

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Metcalfe Motorcycle County Park - Site Plan

Lead Agency: County of Santa Clara, Parks and Recreation Department

Contact Name: Andy McClellan

Email: Andrew.McClellan@prk.sccgov.org Phone Number: 408-355-2200

Project Location: San Jose, Santa Clara County
City *County*

Project Description (Proposed actions, location, and/or consequences).

The Metcalfe Motorcycle County Park Site Plan Report proposes various improvements within the core-use area of the Park, including installation of a new visitor center, a vehicle wash, a restroom building, an unloading ramp, shade structures; construction of ADA improvements; creation of additional pathways; reconfiguration of parking areas; and improved connectivity between the main visitor area and OHV trails.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Air Quality - Construction activities could result in fugitive dust emissions. Mitigation includes implementation of Bay Area Air District Basic Management Practices for control of fugitive dust.
Special-Status species - Implementation of the proposed project could impact California red-legged frog, California tiger salamander, white-tailed kite, nesting birds, roosting bats, and American badger. Mitigation includes timing of construction activities, pre-construction surveys, establishment of buffers, implementation of Best Management Practices during project construction, and protocols for tree/vegetation removal in accordance with the Santa Clara Valley Habitat Conservation Plan.
Cultural Resources - Historical or archaeological resources could be discovered during ground disturbing activities. Mitigation includes preparation of a cultural resources management plan, awareness training, stopping work in the event of a discovery, consulting a qualified archaeologist, and implementing appropriate measures to evaluate, and protect the resource.
Geology and Soils - The project site has potential for fault surface rupture/ground shaking and expansive soils. Mitigation includes compliance with the California Building Code and appropriate foundation system design.
Paleontological Resources - Paleontological resources could be discovered during ground disturbing activities. Mitigation includes stopping work, consulting a qualified paleontologist and implementing appropriate measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known areas of controversy.

Provide a list of the responsible or trustee agencies for the project.

Santa Clara Valley Habitat Agency
State Fire Marshal
United States Fish and Wildlife Service
California Department of Fish and Wildlife
