Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: TBD

Project Title: Williams Pit Reclamation Plan Amendment and Use Permit Amendment RP-00-04-1M and UP-00-11-1M

Lead Agency: County of Siskiyou

Contact Name: Bernadette Cizin

Email: bpcizin@co.siskiyou.ca.us Phone Number: 530-841-2100

Project Location: Montague, Siskiyou
City *County*

Project Description (Proposed actions, location, and/or consequences).

The proposed project includes amending the existing Use Permit and Reclamation Plan to expand the quarry excavation area and allow continued mining activities at the site for an additional 20 years. The proposed project would allow for the continued removal, crushing and stockpiling of aggregate onsite. The amendment is necessary as a previous operator did not mine according to the approved reclamation plan, making the approved final slopes unachievable. The APN associated with this project is 013-360-020.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Mitigated Measures related to Aesthetics will help to reduce visual impacts from mining activities at the project site.
Mitigation Measures related to Biological resources will help to reduce potential impacts to special-status species and nesting birds.
Mitigation Measures related to Cultural Resources will help to mitigate any potential disturbances of cultural resources, should they be found.
Mitigation Measures related to Geology and Soils will reduce the the potential of back-break and safety issues with local bench-level slope failures.
Mitigation Measures related to Noise will reduce impacts of construction and blasting noise to the nearby residential receptors.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
