Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Ana Montenegro Park

Lead Agency: City of Baldwin Park

Contact Name: Nick Baldwin, AICP, City Planner

Email: nbaldwin@baldwinpark.com Phone Number: 626-960-4011 Ext. 475

Project Location: _____
City *County*

Project Description (Proposed actions, location, and/or consequences).

Project includes a new 9,000-square foot pocket park featuring a tower-like play structure inspired by an alebrije serpent, colorful play climbers, a swing set, five shade structures, an approximately 500-square foot restroom building, and associated hardscape and landscape improvements. Approximately 2,500 square feet of drought tolerant landscaping would be provided around the perimeter of the park, and five shade trees would be planted in various locations throughout the park. A 10-foot tall concrete masonry block wall would be constructed along the park's western and northern boundaries, and a 3-foot concrete wall topped with 8-foot tall decorative steel pickets would be erected along the parks southern and eastern boundaries. Project would also require approval of a Zone Change from Industrial Commercial to Open Space and a General Plan Amendment from Commercial Industrial to Open Space. No off-street parking is provided.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant impacts related to biological resources, cultural resources, paleontological resources and noise would be reduced to less than significant with implementation of mitigation measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
