, should a lead agency be presented with a fair argument that a project may have a significant effect on the environment, the lead agency shall prepare an EIR even though it may also be presented with other substantial evidence that the project will not have a significant effect. CEQA Guidelines, §§ 15064(f)(1)-(2); see *No Oil, supra,* 13 Cal.App.3d at p. 75 (internal citations and quotations omitted). Substantial evidence includes "enough relevant information and reasonable inferences from this information that a fair argument can be made to support a conclusion, even though other conclusions might also be reached." CEQA Guidelines, § 15384, subd. (a).

d cont.

The EIR has been described as "an environmental 'alarm bell' whose purpose it is to alert the public and its responsible officials to environmental changes before they have reached ecological points of no return." *Berkeley Keep Jets Over the Bay v. Bd. of Port Comm'rs.* (2001) 91 Cal. App. 4th 1344, 1354 ("*Berkeley Jets")*; *County of Inyo v. Yorty* (1973) 32 Cal. App. 3d 795, 810.

The preparation and circulation of an EIR is more than a set of technical hurdles for agencies and developers to overcome. *Communities for a Better Environment v. Richmond* (2010) 184 Cal.App.4th 70, 80 (quoting *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 449-450). The EIR's function is to ensure that government officials who decide to build or approve a project do so with a full understanding of the environmental consequences and, equally important, that the public is assured those consequences have been considered. *Id.* For the EIR to serve these goals it must present information so that the foreseeable impacts of pursuing the project can be understood and weighed, and the public must be given an adequate opportunity to comment on that presentation before the decision to go forward is made. *Id.*

A strong presumption in favor of requiring preparation of an EIR is built into CEQA. This presumption is reflected in what is known as the "fair argument" standard under which an EIR must be prepared whenever substantial evidence in the record supports a fair argument that a project may have a significant effect on the environment. *Quail Botanical Gardens Found., Inc. v. City of Encinitas* (1994) 29 Cal.App.4th 1597, 1602; *Friends of "B" St. v. City of Hayward* (1980) 106 Cal.3d 988, 1002.

Further, it is the duty of the lead agency, not the public, to conduct the proper environmental studies. "The agency should not be allowed to hide behind its own failure to gather relevant data." *Sundstrom, supra,* 202 Cal.App.3d at p. 311. "Deficiencies in the record may actually enlarge the scope of fair argument by lending a logical plausibility to a wider range of inferences." *Ibid*; see also *Gentry v. City of Murrieta* (1995) 36 Cal.App.4th 1359, 1382 (lack of study enlarges the scope of the fair argument which may be made based on the limited facts in the record).

Thus, refusal to complete recommended studies lowers the already low threshold to establish a fair argument. The court may not exercise its independent judgment on the omitted material by determining whether the ultimate decision of the lead agency would have been affected had the law been followed. *Environmental Protection Information Center v. Cal. Dept. of Forestry* (2008) 44 Cal.4th 459, 486 (internal citations and quotations omitted). The remedy for this deficiency would be for the trial court to issue a writ of mandate. *Ibid.*

While the courts review an EIR using an 'abuse of discretion' standard, the reviewing court is not to *uncritically* rely on every study or analysis presented by a project proponent in support of its position. *Berkeley Keep Jets*, *supra*, 91 Cal.App.4th at p. 1355 (quoting *Laurel Heights, supra,* 47 Cal.3d at pp. 391, 409 fn. 12) (internal quotations omitted). A clearly inadequate or unsupported study is entitled to no judicial deference. *Ibid.* Drawing this line and determining whether the EIR complies with CEQA's information disclosure requirements presents a question of law subject to independent review by the courts. *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 515; *Madera Oversight Coalition, Inc. v. County of Madera* (2011) 199 Cal.App.4th 48, 102, 131. As the First District Court of Appeal has previously stated, prejudicial abuse of discretion occurs if the failure to include relevant information precludes informed decision-making and informed public participation, thereby thwarting the statutory goals of the EIR process. *Berkeley Keep Jets, supra*, 91 Cal.App.4th at p. 1355 (internal quotations omitted).

d cont.

Both the review for failure to follow CEQA's procedures and the fair argument test are questions of law, thus, the de novo standard of review applies. *Vineyard Area Citizens for Responsible Growth v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 435. Whether the agency's record contains substantial evidence that would support a fair argument that the project may have a significant effect on the environment is treated as a question of law. *Consolidated Irrigation Dist.*, *supra*, 204 Cal.App.4th at p. 207; Kostka and Zischke, Practice Under the Environmental Quality Act (2017, 2d ed.) at § 6.76. d cont.

Section 15088.5(a) of the CEQA Guidelines provides that an EIR must be recirculated whenever there is disclosure of significant new information. Significant new information includes: (1) disclosure of a new significant environmental impact resulting from the project or from a new proposed mitigation measure; (2) disclosure of a substantial increase in the severity of an environmental impact unless mitigation measures are adopted that reduce the impact to a level of insignificance; and (3) disclosure of a feasible project alternative or mitigation measure considerably different from others previously analyzed which would clearly lessen the significant environmental impacts of the project which the project proponents decline to adopt. *Id.*

Additionally, an EIR must be recirculated when it is so fundamentally inadequate and conclusory in nature that meaningful public review and comment is precluded. *Id.* [citing *Mountain Lion Coalition v. Fish & Game Com.* (1989) 214 Cal.App.3d 1043]. e

Here, as discussed below, the DEIR fails to substantiate all of its conclusions to allow meaningful public review and comment, provide adequate mitigation measures, and fully assess all pertinent environmental factors. Accordingly, this comment letter discloses significant new information, necessitating revision and recirculation of the DEIR.

IV. A SUBSEQUENT EIR IS REQUIRED BASED ON SUBSTANTIAL CHANGES AND NEW INFORMATION OF SUBSTANTIAL IMPORTANCE REGARDING THE PROJECT

State law imposes a mandatory duty to prepare a Subsequent Environmental Impact Report (EIR) when a project's circumstances materially change after a previous EIR certification. California Environmental Quality Act (CEQA) Guidelines Section 15162(a) provides clear, mandatory triggers for the Subsequent EIR process. Specifically, a Subsequent EIR must be prepared if substantial changes are proposed f

for the project that require major revisions of the previous EIR. Such revision is necessary due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects. The proposed CenterPark Specific Plan Project is a substantial undertaking, seeking approval for up to 4,293 residential units and 250,919 square feet of commercial and office space across 257.34 acres. The Project's substantial change in land use and density compared to the original Program EIR's baseline requires a full re-evaluation rather than reliance on earlier analysis and review. The Lead Agency must also analyze the impact of new information of substantial importance, previously unknown, that shows the project will have new significant effects or significantly more severe effects than shown before. The scale of the current proposal makes it unlikely that the original Program EIR adequately assessed impacts from a development of this intensity.

The CenterPark Specific Plan Project also necessitates a Subsequent EIR because the Project's specific environmental effects were not fully examined in the Program EIR, *The Ontario Plan 2050*. CEQA Guidelines Section 15168 governs the use of a Program EIR for a series of related actions. Later, site-specific activities, such as this Specific Plan, must be thoroughly examined in light of the original Program EIR. If the later activity would have effects that were not examined in the program document, a new initial study must be prepared, which would then lead to an EIR or a Negative Declaration. The DEIR itself notes that potential significant impacts remain in the areas of Biological Resources and Historic Resources. The DEIR's own finding is conclusive evidence that effects were not adequately addressed in the previous Program EIR. The Lead Agency is obligated to ensure all environmental effects, particularly the documented, new significant effects arising from the current project's design and footprint, are documented and analyzed fully in a new document. The Lead Agency must also incorporate all feasible mitigation measures and alternatives developed in the Program EIR into later activities, as required by Section 15168(c)(3).

f cont.

V. THE PROJECT CANNOT RELY ON PRIOR ENVIRONMENTAL REVIEW FOR THE ONTARIO PLAN 2050 BECAUSE IT IS INCONSISTENT WITH THAT PLAN

The City cannot legitimately invoke the streamlining provisions of CEQA Guidelines Section 15183 to limit the scope of environmental review for the CenterPark Specific Plan. Section 15183 provides an exemption for projects consistent with the

g

established development density of a certified plan, limiting new analysis to only project-specific effects that are peculiar to the site. The Project cannot rely on prior environmental review for *The Ontario Plan 2050* because it is legally ineligible under the criteria of Section 15183. The determination of consistency is the primary factor for applying the statute's streamlining procedures. Consistency is explicitly defined as the proposed project's density being the same or less than the standard expressed in the certified plan. Here, the Project's proposed density, development metrics, objectives, and policies exhibit notable discrepancies when compared to *The Ontario Plan 2050*, thereby invalidating any claim to streamlined review. Full, comprehensive environmental review is therefore required for all potential significant impacts.

The CenterPark Specific Plan's complex structure and proposed high-intensity land use further demonstrate its lack of consistency with the prior Plan. The project site is a substantial 257.34-acre area encompassing 29 parcels located in the southwestern portion of the City of Ontario. The total development is separated into two distinct "Ownership Areas," each proposing different development metrics and uses, which complicates the consistency analysis. Ownership Area 1 alone includes up to 3,095 residential dwelling units, 210,544 square feet of mixed-use retail and office uses, and 55.98 acres of parkland. Ownership Area 2 adds up to 1,198 residential dwelling units, 40,376 square feet of mixed-use retail and office uses, and 11.28 acres of parkland. The proposed Project is both vertically and horizontally inconsistent with the existing Plan. Vertical inconsistency involves a conflict with the Plan's core goals or land use map, while horizontal inconsistency relates to conflicts with other local planning policies. These significant deviations in density, building intensity, and land use invalidate any attempt to rely on the Program EIR for the initial Plan.

g cont.

The proposed Project's inconsistency with The Ontario Plan (TOP) is most evident in the significant and unavoidable impact identified for Vehicle Miles Traveled (VMT), which directly conflicts with the foundational sustainability goals of the General Plan. Although the DEIR asserts Project consistency with land use and zoning designations, the VMT analysis reveals a fundamental conflict with policies aimed at reducing VMT and promoting sustainability. Specifically, the Project's VMT per service population is projected to substantially exceed the San Bernardino County average threshold in both existing (64.93 versus 37.99) and cumulative (74.76 versus 37.99) scenarios. This severe, unmitigated VMT impact creates a conflict with CEQA Guidelines Section 15064.3(b) and regional policy goals, such as Connect SoCal,

h

which seek to integrate land use and transportation to reduce greenhouse gas emissions.

h cont.

Further, the Project fails to fully support the TOP 2050 objective of designing a comprehensive circulation system for multiple modes of travel, as demonstrated by the analysis of the Reduced Development Area Alternative. While the Project's objectives include creating a local street system that promotes walkability and integrating bike ways to encourage alternative travel, the exclusion of certain planning areas under the Reduced Development Area Alternative is noted to eliminate local connectivity throughout the entire Project site. The Project's over-reliance on automobile-focused circulation is also inconsistent with the General Plan's vision of prioritizing growth that reduces VMT and promotes sustainable communities. Moreover, the severe and unavoidable VMT impact, confirmed by the DEIR itself, implicitly acknowledges that the Project runs contrary to the City's long-term sustainability objectives and conflicts with the climate-related goals embedded within the land use planning framework.

i

VI. THE DEIR'S ANALYSIS OF POTENTIAL IMPACTS TO BIOLOGICAL AND HISTORICAL RESOURCES IS INSUFFICIENT

The Draft Focused EIR contains deficient and insufficient analysis concerning significant environmental impacts, specifically those related to Biological Resources and Historic Resources. The DEIR documentation confirms that the analysis examined both of these resource categories. Crucially, the DEIR itself identifies both Biological Resources and Historic Resources as areas with **potentially significant impacts**. The analysis of the Project's impacts to Biological Resources is fundamentally flawed, suffering from various analytical shortcomings, limitations, and overall inadequacy. The City must demand detailed, rigorous, and defensible baseline analysis, including appropriate year-round field studies, to properly assess the effects of developing the 257.34 acres on any sensitive habitats or species. The potential for irreversible environmental damage to these resources on the large site demands a higher standard of scrutiny than the current DEIR provides.

The Project's DEIR presents a significant limitation in its **biological** resources analysis due to the incomplete evaluation of "Ownership Area 2," resulting in a conclusion of "significant and unavoidable" impacts for that portion of the site. Specifically, the Biological Resources Technical Report and associated field surveys were only completed for "Ownership Area 1" because the Project Applicant lacks

j

control and authorization to access the parcels within "Ownership Area 2." Consequently, the DEIR analyzes Ownership Area 2 at a programmatic level only, relying on the assumption that conditions are similar to the surveyed area, which prevents a full understanding of the potential impacts to sensitive species, riparian habitats, and wetlands within that area. The report explicitly states that unforeseen site conditions could be discovered during future project-level CEQA review for Ownership Area 2, potentially requiring a subsequent EIR or addendum. Therefore, by deferring the detailed biological assessment for a substantial portion of the Project area (64.92 acres for Ownership Area 2 out of a 257.34-acre total), the DEIR fails to provide the full disclosure required by CEQA for a complete project, leading to a conclusion of unavoidable significant impacts for that area.

j cont.

Similarly, the DEIR's analysis concerning **historic** resources is fatally flawed and lacks necessary depth. The analysis for historic and cultural resource impacts must be exhaustive across all 29 parcels comprising the project site. The development of up to 4,293 residential units and over 250,000 square feet of commercial space is a significant land-disturbing activity. The Lead Agency's responsibility includes a thorough inventory and evaluation of any historical or archaeological resources potentially affected by the new construction. The document fails to provide the robust evidence and detailed discussion necessary to establish that the project's impacts to Historic Resources will be appropriately identified and minimized. The absence of a clear, compelling, and fully supported analysis in these two critical environmental areas renders the entire Draft EIR legally insufficient. The City Planning Department cannot certify this document until these fundamental analytical deficiencies have been fully remedied.

k

The Project DEIR determines that its impacts on historic resources are Significant and Unavoidable even after mitigation, based largely on the necessary demolition or relocation of three properties found eligible for listing on the California Register of Historical Resources (CRHR) and/or for designation as a City of Ontario Historic Landmark. Furthermore, the analysis acknowledges that even if the eligible historic structures were avoided, the integrity of their setting, would be compromised by the Project. For the alternative analysis, the DEIR notes that the planned Ontario Ranch Road widening will likely impact the eligible historic buildings regardless of whether the Project is implemented, effectively rendering avoidance efforts moot and highlighting an irresolvable conflict with regional infrastructure plans. Finally, while

mitigation measures are proposed, including documentation, an option for relocation, and a mitigation fee, the DEIR explicitly states that because the resources would be either relocated or demolished, the impact remains significant and unavoidable.

k cont.

VII. THE DEIR'S PROPOSED MITIGATION MEASURES ARE INSUFFICIENT

A fundamental purpose of an EIR is to identify ways in which a proposed project's significant environmental impacts can be mitigated or avoided. Pub. Res. Code §§ 21002.1(a), 21061. To implement this statutory purpose, an EIR must describe any feasible mitigation measures that can minimize the project's significant environmental effects. PRC §§ 21002.1(a), 21100(b)(3); CEQA Guidelines §§ 15121(a), 15126.4(a).

If the project has a significant effect on the environment, the agency may approve the project only upon finding that it has "eliminated or substantially lessened all significant effects on the environment where feasible" PRC §§ 21002; 21002.1, 21081; CEQA Guidelines §§ 15091, 15092(b)(2)(A); and find that 'specific overriding economic, legal, social, technology or other benefits of the project outweigh the significant effects on the environment." PRC §§ 21002; 21002.1, 21081; CEQA Guidelines §§ 15091, 15092(b)(2)(B). "A gloomy forecast of environmental degradation is of little or no value without pragmatic, concrete means to minimize the impacts and restore ecological equilibrium." *Environmental Council of Sacramento v. City of Sacramento* (2006) 142 Cal.App.4th 1018, 1039.

l

CEQA mitigation measures proposed and adopted are required to describe what actions will be taken to reduce or avoid an environmental impact. (CEQA Guidelines § 15126.4(a)(1)(B) [providing "[f]ormulation of mitigation measures should not be deferred until some future time."].) While the same Guidelines section 15126.5(a)(1)(B) acknowledges an exception to the rule against deferrals, such exception is narrowly proscribed to situations where it is impractical or infeasible to include those details during the project's environmental review.

According to CEQA Guidelines, "[w]hen an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any feasible alternative or feasible mitigation measures within its powers that would substantially lessen or avoid any significant effect the project would have on the environment." CEQA Guidelines Section 15096(g)(2).

The proposed mitigation measures described in the DEIR are critically inadequate to address the significant environmental effects of the CenterPark Specific Plan Project. Mitigation measures are the core mechanism for ensuring a project complies with CEQA by reducing or compensating for its environmental impacts. CEQA Guidelines Section 15162(a)(3) is explicit that a Subsequent EIR is required if new information shows that previously infeasible mitigation measures would in fact be feasible and would substantially reduce a significant effect. Furthermore, the subsequent document is required if considerably different mitigation measures from those previously analyzed would substantially reduce a significant effect. The current DEIR flags significant impacts remaining in the Biological and Historic Resources areas. This remaining significance demonstrates that the proposed mitigation is failing the necessary test of effectiveness.

The Draft EIR's Proposed Mitigation Measures are fundamentally flawed because they do not substantially reduce the identified significant effects. The City must require the project proponents to explicitly list all analytical flaws, shortcomings, and limitations of the existing measures. The City must then either adopt alternative mitigation measures that are considerably different from those analyzed or revise the project to eliminate the noted significant effects altogether. Simply adopting an insufficient Mitigation Monitoring and Reporting Program, which is listed as a discretionary action for the Project, will not fulfill the City's CEQA obligations. The City Planning Department must require a more robust and legally defensible set of measures capable of truly addressing the adverse impacts of a major development project of this substantial magnitude. The development of 4,293 residential units must be planned with full confidence that all impacts have been mitigated to the greatest extent feasible. The EIR's mitigation measures for the Project are further inadequate for failing to consider all feasible measures, as described below.

l cont.

A. The DEIR Fails to Consider and Deploy All Feasible Mitigation Measures

A fundamental purpose of an EIR is to identify ways in which a proposed project's significant environmental impacts can be mitigated or avoided. Pub. Res. Code §§ 21002.1(a), 21061. To implement this statutory purpose, an EIR must describe any feasible mitigation measures that can minimize the project's significant environmental effects. PRC §§ 21002.1(a), 21100(b)(3); CEQA Guidelines §§ 15121(a), 15126.4(a).

m

If the project has a significant effect on the environment, the agency may approve the project only upon finding that it has "eliminated or substantially lessened all significant effects on the environment where feasible" PRC §§ 21002; 21002.1, 21081.

Mitigation measures, under CEQA proposed and adopted, are required to describe what actions will be taken to reduce or avoid an environmental impact. (CEQA Guidelines § 15126.4(a)(1)(B) [providing "[f]ormulation of mitigation measures should not be deferred until some future time."].) While the same Guidelines section 15126.5(a)(1)(B) acknowledges an exception to the rule against deferrals, such exception is narrowly proscribed to situations where it is impractical or infeasible to include those details during the project's environmental review.

According to CEQA Guidelines, "[w]hen an EIR has been prepared for a project, the Responsible Agency shall not approve the project as proposed if the agency finds any feasible alternative or feasible mitigation measures within its powers that would substantially lessen or avoid any significant effect the project would have on the environment." CEQA Guidelines Section 15096(g)(2).

However, an impact can only be labeled as significant-and-unavoidable after all available, feasible mitigation is considered and the EIR lacks substantial evidence to support a finding that no other feasible mitigation existed to mitigate the Project's significant impacts.

Here, the Project DEIR fails to identify and analyze all viable and feasible mitigation measures to address the Project's impacts to biological and historical resources.

m cont.

VIII. **CONCLUSION**

The City should direct City Staff and the Project applicant to evaluate and address the issues raised herein prior to approving the Project.

Should the Council have any questions or concerns regarding this comment letter, please do not hesitate to contact our office.

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise ("SWAPE") is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas ("GHG") emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model ("CalEEMod") is a "statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects."[1] CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.[2]

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.[3]

[1] "California Emissions Estimator Model." CAPCOA, 2017, *available at:* http://www.aqmd.gov/caleemod/home.
[2] "California Emissions Estimator Model." CAPCOA, 2017, *available at:* http://www.aqmd.gov/caleemod/home.
[3] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled ("VMT") associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.[4]

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

> "$VMT_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$
>
> Where:
>
> n = Number of land uses being modeled."[5]

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

> "$\text{Emissions}_{pollutant} = VMT * EF_{running,pollutant}$
>
> Where:
>
> $\text{Emissions}_{pollutant}$ = emissions from vehicle running for each pollutant
>
> VMT = vehicle miles traveled
>
> $EF_{running,pollutant}$ = emission factor for running emissions."[6]

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.[7] In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act ("CEQA") requires that such changes be justified by substantial evidence.[8] The default number of construction-related worker trips is calculated by multiplying the

[5] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 23.
[6] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.
[7] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.
[8] CalEEMod User Guide, *available at:* http://www.caleemod.com/, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.[9] Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively."[10] Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.[11] The operational home-to-work vehicle trip lengths are:

> "[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings" (emphasis added). [12]

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).[13]

Worker Trip Length by Air Basin		
Air Basin	**Rural (miles)**	**Urban (miles)**
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	**16.47**	**11.17**
Minimum	**10.80**	**10.80**
Maximum	**19.80**	**14.70**
Range	**9.00**	**3.90**

[13] "Appendix D Default Data Tables." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

3

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8-miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7-miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan ("Project") located in the City of Claremont ("City"). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.[14] In an effort to evaluate the potential for a local hire provision to reduce the Project's construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO_2e)	3,623
Amortized Construction GHG Emissions (MT CO_2e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO2e)	3,024
Amortized Construction GHG Emissions (MT CO_2e/year)	100.80
% Decrease in Construction-related GHG Emissions	***17%***

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project's urbanization level and location.

[14] "Appendix D Default Data Tables." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-85.

Village South Specific Plan (Proposed)
Los Angeles-South Coast County, Annual

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	9			**Operational Year**	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

3.0 Construction Detail

Construction Phase

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Phase Number	Phase Name	Phase Type	Start Date	End Date	Num Days Week	Num Days	Phase Description
1	Demolition	Demolition	9/1/2021	10/12/2021	5	30	
2	Site Preparation	Site Preparation	10/13/2021	11/9/2021	5	20	
3	Grading	Grading	11/10/2021	1/11/2022	5	45	
4	Building Construction	Building Construction	1/12/2022	12/12/2023	5	500	
5	Paving	Paving	12/13/2023	1/30/2024	5	35	
6	Architectural Coating	Architectural Coating	1/31/2024	3/19/2024	5	35	

Acres of Grading (Site Preparation Phase): 0

Acres of Grading (Grading Phase): 112.5

Acres of Paving: 0

Residential Indoor: 2,025,000; Residential Outdoor: 675,000; Non-Residential Indoor: 326,400; Non-Residential Outdoor: 108,800; Striped Parking Area: 0 (Architectural Coating – sqft)

OffRoad Equipment

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Phase Name	Offroad Equipment Type	Amount	Usage Hours	Horse Power	Load Factor
Demolition	Concrete/Industrial Saws	1	8.00	81	0.73
Demolition	Excavators	3	8.00	158	0.38
Demolition	Rubber Tired Dozers	2	8.00	247	0.40
Site Preparation	Rubber Tired Dozers	3	8.00	247	0.40

Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	9			**Operational Year**	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Paul Rosenfeld, Ph.D.

Chemical Fate and Transport & Air Dispersion Modeling

Principal Environmental Chemist

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H_2O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Presentations:

Rosenfeld, P.E., Sutherland, A; Hesse, R.; Zapata, A. (October 3-6, 2013). Air dispersion modeling of volatile organic emissions from multiple natural gas wells in Decatur, TX. *44th Western Regional Meeting, American Chemical Society.* Lecture conducted from Santa Clara, CA.

Sok, H.L.; Waller, C.C.; Feng, L.; Gonzalez, J.; Sutherland, A.J.; Wisdom-Stack, T.; Sahai, R.K.; Hesse, R.C.; **Rosenfeld, P.E.** (June 20-23, 2010). Atrazine: A Persistent Pesticide in Urban Drinking Water. *Urban Environmental Pollution*. Lecture conducted from Boston, MA.

Feng, L.; Gonzalez, J.; Sok, H.L.; Sutherland, A.J.; Waller, C.C.; Wisdom-Stack, T.; Sahai, R.K.; La, M.; Hesse, R.C.; **Rosenfeld, P.E.** (June 20-23, 2010). Bringing Environmental Justice to East St. Louis, Illinois. *Urban Environmental Pollution.* Lecture conducted from Boston, MA.

Rosenfeld, P.E. (April 19-23, 2009). Perfluoroctanoic Acid (PFOA) and Perfluoroactane Sulfonate (PFOS) Contamination in Drinking Water From the Use of Aqueous Film Forming Foams (AFFF) at Airports in the United States. *2009 Ground Water Summit and 2009 Ground Water Protection Council Spring Meeting*, Lecture conducted from Tuscon, AZ.

Rosenfeld, P.E. (April 19-23, 2009). Cost to Filter Atrazine Contamination from Drinking Water in the United States" Contamination in Drinking Water From the Use of Aqueous Film Forming Foams (AFFF) at Airports in the United States. *2009 Ground Water Summit and 2009 Ground Water Protection Council Spring Meeting*. Lecture conducted from Tuscon, AZ.

Wu, C., Tam, L., Clark, J., **Rosenfeld, P**. (20-22 July, 2009). Dioxin and furan blood lipid concentrations in populations living near four wood treatment facilities in the United States. Brebbia, C.A. and Popov, V., eds., *Air Pollution XVII: Proceedings of the Seventeenth International Conference on Modeling, Monitoring and Management of Air Pollution*. Lecture conducted from Tallinn, Estonia.

Rosenfeld, P. E. (October 15-18, 2007). Moss Point Community Exposure To Contaminants From A Releasing Facility. *The 23rd Annual International Conferences on Soils Sediment and Water.* Platform lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld, P. E. (October 15-18, 2007). The Repeated Trespass of Tritium-Contaminated Water Into A Surrounding Community Form Repeated Waste Spills From A Nuclear Power Plant. *The 23rd Annual International Conferences on Soils Sediment and Water*. Platform lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld, P. E. (October 15-18, 2007). Somerville Community Exposure To Contaminants From Wood Treatment Facility Emissions. The *23rd Annual International Conferences on Soils Sediment and Water*. Lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld P. E. (March 2007). Production, Chemical Properties, Toxicology, & Treatment Case Studies of 1,2,3-Trichloropropane (TCP). *The Association for Environmental Health and Sciences (AEHS) Annual Meeting*. Lecture conducted from San Diego, CA.

Rosenfeld P. E. (March 2007). Blood and Attic Sampling for Dioxin/Furan, PAH, and Metal Exposure in Florala, Alabama. *The AEHS Annual Meeting.* Lecture conducted from San Diego, CA.

Hensley A.R., Scott, A., **Rosenfeld P.E.,** Clark, J.J.J. (August 21 – 25, 2006). Dioxin Containing Attic Dust And Human Blood Samples Collected Near A Former Wood Treatment Facility. *The 26th International Symposium on Halogenated Persistent Organic Pollutants – DIOXIN2006*. Lecture conducted from Radisson SAS Scandinavia Hotel in Oslo Norway.

Hensley A.R., Scott, A., **Rosenfeld P.E.,** Clark, J.J.J. (November 4-8, 2006). Dioxin Containing Attic Dust And Human Blood Samples Collected Near A Former Wood Treatment Facility. *APHA 134 Annual Meeting & Exposition.* Lecture conducted from Boston Massachusetts.

Paul Rosenfeld Ph.D. (October 24-25, 2005). Fate, Transport and Persistence of PFOA and Related Chemicals. Mealey's C8/PFOA. *Science, Risk & Litigation Conference.* Lecture conducted from The Rittenhouse Hotel, Philadelphia, PA.

Paul Rosenfeld Ph.D. (September 19, 2005). Brominated Flame Retardants in Groundwater: Pathways to Human Ingestion, *Toxicology and Remediation PEMA Emerging Contaminant Conference*. Lecture conducted from Hilton Hotel, Irvine California.

Paul Rosenfeld Ph.D. (September 19, 2005). Fate, Transport, Toxicity, And Persistence of 1,2,3-TCP. *PEMA Emerging Contaminant Conference.* Lecture conducted from Hilton Hotel in Irvine, California.

Paul Rosenfeld Ph.D. (September 26-27, 2005). Fate, Transport and Persistence of PDBEs. *Mealey's Groundwater Conference.* Lecture conducted from Ritz Carlton Hotel, Marina Del Ray, California.

Paul Rosenfeld Ph.D. (June 7-8, 2005). Fate, Transport and Persistence of PFOA and Related Chemicals. *International Society of Environmental Forensics: Focus On Emerging Contaminants*. Lecture conducted from Sheraton Oceanfront Hotel, Virginia Beach, Virginia.

Paul Rosenfeld Ph.D. (July 21-22, 2005). Fate Transport, Persistence and Toxicology of PFOA and Related Perfluorochemicals. *2005 National Groundwater Association Ground Water And Environmental Law Conference*. Lecture conducted from Wyndham Baltimore Inner Harbor, Baltimore Maryland.

Paul Rosenfeld Ph.D. (July 21-22, 2005). Brominated Flame Retardants in Groundwater: Pathways to Human Ingestion, Toxicology and Remediation. *2005 National Groundwater Association Ground Water and Environmental Law Conference.* Lecture conducted from Wyndham Baltimore Inner Harbor, Baltimore Maryland.

Paul Rosenfeld, Ph.D. and James Clark Ph.D. and Rob Hesse R.G. (May 5-6, 2004). Tert-butyl Alcohol Liability and Toxicology, A National Problem and Unquantified Liability. *National Groundwater Association. Environmental Law Conference*. Lecture conducted from Congress Plaza Hotel, Chicago Illinois.

Paul Rosenfeld, Ph.D. (March 2004). Perchlorate Toxicology. *Meeting of the American Groundwater Trust*. Lecture conducted from Phoenix Arizona.

Hagemann, M.F., **Paul Rosenfeld, Ph.D.** and Rob Hesse (2004). Perchlorate Contamination of the Colorado River. *Meeting of tribal representatives*. Lecture conducted from Parker, AZ.

Paul Rosenfeld, Ph.D. (April 7, 2004). A National Damage Assessment Model For PCE and Dry Cleaners. *Drycleaner Symposium. California Ground Water Association*. Lecture conducted from Radison Hotel, Sacramento, California.

Rosenfeld, P. E., Grey, M., (June 2003) Two stage biofilter for biosolids composting odor control. *Seventh International In Situ And On Site Bioremediation Symposium Battelle Conference* Orlando, FL.

Paul Rosenfeld, Ph.D. and James Clark Ph.D. (February 20-21, 2003) Understanding Historical Use, Chemical Properties, Toxicity and Regulatory Guidance of 1,4 Dioxane. *National Groundwater Association. Southwest Focus Conference. Water Supply and Emerging Contaminants*.. Lecture conducted from Hyatt Regency Phoenix Arizona.

Paul Rosenfeld, Ph.D. (February 6-7, 2003). Underground Storage Tank Litigation and Remediation. *California CUPA Forum*. Lecture conducted from Marriott Hotel, Anaheim California.

Paul Rosenfeld, Ph.D. (October 23, 2002) Underground Storage Tank Litigation and Remediation. *EPA Underground Storage Tank Roundtable*. Lecture conducted from Sacramento California.

Rosenfeld, P.E. and Suffet, M. (October 7- 10, 2002). Understanding Odor from Compost, *Wastewater and Industrial Processes. Sixth Annual Symposium On Off Flavors in the Aquatic Environment. International Water Association*. Lecture conducted from Barcelona Spain.

Rosenfeld, P.E. and Suffet, M. (October 7- 10, 2002). Using High Carbon Wood Ash to Control Compost Odor. *Sixth Annual Symposium On Off Flavors in the Aquatic Environment. International Water Association*. Lecture conducted from Barcelona Spain.

Rosenfeld, P.E. and Grey, M. A. (September 22-24, 2002). Biocycle Composting For Coastal Sage Restoration. *Northwest Biosolids Management Association*. Lecture conducted from Vancouver Washington..

Rosenfeld, P.E. and Grey, M. A. (November 11-14, 2002). Using High-Carbon Wood Ash to Control Odor at a Green Materials Composting Facility. *Soil Science Society Annual Conferenc*e. Lecture conducted from Indianapolis, Maryland.

Rosenfeld. P.E. (September 16, 2000). Two stage biofilter for biosolids composting odor control. *Water Environment Federation.* Lecture conducted from Anaheim California.

Rosenfeld. P.E. (October 16, 2000). Wood ash and biofilter control of compost odor. *Biofest.* Lecture conducted from Ocean Shores, California.

Rosenfeld, P.E. (2000). Bioremediation Using Organic Soil Amendments. *California Resource Recovery Association*. Lecture conducted from Sacramento California.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Oat and Grass Seed Germination and Nitrogen and Sulfur Emissions Following Biosolids Incorporation With High-Carbon Wood-Ash. *Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings*. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., and C.L. Henry. (1999). An evaluation of ash incorporation with biosolids for odor reduction. *Soil Science Society of America*. Lecture conducted from Salt Lake City Utah.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Comparison of Microbial Activity and Odor Emissions from Three Different Biosolids Applied to Forest Soil. *Brown and Caldwell.* Lecture conducted from Seattle Washington.

Rosenfeld, P.E., C.L. Henry. (1998). Characterization, Quantification, and Control of Odor Emissions from Biosolids Application To Forest Soil. *Biofest.* Lecture conducted from Lake Chelan, Washington.

Rosenfeld, P.E, C.L. Henry, R. Harrison. (1998). Oat and Grass Seed Germination and Nitrogen and Sulfur Emissions Following Biosolids Incorporation With High-Carbon Wood-Ash. Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. $41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: $10,000 grant awarded to San Diego State University.
Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. $100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. $20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: $10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: $15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. $500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the United States District Court For The District of New Jersey
Duarte et al, *Plaintiffs,* vs. United States Metals Refining Company et. al. *Defendant.*
Case No.: 2:17-cv-01624-ES-SCM
Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division
M/T Carla Maersk, *Plaintiffs,* vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS "Conti Perdido" *Defendant.*
Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237
Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica
Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants
Case No.: No. BC615636
Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica
The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants
Case No.: No. BC646857
Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado
Bells et al. Plaintiff vs. The 3M Company et al., Defendants
Case: No 1:16-cv-02531-RBJ
Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112th Judicial District
Phillip Bales et al., Plaintiff vs. Dow Agrosciences, LLC, et al., Defendants
Cause No 1923
Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa
Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants
Cause No C12-01481
Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois
Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants
Case No.: No. 0i9-L-2295
Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles
Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC
Case No.: LC102019 (c/w BC582154)
Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division
Brenda J. Cooper, et al., *Plaintiffs,* vs. Meritor Inc., et al., *Defendants*
Case Number: 4:16-cv-52-DMB-JVM
Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No,: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al.,, et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No,: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action N0. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas
Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant.*
Case Number cc-11-01650-E
Rosenfeld Deposition: March and September 2013
Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio
John Michael Abicht, et al., *Plaintiffs,* vs. Republic Services, Inc., et al., *Defendants*
Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)
Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division
Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs,* vs. BP Products North America, Inc., *Defendant.*
Case 3:10-cv-00622
Rosenfeld Deposition: February 2012
Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland
Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants
Case Number: 03-C-12-012487 OT
Rosenfeld Deposition: September 2013

EXHIBIT C

SWAPE Technical Consultation, Data Analysis and Litigation Support for the Environment

1640 5th St.., Suite 204 Santa
Santa Monica, California 90401
Tel: (949) 887-9013
Email: mhagemann@swape.com

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.
B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist
California Certified Hydrogeologist
Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt's responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt's duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

3

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, Oxygenates in Water: Critical Information and Research Needs.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Hagemann, M.F., 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Coloradao.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

Hagemann, M.F., 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Arizona and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Phoenix, AZ (served on conference organizing committee).

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in the Southwestern U.S. Invited presentation to a special committee meeting of the National Academy of Sciences, Irvine, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a tribal EPA meeting, Pechanga, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a meeting of tribal repesentatives, Parker, AZ.

Responses to Comment Letter O2 – Western States Regional Council of Carpenters (WSRCC), c/o Mitchell M. Tsai

Response O2 – a

Comment noted for the record. This comment does not raise any substantive issues regarding the adequacy of the Draft Focused EIR. The commenter requests to be included on the noticing list for all future notices referring or related to the Project related to CEQA and the California Planning and Zoning Law. The commenter has been added to the noticing and mailing list.

The City of Ontario intends to fully comply with the requirements of California Public Resources Code (PRC) Section 21000 et seq., 21092.2, and 21167(f), California Planning and Zoning Law (Government Code Sections 65000-65010), and California Government Code Section 65092. That is, the comment requests that the City comply with CEQA when responding to Western States Regional Council of Carpenters' (WSRCC) comments. As requested, the City's responses to WSRCC's comments will be sent to the WSRCC as part of the Final Focused EIR distribution prior to certification of Final Focused EIR. As the comment does not raise any issues with respect to the content and adequacy of the Draft Focused EIR or the Project's environmental effects, no further response is warranted. The comment is included here to provide a complete record of WSRCC's letter. The comment will become part of the administrative record and will be considered by the decision-makers. The comment does not raise any CEQA related issues, and no response is therefore warranted.

Response O2 – b

Comment noted for the record. The commenter requests that the City require the Project to be built using local workers (i.e., residing within 10 miles of the Project) in order to reduce vehicle miles traveled (VMT), improve jobs/housing balance and the economic performance of the Project and reduce greenhouse gas (GHG) emissions.

The commenter also requests that the City require the Project to be built with construction workers who have graduated from a specified apprenticeship program in order to produce a positive economic impact of the Project. The Draft Focused EIR is intended to evaluate the environmental impacts of the Project. CEQA does not require an analysis of the Project's economic effects or allow mitigation measures intended to address economic characteristics of the Project (14. Cal. Code Regs. Sections 15064[e], 15064[f][6], 15131[a] and 15382). Accordingly, the commenter's request for the City to require construction labor requirements in order to improve economic conditions does not raise any CEQA issues. This comment will be provided to the City's decision-makers for their policy consideration.

Regarding VMT as to construction workers, CEQA provides the lead agency with discretion to choose the most appropriate methodology to evaluate a project's VMT (14. Cal. Code Regs. Sections 15064.3[b][4]). CEQA does not require a separate VMT analysis for construction worker trips or for the construction phase of the Project. The Project's Traffic Analysis (provided as Appendix I to Appendix F of the Draft Focused EIR) was conducted in accordance with San Bernardino County's Traffic Impact Study Guidelines. Additionally, the VMT analysis in the Traffic Analysis concluded that the Project would have a less than significant impact related to VMT, as analyzed in Appendix F of the Draft Focused EIR.

The Project would have a less than significant impact regarding the GHG emissions from construction, as discussed in Appendix F of the Draft Focused EIR, pages 97 through 102. As indicated in Appendix B of Appendix F of the Draft Focused EIR, Table 9, the combined 30-year amortized construction GHG emissions for Phases I and II would be 602 metric tons of carbon dioxide-equivalents (MTCO2e; 93 and 509 MTCO2e, respectively). This would account for approximately 0.7 percent of all GHG emissions related to the Project, including operational emissions, which is approximately 85,987 MTCO2e (refer to Section 4.8: Greenhouse Gas Emissions of Appendix F, pages 97 through 102).

The commenter included a letter from Soil Water Air Protection Enterprise (SWAPE) dated March 8, 2021, which discusses GHG emissions associated with trip lengths for construction workers traveling to a job site. The SWAPE letter provided calculations for GHG emissions reductions resulting from local hire provisions being applied to the Project's construction. The SWAPE letter concludes that if a local hire provision with a 10-mile radius were implemented, the GHG emissions associated with Project construction would decrease by approximately 17 percent. However, the SWAPE letter, and the calculations provided, utilized data and information related to a different project in a separate jurisdiction, the Village South Specific Plan and City of Claremont, respectively. The SWAPE letter also uses CalEEMod 2016, while the current version available is CalEEMod 2022.1. The SWAPE letter also uses EMFAC2014 data, while EMFAC2021 is the latest. Therefore, the calculations do not pertain to the Project and are not based on the correct modeling. In comparison, the analysis provided in the Draft Focused EIR utilizes the most up to date and most relevant modeling for the Project.

Furthermore, the SWAPE letter states that it ran a model "reducing all worker trip lengths to 10 miles…" (page 4 of the SWAPE Letter). Thus, the SWAPE letter assumes that a local hire program would result in local residents comprising 100% of the project's construction workforce, while being located within 10 miles of the project site. In fact, most local hire programs are able to ensure that only a small percentage of construction workers reside locally. For example, the Community Workforce Agreement between the City of Moreno Valley and the construction workers union (CWA) governing public works contracts defines "Local Residents" as residing in the City of Moreno Valley or Riverside County. The CWA only requires that contractors use "best efforts" to hire local residents and sets a goal of 30 percent of the workforce be local residents. Accordingly, the commenter's suggestion that all construction workers live within 10 miles of the Project site is unrealistic.

Using the attainment of the 30 percent goal as an example of an existing local hire program and utilizing the SWAPE letter's assumption that 100 percent local resident workforce would reduce construction-related GHG emissions by 17 percent (and assuming the SWAPE letter's conclusions are transferrable to the Project), implementing a local hire program for the Project would result in a 5.1 percent reduction in construction-related GHG emissions (30 percent of 17 percent). This would represent a reduction of 15.81 MTCO2e of construction-related GHG emissions or approximately 0.018 percent of the Project's mitigated construction and operational mitigated emissions combined (85,987 MTCO2e of construction and operational GHG emissions). This would not constitute a significant reduction in GHG emissions and therefore the implementation of a local-hire provision as a mitigation measure would be ineffective in reducing GHG emissions. The City's "duty to condition project approval on incorporation of feasible mitigation measures only exists when such measures would 'substantially lessen' a significant environmental effect (Public Resources Code Section 21002; CEQA Guidelines, Section 15021, subd. [a][2]). Thus, the [City] need not, under CEQA, adopt every nickel and dime mitigation scheme brought to

its attention or proposed in the project EIR…" (San Franciscans For Reasonable Growth v. City and County of San Francisco [1989] 209 Cal.App.3d 1502.) Furthermore, it is quite possible that the 30 percent goal would not be attained and the reduction in GHG emissions could be substantially less. In addition, the local hire program would require extensive record-keeping and monitoring that would not be justified in light of the insignificant reduction in GHG emissions (i.e., the mitigation would not be roughly proportional to the impact as required by CEQA Guidelines Section 15126.4, subd. [a][4][A]–[B]). Therefore, no revisions to the Draft Focused EIR are required.

Response O2 – c

The commenter requests that the City require certain construction protocols to address the possibility of COVID-19 infections among construction worker during the construction process. This comment does not address the adequacy of the environmental analysis and/or document. This comment is noted for the record. In addition, at this time, COVID-19 public health restrictions on workplace activities functions have been repealed and are no longer in effect. If COVID-19 infections were to increase in severity, it is expected that applicable public health authorities would impose new restrictions and protocols for testing, distancing and other measures on construction sites to address these public health concerns. Therefore, no revisions to the Draft Focused EIR are required.

Response O2 – d

Comment noted for the record. This comment does not raise any substantive issues regarding the adequacy of the Draft Focused EIR. Therefore, no further response is needed.

Response O2 – e

Comment noted for the record. The commenter incorrectly states that the Draft Focused EIR fails to substantiate all of its conclusions to allow meaningful public review and comment, provide adequate mitigation measures, and fully assess all pertinent environmental factors – necessitating revision and recirculation of the Draft Focused EIR. The commenter has failed to identify any instances where the Draft Focused EIR contains insufficient information that precluded inadequate impact analysis. In accordance with State CEQA Guidelines Section 15168 (Title 14 of the California Code of Regulations [CCR]), this Draft Focused EIR (State Clearinghouse No. 2025060731) has been prepared as a "Program EIR", as this EIR addresses the proposed Project and is intended to cover anticipated future discretionary approvals. Pursuant to CEQA Guidelines Section 15183, the Project Applicant for Ownership Area 1 prepared a CEQA Guidelines Section 15183 Consistency Analysis, provided as Appendix F to the Draft Focused EIR, to document that the proposed Project is consistent with TOP 2050 and its associated TOP 2050 Supplemental EIR, and with the exception of potential impacts to biological resources and historic resources, the Project is adequately addressed in the prior EIR and does not represent a new or more severe significant impact that is "peculiar" to the Project, nor does it represent a new or more severe impact related to off-site infrastructure or cumulative impacts. The City serves as the applicant for Ownership Area 2. Therefore, this EIR is "focused" solely on the Project's potential to impact biological resources and historic resources.

Response O2 – f

CEQA Guidelines Section 15162(a) states that:

(a) When an EIR has been certified or a negative declaration adopted for a project, no subsequent EIR shall be prepared for that project unless the lead agency determines, on the basis of substantial evidence in the light of the whole record, one or more of the following:

(1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

(2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

(3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:

(A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;

(B) Significant effects previously examined will be substantially more severe than shown in the previous EIR;

(C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

(D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

The Project is consistent with the City's TOP 2050 land use and zoning designations. The Project would not change the existing land use and zoning designations within TOP 2050, including the referenced property within Ownership Area 2; see the Project Specific Plan for additional information. The Project (Ownership Areas 1 and 2) consists of 22 planning areas accommodating a variety of land uses including residential, commercial/mixed-use, retail, office, parks and open space, and community facility components, and other similar uses that are compatible with the Project site's location and surrounding existing and proposed land uses. The Project Land Use Plan implements the vision of TOP 2050 by providing a designed natural open space framework, interacting with mixed retail and office centers which anchor traditional residential neighborhoods. The Land Use Plan identifies the location of the land use

designations for the Project site. The Project zoning via the Specific Plan mirrors TOP 2050 Land Use designations and is identified along the 22 planning areas (see Draft Focused EIR Figure 3 8: Land Use Plan). As such, the Project does not propose a substantial change in land use and density compared to those analyzed in the original TOP 2050 Supplemental EIR. Pursuant to CEQA Guidelines Section 15183(a), additional environmental review via the Focused EIR is only required for impacts that are: peculiar to the project or property; not previously analyzed as significant in the prior EIR (the TOP 2050 Supplemental EIR); or potentially significant off-site or cumulative impacts not discussed in the prior EIR.

In its recent 2024 decision in *Hilltop Group Inc. v. County of San Diego* (2024), California's Fourth District Court of Appeal clarified that CEQA Guidelines Section 15183 does not permit additional environmental review for project's consistent with and within the scope of the prior EIR (i.e., the TOP 2050 Supplemental EIR), except as necessary to determine whether a project will have significant effects that are peculiar to the project or the site that were not analyzed in the prior EIR and cannot be substantially mitigated by uniformly applied development policies or standards. Additionally, California Public Resources Code 21083.3(a) provides that:

(a) If a parcel has been zoned to accommodate a particular density of development or has been designated in a community plan to accommodate a particular density of development and an environmental impact report was certified for that zoning or planning action, the application of this division to the approval of any subdivision map or other project that is consistent with the zoning or community plan shall be limited to effects upon the environment which are peculiar to the parcel or to the project and which were not addressed as significant effects in the prior environmental impact report, or which substantial new information shows will be more significant than described in the prior environmental impact report.

Pursuant to California Public Resources Code Section 21083.3(a), where peculiar impacts exist for the Project (i.e., historic resources and biological resources), a Focused EIR has been prepared. As such, new significant effects arising from conditions specific to the Project site are documented and analyzed in the Draft Focused EIR. The City has incorporated feasible mitigation measures to reduce impacts to Tier II historic and biological resources to the extent feasible; see Draft Focused EIR Section 4.2: Historic Resources for additional information.

Response O2 – g

CEQA Guidelines Section 15183 states:

(a) CEQA mandates that projects which are consistent with the development density established by existing zoning, community plan, or general plan policies for which an EIR was certified shall not require additional environmental review, except as might be necessary to examine whether there are project-specific significant effects which are peculiar to the project or its site. This streamlines the review of such projects and reduces the need to prepare repetitive environmental studies.

As stated by the commenter, "consistency" with an established general plan, as stipulated by CEQA Guidelines Section 15183, is explicitly defined as the proposed Project's density being the same or less than the standard expressed in the certified plan (i.e., TOP 2050). As described in Response O2 – f, the

Project is consistent with the development density established by the existing zoning and general plan land use set forth by TOP 2050. Refer to Draft Focused EIR Table 3-2: Maximum Project Buildout, which demonstrates that the Project, across 22 planning areas, could be developed at the maximum density envisioned by TOP 2050, which includes up to 4,293 residential dwelling units, 115,809 square feet of retail uses, and 135,110 square feet of offices uses. Additionally, the Project would aid the City in achieving its Regional Housing Needs Assessment goal for new residential dwelling units within the City (i.e., 20,854 additional housing units by 2029). Therefore, the Project is consistent with both TOP 2050 and the City's 2021-2029 Housing Element, which establishes the City's Regional Housing Needs Assessment target for 2021 to 2029.

Response O2 – h

CEQA Guidelines Section 15064.3(b)(4) states that: "A lead agency has discretion to choose the most appropriate methodology to evaluate a project's vehicle miles traveled, including whether to express the change in absolute terms, per capita, per household or in any other measure. A lead agency may use models to estimate a project's vehicle miles traveled, and may revise those estimates to reflect professional judgment based on substantial evidence." Consistent with City Guidelines, the efficiency metric VMT per service population has been adopted by the City of Ontario for transportation impact analysis.

Project impacts related to vehicle miles traveled (VMT) are assessed in Draft Focused EIR Appendix F: CEQA Guidelines Section 15183 Consistency Analysis, page 140, based on the findings of the Vehicle Miles Traveled Analysis (VMT Analysis), provided as Appendix I2 of Draft Focused EIR Appendix F. The Consistency Analysis includes an assessment of the Project's consistency with CEQA Guidelines Section 15064.3(b). Consistent with CEQA Guidelines Section 15064.3, the Project prepared a VMT Analysis that analyzes Project-related VMT consistent with City guidelines. The VMT Analysis determined that the cumulative effect on VMT with buildout of the Project would not exceed the City impact threshold of 27.6 VMT per service population. As such, the Project-generated VMT was estimated under baseline and buildout conditions and was found to be below the City's impact threshold. Therefore, a less than significant impact would occur regarding inconsistency with CEQA Guidelines Section 15064.3 (Appendix F, page 140). The TOP 2050 Supplemental EIR identified a significant and unavoidable impact for conflict with CEQA Guidelines Section 15064.3(b). Therefore, the Project-specific impacts to VMT are consistent with or lesser than those identified for the buildout of TOP 2050. Therefore, no changes to the Draft Focused EIR are required.

Response O2 – i

Refer to Response O2 – h, above. As discussed in the Project's Draft Focused EIR Appendix F, the Project would result in a less than significant VMT impact, consistent with the findings of TOP 2050's Supplemental EIR, which anticipated a significant and unavoidable VMT impact resulting from full buildout of the TOP 2050 Land Use Plan.

The Reduced Development Area Alternative is described in Draft Focused EIR Section 6.0 Alternatives. As described on Draft Focused EIR pages 6-11 through 6-12, the Reduced Development Area Alternative would reduce impacts of the proposed Project to historic and biological resources. However, the Reduced Density Alternative would fail to achieve certain Project objectives consistent with TOP 2050's Policy Plan,

including the provision for a "Comprehensive Circulation System for Multiple Modes of Travel," as the local street system envisioned by the proposed Project would not be achievable under this alternative (Draft Focused EIR page 6-12). The Reduced Development Area Alternative, intended to reduce the Project's anticipated significant and unavoidable impacts to historic resources, would prevent development within properties identified as having historic significance; refer to Draft Focused EIR page 6-8 through 6-9 for further information. Therefore, the Reduced Development Area Alternative would result in a Specific Plan configuration consisting of discontinuous parcels not conducive for local connectivity within the Specific Plan. Even though this alternative fails to fully support the TOP 2050 objective of designing a comprehensive circulation system for multiple modes of travel, this alternative has been identified as the "environmentally-superior alternative" pursuant to CEQA Guidelines Section 15126.6(e)(2), because it would result in lessened impacts to historic resources; refer to Draft Focused EIR page 6-15 for more information.

As described in Draft Focused EIR Section 6, CEQA does not require the lead agency (the City of Ontario) to choose the environmentally superior alternative. Instead, CEQA requires the City to consider environmentally superior alternatives, weigh those considerations against the environmental impacts of the proposed Project, and make findings that the benefits of those considerations outweigh the harm. "Among the factors that may be used to eliminate alternatives from detailed consideration in an EIR are: (i) failure to meet most of the basic project objectives, (ii) infeasibility, or (iii) inability to avoid significant environmental impacts" (State CEQA Guidelines Section 15126.6[c]). Therefore, the Reduced Development Area Alternative may not be considered due to its inability to achieve the Project's objectives and, by extension, TOP 2050 Policy Plan. Therefore, no changes to the Draft Focused EIR are required.

Response O2 – j

Comment noted for the record. The commenter incorrectly states that the Draft Focused EIR contains deficient and insufficient analysis concerning significant environmental impacts, specifically those related to Biological Resources and Historic Resources; continuing to claim that the analysis of the Project's impacts to Biological Resources is fundamentally flawed, suffering from various analytical shortcomings, limitations, and overall inadequacy due to the incomplete evaluation of "Ownership Area 2," resulting in a conclusion of "significant and unavoidable" impacts for that portion of the site.

As discussed in Draft Focused EIR Section 4.1: Biological Resources, Ownership Area 2 is being evaluated only at a programmatic level, and there are no specific development proposals at this time. This Focused EIR evaluates Ownership Area 2 at a "programmatic" level, representing the potential future developments in Planning Areas 1 through 4 and 6. Planning Areas within Ownership Area 2 do not propose any development at this time. Therefore, these Planning Areas would be developed at a future date. Upon commencement of a project-level CEQA review for Ownership Area 2, a focused biological resources assessment and site reconnaissance survey would be conducted for this area, determining the project's potential impacts. Any focused surveys and required mitigation measures would be implemented prior to project approval and construction initiation. Future development would modify the existing habitat when Ownership Area 2 is completed; however, impacts on sensitive species due to habitat modifications would be minimized with mitigation incorporated along with compliance with applicable plans, policies and programs, including the Project Specific Plan and TOP 2050. Furthermore,

the Project zoning mirrors the existing TOP 2050 land use designations for the Project site and is therefore consistent with TOP 2050 findings.

At the time of the project-level CEQA analysis and associated biological resources assessment of Ownership Area 2, unforeseen site conditions could be discovered that warrant a finding of potentially significant impact. In that case, a subsequent CEQA analysis, in the form of a subsequent EIR or EIR Addendum, may be required pursuant to Sections 15162(a) and 15164 of the State CEQA Guidelines. This determination would be made by City staff at the time of future Ownership Area 2 site-specific development applications.

In accordance with State CEQA Guidelines Section 15064, the Draft Focused EIR determines the significance of impacts based on substantial evidence in the record. Where the analysis concluded that impacts would be significant, the Draft Focused EIR identified feasible mitigation measures pursuant to CEQA Guidelines Section 15126.4 to avoid or substantially lessen those impacts. After incorporation of all feasible mitigation measures, the Draft Focused EIR determined that biological resources impacts for Ownership Area 2 would remain significant and unavoidable, as impacts within Ownership Area 2 are not fully known until the time of project-level analysis. Pursuant to State CEQA Guidelines Section 15144, the determination of significant and unavoidable impacts for biological resources in the Draft Focused EIR reflects a good-faith, reasoned analysis based on available information at the time of preparation. The Draft Focused EIR evaluates impacts at a level of detail, commensurate with the Project's programmatic nature and incorporates mitigation measures where feasible. Where mitigation cannot feasibly reduce impacts to a less-than-significant level, the Draft Focused EIR discloses that conclusion.

The City as the Lead Agency may approve a project with unavoidable significant impacts upon adoption of a Statement of Overriding Considerations supported by substantial evidence.

Response O2 – k

Commented noted for the record. The commenter incorrectly states that the Draft Focused EIR's analysis concerning historic resources is fatally flawed and lacks necessary depth; continuing that the document fails to provide the robust evidence and detailed discussion necessary to establish that the Project's impacts to Historic Resources will be appropriately identified and minimized. The City disagrees with these assertions. In accordance with State CEQA Guidelines Section 15064, the Draft Focused EIR determines the significance of impacts based on substantial evidence in the record. Where the analysis concluded that impacts would be significant, the Draft Focused EIR identified feasible mitigation measures pursuant to CEQA Guidelines Section 15126.4 to avoid or substantially lessen those impacts for historic resources. After incorporation of all feasible mitigation measures, the Draft Focused EIR determined that historic resources impacts would remain significant and unavoidable given that the resources would be either relocated or, if relocation proves infeasible, demolished. Pursuant to State CEQA Guidelines Section 15144, the determination of significant and unavoidable impacts for historic resources in the Draft Focused EIR reflects a good-faith, reasoned analysis based on available information at the time of preparation. The Draft Focused EIR evaluates impacts at a level of detail, commensurate with the Project's programmatic nature and incorporates mitigation measures where feasible. Where mitigation cannot feasibly reduce impacts to a less-than-significant level, the Draft Focused EIR discloses that conclusion. See Draft Focused EIR Section 4.2: Historic Resources and Appendix F: CEQA Guidelines 15183 Consistency Analysis of the Draft Focused EIR for further discussion.

The City as the Lead Agency may approve the project upon adoption of a Statement of Overriding Considerations supported by substantial evidence.

Response O2 – l

See Response O2 – j and O2 – k, above. Public Resources Code Sections 21002 and 21002.1(b) establish that agencies must mitigate or avoid significant environmental effects where feasible. Similarly, State CEQA Guidelines Section 15126.4(a)(1) requires an EIR to describe feasible mitigation measures that could minimize significant adverse impacts. The standard is one of feasibility and substantial evidence—not elimination of all impacts. Where the analysis concluded that impacts would be significant, the Draft Focused EIR identified feasible mitigation measures pursuant to CEQA Guidelines Section 15126.4 to avoid or substantially lessen those impacts for biological and historic resources. After incorporation of all feasible mitigation measures, the Draft Focused EIR determined that biological and historic resources impacts would remain significant and unavoidable. State CEQA Guidelines Section 15126.2(b) requires disclosure of significant effects that cannot be avoided if the project is implemented. Where impacts remain significant and unavoidable after adoption of all feasible mitigation, State CEQA Guidelines Section 15093 authorizes the decision-making body to adopt a Statement of Overriding Considerations.

The existence of significant and unavoidable impacts does not demonstrate that mitigation is ineffective or legally deficient. Rather, it reflects that the Lead Agency has applied all feasible mitigation measures and reduced impacts to the greatest extent feasible, consistent with State CEQA Guidelines.

Response O2 – m

Comment noted for the record. The commenter asserts that the Draft Focused EIR failed to identify and analyze all viable and feasible mitigation measures for the Project's impacts to biological and historic resources. See Response O2 – l above. Substantial evidence is provided on Draft Focused EIR pages 4.1-13 through 4.1-16 to support the finding that no feasible mitigation measures were identified to substantially lessen the Project's significant impacts related to biological and historic resources to a less-than-significant level.

Response O2 – n

This comment summarizes the comments discussed above and does not raise a significant environmental issue or concerns about the adequacy of the Draft Focused EIR. As such, no further response is necessary.

Comment Letter O3 – Southern California Edison

SOUTHERN CALIFORNIA EDISON
An EDISON INTERNATIONAL Company

Sent via electronic mail to rtorres@ontarioca.gov

February 17, 2026

Rafael Torres
Assistant Planner
City of Ontario Planning Department
303 East B Street
Ontario CA 91764

RE: CenterPark Specific Plan Project

Dear Mr. Torres:

Southern California Edison (SCE) is pleased to submit the following comments on the Notice of Availability of a Draft Focused Environmental Impact Report for the CenterPark Specific Plan Project (Proposed Project). The City of Ontario proposes a Specific Plan to allow the development of up to 250.919 square feet of commercial retail/office uses, up to 4,293 residential units across medium density and mixed-use residential uses, 67.26 acres of open space parkland/non-recreational uses and associated on-site and off-site infrastructure improvements on 29 parcels in the southwestern portion of the City. a

SCE's Electrical Facilities
SCE provides electrical service to the City of Ontario and maintains electrical transmission and distribution facilities, as well as substations and supporting appurtenances in the City of Ontario.

Method of Service
SCE understands the Project developer will place all new and existing electrical lines within the Project site underground per City of Ontario requirements and in accordance with the City of Ontario undergrounding Ordinances.

In order to determine electrical infrastructure necessary to support the Proposed Project, the project proponent must submit a signed Method of Service agreement to SCE and pay engineering fees for an electric service study to be completed. Infrastructure necessary to support this project is subject to the licensing and permitting authority of the CPUC.

Service requests are handled online: b

Building, Renovation and Planning Projects

For other existing service requests, including removal of SCE equipment, call: 1.800.655.4555.

SCE appreciates the opportunity to comment on the CenterPark Specific Plan Projec and looks forward to working and collaborating with the City. If you have any questions regarding this letter, please contact me at stevi.luevano@sce.com or 661.751.7453.

Regards,

Stevi N Luevano

Responses to Comment Letter O3 – Southern California Edison

Response O3 – a

Comment noted for the record. This comment does not raise any substantive issues regarding the adequacy of the Draft Focused EIR. The commenter requests to be included on the noticing list for all future notices referring or related to the Project related to CEQA and the California Planning and Zoning Law. The commenter has been added to the noticing and mailing list.

Response O3 – b

Comment noted for the record. The commenter states that the project proponent must submit a signed Method of Service agreement to SCE and pay engineering fees for an electric service study to be completed. This comment does not raise any substantive issues regarding the adequacy of the Draft Focused EIR. Therefore, no further response is required.

This page intentionally left blank.

Section 3.0 Errata to the Draft Focused EIR

3.1 INTRODUCTION TO THE ERRATA

In accordance with the CEQA Guidelines Section 15132 (a), this section of the Final Focused EIR provides changes to the Draft Focused EIR that have been made to clarify, correct, or supplement the information provided in that document. This section contains revisions to the Draft Focused EIR based upon (1) additional or revised information required to prepare a response to a specific comment; (2) applicable updated information that was not available at the time of Draft Focused EIR publication; and/or (3) typographical errors. This section also includes additional mitigation measures to fully respond to commenter concerns as well as provide additional clarification to mitigation requirements included in the Draft Focused EIR.

These changes and additions are due to recognition of inadvertent errors or omissions, and to respond to comments received on the Draft Focused EIR during the public review period. The changes described in this section do not add significant new information to the Draft Focused EIR that would require recirculation of the Draft Focused EIR. More specifically, CEQA requires recirculation of a Draft Focused EIR only when "significant new information" is added to a Draft Focused EIR after public notice of the availability of the Draft Focused EIR has occurred (refer to California Public Resources Code [PRC] Section 21092.1 and CEQA Guidelines Section 15088.5), but before the EIR is certified. Section 15088.5 of the CEQA Guidelines specifically states:

New information added to an EIR is not 'significant' unless the EIR is changed in a way that deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the project or a feasible way to mitigate or avoid such an effect (including a feasible project alternative) that the project's proponents have declined to implement. 'Significant new information' requiring recirculation includes, for example, a disclosure showing that:

- A new significant environmental impact would result from the project or from a new mitigation measure proposed to be implemented.
- A substantial increase in the severity of an environmental impact would result unless mitigation measures are adopted to reduce the impact to a level of insignificance.
- A feasible project alternative or mitigation measure considerably different from others previously analyzed would clearly lessen the significant environmental impacts of the project, but the project's proponents decline to adopt it.
- The draft EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded.

CEQA Guidelines Section 15088.5 also provides that "[re]circulation is not required where the new information added to the EIR merely clarifies or amplifies or makes insignificant modifications in an adequate EIR... A decision not to recirculate an EIR must be supported by substantial evidence in the administrative record." As demonstrated in this Final Focused EIR, the changes presented in this section do not constitute new significant information warranting recirculation of the Draft Focused EIR as set forth

in CEQA Guidelines Section 15088.5. Rather, the Draft Focused EIR is comprehensive and has been prepared in accordance with CEQA.

As explained below, none of the changes adds any new significant information and recirculation is not required.

The responses to comments contain material and revisions that will be added to the text of the Final Focused EIR. City of Ontario staff has reviewed this material and determined that none of this material constitutes the type of significant new information that requires recirculation of the Draft Focused EIR for further public comment under CEQA Guidelines Section 15088.5. None of this new material indicates that the Project will result in a significant new environmental impact not previously disclosed or analyzed in the Draft Focused EIR. Additionally, none of this material indicates that there would be a substantial increase in the severity of a previously identified environmental impact that will not be mitigated, or that there would be any of the other circumstances requiring recirculation described in Section 15088.5.

Changes to the Draft Focused EIR are listed by Section, page, paragraph, etc. to best guide the reader to the revision. Changes are identified as follows:

- Deletions are indicated by ~~strikeout text.~~
- Additions are indicated by <u>underline text.</u>

3.1 CHANGES TO THE DRAFT FOCUSED EIR

The following text has been revised in response to comments received on the Draft Focused EIR.

Section 2.0 Introduction

1. Table 2-1: NOP Written Comments Summary

Table 2-1: NOP Written Comments Summary

Commenting Agency/Person	Letter Dated	Summary of Comments	Issue Addressed in:
Southern California Gas Company (SoCal Gas) SE Region	6/26/2025	• No issues	No response required.
South Coast Air Quality Management District	7/9/2025	• No issues	No response required.
California Department of Conservation	7/10/2025	• Potential impact from loss or conversion of farmland	Not applicable to Historic Resources*
Southern California Association of Governments	7/10/2025	• No issues	No response required.
City of Eastvale	7/14/2025	• Potential roadway and intersection traffic impacts	Not applicable to Historic Resources *
California Department of Fish and Wildlife	7/15/2025	• Potential impacts to burrowing owl habitat	<u>Refer to Section 4.1: Biological Resources</u> ~~Not applicable to Historic Resources*~~
SoCal Gas No Conflict	7/28/2025	• No issues	No response required.

**As discussed above, the City determined that, other than biological resources and historic resources, all other environmental issue areas were adequately addressed in the City's TOP EIR, pursuant to CEQA Guidelines Section 15183.*

Section 4.1 Biological Resources

1. Table 4.1-2 on pages 4.1-6 through 4.1-10 is revised as follows:

Table Error! No text of specified style in document.**-2: Special-Status Wildlife Species Potentially Occurring in the Site Vicinity**

Common Name Scientific Name	Status		Habitat Requirements	Occurrence Potential
	Federal	State		
Invertebrates				
Crotch's bumble bee (*Bombus crotchii*)	--	SC	Inhabits grasslands and shrublands and requires a hotter and drier environment than other bumblebee species.	**No Potential:** Not expected to occur on-site based on lack of suitable food sources and heavily disturbed conditions.
Delhi Sands flower-loving fly (*Rhaphiomidas terminatus abdominalis*)	FE	--	Restricted to Delhi sand formations in Riverside and San Bernardino Counties.	**Low Potential.** The Delhi Sands flower-loving fly is not expected to occur on-site based on the historic and ongoing impacts to the Project site respective of active dairy and agricultural use. However, approximately 19-acres of the eastern region of the Project site and Ownership Area 2 are mapped as Delhi soils.
Reptiles and Amphibians				
Western spadefoot (*Spea hammondii*)		SSC	Primary habitat for this species includes suitable breeding habitat below 1500 meters (i.e., vernal pools or other standing water that is free of exotic species) with secondary habitats including adjacent chaparral, sage scrub, grassland, and alluvial scrub habitats.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed soils and continuous dairy and agricultural activities conducted.
Southern California legless lizard (*Anniella stebbinsi*)		SSC	Broadleaved upland forest, chaparral, coastal dunes, and coastal scrub. Occurs in sandy or loose loamy soils under sparse vegetation, generally in moist, loose soil.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation or soils.
California glossy snake (*Arizona elegans occidentalis*)		SSC	Generalist reported from a range of scrub and grassland habitats, often with loose or sandy soils.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation or soils.
Coastal western whiptail (*Aspidoscelis tigris stejnegeri*)		SSC	The coastal western whiptail occurs in a wide variety of habitats including coastal sage scrub, desert scrub, Riversidean alluvial fan scrub, woodlands, grasslands, playas, and respective ecotones between these habitats.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation **or soils.**
San Bernardino ringneck snake (*Diadophis punctatus modestus*)	--	--	Chaparral, coastal sage scrub, grassland, riparian, and woodlands.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation or soils.
Western pond turtle (*Actinemys marmorata*)	--	SSC	The western pond turtle inhabits slow moving permanent or intermittent	**Not Detected.** Not expected to occur on-site based on a lack of suitable

Common Name Scientific Name	Status		Habitat Requirements	Occurrence Potential
	Federal	State		
			streams, small ponds, small lakes, reservoirs, abandoned gravel pits, permanent and ephemeral shallow wetlands, stock ponds, and sewage treatment lagoons.	undisturbed basking sites and permanent water.
Coast horned lizard (*Phrynosoma blainvillii*)	--	SSC	Open areas of sandy soil with coastal sage scrub, chaparral, grassland, riparian, and washes and watercourses.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation or soils.
Coast patch-nosed snake (*Salvadora hexalepis virgultea*)	--	SSC	The coast patch-nosed snake prefers brushy coastal sage scrub/ chaparral habitats.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation or soils.
Two-striped gartersnake (*Thamnophis hammondii*)	--	SSC	Marsh and swamp, riparian scrub, riparian woodland, and wetland. Highly aquatic, found in or near permanent fresh water. Often along streams with rocky beds and riparian growth.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation, soils or permanent water.
Birds				
Cooper's hawk (*Accipiter cooperii*)	--	SSC	Cooper's hawk is most commonly found within or adjacent to riparian/oak forest and woodland habitats. This uncommon resident of California increases in numbers during winter migration.	**Low Potential –** May occasionally forage on-site and breed within the mature Eucalyptus trees**.**
Sharp-shinned hawk (*Accipiter striatus*)	--	CWL	Potential habitat for the sharp-shinned hawk includes montane coniferous forest for potential breeding areas and riparian scrub, woodland, and forest habitat, oak woodland and forest, chaparral, coastal sage scrub, desert scrub, and Riversidean alluvial fan sage scrub for foraging.	**Low Potential –** May occasionally forage on-site.
Tri-colored blackbird (*Agelaius tricolor*)	--	ST/SSC	Marshes and grasslands. Breeding colonies require nearby water, nesting substrate, and foraging habitat of grassland, woodland, or agricultural cropland.	**No Potential.** Not expected to occur on-site based on a lack of nesting habitat (cattail, rushes, and willows) within or adjacent to the Project site.
Golden eagle (*Aquila chrysaetos*)	--	CWL, SFP	Within southern California, the species prefers grasslands, brushlands (coastal sage scrub and chaparral), deserts, oak savannas, open coniferous forests, and montane valleys.	**Low Potential –** May occasionally forage on-site.
Great egret (*Ardea alba*)	--	Nesting Colony	Wet areas, fields, margins of open water.	**Moderate Potential –** Expected to occasionally forage on-site but not breed.
Great blue heron (*Ardea herodias*)	--	Nesting Colony	Wet areas, fields, margins of open water.	**Moderate Potential –** Expected to occasionally forage on-site but not breed.
Burrowing owl (*Athene cunicularia*)	--	~~SSC~~SC	The burrowing owl uses predominantly open land, including grassland, agriculture, playa, sparse coastal sage scrub, desert scrub habitats. Some breeding burrowing owls are year-round residents and additional individuals from the north may winter throughout the region.	**Moderate Potential –** Suitable burrows larger than 4 inches in diameter and foraging habitat documented within the fallow fields on-site.
Ferruginous hawk (*Buteo regalis*)	--	CWL	Grasslands and other open terrain of the plains and foothills. Wintering species. Primarily open fields with low vegetation.	**Low Potential –** May occasionally forage on-site.

Common Name Scientific Name	Status		Habitat Requirements	Occurrence Potential
	Federal	State		
Swainson's hawk (*Buteo swainsoni*)	--	ST	Grasslands and other open terrain.	**Low Potential –** May occasionally forage on-site.
Mountain plover (*Charadrius montanus*)	--	SSC	Dry upland prairies and plains, semidesert, bare dirt fields.	**No Potential**. Not expected to occur on-site based on a lack of suitable undisturbed vegetation.
Northern harrier (*Circus cyaneus*)	--	SSC	The northern harrier frequents open wetlands, wet/lightly grazed pastures, fields, dry uplands/prairies, mesic grasslands, drained marshlands, croplands, meadows, grasslands, open rangelands, fresh and saltwater emergent wetlands.	**High Potential.** Observed adjacent to and on-site during previous surveys of adjacent properties in 2022.
Western yellow-billed cuckoo (*Coccyzus americanus occidentalis*)	FT	SE	Riparian. Uncommon to rare summer resident of valley foothill and desert riparian habitats.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed riparian scrub, forest or woodland vegetation.
Snowy egret (*Egretta thula*)	--	Nesting Colony	Wet areas, fields, margins of open water.	**Moderate Potential –** Expected to occasionally forage on-site but not breed.
White-tailed kite (*Elanus leucurus*)	--	SFP	The white-tailed kite is found in riparian, oak woodlands adjacent to large open spaces including grasslands, wetlands, savannahs and agricultural fields. This non-migratory bird species occurs throughout the lower elevations of California and commonly nests in coast live oaks.	**Low Potential –** May occasionally forage on-site.
California horned lark (*Eremophila alpestris actia*)	--	CWL	Variety of open habitats, usually where trees and large shrubs are absent.	**Moderate Potential –** Expected to occasionally forage and breed on-site.
Merlin (*Falco columbarius*)	--	CWL	Grasslands, coastal sage scrub and estuaries, windrows, open fields.	**Low Potential –** May occasionally forage on-site.
Prairie falcon (*Falco mexicanus*)	--	CWL	Habitat use of the prairie falcon includes annual grasslands to alpine meadows. The prairie falcon is associated primarily with perennial grasslands, savannahs, rangeland, some agricultural fields during the winter season, and desert scrub areas, all typically dry environments of western North American where there are cliffs or bluffs. for nest sites.	**Low Potential –** May occasionally forage on-site.
American peregrine falcon (*Falco peregrinus anatum*)	--	SFP	Throughout the species' range, peregrine falcons are found in a large variety of open habitats, including tundra, marshes, seacoasts, savannahs and high mountains.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed vegetation.
Loggerhead shrike (*Lanius ludovicianus*)	--	SSC	This species of shrike hunts in open or grassy areas and nests in large chaparral shrubs such as ceanothus and lemonade berry.	**Low Potential –** May occasionally forage on-site.
California gull (*Larus californicus*)	--	CWL	Nearly all types of fresh and salt water, cropland, landfills, refuse areas, open lawns.	**Moderate Potential –** Expected to occasionally forage on-site.
California black rail (*Laterallus jamaicensis coturniculus*)	--	ST/SFP	Brackish marsh, freshwater marsh, marsh and swamp, salt marsh, wetland. Inhabits freshwater marshes, wet	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.

Common Name Scientific Name	Status		Habitat Requirements	Occurrence Potential
	Federal	State		
			meadows and shallow margins of saltwater marshes bordering large bays.	
Long-billed curlew (*Numenius americanus*)	--	CWL	Coastal estuaries, upland herbaceous areas, croplands, wet areas, open fields, shores of open water.	**Moderate Potential –** Expected to occasionally forage on-site.
Double-crested cormorant (*Nannopterum auritum*)	--	CWL	Lakes, fresh, salt, and estuarine waters.	**Moderate Potential –** Expected to occasionally forage on-site.
White-faced ibis (*Plegadis chihi*)	--	CWL	Freshwater marshes and brackish areas.	**High Potential.** Observed adjacent to and on-site during previous surveys of adjacent properties in 2022.
Coastal California gnatcatcher (*Polioptila californica californica*)	FT	SSC	The coastal California gnatcatcher is a nonmigratory bird species that primarily occurs within sage scrub habitats in coastal southern California dominated by California sagebrush.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats including coastal sage scrub and associations.
Mammals				
Pallid bat (*Antrozous pallidus*)	--	SSC	Chaparral, coastal scrub, desert wash, Great Basin grassland, Great Basin scrub, Mojavean desert scrub, riparian woodland, Sonoran desert scrub, upper montane coniferous forest, and valley and foothill grassland. Oak and grassland ecotones. Prefers foraging in the open. Roosts in attics or rock cracks; in the open, near foliage at night.	**Low Potential.** Expected to occasionally forage on-site
Northwestern San Diego pocket mouse (*Chaetodipus fallax fallax*)	--	~~--SSC~~	The northwestern San Diego pocket mouse occurs in coastal sage, upland sage scrubs, and alluvial fan sage scrub, sage scrub/grassland ecotones, chaparral, and desert scrubs at all elevations up to 6,000 feet.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats including coastal sage scrub and associations.
Townsend's big-eared bat (*Corynorhinus townsendii*)	--	SSC	A wide variety of habitats including woodlands and arid grasslands. Roosts in mines and caves.	**Low Potential.** Expected to occasionally forage on-site.
San Bernardino kangaroo rat (*Dipodomys merriami parvus*)	FE	SE~~SSC~~	Prefers alluvial scrub, coastal sage scrub habitats with sandy and gravelly substrates.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats including Riversidean alluvial fan sage scrub and associations.
Stephens' kangaroo rat (*Dipodomys stephensi*)	FT~~FE~~	ST	The Stephens' kangaroo rat is found almost exclusively in open grasslands or sparse shrublands with cover of less than 50 percent during the summer.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Western mastiff bat (*Eumops perotis californicus*)	--	SSC	Roosts in rocky areas and forages in grassland, shrublands, and woodlands.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Western yellow bat (*Lasiurus xanthinus*)	--	SSC	Roosts in the skirts of palm trees and forages in adjacent habitats.	**Low Potential.** Scattered palm trees representing potential roosting habitat documented within the central region on-site.
San Diego black-tailed jackrabbit (*Lepus californicus bennettii*)	--	~~--SSC~~	The San Diego blacktailed jackrabbit in open habitats, primarily including grasslands, sage scrub, alluvial fan sage scrub, and Great Basin sage scrub.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.

Common Name Scientific Name	Status		Habitat Requirements	Occurrence Potential
	Federal	State		
Western small-footed myotis *(Myotis ciliolabrum*)	--	--	Feeds among trees or over brush. Roosts in caves, mines, and in cliff or rock openings.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Yuma myotis (*Myotis yumanensis*)	--	--	Water and wooded canyon bottoms. Roosts in caves and abandoned buildings.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
San Diego desert woodrat (*Neotoma lepida intermedia*)	--	SSC	Riversidean and coastal sage scrub, chaparral and nonnative grasslands. Shrub and desert habitats, primarily associated with rock outcroppings, boulders, cacti, or areas of dense undergrowth.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Pocketed free-tailed bat (*Nyctinomops femorosaccus*)	--	SSC	Desert habitats. Roosts in rock crevices in cliffs.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Big free-tailed bat (*Nyctinomops macrotis*)	--	SSC	Desert habitats. Roosts in rock crevices in cliffs.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Los Angeles pocket mouse (*Perognathus longimembris brevinasus*)		SSC	Low elevation grassland alluvial sage scrub and coastal sage scrub habitats.	**No Potential.** Not expected to occur on-site based on a lack of suitable undisturbed habitats.
Federal (USFWS) Protection and Classification FE – Federally Endangered FT – Federally Threatened FC – Federal Candidate for Listing			***State (CDFW) Protection and Classification*** SE – State Endangered SSC – State Species of Special Concern CWL – California Watch List SFP – State Fully Protected SC – State Candidate for Listing

2. Draft Focused EIR Section 4.1.3.: Regulatory Setting on pages 4.1-13 and 4.1-14 has been revised as follows:

California Endangered Species Act

The California Endangered Species Act (CESA), enacted in 1970 and amended in 1984, is a California law that conserves and protects plant and animal species at risk of extinction. It generally parallels the main provisions of the FESA and is administered by the CDFW. Plant and animal species may be designated, threatened or endangered under CESA after a formal listing process by the CFGC. With already approximately 250 species currently listed, a CESA-listed species, or any part or product of the plant or animal, may not be imported into the state, exported out of the state, "taken" (i.e., killed), possessed, purchased, or sold without proper authorization. Implementation of CESA has reduced and avoided impacts to California's most imperiled plants, ~~and~~ animals, and invertebrates, has protected hundreds of thousands of acres of vital habitat, and has led to a greater scientific understanding of California's incredible biodiversity. Candidate species may be afforded temporary protection as though they were already listed as threatened or endangered at the discretion of the Fish and Game Commission. ~~Unlike the FESA, CESA does not include listing provisions for invertebrate species.~~ Under certain conditions and if the take is incidental to otherwise lawful activities, CESA has provisions for take through Incidental Take Permits (ITP) or memorandum of understanding (MOU). In addition, some sensitive mammals and birds

are protected by the state as "fully protected species." California "species of special concern" are species designated as vulnerable to extinction due to declining population levels, limited ranges, and/or continuing threats. This list is primarily a working document for the CDFW's California Natural Diversity Database (CNDDB), which maintains a record of known and recorded occurrences of sensitive species. Informally listed taxa are not protected per se but warrant consideration in the preparation of biological resources assessments.

3. Draft Focused EIR Section 4.1.4: Impact Thresholds and Significance Criteria page 4.1-18 has been revised as follows:

Burrowing Owl Survey

The BUOW (SC~~SSC~~) uses predominantly open land, including grassland, agriculture, playa, sparse coastal sage scrub, and desert scrub habitats. The consultant concluded there would be a moderate potential for BUOW within the Project site. Suitable habitat including burrows larger than 4-inches in diameter, which is suitable habitat for the BUOW, was observed within the Project site.

4. Draft Focused EIR Section 4.1.6: Impact and Mitigation Measures pages 4.1-20 and 4.1-21 has been revised as follows:

Within Ownership Area 1, suitable foraging and/or nesting habitat for the Cooper's hawk (SSC), sharp-shinned hawk (CWL), golden eagle (CWL, SFP), great egret (Nesting Colony), great blue heron (Nesting Colony), Burrowing owl (SC~~SSC~~), ferruginous hawk (CWL), Swainson's hawk (ST), snowy egret (Nesting colony), white-tailed kite (SFP), California horned lark (CWL), merlin (CWL), prairie falcon (CWL), loggerhead shrike (SSC), California gull (CWL), long-billed curlew (CWL), and double crested cormorant (CWL) was observed within the agricultural fields and the artificially created unvegetated dairy effluent retention ponds. Additionally, suitable habitat for breeding was documented within the Project site for Cooper's hawk (SSC) and California horned lark (CWL). As stated in *Section 4.1.3: Regulatory Setting*, the City has approved a Memorandum of Agreement with Inland Empire Resource Conservation District to administer the Greater Prado Basin Habitat Conservation Program and associated Ontario Ranch Habitat Mitigation Fees. Consequently, the Project would adhere to the required Ontario Ranch development impact fees which include a habitat mitigation fee of $4,320 per net acre for proposed residential, commercial, hotel and restaurant, office, and industrial development. These paid mitigation fees would then be collected by the City and be deposited into a trust fund to use for the acquisition, restoration, rehabilitation, and maintenance of lands deemed to have long-term conservation value. Additionally, **MM BIO-2** would require a qualified biologist to conduct a nesting bird survey(s) to be reviewed by the City to reduce impacts to nesting birds to less than significant levels. Therefore, implementation of **MM BIO-2** would reduce potential impacts to these species to less than significant levels.

5. Draft Focused EIR Section 4.1.6: Impact and Mitigation Measures pages 4.1-21 and 4.1-22 has been revised as follows:

Burrowing Owl

BUOW is a CDFW Candidate species pursuant to CESA ~~Species of Special Concern~~. The BUOW uses predominantly open land, including grassland, agriculture, playa, sparse coastal sage scrub, and desert scrub habitats. The BUOW (low-occurrence potential) often occur in less than optimal and/or disturbed

conditions. Suitable burrows larger than 4 inches in diameter and foraging habitat for the BUOW were documented within and adjacent to the east of Ownership Area 1. However, despite the fact that the site has been exposed to long-standing disturbances, suitable BUOW habitat, including burrows larger than 4-inches in diameter, was observed within the fallow fields on Ownership Area 1. Although there is suitable BUOW habitat, potential impacts to refugia, nesting, and foraging habitat for this species would be mitigated to a level of less than significant following implementation of **MM BIO-4**, which would ensure BUOW surveys are completed prior to construction. **MM BIO-4** would implement focused and preconstruction surveys to ensure potential impacts to refugia, nesting, and foraging habitat for the BUOW would be reduced to less than significant levels. Upon arrival at the survey area and prior to initiating the walking surveys, the biologist would use binoculars and/or spotting scope to scan suitable habitat. A total of four surveys would be conducted with at least one site visit between February 15th and April 15th, and a minimum of three surveys at least three weeks apart between April 15th and July 15th. Furthermore, one site visit would occur after June 15th.

6. Mitigation Measure MM BIO-4 on pages 4.1-24 and 4.1-25 has been revised as follows:

MM BIO-4 **Focused and Preconstruction Burrowing Owl Surveys.** Focused surveys for burrowing owl will be conducted in accordance with the March 7, 2012~~2022~~, CDFW staff report on Burrowing Owl Mitigation prior to vegetation removal or ground-disturbing activities for all phases of Project construction. Specifically, a total of four (4) surveys will be conducted: 1) at least one site visit between February 15th and April 15th, and 2) a minimum of three (3) surveys, at least three weeks apart, between April 15th and July 15th, with at least one visit after June 15th. A report of the findings prepared by a qualified biologist shall be submitted to the City of Ontario prior to any permit or approval for ground disturbing activities. The Designated Biologist shall provide CDFW a GIS or KMZ map of BUOW burrow complex(es) and atypical burrows (e.g. culverts, buckled concrete, etc.) The map shall be at a scale of 1:24,000 or finer to show details and shall show locations of all BUOW sightings and labeled if sightings were potential burrows, occupied burrows, satellite burrows, areas of concentrated burrows, and BUOW sign. Locations documented by use of GPS coordinates must be collected in NAD83 datum. The map shall include an outline of the Project Site, a title, north arrow, scale bar, and legend.

A 14-day burrowing owl preconstruction survey will also be conducted immediately prior to the initiation of ground-disturbing construction to ensure protection for this species. The survey will be conducted in compliance with CDFW guidelines (CDFW 2012). A report of the findings prepared by a qualified biologist shall be submitted to the City of Ontario prior to any permit or approval for ground disturbing activities.

~~If burrowing owls are detected on-site during the focused surveys or 14-day preconstruction survey efforts, during the breeding season (February 1st to August 31st) then construction activities shall be limited to beyond 300 feet of the active burrows until a qualified biologist has confirmed that nesting efforts are complete or not initiated. In addition to monitoring breeding activity, if construction is proposed to be initiated during the breeding season or active relocation is proposed, a burrowing owl relocation plan will be developed and approved by the City of Ontario, CDFW and USFWS.~~

If burrowing owl occupancy is confirmed, and if Project activities may impact burrowing owl, including burrow exclusion and closure, the Project Proponent shall begin early coordination with CDFW for appropriate CESA authorization (i.e., Incidental Take Permit (ITP) under Fish and Game Code section 2081) prior to commencement of Project activities. The ITP application shall describe, at a minimum, project activities and equipment, proposed avoidance/buffers, temporary and permanent impacts, monitoring, relocation and/or translocation, and minimization and compensatory mitigation actions. ITP compensatory mitigation will be fulfilled by one or more of following options: 1) Permittee- responsible mitigation land acquisition or 2) Conservation or Mitigation Bank credits (if available).
