

CITY OF REDWOOD CITY PUBLIC NOTICE

NOTICE OF AVAILABILITY AND PUBLIC HEARING

**45-Day Public Review Period for the
Draft Environmental Impact Report (EIR)**

Beginning on: August 7, 2026

Ending on: September 21, 2026

**Planning Commission Public Hearing for
Public Comments on the Draft EIR**

Tuesday, August 18, 2026 at 6:00 p.m.

Council Chambers, City Hall*

1017 Middlefield Road, Redwood City

No decision will be made at this meeting.

* In Person: Council Chambers, City Hall, 1017 Middlefield Road, Redwood City

Video conference:

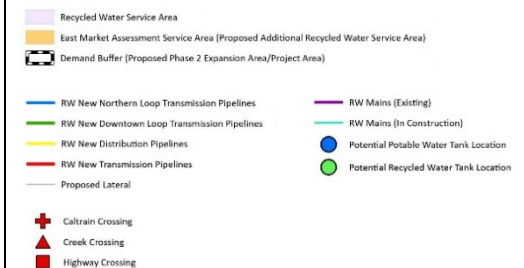

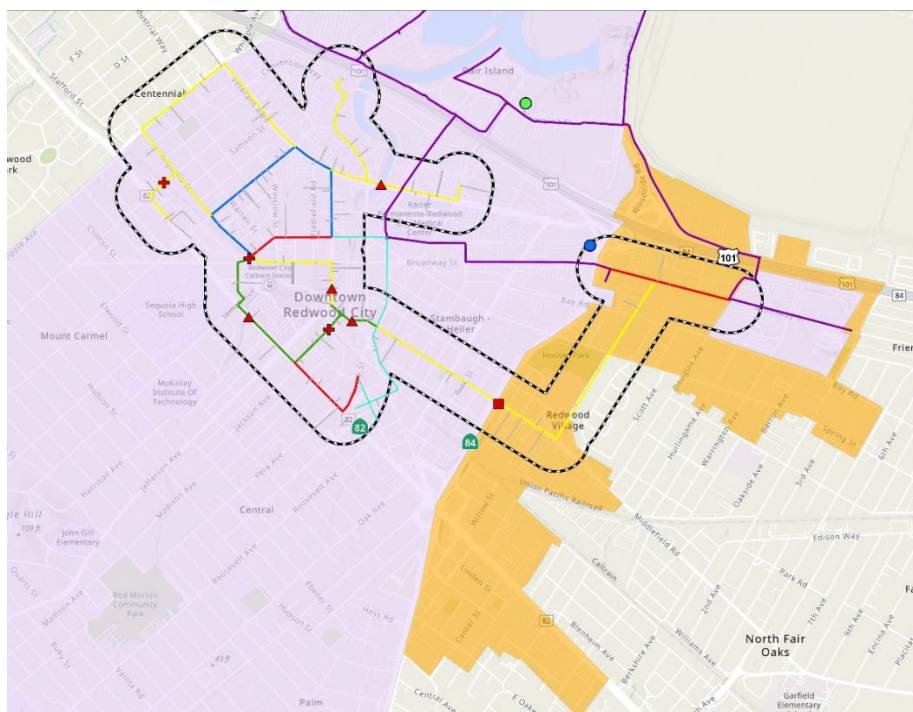

<https://redwoodcity.zoom.us/j/93045366921> (Meeting ID: 930 4536 6921)

Dial-in: (669) 900-6833

To provide comments: See the instructions posted on the agenda 72 hours in advance of the meeting at

www.redwoodcity.org/PC

Project: The City of Redwood City (City) proposes to adopt and implement the proposed Recycled Water Master Plan (RWMP) Phase 2 Project (Proposed Project). The Proposed Project guides the phased expansion of the City's recycled water system to serve more customers and utilize available recycled water supplies. It also includes improvements that strengthen service reliability for both current and future customers.

Lead Agency: City of Redwood City

Location: The Project area encompasses the existing and proposed recycled water service area and facilities in Redwood City as shown in the adjacent map. The existing recycled water service area includes the northern, eastern, and central portions of the City and the proposed Project is expanding the recycled water service area to include the East Market Assessment Service Area.

How to get more information: The Draft EIR and all documents referenced in the Draft EIR are available for review online at https://www.redwoodcity.org/departments/public-works/water/recycled-water or in person at: City Hall at 1017 Middlefield Road, Redwood City between the hours of 10:00 a.m. to 4:00 p.m., Monday to Thursday. Redwood City Main Public Library at 1044 Middlefield Road, Redwood City during business hours, including weekends.	How to provide comments: Comments on the Draft EIR must be given at the public hearing or in writing by 4:00 p.m. on September 21, 2026. All written comments should be directed to: Justin Chapel, Public Works Interim Assistant Public Works Director / Chief Sustainability Officer City of Redwood City 1400 Broadway, Redwood City, CA 94063 (650) 780-7469 jchapel@redwoodcity.org En español: Para más información en español, por favor de contactarse por telefono al (650) 780-7234 o por correo electronico a pc@redwoodcity.org.
PROJECT DESCRIPTION The Proposed Project includes adoption of the Phase 2 RWMP and implementation of associated recycled water infrastructure improvements, including: • Expansion of the recycled water service area to include the East Market Assessment Service Area, subject to the City's Recycled Water Use Ordinance; • Construction of approximately 30,000 linear feet (5.7 miles) of new recycled water transmission and distribution pipelines primarily within existing public rights-of-way; • Creation of multiple recycled water transmission and distribution loops in the Central and East Areas to improve system redundancy and water quality; • Installation of recycled water service laterals to connect future customers; • Construction of new recycled water storage facilities (either a single 2-million-gallon buried tank or two 1-million-gallon above-ground tanks) with associated pumps and pump station at a vacant City-owned site near Blomquist Street and Maple Street; and • Construction of a new potable water storage tank (either a 1-million-gallon or 3-million-gallon above grade tank) with associated pumps and pump station at 1400 Broadway, an existing Redwood City Public Works facility, to provide backup supply for dual-plumbed buildings and enhance emergency and fire-flow reliability. The project would enable delivery of up to 762 acre-feet per year of additional recycled water to customers in the Central Area, representing approximately 78 percent of estimated Central Area demand (973 afy), using recycled water supply that is currently unused.	
ANTICIPATED SIGNIFICANT IMPACTS The City's Recycled Water Master Plan (RWMP) Phase 2 Project would result in potentially significant impacts related to Air Quality; Biological Resources; Cultural Resources; Geology and Soils; Hazards and Hazardous Materials; Noise; and Tribal Cultural Resources. These impacts would be reduced to a less-than-significant level through the implementation of identified mitigation measures.	
PURPOSE OF NOTICE The purpose of this notice is to: 1) serve as the public Notice of Availability of a Draft EIR pursuant to CEQA Guidelines Section 15087, and 2) solicit comments regarding the content of the Draft EIR for a 45-day period, after which a Final EIR will be prepared containing comments and responses to comments that, together with the Draft EIR, will form the Final EIR. The Final EIR will be used by the City Council in its consideration of the approval of the Project, anticipated at a later hearing. Comments regarding your opinion of the project or if you think the City Council should approve or disapprove the project will not be addressed in the environmental review document. However, you may still provide these comments to Justin Chapel above at any time.
