Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Description (Proposed actions, location, and/or consequences).

The California Department of Education (CDE) proposes improvements to the existing original athletic fields and related infrastructure at the CSDR campus to ensure the safety of participants and spectators, maximize use of the fields for the campus' needs, and meet Title IX requirements. Project improvements include the replacement of existing grass sports fields with new football, soccer, baseball, and softball fields. The Project also includes replacement of the existing decomposed granite track with a new all-weather 8-lane track. Existing athletic equipment, fencing, bleachers, and a storage shed would be demolished and replaced with new lighting, bleachers, dugouts, batting/pitching cages, shot put, long jump, high jump, discus, drinking fountains, electronic messaging, flagpoles, scoreboards, press booth, and a scorekeeper's booth. The Project includes the construction of a canopy of photovoltaic panels over the bleachers, new practice field, and support facilities including restrooms, security features, a concession stand, ticket booth building, and equipment storage. New pathways, vehicle parking, fencing, and renovated landscaping and irrigation systems are also proposed.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Project would have potentially significant impacts to hazards and hazardous materials. However, any potentially significant impacts would be reduced to less than significant with the implementation of Mitigation Measure HAZ-1 as detailed further in the Draft IS/MND.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
There are no areas of controversy known to the Lead Agency regarding the proposed project.
The Draft IS/MND will be released for a 30-day public circulation period from June 30, 2025, to July 30, 2025. During this time, feedback from stakeholder agencies and the public will be gathered regarding any questions related to the environmental analysis presented in the Draft IS/MND. Any areas of controversy regarding the environmental analysis presented in the Draft IS/MND will be adequately addressed and formally addressed in the project's Final IS/MND once it is prepared.
Provide a list of the responsible or trustee agencies for the project.
