

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Girvan Road over Olney Creek Bridge Replacement Project

Lead Agency: City of Redding

Contact Name: Amber Kelley

Email: akelley@cityofredding.org Phone Number: 530-225-4046

Project Location: Redding Shasta County  
*City* *County*

Project Description (Proposed actions, location, and/or consequences).

The City of Redding (City) proposes to replace the Girvan Road Bridge (O6C-0341) over Olney Creek. The purpose of the project is to improve safety conditions for vehicle, bicycle, and pedestrian traffic and to improve the hydraulic capacity of Olney Creek at the bridge. The existing bridge, built in 1960, has narrow travel lanes and no shoulders for pedestrian and bicycle use. The existing bridge, which is 32 feet wide and 100 feet long, would be replaced with a 52-foot-wide and 109-foot-long bridge. The new bridge would incorporate two 12-foot lanes, 8-foot shoulders, and 6-foot sidewalks. The roadway will be modified on the east and west sides of the bridge to conform to the new bridge width. The project includes: sidewalk improvements; ADA compliant curb, gutter, and ramps; and lighting improvements. Construction work will consist of vegetation removal, access ramps, temporary clear water diversion, bridge demolition, earthwork, falsework, drilling, vibratory hammers, trenching, utility relocation, drainage installation and modification, bridge construction, rock slope protection, revegetation, paving, striping, and sign replacement/installation.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The project could potentially impact biological resources. The use of specific mitigation measures will avoid or mitigate the potentially significant environmental effects identified, and the preparation of an environmental impact report will not be required. Mitigation measures include in water work windows; environmental awareness training; and pre-construction surveys for migratory birds, raptors, bats, western pond turtle, and foothill yellow-legged frog.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No controversial issues.

Provide a list of the responsible or trustee agencies for the project.
