1.0 Executive Summary

NV5 has been retained by Skychargers LLC (Client) to conduct a Phase I Environmental Site Assessment (ESA) in conformance with ASTM Practice E 1527-21, Standard Practice for Environmental Site Assessments. The subject property is located at 1640 Tidelands Avenue, San Diego County, National City, California 91950. The objective of this assessment is to determine the presence or absence of Recognized Environmental Conditions (RECs), as defined in ASTM E1527-21. There are no exceptions or deletions from the ASTM Practice E 1527-21.

1.1 Data Gaps

Based on the information obtained during this ESA, it is the professional opinion of NV5 that historical data failure, as defined in the ASTM guidelines, has occurred in attempting to document the history of the subject property back to the earlier of 1940 or the first developed usage of the property in five-year increments. However, based on the information obtained, the lack of documentation is not deemed critical and did not affect the ability to identify potential REC(s) associated with the subject property.

No interviews were conducted with the owner. NV5 sent an ESA questionnaire to be completed by the owner; however, the completed questionnaire was not returned to NV5 at the time of completion of this report. NV5 was not able to interview a key site manager/owner for the subject property, which is considered a data gap of minimal significance.

1.2 Findings and Opinions

NV5 did not identify activities at the subject property or at neighboring properties (potential offsite sources) that would indicate a significant potential for RECs, based on the information contained in the databases reviewed, the research conducted, and/or the site reconnaissance completed, except for the following:

The subject property is listed under Cole Industries on the SAM San Diego, Haz San Diego, FINDS/FRS, and UST Sweeps (x2) databases. The SAM database indicates that a SAM Investigation took place in February 1987, under the Voluntary Assistance Program, with a GT Status listed as Completed - Case Closed and a No Further Action Date listed as March 13, 1987. The database indicates that "No site history available" and the Cleanup History Link provides no additional information. The Haz San Diego database is for a Unified Program Facility Permit, with a Record Status of "Completed". Little other relevant information is provided. The FINDS/FRS listing is associated with listing on the State Master list, with a note under Supplemental Environmental Interests: "**GEOTRACKER**-T0607303113 SUPERFUND". The first UST Sweeps listing has a Status of Active, although does not list any specific tanks. The second listing has a Status of Inactive, with two 1,000-gallon M.V. Fuel tanks listed as Single & Liner, with little other information provided.

NV5 research records available at the CA EPA and the subject property is targeted on the Geotracker Map under Port of San Diego (1440 Tidelands Ave) with a Status of Completed - Case Closed (LOC #H01984-001); and under Cole Industries with a Status of Completed - Case Closed (RB Case # 9UT869 and LOC Case # H04936-001. It appears that these listings are associated

with the parent parcel, adjoining to the north of the proposed subject property parcel. Files were also available for area properties, which have been appended herein and are discussed further in the following section. No other details records pertaining to the actual subject property were available. Based on the lack of details regarding previous investigations, as well as the date of previous sampling and closure (1987), these listings are considered a REC.

Naval Station San Diego, adjoining the subject property to the west-southwest, is listed on the Insp Comp ENF, Envirostar (x2) and HWP databases. According to the Insp Comp ENF database, a Compliance Evaluation Inspection was completed from 2001-2021 and no issues were identified. While previous Violations were recorded, all have returned to compliance. According to the Envirostar database, Remedy Construction is proposed to be completed by 2028; Ready for Anticipated Use by 2030; and Cleanup Complete by 2041. Records indicate that Assessments have been completed, stabilization measures implemented, human exposure controlled and groundwater mitigation controlled. The most recent information available was a Fact Sheet for Permit Renewal, dated March 1, 2006, which is appended herein. The Corrective Action will be carried out under the Federal Facility Site Remediation Agreement, or Corrective Action Consent Agreement, and any subsequent agreements to be entered into and between DTSC and NAVSTA, or any orders to be issued by DTSC. No additional details regarding impact or investigations was available for review. As this property adjoins the subject property and groundwater impact has been confirmed, this adjoining property is considered a REC.

No Historical Recognized Environmental Conditions (HRECs) or Controlled Recognized Environmental Conditions (CRECs), as defined by ASTM 1527-21, were found to be associated with the subject property.

1.3 Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 1640 Tidelands Avenue, San Diego County, National City, California 91950, the property. Any exceptions to, or deletions from, this practice are described in section 7.0 of this report. This assessment has revealed the following recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the subject property.

The subject property is listed under Cole Industries on the SAM San Diego, Haz San Diego, FINDS/FRS, and UST Sweeps (x2) databases. The SAM database indicates that a SAM Investigation took place in February 1987, under the Voluntary Assistance Program, with a GT Status listed as Completed - Case Closed and a No Further Action Date listed as March 13, 1987. The database indicates that "No site history available" and the Cleanup History Link provides no additional information. The Haz San Diego database is for a Unified Program Facility Permit, with a Record Status of "Completed". Little other relevant information is provided. The FINDS/FRS listing is associated with listing on the State Master list, with a note under Supplemental Environmental Interests: "**GEOTRACKER**-T0607303113 SUPERFUND". The first UST Sweeps listing has a Status of Active, although does not list any specific tanks. The second listing has a Status of Inactive, with two 1,000-gallon M.V. Fuel tanks listed as Single & Liner, with little other information provided.

NV5 research records available at the CA EPA and the subject property is targeted on the Geotracker Map under Port of San Diego (1440 Tidelands Ave) with a Status of Completed - Case Closed (LOC #H01984-001); and under Cole Industries with a Status of Completed - Case Closed (RB Case # 9UT869 and LOC Case # H04936-001. It appears that these listings are associated with the parent parcel, adjoining to the north of the proposed subject property parcel. Files were also available for area properties, which have been appended herein and are discussed further in the following section. No other details records pertaining to the actual subject property were available. Based on the lack of details regarding previous investigations, as well as the date of previous sampling and closure (1987), these listings are considered a REC.

Naval Station San Diego, adjoining the subject property to the west-southwest, is listed on the Insp Comp ENF, Envirostar (x2) and HWP databases. According to the Insp Comp ENF database, a Compliance Evaluation Inspection was completed from 2001-2021 and no issues were identified. While previous Violations were recorded, all have returned to compliance. According to the Envirostar database, Remedy Construction is proposed to be completed by 2028; Ready for Anticipated Use by 2030; and Cleanup Complete by 2041. Records indicate that Assessments have been completed, stabilization measures implemented, human exposure controlled and groundwater mitigation controlled. The most recent information available was a Fact Sheet for Permit Renewal, dated March 1, 2006, which is appended herein. The Corrective Action will be carried out under the Federal Facility Site Remediation Agreement, or Corrective Action Consent Agreement, and any subsequent agreements to be entered into and between DTSC and NAVSTA, or any orders to be issued by DTSC. No additional details regarding impact or investigations was available for review. As this property adjoins the subject property and groundwater impact has been confirmed, this adjoining property is considered a REC.

NV5 recommends a Limited Subsurface Investigation to determine if subsurface media has been impacted from historical uses and/or releases on or off-site.

Under the All Appropriate Inquiry Rule, future and continuing obligations are required to maintain landowner liability protections under CERCLA. Specifically, (1) complying with land use restrictions and institutional controls; (2) taking reasonable steps with respect to hazardous substance releases; (3) providing full cooperation, assistance and access to persons that are authorized to conduct response actions or natural resource restoration; (4) complying with information requests and administrative subpoenas; and (5) providing legally required notices.

2.0 Property Information

2.1 Site Description

Site Location and Use	
Location	1640 Tidelands Avenue, National City, San Diego County, California 91950
Legal Description	Not provided or obtained
Current Use	Paved Parcel/Parking Lot
Parcel Number(s)	7600445100 - Parent Parcel
Total Land Area (acres)	Approximately 4.77 of the 26.96 acre parent parcel
Ownership Information	Pasha Automotive Group Services
Parcel Shape	Irregular
Latitude/Longitude	32.66555341/-117.11604998
USGS Quad Name	Point Loma, CA and National City, CA

Building Information	
Date of Construction	N/A
Ownership Information	Pasha Automotive Group Services
Net Rentable Square Feet	N/A square feet
Number of Stories	N/A
Construction Type	N/A
Foundation	N/A
Heating and Cooling Source	N/A
Interior Finishes	N/A
Tenants	N/A

2.2 Current Uses of Adjoining Properties

Direction	Current Use
North	Remainder of parent parcel followed byt Granger Servmart building materials
East	Sweet Dreams Auto Styling, U.S Joiner and Costco Optical Lab
South	Parent parcel, which is paved parking lot
West	Naval Base San Diego

2.3 Physical Settings

Sources	
Topographic Source(s)	United States Geological Survey (USGS), Point Loma, CA and National City, CA Quadrangle 7.5-Minute series topographic map.
Geologic Source(s)	http://mrdata.usgs.gov/geology/state/
Soils Source(s)	USDA Natural Resources Conservation Service Web Soil Survey online database
Other Source(s)	ERIS
Site Characteristics	
Topographic Elevation	11.6 above mean sea level
Topography	The subject property is mostly flat, with engineered grades to manage storm water and an overall slope towards the west-northwest.
Site Description	The subject property consists of a fenced-in paved parking lot, which is currently utilized to store new cars and trucks.
On-Site Water Bodies	None
Depth to Groundwater	Presumed to be less than 15 feet below grade.
Groundwater Flow Direction	Presumed to be towards the west-northwest
Geology	The subject property is underlain by Quaternary alluvium and marine deposits from the Pleistocene to Holocene Age, with the Primary Rock Type being Coarse-detrital. Alluvium, lake, playa, and terrace deposits; unconsolidated and semiconsolidated. Mostly nonmarine, but includes marine deposits near the coast.
Soils	Soils at the subject property are characterized as Made land, with variable characteristics.

3.0 User Provided Information

User Provided Information			
Type of Information	**User Provided**	**Issues Identified**	**Comments**
Title Records	No	No	
Environmental Liens or Activity and Use Limitations (AULs)	No	No	
Specialized Knowledge or Experience	No	No	
Commonly Known or Reasonably Ascertainable Information	No	No	
Valuation Reduction for Environmental Issues	No	No	
Owner, Property Manager, and Occupant Information	No	No	
Reason for Performing Phase I ESA	Yes	No	This Phase I ESA is being conducted as part of the commercial real estate due diligence process.

3.1 Title Records

No title records were provided by the Client and detailed title records were not reasonably ascertainable at the San Diego County website.

3.2 Environmental Liens or Activity and Use Limitations (AULs)

During this investigation, the user (Client) did not provide NV5 with any information pertaining to Activity and/or Use Limitations associated with the subject property. Tim O'Donnell, User representative, completed an ASTM E1527-21 User Questionnaire as follows:

Question	Response
1. "Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?"	No

Question	Response
2. "Did a search of recorded land title records (or judicial records where appropriate,) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?"	Property is "Tidelands" property as defined in California Civil Code SS670,830 and is subject to land use restrictions under state law.
3. "Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?"	No
4. "Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If there is a difference, have you considered or determined whether the lower price is because contamination is known or believed to be present at the property?"	Land is being leased. The currently proposed lease payment reasonably reflects the fair market value of the property if the property were not contaminated.
5. "Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, • Do you know the past uses of the *property*? • Do you know of specific chemicals that are present or once were present at the *property*? • Do you know of spills or other chemical releases that have taken place at the *property*? • Do you know of any environmental cleanups that have taken place at the *property*?"	The subject property has been used for industrial purposes by the United States Navy and the Port of San Diego. Based on commonly known information about such historic uses, it seems likely that discharges of hazardous wastes, including liquid hydrocarbons and marine paints and solvents, occurred on the property; No; No; and No
6. "Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?"	See 5 above. The land has historically been used by the United States Navy and the Port of San Diego for purposes related to loading and unloading of marine cargo and the maintenance of naval and civilian vessels.

4.0 Interviews

Interviews		
Title	**Contact**	**Comments**
Site Owner	Pasha Automotive Group Services	NV5 was accompanied by a Security Guard who had no knowledge regarding the subject property.
Site Manager		
Major Occupant(s)	Car and Truck Parking Lot	
Others		

5.0 Records Review

5.1 Federal and State Database Records Search

NV5 engaged ERIS to search both federal and state environmental record databases and provide a summary of facilities that are identified on any of the database searched. Some of the federal databases searched and specified search radii, are included in the following table. Definitions for these database can be found here. Additional database information and details can be found in Appendix 5 of this report.

The subject property is listed under Cole Industries on the SAM San Diego, Haz San Diego, FINDS/FRS, and UST Sweeps (x2) databases. The SAM database indicates that a SAM Investigation took place in February 1987, under the Voluntary Assistance Program, with a GT Status listed as Completed - Case Closed and a No Further Action Date listed as March 13, 1987. The database indicates that "No site history available" and the Cleanup History Link provides no additional information. The Haz San Diego database is for a Unified Program Facility Permit, with a Record Status of "Completed". Little other relevant information is provided. The FINDS/FRS listing is associated with listing on the State Master list, with a note under Supplemental Environmental Interests: "**GEOTRACKER**-T0607303113 SUPERFUND". The first UST Sweeps listing has a Status of Active, although does not list any specific tanks. The second listing has a Status of Inactive, with two 1,000-gallon M.V. Fuel tanks listed as Single & Liner, with little other information provided.

The subject property is also listed under the Port of San Diego on the Haznet database twice. Both listings are associated with a Hazardous Waste Tracking System, with the first having a Create Date of March 19, 2002 and a Inactive Date of March 18, 2003 and the second having a Create Date of August 30, 1995 and a Inactive Date of October 25, 2000. Little other relevant information is provided.

Lastly, the subject property is listed under San Diego Unified Port District on the Haz Gen database. A link to the data profile reveals the Status to be Inactive as of October 25, 2000. Information indicates that this facility was a Temporary Generator and had first registered on September 2, 1994. Little other relevant information is provided.

NV5 research records available at the CA EPA and the subject property is targeted on the Geotracker Map under Port of San Diego (1440 Tidelands Ave) with a Status of Completed - Case Closed (LOC #H01984-001); and under Cole Industries with a Status of Completed - Case Closed (RB Case # 9UT869 and LOC Case # H04936-001. It appears that these listings are associated with the parent parcel, adjoining to the north of the proposed subject property parcel. Files were also available for area properties, which have been appended herein and are discussed further in the following section.

The property located at 1400 Tidelands Avenue, which is part of the parent parcel, to the north of the proposed subject property, is listed on the following databases: RCRA TSD, FINDS/FRS, SAM San Diego, LUST, AST, Haz San Diego (x3), Haznet (x2), CERS Tank, RCRA LQG, Emissions, Haz TSD, Haz Gen (x3) databases. According to the RCRA TSD database, as of April 2024, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID), which was registered since 2006. The FINDS/FRA listing is associated with listings for air emissions, hazardous waste biennial reporting and for being on the State Master log. The SAM San Diego database indicates that a SAM Investigation was completed on April 24, 1995. The GT Status is listed as Completed - Case Closed. The LUST database indicates this property to be a LUST Cleanup Site that has a Status of Completed - Case Closed, as of November 5, 1996, when a No Further Action Letter was issued. The AST database indicates this facility to have a 16,640 gallon AST. The Haz database listings provide a summary of hazardous waste that were generated at this site. NV5 obtained files for this property, which are appended herein. Based on the reviewed information , these listings are not considered a REC.

The property located at 1420 Tidelands Avenue, adjoining the subject property to the north-northeast, is listed on the following databases: SAM San Diego, Cleanup Sites (x2), Haz San Diego, Haznet, Hist Manifest, FINDS/FRS and Delisted LST. The SAM San Diego database indicates that a SAM Investigation was completed on April 29, 1991. The GT Status is listed as Completed. Similarly, the Cleanup Sites Status for both listings is listed as Completed - Case Closed as of November 3, 2011. According to the database, a contractor discovered heavily stained soil (15 yds x 12 yds), hydrocarbon odor on the property. Petroleum concentrations by Method 418.1 ranged from 150 mg/kg to 67,000 mg/kg. Petroleum concentrations by Method 8015 ranged from 3 mg/kg to 30 mg/kg. Elevated metals [Copper (1,750 mg/kg),
Lead (4,760), and Zinc (3,540 mg/kg)] were also found on site. On September 28, 1.994, the San Diego Port District (which controls the property) was offered the opportunity to work with the Site Assessment and Mitigation Division of Environmental Health Services (SAM-EHS) in resolving the problem. The Port did not respond, so the case was referred to the Regional Board. This case was officially closed in Geotracker and DEH database11/ 3/2011. The Delisted LST database has a Status of Completed as of April 29, 1991. NV5 obtained files for this property, which are appended herein. Based on the reviewed information, these listings are not considered a REC.

The property located at 1440 Tidelands Avenue, part of the parent parcel and adjoining the subject property to the north, is listed on the following databases: CERCLIS, CERCLIS NFRAP, SAM San Diego, (x2), Cleanup Sites, LUST, Envirostar, Haz San Diego (x2), Haznet (x2), Hist Manifest, SEMS Archive, FINDS/FRS, LOP San Diego (x2), UST Sweeps, Calsites and Haz Gen (x2) databases. According to the CERCLIS database, NFRAP-Site does not qualify for the NPL based on existing information and this has become an Archived Site. The SAM San Diego database indicates that a SAM Investigation was completed on April 30, 1992 and in August 1985. The GT Status is listed as Completed in both instances. The Cleanup Sites database indicates a Status of Completed - Case Closed as of August 17, 1992, when a No Further Action Letter was issued. Similarly, the LUST database indicates a Status of Completed - Case Closed as of March 19, 1998, when a No Further Action Letter was issued. The UST Sweeps database indicates that this facility maintains one 3,000-gallon M.V. Fuel tank. NV5 obtained files for this property, which are appended herein. Based on the reviewed information , these listings are not considered a REC.

Naval Station San Diego, adjoining the subject property to the west-southwest, is listed on the Insp Comp ENF, Envirostar (x2) and HWP databases. Naval Base San Diego also known as Naval Station San Diego (the Facility) is a US Navy base that operates a hazardous waste storage unit named the Container Storage Unit and also designated by the Navy as the Container Storage and Transfer (CST) building 3458, as a one-year container storage unit for storage of Hazardous Waste from on-site and off-site generators and is operating under a RCRA equivalent operating permit with an expiration date of June 29, 2028. According to the Envirostar database, Remedy Construction is proposed to be completed by 2028; Ready for Anticipated Use by 2030; and Cleanup Complete by 2041. Records indicate that Assessments have been completed, stabilization measures implemented, human exposure controlled and groundwater mitigation controlled. The most recent information available was a Fact Sheet for Permit Renewal, dated March 1, 2006, which is appended herein. The Corrective Action will be carried out under the Federal Facility Site Remediation

Agreement, or Corrective Action Consent Agreement, and any subsequent agreements to be entered into and between DTSC and NAVSTA, or any orders to be issued by DTSC. No additional details regarding impact or investigations was available for review. As this property adjoins the subject property and groundwater impact has been confirmed, this adjoining property is considered a REC.

The property located at 1545 Tidelands Avenue, adjoining the subject property to the east-northeast, is listed under various names on the following databases: Haz San Diego (x3), CERS Haz (x2), RCRA NonGen, Emissions, RCRA SQG and PFAS Ind databases. Based on the available information, no RECs were identified, although this site is listed as a PFAS facility for furniture and carpet production. As there are no current release listings, this is not considered a REC.

The next relevant listing is Maritime Shipyard, located 0.05 mile north-northwest of the subject property, which is listed on the Envirostar and FUDS databases. According to the Envirostar database, this site has a history of building and repairing concrete and steel ships and the Cleanup Status is listed as Inactive - Needs Evaluation as of 7/1/2005. According to the FUDS database, the Status is listed as Properties without projects - Eligible. Based on the gradient relationship, this listing is not considered a REC.

The property located at 1465 Tidelands Avenue, approximately 0.07 mile north-northeast of the subject property, is listed on the SAM San Diego, Cleanup Sites, and Haz San Diego databases. The SAM San Diego database indicates that a SAM Investigation was completed on June 3, 1992. The Record Status is listed as Completed. Similarly, the Cleanup Sites Status for both listings is listed as Completed - Case Closed as of December 9, 1992. Based on available information, this listing is not considered a REC.

Tidelands Industrial park, located approximately 0.07 mile northeast of the subject property, is listed on the SAM San Diego (x2), Cleanup Sites, LUST and LOP San Diego databases. The SAM San Diego database indicates that a SAM Investigations were completed on September 29, 2011 and on February 21, 2012 and both have a Status of Completed - Case Closed. Similarly, the Cleanup Sites Status for both listings is listed as Completed - Case Closed as of August 15, 2012. Based on available information, this case was opened to resolve environmental issues that were hindering the sale of the property. The property owner contacted DEH for assistance in determining resolution of the following environmental issues: there were reportedly 5 underground storage tanks (USTs) that were removed from the site, three of these removals were documented by DEH, two others did not have records for closure; additionally there was a former sump and dip tank area on the property which was used for the cleaning of wood sanding belts during furniture manufacturing. The USTs that were properly closed. The consultant has concluded that the surface soil contamination associated with the sump was limited in area and vertical extent and did not represent a significant environmental condition. The MTBE detected in groundwater was low in concentration and not necessarily attributable to the site. Therefore, the consultant concluded that the site did not pose a risk to human health, utilities, surface water or other
sensitive receptors in the area of the site, and requested no further action for the case. DEH concurs with this recommendation. These listing are not considered a REC.

Based on the nature, status and/or location (i.e. distance away, gradient relationship), remaining listings are not considered a concern.

5.1.3 Summary of Database Findings and Recommendations

The subject property is listed under Cole Industries on the SAM San Diego, Haz San Diego, FINDS/FRS, and UST Sweeps (x2) databases. The SAM database indicates that a SAM Investigation took place in February 1987, under the Voluntary Assistance Program, with a GT Status listed as Completed - Case Closed and a No Further Action Date listed as March 13, 1987. The database indicates that "No site history available" and the Cleanup History Link provides no additional information. The Haz San Diego database is for a Unified Program Facility Permit, with a Record Status of "Completed". Little other relevant information is provided. The FINDS/FRS listing is associated with listing on the State Master list, with a note under Supplemental Environmental Interests: "**GEOTRACKER**-T0607303113 SUPERFUND". The first UST Sweeps listing has a Status of Active, although does not list any specific tanks. The second listing has a Status of Inactive, with two 1,000-gallon M.V. Fuel tanks listed as Single & Liner, with little other information provided.

NV5 research records available at the CA EPA and the subject property is targeted on the Geotracker Map under Port of San Diego (1440 Tidelands Ave) with a Status of Completed - Case Closed (LOC #H01984-001); and under Cole Industries with a Status of Completed - Case Closed (RB Case # 9UT869 and LOC Case # H04936-001. It appears that these listings are associated with the parent parcel, adjoining to the north of the proposed subject property parcel. Files were also available for area properties, which have been appended herein and are discussed further in the following section. No other details records pertaining to the actual subject property were available. Based on the lack of details regarding previous investigations, as well as the date of previous sampling and closure (1987), these listings are considered a REC.

Naval Station San Diego, adjoining the subject property to the west-southwest, is listed on the Insp Comp ENF, Envirostar (x2) and HWP databases. According to the Insp Comp ENF database, a Compliance Evaluation Inspection was completed from 2001-2021 and no issues were identified. While previous Violations were recorded, all have returned to compliance. According to the Envirostar database, Remedy Construction is proposed to be completed by 2028; Ready for Anticipated Use by 2030; and Cleanup Complete by 2041. Records indicate that Assessments have been completed, stabilization measures implemented, human exposure controlled and groundwater mitigation controlled. The most recent information available was a Fact Sheet for Permit Renewal, dated March 1, 2006, which is appended herein. The Corrective Action will be carried out under the Federal Facility Site Remediation Agreement, or Corrective Action Consent Agreement, and any subsequent agreements to be entered into and between DTSC and NAVSTA, or any orders to be issued by DTSC. No additional details regarding impact or investigations was available for review. As this property adjoins the subject property and groundwater impact has been confirmed, this adjoining property is considered a REC.

The ERIS Report provided an empty list of sites for which the exact locations could not be identified.

5.2 Additional Environmental Record Sources

NV5 contacted the following local agencies for information regarding any hazardous materials response incidents, chemical emergencies, or notices of environmental violations at the subject property.

5.2.1 State Department

Name of Agency:	CA Environmental Protection Agency State Water Resource Control Board-UST Programs
Point of Contact:	Online
Agency Phone Number:	(916) 319-9128
Date of Contact:	November 19, 2024
Method of Communication:	Online
Summary of Communication:	The subject property is targeted on the Geotracker Map, as are adjoining properties. NV5 downloaded all available files, which are appended herein and discussed in the previous sections of this report.
A copy of pertinent documents has been included in the Appendix of this report.	

5.2.2 Fire Department

Name of Agency:	National City Fire Department
Point of Contact:	Online
Agency Phone Number:	619-336-4550
Date of Contact:	November 25, 2024
Method of Communication:	Email
Summary of Communication:	National City Fire Department sent a sewer application and many building permit records. There did not appear to be any UST permits or records contained within these documents. No records of Hazmat incidents sent in the response from National City Fire Department.
A copy of pertinent documents has been included in the Appendix of this report.	

5.2.3 Assessor Department

Name of Agency:	San Diego Assessor
Point of Contact:	Online
Agency Phone Number:	(619) 236-3771
Date of Contact:	November 19, 2024
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by 7600445100 - Parent Parcel and is currently owned by Pasha Automotive Group Services. The subject property reportedly consist of Approximately 4.77 of the 26.96 acre parent parcel acre lot (San Diego County Parcel #: 7600445100 – Parent Parcel)
A copy of pertinent documents has been included in the Appendix of this report.	

5.2.4 Health Department

Name of Agency:	San Diego County Department of Env. Health
Point of Contact:	Edwin C. Andrus
Agency Phone Number:	858-505-6880
Date of Contact:	November 19, 2024
Method of Communication:	Email
Summary of Communication:	A search on-line at DEH Document Library showed no results for the s.p. APN Number.
A copy of pertinent documents has been included in the Appendix of this report.	

5.2.5 County Clerk

ASTM E1527-21 does not impose a duty upon the environmental professional to undertake a review of recorded land title records and judicial records for environmental liens. ASTM E1527-21 places such responsibilities upon the User. It is NV5's understanding that the report User will engage a title company or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records for environmental liens or activity and use limitations currently recorded against or relating to the property. Per the lenders scope of work, NV5 will not specifically be required to conduct a lien search unless requested. If information related to liens or AULs is discovered during the standard Phase I process by NV5, it will be documented in the Phase I report.

5.3 Historic Use Information of the Property/ Surrounding Properties

NV5 researched several sources of historical information to identify the approximate year of development of the subject property and to determine the past use of the subject property since its initial development. Such sources included, but were not limited to, the research and review of tax assessor records, historical aerial photographs, historical Sanborn Maps, topographic maps, deeds and chain-of-ownership records.

5.3.1 Aerial Photographs

The following table provides a summary of reviewed Aerial Photographs, copies of which can be found in the Appendices of this report.

Year	Subject Property		Adjoining Properties
2018, 2020 and 2023	Depicted with pavement covered with vehicles	North	Improved with existing buildings
		East	Improved with existing warehouse and commercial buildings
		South	Improved with a paved lot covered with vehicles
		West	Improved with the two existing buildings and a parking lot

Year	Subject Property		Adjoining Properties
2009, 2010, 2012, 2014 and 2016	Depicted with pavement covered with vehicles	North	Improved with existing buildings, except the existing building to the immediate northwest of the subject property is not depicted and this area is a paved lot
		East	Improved with existing warehouse and commercial buildings
		South	Improved with a paved lot covered with vehicles
		West	Improved with the two existing buildings and a parking lot

Year	Subject Property		Adjoining Properties
2002 and 2005	Depicted with pavement covered with vehicles. There also appears to be a building situated on the southeastern portion of the subject property.	North	Improved with existing buildings, except the existing building to the immediate northwest of the subject property is not depicted and this area is covered with small structures storage trailers
		East	Improved with existing warehouse and commercial buildings
		South	Improved with a paved lot covered with vehicles
		West	Improved with the two existing buildings and depicted with a third building

Year	Subject Property		Adjoining Properties
1985, 1994 and 1996	Depicted with several buildings and paved areas	North	Improved with existing and different buildings
		East	Improved with existing warehouse and commercial buildings
		South	Improved with portions of the buildings situated on the subject property, as well as other structures
		West	Improved with the two existing buildings and depicted with a third building

Year	Subject Property		Adjoining Properties
1980	Depicted with several buildings and paved areas	North	Improved with existing and different buildings
		East	Improved with existing and different warehouse and commercial buildings
		South	Improved with portions of the buildings situated on the subject property, as well as other structures
		West	Improved with the two existing buildings and depicted with a third building

Year	Subject Property		Adjoining Properties
1958, 1966 and 1972	Depicted with several buildings and paved areas	North	Improved with existing and different buildings
		East	Improved with existing and different warehouse and commercial buildings
		South	Improved with portions of the buildings situated on the subject property, as well as other structures
		West	Improved with a different building

Year	Subject Property		Adjoining Properties
1953	Depicted with several buildings and paved areas	North	Improved with existing and different buildings
		East	Unimproved
		South	Improved with portions of the buildings situated on the subject property, as well as other structures
		West	Improved with a different buildings

5.3.2 City Directories

The following table provides a summary of reviewed City Directories, copies of which can be found in the Appendices of this report.

Year	Subject Property		Adjoining Properties

5.3.3 Sanborn Fire Insurance Maps

There was no Sanborn Fire Insurance Map coverage available for the property.

5.3.4 Topographic Maps

The United States Geological Survey (USGS), Point Loma, CA and National City, CA and additional nearby Quadrangle 7.5-Minute series Topographic Maps were reviewed for this Phase I ESA. The maps were published by the USGS between 1904 and 2021. No significant features are depicted on the subject property or within close proximity. Furthermore, no potential environmental concerns, such as oil fields or wetlands, were identified at the subject property. Copies of the Topographic Maps provided by ERIS are included in the Appendices.

Year	Subject Property		Adjoining Properties
2015, 2018 and 2021	No improvements depicted	North	No improvements depicted
		East	No improvements depicted
		South	No improvements depicted
		West	No improvements depicted

Year	Subject Property		Adjoining Properties
1996	No improvements depicted	North	No improvements depicted
		East	Existing warehouse depicted
		South	No improvements depicted
		West	No improvements depicted, labeled as San Diego Naval Station

Year	Subject Property		Adjoining Properties
1967 and 1975	Depicted with a rectangular building	North	Depicted with several buildings
		East	Depicted with several buildings
		South	Depicted with several buildings
		West	No improvements depicted, labeled as San Diego Naval Station

Year	Subject Property		Adjoining Properties
1953	No improvements depicted	North	No improvements depicted
		East	Depicted with several buildings
		South	No improvements depicted
		West	No improvements depicted, labeled as Naval Station

1944	Depicted as part of San Diego Bay	North	Depicted as part of San Diego Bay
		East	Depicted as part of San Diego Bay
		South	Depicted as part of San Diego Bay
		West	Depicted as part of San Diego Bay

1904 and 1930	Depicted as being along coast line and traverses with railroad	North	Depicted as being along coast line and traverses with railroad
		East	Depicted with small buildings
		South	Depicted as being along coast line and traverses with railroad
		West	Depicted as part of San Diego Bay

5.3.5 Other Environmental Reports

No prior environmental assessments for the subject property were provided to NV5.

6.0 Site Reconnaissance

The following table identifies conditions observed on the subject property at the time of site visit.

Site Reconnaissance	
Feature or Condition	**Observed on Subject Property**
Hazardous Materials/ Petroleum Products	No
Drums or Containers	No
Underground Storage Tanks (UST's)	No
Aboveground Storage Tanks (AST's)	No
Source of Heating and Cooling	No
Indications of Polychlorinated Biphenyls (PCBs)	No
Pits, Ponds & Lagoons	No
Odors	No
Stained Soil or Pavement	Yes
Stressed Vegetation	No
Solid Waste Disposal	No
Medical/biological wastes/ X-ray or other radioactive activities	No
Pools of Liquid	No
Drains and Sumps	No
Septic Systems	No
Storm/Waste Water	Yes
Wells	No

6.1 Methodology and Limiting Conditions

On November 25, 2024, NV5's, John Royal, performed a walking inspection of the subject property. NV5 inspected the subject property and sites located within the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-21. NV5 was accompanied by a Security Guard. The weather conditions were mostly sunny with temperatures in the upper 60s at the time of the site inspection. Access was provided to all exterior areas of the property and a representative sample of the interior areas. Limiting conditions are discussed in Section 7.7, Limitations and Exceptions, of this report.

6.2 Exterior and Interior Observations

6.2.1 Hazardous Materials/ Petroleum Products

No significant use of hazardous substances is known to occur at the property.

6.2.2 Drums or Containers

There were no current indications of drums or containers located on the subject property.

6.2.3 Underground Storage Tanks (USTs)/Aboveground Storage Tanks (ASTs)

NV5 did not observe any apparent evidence of existing or former USTs/ ASTs.

6.2.4 Source of Heating and Cooling

There are no HVAC systems present.

6.2.5 Indications of Polychlorinated Biphenyls (PCBs)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA).

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Four pole-mounted transformers were observed on the subject property. The transformers are not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformers. Based on the good condition of the equipment, the transformer is/transformers are not expected to represent a significant environmental concern.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during the site reconnaissance.

6.2.6 Pits, Ponds & Lagoons

No evidence of pits, ponds and/or lagoons in connection with waste treatment or waste disposal was noted on the subject property.

6.2.7 Odors

No significant odors were noted on the subject property.

6.2.8 Stained Soil or Pavement

No evidence of significantly stained soil or pavement was noted on the subject property, other than typical de minimis vehicular staining.

6.2.9 Pools of Liquid

No unidentified pools of liquid were noted on the subject property.

6.2.10 Stressed Vegetation

No evidence of stressed vegetation anticipated to be caused by contamination was noted on the subject property.

6.2.11 Solid Waste Disposal

No evidence of illegal dumping of solid waste was observed during the site reconnaissance.

6.2.12 Medical/biological wastes/ X-ray or other radioactive activities

No medical or biological wastes were observed. No x-ray or other radioactive activities were observed or reported.

6.2.13 Drains and Sumps

No drains or sumps not connected to the city sewer were noted on the subject property. In addition, no oil-water separators or oil clarifiers were observed or reported.

6.2.14 Septic Systems

No septic systems are present on the subject property.

6.2.15 Storm/Waste Water

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located on the subject property and in the public right of way. The subject property is connected to a municipal owned and maintained sewer system.

6.2.16 Wells

No evidence of wells (dry wells, monitoring wells, water wells, irrigation wells, injection wells or abandoned wells) was noted on the subject property.

7.0 Supplemental Information

7.1 Purpose

The assessment was designed to provide an objective, independent, professional opinion of the potential environmental risks, if any, associated with the subject property. The purpose of this environmental assessment was to identify recognized environmental conditions at the subject property. The term recognized environmental condition means (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized
environmental condition.

The identification of recognized environmental conditions in connection with the subject property may impose an environmental liability on owners or operators of the site, reduce the value of the site, or restrict the use or marketability of the site, and therefore, further investigation may be warranted to evaluate the scope and extent of potential environmental liabilities.

7.2 Scope of Services

This assessment was performed in general accordance with the scope of services outlined in the American Society for Testing and Materials (ASTM) E 1527-21, Standard Practice for Environmental Site Assessments. There are no exceptions or deletions from the ASTM Practice E 1527-21. The services performed by NV5 for this Phase I Environmental Site Assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by firms similar to NV5 which are currently providing similar services. The scope of this assessment includes the following:

Records Review - Review of records (environmental database, local and state records, historical records, etc.)

Site Reconnaissance - A visit and inspection of the subject property

Interviews - Interviews conducted with present and past owners (if feasible), operators and occupants of the subject property; and with local and/or state government officials

Report Preparation - the evaluation of information and the preparation of the report including the findings, conclusions and recommendations, if any, for additional investigation(s)

Typically, a Phase I ESA does not include sampling or testing of air, soil, groundwater, surface water, or building materials. These activities would be carried out in a Phase II ESA, if warranted.

7.3 Significant Assumptions

There is a possibility that even with the proper application of these methodologies that there may be conditions that exist on the subject property that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. NV5 believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, NV5 cannot and does not warrant or guarantee that the information provided by these sources is accurate or complete. The methodologies of this assessment are not intended to produce all inclusive or comprehensive results, but rather to provide the Client with information relating to the subject property.

7.4 Special Terms and Conditions

Authorization to perform this assessment was given by the Client on November 14, 2024 Instructions as to the location of the subject property, access, and an explanation of the subject property and facilities to be assessed were provided by Tim O'Donnell of Skychargers LLC.

The following is a list of terminology that is used throughout this report and therefore should be defined:

Actual Knowledge: The knowledge actually possessed by an individual who is a real person, rather than an entity.

Adjoining Properties: Any real property or properties the border of which is contiguous or partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the subject property but for a street, road, or other public thoroughfare separating them.

All Appropriate Inquiry: That inquiry constituting "all appropriate inquiry into previous ownership and uses of the subject property consistent with good commercial or customary practice", as defined in CERCLA, 42 U.S.C 9607 (b)(3), 9607 (q); and 9607 (r), assuming compliance with other elements of the defense.

Activity and Use Limitation (AUL): Legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

Business Environmental Risk: A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in the E 1527-21 practice. Considerations of business environmental risk may involve addressing one or more non-scope considerations.

Controlled Recognized Environmental Condition: A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).

Data Failure: A failure to achieve the historical research objectives of ASTM 1527-21 even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data Gap: A lack of or inability to obtain information required by ASTM E1527-21 despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by the ASTM E1527-21, including, but not limited to, site reconnaissance (for example, an inability to conduct the subject property visit) and interviews (for example, an inability to interview the key subject property manager, regulatory officials, etc.).

Due Diligence: The process of inquiring into the environmental characteristics of a parcel of commercial real estate or other conditions, usually in connection with a property transaction.

Environmental Professional: A person meeting the education, training and experience requirements, as set forth in the ASTM E 1527-21 practice.

Hazardous Substance: A substance defined as a hazardous substance pursuant to CERCLA 42 USC 9601(14), as interpreted by USEPA regulations and the courts.

Historical Recognized Environmental Condition: A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by
the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

Migrate/ Migration: Refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

Obvious: That which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer while visually or physically observing the subject property.

Occupants: Those tenants, subtenants, or other persons or entities using the subject property or a portion of the subject property.

Owner: Generally, the fee owner of record of the subject property.

Practically Reviewable: Information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the subject property without the need for extraordinary analysis of irrelevant data.

Reasonable Ascertainable: Information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

Recognized Environmental Conditions: The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

Subject Property: The property that is the subject of the environmental site assessment described in this practice.

User: The party seeking to use Practice E 1527-21 to perform an environmental site assessment of the subject property.

7.5 User Reliance

This report is for the use and benefit of, and may be relied upon by Skychargers LLC and any of its affiliates, and third parties authorized by Skychargers LLC and NV5, including the lender(s) in connection with a secured financing of the property, and their respective successors and assigns.

7.6 Definitions

NPL, Delisted NPL, SEMs and SEMS Archive
The National Priority List (NPL) is the USEPA database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. The Delisted NPL is the database of delisted Superfund sites. The Superfund Enterprise Management System (SEMS) List tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

RCRA Facilities
Regulated hazardous waste activity is tracked under the Resource Conservation and Recovery Information System as defined by the Resource Conservation Act (RCRA). Facilities that treat, store or dispose of hazardous waste are listed in the RCRA TSD database. Facilities that generate hazardous wastes are listed in the RCRA Generators (RCRA GEN) database. This database includes facilities that generate at least 1,000 kg/month of non-acutely hazardous waste or 1 kg/month of

acutely hazardous waste, referred to as large-quantity generators, and those that generate less than 1,000 kg/month of non-acutely hazardous waste, referred to as small-quantity generators. RCRA facilities which have had a release of hazardous waste or constituents to the environment, for which the government is requiring corrective action, are tracked in the Corrective Action Tracking System (RCRA COR) database, while generators that are known to have violated RCRA regulations are tracked in the RCRA violations and enforcement (RCRA Viol). These violations can be the result of paperwork problems and are not necessarily related to releases of hazardous material.

ERNS Incidents and Spills 1990 Sites
The Emergency Response and Notification System (ERNS) is a national database containing records of releases of oil and hazardous substances reported to the USEPA, U.S. Coast Guard, the National Response Center and the Department of Transportation, since 1986.

FINDS & TRIS Database sites
The Facility Index System (FINDS) report is a computerized inventory of all facilities that are regulated or tracked by the USEPA. These facilities are assigned an identification number that serves as a cross-reference for other databases in the USEPA's program system. The Toxic Inventory Information System (TRIS) report contains information concerning the industrial release and/or transfer of toxic chemicals, as reportable under Title III of the Superfund Amendments and Re-authorization Act of 1986 (Sara Title III). Inclusion on this database is required for facilities which release reportable amounts of chemicals into the environment.

State/Tribal Sites
State/Tribal Sites are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund or NPL) are identified along with sites where cleanup will be paid for by potentially responsible parties.

State/Tribal SWF/LF Facilities
The State/Tribal Solid Waste Landfill Database (SWF/LF) is a collection of known regulated and unregulated solid waste landfills, incinerators, or transfer stations.

State/Tribal UST & LUST Sites
The Leaking Underground Storage Tank (LUST) database is a listing of confirmed or suspected releases from underground storage tanks that have been reported to the state. The state Underground Storage Tank (UST) database is an inventory of all regulated USTs.

Federal IC, EC and Brownfield Sites
Federal Institutional Controls (IC) and Engineering Controls (EC) are Superfund sites that have either an engineering or an institutional control. The data includes the control and the media contaminated. The EPA Brownfield Management System (BMS) is a database designed to assist EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various Brownfield Grant Programs. The database defines a brownfield site as "real property where expansion or redevelopment is complicated by actual or perceived environmental contamination.

State/Tribal IC/EC, VCP or Brownfields Sites
State/Tribal Brownfields is a listing of all former industrial properties that lie dormant or underutilized due to liability associated with real or perceived contamination. Some sites are noted as having institutional controls placed on them. The Brownfields Management System (BMS) is an analytical database designed to assist EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various Brownfield Grant Programs. The database defines a brownfield site as "real property where expansion or redevelopment is complicated by actual or perceived environmental contamination."

State/Tribal VCP is a listing of all sites in the Voluntary Cleanup Program (VCP) and the Innocent Owner/Operator Program (IOP). Some VCP and IOP sites are noted as having institutional (IC) or engineering (EC) controls placed on them.

7.7 Limitations and Exceptions

This report has been prepared for the exclusive use of Client, and should not be reproduced or disseminated without the written approval of NV5 and the Client. NV5 has retained a copy of this report. No additions or deletions are permitted without the express written consent of NV5. Use of this report in whole or in part by parties other than the Client is prohibited.

Information obtained from public records review, the site inspection, and interviews were used to characterize the subject property. Although the services provided are extensive, findings and conclusions are limited to and by the information obtained. If information becomes available concerning the subject property that was not included in this report, it should be made available to NV5 so that the conclusions and/or recommendations can be re-examined and modified, if applicable. Further non-intrusive and intrusive investigations and assessment methods are available that could further characterize the subject property's soil and ground water conditions.

The Site Plan is a sketch of the subject property, which identifies observations of characteristics of the subject property, of significance, at the time of the inspection of the subject property. These plans are not drawn to scale and should not be relied upon as an engineering plan.

NV5's interviews are limited by the quality and completeness of answers provided to the proposed questions during the interview(s). The extent of historical research performed by NV5 is limited to availability, cost, and timeliness of utilizing various resources such as aerial photographs, historical Sanborn Maps, Land Evidence Records (deeds pertaining to historical subject property ownership), and local directories, all of which may indicate the historical utilization of the subject property. It should be noted that while the chain-of-ownership research and information provided should be accurate, it should in no way be construed as an actual Title search and should not be utilized or relied upon for any legal purposes.

Events occurring on the subject property after November 25, 2024, the date of the inspection, are beyond the scope of this report. NV5 makes no expressed or implied representations or warranties regarding any changes in condition of the premises after this date.

8.0 Deviations

No deviations from the recommended scope of ASTM Standard E 1527-21 were performed as part of this Phase I ESA.

Legend

SEE FIS REPORT FOR DETAILED LEGEND AND INDEX MAP FOR FIRM PANEL LAYOUT

SPECIAL FLOOD HAZARD AREAS
- Without Base Flood Elevation (BFE) *Zone A, V, A99*
- With BFE or Depth *Zone AE, AO, AH, VE, AR*
- Regulatory Floodway

OTHER AREAS OF FLOOD HAZARD
- 0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile *Zone X*
- Future Conditions 1% Annual Chance Flood Hazard *Zone X*
- Area with Reduced Flood Risk due to Levee. See Notes. *Zone X*
- Area with Flood Risk due to Levee *Zone D*

OTHER AREAS
- NO SCREEN Area of Minimal Flood Hazard *Zone X*
- Effective LOMRs
- Area of Undetermined Flood Hazard *Zone D*

GENERAL STRUCTURES
- Channel, Culvert, or Storm Sewer
- Levee, Dike, or Floodwall

OTHER FEATURES
- 20.2 / 17.5 Cross Sections with 1% Annual Chance Water Surface Elevation
- Coastal Transect
- Base Flood Elevation Line (BFE)
- Limit of Study
- Jurisdiction Boundary
- Coastal Transect Baseline
- Profile Baseline
- Hydrographic Feature

MAP PANELS
- Digital Data Available
- No Digital Data Available
- Unmapped

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 11/14/2024 at 5:42 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

RE: CITY DIRECTORY RESEARCH
1640 Tidelands Avenue
National City,CA 91950

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
All of Kidd St
All of Tidelands Ave
900-End of W 19th St

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Used Oil Transporter:	No

Used Oil Transfer Facility: No
Used Oil Processor: No
Used Oil Refiner: No
Used Oil Burner: No
Used Oil Market Burner: No
Used Oil Spec Marketer: No

Hazardous Waste Handler Details

Sequence No: 1
Receive Date: 20060224
Handler Name: PORT OF SAN DIEGO
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report update with Notification
TSD Activity: Y

Waste Code Details

Hazardous Waste Code: 134
Waste Code Description: Aqueous solution with <10% total organic residues

Hazardous Waste Code: 141
Waste Code Description: Off-specification, aged, or surplus inorganics

Hazardous Waste Code: 181
Waste Code Description: Other inorganic solid waste

Hazardous Waste Code: 213
Waste Code Description: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

Hazardous Waste Code: 331
Waste Code Description: Off-specification, aged, or surplus organics

Hazardous Waste Code: 343
Waste Code Description: Unspecified organic liquid mixture

Hazardous Waste Code: 352
Waste Code Description: Other organic solids

Hazardous Waste Code: 741
Waste Code Description: Liquids with halogenated organic compounds > 1000 mg/l

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D006
Waste Code Description: CADMIUM

Hazardous Waste Code: D007
Waste Code Description: CHROMIUM

Hazardous Waste Code: D008
Waste Code Description: LEAD

Hazardous Waste Code: D009
Waste Code Description: MERCURY

Hazardous Waste Code: D018
Waste Code Description: BENZENE

Hazardous Waste Code: D027
Waste Code Description: 1,4-DICHLOROBENZENE

Hazardous Waste Code: D039
Waste Code Description: TETRACHLOROETHYLENE

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Hazardous Waste Code: D040
Waste Code Description: TRICHLORETHYLENE

Violations

Violation Date: 01/28/2015 **Violation Source:** CERS
Violation Program: APSA **Violation Division:** San Diego County Department of Env Health
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 04/29/2015.

Violation Description:

Failure of the secondary containment, and/or rack drainage to flow to a catchment basin, treatment system, or quick drainage system and hold at least the maximum capacity of the largest single compartment of any tank car or tank truck.

Violations

Violation Date: 01/28/2015 **Violation Source:** CERS
Violation Program: APSA **Violation Division:** San Diego County Department of Env Health
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 04/29/2015.

Violation Description:

Failure to prepare and implement a Spill Prevention Control and Countermeasure (SPCC) Plan .

Violations

Violation Date: 01/28/2015 **Violation Source:** CERS
Violation Program: HW **Violation Division:** San Diego County Department of Env Health
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Notes:

Returned to compliance on 02/05/2015.

Violation Description:

Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment..

Violations

Violation Date: 07/15/2022 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** San Diego County Department of Env Health
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Notes:

Returned to compliance on 07/27/2022. Inspection Sequence ID:6965999

Violation Description:

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violations

Violation Date: 01/28/2015 ***Violation Source:*** CERS
Violation Program: APSA ***Violation Division:*** San Diego County Department of Env Health
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 04/29/2015.

Violation Description:

Failure to provide training regarding:
1. The operation and maintenance of equipment to prevent discharges.
2. Discharge procedure protocols.
3. Applicable pollution control laws, rules, and regulations.
4. General facility operations. AND
5. The contents of the SPCC Plan.

Violations

Violation Date: 07/02/2019 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** San Diego County Department of Env Health
Citation: HSC 6.5 25201.16(f) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.16(f)
Violation Notes:

Returned to compliance on 07/17/2019. Inspection Sequence ID:6191660

Violation Description:

Failure to comply with the applicable requirements related to accumulation and containment standards for universal waste aerosol cans.

Violations

Violation Date: 07/15/2022 ***Violation Source:*** CERS
Violation Program: APSA ***Violation Division:*** San Diego County Department of Env Health
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 07/27/2022. Inspection Sequence ID:6965999

Violation Description:

Failure to provide the following training to all oil-handling personnel:

1. Operation and maintenance of equipment to prevent discharges.

2. Discharge procedure protocols.

3. Applicable pollution control laws, rules, and regulations.

4. General facility operations.

5. Contents of the SPCC Plan.

Violations

Violation Date: 01/28/2015 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** San Diego County Department of Env Health
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Notes:

Returned to compliance on 03/02/2015.

Violation Description:

Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.

Violations

Violation Date: 01/28/2015 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** San Diego County Department of Env Health
Citation: 22 CCR 23 66273.34 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.34
Violation Notes:

Returned to compliance on 02/04/2015.

Violation Description:

Failure to properly label the following categories of universal waste as:
1) Each batteries or the container in which the batteries are contained as "Universal Waste-Battery(ies)".
2) Each mercury-containing equipment or the container in which the mercury-containing equipment is contained as "Universal Waste -Mercury-Containing Equipment".
3) Each Florescent lamp or the container or package in which the lamps are contained as "Universal Waste-Lamp(s)".
4) Each electronic devices or the container or pallet in or on which the electronic devices are contained as "Universal Waste-Electronic Device(s)".
5) Each CRTs or the container or pallet in or on which the CRTs are contained as "Universal Waste-CRT(s)".
6) A container of CRT glass shall be labeled or marked clearly with the following phrase: "Universal Waste-CRT glass".
7) In lieu of labeling individual electronic devices, CRTs, and/or containers of CRT glass pursuant to subsections d) through f) of this section, a universal waste handler may combine, package, and accumulate those universal wastes in appropriate containers or within a designated area demarcated by boundaries that are clearly labeled with the applicable portion(s) of the following phrase: "Universal Waste-Electronic Device(s)/Universal Waste - CRT (s)/Universal Waste-CRT Glass".

Violations

Hazardous Waste Handler Details

Sequence No: 1
Receive Date: 20060224
Handler Name: PORT OF SAN DIEGO
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report update with Notification

Waste Code Details

Hazardous Waste Code: 134
Waste Code Description: Aqueous solution with <10% total organic residues

Hazardous Waste Code: 141
Waste Code Description: Off-specification, aged, or surplus inorganics

Hazardous Waste Code: 181
Waste Code Description: Other inorganic solid waste

Hazardous Waste Code: 213
Waste Code Description: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

Hazardous Waste Code:	331
Waste Code Description:	Off-specification, aged, or surplus organics
Hazardous Waste Code:	343
Waste Code Description:	Unspecified organic liquid mixture
Hazardous Waste Code:	352
Waste Code Description:	Other organic solids
Hazardous Waste Code:	741
Waste Code Description:	Liquids with halogenated organic compounds > 1000 mg/l
Hazardous Waste Code:	D001
Waste Code Description:	IGNITABLE WASTE
Hazardous Waste Code:	D006
Waste Code Description:	CADMIUM
Hazardous Waste Code:	D007
Waste Code Description:	CHROMIUM
Hazardous Waste Code:	D008
Waste Code Description:	LEAD
Hazardous Waste Code:	D009
Waste Code Description:	MERCURY
Hazardous Waste Code:	D018
Waste Code Description:	BENZENE
Hazardous Waste Code:	D027
Waste Code Description:	1,4-DICHLOROBENZENE
Hazardous Waste Code:	D039
Waste Code Description:	TETRACHLOROETHYLENE
Hazardous Waste Code:	D040
Waste Code Description:	TRICHLORETHYLENE

File Location: All Files are on GeoTracker or in the Local Agency Database
Site History:

A contractor discovered heavily stained soil (15 yds x 12 yds), hydrocarbon odor on the property. Petroleum concentrations by Method 418.1 ranged from 150 mg/kg to 67,000 mg/kg. Petroleum concentrations by Method 8015 ranged from 3 mg/kg to 30 mg/kg. Elevated metals [Copper (1,750 mg/kg), Lead (4,760), and Zinc (3,540 mg/kg)] were also found on site. On September 28, 1.994, the San Diego Port District (which controls the property) was offered the opportunity to work with the Site Assessment and Mitigation Division of Environmental Health Services (SAM-EHS) in resolving the problem. The Port did not respond, so the case was referred to the Regional Board. This case was officiallly closed in Geotracker and DEH database11/3/2011.

Title: Site Screening
Title Link:
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Site Screening
Date Completed: 1/24/1995
Comments: Site was identified from a letter from an RP, stating that previous leasee, "doing business as a master ship repair contractor," appears responsible for hazardous waste contam- ination, of lead from marine sand blast grit debris, at the site. Due to the evidence of a hazardous substance release, the Department will require a PEA, and on 1-24-95, notified the RP thereof. The Department reques- ted the Port to complete Non-emergency Hazardous Substance Release Reports for two sites located on two different addresses. There is a sister site located at 1313 24th ST., National City, San Diego, CA.

Comments:

Site was identified from a letter from an RP, stating that previous leasee, "doing business as a master ship repair contractor," appears responsible for hazardous waste contam-ination, of lead from marine sand blast grit debris, at the site. Due to the evidence of a hazardous substance release, the Department will require a PEA, and on 1-24-95, notified the RP thereof. The Department reques-ted the Port to complete Non-emergency Hazardous Substance Release Reports for two sites located on two different addresses. There is a sister site located at 1313 24th ST., National City, San Diego, CA. Preliminary Assessment (PA) is being conducted by DTSC under the contract with U.S. EPA. The completed PA was approved by U.S. EPA. The site does not qualify for further remedial site assessment under CERCLA. PEA Invite letter sent 05/12/98. Response sent to DTSC. DTSC did not consider it to be adequate. DTSC sent a 2nd PEA Invite letter.

Quarterly Update
Quarterly Update Period: April 2023 to June 2023. Permit Maintenance

Naval Station San Diego is a Container Storage Area (CST) is operated as a one-year container storage unit (Building 3458) for Hazardous Waste (HW) from on-site and off-site generators and is operating under a RCRA equivalent operating permit with an expiration date of June 29, 2028.

Facility Description/History

The facility is a U.S. Naval Installation located on the eastern side of the San Diego Bay. The Cities of San Diego and National City border the naval installation. The city of National City borders the eastern fence line of the complex, which houses the permitted Container Storage building 3458 (CST). The permitted CST is bounded on the west by a private (military owned) roadway and parking lot and on the south by an open field, which is part of Naval Base San Diego. A government owned maintenance shop is located on the north side, and a privately-owned vehicle storage lot is located in the medium industrial area on the east side of the HWF Complex. Human receptors include NAVSTA personnel working in the vicinity of the facilities and non-governmental employees working within the medium industrial area to the east of the permitted CST. Working personnel may be in the immediate vicinity of the facility at any time. There are no residential housing areas within 1000 feet of the HWF Complex. Environmental receptors include soil and groundwater under and surrounding the facility, and the marine environment of San Diego Bay. The HWF Complex is located approximately 600 feet from the San Diego Bay. There are no known ecologically sensitive areas near the HWF Complex. No disruption to environmental receptors is anticipated from facility operations.
NAVSTA San Diego currently includes approximately 1,029 land acres and 326 water acres, providing personnel and logistic support services to 52 major tenant commands. Approximately 35,000 military personnel are assigned to the base. This large population requires a variety of industrial facilities to support ship, ground vehicle, and base maintenance operations.
The Program Director, Environment, Commander Naval Region Southwest is the designated "owner" of the physical plant and capital assets. The operation is contracted through the government to a designated operator of the physical plant, which is ultimately responsible for its operation. However, there are no private property rights involved, and the Secretary of the Navy exercises authority over all assets.
Description of activities requiring permit
The Container Storage Area (CST) is operated as a one-year container storage unit (Building 3458) for Hazardous Waste (HW) generated by government organizations in the Southern California Region. HW is collected from on-site and off-site generators and transported to the CST by trained and licensed personnel. At the CST, the waste is fully characterized, bulked, and preparation for off-site treatment, recycling, and/or disposal. HW transport vehicles are registered in accordance with California requirements. Wastes handled at the HWF include conventional industrial wastes that are ignitable, corrosive, reactive, and toxic. Typical HW includes paints, solvents, acids/bases, oils/fuels, metals, detergents, lighting waste, oxidizers, photo-chemicals, plating waste, pesticides, sludge, batteries, and soil. Typically, no bio-hazardous, explosive, or radioactive wastes are accepted. All containers are eventually removed from the CST by registered transporters and sent off-site for treatment, recycling, or disposal at permitted facilities.

The permitted storage facility is a building (Bldg. 3458) measuring approximately 62 feet wide and 125 feet long. It is divided into: nine general storage compartments, one reactive storage compartment, one consolidation/bulking area (repackaging), administrative spaces, and an outside loading/staging area. The building capacity is 972, 55-gallon drums or 53,460 gallons.
Permitting Regulatory Description/History
The Hazardous Waste Facility Permit for Building 3458 was originally issued on August 16, 1993 and expired on August 16, 2003. On May 17, 1994, a Class 2 Permit Modification was issued regarding consolidation of additional waste. On May 31, 1996, a Class 1 Permit Modification was issued to update the characteristics of the waste handled and emergency procedures section. A Class 1 Permit Modification for the change of operator and other changes was issued on November 3, 2005.
On June 22, 2006, DTSC issued a Hazardous Waste Storage Permit with the effective date of July 27, 2006 and expiration of July 26, 2016. Corrective action is carried out under the oversight of DTSC.
The Permit Renewal Application dated January 26, 2016 was received from the Navy. DTSC issued Initial Administrative Review Letter on 2/24/2016. DTSC prepared a draft Permit and Public Notice began on April 30, 2018 and will end on June 18, 2018. The Permit renewal was issued on 6/27/2018 with the effective date of July 30, 2018. On 8/1/2018 NBSD requested a class 1 permit mod due to emergency contact changes. On 9/4/ 2018 DTSC issued a Class 1 permit mod to NBSD.

Quarterly Update
Quarterly Update Period: April 2024 to June 2024. Permit Maintenance

Facility Description/History

Naval Base San Diego also known as Naval Station San Diego (the Facility) is a US Navy base that operates a hazardous waste storage unit named the Container Storage Unit and also designated by the Navy as the Container Storage and Transfer (CST) building 3458, as a one-year container storage unit for storage of Hazardous Waste from on-site and off-site generators and is operating under a RCRA equivalent operating permit with an expiration date of June 29, 2028.

The facility is a U.S. Naval Installation located on the eastern side of the San Diego Bay. The Cities of San Diego and National City border the naval installation. The city of National City borders the eastern fence line of the complex, which houses the permitted CST. The permitted CST is bounded on the west by a private (military owned) roadway and parking lot and on the south by an open field, which is part of Naval Base San Diego. A government owned maintenance shop is located on the north side, and a privately-owned vehicle storage lot is located in the medium industrial area on the east side of the HWF Complex. Human receptors include NAVSTA personnel working in the vicinity of the facilities and non-governmental employees working within the medium industrial area to the east of the permitted CST. Working personnel may be in the immediate vicinity of the facility at any time. There are no residential housing areas within 1000 feet of the HWF Complex. Environmental receptors include soil and groundwater under and surrounding the facility, and the marine environment of San Diego Bay. The HWF Complex is located approximately 600 feet from the San Diego Bay. There are no known ecologically sensitive areas near the HWF Complex. No disruption to environmental receptors is anticipated from facility operations.
NAVSTA San Diego currently includes approximately 1,029 land acres and 326 water acres, providing personnel and logistic support services to 52 major tenant commands. Approximately 35,000 military personnel are assigned to the base. This large population requires a variety of industrial facilities to support ship, ground vehicle, and base maintenance operations.
The Program Director, Environment, Commander Naval Region Southwest is the designated iowneri of the physical plant and capital assets. The operation is contracted through the government to a designated operator of the physical plant, which is ultimately responsible for its operation. However, there are no private property rights involved, and the Secretary of the Navy exercises authority over all assets.
Description of activities requiring permit
The CST is operated as a one-year container storage unit for Hazardous Waste (HW) generated by government organizations in the Southern California Region. HW is collected from on-site and off-site generators and transported to the CST by trained and licensed personnel. At the CST, the waste is fully characterized, bulked, and preparation for off-site treatment, recycling, and/or disposal. HW transport vehicles are registered in accordance with California requirements. Wastes handled at the HWF include conventional industrial wastes that are ignitable, corrosive, reactive, and toxic. Typical HW includes paints, solvents, acids/bases, oils/fuels, metals, detergents, lighting waste, oxidizers, photo-chemicals, plating waste, pesticides, sludge,

batteries, and soil. Typically, no bio-hazardous, explosive, or radioactive wastes are accepted. All containers are eventually removed from the CST by registered transporters and sent off-site for treatment, recycling, or disposal at permitted facilities.
The permitted storage facility is a building (Bldg. 3458) measuring approximately 62 feet wide and 125 feet long. It is divided into: nine general storage compartments, one reactive storage compartment, one consolidation/bulking area (repackaging), administrative spaces, and an outside loading/staging area. The building capacity is 972, 55-gallon drums or 53,460 gallons.
Permitting Regulatory Description/History
The Hazardous Waste Facility Permit for Building 3458 was originally issued on August 16, 1993 and expired on August 16, 2003. On May 17, 1994, a Class 2 Permit Modification was issued regarding consolidation of additional waste. On May 31, 1996, a Class 1 Permit Modification was issued to update the characteristics of the waste handled and emergency procedures section. A Class 1 Permit Modification for the change of operator and other changes was issued on November 3, 2005.
On June 22, 2006, DTSC issued a Hazardous Waste Storage Permit with the effective date of July 27, 2006 and expiration of July 26, 2016. Corrective action is carried out under the oversight of DTSC.
The Permit Renewal Application dated January 26, 2016 was received from the Navy. DTSC issued Initial Administrative Review Letter on 2/24/2016. DTSC prepared a draft Permit and Public Notice began on April 30, 2018 and will end on June 18, 2018. The Permit renewal was issued on 6/27/2018 with the effective date of July 30, 2018. On 8/1/2018 NBSD requested a class 1 permit mod due to emergency contact changes. On 9/4/ 2018 DTSC issued a Class 1 permit mod to NBSD.

Quarterly Update
Quarterly Update Period: April 2024 to June 2024. Permit Maintenance

Facility Description/History

Naval Base San Diego also known as Naval Station San Diego (the Facility) is a US Navy base that operates a hazardous waste storage unit named the Container Storage Unit and also designated by the Navy as the Container Storage and Transfer (CST) building 3458, as a one-year container storage unit for storage of Hazardous Waste from on-site and off-site generators and is operating under a RCRA equivalent operating permit with an expiration date of June 29, 2028.

The facility is a U.S. Naval Installation located on the eastern side of the San Diego Bay. The Cities of San Diego and National City border the naval installation. The city of National City borders the eastern fence line of the complex, which houses the permitted CST. The permitted CST is bounded on the west by a private (military owned) roadway and parking lot and on the south by an open field, which is part of Naval Base San Diego. A government owned maintenance shop is located on the north side, and a privately-owned vehicle storage lot is located in the medium industrial area on the east side of the HWF Complex. Human receptors include NAVSTA personnel working in the vicinity of the facilities and non-governmental employees working within the medium industrial area to the east of the permitted CST. Working personnel may be in the immediate vicinity of the facility at any time. There are no residential housing areas within 1000 feet of the HWF Complex. Environmental receptors include soil and groundwater under and surrounding the facility, and the marine environment of San Diego Bay. The HWF Complex is located approximately 600 feet from the San Diego Bay. There are no known ecologically sensitive areas near the HWF Complex. No disruption to environmental receptors is anticipated from facility operations.
NAVSTA San Diego currently includes approximately 1,029 land acres and 326 water acres, providing personnel and logistic support services to 52 major tenant commands. Approximately 35,000 military personnel are assigned to the base. This large population requires a variety of industrial facilities to support ship, ground vehicle, and base maintenance operations.
The Program Director, Environment, Commander Naval Region Southwest is the designated iowneri of the physical plant and capital assets. The operation is contracted through the government to a designated operator of the physical plant, which is ultimately responsible for its operation. However,

there are no private property rights involved, and the Secretary of the Navy exercises authority over all assets.
Description of activities requiring permit
The CST is operated as a one-year container storage unit for Hazardous Waste (HW) generated by government organizations in the Southern California Region. HW is collected from on-site and off-site generators and transported to the CST by trained and licensed personnel. At the CST, the waste is fully characterized, bulked, and preparation for off-site treatment, recycling, and/or disposal. HW transport vehicles are registered in accordance with California requirements. Wastes handled at the HWF include conventional industrial wastes that are ignitable, corrosive, reactive, and toxic. Typical HW includes paints, solvents, acids/bases, oils/fuels, metals, detergents, lighting waste, oxidizers, photo-chemicals, plating waste, pesticides, sludge, batteries, and soil. Typically, no bio-hazardous, explosive, or radioactive wastes are accepted. All containers are eventually removed from the CST by registered transporters and sent off-site for treatment, recycling, or disposal at permitted facilities.
The permitted storage facility is a building (Bldg. 3458) measuring approximately 62 feet wide and 125 feet long. It is divided into: nine general storage compartments, one reactive storage compartment, one consolidation/bulking area (repackaging), administrative spaces, and an outside loading/staging area. The building capacity is 972, 55-gallon drums or 53,460 gallons.
Permitting Regulatory Description/History
The Hazardous Waste Facility Permit for Building 3458 was originally issued on August 16, 1993 and expired on August 16, 2003. On May 17, 1994, a Class 2 Permit Modification was issued regarding consolidation of additional waste. On May 31, 1996, a Class 1 Permit Modification was issued to update the characteristics of the waste handled and emergency procedures section. A Class 1 Permit Modification for the change of operator and other changes was issued on November 3, 2005.
On June 22, 2006, DTSC issued a Hazardous Waste Storage Permit with the effective date of July 27, 2006 and expiration of July 26, 2016. Corrective action is carried out under the oversight of DTSC.
The Permit Renewal Application dated January 26, 2016 was received from the Navy. DTSC issued Initial Administrative Review Letter on 2/24/2016. DTSC prepared a draft Permit and Public Notice began on April 30, 2018 and will end on June 18, 2018. The Permit renewal was issued on 6/27/2018 with the effective date of July 30, 2018. On 8/1/2018 NBSD requested a class 1 permit mod due to emergency contact changes. On 9/4/ 2018 DTSC issued a Class 1 permit mod to NBSD.

EI ID: 10361644 **EI Description:** Hazardous Waste Generator

Violations

Violation Date: 11/21/2022 **Violation Source:** CERS
Violation Program: HW **Violation Division:** San Diego County Department of Env Health
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Notes:

Returned to compliance on 12/22/2022. Inspection Sequence ID:7077179

Violation Description:

Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met:
(1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms.

(2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f).

(3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violations

Waste Code Description: BENZENE

Hazardous Waste Code: F001
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F002

Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Regulated Programs

EI ID: 10362610 **EI Description:** Chemical Storage Facilities

Violations

Violation Date: 01/13/2020 **Violation Source:** CERS
Violation Program: HMRRP **Violation Division:** San Diego County Department of Env Health
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 01/13/2020. Inspection Sequence ID:6366568

Violation Description:

Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violations

Violation Date: 07/27/2021 **Violation Source:** CERS
Violation Program: HMRRP **Violation Division:** San Diego County Department of Env Health
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Notes:

Inspection Sequence ID:6779099;Violation:HMD1001 Unified Program Facility permit not obtained for hazardous materials. SDCC 68.904; 68.905; 68.906, 68.907; 68.907.1

Violation Description:

Business Plan Program - Administration/Documentation - General

File Location:	Local Agency
Site History:	

This case was opened to resolve environmental issues that were hindering the sale of the property. The property owner contacted DEH for assistance in determining resolution of the following environmental issues: there were reportedly 5 underground storage tanks (USTs) that were removed from the site, three of these removals were documented by DEH, two others did not have records for closure; additionally there was a former sump and dip tank area on the property which was used for the cleaning of wood sanding belts during furniture manufacturing. The USTs that were properly closed were done so prior to the time when DEH required soil sampling. Soil, groundwater and soil vapor samples were collected from the former UST areas and the sump area during several environmental assessments (2001 – 2005) that were conducted for property transactions and gasoline, diesel fuel, motor oil and low levels of volatile organic compounds were detected in all media. Diesel fuel, motor oil and some volatile organic compounds were detected in surface soil samples (0.5 feet) collected in the area of the sump. The subsurface soil samples collected from the sump area did not contain contaminants of concern (VOCs, fuels). In addition, gasoline, diesel fuel and motor oil were detected at several former UST locations. Additional soil and groundwater sampling was conducted as part of the VAP investigation. Three monitoring wells and ten soil borings were installed and soil and groundwater samples were collected and analyzed. The ten soil borings were drilled to depths of approximately 15 feet. Diesel fuel and motor oil were detected in soil samples in the vicinity of former UST #4 and gasoline was detected in the vicinity of former UST #5; therefore LOP case no. H39776-002 was opened to investigate these unauthorized releases. Please see the closure documents for that case for additional information. Groundwater samples were collected and MTBE was detected in one sample from well MW2 at a concentration of 13.3 ug/l, which is slightly above the maximum contaminant level. The source of the MTBE is unknown, however since the groundwater in the area is classified as non-beneficial use, the consultant did

not consider it a cause for concern. The concentration of MTBE in groundwater would not pose an excess cancer risk to human health based on vapor intrusion. There are electric, sewer and water lines around the perimeter of the site. These lines are usually buried between 1 and 8 feet below ground surface. There does not appear to be a threat to utilities based on the lack of contaminants found at the site. Groundwater is present at depths of 6.98 to 9.94 feet below ground surface. Although utilities could potentially be buried below the water table, the consultant concluded that the contaminants present are not likely to migrate with groundwater. The nearest surface water body is San Diego Bay which is 1200 feet to the west. There should not be any impacts to the Bay from this site. The consultant has concluded that the surface soil contamination associated with the sump was limited in areal and vertical extent and did not represent a significant environmental condition. The MTBE detected in groundwater was low in concentration and not necessarily attributable to the site. Therefore, the consultant concluded that the site did not pose a risk to human health, utilities, surface water or other sensitive receptors in the area of the site, and requested no further action for the case. DEH concurs with this recommendation.

Qty Rlsd Gallons:
Facility Project Sub Type:
Calenviroscreen 3 Score: 76-80%
Calenviroscreen 4 Score: 75-80%
Site History:

This case was opened in February 2012, because data collected as part of a site investigation for voluntary assistance case H39776-001 indicated that releases had occurred at the locations of reported former underground storage tanks known as UST #4 and UST #5. There were no available records documenting proper removal of these tanks. Diesel fuel and motor oil were detected in soil samples at 5 and 9 feet below ground surface near the former tank area UST #4. Gasoline was detected in soil below the water table (at 11 ft below ground surface) near the former location of UST #5. Earlier site assessments had been conducted at the site that had included soil sampling in these areas that were not previously reported to DEH. Additional research indicated that the gasoline detected in the soil sample near former UST #5 may be attributable to the BNSF site to the north, located at 1700 Cleveland Avenue, National City, CA, where a large area of petroleum hydrocarbon contaminated soil had been removed. Additional investigation in the

area of UST #4 indicated that the soil contamination was limited to diesel and motor oils, and the vertical and lateral extent of contamination was limited to the vicinity of the reported former underground tank. A total of five borings were drilled to fifteen feet below ground surface and soil samples were collected and analyzed. Volatile organic compounds naphthalene, n-butyl benzene and acetone were detected in one soil sample at low concentrations. The contaminated soil was found between 5 and 9 feet below ground surface. The consultant estimated that the total volume of contaminated soil in this area is approximately 45 cubic yards. Diesel fuel, motor oil and VOCs with the exception of MTBE, were not detected in groundwater samples from three monitoring wells installed as part of the initial site investigation. MTBE was detected in one groundwater sample at a concentration of 13.3 ug/l, which is slightly above the maximum contaminant level of 12 ug/l. The consultant concluded there were no significant impacts to groundwater from the release. Groundwater beneath the site and in the area is classified as non-beneficial use. The nearest surface water body is San Diego Bay. The lateral extent of the soil contamination does not exceed the building footprint on the northwest of the site, therefore it would not likely impact the water or life in the Bay. There are electric, sewer and water lines around the perimeter of the site. These lines are usually buried between 1 and 8 feet below ground surface. While it is possible that some sewer lines and an electric line are located within the area of contaminated soil, the contaminants are large molecules and not likely to migrate far with infiltrating precipitation or runoff. The consultant has concluded that the gasoline contamination detected in the soil at the water table at former UST #5 was from the adjacent property to the north, and that the diesel/oil contaminated soil remaining in the area of former UST #4 was limited in extent and had limited potential to migrate. They further stated the contaminated soil posed no apparent risks to human health, groundwater or the environment and requested no further action for the case. DEH concurs with this recommendation considering that natural attenuation should occur over time.

Sequence No: 4
Receive Date: 20160401
Handler Name: COSTCO WHOLESALE OPTICAL #908
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report update with Notification

Waste Code Details

Hazardous Waste Code: 122
Waste Code Description: Alkaline solution without metals (pH > 12.5)

Hazardous Waste Code: 181

Waste Code Description: Other inorganic solid waste

Hazardous Waste Code: 212
Waste Code Description: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

Hazardous Waste Code: 331
Waste Code Description: Off-specification, aged, or surplus organics

Hazardous Waste Code: 352
Waste Code Description: Other organic solids

Hazardous Waste Code: 551
Waste Code Description: Laboratory waste chemicals

Hazardous Waste Code: 722
Waste Code Description: Liquids with cadmium > 100 mg/l

Hazardous Waste Code: 791
Waste Code Description: Liquids with pH < 2

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: D006
Waste Code Description: CADMIUM

Hazardous Waste Code: D008
Waste Code Description: LEAD

Hazardous Waste Code: D018
Waste Code Description: BENZENE

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code Details

Hazardous Waste Code: 122
Waste Code Description: Alkaline solution without metals (pH > 12.5)

Hazardous Waste Code: 131
Waste Code Description: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

Hazardous Waste Code: 135
Waste Code Description: Unspecified aqueous solution

Hazardous Waste Code: 141
Waste Code Description: Off-specification, aged, or surplus inorganics

Hazardous Waste Code: 181
Waste Code Description: Other inorganic solid waste

Hazardous Waste Code: 211
Waste Code Description: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

Hazardous Waste Code: 212
Waste Code Description: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

Hazardous Waste Code: 214
Waste Code Description: Unspecified solvent mixture

Hazardous Waste Code: 223
Waste Code Description: Unspecified oil-containing waste

Hazardous Waste Code: 311
Waste Code Description: Pharmaceutical waste

Hazardous Waste Code: 331
Waste Code Description: Off-specification, aged, or surplus organics

Hazardous Waste Code: 352
Waste Code Description: Other organic solids

Hazardous Waste Code: 541
Waste Code Description: Photochemicals / photo processing waste

Hazardous Waste Code: 551
Waste Code Description: Laboratory waste chemicals

Hazardous Waste Code: 722
Waste Code Description: Liquids with cadmium > 100 mg/l

Hazardous Waste Code: 724
Waste Code Description: Liquids with lead > 500 mg/l

Hazardous Waste Code: 791
Waste Code Description: Liquids with pH < 2

Hazardous Waste Code: 792
Waste Code Description: Liquids with pH < 2 with metals

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: D003
Waste Code Description: REACTIVE WASTE

Hazardous Waste Code: D004
Waste Code Description: ARSENIC

Hazardous Waste Code: D005
Waste Code Description: BARIUM

Hazardous Waste Code: D007
Waste Code Description: CHROMIUM

Hazardous Waste Code: D008
Waste Code Description: LEAD

Hazardous Waste Code: D009
Waste Code Description: MERCURY

Hazardous Waste Code: D010
Waste Code Description: SELENIUM

Hazardous Waste Code: D011
Waste Code Description: SILVER

Hazardous Waste Code:	D013
Waste Code Description:	LINDANE (1,2,3,4,5,6-HEXA-CHLOROCYCLOHEXANE, GAMMA ISOMER)
Hazardous Waste Code:	D016
Waste Code Description:	2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)
Hazardous Waste Code:	D018
Waste Code Description:	BENZENE
Hazardous Waste Code:	D022
Waste Code Description:	CHLOROFORM
Hazardous Waste Code:	D024
Waste Code Description:	M-CRESOL
Hazardous Waste Code:	D026
Waste Code Description:	CRESOL
Hazardous Waste Code:	D035
Waste Code Description:	METHYL ETHYL KETONE
Hazardous Waste Code:	P001
Waste Code Description:	2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Hazardous Waste Code:	P046
Waste Code Description:	ALPHA,ALPHA-DIMETHYLPHENETHYLAMINE (OR) BENZENEETHANAMINE, ALPHA, ALPHA-DIMETHYL-
Hazardous Waste Code:	P075
Waste Code Description:	NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS
Hazardous Waste Code:	P188
Waste Code Description:	BENZOIC ACID, 2-HYDROXY-, COMPD. WITH (3AS-CIS)-1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYLPYRROLO[2,3-B]INDOL-5-YL METHYLCARBAMATE ESTER (1:1) (OR) PHYSOSTIGMINE SALICYLATE
Hazardous Waste Code:	P204
Waste Code Description:	PHYSOSTIGMINE (OR) PYRROLO[2,3-B]INDOL-5-OL, 1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYL-METHYLCARBAMATE (ESTER), (3AS-CIS)-
Hazardous Waste Code:	U010
Waste Code Description:	AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A, 2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C
Hazardous Waste Code:	U015
Waste Code Description:	AZASERINE (OR) L-SERINE, DIAZOACETATE (ESTER)
Hazardous Waste Code:	U034
Waste Code Description:	ACETALDEHYDE, TRICHLORO- (OR) CHLORAL
Hazardous Waste Code:	U035
Waste Code Description:	BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL
Hazardous Waste Code:	U044
Waste Code Description:	CHLOROFORM (OR) METHANE, TRICHLORO-
Hazardous Waste Code:	U057
Waste Code Description:	CYCLOHEXANONE (I)
Hazardous Waste Code:	U058
Waste Code Description:	2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE
Hazardous Waste Code:	U059
Waste Code Description:	5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL) OXY]-7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN

Hazardous Waste Code: U075
Waste Code Description: DICHLORODIFLUOROMETHANE (OR) METHANE, DICHLORODIFLUORO-

Hazardous Waste Code: U089
Waste Code Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

Hazardous Waste Code: U121
Waste Code Description: METHANE, TRICHLOROFLUORO- (OR) TRICHLOROMONOFLUOROMETHANE

Hazardous Waste Code: U122
Waste Code Description: FORMALDEHYDE

Hazardous Waste Code: U129
Waste Code Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Hazardous Waste Code: U132
Waste Code Description: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

Hazardous Waste Code: U150
Waste Code Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Hazardous Waste Code: U151
Waste Code Description: MERCURY

Hazardous Waste Code: U182
Waste Code Description: 1,3,5-TRIOXANE, 2,4,6-TRIMETHYL- (OR) PARALDEHYDE

Hazardous Waste Code: U187
Waste Code Description: ACETAMIDE, N-(4-ETHOXYPHENYL)- (OR) PHENACETIN

Hazardous Waste Code: U188
Waste Code Description: PHENOL

Hazardous Waste Code: U201
Waste Code Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Hazardous Waste Code: U205
Waste Code Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Hazardous Waste Code: U206
Waste Code Description: D-GLUCOSE, 2-DEOXY-2-[[(METHYLNITROSOAMINO)-CARBONYL]AMINO]- (OR) GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-,D- (OR) STREPTOZOTOCIN

Hazardous Waste Code: U237
Waste Code Description: 2,4-(1H,3H)-PYRIMIDINEDIONE, 5-[BIS(2-CHLOROETHYL)AMINO]- (OR) URACIL MUSTARD

Hazardous Waste Code: U279
Waste Code Description: CARBARYL (OR) 1-NAPHTHALENOL, METHYLCARBAMATE

Calenviroscreen 4 Score:	75-80%
File Location:	Regional Board
Site History:	

Site 1, as originally identified, consisted of two buried former ship repair basins between Piers 11 and 12—Basins 3 and 4—each about 400 feet long, 80 feet wide, and 38 feet deep. These basins have sheet piling sides and unlined bottoms, and are enclosed on the west end by a steel-reinforced concrete quay wall. Between 1945 and 1972 some reportedly hazardous materials were discarded into the basins. Based on results of field studies of both soil and groundwater, a removal action was completed in 1997 at Basin 4, in which contaminated soil and debris were excavated and removed from the upper 10 feet of the basin. The excavated material was transported off site to permitted waste disposal facilities. Basin 4 was backfilled with clean soil and paved over for parking. A removal site evaluation report was finalized in 2000 that addressed soil and groundwater at both Basins 3 and 4, and further action was recommended due to levels of metals and semi-volatile organic compounds. Preparation of a work plan for carrying out a remedial investigation at Basins 3 and 4 is underway. The fieldwork will address possible contamination of both soil and groundwater. In an effort to thoroughly investigate past operations, the Navy conducted an additional review of historical aerial photographs. An April 1945 aerial photograph revealed two new basins at Site 1, now identified as Basins 1 and 2. (The current Basins 3 and 4 were formerly called North and South Basins.) Basins 1 and 2 lie approximately 300 feet north of Basin 3, between Piers 10 and 11. Base records show these basins were “discontinued” in 1946 and backfilled with unknown material. Former ship repair Basins 1 and 2 were recommended for no further action in the remedial investigation (RI) report in 2008. Ground water sampling at Basins 3 and 4 is scheduled for 2019 as part of the feasibility study. Objectives of the revised FS of IRP Site 1 are to evaluate current conditions, including the extent of VOC, SVOC, PAH, metals (including mercury and hexavalent chromium), pesticides, and PCB contamination in groundwater, and to assess potential risks posed to human health and the environment.

Cleanup History Link: https://geotracker.waterboards.ca.gov/profile_report_include?global_id=SL0607350511&tabname=regulatoryhistory
Site History:

Site 1, as originally identified, consisted of two buried former ship repair basins between Piers 11 and 12□Basins 3 and 4□each about 400 feet long, 80 feet wide, and 38 feet deep. These basins have sheet piling sides and unlined bottoms, and are enclosed on the west end by a steel-reinforced concrete quay wall. Between 1945 and 1972 some reportedly hazardous materials were discarded into the basins. Based on results of field studies of both soil and groundwater, a removal action was completed in 1997 at Basin 4, in which contaminated soil and debris were excavated and removed from the upper 10 feet of the basin. The excavated material was transported off site to permitted waste disposal facilities. Basin 4 was backfilled with clean soil and paved over for parking. A removal site evaluation report was finalized in 2000 that addressed soil and groundwater at both Basins 3 and 4, and further action was recommended due to levels of metals and semi-volatile organic compounds. Preparation of a work plan for carrying out a remedial investigation at Basins 3 and 4 is underway. The fieldwork will address possible contamination of both soil and groundwater. In an effort to thoroughly investigate past operations, the Navy conducted an additional review of historical aerial photographs. An April 1945 aerial photograph revealed two new basins at Site 1, now identified as Basins 1 and 2. (The current Basins 3 and 4 were formerly called North and South Basins.) Basins 1 and 2 lie approximately 300 feet north of Basin 3, between Piers 10 and 11. Base records show these basins were "discontinued" in 1946 and backfilled with unknown material. Former ship repair Basins 1 and 2 were recommended for no further action in the remedial investigation (RI) report in 2008. Ground water sampling at Basins 3 and 4 is scheduled for 2019 as part of the feasibility study. Objectives of the revised FS of IRP Site 1 are to evaluate current conditions, including the extent of VOC, SVOC, PAH, metals (including mercury and hexavalent chromium), pesticides, and PCB contamination in

groundwater, and to assess potential risks posed to human health and the environment.

LEAD

Site History:

Site History: Pacific Steel Inc. (PSI) is a scrap metal recycling facility in National City, which used to store auto shredder waste at the site. The Regional Water Quality Control Board (RWQCB) issued a Cleanup and Abatement Order to PSI in 1987 in response to discharges of contaminated water into the storm drain system. The auto shredding operations ceased in 1992 and the auto shredder waste pile was removed and disposed of offsite. The soil beneath the pile was excavated and put in piles on the site. Some of these piles were processed through magnetic separation to recover metals. On September 6, 2002, in response to a complaint, the Department of Toxics Substances Control (DTSC) Statewide Compliance Division (SCD) staff conducted an inspection and took some samples from the stock piles. As a result of the inspection, DTSC SCD staff issued an Imminent and Substantial Order (ISE Order) dated September 24, 2002 to PSI. The ISE Order required immediate corrective action and to submit workplan to investigate the releases at the site. After the ISE Order issued, a decision was made for SRPD/DTSC to provide oversight for site cleanup. Also, the Regional Water Quality Control Board (RWQCB) transferred the regulatory lead for the investigation and remediation to DTSC on December 31, 2002 stating that it would consider rescinding the Order if DTSC becomes lead agency for this site. Site is contaminated with heavy metals, VOC, Total Petroleum Hydrocarbons and PCB.

On December 11, 2002, the National City Redevelopment Agency, Community Development Commission (CDC), submitted a Property Mitigation Plan (Plan) with the concurrence of PSI to comply with ISE Order. The Plan is designed to provide information only for the northern portion of the PSI property which requires additional investigation to support the redevelopment project.

Large stockpiles of soil mixed with pieces of metal and other debris from scrap metal recycling operations were formerly present at the Site. It is our understanding that, in 2002, the DTSC issued an Enforcement Order alleging a variety of infractions at the Site with regard to hazardous waste laws of the state of California. Subsequently, the Client entered into a Corrective Action Consent Agreement (CACA) with the DTSC. In the CACA, the DTSC laid out several phases of work that needed to be completed, and to date some of these activities have been completed. Most notably, all of the large stockpiles of soil mixed with metal recycling operations that were formerly present at the Site have been removed. Much of this soil had been originally excavated from the portion of the Site owned by BNSF Railway (BNSF) and leased to the Client, where large stockpiles of auto shredder waste and metal recycling debris had historically been stored. Over time, the upper several feel of soil underlying these stockpiles became mixed with large and small fragments of debris.

Draft Site Characterization workplan was submitted in 2015. A Remedial Investigation and Site Screening Risk Assessment Report was submitted December 2018. On 2/2019, DTSC approved a revised Remedial Investigation report.

Document Type: Interim Measures Workplan
Date Completed: 6/1/2022
Comments: Per letter to Ryan Waterman dated 10/1/2021, the second draft of the Workplan was deemed acceptable in a letter dated September 22, 2020. DTSC requested that PSI forward a final PDF copy of the document, including all of the figures and appendices, and a schedule for the mailing of the fact sheet, community survey, and the 30-day public review and comment period. The (RP-Final) 'draft' IMW and schedule of public engagement activities were provided on 10/21/2021 by SCS Engineers.

POLYCHLORINATED BIPHENYLS (PCBS, SEE IRIS)

Site History:

The BNSF Railway property (BNSF) owns the western portion of the property occupied by Pacific Steel, Inc. (PSI), facility located at 1700 Cleveland Avenue in National City, California. The BNSF property is just under 9 acres in size and leased to PSI, a metal recycling facility. The PSI facility is reported to have been used for metal recycling since approximately 1956 and portions of the facility were reported to have been used for metal recycling as early as 1938. In 2002, the DTSC issued an Enforcement Order alleging a variety of infractions at the PSI facility with regard to hazardous waste laws of the state of California. Subsequently, in 2004 PSI entered into a Corrective Action Consent Agreement (CACA) with the DTSC. To date, a substantial portion of CACA activities have been completed. Most notably, all of the large stockpiles of soil mixed with metal recycling operations that were formerly present at the Site have been removed.. Much of this soil had been originally excavated from the portion of the facility owned by BNSF and leased to the PSI, where large stockpiles of auto shredder waste and metal recycling debris had historically been stored. Over time, the upper several feel of soil underlying these stockpiles became mixed with large and small fragments of debris and constituents of concern (CoCs) such as metals, polychlorinated biphenyls (PCBs), and petroleum hydrocarbons.
In 2019, PSI submitted the Interim Measures Workplan (IMW) for the BNSF portion of the facility and approved by DTSC on May 31, 2022. In March of 2023, BNSF entered into a standard voluntary agreement with DTSC for the implementation of the IMW activities on their property. PSI remains responsible for the implementation of the corrective measures for the remaining portions of the facility.

Site History:

This Voluntary Assistance Program (VAP) case was opened to assess and remediate petroleum hydrocarbon-impacted soils. The Site consists of an approximately 0.47•]acre, irregular•]shaped lot that is currently improved with three industrial buildings and is identified with the Assessor•fs Parcel Numbers (APNs) 559•]010•]09•]00 and 559•]040•]32•]01. The Site consisted of vacant, undeveloped land from at least 1928 until sometime between 1949 and 1953 when it was developed with the existing industrial buildings. A July 2020 Phase II from Fulcrum Resources (FR) detailed the soil, soil vapor (SV), and groundwater sampling analysis from seven soil borings (SBs), which were analyzed for volatile organic compounds (VOCs), total petroleum hydrocarbons (TPH), and Title 22 Metals. The SBs revealed soil concentrations of diesel (TPHd) and oil (TPHo) up to 1,400 mg/kg and 4,100 mg/kg, respectively. Metal and VOC analysis revealed trace or non-detect (ND) levels for all soil samples. Grab groundwater samples, taken from three SBs (SB1, SB2, and SB5), had concentrations which were mostly trace or ND, except SB1. Concentrations of TPHd, TPHo, and lead from this sample were 4,300 mg/l, 7,100 mg/l, and 1,100 mg/l, respectively. SV sample results exceeded SF-RWQCB environmental screening levels (ESLs) for various VOCs in SB1, SB4, SB5, and SB6. A workplan for soil excavation was approved and approximately 83 tons of soil was excavated in March 2021. Soil was excavated from the southeastern portion of the Site, which contained most of the soil and groundwater impacts as indicated by sampling results from SB1. In order to address the elevated TPH and lead levels from the SB1 grab groundwater sample, a monitoring well (MW-1) was installed and sampled for TPH, VOCs and Title 22 metals, which were not detected. As a result of the SV exceedances, FR conducted two indoor air (IA) sampling events at the Site. The first was an 8-hour event on June 18, 2021, and the second was a 24-hour event on August 18, 2021. VOC results were ND for the 8-hour event. Results for the 24-hour event were also ND, except for ethylbenzene, toluene, and total xylenes, which were detected at 3.5 ug/m3, 13.4 ug/m3, and 29.1 ug/m3, respectively. These concentrations are below the respective ESLs for ethylbenzene, toluene, and total xylenes. FR indicated that based on the results of the previous soil excavation and groundwater monitoring at well MW-1, a significant threat to groundwater or human health risk from potential vapor intrusion is not present and recommended no further action for this investigation. DEHQ concurs with these conclusions and recommendations.

Results for the 24-hour event were also ND, except for ethylbenzene, toluene, and total xylenes, which were detected at 3.5 ug/m3, 13.4 ug/m3, and 29.1 ug/m3, respectively. These concentrations are below the respective ESLs for ethylbenzene, toluene, and total xylenes.

FR indicated that based on the results of the previous soil excavation and groundwater monitoring at well MW-1, a significant threat to groundwater or human health risk from potential vapor intrusion is not present and recommended no further action for this investigation.

DEHQ concurs with these conclusions and recommendations.

GeoTracker Search - Cleanup Action Report (as of June 5, 2024)

Action Type: EXCAVATION
Begin Date: 3/29/2021
End Date: 3/31/2021
Phase: Soil
Contaminant Mass Removed: 83 Tons
Description:

Property History:

Feature Description:

The U.S. Navy acquired a total of 100.32 acres of property for the Concrete Ship Yards from the Maritime Commission on 3 October 1944. This land consisted of 66.93 acres of shipyard property plus 30.92 acres of underwater property, and 2.47 acres with a cement batch mixing plant across the Tidelands Ave. between Harrison Ave. and Cleveland Ave., and between 15th St. and 13th St. plant (acquisition records listed 2.27 acres for the batch plant and 100.12 total acres, but the figures cited here are believed to be correct based on real estate disposal documents). The site was originally controlled, financed, and developed by the Defense Plant Corporation (DPC) for building concrete ships and barges. The construction of ships for Navy use was then carried out by the Maritime Commission until the Navy took over the operations. DPC improvements for the shipyard included mold lofts, steel assembly buildings and steel racks, warehouses, machine and repair shops, mill buildings, wet docks, an outfitting pier, and cranes. Improvements for the batch mixing plant included aggregate bunkers, a cement silo, weighing and conveyor equipment, storage bins, and a truck ramp. There is no information in the records to indicate that the Navy made additional improvements to the Concrete Ship Yards. The Navy used the property from 1944 to 1948 to build concrete barges and oil tankers, and to repair steel and concrete ships. The Navy disposed of three properties associated with the Concrete Ship Yards. The Navy divested the title to 16.3 acres of the shipyard construction property to the city of National City on 17 September 1947 under court order. This 16.3-acre property, shown on the U.S. Naval Station Real Estate Summary Map No. 1202245 as Parcel 41, and on the National City Lands Map revised 9 September 1947, includes property west of, and including some of Tidelands Avenue. This property was then conveyed to the San Diego Port District in 1963.

Waste Code Details

Hazardous Waste Code: 212
Waste Code Description: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

Hazardous Waste Code: 221
Waste Code Description: Waste oil and mixed oil

Hazardous Waste Code: 291
Waste Code Description: Latex waste

Hazardous Waste Code: 342
Waste Code Description: Organic liquids with metals (see 121)

Hazardous Waste Code: 352
Waste Code Description: Other organic solids

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D005
Waste Code Description: BARIUM

Hazardous Waste Code: D006
Waste Code Description: CADMIUM

Hazardous Waste Code: D007
Waste Code Description: CHROMIUM

Hazardous Waste Code: D008
Waste Code Description: LEAD

Hazardous Waste Code: D035
Waste Code Description: METHYL ETHYL KETONE

Hazardous Waste Code: D039
Waste Code Description: TETRACHLOROETHYLENE

Hazardous Waste Code: D040
Waste Code Description: TRICHLORETHYLENE

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

School District:			
Past Use that Caused Contam:	MANUFACTURING - LUMBER/WOOD PRODUCTS		
Potential Media Affected:	OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL		
Site History:			

The SDWPC facility is located on a 1.71-acre facility in an area zoned medium industrial in National City. The facility is situated west of Interstate 5, approximately 1,200 feet east of San Diego Bay.

Wood treatment operations were conducted at the site from 1978 to 2006. Some of the chemicals used at the Site include creosote, pentachlorophenol, ammonium-zinc-copper-arsenate, copper-chromium arsenate and borates. The wood treatment process included incising holes into the wood to increase the penetration of the wood treatment solution. The woods were placed (open stacked) in the treatment vessel where vacuum and pressure cycles were applied to impregnate the wood with treatment chemicals. The vessel was also heated to facilitate wood treatment. The treated woods were placed on drip pads, a berm-asphaltic concrete area and allowed to equilibrate and dry for at least 24 to 48 hours. Excess fluids drained by gravity into the concrete sump system and were reused for the next batch treatment. Dried treated wood stored onsite prior to shipping off-site.

REGULATORY STATUS:
SDWPC is a generator of hazardous waste who also accumulated hazardous wastes on drip pads for less than 90 days under CCR, title 22, section 66262.34. The drip pads closures are regulated under CCR, title 22, section 66265.445. In November 2006, the CUPA referred the closure activity of the Site to DTSC. On July 17, 2007, DTSC signed an Oversight Agreement (Agreement) with SDWPC for the closure of Drip Pads. The Agreement required SDWPC to submit a Closure Plan to DTSC.

CLOSURE PLAN:
The Closure Plan was submitted to DTSC, and based on the information submitted, including results of previous investigations conducted at the site, additional investigation of soil, soil gas and groundwater was required. The results of the investigation found arsenic, hexavalent chromium, TPH, pentachlorophenol, dioxins and naphthalene in soil exceeding their respective residential and commercial RSLs. Groundwater contaminants include Pentachlorophenol, VOCs such as PCE, TCE, 1,1-DCE exceeding their respective MCLs. Dioxins and TPH were also detected in groundwater.

SDWPC will close the drip pads in-place which will include long-term groundwater monitoring and institutional control. The closure activities include demolition of drip pads and wood treatment area, backfilling the wood treatment area, removal and disposal of contaminated soil in the vicinity of the landscaping area, covering the entire property with asphaltic concrete, deed restriction under a Land Use Covenant, and long-term groundwater monitoring.

In compliance with the California Environmental Quality Act, a 30-day public comment period on the draft Closure Plan and draft Mitigated Negative Declaration was held from October 30 to November 30, 2015. DTSC responded to all the comments prior to the final decision. On January 12, 2016, the Closure Plan was approved by DTSC. A Remedial Design Document (RDD) outlining the closure details was submitted to DTSC and was later approved on February 23, 2018.

In compliance with AB 52, a memorandum was submitted to the Office of Environmental Justice and Tribal Affairs (OEJTA) in October 2017. A final response from the OEJTA has not been received and DTSC is also waiting for the submittal of Health & Safety Plan covering contractors that the facility will hire prior to implementation of the RDD

Update 4/12/2021:

Further action on the closure plan is pending DTSC review of an amendment to the Consent Agreement regarding sale of the property to a new owner.

Update 8/13/2021: An Amendment to the Consent Agreement regarding sale of the property to a new owner was signed on 5/7/2021. The Grading Site Plan was submitted on 8/13/2021.

Potential Contamin of Concern:

ARSENIC
DIOXIN (AS 2,3,7,8-TCDD TEQ)
PENTACHLOROPHENOL

Site History:	

The Site was formerly occupied by Cal-Doran, a metallurgical services business. The main building contained numerous furnaces and hot tanks that were used in the company's metallurgical processes. On June 7, 1999, one underground storage tank, containing paraffinic mineral oil used to quench hot metal pieces following heat treatment, was closed in place. Another UST was removed. Previous to this, in December 1998, another UST had been removed. Soil samples collected beneath the tanks and a transfer pipe contained elevated Total Recoverable Petroleum Hydrocarbon (TRPH) concentrations. In August 2002, the machinery from the metallurgical services business was dismantled and removed from the property. A tidal influence study was performed at the site on May 4 - 6, 2004, a period of maximum spring tides, to assess whether or not there was a measurable effect on groundwater levels caused by the rising and falling tides in nearby San Diego Bay. The study found variations in water levels that seemed to lag the changes in tide highs and lows by approximately 7-8 hours. This may explain why the groundwater gradient at the site has been variable. Based on TRPH concentrations > 100 mg/kg, approximately 666 cubic yards of impacted soil remain in place. A total of ten groundwater monitoring wells were installed on the site. As of October 2004, there were five monitoring event of all ten wells. The extent of mineral oil impacts to groundwater has been generally assessed. Thirteen of the 17 Title 22 Metals have been detected one or more times in one or more of the monitoring wells. A trace metals geochemist concluded that the distribution of trace metals in groundwater at the site has been influenced by the presence of mineral oil, as well as the interaction of sea water and fresh water. He also concluded that while there was initially some localized contamination around MW-5, those concentrations have decreased, and that current metal concentrations were probably not related to a release from Cal-Doran. No private supply wells were observed within 2,250 feet of the site during a drive-around visual survey of the area. There was one industrial process well reported by DWR approximately 1,700 feet north-northwest of the site. A Corrective Action Plan (CAP) was submitted and remediation by natural attenuation was chosen as the viable alternative for the site. The choice was based on the fact that the contaminant plume is stable and limited to the site boundaries and because there are no sensitive receptors affected by soil and groundwater impacts at this site. The site is located in the Paradise Hydrologic Subarea of the Pueblo San Diego Hydrologic Unit. Groundwater in this hydrologic subarea has been exempted from beneficial uses. In addition, no human health risk was identified. Public notification was conducted and no comments were received.

File Location: All Files are on GeoTracker or in the Local Agency Database
Site History:

The site building was originally constructed in 1961 with a 10,000-square-foot addition added in 1973. The eastern end of the building contains offices and a showroom and the western end is a warehouse. Prepackaged pesticides and chemicals are stored on metal shelving or in flammable materials cabinets in the central warehouse, and ï¿½super sacksï¿½ of chemicals (that hold 1 ton of material) are stored on the floor in the western end of the warehouse. The aboveground storage tanks were removed 10-15 years ago and the dry cleaning and upholstery supply businesses were sold. At the same time, Univar ceased repackaging chemicals on site and limited its on-site operations to receiving prepackaged chemicals for shipment to, or pick up by, local customers. Operations have remained unchanged until the present day. Currently, prepackaged chemicals are stored on site in the warehouse for a limited time before distribution (ARCADIS 2013). The installations of the air sparge and soil vapor extraction wells at Univar San Diego, Haffley Avenue are scheduled to begin on March 9 and continue through March 23, 2022.

Common Name Inventory:

ID: 455241 **Permit Status:** Permit Renewed
Child Record ID: DEH2020-HCHEM-0264021 **Active Permit:** true
CAS No: **Haz Material Type:** Mixture
Last Updated: 03/08/2022 12:57:34 AM **Trade Secret:** false
Chemical Name: TERMIDOR HE TERMITICIDE
Common Name Inventory: TERMIDOR HE TERMITICIDE

ID: 72939 **Permit Status:** Permit Renewed
Child Record ID: DEH2017-HCHEM-0146900 **Active Permit:** true
CAS No: TRADE SEC **Haz Material Type:** Mixture
Last Updated: 10/23/2017 05:12:34 PM **Trade Secret:** false
Chemical Name: TERMIDOR SC T/I - BASF (GHS)
Common Name Inventory: TERMIDOR SC T/I - BASF (GHS)

ID: 130757 **Permit Status:** Permit Renewed
Child Record ID: DEH2018-HCHEM-0171778 **Active Permit:** true
CAS No: TRADE SEC **Haz Material Type:** Mixture
Last Updated: 10/25/2018 02:08:33 PM **Trade Secret:** false
Chemical Name: TERMIDOR SC T/I - BASF (GHS)
Common Name Inventory: TERMIDOR SC T/I - BASF (GHS)

ID: 210991 **Permit Status:** Permit Renewed
Child Record ID: DEH2019-HCHEM-0209631 **Active Permit:** true
CAS No: TRADE SEC **Haz Material Type:** Mixture
Last Updated: 04/29/2020 12:38:38 AM **Trade Secret:** false
Chemical Name: TERMIDOR SC T/I - BASF (GHS)
Common Name Inventory: TERMIDOR SC T/I - BASF (GHS)

ID: 455209 **Permit Status:** Permit Renewed
Child Record ID: DEH2020-HCHEM-0263989 **Active Permit:** true

CAS No: TRADE SEC
Haz Material Type: Mixture
Last Updated: 03/08/2022 12:57:34 AM
Trade Secret: false
Chemical Name: TERMIDOR SC T/I - BASF (GHS)
Common Name Inventory: TERMIDOR SC T/I - BASF (GHS)

ID: 72940
Permit Status: Permit Renewed
Child Record ID: DEH2017-HCHEM-0146901
Active Permit: true
CAS No: 000109-99-9
Haz Material Type: Pure
Last Updated: 10/23/2017 05:12:34 PM
Trade Secret: false
Chemical Name: TETRAHYDOFURAN - BASF (GHS)
Common Name Inventory: TETRAHYDOFURAN - BASF (GHS)

ID: 2142
Permit Status: Permit Renewed
Child Record ID: DEH2002-HCHEM-512275
Active Permit: true
CAS No: 7320-34-5
Haz Material Type: Mixture
Last Updated: 10/15/2016 02:30:34 AM
Trade Secret: false
Chemical Name: TETRAPOTASSIUM PYROPHOSPHATE 6
Common Name Inventory:

ID: 2143
Permit Status: Permit Renewed
Child Record ID: DEH2002-HCHEM-512276
Active Permit: true
CAS No: 7320-34-5
Haz Material Type: Pure
Last Updated: 10/15/2016 02:30:34 AM
Trade Secret: false
Chemical Name: TETRAPOTASSIUM PYROPHOSPHATE A
Common Name Inventory:

ID: 2144
Permit Status: Permit Renewed
Child Record ID: DEH2002-HCHEM-512277
Active Permit: true
CAS No: 108-88-3
Haz Material Type: Mixture
Last Updated: 10/15/2016 02:30:34 AM
Trade Secret: false
Chemical Name: TOLUENE
Common Name Inventory:

ID: 2106
Permit Status: Permit Renewed
Child Record ID: DEH2002-HCHEM-512236
Active Permit: true
CAS No:
Haz Material Type: Mixture
Last Updated: 10/15/2016 02:30:34 AM
Trade Secret: false
Chemical Name: TRIPLE SUPER PHOSPHATE
Common Name Inventory: TRIPLE SUPER PHOSPHATE 0-45-0

ID: 2145
Permit Status: Permit Renewed
Child Record ID: DEH2002-HCHEM-512278
Active Permit: true
CAS No:
Haz Material Type: Mixture
Last Updated: 10/15/2016 02:30:34 AM
Trade Secret: false
Chemical Name: TURCO 4215 NC-LT
Common Name Inventory:

ID: 2146
Permit Status: Permit Renewed
Child Record ID: DEH2002-HCHEM-512279
Active Permit: true
CAS No:
Haz Material Type: Mixture
Last Updated: 10/15/2016 02:30:34 AM
Trade Secret: false
Chemical Name: TURCO C NVT
Common Name Inventory:

ID: 72941
Permit Status: Permit Renewed
Child Record ID: DEH2017-HCHEM-0146902
Active Permit: true
CAS No: 007738-94-5
Haz Material Type: Mixture
Last Updated: 10/23/2017 05:12:34 PM
Trade Secret: false
Chemical Name: TURCO DEOXIDIZER 16 - HENKEL (GHS)
Common Name Inventory: TURCO DEOXIDIZER 16 - HENKEL (GHS)

ID: 72942
Permit Status: Permit Renewed
Child Record ID: DEH2017-HCHEM-0146903
Active Permit: true
CAS No: 007783-20-2
Haz Material Type: Pure
Last Updated: 10/23/2017 05:12:34 PM
Trade Secret: false
Chemical Name: TURF SUPREME 16-6-8 PLUS TRIMEC - JR SIMPLOT (GHS)
