

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Climate Action Plan Update

Lead Agency: City of Manteca

Contact Name: Toben Barnum, Associate Planner

Email: tbarnum@manteca.gov

Phone Number: (209) 456-8517

Project Location: Manteca  
*City*

San Joaquin County  
*County*

Project Description (Proposed actions, location, and/or consequences).

The City of Manteca is located along the intersection of State Route (SR) 99 and State Route (SR) 120 in California's Central Valley, between the cities of Stockton and Modesto. The project is a city-wide, policy-level document that provides an update to Manteca's Climate Action Plan (CAP). The zoning and General Plan designations of the planning area will not change.

The proposed CAP is intended to streamline future environmental reviews of development projects in the City of Manteca by assuring compliance with all relevant statewide regulations related to climate change. The Draft CAP Update has been designed to effectively address State regulatory requirements by reducing citywide greenhouse gas (GHG) emissions. The Draft CAP Update includes a baseline inventory of GHG emissions, emission forecasts associated with growth of the City, and emissions reduction strategies in accordance with State requirements.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Initial Study did not identify any significant or potentially significant effects associated with the proposed project as no direct physical development would result from adoption of the Climate Action Plan Update.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Significant areas of controversy have not been identified for the proposed project. However, typical concerns related to Climate Action Plans include the feasibility and adequacy of measures and actions to meet GHG reduction goals.

Provide a list of the responsible or trustee agencies for the project.
