

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: 20350 McKean Road Telecommunication Facility

Lead Agency: County of Santa Clara

Contact Name: Carl Hilbrants

Email: carl.hilbrants@pln.sccgov.org

Phone Number: 408-299-5781

Project Location: San Jose  
*City*

County of Santa Clara  
*County*

Project Description (Proposed actions, location, and/or consequences).

Application is for an Architecture and Site Approval to establish a new 80-foot-tall wireless telecommunications facility tower at 20350 McKean Road. The tower will be disguised as a pine tree (monopine) to help minimize visual impacts to neighbors and passersby. The proposed improvements will be located within a 1,225 square foot leasehold area with the entirety of the proposed equipment, including the tower, will be located behind a 1,089 square foot chain-link fence enclosure. Outside of the leasehold area will be a 12-foot-wide gravel access driveway leading from McKean Road and an 18 square foot area for a future PG&E transformer. The proposed wireless telecommunications facility will include the following components: 1) Fifteen (15) tower-mounted AT&T Antennas centered at the 71-foot level with adequate space to allow for similar arrays at the 47-foot and 59-foot levels, 2) Twelve (12) tower-mounted AT&T Radios centered at the 71-foot level, 3) Three (3) tower-mounted AT&T Surge Suppressor units and ancillary equipment, 4) Five (5) ground-based equipment cabinets, 5) One (1) ground-based 30kW AT&T Diesel Generator, 6) One (1) ground-based GPS antenna and ancillary ground-based equipment, 7) Faux tree foliage to disguise the pole as a pine tree (monopine).

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project's only potentially significant effect would be a Biological Resource, specifically, the project could have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? The species in question is the California Tiger Salamander (CTS). Per CNDDB, the threat to CTS is from vehicle collisions. The proposed project will add, on average, one to two car trips per month. As such, the potentially significant threat is deemed minimal and thereby does not warrant any mitigation measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Provide a list of the responsible or trustee agencies for the project.

None.
