Project Title: Chowchilla Subbasin Groundwater Recharge Project 2 (Streambed Alteration Agreement No. EPIMS-MAD-48140-R4).

Project Location: The Project is located within the Eastside Bypass of the San Joaquin River, approximately 16 miles west of the City of Madera in Madera County, California; Section 30, Township 11 South, Range 15 East; USGS 7.5 Minute Great Valley MDB&M; Assessor’s Parcel Number 043-030-021; GPS coordinates 36.959967, -120.356083.

Project Description: The California Department of Fish and Wildlife has executed Streambed Alteration Agreement number EPIMS-MAD-48140-R4 pursuant to Section 1602 of the Fish and Game Code to the applicant, Madera County.

The Project involves activities related to the construction of a water diversion facility at a point of diversion on the Eastside Bypass in support of future diversion of flood flows to groundwater recharge. The diversion facility will consist of a fish screen, a concrete control box that will capture water, and a buried reinforced concrete pipeline. The pipeline will transport water under the levee of the Eastside Bypass into a reinforced concrete pump box that, when operational, will pump water into a 31-acre recharge basin for recharge.

Public Agency Approving Project: CALIFORNIA DEPARTMENT OF FISH AND WILDLIFE

Person or Public Agency Carrying Out Project: Madera County

Exempt Status:

- Statutory Exemption.
 - Categorical Exemption.
- CEQA is suspended (see below)

Reasons why project is exempt: CDFW’s issuance of an Agreement is generally subject to CEQA (Pub. Resources Code, § 21000 et seq.) and its implementing regulations; however, CEQA is suspended per Executive Order N-7-22 (EO) for purposes of CDFW’s issuance of this Agreement. Paragraph 13 of the EO states that CEQA and its implementing regulations are suspended for the following, to the extent necessary to address the impacts of drought: (1) specified actions taken by state agencies and specified actions taken by a local agency where the Department of Water Resources concurs that local action is required; and (2) any permits necessary to carry out actions under (1). Actions under (1) are recharge projects under either Flood-Managed Aquifer Recharge or the Department of Water Resources Sustainable Groundwater Management Grant Program occurring on open and working lands to replenish and store water in groundwater basins that will help mitigate groundwater conditions impacted by drought. Because the Project to which this Agreement applies involves construction of facilities for subsequent diversions of flood flows for application to open lands to replenish and store water in groundwater basins to help mitigate groundwater conditions impacted by drought, no environmental review for this Agreement pursuant to CEQA is required at this point in time. Consequently, CDFW has not reviewed a certified environmental impact report or adopted mitigated negative declaration evaluating this project, nor has CDFW adopted related findings pursuant to CEQA. Similarly, in applying for this permit, Permittee relied on the CEQA suspension provided by Paragraph 13 of the EO.
