

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Magnums Area Remote Sewer Project

Lead Agency: City of Redding

Contact Name: Tiffany Durette

Email: tdurette@cityofredding.org Phone Number: 530.225.4171

Project Location: Redding Shasta
City *County*

Project Description (Proposed actions, location, and/or consequences).

The City of Redding (City) Magnums Area Remote Sewer Replacement (project) involves the replacement of existing sewer lines spanning approximately 5,060-feet long across multiple locations. Replacement of sewer lines is needed to address deterioration due to age, lines which require a high level of maintenance, and/or lines which are undersized. The project would require trenching, sub-surface pipe bursting, vegetation removal, utility relocation, paving, sign installation, and striping. The project would span approximately 5,060-feet long across multiple locations, from Mishka Ct., Greenback Ln., Calexico Dr., Dickson Dr., E. Keswick Dam Rd., Lake Blvd., Shamrock St., sections along the back sections of Magnums Way and Guinevere Ct. and along portions of the railroad.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potential impacts to biological measures were identified and mitigation measures are proposed to avoid impacts. Special status species, such as Ringtail, Northwestern Pond Turtle, Western Spadefoot Toad, and migratory birds and raptors may be impacted. Proposed mitigation measures include environmental awareness training, avoidance of construction during sensitive periods, preconstruction daily assessments where applicable, and preconstruction surveys will reduce or avoid effects.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A.

Provide a list of the responsible or trustee agencies for the project.

Central Valley Water Quality Control Board

California Department of Fish and Wildlife

U.S. Army Corps of Engineers (USACE)
