Project Title: Glendale Recycling Center Storm Water Diversion System Project

Project Location - Specific: 540 West Chevy Chase Drive

Project Applicant: City of Glendale, Public Works Department

Project Location - City: Glendale

Project Location - County: Los Angeles

Description of Nature, Purpose and Beneficiaries of Project: The City of Glendale Recycling Center Storm Water Diversion System Project is located at 540 West Chevy Chase Drive in an industrial area, bounded by West Chevy Chase Drive to the north, the Glendale Integrated Waste facility to the west, a self-storage center to the south, and a commercial property to the east. The Glendale Recycling Center is approximately 1.7-acre property that contains several processing buildings for recycling that are surrounded by asphalt concrete parking lot and work area for the facility. The purpose of the storm water diversion system is to divert the 85th percentile, 24-hour storm events to the sanitary sewer. The new system is proposed to include a detention subsystem and new storm drain pipelines. The new detention subsystem will be at a maximum of 20 feet deep and the new pipelines will be approximately 10 feet deep. The detention structure footprint is anticipated to be 32 feet wide by 72 feet long and 46 feet wide by 47 feet long.

Name of Public Agency Approving Project: City of Glendale

Name of Person or Agency Carrying Out Project: City of Glendale, Public Works Department

Exempt Status: (check one)

- Ministerial (Sec. 21080(b)(1)); 15268);
- Declared Emergency (Sec. 21080(b)(3)); 15269(a));
- Emergency Project (Sec. 21080(b)(4)); 15269(b)(c));
- Categorical Exemption. State type and section number: 15303
- Statutory Exemptions. State code number:

Reasons why project is exempt:

The project is exempt from the California Environmental Quality Act (CEQA) as a Class 3 exemption pursuant to the California Code of Regulations, Title 14, Section 15303 because it involves the construction of a small structure at an existing recycling facility used to capture onsite runoff and convey it to an existing stormwater system.
