Sacramento, California 95826

**Project Title:** Emergency Permit for Management of Hazardous Waste, Watkins Manufacturing, Vista, California

**Project Location:** 1280 Park Center Drive, Vista, California 92081

**County:** San Diego

**Project Applicant:** Jamie Gardner, Director, People Operations

**Approval Action Under Consideration by DTSC:** Emergency Permit

**Statutory Authority:** California Health and Safety Code, Chapter 6.5

**Project Description:** The California Department of Toxic Substances Control (DTSC), pursuant to authority granted under California Code of Regulations (CCR), Title 22, Division 4.5, Chapter 20, Sec. 66270.61, has issued an Emergency Permit to Watkins Manufacturing, (EPA ID# CAD982487852) to treat hazardous waste through a controlled reaction with a chemical solution. Specifically, one (1) 55-gallon drum of Methyl Methacrylate must be stabilized prior to transport to an authorized hazardous waste treatment, storage, and disposal facility.

This chemical is currently being stored at Watkins Manufacturing located at 1280 Park Center Drive, Vista, California 92081. DTSC has determined as a safety

precaution to prevent an accident or severe injury, an Emergency Permit should be issued to chemically stabilize the hazardous waste by Clean Harbors Environmental Services (Clean Harbors) prior to storage and eventual transportation off-site.

**Background:** The container has peroxide formation present on either the inside, outside, or the bottom of the chemical's containers, as well as the thread container cap. The presence of peroxide formation may be unstable at relatively low concentrations, resulting in fire and/or explosion if improperly handled. Due to the presence of peroxide formation, DTSC considers this chemical to be an imminent and substantial endangerment to human health and the environment. Chemical stabilization is recommended prior to transport to a permitted treatment, storage, and disposal facility.

**Project Activities:** The treatment of this hazardous waste involves the addition of a solution to the containers in a controlled manner to reduce the reactive or ignitable characteristics of the chemical. Treatment will take place within a designated exclusion zone. Only technicians from Clean Harbors will be allowed in the exclusion zone. Movement, preparation, and treatment of the containers will be in accordance with established standards.

Within 10 business days of the expiration of this permit, Watkins Manufacturing will submit a final report, signed in accordance with Title 22, CCR Sec. 66270.11(d). The report shall include certification that the treatment area has been cleared of all residual hazardous waste generated from this emergency treatment and all generated waste has been properly managed. The Emergency Permit is effective beginning July 31, 2025, and shall expire on September 29, 2025.

**Name of Public Agency Approving Project:** Department of Toxic Substances Control

**Name of Person or Agency Carrying Out Project:** Clean Harbors Environmental Services

**Exempt Status:** Emergency Project Public Resources Code (PRC), Sec. 21080(b)(4); 14 CCR, Sec.15269(b)(c)

**Reasons Why Project is Exempt:** This action is necessary to prevent an emergency. Chemical stabilization of the chemical is necessary prior to transportation to an

authorized hazardous waste treatment, storage, and disposal facility to prevent accidental fire and/or explosion during transport.

The administrative record for this project is available to the public by appointment at the following location:
