Present Land Use/Zoning/General Plan Designation:

Light Industrial

Project Description: (please use a separate page if necessary)

The proposed Remedial Action Plan for the remediation of contaminants of concern in soil at the SMUD Thornton Avenue former electrical substation. The remedial action would consist of excavating soil on the Site and eastern adjacent property containing arsenic and lead. The cleanup would also reduce the potential for leaching to groundwater. The excavated areas would be backfilled with clean soil. All excavated soil would be removed from the Site and transported to an appropriate, permitted off-Site facility for disposal. Asphalt pavements and concrete curbing on the eastern adjacent property would be restored after backfilling the excavation with clean soil.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
