922-944 San Leandro Street, Mountain View, California 94043, Phase I Environmental Site Assessment

February 9, 2023

Prepared for:

City Ventures
444 Spear Street, Suite 200
San Francisco, California 94105

Prepared by:

Stantec Consulting Services Inc.
735 East Carnegie Drive, Suite 280
Mountain View, California 92408

Project No.: 185805916

Sign-off Sheet and Signatures of Environmental Professionals

This document entitled Phase I Environmental Site Assessment was prepared by Stantec Consulting Services Inc. (“Stantec”) for the account of City Ventures (the “Client”). The conclusions in the Report are Stantec’s professional opinion, as of the time of the Report, and concerning the scope described in the Report. The opinions in the document are based on conditions and information existing at the time the scope of work was conducted and do not take into account any subsequent changes. The Report relates solely to the specific project for which Stantec was retained and the stated purpose for which the Report was prepared. The Report is not to be used or relied on for any variation or extension of the project, or for any other project or purpose, and any unauthorized use or reliance is at the recipient’s own risk.

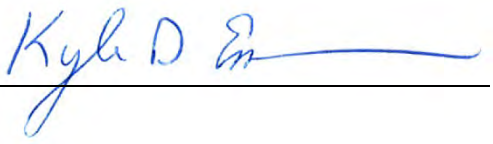

Stantec can neither warrant nor guarantee that information received from the “Client” and third parties in the preparation of the Report is correct. While Stantec has exercised a customary level of judgment or due diligence in the use of such information, Stantec assumes no responsibility for the consequences of any error or omission contained therein.

This Report is intended solely for use by the Client in accordance with Stantec’s contract with the Client. While the Report may be provided to applicable authorities having jurisdiction and others for whom the Client is responsible, Stantec does not warrant the services to any third party. The report may not be relied upon by any other party without the express written consent of Stantec, which may be withheld at Stantec’s discretion.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of Title 40 of the Code of Federal Regulations, Part 312, (40 CFR 312). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 EXECUTIVE SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) report of the property located at 922-944 San Leandro Street, City of Mountain View, County of Santa Clara, California 94043 (the "Subject Property"), on behalf of City Ventures (the "Client"). The work was performed according to the requirements of the Master Services Agreement between City Ventures and Stantec (the "MSA"). City Ventures (the "User") has been designated as the User of this report. The intended use of this Phase I ESA is for due diligence in support of acquisition (or lease) for development as multi-family housing.

The Phase I ESA was conducted in conformance with the requirements of ASTM International (ASTM) Designation E1527-21 and E1527-13, and All Appropriate Inquiries (AAI) as defined by the United States Environmental Protection Agency (EPA) in Title 40 of the Code of Federal Regulations, Part 312 (40 CFR 312), except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM or AAI practice are described in Section 2.3.

The Subject Property consists of approximately 1.7 acres of land developed with a single-story multi-tenant commercial building with an associated asphalted parking lot and two residential structures with an open field. Adjoining properties, as well as the nearby area, uses include residential, commercial, and light industrial. A Subject Property Location Map is provided as Figure 1. A Subject Property Vicinity Map illustrating the main features of the Subject Property and vicinity is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

Stantec's interpretation of historical aerial photos indicate the northwestern portion of the Subject Property and surrounding area to the north were used for agricultural land until circa 1970 (*i.e.*, orchards). The residential structures in the northeastern portion of the Subject Property were developed pre-1938 and the commercial building in the southern portion was developed in circa 1980. During the site reconnaissance, Stantec tenants observed in the commercial structure included Suite A – Minute Man Press (design studio); Suite B – Storage Overflow for Unit G Art Studio; Suites C/D/E – Vacant; Suite F – Pegasus (t-shirt embroidery); Suite G – Art Studio; Suite H - Reservoir Engineering Research Institute; Suite I/K – No Access; Suite O – West States Cabinetry (showroom); and Suite M – EOSDX (cancer research). Stantec observed small quantities of hazardous materials including combustible liquids, corrosive solids and liquids, flammable liquids, nonflammable gas, oxidizer gas, solvents, and miscellaneous hazardous material solids and liquids (less than 25-gallons) stored and used on-site in association with laboratory use in Suites H and M. No drains were observed in the laboratory/chemical storage areas and there were no sumps, clarifiers, or in-ground structures on the Subject Property. Stantec did not identify potential impacts within suites H and M, due to the observed uses, that would rise to a level that would be considered a recognized environmental condition. Therefore, no further assessment has been recommended.

ExecutIve Summary

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 and E1527-13 of 922-944 San Leandro Street, City of Mountain View, County of Santa Clara, California 94043, or the "Subject Property." Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed the following recognized environmental condition (RECs) in connection with the Subject Property:

- **Historical Agricultural Use:** Stantec's interpretation of historical aerial photographs indicate the northwestern portion of the Subject Property and surrounding area to the north were used for agricultural land until circa 1970 (*i.e.*, orchards). Historical agricultural use can be a potential concern due to the possible use of pesticides and herbicides containing heavy metals. Therefore, Stantec recommends collecting shallow soil samples to evaluate for potential residual organochlorine pesticide concentrations and arsenic/lead concentrations that may be present at concentrations of concern to redevelopment for residential purposes.

Stantec also identified the following non-ASTM issues associated with the Subject Property:

- **Potential Asbestos and Lead-Based Paint.** Given the age of the existing building on the Subject Property (pre-1938 and circa 1980s), the presence of asbestos containing materials (ACMs) and lead-based paint (LBP) is considered possible. Stantec recommends conducting a comprehensive, pre-demolition ACM and LBP survey prior to any activities with the potential to disturb building materials.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform All Appropriate Inquiries (AAI) into the past ownership and uses of the Subject Property consistent with good commercial or customary practice as outlined by ASTM International (ASTM) in "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", Designation E1527-21 and E1527-13. "All Appropriate Inquiries" (AAI) is the process for evaluating a property's environmental conditions for the purpose of qualifying for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions, including recognized environmental conditions ("RECs"), in connection with the Subject Property. While the AAI Rule still references the ASTM E1527-13 standard until fully adopted by the United States Environmental Protection Agency (USEPA), this report incorporates procedures as prescribed in ASTM E1527-21, which is the current published ASTM standard for Phase I ESAs.

The ASTM E1527-21 standard indicates that the goal of the Phase I ESA is to identify RECs, as well as historical recognized environmental conditions ("HRECs") and controlled recognized environmental conditions ("CRECs"), that may exist at a property. The term "recognized environmental conditions" is defined as:

1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment;

2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or

3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

ASTM defines a "HREC" as a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., activity and use limitations or other property use limitations). A HREC is not considered a REC.

ASTM defines a "CREC" as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The release of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. *De minimis* conditions are minor releases that generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies. ASTM also considers the potential for a business environmental risk (BER), defined as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of the Subject Property, not necessarily limited to those environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations.

The work was performed according to the requirements of the Master Services Agreement between City Ventures and Stantec (the “MSA"). City Ventures (the “User”) has been designated as the User of this report. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Subject Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Subject Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Subject Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-21 notes that the availability of record information varies from source to source. The User or Environmental Professional (EP) is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. “Reasonably ascertainable” means:

1. Information that is publicly available;
2. Information that is obtainable from its source within reasonable time and cost constraints; and
3. Information that is practicably reviewable.

2.1 SUBJECT PROPERTY DESCRIPTION

The Subject Property consists of approximately 1.7 acres of land developed with a single-story multi-tenant commercial building with an associated asphalted parking lot and two residential structures with an open field. Adjoining properties, as well as the nearby area, uses include residential, commercial, and light industrial. A Subject Property Location Map is provided as Figure 1. A Subject Property Vicinity Map illustrating the main features of the Subject Property and vicinity is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

2.2 SPECIAL TERMS, CONDITIONS, AND ADDITIONAL ASSUMPTIONS

There were no special terms, conditions, or additional assumptions associated with this Phase I ESA.

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with the MSA. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report.

This report provides an evaluation of specified environmental conditions associated with the identified property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. 40 CFR 312.20(f)(2) requires that the Environmental Professional evaluate the thoroughness and reliability of provided information. Stantec can neither warrant nor guarantee such thoroughness or reliability, however.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the preparation of this report, and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the property's environmental condition.

Project Specific limiting conditions are provided in Section 2.2.

The conclusions are based on the site conditions encountered by Stantec at the time of the work. Accordingly, additional studies and actions may be required. The identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change. In the event of any conflict between the terms and conditions of this report and the terms and conditions of the MSA, the MSA shall control.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an EP. The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in Appendix B.

3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 and ASTM E1527-21 describe responsibilities of the User to complete certain tasks in connection with the performance of "All Appropriate Inquiries" into the Subject Property. The ASTM standard requires that the EP request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Subject Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire and/or Interview	Yes	The User is not aware of any environmental cleanup liens and/or activity and land use limitations associated with the Subject Property. The User is not aware of any past use and/or chemical or petroleum use associated with the Subject Property.
Environmental Liens or Activity and Use Limitations (AUL)	No	No environmental liens and/or activity and use limitations were identified in the Preliminary Title Report prepared by First American Title Company dated December 23, 2021, for APN 153-18-026. No other land title records, deeds, environmental liens, and activity and use limitation documentation were provided by the User, and public records were not searched by Stantec.
Previous Environmental Permits or Reports Provided by User	No	The User reportedly does not possess any of these documents.
Purpose of the Phase I ESA	Yes	The intended use of the Phase I is for acquisition for redevelopment as multi-family housing.

Stantec forwarded the ASTM recommended User Questionnaire to Kian Malek, Development Associate with City Ventures. The completed User Questionnaire returned to us by Mr. Malek and dated February 6, 2023, is included in Appendix C.

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Subject Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Subject Property. During the review of historical records, Stantec attempted to identify uses of the Subject Property from the present to the first developed use of the Subject Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Subject Property is provided in the table below with additional details in the following subsections

Topography:	The Subject Property sits at an average elevation of 42 feet above mean sea level (amsl) is relatively flat with a regional topographic gradient to the northwest (EDR, 2023).
Soil/Bedrock Data:	The subsurface in the vicinity of the Subject Property is underlain by a layer of clayey and silty soils with sandy lenses (ATT, 1989).
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	Depth to groundwater in the vicinity of the Subject Property ranged from 15.5 to 21.5 feet below ground surface (bgs) with a groundwater flow to the northwest (CSS, 2000).
NOTE: Site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

4.1.1 Subject Property Topography and Surface Water Flow

The Subject Property sits at an average elevation of 42 feet above mean sea level (amsl) is relatively flat with a regional topographic gradient to the northwest (EDR, 2023). Based on the topography, surface water on the Subject Property infiltrates the ground surface or flows overland into curb and gutter system along San Leandro Street to the east of the Subject Property.

4.1.2 Regional and Subject Property Geology

The Subject Property is located in Santa Clara County. The area is located within the Coast Ranges Geomorphic Province, which includes northwest-southeast trending mountain ranges and valleys that have been developed by the San Andreas Fault system (California Geological Survey [CGS], 2002). The stratigraphy underlying the Site consists primarily of recent-age alluvium (CDMG, 1961).

According to the site setting of the *Excavated Soil and Soil Sampling* report for El Camino Paving, Inc located at 924 San Rafael Avenue, Mountain View, CA dated June 16, 1989, prepared by Aqua Terra

Technologies (ATT), the subsurface in the vicinity of the Subject Property is underlain by a layer of clayey and silty soils with sandy lenses.

According to official maps of California, the Subject Property is not located within an Alquist-Priolo (AP) Earthquake Fault Zone boundary (CDMG, 2000).

4.1.3 Regional and Subject Property Hydrogeology

The Subject Property is located within the Santa Clara Basin (2-009.02), within the Santa Clara Valley Basin (DWR, 2003).

According to the Third Quarter 2000 Groundwater Monitoring and Supplemental Site Closure Report for El Camino Paving, Inc located at 924 San Rafael Avenue, Mountain View, CA dated October 12, 2000, prepared by CSS Environmental Services, Inc., depth to groundwater ranged from 15.5 to 21.5 feet below ground surface (bgs) with a groundwater flow to the northwest.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix D.

Stantec evaluated the information listed within the database relative to potential impact to the Subject Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Subject Property. As described in 4.1.3, the inferred shallow groundwater flow direction is likely to be in the northwest direction. Observations about the Subject Property and Adjoining properties made during the Subject Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Subject Property

The following table summarizes the environmental database listings for the Subject Property:

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Reservoir Engineering Research Institute 922 San Leandro Avenue, Suite H Mountain View, CA 94043	RCRA NonGen/NLR; CA CERS HAZ WASTE; CA CERS; CA CUPA Listings; CA HWTS; FINDS; ECHO	Target Property	No
The listing is for a professional organization with no reported violations or evaluations. The facility is listed as a hazardous waste generator and chemical storage facility with minor violations for administration issues			

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
and improper labeling. All violations were corrected. Hazardous wastes disposed off-site include laboratory waste chemicals mixed with detergent and soap. Given there is no evidence of a release of hazardous materials, these listings are not considered an environmental concern to the Subject Property.			
Finity Laboratories, Inc. 922 San Leandro Avenue, Suite D Mountain View, CA 94042	RCRA NonGen/NRL; FINDS; ECHO; CA HWTS; CA CUPA Listings	Target Property	No
The listing is for "research and development in the physical, engineering, and life sciences" with no reported violations or evaluations. Given there is no evidence of a release of hazardous materials, this listing is not considered an environmental concern to the Subject Property.			
Barclay Maps 922 San Leandro Avenue, Suite D Mountain View, CA 94042	CA HWTS	Target Property	No
Given there is no evidence of a release of hazardous materials, this listing is not considered an environmental concern to the Subject Property.			
Aqua Velop Inc 922 San Leandro Avenue Mountain View, CA 94042	CA HAZNET; CA HWTS	Target Property	No
The facility is listed as disposing of photochemicals/photoprocessing wastes off-site. Given there is no evidence of a release of hazardous materials, this listing is not considered an environmental concern to the Subject Property.			
Mountain View Industrial Associates 922 San Leandro Avenue Mountain View, CA 94042	CA HWTS	Target Property	No
Given there is no evidence of a release of hazardous materials, this listing is not considered an environmental concern to the Subject Property.			

4.2.2 Listings for Adjoining and Nearby Sites with Potential to Impact Subject Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions on Adjoining and nearby sites to pose a REC, CREC, or HREC for the Subject Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Subject Property from an Adjoining or nearby site, including by vapor migration or encroachment (i.e., potential for a vapor encroachment condition [VEC]. ASTM E2600-22 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM, 2022) was used as the basis for a Tier I Vapor Encroachment Screen (VES) for the

Subject Property. This included evaluation of release sites within 1/10 mile for Petroleum Hydrocarbon releases, and 1/3 mile for volatile and semi-volatile organic compound (VOC, SVOC), plus other potential vapor phase contaminants (such as mercury).

Based on this evaluation, the following individual facilities were identified as the most likely potential sources of impact to the Subject Property. The basis for why each of the following listed databases creates a REC for the Subject Property is also provided.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Raytheon Corp 350 Ellis Street Mountain View, CA 94043	NPL; SEMS; RCRA-SQG; US ENG CONTROLS; US INST CONTROLS; ROD; PRP	Approximately 2,301 feet to the East	No
The facility manufactured semiconductor products and have used variety of chemicals primarily chlorinated organic solvents. The site was sold to Fairchild Semiconductor Corporation in 1997; Veritas in 2000; AND Symantec in 2005. Soil and groundwater beneath the facility is contaminated with trichloroethylene (TCE), 1,1,1-trichloroethane, and 1,1- and trans-1,2-dichloroethylene from a leaking underground chemical storage tank (UST) and/or concrete acid neutrali ation sumps. Raytheon installed three wells to pump and treat groundwater to contain the groundwater plume. The Regional Water Quality Control Board (RWQCB) has issued Waste Discharge Requirements to Raytheon. On August 15, 1985, the Environmental Protection Agency (EPA) issued a CERCLA Administrative Order on Consent to Raytheon in conjunction with Fairchild and Intel Corp to conduct a joint remedial investigation/feasibility study to determine the type and extent of contamination and identify alternatives for remedial action. Raytheon installed a soil vapor extraction system in 1996 that operated until 2000 which removed and treated approximately 3,000 pounds of volatile organic compounds (VOCs) from the vadose zone. In 1987, Raytheon installed a slurry wall around the facility to approximately 100 feet bgs to physically contain VOCs on the facility. A passive sub-slab ventilation system and vapor barrier was installed under the new buildings constructed in 2000 which was converted to an active sub-slab depressurization system in 2015. A groundwater extraction and treatment system currently operates on the facility and is inspected and monitored weekly. A total of 19,391 pounds of VOCs have been removed from the groundwater between 1986 and 2019. According to the 2019 Annual Progress Report by Haley & Aldrich, Inc. dated April 15, 2020, groundwater impacts appear to be concentrations within the facility boundaries and Adjoining area and has not migrated beneath the subject Property. Therefore, the facility is not considered a REC to the Subject Property.			
Moffett Field Naval Air Station Mountain View, CA 94043	NPL; SEMS; US ENG CONTROLS; US INST CONTROLS; ROD; PRP	Approximately 658 feet to the northeast	No
The facility is approximately 1,500-acres and was listed on the United States Environmental Protection Agency (USEPA) National Priority List (NPL) in 1987 for a VOC release to groundwater. The facility has been separated into multiple areas including:			

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Operable Unit 1 - Landfill Sites 1 and 2: Site 1 was a 12-acre landfill that operated from the mid-1960s to late 1970s. Site 2 was a 1-acre landfill used between the 1940s and 1952. The long-term remedy included consolidation of Site 1 and Site 2 refuse and a multi-layer cap to contain the wastes. At Site 1, construction of the multi-layer landfill cap finished in 1998. Long-term maintenance of the cap and monitoring of landfill gas and groundwater began in 1999. EPA and the Water Board approved the closure of Site 2 in 2003 because site conditions qualified the area for unrestricted use. The most recent five-year review concluded that response actions at the site are in accordance with the remedy selected by EPA and that the remedy continues to be protective of human health and the environment in the short term. Continued protectiveness of the remedy requires incorporation of institutional controls in NASA's master plan and evaluation of the effectiveness of the burrowing mammal abatement plan. *Site 22 - Golf Course Landfill:* The Navy operated this 11-acre landfill from 1950 to 1967. The long-term remedy included a biotic barrier made of gravel and cobblestone. The biotic barrier allows for future use as a golf course. Construction of the biotic barrier finished in 2003. Regular maintenance and long-term monitoring of groundwater and landfill gas is ongoing. The most recent five-year review concluded that response actions at the site are in accordance with the remedy selected by EPA and that the remedy continues to be protective of human health and the environment in the short term. Continued protectiveness of the remedy requires incorporation of institutional controls in NASA's master plan. *Site 25 - Eastern Diked Marsh and Stormwater Retention Pond:* This site includes NASA's 175-acre stormwater retention pond and the Eastern Diked Marsh, as well as about 52 acres owned by the Midpeninsula Regional Open Space District. The long-term remedy included restoring part of the area to a tidal marsh by excavating sediments, treating certain areas with lead and zinc contamination, and disposing of the sediments off site. Cleanup activities were completed in 2013 *Site 26 - East-Side Aquifer Treatment System (EATS) Area:* The EATS area is near Hangar 3, where activities contaminated groundwater with VOCs. The long-term remedy included a groundwater extraction and treatment system of five extraction wells and an air stripper with carbon treatment. The Moffett Field storm drain system would receive the treated water. In 2014, the long-term remedy was changed to include enhanced treatment of contaminated groundwater in three areas and monitored natural attenuation for the rest of the plume area. The groundwater extraction and treatment system in the original remedy began operating in 1999. In 2019, consistent with the new remedy, treatment mixtures were injected into contaminated groundwater in three areas. Monitoring will determine the performance of the treatment and the natural degradation process in decreasing levels of contamination in groundwater. *Site 27 - Northern Channel:* The site consists of the Northern Channel and ditches that drain into the channel. The long-term remedy included the removal of contaminated sediment in the channel and ditches to protect the site's ecosystem. Active excavation of contaminated soils was completed in 2007. Site restoration activities were completed in 2012. *Site 28 - West-Side Aquifers Treatment System (WATS) Area:* This site consists of groundwater contamination on the east side of the runways, possibly contaminated by a former dry-cleaning facility, former fuel storage and wash rack facilities, and former manufacturing facilities. In 1994, the Navy removed soil contaminants by demolishing a building and removing a tank and sumps. The WATS began operating in 1998. The most recent five-year review concluded that response actions at the site are in accordance with the remedy selected by EPA and that the remedy continues to be protective of human health and the environment in the short term. Continued protectiveness of the remedy requires			

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
incorporating results of the vapor intrusion pathway study into site construction permit requirements, continuation of the pilot test and evaluation of need for institutional controls. The long-term remedy included a groundwater extraction and treatment system. This site is part of the Middlefield/Ellis/Whisman (MEW) Study Area. The MEW Study Area Record of Decision addresses this area. The remedy included in-place vapor extraction and treatment to treat contaminated soils, extraction and treatment to treat contaminated groundwater, identification and sealing of potentially contaminated wells, maintaining inward and upward hydraulic gradients through pumping and treatment inside slurry walls, and regular monitoring of the slurry wall system. *Site 29 - Hangar 1:* The Navy constructed Hangar 1 in 1932 to house the giant airship U.S.S. Macon. Building materials at the hangar are contaminated with PCBs, asbestos, lead and zinc. The Navy recommended removing the siding and coating the structural steel frame of Hangar 1 in 2007. The Navy signed an action memorandum confirming the action in 2009. The Navy completed removal of the siding and coated the structural steel frame in 2012. In 2015, NASA assumed responsibility for long-term monitoring and maintenance of Hangar 1. NASA has evaluated options for removing the coating and contaminated paints on the steel frame and is planning to proceed with this work. *Area of Investigation (AOI) 14 - Former Soil Fill Area:* The interim remedy consisted of the construction of silt fencing around the perimeter of the 8-acre area to prevent the erosion of contaminated soils into nearby Site 25. The final remedy requires the excavation and disposal of contaminated soils. Construction of the silt fencing around the site was completed in 2014. The excavation and disposal of contaminated soils and removal of the silt fence was completed in 2019. Also according to the Per- and Polyfluoroalkyl Substances Site Inspection Report for Ames Research Center prepared by Tetra Tech, Inc dated August 2022, the Subject Property is not located within an Area of Potential Concern (AOPC) associated with the Moffett Field Naval Air Station. The closest AOPC is AOPC 15 – West Side Aquifers Treatment System (IR-28) which is approximately 2,000-feet to the northeast beyond the highway. Given the impacts from this facility do not appear beyond the Adjoining highway, the facility is not considered a REC to the Subject Property.			
Teledyne Semiconductor 1300 Terra Bella Avenue Mountain View, CA 94043	NPL; SEMS; CORRACTS; RCRA-TSDF; US ENG CONTROLS; US INST CONTROLS; RCRA NonGen/NLR; ROD; FINDS	Approximately 2,745 feet to the west-northwest	No
The facility is listed as a United States Environmental Protection Agency (USEPA) Superfund Site. Teledyne Semiconductor manufactured semiconductors on a 1-acre site. Soil and groundwater at the facility were contaminated with solvents including trichloroethylene (TCE) and impacted groundwater migrated off-site to the north and impacted approximately 50 private domestic wells. According to the Fifth Five-Year Review Report dated September 4, 2019, the groundwater plume does not extend beyond North			

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Shoreline Boulevard which is located over 2,000-feet to the west of the Subject Property. Given the distance to the Subject Property, this facility is not considered a REC.			
Spectra-Physics, Inc. 1250 West Middlefield Road Mountain View, CA 94042	NPL; SEMS; CORRACTS; RCRA-SQG; US ENG CONTROLS; US INST CONTROLS; ROD; NY MANIFEST	Approximately 2,173 feet west	No
The facility is listed as a USEPA Superfund Site. This facility manufactured electronic equipment and gas lasers since 1961 on a 11.5-acre facility. The facility used various cleansers, degreasers, and lubricants in this manufacturing processes including isopropyl alcohol, acetone, methyl alcohol, TCE, Freon, and 1,1,1-trichloroethane. Groundwater investigations at the facility began in 1984 and indicated upgradient sources (Teledyne) had created a comingled groundwater plume which has migrated off-site; however the plume is located west of North Shoreline Boulevard. Given the distance to the Subject Property, this facility is not considered a REC.			
Snow Development, Inc 958 San Leandro Avenue, #100 37.40755/-122.07044 Mountain View, CA	PFAS ECHO	Approximately 102 to the northeast	No
The facility is listed as a computer/electronics product manufacturing with no additional information provided. Given there is no evidence of a release, and the facility is not adjoining, this listing is not considered a REC.			
Jeda Publications 909 San Rafael Avenue Unit A Mountain View, CA 94043	CA CUPA Listings; RCRA-SQG; FINDS; ECHO; CA EMI; CA HAZNET; CA HWTS	Approximately 102 to the northeast	No
The facility is listed as a small quantity generator of hazardous waste including metal sludge and photochemical/photoprocessing waste with no reported violations or releases. Given there is no evidence of a release, and the facility is not Adjoining, this listing is not considered a REC.			
El Camino Paving 924 San Rafael Avenue Mountain View, CA 94043	CA CUPA Listings; CA HAZNET; CA HWTS; CA AST; CA LUST; CA HIST LUST; CA Cortese; CA HIST CORTESE; CA CERS	Approximately 422 to the northeast	No
The facility received closure on March 14, 2001, from the Santa Clara County Department of Environmental Health for a release of diesel fuel to groundwater. According to the closure letter, the extent of dissolved			

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
contamination appeared to be localized in the area Adjoining to the former tank pit and was naturally attenuating. Given the regulatory status and the facility is not Adjoining to the Subject Property, the El Camino Paving is not considered a REC to the Subject Property.			

The remaining listings in the database search report, including listings of Orphan Sites, provided in Appendix D do not constitute a potential REC for the Subject Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Subject Property use and/or indications of RECs in connection with the Subject Property:

4.3.1 California Geologic Energy Management (CalGEM)

Agency Name Contact Information	Finding
California Geologic Energy Management (CalGEM) Division 5816 Corporate Avenue, Suite 200 Cypress, CA 90630 Online database: https://maps.conservation.ca.gov/doggr/wellfinder Date of contact: February 6, 2023	According to the Well Finder map located on the CalGEM website, there are no oil wells within a one-mile radius of the Subject Property.

4.3.2 United States Environmental Protection Agency – Region 9

Agency Name Contact Information	Finding
United States Environmental Protection Agency (USEPA) Region 9 Online database: https://www.epa.gov/superfund/search-superfund-sites-where-you-live Date of contact: February 6, 2023	No records were listed for the Subject Property addresses or Adjoining properties.

4.3.3 Santa Clara County Department of Environmental Health (SCCDEH)

Agency Name, Contact Information	Findings
Santa Clara County Department of Environmental Health (SCCDEH) 1555 Berger Drive Building 2, 3rd Floor, Suite 300 San Jose, CA 95112 Phone: (408) 918-3400 Date of contact: February 6, 2023	The SCCDEH provided records for the Subject Property that included California Environmental Reporting System (CERS) information, notices of inspection, and City of Mountain View Fire Department Environmental Compliance Plans for Reservoir Engineering Research Institute. These records are the same as ones provided by the City of Mountain View Fire Departed discussed in Section 4.3.7.

4.3.4 Local Building and/or Planning Department Records

Agency Name, Contact Information	Findings
City of Mountain View Development Department 500 Castro Street, Mountain View, CA 94041 Phone: (650) 903-6313	The City of Mountain View Development Department provided available records for the Subject Property addresses on February 1, 2023. Records available included building permits for plumbing, fire sprinklers, HVAC, fencing, and tenant improvements. No records of environmental significance were observed. Copies of the available records are included in Appendix F.

4.3.5 Department of Toxic Substances Control (DTSC)

Agency Name Contact Information	Finding
Department of Toxic Substances Control (DTSC) 700 Heinz Avenue, Suite 200 Berkeley, CA 94710 Online Database: https://www.envirostor.dtsc.ca.gov/public/ Date of contact: February 6, 2023	Stantec researched the online database Envirostor managed by this agency (envirostor.dtsc.ca.gov). No records were found on the database website for the Subject Property addresses or Adjoining properties. Additionally, according to a letter dated February 3, 2023, from Rose Ann Reeser, Regional Records Coordinator at the DTSC, there are no records for the Subject Property addresses or Adjoining properties.

4.3.6 California Regional Water Quality Control Board (CRWQCB)

Agency Name, Contact Information	Findings
California State Water Resources Control Board, San Francisco (RWQCB) 1515 Clay Street, Suite 1400 Oakland, CA 94612 Phone: (510) 622-2300 Online Database: https://geotracker.waterboards.ca.gov/ Date of contact: February 6, 2023	Stantec researched the online database Geotracker managed by this agency (https://geotracker.waterboards.ca.gov/). No records were found on the database website for the Subject Property addresses. El Camino Paving (924 San Rafael Avenue) was identified Adjoining to the west and received closure on March 14, 2001, from the Santa Clara County Department of Environmental Health for a release of diesel fuel to groundwater. According to the closure letter, the extent of dissolved contamination appeared to be localized in the area adjoining to the former tank pit and was naturally attenuating. Given the regulatory status and the facility is not Adjoining to the Subject Property, the El Camino Paving is not considered a REC to the Subject Property.

4.3.7 Fire Department

Agency Name Contact Information	Finding
City of Mountain View Fire Department 500 Castro Street, 4th Floor Mountain View, CA 94041 Phone: (650) 903-6378	The City of Mountain View Fire Department provided available records for the Subject Property address in an email dated February 1, 2023. Records included: Hazardous Materials Facility Closure letter dated July 7, 1997, and a Hazardous Material Storage Permit dated May 7, 1997for Barclay Mapworks Inc/Aqua Velop Inc stating small amounts of combustible liquids, corrosive liquids, flammable liquids, and miscellaneous hazardous material liquids (less than 50-gallons) were stored and used on-site. Closure Application for Aboveground Hazardous Materials Storage Facilities dated October 20, 2022, for Finity Laboratories which stated small quantities of hazardous materials including combustible liquids, corrosive solids and liquids, flammable liquids, nonflammable gas, oxidizer gas, and miscellaneous hazardous material solids and liquids (less than 20-gallons) were stored and used on-site. No violations were noted in the Hazardous Materials Notice of Inspection forms from 11/29/2021 – 1/3/2018. A minor violation was issued in July 2015 for fire code violation due to distance to electrical service equipment and general housekeeping. Hazardous Materials Storage Permit for Four Seasons Roofing dated April 28, 1989, for maximum of 55-gallons of engine oil and 5-gallons of gasoline. Hazardous Material Notice of Inspection forms were issued for Reservoir Engineering Research Institute between 8/25/22 and 8/30/2012. No evidence of a release was observed in these inspection forms. Hazardous Materials and Waste Storage Permits dated between April 5, 2022, and July 18, 2011, which stated small quantities of hazardous materials including combustible liquids, corrosive solids and liquids, flammable liquids, nonflammable gas, oxidizer gas, poisonous material liquid, and miscellaneous hazardous material solids and liquids (less than 25-gallons) were stored and used on-site. Environmental Compliance Plan for Marshall's Flavor House dated April 21, 1997. Hazardous Materials Facility Closure for Art Matters dated July 25, 2000. According to the Environmental Compliance Plan, Art Matters had small amount of paint related chemicals on site stored in pails and bottles. The copies of the records available are provided in Appendix F.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

No environmental liens and/or activity and use limitations were identified in the Preliminary Title Report prepared by First American Title Company dated December 23, 2021, for APN 153-18-026. No other land title records, deeds, environmental liens, and activity and use limitation documentation were provided by the User, and public records were not searched by Stantec.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by Environmental Data Resources, Inc. (EDR). The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs. Copies of the historical aerial photographs are included in Appendix E.

Year	Scale	Observations of Subject Property and Adjacent/Adjoining/Nearby Properties
1939 1943 1948 1950 1956	1=500'	The northwestern portion of the Subject Property and adjoining land to the north and west appear to be utilized for agricultural purposes (i.e. orchards). Residential structures appear in the eastern portion of the Subject Property. Roadways appears to the east and south beyond which are small structures and agricultural land. A creek appears approximately 500 feet to the east. A highway appears approximately 700 feet to the north.
1963	1=500'	The Subject Property and adjoining land to the north and east appear similar to the previous photographs. Small structures and vacant land appear to the west. A new residential community appears to the south. The highway to the north appears to have been expanded.
1968 1974	1=500'	The Subject Property and surrounding area appear similar to the previous photographs. A commercial building appears adjacent to the west. A storage yard appears to the north. A major roadway appears to the east. Additional commercial development appears approximately 200 feet to the north.
1982 1991 1998 2006 2009 2012 2016 2020	1=500'	The southern portion of the Subject Property is developed with a commercial structure and asphalt parking lot. Residential structures appear in the northeastern portion and vacant land appears in the northwestern portion of the Subject Property. Additional commercial development appears to the north, northwest, and west.

Name of aerial photograph source: EDR, 2023

Stantec's interpretation of historical aerial photos indicate the northwestern portion of the Subject Property and surrounding area to the north were used for agricultural land until circa 1970 1966 (i.e., orchards). Historic agricultural use can be a potential concern due to the possible use of pesticides and herbicides containing heavy metals. Therefore, Stantec recommends collecting shallow soil samples to evaluate for potential residual organochlorine pesticides and arsenic/lead concentration that may exists at concentrations of concern to development.

4.4.3 City Directories

Stantec retained a third party to research available city directories for the Subject Property, adjacent properties, and nearby properties, in approximately five-year intervals. Copies of the city directory listings are included in Appendix E.

The following is a summary of Stantec's review of the city directory listings:

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Subject Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Subject Property and Adjoining and nearby property uses.

Stantec requested fire insurance maps from EDR; however, no coverage exists for the Subject Property. The Sanborn® Map Search Report indicating “no coverage” is presented in Appendix E.

4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-minute Topographic Maps of the Mountain View, California Quadrangle (scale 1:24,000) to help identify past Subject Property and Adjacent, adjoining and nearby property usage and areas of potential environmental concern. Copies of the historical maps are provided in Appendix E.

The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations of Subject Property and Adjacent/Adjoining/Nearby Properties
1897 1899 1902	1=62,500 1=125,000	No site details are depicted on the Subject Property. A creek appears adjacent to the east.
1943 1947 1948 1953	1=62,500 1=50,000 1=24,000	Small structures appear on the eastern portion of the Subject Property. Roadways appears adjacent to the east and south. A highway appears to the north. Additional small structures appear in the surrounding area. The Moffett Field Naval Air Station appears approximately ½ mile to the northeast.
1961	1=24,000	Small structures remain in the eastern portion of the Subject Property. Orchards appear adjacent to the north.
1968 1973 1981	1=24,000	The Subject Property and adjoining land are depicted as an urban area with no site details. A major roadway appears adjacent to the east.
1995 1997 2012 2015 2018	1=24,000	No site details are depicted. Roadways appear in their current configuration.

Name of maps and source: EDR, 2023

No RECs were noted during the review of the topographic maps.

4.4.6 Other Historical Sources

No other historical sources were researched.

5.0 SITE RECONNAISSANCE

A visit to the Subject Property and its vicinity was conducted by Tristan Rhodes, Senior Geologist with Stantec, on February 8, 2023. Access to the Subject Property was provided by the Property Owner Broker (Tom). Stantec was accompanied by the Broker during the Subject Property visit. Figure 2 provides information about the Subject Property and adjoining sites and the location of potential areas of environmental concern. Detailed Subject Property features are provided on Figure 2. Photographs collected during the site reconnaissance are included in Appendix A.

5.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Subject Property that may indicate the presence of RECs. The reconnaissance of the Property was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Subject Property boundary
- Traverse transects across the Subject Property
- Traverse the periphery of all structures on the Subject Property
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces

Weather conditions during the visit to the Subject Property were clear and sunny. There were no weather-related Subject Property access restrictions encountered during the reconnaissance visit. No access was provided to Suite K of the commercial building on the Subject Property. Stantec was able to view the interior of the Suite from the windows however the ground surface of the Suite was not visible.

5.2 GENERAL DESCRIPTION

Subject Property and Area Description:	The Subject Property is located west of San Leandro Street, in the City of Mountain View, County of Santa Clara, California in a mixed-use area with residential and commercial properties.
Subject Property Operations:	Commercial and residential. Tenants of the commercial structure include: Suite A – Minute Man Press (print design studio); Suite B – Storage Overflow for Unit G Examinart; Suites C/D/E – Vacant; Suite F – Pegasus Products (t-shirt embroidery); Suite G – Examinart (cultural heritage research instrumentation); Suite H - Reservoir Engineering Research Institute; Suite I/K – No Access; Suite O – Western States Cabinetry (showroom); and Suite M – EOSDX (cancer research).

Structures, Roads, Other Improvements:	The southern portion of the Subject Property is developed with a single-story multi-tenant commercial building and asphalt parking lot. Two residentials structures appear in the northeastern portion of the Subject Property. Vacant land appears in the northwestern portion.
Subject Property Size (acres):	Approximately 1.7 acres
Estimated % of Subject Property Covered by Buildings and/or Pavement:	70%
Observed Current Subject Property Use/Operations:	Commercial and residential.
Observed Evidence of Past Subject Property Use(s):	Suite C was formerly occupied by YM Design Studio and Suite D was formerly occupied by Finity Labs.
Sewage Disposal Method (and age):	City of Mountain View.
Potable Water Source:	City of Mountain View.
Electric and Natural Gas Utilities:	Pacific Gas and Electric

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Subject Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14) with identified uses:	Small amounts of hazardous materials including combustible liquids, corrosive solids and liquids, flammable liquids, nonflammable gas, oxidizer gas, and solvents were observed in Suite H associated with laboratory use. According to the tenant, the hazardous substances are used for laboratory purposes and are disposed of off-site. Small amounts of alcohol and buffer solutions were observed in Suite M associated with laboratory use.
Drums/Totes/Intermediate Bulk Containers (≥ 5 gallons):	Multiple white plastic 55-gallon drums and plastic totes (labeled medium/large frocks) were observed in Suite K from the exterior window.
Strong, Pungent, or Noxious Odors:	Strong petroleum odors were observed in Suite H due to current laboratory procedures. Given there are no reported violations or evidence of a release the odors are not considered a REC.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.

Observations	Description/Location
Polychlorinated biphenyl (PCB)-Containing Equipment:	None observed
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed

5.4 INTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of the building interiors at the Subject Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
Heating/Cooling Method:	Roof mounted HVAC on commercial building.
Surface Stains or Corrosion:	Minor staining was observed on countertops and floors adjacent to work surfaces in Suite H associated with lab uses. No floor drains or sumps in the area of chemical use were observed.
Floor Drains and Sumps:	None observed.
Other Interior Observations:	None observed.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of exterior areas of the Subject Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-site Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	None observed.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	No surface staining or other indications of release of hazardous substances or petroleum products were observed in the waste collection area.
Solid Waste Disposal:	Dumpsters and recycling cans were observed in a fenced in area at the northwest corner of the Subject Property
Potential Areas of Fill Placement:	No mounds, piles, or depressions suggesting the placement of fill material were observed on the Subject Property.
Wastewater:	No exterior wastewater discharge was observed.]

Observations	Description
Stormwater:	No potential off-site sources of contamination flowing onto Subject Property via stormwater.
Wells:	No wells were observed.]
Septic Systems:	No visible evidence of the existence of a septic system was observed.
Other Exterior Observations:	None.

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA.
Other Underground Structures:	None observed.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of ASTs, was discovered during the site reconnaissance.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Subject Property and/or from public rights-of-way, Stantec made the following observations about use and activities on Adjoining sites:

NORTH	Commercial buildings.
EAST	San Leandro Street, beyond which is a retaining wall and Highway 85,
SOUTH	Residential.
WEST	Commercial buildings.

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of Adjoining sites providing indications of past use and activities, if any, are described below.

NORTH	None observed
EAST	None observed
SOUTH	None observed
WEST	None observed

5.8.3 Pits, Ponds, or Lagoons on Adjoining Properties

As viewed from the Subject Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds, and lagoons on Adjoining sites:

NORTH	None observed
EAST	None observed
SOUTH	None observed
WEST	None observed

5.9 OBSERVED PHYSICAL SETTING

Topography of the Subject Property and Surrounding Area:	The Subject Property and surrounding area appear to be relatively flat.

6.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

6.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and an inspection was evaluated to determine if RECs are present in connection with the Subject Property. Based on this information, Stantec made the following findings and developed the following opinions.

- Stantec's interpretation of historical aerial photos indicate the northwestern portion of the Subject Property and surrounding area to the north were used for agricultural land until circa 1970 (i.e., orchards). Historic agricultural use can be a potential concern due to the possible use of pesticides and herbicides containing heavy metals.

  Therefore, Stantec recommends collecting shallow soil samples to evaluate for potential residual organochlorine pesticides and arsenic/lead concentration that may exists at concentrations of concern to development.

- An environmental records search was performed and identified sites within their respective ASTM E1527-21 search radii of the Subject Property that may represent RECs, CRECs, HRECs, or *de minimis* conditions.

  Based on one or more of the following reasons: distance from the Subject Property, position of sites with respect to assumed groundwater flow direction, the type of native soils, and regulatory status, none of the sites identified in the environmental records search report are expected to impact soil or groundwater quality at the Subject Property. The environmental records search identified no RECs, CRECs, HRECs or *de minimis* conditions at or near the Subject Property.

- During the site reconnaissance, Stantec tenants observed in the commercial structure included Suite A – Minute Man Press (design studio); Suite B – Storage Overflow for Unit G Art Studio; Suites C/D/E – Vacant; Suite F – Pegasus (t-shirt embroidery); Suite G – Art Studio; Suite H - Reservoir Engineering Research Institute; Suite I/K – No Access; Suite O – West States Cabinetry (showroom); and Suite M – EOSDX (cancer research). Stantec observed small quantities of hazardous materials including combustible liquids, corrosive solids and liquids, flammable liquids, nonflammable gas, oxidizer gas, solvents, and miscellaneous hazardous material solids and liquids (less than 25-gallons) stored and used on-site in association with laboratory use in Suites H and M. No drains were observed in the laboratory/chemical storage areas and there were no sumps, clarifiers, or in-ground structures on the Subject Property

  Given there are no underground features, no violations, and there are no evidence of a release, the small amounts of hazardous materials/chemicals used on the Subject Property are not considered a REC for the Subject Property.

6.2 DATA GAPS

The federal AAI final rule [40 CFR 312.10(a)], ASTM E1527-13, and ASTM E1527-21 identify a "data gap" as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the EP or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 1.4:	None
Weather-Related Restrictions to Site Reconnaissance:	None
Facility Access Restrictions to Site Reconnaissance:	None
Other Site Reconnaissance Restrictions:	No access was provided to Suite K of the commercial building on the Subject Property. Stantec was able to view the interior of the Suite from the windows however the ground surface of the Suite was not visible.
Data Gaps from Environmental Records Review:	None
Data Gaps from Historical Records Review:	None
Data Gaps from Interviews:	No on-site interview was conducted. Given the historical documents and regulatory records available the lack of an on-site interview is not considered to significantly impact the findings of the report.
Other Data Gaps:	None

6.3 CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 and E1527-13 of 922-944 San Leandro Street, City of Mountain View, County of Santa Clara, California 94043, or the "Subject Property." Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed the following recognized environmental condition (RECs) in connection with the Subject Property:

- **Historical Agricultural Use:** Stantec's interpretation of historical aerial photographs indicate the northwestern portion of the Subject Property and surrounding area to the north were used for agricultural land until circa 1970 (*i.e.*, orchards). Historical agricultural use can be a potential concern due to the possible use of pesticides and herbicides containing heavy metals. Therefore,

Stantec recommends collecting shallow soil samples to evaluate for potential residual organochlorine pesticide concentrations and arsenic/lead concentrations that may be present at concentrations of concern to redevelopment for residential purposes.

Stantec also identified the following non-ASTM issues associated with the Subject Property:

- **Potential Asbestos and Lead-Based Paint.** Given the age of the existing building on the Subject Property (pre-1938 and circa 1980s), the presence of asbestos containing materials (ACMs) and lead-based paint (LBP) is considered possible. Stantec recommends conducting a comprehensive, pre-demolition ACM and LBP survey prior to any activities with the potential to disturb building materials.

7.0 NON-SCOPE CONSIDERATIONS

The following ASTM E1527-21 Non-Scope Considerations were performed as part of this Phase I ESA:

7.1 LEAD-BASED PAINT

Concern for lead-based paint (LBP) is primarily related to residential structures. The EPA's Final Rule on Disclosure of Lead-Based Paint in Housing (40 CFR Part 745) defines LBP as paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight.

The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

The age of the dwelling as follows: maximum risk is from paint applied before 1950.

There is severe risk from paint applied before 1960.

There is moderate risk from deteriorated paint applied before 1970.

There is slight risk from the paint that is intact but applied before 1977.

The condition of the painted surfaces.

The presence of children and certain types of households in the building.

Previously reported cases of lead poisoning in the building or area.

Given the age of the existing buildings on the Subject Property (pre-1938 and circa 1980s), the presence of lead-based paint (LBP) is considered possible. Stantec recommends conducting a comprehensive, pre-demolition LBP survey prior to any activities with the potential to disturb building materials.

7.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is ACM that can be reduced to powder by hand pressure. Friable asbestos can become airborne and inhaled, which has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

Stantec makes no warranty as to the possible existence or absence of inaccessible materials or to their evaluation with respect to asbestos content. Samples of suspect ACM should be collected for laboratory analysis of asbestos prior to any renovation or building demolition to be compliant with, EPA National Emission Standard for Hazardous Air Pollutants (NESHAP) regulations.

The residential buildings in the northeastern portion appear to have been developed prior to 1939 and the commercial building in the southern portion appears to have been constructed in circa 1980. Given the dates of construction the presence of ACMs is considered possible. Stantec recommends conducting a comprehensive, pre-demolition ACM survey in accordance with the sampling protocol of the Asbestos Hazard Emergency Response Act (AHERA) prior to any activities with the potential to disturb building materials to determine whether ACM are present. Further, in the event ACM is detected, Stantec recommends proper removal and disposal of the materials identified prior to any activities with the potential to disturb them.

7.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA on average indoor radon concentrations in the vicinity of the Subject Property (Subject Property://www.epa.gov/radon/zonemap.html).

EPA Radon Zones (w/Average Measured Indoor Radon concentrations)		
Zone 1 – High (>4.0 pCi/L)	Zone 2 – Moderate (2 to 4 pCi/L)	Zone 3 – Low (<2 pCi/L)
	X	
Normally-occupied sub grade areas present? (i.e., basement apartments, offices, stores, etc.)		
Subgrade areas housing process equipment are located at the Subject Property but are generally not occupied by personnel.		

The Subject Property is located in Zone 2 and is considered to have moderate potential for radon. One of the 22 tests completed from zip code 94043 (the zip code of the Property) was above 4 pCi/L. To determine Property-specific radon levels, a radon survey would have to be conducted. However, based on the average first floor reading of 2.2 pCi/L for Santa Clara County, radon appears unlikely to represent an environmental concern to the Subject Property and Stantec recommends no further investigation regarding this issue.

7.4 FLOOD ZONES

According to the Physical Setting summary portion of the EDR report, the Subject Property is not located within a 500-year or 100-year flood plain.

STANTEC RESUMES

Alicia Jansen CAC, LRCIA

Senior Scientist
21 years of experience

Alicia is a Senior Scientist with over twenty years of experience in Phase I and II Environmental Assessments, with strong emphasis in water quality and environmental research. Alicia has managed the preparation of environmental documents, training programs, and environmental compliance during large scale environmental monitoring projects. Alicia's environmental consulting experience includes performing asbestos and lead-based paint surveys, oversight of contractors during asbestos abatement, hazardous materials surveys, and Phase I Environmental Site Assessments (ESAs) in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-21 and the Standard Practice for Environmental Site Assessments for Forestland or Rural Property, ASTM Designation E 2247-16.

PROJECT EXPERIENCE

HEALTH, SAFETY & INDUSTRIAL HYGIENE

Cochise County, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Arizona | Field Lead and Certified Asbestos Consultant

Alicia conducted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple vacant structures including schools, multi-tenant apartment buildings, and commercial structures. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings. Role: Field Lead | Dates involved: 2020-2022

Confidential Health Care Company, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Northern California | Staff

Alicia assisted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple occupied hospitals and office spaces. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings. Role: Field Lead | Dates involved: 2013-2020

State of California General Services, Asbestos, Lead-Based Paint, and Hazardous Materials Survey | Northern California | 2009 | Technical Support

Alicia assisted with site inspections for asbestos, lead-based paint, and hazardous materials at multiple communication towers in remote areas. The scope of work involved sample collection for asbestos and lead-based paint in addition to the quantification of universal wastes (PCBs, mercury containing equipment, refrigerants, etc.) that would require special handling and disposal. She assisted with the preparation of reports summarizing findings. Role: Technical Support | Cost: Unknown | Dates involved: 10/2009-10/2009

Indoor Air Quality Assessments* | San Jose, California | 2002-2005 | Staff

Alicia performed site inspections, interviews, and collected air samples to be analyzed for various air pollutants and molds including formaldehyde, penicillium, aspergillus, cladosporium, and stachybotry. She prepared reports summarizing findings and made recommendations.

Veteran's Administration of Puget Sound, Asbestos and Lead-Based Paint Survey | Seattle, Washington | 2009 | Project Scientist

Alicia served as the Project Scientist responsible for hazardous building material assessments, specifically asbestos and lead-based paint. These services were required as part of the pre-design tasks for this project. Over 300 samples were collected over the span of four days culminating in a final hazardous building materials report to be incorporated into the facility design as well as demolition activities once the construction phase of the

project commences.

Interim Remedial Action, Indoor Air Sampling, and Sub-Slab Soil Gas Sampling | Sunnyvale, California | 2004–2014 | Task Manager and Field Support

Alicia conducted an indoor air sampling survey using air sampling pumps, dosimeter badges, and flame ionization detector (FID) during a sump excavation. She performs semi-annual sub-slab soil vapor sampling and indoor air quality surveys using summa canisters. She assists with the preparation and submittal of reports summarizing the findings and provides recommendations to the local regulatory agency. Role: Indoor Air Sampling Survey | Cost: Unknown | Dates involved: 09/2004-09/2014

Lead Dust Assessment and Abatement Oversight | Fremont, California | 2009 | Technical Support

Alicia assisted with the evaluation of lead dust in an industrial facility. A total of 307 dust wipe samples were collected in order to evaluate the potential presence of lead dust throughout the two-story, 500,000 square foot manufacturing building. Role: Technical Support | Cost: Unknown | Dates involved: 01/2009-03/2009

Former Tesoro Coke Facility, Asbestos, Lead-Based Paint Survey | Pittsburg, California | Technical Support

Alicia assisted with an asbestos and lead paint survey of 20 structures at the facility ultimately scheduled for demolition. More than 200 samples were collected over the span of two days. She prepared a report for demolition while also providing the information needed for worker safety during demolition activities at the facility. Role: Technical Support | Cost: Unknown | Dates involved: 04/2009-04/2009

State of California General Services, Asbestos and Lead-Based Paint Survey | Southern California | 2014-2019 | Certified Asbestos Consultant

Alicia conducted with site inspections for asbestos and lead-based paint at multiple bridges, maintenance stations, and roadways throughout Southern California. The scope of work involved sample collection for asbestos and lead-based paint that would require special handling and disposal. She assisted with the review and approval of reports summarizing findings. Role: Certified Asbestos Consultant | Cost: Unknown | Dates involved: 9/2014-10/2019

Confidential Client, Asbestos and Lead-Based Paint Survey | Multiple Sites, California | Task Manager and Certified Asbestos Consultant

Alicia conducts pre-demolition asbestos and lead paint surveys of structures ultimately scheduled for demolition. She prepared a report for demolition while also providing the information needed for worker safety during demolition activities at the facility. Role: Task Manager and Certified Asbestos Consultant| Dates involved: 2006 - present

PERMITTING, COMPLIANCE, AUDITING

Tesoro Refinery, Initial Study* | Benicia, California | 2005 | Staff

Alicia assisted with the background research and preparation of applicant-prepared initial study for the upgrade of a refinery.

Transmission Line Upgrade* | San Mateo to San Francisco, California | 2005 | Environmental Research and Compliance Staff

Alicia supported the environmental compliance program for the construction of a 27-mile 230 kV underground and overhead transmission line. She assisted with the preparation and submittal of variance requests, extra work space requests, and daily and weekly reports for submittal to the California Public Utilities Commission. She also conducted research and assisted with training and report preparation.

REMEDIAL INVESTIGATIONS & ASSESSMENTS

California Department of Transportation Portfolio | Multiple Sites, Northern California and Southern California, California | 2008-2019 | Task Lead Manager

Alicia prepared quarterly groundwater monitoring reports, subsurface investigation reports, sensitive receptor surveys, and preferential pathway studies for various California Department of Transportation locations throughout Northern California. She assisted with the utility locating, work plan preparation, field coordination, archived data onto the State Water Resource Control Board's (RWQCB) Geotracker electronic filing system. Alicia currently conducts site inspections for asbestos, lead-based paint, and hazardous materials for bridges, salt barns, and maintenance buildings associated with California Department of Transportation locations throughout Southern California. The scope of work involves sample collection for asbestos and lead-based paint that would require special handling and disposal. She assists with the preparation of reports summarizing findings. Role: Task Lead Manager | Cost: Unknown | Dates involved: 06/2008-02/2019

Soil Gas Sampling and Human Health Risk Assessment | San Jose, California | 2014 | Project Lead

Alicia performed a soil vapor survey in conformance with the DTSC Advisory Active Soil Gas Investigations, using soil vapor sampling devices and a mobile laboratory for onsite chemical analysis. She also assisted with the report preparation summarizing the findings and providing recommendations for further assessment. Role: Task Lead Manager | Cost: Unknown | Dates involved: 2014

Confidential Clients, Phase I Environmental Site Assessments | Multiple Sites, California, Arizona, New Mexico, Texas, Virginia | Task Manager

Alicia performs Phase I Environmental Site Assessments for multiple confidential clients in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13; ASTM E 1527-21; and Standard Practice for Environmental Site Assessments for Forestland or Rural Property, ASTM Designation E 2247-16 to achieve compliance with requirements of the "All Appropriate Inquiries" rule required to obtain protection from liability under the federal Comprehensive Environmental Response, Cleanup and Liability Act (CERCLA). Previous sites include large industrial warehouses, multi-tenant

commercial buildings, large lots of vacant land, and residential properties. She reviews topographic maps, Sanborn Fire Insurance Maps, and files at local regulatory agencies. She interviews present and former property owners and performed site and adjacent property reconnaissance. She prepares reports summarizing the findings and provides recommendations for further assessment if applicable. Role: Task Lead Manager | Cost: $3,000-8,000 per report. | Dates involved: 2006-present

Goodyear Portfolio | California and Hawaii | 2005–2020 | Project Lead

Alicia performed Phase I Environmental Site Assessments (ESA) and Phase II Site Assessments for various Goodyear Tire & Rubber Company locations throughout California and Hawaii. She assisted with the installation of monitoring wells and exploratory borings; underground storage tank removals; site restoration; product removal with passive recovery system; archived data onto the State Water Resource Control Board's Geotracker electronic filing system; and assisted with the preparation of quarterly groundwater monitoring reports, sensitive receptor surveys, site conceptual models, and subsurface investigation reports. Approximately 250 Sites • Cost: $8,000 per site.

James DeWoody Aboveground Tank

Inspector

Principal Scientist
24 years of experience

James is a senior environmental scientist/engineer with more than 10 years of experience in the assessment and remediation of soil, soil vapor, and groundwater projects. He has also been involved in the analysis of data, budget preparation, Federal and state regulatory compliance issues, work plan and report preparation, supervision of several excavations, and numerous remediation system installations.

James' experience designing, permitting, installing, and operating remediation system includes soil vapor extraction designed with carbon vessels, catalytic and thermal oxiders, dual phase extraction utilizing high vacuum liquid-ring pumps and pneumatic pumps, landfill gas collection, ozone and calcium polysulfide injection, and electrical resistance heating. Additionally, he has an educational and professional background working with local Southern California and Federal government agencies' rules and regulations.

EDUCATION

BS, Environmental Science, University of California, Riverside, Riverside, California, 1996

40-Hour Hazardous Waste Health & Safety, OSHA, San Diego, California, 2008

24-Hour First Responder-Operations Level, OSHA, San Diego, California, 2008

Adult/Child/Infant CPR Training, San Diego, California, 2007

Adult/Child/Infant First Aid Training, San Diego, California, 2007

CERTIFICATIONS & TRAINING

Authorized SP001 AST System Inspector, STI SPFA, Lake Zurich,, IL, 2018

PROJECT EXPERIENCE

AIRPORTS & AVIATION

Pattern Drilling Excavation Project

James was responsible for a pattern drilling excavation project at former aerospace facility. The project involved the removal and backfill of nearly 80 5-foot diameter boring to 50 feet below ground surface over a 50 foot by 50 foot grid pattern. All drilling and disposal activities were performed during non-working hours of the present tenant.

ENVIRONMENTAL HEALTH & SAFETY

Anthrax Emergency Response | Washington D.C.

James was a team member for the United States Postal Service at the Brentwood Station in Washington D.C. Duties included sampling and decontamination at numerous postal offices and commercial sites along the East Coast.

ENVIRONMENTAL SITE ASSESSMENTS PHASE I, II, III

Phase I Investigations

James has performed Phase I investigations at potentially hazardous and non-hazardous sites.

ENVIRONMENTAL SITE REMEDIATION

Interstate 10/Tippecanoe Avenue Interchange Improvements | Caltrans | San Bernardino, California, United States | 2011-2014 | TOS/Technical Lead

Jim led soil vapor extraction and remediation efforts to support freeway access realignments and street widening. The project included full and partial takes of numerous commercial and residential properties and required aerially deposited lead surveys; site investigations on five existing and former gasoline service stations; an ISA addendum; remedial feasibility studies; human health risk evaluations; and remedial actions by soil vapor extraction and site closure. Role: TOS/Technical Lead | Dates involved: 2011-2014

Sample Collection

James was responsible for the collection of routine and non-routine samples of contaminated groundwater, surface water, ambient air, and soil vapor and soil. Tasks included sample collection, sample preservation, sample documentation, and sample shipment to the requested analytical laboratory from military and commercial sites.

Several Major Soil Excavation Projects | Ongoing | Project Manager

James oversaw of several major soil excavation projects. Each project involved the removal, characterization, disposal, and/or treatment of more than 1,000 cubic yards of hydrocarbon-bearing soil for remediation of source areas and shallow groundwater contamination. A majority of the sites have been officially closed by the lead regulatory agency. Role: Project Manager | Dates involved: 2008-present

Glendora 4 Redevelopment | Glendora, California, United States | 2014-2016 | Project Manager

Jim led our team as they completed site assessments, investigations, and soil vapor extraction and remediation at a multi-property development project. The site had a long history of manufacturing, dry cleaning, and rail operations. Jim directly managed the soil and vapor extraction activities as well as supported other project activities including initial site assessments, site investigations, groundwater sampling, remediation design and monitoring, and human health risk assessment. Role: Project Manager | Dates involved: 2014-2016

JUSTICE

Government Agency Reports

James interpreted and prepared information for quarterly and annual reports for local and regional government agencies. He was accountable for data entry using current spreadsheets and Oracle database software. Additionally, he was responsible for the collection and processing of groundwater data from held wells.

OIL & GAS

UST Removal and Excavations | Southern California, United States | Ongoing | Project Manager

James managed the removal and excavation of underground storage tanks from various service stations located within San Diego, Orange, San Bernardino, Los Angeles, and Riverside counties. Role: Project Manager | Dates involved: 2008-present

Chevron Operation and Maintenance Activities | Alaska

James was responsible for operation and maintenance activities for former Chevron site located in remote area of Alaska. Remediation systems included oil water separators, bio-venting and soil vapor extraction, and groundwater pump and treat systems.

Crude Oil Pipeline Spill Sampling and Remediation | Los Angeles and El Dorado Counties, California, United States | 2008-2016 | Investigation Coordinator

James investigated the sampling and remediation activities of multiple oil spill response actions. Oil spill responses include crude oil pipeline spill that discharged over 1.3 miles of stream bed and a major portion of drinking reservoirs located in the Los Angeles and El Dorado County. Investigation activities included sampling surface and depth dissect water from the reservoir, sediment collection from the bottom of the reservoir using EPA Blackwater Divers, and safety performing soil sampling from the toe of a recent landslide area. Remediation activities included soil excavation of crude oil impacted soil from the remote areas of the site using helicopters to transport heavy equipment and impacted soil. Additional remediation activities were performed to reduce crude oil concentrations from the sediment in the bottom of the reservoir using air injection. Air injection was performed from a floating barge utilizing a GPS tracking system. Role: Investigation Coordinator | Dates involved: 2008-2016

RETAIL / COMMERCIAL

Dry Cleaner Remediation

James was responsible for the design and installation of several soil vapor extraction systems for the cleanup of tetrachloroethene (PCE) and trichloroethene (TCE)-impacted soil and groundwater at several dry cleaner and commercial sites.

SOLID WASTE

Landfill Gas Migration System Investigation | Garden Grove, California

James investigated an existing landfill gas migration system and provided recommendations for improving the present design at the South Portion of the Longsdon Pit/ Sierra Park and Olinda Alpha Landfills located in Brea and Garden Grove, California.

Landfill Gas Collection Systems | Imperial and San Diego Counties, California

James assisted in the design assessment and sample collection of landfill gas collection systems in Imperial and San Diego County. Responsibilities included analysis of placement and radius of influence data for landfill gas collection wells.

PUBLICATIONS

“Advanced Field Proven Micro-Purge Sampling Techniques” Abstract Accepted to Fifth International Symposium on Environmental Contamination in Central and Eastern Europe, Prague, Czech Republic, 2000.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Kyle has more than 28 years of professional experience—17 of those years with Stantec—providing geotechnical and environmental consulting. During the course of his experience, he has been involved with a wide variety of geological and engineering projects. He has been in direct charge of quality control/quality assurance (QA/QC) work for Stantec and previous firms for geological, engineering geological, and environmental services primarily in California. Additionally, Kyle has been a primary contact for Stantec with many different clients (including multi-party actions) and regulatory bodies involving contracting, workplan approvals, site assessments and closures, permitting, remedial action, and litigation support. With regard to litigation services, Kyle has extensive experience providing expert witness testimony, second-party review, and litigation support and analysis.

Kyle's extensive experience includes assessment and remediation of property-specific and regional issues involving soil and groundwater contaminated with petroleum hydrocarbons, chlorinated solvents, heavy metals, pesticides, and PCBs.

He currently serves as the managing principal geologist in Stantec's Redlands, California office.

EDUCATION

Engineering Geology/Hydrogeology, California State University, Los Angeles, California, 1984

AS, General Science, Crafton Hills College, Yucaipa, California, 1975

BS, Geological Sciences, California State University, Long Beach, California, 1982

REGISTRATIONS

Certified Engineering Geologist #1271, State of California Issued 1985, Expires 2011

Professional Geologist #4066, State of California Issued 1985, Expires 2011

PROJECT EXPERIENCE

Bioremediation

Excavation and Treatment of Petroleum-Contaminated Soil

Kyle designed the excavation and treatment of 45,000 cubic yards of petroleum-contaminated soil. Soil treatment included utilizing vapor extraction, combined with bioremediation.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Chemicals & Polymers

Two Former Chemical Plants, Environmental Site Assessments and Remediation, Vernon, California

Mr. Emerson was part of the team for conducting Phase I and Phase II Environmental Site Assessments (ESA) and developing remedial action plans for two former chemical plant sites with 80-year industrial histories. Phase I ESAs used historical files, maps, aerial photographs, available documents, and data from public agencies and historical directories for identifying recognized environmental concerns. Extensive Phase II ESA survey activities aided in identifying below-grade structures such as vaults/USTs, as well as assessing the extent of influence and nature of the contamination. These investigations confirmed the presence of heavy metals, petroleum hydrocarbons, volatile organic compounds, polychlorinated biphenyls, radioactive materials, semi-volatile organic compounds, and polycyclic aromatic compounds in the soils for these sites. Specific areas of concern included former settling ponds, a bone yard, maintenance areas, transformer and substations, wastewater treatment facilities, and above-ground storage tank farms. A conceptual mode was developed for use in a health risk assessment and developed risk-based corrective actions to address potential health and environmental concerns. He assisted with the development and implementation of a remedial action plan, combined administrative controls, engineering controls, and active remediation; this resulted in the cost-effective return of one site to active use, and is reducing health risks to occupants and the public at the second site.

CONFIDENTIAL: Aerospace Adhesives and Coatings Plant, Glendale, California

Mr. Emerson was part of the team that conducted feasibility studies to evaluate remedial alternatives for remediation of chlorinated VOCs, 1,4 dioxane, and hexavalent chromium (CrVI) in soil, soil vapor, and groundwater. Feasibility studies included groundwater pump testing, benchscale column testing to evaluate in situ alternatives for reducing CrVI to the less mobile CrIII valence state, soil vapor extraction, capping, and excavation. Field pilot studies were performed to evaluate the efficiency of various CrVI reductants including the use of ferrous sulfate, calcium polysulfide, emulsified oil, and fructose. Extensive multi-depth soil vapor testing was conducted to evaluate the distribution of VOCs in the subsurface and to support vapor intrusion risk assessment. Feasibility studies were completed in 2008. Remedial actions are expected to be completed in 2011.

Condition Assessments

Assessment and Mitigation of Manufacturing Facility

Kyle managed the assessment and mitigation of an ammunition manufacturing facility covering 1,100 acres in a complex geologic environment. The contaminates involved red and white phosphorous, TNT, chlorinated solvents, solid wastes, and live ordinance.

Soil Contamination Assessment Supervision and Management

Kyle managed and supervised soil contamination assessment and in-situ remediation of heavy metals involving chromium, cadmium, nickel and zinc by chemical fixation to depths in excess of 40 feet below ground surface beneath existing structures within several manufacturing facilities.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Litigation Support and Expert Testimony
Kyle provided litigation support and expert testimony on more than 20 separate projects involving service stations, chlorinated solvent cases, heavy metal, and semi-volatile releases.

Corporate / Office
Commercial Developer - Environmental Remediation of Former Dry Cleaners, El Centro, California
Mr. Emerson was responsible for assessments and remediation at this former dry cleaners which released the dry cleaning chemical tetrachloroethene (PCE) to the ground and underlying groundwater. The work included initial site assessment, agency interaction and negotiations with the California Regional Water Quality Control Board (CRWQCB), and Colorado Basin Region human health risk assessment (HHRA), design and implementation of remedial investigations, feasibility studies, remedial action plans, and implementation of remediation in mitigating chlorinated solvent contamination in vadose and saturated zones at concentrations indicative of DNAPL. The results of the completed remediation, as well as continued confirmation sampling and monitoring, allowed the CRWQCB to issue site closure in 2008. The site has since been redeveloped into a new commercial development.

Environmental Assessments
Siting Studies
Kyle performed initial siting studies for potential Class I, II, and III landfills. The project included detailed geologic mapping, hydrogeological studies, and permeability studies of caps and liners.

Environmental Site Remediation
Assessment and Remedial Design, California (Project Supervisor)
Kyle supervised the assessment and remedial design of a system to eliminate salt brine contamination in shallow perched water horizons in the Yucaipa, San Bernardino, and Riverside areas of southern California.

Design and Installation of Recovery Systems*
Kyle designed and installed numerous free-product recovery systems that successfully recovered product. One of the sites contained product up to 11-feet thick covering more than three city blocks. The dissolved phase had affected a multi-aquifer system and a public drinking water system.

Geophysical Characterizations*
Kyle performed and supervised numerous geophysical characterizations to determine the extent of old landfills. He provided classification studies, landfill gas monitoring, removal verification during grading, methane collection and mitigation plans, permitting, and closure plans.

Domestic Landfill Development*
Kyle designed and supervised the dynamic consolidation of a domestic landfill for development. He used this process to minimize expected settlement to overlying structures. Kyle designed commercial developments on closed landfills that involved complex methane collection and monitoring systems and building settlement controls.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Clay Borrow Site Studies

Kyle performed more than 10 separate clay borrow site studies for determining sources of material to cap landfills; ranged from a 20-acre dry lakebed to a 450-acre parcel in complex folded marine sediments.

Assessment, Clean Up, and Regulatory Support Management, Santa, Monica (Project Manager)

Kyle managed the assessment, clean up, and complex regulatory support of a PRP site in an MTBE case (Charnock subbasin). His work involved more than 20 environmental professionals working full time for two years to complete the assessment and clean up mandated by the regulatory agencies.

Hazardous Waste

San Gabriel Valley Superfund Site, Remediation & Closure of Multiple Source Areas, Industry, California

Mr. Emerson performed feasibility studies to evaluate appropriate and relevant remedial alternatives to mitigate constituents of concern in five AOCs contaminated with chlorinated hydrocarbons, heavy metals, petroleum fuel, and cutting oils. Ultimately, a combination of remedial alternatives was implemented that included large-diameter auger excavation to 45 feet to minimize impacts on facility operations, vapor extraction, vapor intrusion risk assessment, deed restriction, and monitored natural attenuation. At the completion of remedial actions, confirmation soil, soil vapor, and groundwater sampling were conducted and followed with risk assessment to demonstrate that remedial objectives had been achieved. No further action was recently granted by the US EPA and Los Angeles Regional Water Quality Control Board.

Mixed-Use

Port of San Diego Rohr Facility, Chula Vista, California

Mr. Emerson assisted in a detailed subsurface assessment of the Rohr facility. The intent of the assessment was to evaluate the 40-acre former aircraft part manufacturing facility for acquisition by the Port of San Diego for redevelopment into a business park and entertainment complex. The assessment identified the presence of soil, soil vapor, and groundwater impacts by petroleum hydrocarbons, VOCs, heavy metals, PCBs, and semi-volatile organic compounds. He utilized many sampling techniques to assess the limits and concentrations of contaminants in the subsurface. Ultimately, the team was able to develop a cost estimate for potential remedial action cost associated to corrective action to allow redevelopment.

Master Planned Commercial/Residential Redevelopment Project, Whittier, California (Project Manager)

Kyle oversaw the assessment of 26 contiguous properties that are part of a 21-acre master planned commercial/residential redevelopment project. The properties included industrial facilities, platting lines, fuel USTs, and metal processing plants, among others. The estimated cleanup costs are approximately $2 million.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Multi-Unit / Family Residential

Residential Development Assessment, Ventura, California (Project Director)

Kyle directed an assessment of a 40-acre former agricultural property proposed for residential development. Pesticides were identified above hazardous waste levels and preliminary remediation goals established by the U.S. Environmental Protection Agency. Through corrective grading methods and onsite placement of the pesticide impacted soils, all material were re-used on site without offsite disposal. The over all cost savings for the client was more than $1 million. Total cost was less than $250,000 for all necessary activities.

Oil & Gas

Oil Field Site Assessments*

Kyle performed site assessments at oil field leases involving refineries, bulk storage areas, piping systems and wellhead, and drilling mud pit contamination.

Environmental Protection Agency Superfund Action, Culver City, California (Project Manager)

Kyle served as the project manager representing a major oil company in the assessment, remedial action, and litigation support in a multi-party contamination case affecting a City water supply. The assessment involved more than 250 continuous core borings up to 100 feet, as well as extensive remedial actions. The total cost for all related activities was $22 million. The case is settled and the closure of the site is pending.

Project Management

Liability and Property Management Consulting Services

Kyle is providing liability and property management consulting services to more than 10 medium to large property development firms in the US. His work involves property transaction assessments, contract review, acquisition guideline development, liability management evaluation, insurance acquisition, and strategic planning.

Residential Development

Environmental Development Management and Review (Project Manager)

Kyle manages and reviews environmental development issues for a large residential developer specializing in development of contaminated industrial properties by providing innovative solutions in developing contaminated properties for residential use through risk assessment, engineering, and administrative and property development controls.

Site Management and Remediation

Design and Implementation of Biodegradation Programs*, California

Kyle designed and implemented one of the first in-situ biodegradation programs in California; it involved 50,000 cubic yards of diesel-contaminated soils, and groundwater to depths of 70 feet below ground surface.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Soil and Groundwater Remediation Systems

Soil and Groundwater Contamination Assessments and Mitigation*, California (Project Manager)

Kyle managed numerous chlorinated solvent soil and groundwater contamination assessments and mitigation programs in southern California. The projects involved releases that impacted soil and groundwater to depth of groundwater more than 700 feet in multi-aquifer systems. One case involved with plume dimensions more than 1 mile from the source affecting residential properties.

Soil and Groundwater Assessment and Remediation Programs*

Implemented hundreds of soil and groundwater assessment and remediation programs at various service station facilities in Southern and Northern California, and Nevada. Work involved assessment, remedial design, installation, maintenance and monitoring. Closure has been received on a majority of these sites.

Assessment and Remediation Management*

Kyle managed the assessment and remediation of soil and groundwater manufacturing at dry cleaning facilities contaminated with chlorinated solvents.

Warehouse / Light Industrial

Glendale Redevelopment Project, Glendale, California (Project Manager)

Kyle managed the assessment and remedial actions during the redevelopment of and industrial property. The project involved the demolition of a historic manufacturing facility and a commercial dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. Remedial actions involved excavation by pattern drilling and off site disposal along with removal of former USTs. The total cost of remediation and assessment was $450,000.00.

Compton Redevelopment Project, Compton, California (Project Manager)

Kyle is serving as project manager for the assessment and remedial actions for a large redevelopment project. The project involves the redevelopment of a historic manufacturing facility and a former dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. The industrial facility was also associated with significant volumes of buried waste that required removal and disposal. These wastes also included the chemical referenced above, as well as PCBs and heavy metals. Remediation has included excavation, vapor extraction, and chemical fixation. The total cost of this project has been $2.8 million to date.

** denotes projects completed with other firms*

APPENDIX C
USER PROVIDED RECORDS

Stantec

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner, bona fide prospective purchaser,* or *contiguous property owner*, ASTM standard practice E1527-13 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the E nvironmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the E nvironmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec along with the executed Authorization For services form.

1. Property Information

Property Name: Mountain View 3

Property Address(es): 922-944 San Leandro Street

City: [redacted] Mountain View State CA Zip 94043

Property Owner Name: Edith Hugo

Property Owner Phone #: _____

2. Contact For Site Access

Name: David Shelly

Company/Organization/Title: City Ventures/ Land Acquisition Manager

Phone # 949-274-5251 E-Mail Address: dshelly@cityventures.com

3. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

_____ Yes ____x____ No

If yes, describe or attach details of the lien _____

4. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

_____ Yes ____x____ No

If yes, describe or attach details of the limitations _____

5. Specialized Knowledge or Experience. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

_____ Yes _____x_____ No

If yes, describe or attach details of your specialized knowledge or experience _____

_____

6. Relationship of Purchase Price to Fair Market Value of Property. Does the purchase price being paid for the property reasonably reflect the fair market value?

_____x_____ Yes _____ No

_____ Not applicable. User is not involved in a purchase of the property.

If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

_____ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

_____ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

7. Commonly Known or Reasonably Ascertainable Information. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?

_____ Yes (describe) _____

_____

_____

_____x_____ No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?

_____ Yes (describe) _____

_____

_____

_____x_____ No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

_____Yes (describe) _____

_____

_____

__x__No

Do you know of any environmental cleanups that have taken place at the property?

_____Yes (describe) _____

_____

_____

___x__No

8. The Degree of Obviousness of Contamination. E1527-13 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indictors that point to the presence or likely presence of contamination at the property?

_____Yes (describe) _____

_____

_____

___x__No

9. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

_____Yes (describe) _____

_____

_____

___x__No

Signature: _____

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

Please be advised that any provision contained in this document, or in a document that is attached, linked or referenced in this document, that under applicable law illegally discriminates against a class of individuals based

upon personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or any other legally protected class, is illegal and unenforceable by law.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of December 23, 2021 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Extended Loan Policy - 2006

ALTA Extended Owner Policy - 2006

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

MOUNTAIN VIEW INDUSTRIAL ASSOCIATES, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. Intentionally Deleted

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. The terms and provisions contained in the document entitled "Agreement " recorded September 02, 1971 as Document No. 4085841 in Book 9490, Page 360 of Official Records.

4. An easement for public use as a street and public utilities, together with appurtenances and incidental purposes, recorded September 02, 1971 as Document No. 4085845 in Book 9490, Page 386 of Official Records.

   In Favor of: Goodsell & Vocke, Inc., a corporation
   Affects: as described therein

   The terms and provisions contained in the document entitled "A Resolution Ordering a Vacation of a Portion of Street Easement" recorded December 26, 1974 as Document No. 4919367 in Book B223, Page 183 of Official Records.

5. The terms and provisions contained in the document entitled "Agreement for Payment of Utility Service" recorded June 02, 1977 as Document No. 5670975 in Book C883, Page 90 of Official Records.

6. The effect of a map purporting to show the land and other property, filed December 18, 1979 in Book 455, Pages 56 and 57 of Record of Surveys.

7. The effect of a map purporting to show the land and other property, filed March 09, 2016 in Book 890, Pages 47 to 55 of Record of Surveys.

8. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/NSPS survey.

9. Rights of parties in possession.

Prior to the issuance of any policy of title insurance, the Company will require:

10. With respect to Mountain View Industrial Associates, LLC, a California limited liability company:
a. A copy of its operating agreement and any amendments thereto;
b. If it is a California limited liability company, that a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) be recorded in the public records;
c. If it is a foreign limited liability company, that a certified copy of its application for registration (LLC-5) be recorded in the public records;
d. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, that such document or instrument be executed in accordance with one of the following, as appropriate:
(i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such document must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
(ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
e. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require

11. An ALTA/NSPS survey of recent date which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

1. General and special taxes and assessments for the fiscal year 2021-2022.

First Installment:	$10,293.38, PAID
Penalty:	$0.00
Second Installment:	$10,293.38, PAID
Penalty:	$0.00
Tax Rate Area:	05-010
A. P. No.:	153-18-026

2. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Commercial Structure known as 922 San Leandro Avenue, Mountain View, California.

3. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

4. We find no outstanding voluntary liens of record affecting subject property. Disclosure should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any possible security interest in the subject property.

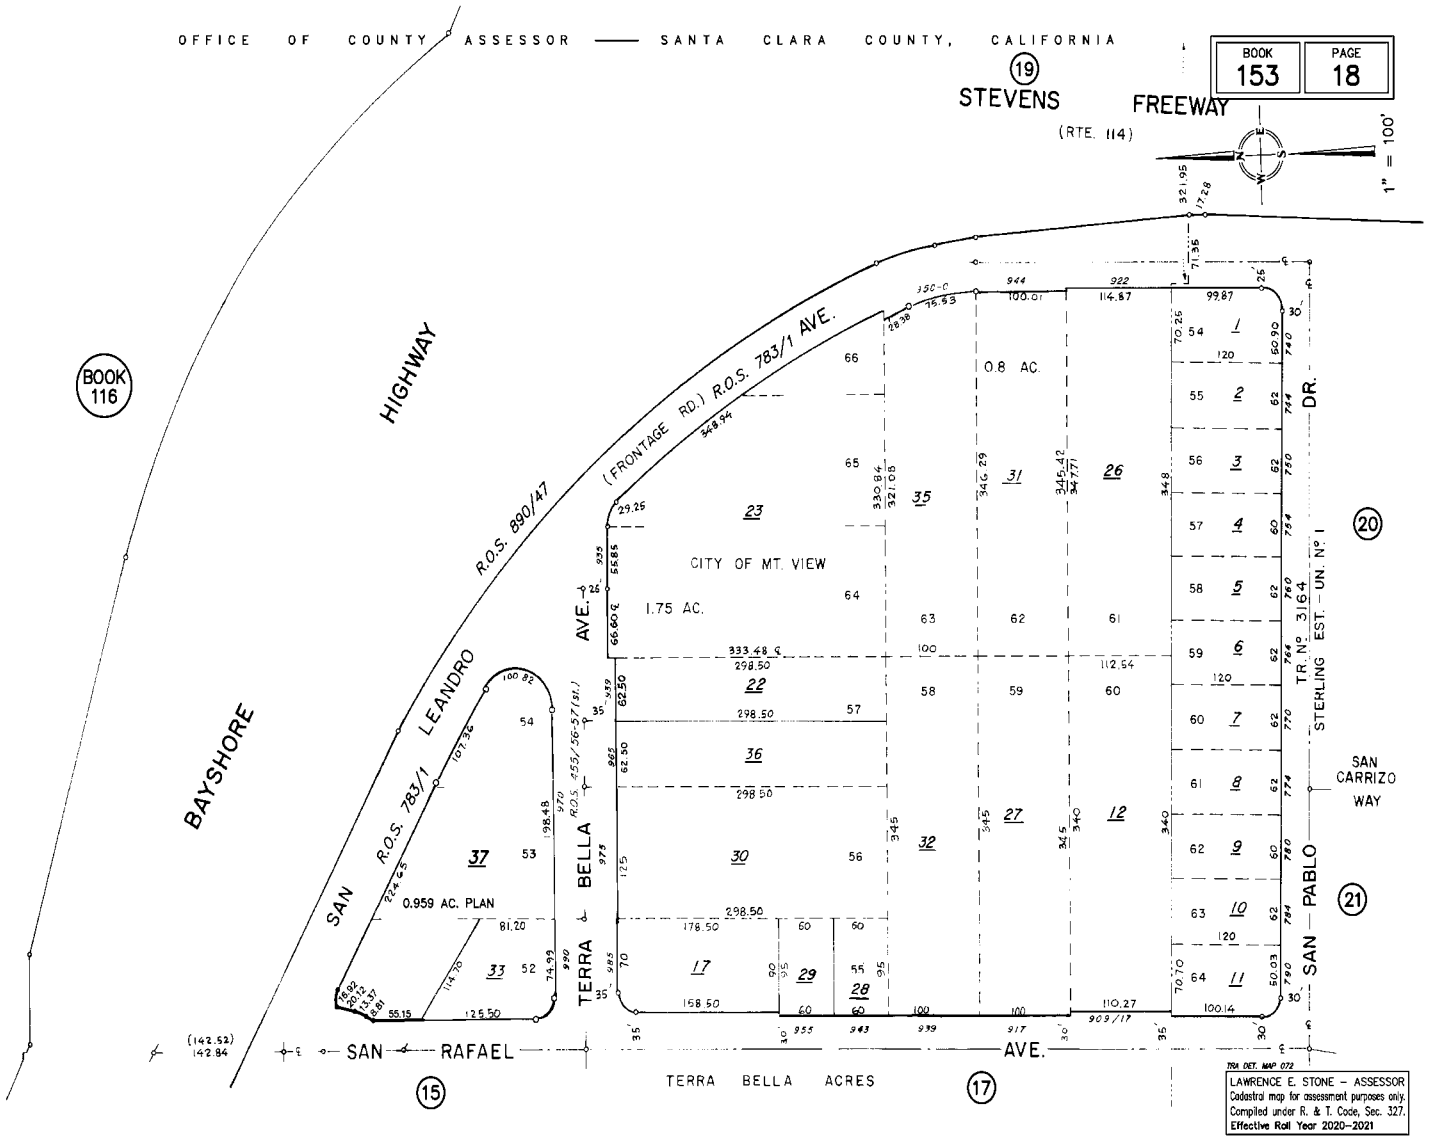

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public, records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the public records at Date of Policy.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;

d. improvements on the Land;
e. land division; and
f. environmental protection.
This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 19:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 21:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$5,000

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

[Except as provided in Schedule B - Part II,[t[or T]his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

[PART I

[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:]

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

(i) the occupancy, use, or enjoyment of the Land;
(ii) the character, dimensions, or location of any improvement erected on the Land;
(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.

4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:
[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.
7. [Variable exceptions such as taxes, easements, CC&R's, etc. shown here.]

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

(i) the occupancy, use, or enjoyment of the Land;
(ii) the character, dimensions, or location of any improvement erected on the Land;
(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the

Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.

7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

Privacy Notice

Effective: October 1, 2019

Notice Last Updated: January 1, 2021

This Privacy Notice describes how First American Financial Corporation and its subsidiaries and affiliates (together referred to as "First American," "we," "us," or "our") collect, use, store, and share your information. This Privacy Notice applies to information we receive from you offline only, as well as from third parties, when you interact with us and/or use and access our services and products ("Products"). For more information about our privacy practices, including our online practices, please visit https://www.firstam.com/privacy-policy/. The practices described in this Privacy Notice are subject to applicable laws in the places in which we operate.

What Type Of Information Do We Collect About You? We collect a variety of categories of information about you. To learn more about the categories of information we collect, please visit https://www.firstam.com/privacy-policy/.

How Do We Collect Your Information? We collect your information: (1) directly from you; (2) automatically when you interact with us; and (3) from third parties, including business parties and affiliates.

How Do We Use Your Information? We may use your information in a variety of ways, including but not limited to providing the services you have requested, fulfilling your transactions, comply with relevant laws and our policies, and handling a claim. To learn more about how we may use your information, please visit https://www.firstam.com/privacy-policy/.

How Do We Share Your Information? We do not sell your personal information. We only share your information, including to subsidiaries, affiliates, and to unaffiliated third parties: (1) with your consent; (2) in a business transfer; (3) to service providers; and (4) for legal process and protection. To learn more about how we share your information, please visit https://www.firstam.com/privacy-policy/.

How Do We Store and Protect Your Information? The security of your information is important to us. That is why we take commercially reasonable steps to make sure your information is protected. We use our best efforts to maintain commercially reasonable technical, organizational, and physical safeguards, consistent with applicable law, to protect your information.

How Long Do We Keep Your Information? We keep your information for as long as necessary in accordance with the purpose for which it was collected, our business needs, and our legal and regulatory obligations.

Your Choices We provide you the ability to exercise certain controls and choices regarding our collection, use, storage, and sharing of your information. You can learn more about your choices by visiting https://www.firstam.com/privacy-policy/.

International Jurisdictions: Our Products are offered in the United States of America (US), and are subject to US federal, state, and local law. If you are accessing the Products from another country, please be advised that you may be transferring your information to us in the US, and you consent to that transfer and use of your information in accordance with this Privacy Notice. You also agree to abide by the applicable laws of applicable US federal, state, and local laws concerning your use of the Products, and your agreements with us.

We may change this Privacy Notice from time to time. Any and all changes to this Privacy Notice will be reflected on this page, and where appropriate provided in person or by another electronic method. YOUR CONTINUED USE, ACCESS, OR INTERACTION WITH OUR PRODUCTS OR YOUR CONTINUED COMMUNICATIONS WITH US AFTER THIS NOTICE HAS BEEN PROVIDED TO YOU WILL REPRESENT THAT YOU HAVE READ AND UNDERSTOOD THIS PRIVACY NOTICE.

First American Title™

For California Residents

If you are a California resident, you may have certain rights under California law, including but not limited to the California Consumer Privacy Act of 2018 ("CCPA"). All phrases used in this section shall have the same meaning as those phrases are used under California law, including the CCPA.

Right to Know. You have a right to request that we disclose the following information to you: (1) the categories of personal information we have collected about or from you; (2) the categories of sources from which the personal information was collected; (3) the business or commercial purpose for such collection and/or disclosure; (4) the categories of third parties with whom we have shared your personal information; and (5) the specific pieces of your personal information we have collected. To submit a verified request for this information, go to our online privacy policy at www.firstam.com/privacy-policy to submit your request or call toll-free at 1-866-718-0097. You may also designate an authorized agent to submit a request on your behalf by going to our online privacy policy at www.firstam.com/privacy-policy to submit your request or by calling toll-free at 1-866-718-0097.

Right of Deletion. You also have a right to request that we delete the personal information we have collected from and about you. This right is subject to certain exceptions available under the CCPA and other applicable law. To submit a verified request for deletion, go to our online privacy policy at www.firstam.com/privacy-policy to submit your request or call toll-free at 1-866-718-0097. You may also designate an authorized agent to submit a request on your behalf by going to our online privacy policy at www.firstam.com/privacy-policy to submit your request or by calling toll-free at 1-866-718-0097.

Verification Process. For either a request to know or delete, we will verify your identity before responding to your request. To verify your identity, we will generally match the identifying information provided in your request with the information we have on file about you. Depending on the sensitivity of the information requested, we may also utilize more stringent verification methods to verify your identity, including but not limited to requesting additional information from you and/or requiring you to sign a declaration under penalty of perjury.

Notice of Sale. We do not sell California resident information, nor have we sold California resident information in the past 12 months. We have no actual knowledge of selling the information of minors under the age of 16.

Right of Non-Discrimination. You have a right to exercise your rights under California law, including under the CCPA, without suffering discrimination. Accordingly, First American will not discriminate against you in any way if you choose to exercise your rights under the CCPA.

Notice of Collection. To learn more about the categories of personal information we have collected about California residents over the last 12 months, please see "What Information Do We Collect About You" in https://www.firstam.com/privacy-policy. To learn about the sources from which we have collected that information, the business and commercial purpose for its collection, and the categories of third parties with whom we have shared that information, please see "How Do We Collect Your Information", "How Do We Use Your Information", and "How Do We Share Your Information" in https://www.firstam.com/privacy-policy.

Notice of Sale. We have not sold the personal information of California residents in the past 12 months.

Notice of Disclosure. To learn more about the categories of personal information we may have disclosed about California residents in the past 12 months, please see "How Do We Use Your Information" and "How Do We Share Your Information" in https://www.firstam.com/privacy-policy.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/27/2022 has revealed that there are 5 NPL sites within approximately 1 mile of the target property.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/27/2022 has revealed that there are 4 SEMS sites within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for

listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/21/2022 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 08/15/2022 has revealed that there are 3 US INST CONTROLS sites within approximately 0.5 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are 23 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 4 CA UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that

there are 24 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Cleanup Status: COMPLETED - CASE CLOSED

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 41 CA CUPA Listings sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CA HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the CA HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 19 CA HIST CORTESE sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Scoring: 2

Summary Details:

Conditions at proposal October 15, 1984): Raytheon Corp. manufactures semiconductor products at a plant in Mountain View, Santa Clara County, California. The facility occupies about 30 acres and is surrounded by industrial, business, and residential areas. Soil and ground water beneath the site are contaminated with trichloroethylene, 1,1,1-trichloroethane, and 1,1- and trans-1,2- dichloroethylene, according to analyses conducted by a consultant to Raytheon. Contaminationis believed to have resulted from a leaking underground chemical storage tank and/or concrete acid neutrali ation sumps. About 270,000 people depend on wells within 3 miles of the site as a source of drinking water. In late 1982, Raytheon conducted an investigation to determine if downgradient ground water contamination near the north property boundary resulted from a source on its property. Raytheon concluded that it was not possible to establish a specific source of contamination based on data obtained from its investigation. At present, Raytheon is working with the California Regional Water Quality Control Board CRWQCB) to determine the full extent of the problem.
This is one of 19 sites in the South BayArea of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status June 10, 1986): In an attempt to determine the full extent of ground water contamination, Raytheon has installed three wells to pump and treat ground water to contain the contaminated plume. CRWQCB has issued Waste Discharge Requirements to the company. The requirements are the board s legal mechanism for regulating activities at facilities under its jurisdiction.
On August 15, 1985,EPA issued a CERCLA Administrative Order on Consent to Raytheon Corp. s Mountain View Plant, as well as to Fairchild Camera s and Intel Corp. s Mountain View Plants. The order calls for the three companies to conduct a joint remedial investigation/feasibility study of the area to determine the type and extent of contamination and identify alternatives for remedial action.

Summary Details:

Conditions at proposal April 10, 1985): Moffett Naval Air Station covers 8,700 acres in Sunnyvale, Santa Clara County, California. In the past, various solvents and sludges were disposed on-site into ponds and landfills and onto the ground.As a result, soil and ground water on-site are contaminated. The major contaminants in ground water are volatile organic compounds. About 272,000 people depend on wells within 3 miles of the station as a source of drinking water. Moffett Naval Air Station is participating in the Installation Restoration Program IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from ha ardous materials. The Navy has completed Phase I records search) of the program and is beginning Phase II remedial investigation). Moffett Naval Air Station is in the South Bay Area of San Francisco. In October 1984, 19 non-Federal sites in the area were proposed for the NPL. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take site-specific action as necessary. Status July 22, 1987): In May 1985, the California Regional Water Quality Control Board adopted Waste Discharge Requirements for Moffett Naval Air Station.The requirements outline specific tasks and compliance dates Moffett must follow to define the full extent of contamination in soils and ground water. In April 1986, the Navy released the final report for the verification step of Phase II.Moffett is revising the quality assurance project plan and sample plan for the characteri ation step of Phase II. Within the boundaries of this Federal facility, including this specific site, there are no areas subject to the Subtitle C corrective action authorities of the Resource Conservation and Recovery Act. Therefore, this Federal facility site is being placed on the Federal section of the NPL.

Scoring: 2

Summary Details:

TELEDYNE SEMICONDUCTOR (Continued) **1000201854**

Conditions at proposal October 15, 1984): Teledyne Semiconductor has manufactured semiconductors on a 1-acre site in Mountain View, Santa Clara County, California, since 1962. In December l982, Teledyne reported to the California Regional Water Quality Control Board CRWQCB) that soil and ground water near an underground storage tank were contaminated with solvents, including trichloroethylene. An investigation in June 1984 revealed that the contaminants had migrated to the northand affected approximately 50 private domestic wells. Local agencies and the company have provided alternative sources of drinking water for the affected residences. About 116,000 people depend on wells within 3 miles of the site as a source of drinking water. The company is working with CRWQCB to determine the extent of the contamination and to develop interim hydraulic controls to prevent further migration of the contaminants. The facility received Interim Status underSubtitle C of the Resource Conservation and Recovery Act RCRA) when the company filed Part A of a permit application. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxicchemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status February 1986): CRWQCB, in conjunction with EPA and the California Department of Health Services, is considering various response actions at the site. This site remains in proposed status until EPA implements the appropriate elements of its final policy for placing RCRA-related sites on the NPL and then applies the policy to this site. Status July 22, 1987): Subsequent investigation revealed that this site is not subject to the Subtitle C permitting requirements of RCRA. Its score on the Ha ard Ranking System, which EPA uses to evaluate sites for the NPL, is above the cutoff point of 28.50, and EPA received no information that prevents placing the site on the NPL. Therefore, it is being placed on the NPL. Teledyne is planning on pumping the contaminated ground water in the upper aquifer to the surface for subsequent treatment.

Summary Details:

Conditions at proposal June 24, 1988): Spectra-Physics, Inc. SP) has

SPECTRA-PHYSICS, INC. (Continued) **1000181197**

manufactured electronic equipment and gas lasers on Terra Bella Boulevard and Middlefield Roads in Mountain View, Santa Clara County, California, since 1961. The 11.5-acre site consists of nine buildings in a light industrial complex. SP uses a variety of cleansers, degreasers, and lubricants in its manufacturing processes, including isopropyl alcohol, acetone, methyl alcohol, trichloroethylene TCE), Freon, 1,1,1-trichloroethane TCA), and Solvasol Solvent 360. In an inspection conducted in 1981, the California Regional Water Quality Control Board CRWQCB) found that areas where ha ardous wastes were stored had no dikes or systems to collect leachate; rusty barrels were also found on-site. Ground water investigations began at the SP facility in September 1984 after tests at Teledyne Semiconductor adjacent and downgradient of SP) indicated possible upgradient sources of contamination. The Teledyne site was placed on the NPL in July 1987.) Soil and ground water collected at SP contained TCE, TCA, and 1,2-dichloroethylene. SP s plume of contaminated ground water has merged with Teledyne s and migrated off-site. More than 200 private drinking water wells had been drilled into the 1-square-mile plume. Most wells have been closed; 47 were found contaminated above State Action Levels. The owners now obtain water from municipal water supplies. An estimated 189,000 people obtain drinking water from public and private wells within 3 miles of the site. Teledyne is operating two extraction wells on-site -- one in the shallow one and one in the intermediate one. The wells pump the water to the surface and discharge it to the sanitary sewer; the ground water is not treated before discharge. SP will evaluate the effectiveness of this system in preventing its on-site plume from migrating off-site. Both companies are jointly designing an off-site extraction system. San Francisco Bay 2.5 miles downstream of the site) is used for recreational activities. Permanente Creek is tidally influenced within 1 mile of the site. Several species of birds designated as endangered species by the U.S. Fish and Wildlife Service are found within the area of tidal influence. Status February 11, 1991): In February 1990, SP installed a vapor extraction system to reduce concentrations of contaminants in soil. Underan order issued by CRWQCB, SP conducted a remedial investigation/feasibility study RI/FS) to determine the type and extent of contamination at the site and identify alternatives for remedial action. The RI/FS was completed in December 1990. In February 1991, CRWQCB will adopt a final cleanup and abatement order requiring SP to implement the best remedial alternative evaluated in the RI/FS. This alternative will include expanding the existing soil vapor extraction system and the ground water extraction system. In April 1991, EPA will complete a Record of Decision describing the selected remedy.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	Not reported
File Location:	Not reported
Potential Media Affected:	Not reported
Potential Contaminants of Concern:	Dichloroethene (DCE), Trichloroethylene (TCE)
Site History:	The site formerly was used as the Santa Clara County vector control maintenance yard. Soil, soil vapor, and groundwater sampling showed contamination by petroleum hydrocarbons and/or VOCs. Under DTSC oversight, the County conducted several investigations and a soil removal. The City purchased the property and conducted additional investigation (soil, soil vapor, and groundwater) to evaluate on-site sources and extent of VOCs in 2013. Following completion of this work, the City installed site monitoring wells. The U.S. Environmental Protection Agency (EPA) determined groundwater contamination at this site is part of the MEW Superfund Study Area; lead regulatory agency oversight transitioned to EPA in February 2015.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type:	Site Characterization Report
Completed Date:	12/28/2007
Comments:	Site characterization completed. VOC groundwater contamination was determined to be form an offsite source. Remediation of the groundwater contamination will not be included as part of the Removal Action Workplan (RAW). The RAW will focus on the mitigation of residual soil VOC and TPH contamination associated with the Catch Basin. The results of the Site groundwater investigation indicates that the source(s) of the VOC groundwater contamination is from off-site and conveyed through the utility corridor.

Hazardous Waste Summary:

Waste Code:	D018
Waste Description:	BENZENE
Waste Code:	D022
Waste Description:	CHLOROFORM
Waste Code:	D038
Waste Description:	PYRIDINE
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE

DEEPCELL, INC. (Continued) **1004678334**

ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U122
Waste Description: FORMALDEHYDE

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal

DEEPCELL, INC. (Continued) **1004678334**

facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Source:	CERS,

MOFFETT GAS MART (Continued) **S123097664**

Site ID:	136615
Site Name:	Moffett Gas Mart
Violation Date:	07-31-2017
Citation:	23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description:	Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.
Violation Notes:	Returned to compliance on 09/28/2017. There was no designated operator inspection in July. Ensure that site has a designated operator and is conducting inspections.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

- Name: MOFFETT FIELD NAVAL AIR STATION - MOFFETT FEDERAL AIRFIELD TANKS 121 & 122
- Address: MOFFETT BLVD.
- City,State,Zip: MOUNTAIN VIEW, CA 94035
- Global ID: T0608542993
- Case Type: Military UST Site
- Status: Completed - Case Closed
- Status Date: 09/02/2008
- Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
- Case Worker: EKW
- Local Agency: Not reported
- RB Case Number: 43D9052
- Loc Case Number: Not reported
- File Location: Regional Board
- Potential Contaminants of Concern: Diesel, Gasoline
- Potential Media Affected: Aquifer used for drinking water supply, Soil
- Site History: USTs 121 and 122 were discovered and removed in 1987 during construction of the current housing development. UST 121 stored diesel and UST 122 stored gasoline; both USTs were used to supply fuel to emergency generators for a former transmitter facility. Contamination was observed during tank removals. Site investigations were conducted in 1990, 1993, 1999-2000, 2005 and 2006 to define the lateral and vertical extent of petroleum contamination. Activities performed included soil and grab groundwater sampling, installation

MOFFETT FIELD NAVAL AIR STATION - MOFFETT FEDERAL AIRFIELD T (Continued) **U004269137**

of monitoring wells, and monitoring. Petroleum in soil is expected to degrade and petroleum in groundwater has degraded. No remediation was necessary because the site presents no significant risk to human health or the environment. Suitable for residential land-use.

Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern: Acetone, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride, Benzene, Ethylbenzene, MTBE / TBA / Other Fuel Oxygenates, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History: In approximately 2016/2017, Calvano developed the approximately 7.3-acre site with a commercial office building (30,000 square feet) and then sold the property. Soil vapor and groundwater contamination has been reported on the site and a vapor barrier (EPRO e.BASE 205, EPRO e.spray, and EPRO e.SHIELD 205) was installed beneath the new building foundation as a precautionary measure to help prevent vapor intrusion and protect future building occupants. The DEH requires ongoing soil vapor monitoring at the site in order to evaluate current and future vapor intrusion risk. Completed Document Type:	Removal Action Completion Report
Completed Date:	01/06/1984
Comments:	In February of 1983, DHS directed LGM to remove the contaminated soil from on and off its property. Several months later, LGM declared bankruptcy and went out of business. In the latter part of 1983 and early 1984, chemicals and contaminated soil were removed from the LGM storage area and an adjacent condominium complex. Post-excavation confirmation samples were taken for fluoride and copper. Detected levels were below health-based risk goals considered safe for residential use.

Background Info:	LGM Manufacturing (LGM) manufactured printed circuit boards from 1969 to 1983. Chemicals used at the Site included ammonia, etch acids, brighteners, fusing oil, trichloroethylene, copper with formaldehyde, and methylene chloride. Chemical wastes were stored in drums and containers in a yard behind the LGM warehouse.

Local Case Number:	06S2W15M02f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	The Site is a former Texaco-branded service station located at the intersection of North Shoreline Boulevard and Terra Bella Avenue in Mountain View, California. Former station features include one 6,000-gallon gasoline underground storage tank (UST), four 4,000-gallon gasoline USTs, and one waste oil UST. In 1992, the six USTs, associated product piping, and dispensers were removed, and the Site was redeveloped as a restaurant. Twelve groundwater monitoring wells have been installed on or near the Site to-date. Eight groundwater monitoring wells (MW-22A, MW-22B, MW-22D, and MW-22L through MW-22P) were installed on-site, and four groundwater monitoring wells (MW-22E through MW-22H) were installed at off-site locations to assess the lateral extent of petroleum hydrocarbons in groundwater. Groundwater monitoring has been performed at the Site since 1988. Historically, groundwater flow at the Site has been towards the north.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 98840
Site Name: Chevron Station# 96377
Violation Date: 01-16-2019
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes: Returned to compliance on 03/01/2019. The 91 tank annular space is currently full of debris (See picture 1) and the annular space sensor cannot be returned to the lowest point in the tank. In addition the annular sensor is no longer functioning and must also be replaced. Clean out debris in annular space and install a new sensor ASAP.
Violation Division: Mountain View Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 98840
Site Name: Chevron Station# 96377
Violation Date: 01-16-2019
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description: Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes: Returned to compliance on 03/01/2019. The 91 Electronic line leak detector failed to catch a 3.0 gal/hr leak. Leak detector must be replaced.

Comments:	Not reported
Description:	Caller states due to customer having a punctured gas tank, approx 5 gallons of gasoline released from vehicle onto concrete pad. No waterways were impacted and the station personnel handled the cleanup.

FINDS:
Registry ID: 110013311139

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Trichloroethylene (TCE)

SPECTRA-PHYSICS LASERS (Continued) **S103980880**

Site History: The former Spectraphysics property is part of a 2-property Federal Superfund site along with the adjacent Teledyne property. Within the last ten years, Responsible Parties (RPs) for the Teledyne/Spectra-Physics site completed a Monitored Natural Attenuation (MNA) study in the off-property area north of and downgradient of the site. The MNA study concluded that natural breakdown of the chlorinated volatile organic compounds of concern is occurring naturally and at the same rate as groundwater extraction. As a result, only a few of the off-property downgradient extraction wells are operating mainly to maintain hydraulic control of the plume. The RPs completed an extended pilot study to test the feasiblity of enhanced reductive dechlorination (ERD) and concluded that ERD is feasible with bioaugmentation of the Shallow Zone. Within the last several years, the RPs detected on-property groundwater-CVOCs and higher than expected levels but under 1,000 parts per billion and are about to impelment an on-property treatability study. When sub-slab depressurizationv (SSD) systems have been installed under the potentially impacted buildings, the RPs will move forward on an in-situ treatability study. Within the last seven years however, IA VI was evaluated in several of the on-property commercial buildings to find that IA-CVOCs were over ESLs. The RPs installed SSD systems at several of the buildings. The RPs also assertiively evaluated potential IA VI in the off-property commercial North Bayshore and residential Spring Street areas to conclude that IA VI is occurring in one of the off-property commercial area buildings and in several homes in the residential area. The RPs were in the process of installing a sub-slab depressurization system in the commercial building and offered the affected residents crawl space fans to address the issue.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

EXXON RAS NO 73528 (Continued) **1000337868**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date:	09-10-2019
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Commercial Offsite Facility Types:	Not reported
Quarterly Update:	Teledyne, Inc. originally operated their facility under Tiered Permitting but submitted a Part A application on 11/19/1980 and received an ISD on 4/6/1981. Over the years Teledyne applied for many permits including variance requests, a Part B, and Permit by Rule. They have also gone through many name changes which include Teledyne Inc, Teledyne Components, Telcom, and finally Teledyne Semiconductor Inc (TSI). By 1994 TSI began looking into closing their Interim Status units and operate as a generator. Microchip Technology Inc. purchased all of TSI's permits in 2001 and now operates the site.

Treat To Water:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Case Worker: RWP
Local Agency: SANTA CLARA VALLEY WATER DISTRICT
RB Case Number: 43S0128
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History: The Teledyne property is part of a two-property Superfund site along with the adjacent Spectra-Physics property. The responsible parties (RPs) for the Teledyne/Spectra-Physics site completed a Monitored Natural Attenuation (MNA) study in the off-property area north of and

TDY INDUSTRIES, INC (SEMICONDU (Continued) **S100833421**

downgradient of the site. The MNA study concluded that natural breakdown of the chlorinated volatile organic compounds of concern is occuring naturally and at the same rate as groundwater extraction. As a result, only a few of the off-property downgradient extraction wells were operating mainly to maintain hydraulic control of the plume. The RPs completed a pilot study to test the feasibility of enhanced reductive dechlorination (ERD) and concluded that ERD is feasible with bioaugmentation of the Shallow Zone. Within the last ten years, the RPs detected elevated source areas at the Teledyne property using high resolution technology and continuously logged and screened ERD injection well boreholes. Implementing a full-scale ERD treatability study, they have been and are currently remediating the property with groundwater-CVOC levels dropping from as much as over 80,000 ug/l to low multiples of MCLs. Several rounds of ERD injections successfully cleaned up most of the Shallow Zone at the Teledyne property and the adjacent Spring Street residential area to drinking water standards and the treatability study was even more successful in the underlying Upper and Lower Intermediate Zones. More recently, the RPs also assertively evaluated potential IA VI in the off-property commercial North Bayshore and residential Spring Street areas to conclude that IA VI is not occurring in most of the commercial area and is occasionally occurring in several homes in the residential area. The RPs installed sub-slab depressurization systems in the impacted on-property commercial buildings and offered the affected off-property residents crawl space fans to address the issue.

Background Info:	Teledyne Semiconductor has operated a semiconductor manufac-

TDY INDUSTRIES, INC (SEMICONDU (Continued) **S100833421**

turing facility at this one-acre site since 1962. Chemicals used in the manufacturing process and wastes generated by the process are handled and stored onsite.
In 1982, Teledyne notified the RWQCB that soil and groundwater near underground solvent storage tanks was contaminated. Further study revealed that a groundwater contaminant plume had migrated northward and contaminated forty private domestic wells. The contaminants identified in soil and groundwater include trichloroethylene (TCE), dichloroethylene (DCE), Freon-113, dichlorobenzene (DCB), perchloroethylene (PCE), and xylene.
About 270,000 people residing within three miles of the site depend on groundwater as a source of drinking water. The groundwater contamination represents a potential threat to municipal and other wells.

CA BOND EXP. PLAN:
Reponsible Party: NPL SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: Teledyne, the responsible party, has been conducting remedial activities under and order issued by the RWQCB. DHS has budgeted $50,000 for development, review and approval of a RAP and will seek to recover all actual costs from the responsible parties.
Site Description: Teledyne Semiconductor has operated a semiconductor manufacturing facility at this one-acre site since 1962. Chemicals used in the manufacturing process and wastes generated by this process are handled and stored onsite.
Hazardous Waste Desc: In 1982, Teledyne notified the RWQCB that soil and ground water near underground solvent storage tanks was contaminated. Further study revealed that a ground water contaminant plume and migrated northward and contaminated 40 private domestic wells. The contaminants identified in soil and ground water are trichloroethylene (TCE), dichloroethylene (DCE), Freon-113, dichlorobenzene (DCB), perchloroethylene (PCE) and xylene.
Threat To Public Health & Env: About 270,000 people residing within 3 miles of the site depend on ground water as a source of drinking water. The ground water contamination represents a potential threat to municipal and other wells.
Site Activity Status: An investigation conducted in June, 1984, revealed that solvents had contaminated private wells to the north of the site. Contaminated wells were closed and an alternate drinking water supply was provided to affected residents. A ground water extraction system was installed onsite and began operating in October, 1986. Characterization of soil and ground water contamination is continuing.

Completed Document Type: CEQA - Notice of Exemption
Completed Date: 04/27/1999
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 08/16/1995
Comments: Signed VCA for AOI 8. AOI 8 is located at the northwest corner of the NASA Ames Research Center, adjacent to the wetlands and formerly known as Mavarro Farms. AOI 8 is used for recycling and storage of excess vehicles and equipment. The site contains one building, and a bioremediation pad. Soils contaminated with total petroleum hydrocarbons (TPH) as diesel and oil and grease have been identified at the site. An above ground diesel tank was formerly located on the site and spilled 100 gallons of fuel in 1987. Soil samples detected TPH-diesel at 10,000 milligrams per kilogram (mg/kg) and TPH-oil and grease was 16,000 mg/kg. Other chemicals such as pesticides and VOCs have been detected at the site, but the concentrations have been low and not considered significant. Elevated levels of TPH concentrations in the groundwater have been detected during sampling events in the past, but have not been elevated for the past five years. Groundwater is being monitored by wells both up gradient (two wells) and down gradient (one well).

Completed Document Type: Standard Voluntary Agreement
Completed Date: 03/08/1996
Comments: Signed VCA. DTSC is providing oversight for the AOI 5 which is not under the oversight of the U.S. EPA. The VCA outlined the oversight duties of DTSC, including additional investigations and remediation of the site. AOI 5 includes six buildings used as biosciences laboratories, the biomedical research facility and two electrical substations. AOI 5 also includes a drum storage area and one underground storage tank that were previously located within the site boundaries. The drum storage area was closed in the middle 1980s and the tank was removed in 1990. Analyses of soil and groundwater samples detected petroleum hydrocarbons, PCBs, and VOCs. Investigations conducted in 1998 and 1999 indicated two separate groundwater plumes. The western plume contains PCE up to 72 micrograms per liter (ug/l). The eastern plume contains primarily TCE up to 80 ug/l. NASA is currently evaluating some in-situ remedial

NASA-AMES AOI 4 (Continued) **S100186296**

methods as an alternative to pump and treat for any groundwater contamination found.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 10/03/2000
Comments: Completed Removal Action. Skimming pumps were planned to be installed in two monitoring wells (one existing well and one new well) to extract free product floating on the water table. Additional sampling data conducted in 1999 indicated that there is no longer free product in the shallow aquifer near Tank 1 and Tank 5. Based on this information skimming pumps were not required and proposed new groundwater monitoring well was not installed. Both Tank 1 and 5 were removed. Dissolved petroleum hydrocarbons in the groundwater will be monitored quarterly until such time that four consecutive quarters of data are analyzed indicating that the TPH concentrations are below cleanup levels and stable. A source point for the TCE concentrations detected in the groundwater was not discovered during the remedial investigation phase of the project. Therefore, it is believed that the source of the TCE detected in the groundwater is from an off-site

NASA-AMES AOI 4 (Continued) **S100186296**

source. Groundwater TCE contamination will be investigated separately from the AOI 4 project. Petroleum hydrocarbon contaminated soils exceeding the identified remediation levels (400 mg/kg) were planned to be excavated. Excavated soil with concentrations under 1,000 mg/kg was to be bioremediated and reused. Soil exceeding 1,000 mg/kg was to be disposed of offsite. Additional soil sampling conducted in 1999 indicated that the level of petroleum hydrocarbons in the soil and groundwater were lower than originally identified; they were below or close to the established cleanup goals. The sampling was repeated and the results confirmed; the soil excavation proposed in the RAW was not implemented.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 06/16/1998
Comments: Approved RAW specifying the following actions: 1) removal of free product hydrocarbons from the groundwater using skimming pumps; 2) excavation and on-site bioremediation of petroleum contaminated soil; 3) off site disposal of soil not meeting cleanup levels; and 4) on-going groundwater monitoring for contaminants of concern.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/10/1994
Comments: Completed PEA. A PEA equivalent report was completed by NASA Ames for 12 Areas of Investigation (AOIs).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 07/17/2000
Comments: During the course of site investigations of AOI4, trichloroethene (TCE) and 1,2-dichloroethene (DCE) were detected in the groundwater. No connection with an on-site source of these chemicals could be found. Further investigations on the Orion Park housing area, upgradient of A014, revealed elevated concentrations of TCE and DCE in the groundwater. Soil samples from the Orion Park area also revealed the presence of TCE and DCE. Based on this data NASA has concluded that the TCE and DCE contamination found in the A0I 4 groundwater is from a source upgradient of the NASA property. The source could be either the Orion Park housing area or the Middlefield-Ellis-Whisman (MEW) plume. The groundwater investigation has been refered to the RWQCB.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 04/10/2006
Comments: DTSC announces the certification of the AOI 4 hazardous substances cleanup at the NASA Ames Research Center. DTSC certification of AOI 4 signifies that all environmental cleanup activities mandated by the Removal Action Workplan are now complete.

Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 08/24/2000
Comments: Approved RAW requiring the excavation and disposal of soil contaminated with PCBs. After excavation, concrete will be used to backfill the hole. The remedial goal for PCB contamination is 50 mg/kg, for restricted areas, in accordance with 40 CFR regulations pursuant to TSCA. For soil contaminated with petroleum, biological nutrients will be injected 2 to 4 feet into the ground to promote bioremediation. Bioremediation will continue until the petroleum concentrations are below 400 mg/kg in the soil. Access to the site is restricted and appropriate signage will be posted. Due to the need to have the substations de-energized during the remediation, the tasks of cleaning up substations N221C and N227D were divided.

Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 02/08/2006
Comments: Cleanup Actions at the three electrical substations making up NASA Ames Research Center's Area of Investigation 10 (AOI 10) has been completed. No Operation and Maintenance is required for this Site.

Completed Area Name: N227D Unitary Substation
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 01/27/2006
Comments: The PCB and TPH contamination soil removal action at N227D Unitary Substation has been completed. Approximately 36 cubic yards of contaminated soil has been excavated and disposed of. Confirmation sampling indicates at the remaining TPH and PCB soil concentration are below the site specific cleanup goals, established in the approved RAW.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 08/24/2000
Comments: The cleanup activities for this project are confined within the fenced perimeter of two electrical substations. The contaminated soil will be excavated, disposed of off site, and backfilled. The project has no possibility of significant effect on the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 04/08/1996
Comments: Signed VCA for AOI 10. AOI 10 consists of three electrical substations; N227 Unitary Substation, N238 Arc Jet Substation, and N221C substation located in the central part of the NASA Ames Research Center. The substations are fenced and access is limited to operation and maintenance personnel. There is no vehicular traffic through these areas. Concrete pads in each of the substations support transformers and other equipment. The ground surface surrounding the concrete pads is covered with two to six inches of gravel. The primary objectives of the work proposed for AOI 10 is to investigate the soil within the electrical substations for the presence of PCBs and extractable hydrocarbons (TEPHs). Transformer oil containing PCBs was historically used in many of the transformers at NASA Ames. The N227 Unitary Substation was constructed in the mid 1950s to supply power to three wind tunnels. TEPHs were detected in concentrations above cleanup levels (400 mg/kg) in areas directly east and west of one of the transformer pads. The concentrations are the highest nearest the surface and are below cleanup levels at depths of five feet below. In identifying the extent of contamination, soil samples were collected near the substation. Concentrations of TEPHs were detected as high as 1200 mg/kg and the median was 83 mg/kg. Of those samples, only one detected PCB concentrations that exceeded the residential cleanup levels (1 mg/kg) at 2.1 mg/kg. No PCBs were detected at N238 Arc Jet Substation more than 0.2 mg/kg. TEPH was detected in soil samples collected at this location from 72 mg.kg to 160 mg/kg, which are all below the cleanup level. Only trace concentrations of TEPH were detected (maximum of 6.8 mg/kg) in the

NASA-AMES AOI 4 (Continued) **S100186296**

area of N221C. PCBs were found in one sampling location, measuring 310 mg/kg at 1.5 feet below the ground surface (bgs) down to 7.4 mg/kg at 5.5 feet. Two additional sampling events were conducted in January and February, 2001 to further evaluate the extent of the PCBs contamination. During the February sampling event, PCB concentrations of 330 mg/kg at 3 feet and 520 mg/kg at 4 feet were detected.

Completed Area Name: N227D Unitary Substation
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 10/07/2005
Comments: N227D Removal Action was implemented and completed without proper notification to DTSC

Completed Area Name: N227D Unitary Substation
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 08/08/2005
Comments: NASA requests the change to the selected alternative to assist in the overall reduction in non-source point PCB contaminated storm runoff at the Ames Research Center. The implementation of Alternative 2 would allow NASA to forego the bioremediation technology at the N227D substation of AOI 10 and excavate the TPH contaminated soil along with the PCB contaminated soil. DTSC has determined that the request is an insignificant change and will not have a significant impact on the scope, performance, or cost of the remedy.

Completed Area Name: N221C Substation
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 09/24/2004
Comments: Approved RA for the N221C area. The PCB contaminated soil was excavated to the depth of seven feet below the ground surface. Verification sampling indicated PCB concentrations were reduced to less than 1 mg/kg (0.61 mg/kg). Concrete was used to backfill the excavation. The completion of the N221C Substation remedial activities do not complete the remedial action for AOI 10 as described in the approved Final RAW (January 2001). The shut down of the N227D Substation and remediation of the total petroleum hydrocarbon (TPH) and polychlorinated biphenyls (PCBs), remain to be implemented.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Newsletter
Completed Date: 04/10/2006
Comments: DTSC announces the certification of the AOI 10 hazardous substances cleanup at the NASA Ames Research Center. DTSC certification of AOI 10 signifies that all environmental cleanup activities mandated by the Removal Action Workplan are now complete.

NASA-AMES AOI 4 (Continued) **S100186296**

Completed Document Type: Tank Removal Report
Completed Date: 06/11/2007
Comments: Underground storage tanks were all removed by NASA Ames under oversight of Santa Clara County. At most of the Tank Sites contamination was not detected above cleanup levels. Where contamination was detected, the contaminated media was remediated. No Further Action Required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 08/13/1996
Comments: NASA entered into a VCA for AOI 11, for DTSC oversight. AOI 11 encompasses 11 underground storage tanks, which were investigated to determine if a release of hazardous substances could be determined and if remedial action would be required. Soil and groundwater around these tanks were sampled and analyzed. After the samples were analyzed, two tanks required further remedial action, Tank U14 and Tank 7. The area surrounding U14 is an undeveloped gravel lot that stretches east from the PG&E substation West N-225A to Parsons Avenue. In this area, groundwater can be found at eight feet below ground surface. Trichloroethylene (TCE) was not detected in the soil samples around Tank U14. Groundwater samples near the tank detected concentrations of TCE and dichloroethylene (DCE), above the California Maximum Contaminant Levels (MCLs) in drinking water. The highest concentrations were found in the monitoring wells up gradient from the site, 270 micrograms per liter (ug/l) of TCE and 120 ug/l of DCE. The sampling data suggests that the source of the contamination may be the Orion Park area, under Navy investigation or the MEW plume, under the oversight of the US EPA. Tank 7 is used to store jet fuel. The current tank replaced a tank, which was leaking. Remediation of the released hydrocarbons identified as TPH-JP5, has already occurred, but a fuel spill in the area occurred in 1995. Soil and groundwater contamination was investigated in 1999, identifying that both soil and groundwater are impacted with petroleum hydrocarbon concentrations above the cleanup levels. NASA is currently developing a workplan that focuses on the source(s).

Comments:	Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	10/03/2000
Comments:	Completed Removal Action. Skimming pumps were planned to be installed in two monitoring wells (one existing well and one new well) to extract free product floating on the water table. Additional sampling data conducted in 1999 indicated that there is no longer free product in the shallow aquifer near Tank 1 and Tank 5. Based on this information skimming pumps were not required and proposed new groundwater monitoring well was not installed. Both Tank 1 and 5 were removed. Dissolved petroleum hydrocarbons in the groundwater will be

NASA-AMES AOI 4 (Continued) **S100186296**

monitored quarterly until such time that four consecutive quarters of data are analyzed indicating that the TPH concentrations are below cleanup levels and stable. A source point for the TCE concentrations detected in the groundwater was not discovered during the remedial investigation phase of the project. Therefore, it is believed that the source of the TCE detected in the groundwater is from an off-site source. Groundwater TCE contamination will be investigated separately from the AOI 4 project. Petroleum hydrocarbon contaminated soils exceeding the identified remediation levels (400 mg/kg) were planned to be excavated. Excavated soil with concentrations under 1,000 mg/kg was to be bioremediated and reused. Soil exceeding 1,000 mg/kg was to be disposed of offsite. Additional soil sampling conducted in 1999 indicated that the level of petroleum hydrocarbons in the soil and groundwater were lower than originally identified; they were below or close to the established cleanup goals. The sampling was repeated and the results confirmed; the soil excavation proposed in the RAW was not implemented.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 06/16/1998
Comments: Approved RAW specifying the following actions: 1) removal of free product hydrocarbons from the groundwater using skimming pumps; 2) excavation and on-site bioremediation of petroleum contaminated soil; 3) off site disposal of soil not meeting cleanup levels; and 4) on-going groundwater monitoring for contaminants of concern.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/10/1994
Comments: Completed PEA. A PEA equivalent report was completed by NASA Ames for 12 Areas of Investigation (AOIs).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 07/17/2000
Comments: During the course of site investigations of AOI4, trichloroethene (TCE) and 1,2-dichloroethene (DCE) were detected in the groundwater. No connection with an on-site source of these chemicals could be found. Further investigations on the Orion Park housing area, upgradient of A014, revealed elevated concentrations of TCE and DCE in the groundwater. Soil samples from the Orion Park area also revealed the presence of TCE and DCE. Based on this data NASA has concluded that the TCE and DCE contamination found in the A0I 4 groundwater is from a source upgradient of the NASA property. The source could be either the Orion Park housing area or the Middlefield-Ellis-Whisman (MEW) plume. The groundwater investigation has been refered to the RWQCB.

Completed Area Name: PROJECT WIDE

Comments:	Signed VCA. DTSC is providing oversight for the AOI 5 which is not under the oversight of the U.S. EPA. The VCA outlined the oversight duties of DTSC, including additional investigations and remediation of the site. AOI 5 includes six buildings used as biosciences laboratories, the biomedical research facility and two electrical substations. AOI 5 also includes a drum storage area and one underground storage tank that were previously located within the site boundaries. The drum storage area was closed in the middle 1980s and the tank was removed in 1990. Analyses of soil and groundwater samples detected petroleum hydrocarbons, PCBs, and VOCs. Investigations conducted in 1998 and 1999 indicated two separate

NASA-AMES AOI 4 (Continued) **S100186296**

groundwater plumes. The western plume contains PCE up to 72 micrograms per liter (ug/l). The eastern plume contains primarily TCE up to 80 ug/l. NASA is currently evaluating some in-situ remedial methods as an alternative to pump and treat for any groundwater contamination found.

soil with contamination greater than 1,000 mg/kg will be disposed off site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/10/1994
Comments: Completed PEA. A PEA equivalent report was completed by NASA Ames by combining the Center-wide Sampling and Analysis program with the listing site inspection.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 04/03/2006
Comments: The Department of Toxic Substances Control certifies the completion of the removal actions implemented as described in the Final Removal Action Workplan. The completion of the approved Final Implementation Report documents the remedial actions undertaken at the Site. As outlined in the Operation and Maintenance Agreement and the Land Use Controls, the site requires further site specific operation and maintenance activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 03/06/2006
Comments: DTSC, reviewed the 2005 Annual Operations and Maintenance Summary Report. Review has found that the report meeting the Operation and Maintenance requirements for 2005.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 03/30/2006
Comments: DTSC and NASA Ames have executed a land use control document which will be included in the NASA Ames Master Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Release/Rescission
Completed Date: 06/30/2006
Comments: Groundwater monitoring showed no further action is needed at the site. NASA was notified that the restrictions in the March 2006 land use covenant no longer apply.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 04/27/1999
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 08/16/1995
Comments: Signed VCA for AOI 8. AOI 8 is located at the northwest corner of the

NASA-AMES AOI 4 (Continued) **S100186296**

NASA Ames Research Center, adjacent to the wetlands and formerly known as Mavarro Farms. AOI 8 is used for recycling and storage of excess vehicles and equipment. The site contains one building, and a bioremediation pad. Soils contaminated with total petroleum hydrocarbons (TPH) as diesel and oil and grease have been identified at the site. An above ground diesel tank was formerly located on the site and spilled 100 gallons of fuel in 1987. Soil samples detected TPH-diesel at 10,000 milligrams per kilogram (mg/kg) and TPH-oil and grease was 16,000 mg/kg. Other chemicals such as pesticides and VOCs have been detected at the site, but the concentrations have been low and not considered significant. Elevated levels of TPH concentrations in the groundwater have been detected during sampling events in the past, but have not been elevated for the past five years. Groundwater is being monitored by wells both up gradient (two wells) and down gradient (one well).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: *Voluntary Cleanup Agreement Completion
Completed Date: 06/30/2006
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 01/07/2005
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 06/30/2006
Comments: NASA Ames has completed the four consecutive quarters of groundwater monitoring at AOI 8 for the TPH contaminants of concern, required by the Operation and Maintenance Agreement. With the completion of the groundwater monitoring activities, no further action under the OMA, land use covenant or the VCA is required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Newsletter
Completed Date: 04/10/2006
Comments: DTSC announces the certification of the AOI 8 hazardous substances cleanup at the NASA Ames Research Center. DTSC certification of AOI 8 signifies that all environmental cleanup activities mandated by the Removal Action Workplan are now complete.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 02/28/2000
Comments: The Implementation Plan provides the details of how NASA intends to accomplish the Removal Action Alternative recommended in the approved Removal Action Workplan (RAW) for A0I 8.

Case Type:	Cleanup Program Site
Case Worker:	MBR
Local Agency:	Not reported
RB Case Number:	43S0241
File Location:	Regional Board
Potential Media Affected:	Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Trichloroethylene (TCE)
Site History:	In 1983, Union Bank of California took over ownership of the site when Innerconn Technologies, the owner and operator of the site at the time, went bankrupt and defaulted on their loan. Trichloroethylene (or TCE) was discovered in the groundwater at about this time. TCE was a common solvent used and stored by the electronics manufacturing industry. Union Bank conducted a site investigation shortly after inheriting the site. The Board issued Site Cleanup Requirements in 1989 naming Union Bank and Innerconn Technologies as responsible parties. In 1989, the former manufacturing building was razed and a strip mall was built in approximately the same footprint. The strip mall continues to operate today. In 1992, Union Bank installed a pump and treat system to reduce TCE levels and to control off-site migration. In 2001, we allowed Union Bank to turn off the pump and treat system because TCE concentrations had declined and operating the system was no longer necessary. We expect that TCE concentrations will continue to decline over time due to natural degradation processes. While TCE concentrations are still above the drinking water cleanup goals, the residual contamination does not present an immediate threat to human health or the environment because the concentrations are relatively low, the groundwater plume is not migrating, and the shallow groundwater aquifer in this area is not currently used for any purpose.

Summary Details:

Conditions at proposal October 15, 1984): Fairchild Semiconductor Corp. manufactures semiconductors in Mountain View, Santa Clara County, California. The facility occupies approximately 56 acres and is surrounded by residential and industrial areas. This site was originally proposed under the name Fairchild Camera Instrument Corp. Mountain View Plant). The company took the new name in 1986. Monitoring wells on the site are contaminated with trichloroethylene,1,1,1-trichloroethane, 1,1- and trans-1,2-dichloroethylene, according to analyses conducted by a consultant to Fairchild. Contamination is believed to have resulted from leaking underground tanks. About 270,000 people depend on wells within 3miles of the site for drinking water. Since early 1982, Fairchild has been investigating the site geology and hydrogeology and attempting to define the lateral and vertical extent of solvents underlying the site. Fairchild has installedtwo wells to pump and treat the contaminated ground water plume.

FAIRCHILD SEMICONUCTOR SYSTEM 3 (Continued) **1000260555**

The company is working with the California Regional Water Quality Control Board to further define the extent of contamination and outline various cleanup strategies. The plant received Interim Status under Subtitle C of the Resource Conservation and Recovery Act RCRA) when the company filed Part A of a permit application. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well astake specific action as necessary. Status February 1986): Continuing to determine the extent of ground water contamination, Fairchild has installed more than 100 monitoring wells. On August 15, 1985, EPA issued an AdministrativeOrder on Consent under CERCLA Section 106 a) to Fairchild s Mountain View Plant, as well as to Intel Corp. s and Raytheon Corp. s Mountain View Plants. The order calls for the companies to conduct a joint remedial investigation/feasibility study of the area to determine the type and extent of contamination and identify alternatives for remedial action. Status June 1988): EPA is proposing to drop Fairchild Semiconductor Corp. s Mountain View Plant from the proposed NPL. Because the site is a treatment and storage facility, it is subject to the corrective action authorities of Subtitle C RCRA. Fairchild now has 25 wells in operation that pump and treat contaminated ground water; has installed three undergroundslurry walls to control migration of contaminated ground water. EPA has sealed two abandoned agricultural wells that were carrying contamination to the deeper aquifers. EPA may also pursue cleanup under RCRA authorities and will ensure that the cleanup protects public health and the environment. EPA can later repropose the site for the NPL if it determines that the owner or operator is unable or unwilling to clean up the site effectively. Status February 11, 1991): EPAis adding this site to the NPL because, although it is subject to RCRA Subtitle C, the transfer of primary responsibility from CERCLA to RCRA would delay and complicate the overall cleanup of the site. The RI was concluded in July 1988. Adraft FS and EPA s Proposed Plan were presented to the community for a 60-day public comment period in November 1988. EPA signed the Record of Decision ROD) identifying the selected remedy on June 9, 1989. On September 21, 1990, EPA issued an Explanation of Significant Differences clarifying the ROD. In May 1989, EPA sent Special Notice Letters calling for a remedial design/remedial action RD/RA) Consent Decree to Fairchild and 16 other parties potentially responsible for wastes associated with the site. Fairchild failed to conclude a settlement Consent Decree) with EPA. On November 29, 1990, EPA issued Fairchild and eight other parties a Unilateral Administrative Order for RD/RA.

Hazardous Waste Summary:

Waste Code:	D002
Waste Description:	CORROSIVE WASTE
Waste Code:	D004
Waste Description:	ARSENIC
Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D010
Waste Description:	SELENIUM
Waste Code:	D011
Waste Description:	SILVER
Waste Code:	D029

FAIRCHILD SEMICONUCTOR SYSTEM 3 (Continued) **1000260555**

Waste Description: 1,1-DICHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Completed Date: 04/15/2016
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require DTSC to pursue corrective actions. Arrowhead Development Company operated an amusement park equipment manufacturing facility from 1960 through 1980 on and 8-acre project that included the site. TCE was reportedly used at the facility for vapor degreasing. There were subsequent changes in the site ownership. Sanmina purchased the property in 1999 and operated four hazardous waste treatment units under permit-by-rule, including two Memtek wastewater treatment units, a batch treatment unit, and ion-exchange unit. The site is part of the Plymouth Street Site where the Regional Water Quality Control Board has been overseeing the investigation and remediation.

Case Type:	Cleanup Program Site
Case Worker:	RWP
Local Agency:	SANTA CLARA VALLEY WATER DISTRICT
RB Case Number:	43S0217
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	The Montwood plume is within a much larger plume extending from the Teledyne/Spectra-Physics Superfund site. Groundwater extraction reduced on-property and nearby chlorinated VOCs (CVOCs) in groundwater to asymptotic levels. However, the CVOC plume extends off-property through and beyond the downgradient site at 1600 Plymouth Street,- presently owned by Peery/Arrillaga (P/A). The off-property charcacterizaion of the groundwater-CVOC plume has been completed with grab groundwater samples and additional wells. Off-property groundwater-CVOC extent has attenuated with natural attenuation. Responding to persistent Regional Water Board suggestions to re-characterize the site with high-resolution technology, the Responsible Party (UP) used MIP data plus three other data layers to successfully locate on-site CVOC source areas. Based on the data, the consultant selected enhanced reductive dechlorination (ERD) as the final remedy that is now in process at the on-property area. ERD has significantly decreased the on-property groundwater-CVOC levels with TCE now below MCLs. UP is about to conduct the first off-property ERD remedial task after extended access negotiations with Google.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 10/22/2013
Comments: Based on the Preliminary Endangerment Assessment Report, DTSC determined that no significant releases have occurred from the Site and issued a letter to the Site owner conveying that DTSC requires no further action at the Site. The Report identifies possible indoor air impacts from volatile organic compounds in groundwater that

A-1 RENTS(NEW CASE) (Continued) **S105025096**

originated from off-Site sources as the only environmental concern. The Site is located within the the Middlefield-Ellis-Whisman Study Area, which encompasses an existing regional groundwater contamination plume. DTSC's letter noted that although DTSC requires no further action, actions may be required by the U.S. Environmental Protection, pursuant to its Record of Decision Amendment for the Vapor Intrusion Pathway, dated August 16, 2010, to address the potential vapor intrusion risk.

Alternate Address:	1776 OLD MIDDLE FIELD WAY
Alternate City,St,Zip:	MOUNTAIN VIEW, CA 94043
Background Info:	Facility size is approx. 7.06 acres. Sites include a grease rack and vehicle wash rack. A draft PA was completed in February 1999 and a final SI work plan was prepared in August 2000. The greas e rack was constructed in the early 1950s and is no longer used. The Army considers the wash rack to be a compliance (RCRA) issue for funding purposes. Minimal shallow soil sampling was conducte d in 1997 around the grease rack. Contaminants of concern are pr imarily grease oil, fuels, and solvents. Groundwater is shallow, approx 15 ft below ground furfact. Impacts to groundwater are u nknown, but will be determine by the August 2000 SI field work.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/11/2015
Comments: The Results of Sub-Slab Soil Vapor Assessment report presents the findings of a sub-slab soil vapor assessment that was performed by the Site owner to determine whether former operations by Austin's Fremont Laundry impacted the Site. Sub-slab sampling of soil vapor was performed at six locations in the building that occupies the Site. Elevated concentrations of tetrachloroethene (PCE) were detected in the soil vapor samples. The highest PCE concentrations were detected on the eastern side of the building and were about an order of magnitude lower on the western side of the building.

CALWEST PROPERTIES (SIERRA VISTA) (Continued) **S106568332**

Completed Date: 10/02/2020
Comments: The Department of Toxic Substance Control (DTSC) has reviewed the Cal West Properties (Sierra Vista) Inspection Report (Report). The Report documented that a cap inspection was performed on July 2, 2020. The property was found to be in compliance with the restrictions and requirements of the Land Use Covenant (LUC) and that the cap is in good condition. Therefore, DTSC approves the report. In order to return to the schedule previously established for annual inspections, the next inspection report is due February 3, 2021. -EC, 10/2/2020

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/17/2018
Comments: DTSC provided an annual oversight cost estimate for fiscal year 2018/2019.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 04/28/2014
Comments: The Department of Toxic Substances Control (DTSC) performed a Five-Year Review to assure that the implemented remedy continues to be protective of public health, safety, and the environment. DTSC conducted as site visit as part of the Five-Year Review and observed the capped area to be in good condition and did not observe evidence

CALWEST PROPERTIES (SIERRA VISTA) (Continued) **S106568332**

of any activities prohibited by the Land Use Covenant. DTSC concluded that the remedy remains protective of human health and the environment.

Completed Document Type: Operation and Maintenance Report
Completed Date: 10/02/2020
Comments: The Department of Toxic Substance Control (DTSC) has reviewed the Cal West Properties (Sierra Vista) Inspection Report (Report). The Report documented that a cap inspection was performed on July 2, 2020. The property was found to be in compliance with the restrictions and requirements of the Land Use Covenant (LUC) and that the cap is in good condition. Therefore, DTSC approves the report. In order to return to the schedule previously established for annual inspections, the next inspection report is due February 3, 2021. -EC, 10/2/2020

Comments:	Yieldup International, which became FSI International andoperated as a semiconductor equipment manufacturing facility. FSI International closed its operations in 2001. DTSC issued a Statement to Respondent and a Summary of Violation letter in 2001 due to FSI International not completing a Phase I Checklist. However, the available documentation found by DTSC while performing this site screening did not indicate any releases of hazardous substances have occurred on the Site. This finding is corroborated by the Phase I ESA, which was conducted by ERAS in June 2014 and found no indication of spills or improper storage of hazardous materials. The Church of Scientology

YIELDUP INTERNATIONAL, INC. (Continued) **S103996492**

currently occupies the Site. Based on the documentation found and reviewed during this site screening, DTSC recommends No Further Action for the Site.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/27/2022

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/27/2022

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 08/25/2022

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

USGS TOPOGRAPHIC MAP

Target Property Map:	12016461 MOUNTAIN VIEW, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

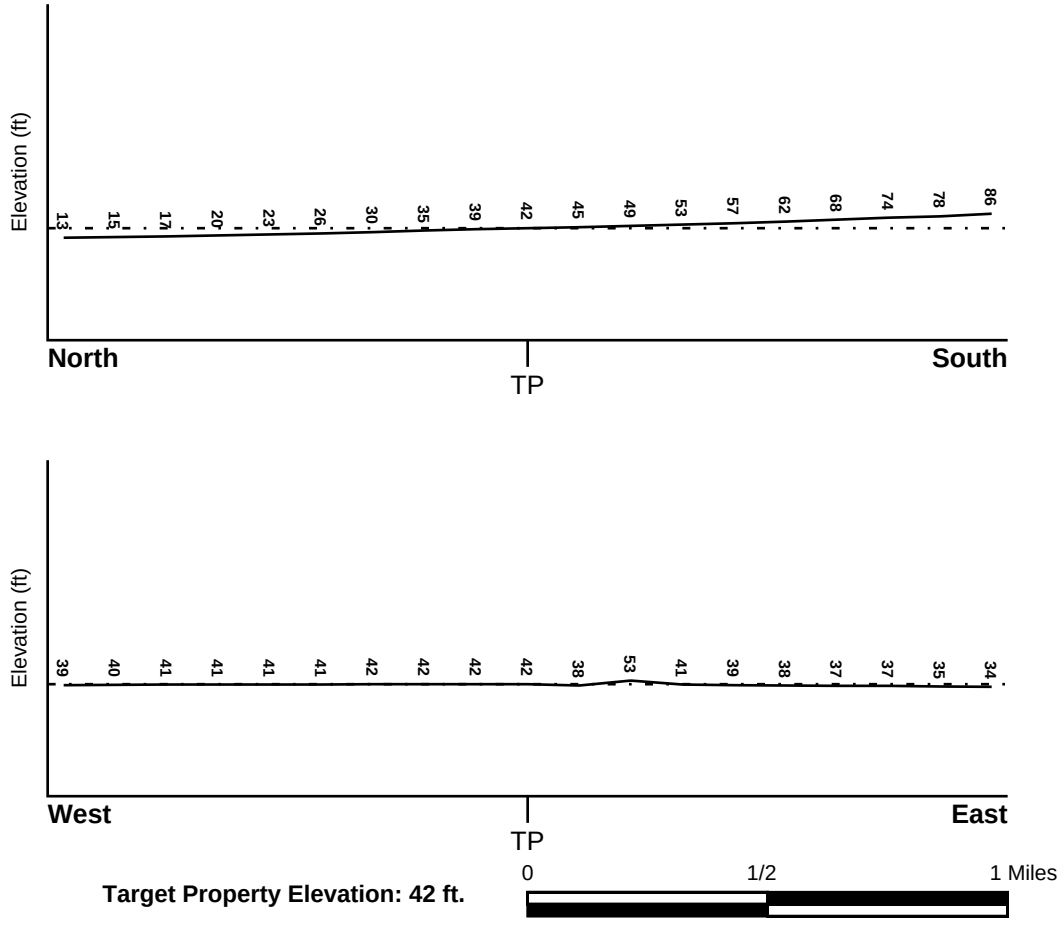

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 42 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0037H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0045H	FEMA FIRM Flood data
06085C0039H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
MOUNTAIN VIEW	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile WNW
Site Name:	JASCO CHEMICAL CO
Site EPA ID Number:	CAD981677107
Groundwater Flow Direction:	North-Northeast
Measured Depth to Water:	13.5 to 15 feet, 20 to 23.5 feet, and 26 to 29 feet in three discrete perched zones at the site.
Hydraulic Connection:	The upper perched aquifers and lower aquifer at the site are separated by a dense blue clay aquitard, although aquifer interconnections exist in the site vicinity.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Contact: Alicia Jansen

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Limited Permission To Make Copies

Stantec (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month greater than 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**

Aboveground Petroleum Storage

Does your facility own or operate aboveground petroleum storage tanks or containers AND: * have a total aboveground petroleum storage capacity of 1,320 gallons or more, OR * have one or more petroleum tanks in an underground area?	**No**

Regulated Substances

Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

ENVIRONMENTAL COMPLIANCE PLAN
Emergency Response (Contingency Plan) I
Emergency Procedures

Facility ID:	**1032**
Updated:	**4/17/2013**

Business Name
Reservoir Engineering Research Institute

Facility Street Address
922 San Leandro Avenue Suite H

Emergency response to hazardous materials spills or releases is the responsibility of the ***business owner.*** The role of the Fire Department is to provide ***assistance*** to your primary response actions. This site-specific Emergency Response (Contingency) Plan describes your facility's plan for dealing with reportable discharges and shall be implemented immediately whenever they occur. Employees must understand their roles and responsibilities during such an emergency through on-going training and drills. For larger facilities, a more detailed plan may be substituted, but it must include all the items listed here. ***This plan shall be maintained on site for use in the event of an emergency and for inspection by the Fire Department.***

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of this facility:
☐ Bells ☐ Horns/Sirens ☒ Verbal (i.e. Shouting) ☐ Other (specify) _____

b. ☒ Evacuation map is displayed throughout the facility inc. entrances to hazmat locations.

2. a. Emergency Contacts:

Fire/Police/Ambulance ..... Phone No. **911**

California Emergency Management Agency ..... Phone No. **(800) 852-7550**

b. Post-Incident Contacts:

Fire Department Fire and Environmental Protection Division ..... Phone No. **(650) 903-6378**

California Department of Toxic Substance Control (DTSC) ..... Phone No. **(800) 728-6942**

Santa Clara County Department of Environmental Health ..... Phone No. **(408) 918-3400**

Cal-OSHA Division of Occupational Safety and Health ..... Phone No. **(650) 573-3812**

Bay Area Air Quality Management District ..... Phone No. **(415) 771-6000**

Regional Water Quality Control Board ..... Phone No. **(510) 622-2300**

c. Emergency Resources:

Poison Control Center ..... Phone No. **(800) 222-1222**

Nearest Hospital: El Camino Hospital Phone No. 650-940-7000

Address: 2500 Grant Road City: Mountain View

Hazwaste Cleanup Contractor: _____ Phone No. _____

Contact Name: _____ EPA ID#: _____

3. Arrangements With Emergency Responders:

If you have made arrangements with any police department, fire department, hospital, cleanup contractor, or State or local emergency response team to provide specific emergency services, describe them below:

.....

.....

4. Emergency Procedures:

Emergency Coordinator (EC) Responsibilities:

a. Whenever there is a reportable hazardous materials spill or release emergency, the EC (or his/her designee) whose name is **Minwei Sun** and job title is **Post DOC Researcher** shall:

i. Identify the character, source, amount, and aerial extent of any released hazardous materials.

ii. Assess possible hazards to human health or the environment that may result from the emergency. This assessment must consider both direct and indirect effects.

iii. Activate internal facility alarms or communication systems, where applicable, to notify all facility personnel.

Emergency Response (Contingency Plan) I
Emergency Procedures (Con't)

Facility ID:	**1032**
Updated:	**4/17/2013**

Business Name

Reservoir Engineering Research Institute

Facility Street Address

922 San Leandro Avenue Suite H

Emergency Coordinator (EC) Responsibilities (Continued):

iv. Notify appropriate local authorities *(i.e. call 911).*
v. Notify the California Emergency Management Agency at (800) 852-7550.
vi. Monitor for leaks, pressure build up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the emergency.
vii. Take all reasonable measures necessary to ensure that the emergency does not occur, reoccur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the emergency, the EC shall:
i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from the emergency at the facility.
ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the emergency until cleanup procedures are completed.
iii. Ensure that all emergency equipment is cleaned, fit for use, available for use, or properly disposed of.
iv. Notify the applicable "Post-Incident Contacts" listed in item 2.b on the previous page.

Responsibilities of Personnel **Other** Than the EC:

Function:	*Name and Job Title:*
Shutdown of Operations/Systems:	
Evacuation of Building Personnel:	
Oversight of Outside Assembly Areas:	
Medical Treatment For Injuries (First Aid, CPR, etc.):	

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials emergency that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any emergency situation which triggers implementation of this plan, a written Emergency Incident Report must be submitted to the California Department of Toxic Substances Control and the Fire and Environmental Protection Division of the Mountain View Fire Department. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and complete description of the emergency;
d. Name and quantity of the hazardous material(s) involved;
e. The extent of personal injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where applicable;
g. The estimated quantity and disposition of recovered material that resulted from the emergency;
h. The cause(s) of the emergency;
i. The actions taken in response to the emergency; and
j. Administrative or engineering controls installed to prevent such emergencies in the future.

6. Earthquake Vulnerability: [19 CCR 2731(e)]

a. **Identification** of areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to seismic activity.
b. **Inspection** of all vulnerable hazardous waste/materials areas, including any or all compressed gases and storage tank/containers. All braces, chains and supporting anchors that secure hazardous waste/materials will be inspected for integrity breach.
c. **Isolation** of compressed gases that are incompatible will be segregated to prevent hazard of commingling other chemicals of a hazard category or incompatibility will be segregated as necessary.

7. Hazard Mitigation/Prevention/Abatement [19 CCR 2731(c)]

Describe your procedures that provide for mitigation, prevention or abatement of hazards to persons, property or the environment below:

ENVIRONMENTAL COMPLIANCE PLAN
Emergency Response (Contingency Plan) III: Emergency Training/Recordkeeping

Business Name

Reservoir Engineering Research Institute

Facility ID:	**1032**
Updated:	**4/17/2013**

Facility Street Address

922 San Leandro Avenue Suite H

Indicate below the training provided for all new and existing (annual refresher) employees (check all that apply):
[Note: Items marked with an asterisk(*) are required]

1. Personnel are trained in the following procedures:

- ☒ Internal alarm and notification *
- ☒ Evacuation/re-entry procedures & assembly point locations *
- ☒ Emergency incident reporting
- ☒ External emergency response organization notification
- ☒ Location(s) and contents of this Emergency Response/Contingency Plan *
- ☒ Facility evacuation drills, which are conducted at least (specify)*Annually*

2. Chemical Handlers are additionally trained in the following:

- ☒ Safe methods for handling and storage of hazardous materials *
- ☒ Location(s) and proper use of fire and spill control equipment *
- ☒ Spill procedures/emergency procedures
- ☒ Proper use of personal protective equipment *
- ☒ Specific hazard(s) of each chemical to which they may be exposed, inc. routes of exposure *
- ☐ Hazwaste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.

3. Emergency Response Team Members are capable of and engaged in the following:

- ☒ Personnel rescue procedures
- ☒ Shutdown of operations
- ☒ Liaison with responding agencies
- ☐ Use, maintenance and replacement of emergency response equipment
- ☐ Refresher training, which is provided at least annually
- ☐ Emergency response drills, which are conducted at least (specify)

4. The following **records** are maintained by this facility:

- ☒ Current employees' training records (retained until closure of the facility) *
- ☒ Former employees' training records (retained at least 3 years after employee termination) *
- ☒ Training program(s) (i.e. written description of introductory and continuing training) *
- ☒ Current copy of this Emergency Response/Contingency Plan *
- ☒ Written record of recordable/reportable hazardous material/waste releases *
- ☒ Written record of hazardous material/waste storage area inspections *
- ☒ Written record of hazardous waste tank daily inspections *
- ☐ Description and documentation of facility emergency response drills

OFFICIAL NOTICE OF INSPECTION

Facility Name: Reservoir Engineering Research Institute			Inspection Date: 6/1/06
Site Address: 922 San Leandro Ave Ste H M V			Employee No.: 10071
Contact Person(s): Meang Noh (Researcher)			Samples Taken? ☐ Yes ☒ No Photographs Taken? ☐ Yes ☒ No
Inspection Type:	☐ Hazardous Materials ☒ Hazardous Waste ☐ Tiered Permit	☐ Toxic Gas ☐ Cal-Accidental Release Prevention Program ☐ Other	Hazardous Waste Generator Type: ☐ < 1,000 Kg./mo. ☐ ≥ 1,000 Kg./mo. ☐ CESQG ☒ Satellite Only

VIOLATIONS: Codes noted below in the "Violation Code" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time.

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
	Conducted a hazardous waste routine inspection on this date with Mr. Noh's consent and the following violations were noted:	
2201	Observed several paper towels that were contaminated with a solvent material that were inside a can there were also other paper towels that were contaminated with resengrease oil and some ethanol. Make a hazardous waste determination on this paper towels by either having them tested by a Registed Environmental Lab for toxicity or by using generator knowledge and manage them as hazardous waste. Manage this waste accordingly.	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25187.8 of the State Health and Safety Code (H&SC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to this Department within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. *(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)*

Received by: _____ Inspected by: _____ Entered by: 10071

Certification: I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator: _____ Title: _____ Date: / /

FACILITY SENDS YELLOW COPY TO AGENCY, KEEPS PINK COPY.

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

Hazardous Waste Violations

- **Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.**
- **Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

OFFICIAL NOTICE OF INSPECTION

(Continuation Page)

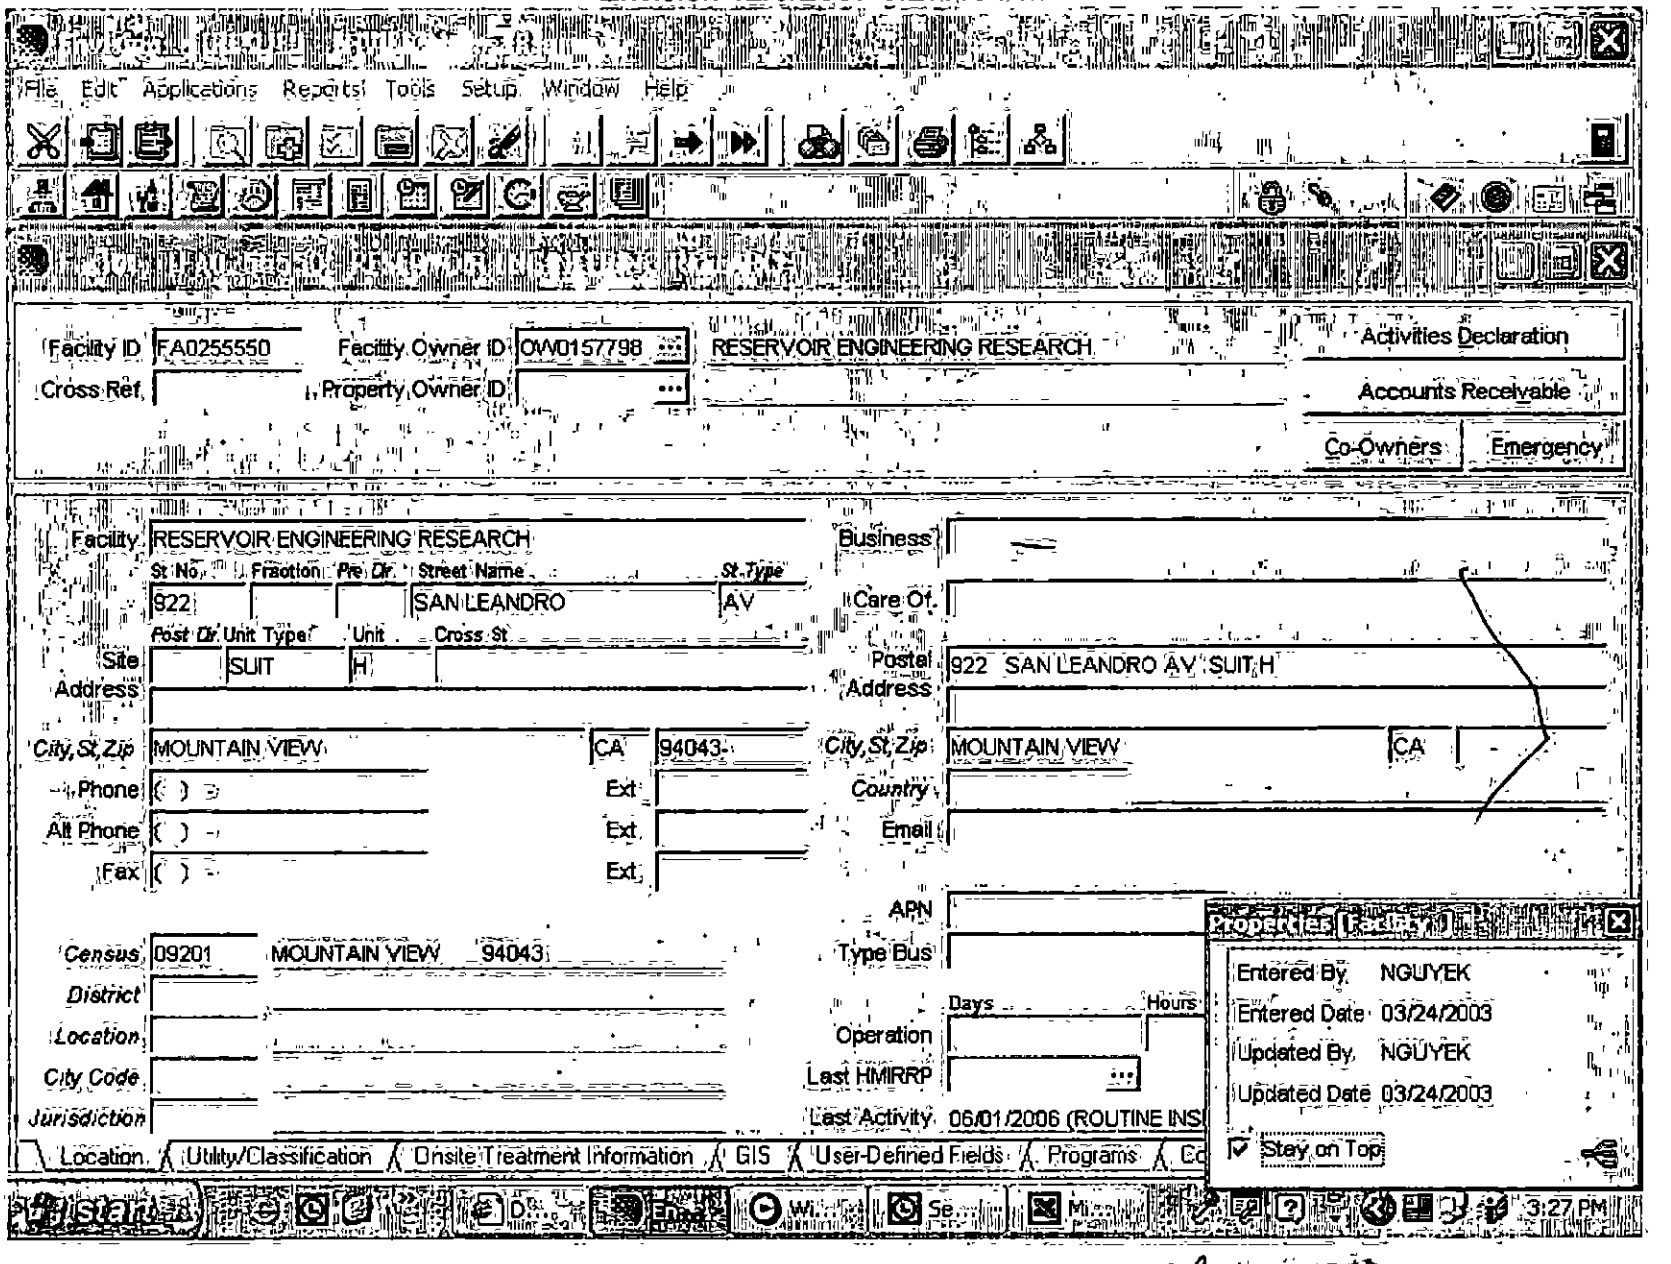

Facility Name: Reservoir Engineering Research Institute **Inspection Date:** 6/1/06

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
2206	Observed 1x 5 gal carboy storing a mixture of liquid hydrocarbon, ethanol, water waste and 2x 1 gal containers storing liquid hydrocarbon waste. All of these containers were missing the accumulation start date on the hazardous waste label and hazardous properties. Complete label as required on the checklist (see attached). Labels were provided.	
2212	Observed can oil spill inside a flammable cabinet, in addition there were several containers inside the same cabinet that were storing reservoir oil that had no labels and according to Mr. Noh these containers have been inside this cabinet since he has been here, he has never used them. Mr. Noh has been working at this facility for 2 years. Clean-up spill immediately and manage spill waste accordingly. In addition, under Retrograde materials you have a year to dispose of materials from when you (generator) determines them to be a hazardous waste. Make a determination on the reservoir oil containers and dispose of them as hazardous waste in order to prevent any other oil spills from happening. A facility must operate in a way that minimizes a hazard to public health & the environment.

VIOLATIONS: Codes noted below in the "Violation Code" column represent specific violations of State law and/or local ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any subsequent action by this Department or other agencies. This facility may be subject to reinspection at any time.

Reviewed By: [signature] 6/23/06
Date

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
	Conducted a hazardous waste routine inspection on this date with Mr. Noh's consent and the following violation were noted:	
22201	Observed several paper towels that were contaminated with a solvent material that were inside a can where were also other paper towels that were contaminated with resonor oil and some ethanol. Make a hazardous waste determination on this paper towels, by either having them tested by a Registered Environmental Lab for toxicity or by using generator knowledge and manage them as hazardous waste. Manage this waste accordingly.	From now on, you will consider chemical soiled paper towel as hazardous waste and dispose them properly.

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25187.8 of the State Health and Safety Code (H&SC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to this Department within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. *(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)*

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

Summary of Violations & Notice to Comply

Program: PR0373220 - HAZARDOUS WASTE GENERATOR - 2240
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION** Facility failed to determine whether a waste is a hazardous waste and/or keep copies of test results, waste analyses or other hazardous waste determination records. ***Facility manages waste Acetone, Toluene and other solvent wipes to the trash. To be excluded from hazardous waste requirements, these solvent contaminated wipes managed at the municipal landfill must be stored in closed labeled containers prior to disposal. Label the container "excluded solvent contaminated wipes."*** RETRACTED EXCLUSION VIA EMAIL 5/7/15 ***Note: saturated wipes or wipes containing free liquids must be managed as hazardous waste.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.dhs.ca.gov/ps/ls/elap/. Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11, 66262.40(c)]	
G020	M	**MARKING OF HAZARDOUS WASTE** Facility failed to properly mark a hazardous waste tank and/or container. ***1 x 1 gallon container of waste solvent in fire cabinet is not labeled with required details.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	
G030	M	**POINT OF GENERATION ACCUMULATION** A hazardous waste container managed under point of generation accumulation rules was not at or near the point of generation and/or under the control of the operator. ***Satellite container of waste solvent has been accumulating waste longer than 1 year.*** Move the container(s) to a location that is at or near the point of generation and ensure that the waste is under the control of the operator that is generating the waste. If the above conditions cannot be met, begin managing the waste in accordance with standard hazardous waste accumulation requirements. [CCR 66262.34(e)(1)(A)]	

VC	Class	Violation	Corrective Actions Taken
G310	M	**EMERGENCY COORDINATOR** Facility failed to designate an emergency response coordinator who is either on the premises or on call with the responsibility for coordinating emergency response and reporting activities. ***Emergency Response coordinator has not been properly designated with emergency information posted.*** Designate an emergency response coordinator who is knowledgeable of the facility's emergency response procedures and reporting requirements. Ensure that the coordinator is available by phone, can reach the facility within a short period of time when necessary, and has the authority to commit the resources necessary to implement the contingency plan. [CCR 66265.55]	R101DAQLCAIIX Ver 2.01

Comments: Facility maintains active EPA ID Number - CAL000233916 and utilizes the county small business program for waste disposal.

Contact: Minwei Sun - msun@rerinst.org

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 06/05/2015, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement actior HMCD or other agencies. This facility may be subject to reinspection at any time. CA UST Inspector #8215481, Exp. 08/02/2015

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator **Date**

Printed Name of Owner/Operator **Title**

OFFICIAL NOTICE OF INSPECTION – SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC §§25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i)].

Subject: RE: Return to Compliance: Managing Towels and Wipes soiled with Listed Wastes (Acetone,Toluene, & Methylene Chloride)

Minwei - Correction to my prior Email starting with:

As I noted the day after my inspection, I made an error regarding the wipes and towels used at your facility that are soiled with spent solvents (Acetone, Toluene, & Methylene Chloride). These spent solvent wipes and rags are listed hazardous wastes under federal regulations, and the exclusion has not been adopted by California, unfortunately.

The correction is simply noted in red above.

Thanks again!

Subject: Return to Compliance: Managing Towels and Wipes soiled with Listed Wastes (Acetone,Toluene, & Methylene Chloride)

Hi Minwei,

Thank you for the follow-up to my inspection on 5/15. **One more thing needed to abate violation G010.**

As I noted the day after my inspection, I made an error regarding the wipes and towels used at your facility that are soiled with spent solvents (Acetone, Toluene, & Methylene Chloride). These spent solvent wipes and rags are listed hazardous wastes under federal regulations, and have not been adopted by California, unfortunately.

These soiled towels and wipes need to be managed as hazardous wastes and transported to the hazardous waste facility properly. So, essentially, labeling them "Excluded Solvent Contaminated Wipes" is not appropriate. You will be in compliance with the laws and regulations of hazardous waste if you label the container as Hazardous Waste, with name/address, contents, hazardous property, physical state and accumulation start date. You can use the same container (red can) you noted, just label it properly once you start to accumulate waste. Do not throw the wipes and towels with listed spent solvents to the trash/municipal landfill. For violation G010 on the report, please update your corrective actions taken and indicate the management practice you intend to begin using, i.e. store hazardous waste acetone wipes and other solvents in closed container with hazardous waste label. Your attachment "corrective actions taken" indicates you labeled it, "Excluded solvent contaminated wipes." Please follow the recommended actions above by updating this and resending to me.

Further information: The state of California has not yet adopted the federal EPA ruling I discussed yesterday that allows you to utilize the exclusion for these wastes, see also link below:

https://www.dtsc.ca.gov/HazardousWaste/ManagingTextilesHW.cfm

Let me know if you have further questions, sorry for any confusion.

Regards,

JH

Summary of Violations & Notice to Comply

Program: PR0373220 - HAZARDOUS WASTE GENERATOR - 2240
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G010	II	HAZARDOUS WASTE DETERMINATION Facility failed to determine whether a waste is a hazardous waste and/or keep copies of test results, waste analyses or other hazardous waste determination records *Facility manages waste Acetone, Toluene and other solvent wipes to the trash. To be excluded from hazardous waste requirements, these solvent contaminated wipes managed at the municipal landfill must be stored in closed labeled containers prior to disposal. Label the container "excluded solvent contaminated wipes."* *Note: saturated wipes or wipes containing free liquids must be managed as hazardous waste.* Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.dhs.ca.gov/ps/ls/elap/. Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11, 66262.40(c)]	We are using 1 Gallon red metal container labeled as "Excluded solvent contaminated wipes. Corrective actions taken 5/21 - MS Above label is replaced with hazardous waste label
G020	M	MARKING OF HAZARDOUS WASTE Facility failed to properly mark a hazardous waste tank and/or container. *1 x 1 gallon container of waste solvent in fire cabinet is not labeled with required details.* Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE," the accumulation start date, the name and address of the generator, and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	All waste bottles are properly labeled.
G030	M	POINT OF GENERATION ACCUMULATION A hazardous waste container managed under point of generation accumulation rules was not at or near the point of generation and/or under the control of the operator. *Satellite container of waste solvent has been accumulating waste longer than 1 year.* Move the container(s) to a location that is at or near the point of generation and ensure that the waste is under the control of the operator that is generating the waste. If the above conditions cannot be met, begin managing the waste in accordance with standard hazardous waste accumulation requirements. [CCR 66262.34(e)(1)(A)]	We'll send wastes to recycling and disposal program once a year.

VC	Class	Violation	Corrective Actions Taken
G310	M	EMERGENCY COORDINATOR Facility failed to designate an emergency response coordinator who is either on the premises or on call with the responsibility for coordinating emergency response and reporting activities ***Emergency Response coordinator has not been properly designated with emergency information posted.*** Designate an emergency response coordinator who is knowledgeable of the facility's emergency response procedures and reporting requirements. Ensure that the coordinator is available by phone, can reach the facility within a short period of time when necessary, and has the authority to commit the resources necessary to implement the contingency plan. [CCR 66265.55]	We have assigned Minwei Sun as Emergency response coordinator with information posted.

Comments: Facility maintains active EPA ID Number - CAL000233916 and utilizes the county small business program for waste disposal.

Contact: Minwei Sun - msun@rerinst.org

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 06/05/2015, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement actior HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25165(c), 25187.6, 25404.1.2(c)]

Public Records Request Number: PR2-020123-02

Location: 922, 924, 926, 928, 930, 932, 934, 936, 938, 940, 942, 944, and 950 San Leandro Street, Mountain View, CA 94043
917 and 939 San Rafael Avenue, Mountain View, 94043

Dear Ms. Jansen:

We have received your Public Records Act Request at the Department of Toxic Substances Control (DTSC). Upon thorough review of our files, we found no records pertaining to the site(s) referenced above.

For information regarding public reports on hazardous waste shipments of generators, transporters, and TSDFs, you can access our Hazardous Waste Tracking System (HWTS) online at: https://hwts.dtsc.ca.gov/. Select the "Reports" tab for search options. If you are interested in retrieving detailed reports, please contact the HWTS unit via e-mail: hwtsreports@dtsc.ca.gov or phone: 1-800-618-6942. Customized reports may require a fee. For copies of manifests, please send an e-mail to mcr@dtsc.ca.gov.

In addition, the DTSC provides access to public records online via EnviroStor; another data management system that tracks our efforts in cleanup, permitting, enforcement, and investigation of known/suspected hazardous waste sites and facilities. The available data is updated in real-time. You can access Envirostor online at www.envirostor.dtsc.ca.gov. Navigate the website easily by clicking the "How to Use EnviroStor" tab, then selecting the option "Take a Tour."

If you have any questions or would like further information regarding your request, please contact me via phone: 510-540-3800 or e-mail: Berkeleyfileroom@dtsc.ca.gov.

Best regards,

To: Sandahl, Carrie
Cc: Mauri, Patrick
Subject: Re: Finity Labs Processes

Carrie,

Since we have not used any of the metal finishing processes for quite some time and we don't have any known projects that will need it in the future, we have decided to remove all of the processes and chemicals needed from the facility. We will not perform any of the related activities and will have the materials removed from the facility before the end of the calendar year.

Since Patrick is also copied on this message, I will advise that we also plan to remove the high pressure process gases from the facility. My hope is that this additional removal will put us below the thresholds required for the Hazmat Storage Permit. I will update our quantities after this removal is completed.

Sincerely,

- Mike Iimura
Finity Laboratories

> Hi Michael-
>
> Thank you for taking the time to meet with me last week. As we discussed, if Finity Labs will need to make a decision as to whether or not to perform metal finishing activities in-house or not. A summary of the options we discussed are below:
>
> 1) If Finity Labs would like to undertake either of the metal finishing activities discussed – the facility will need to be issued a wastewater discharge permit from the City of Mountain View before the activity commences.
>
> 2) If Finity Labs chooses to perform the metal finishing activities and discharge the rinse water to the sanitary sewer- self-monitoring of the rinse water will be required on an at-least semi-annual basis.
>
> 3) If Finity Labs chooses to perform the metal finishing activity and collect and haul all wastewater generated from the activity, the site would be considered a 'zero-discharge' facility and self-monitoring would not be required after an initial inspection to verify the zero-discharge status has been performed.
>
> 4) Finity Labs can have the metal finishing activities performed by an outside vendor and remove the chemistry associated with metal finishing and no wastewater discharge permit would be required. This option would also have the benefit of reducing the facility's hazardous materials bill. As is- the facility has very low volumes of haz-mat, and if it

could reduce the quantities below 10 gallons, Finity Labs would be exempt from the haz-mat program entirely.

Please let me know by Friday September 23, 2016 how Finity Labs intends to proceed. In the meantime, if I can be of any assistance, please feel free to contact me.

CLOSURE APPLICATION FOR ABOVEGROUND HAZARDOUS MATERIALS STORAGE FACILITIES

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction

Please complete and submit this form prior to the closure of any aboveground hazardous materials storage system or facility. Based on the information submitted below, and the complexity of the closure, a written Closure Plan may be required (see guidelines).

1. Facility Information: *(Note: Print or type all information.)*

Facility Name: Finity Laboratories Facility Phone: ( )

Site Address: 922 San Leandro Ave. #D

City: Mountain View State: CA Zip: 94043

Contact Name: Szu-Yu Lin Contact Phone: (669) 609-3784

Forwarding Address: 3123 W MacArthur Blvd

City: Santa Ana State: CA Zip: 92704 Phone No.: (714) 897-3978

Property Owner Name: Mountain View Industrial Associates / Edith Hugo

Property Owner Mailing Address: 61020 E Amur Lane
If different from site address

City: Oracle State: AZ Zip: 85623 Phone No.: (310) 713-7217

2. Closure Information:

☑ Full Facility Closure ☐ Partial Facility Closure/Remodel | Proposed Date of Closure: 10 / 31 / 2022

Briefly describe the proposed closure activity. Indicate the previous use(s) of the area(s) intended to be closed and the types of chemicals used or stored in the area(s) (i.e. by submitting a copy of the Inventory Statements from your Hazardous Materials Business Plan, etc.). Include equipment, tanks, piping, exhaust and treatment systems, and the proposed final disposition of any hazardous materials and/or wastes. Attach additional pages if necessary.

Compressed gases were returned to vendor (Praxair).

Other hazardous materials were hauled by Clean Harbors.

Prior Inventory is attached.

ENVIRONMENTAL COMPLIANCE PLAN
Certification Form

Facility ID:	1643
Updated:	4/19/2012

Business Name
Finity Laboratories

Facility Street Address
922 San Leandro Avenue Suite D&E

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the above facility:

I certify that: (Check the appropriate box.)

☒ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

☐ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator *(Print)*: WAI-HON LEE Title: PRESIDENT

Signature: Wai Hon Lee Date: 4/15/2013

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

ENVIRONMENTAL COMPLIANCE PLAN
Certification Form

Facility ID:	1643
Updated:	7/15/2011

Business Name
Finity Laboratories

Facility Street Address
922 San Leandro Avenue Suite D&E

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the above facility:

I certify that: (Check the appropriate box.)

☒ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

☐ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator *(Print)*: WAI-HON LEE Title: PRESIDENT

Signature: [signature] Date: 4/16/12

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

CITY OF MOUNTAIN VIEW
FIRE DEPARTMENT

EMERGENCY RESPONSE PLAN
Section I: Evacuation Procedures

This emergency response plan describes the personnel, procedures, and equipment your facility has available to respond to a release or threatened release of the hazardous materials you store or use. This plan is for the protection of your and your employees. For small facilities, this plan may be sufficient to adequately address all your emergency response concerns. For larger or more complex facilities, supplemental and detailed emergency response information should be maintained on site and be available for review by the Fire Department.

1. *By which method(s) is the Emergency Coordinator (EC) at your facility notified that an emergency (i.e., an actual or threatened hazardous materials release) is taking place? (Check applicable items.)*

☐ Alarms: Name of Manufacturer _____
Last Test Date _____ Test Frequency _____
☐ Horns: Last Test Date _____ Test Frequency _____
☐ Emergency Phone Number: Number _____
☒ Shouting
☐ Other _____

2. *Once the EC has been notified of an emergency situation, what outside agencies does he/she notify? (Check applicable items.)*

☒ Agency: ***FIRE DEPARTMENT*** Phone ***9 1 1***
☐ Agency: ***State Office of Emergency Services*** Phone ***1-800-852-7550***
☐ Agency: _____ Phone _____
☐ Agency: _____ Phone _____

3. *Indicate the extent of your evacuation pre-planning. (Check applicable items.)*

☒ Immediate area evacuation routes defined and procedures developed.
☐ Entire building evacuation procedures developed.
☐ Assembly areas pre-planned.
☐ Evacuation maps posted.
☐ Other: _____

4. *Should personnel be injured during the emergency, your facility must have a nearby clinic/hospital available for treatment:*

Medical Facility Name Sunnyvale Medical Clinic
Medical Facility Address 720 Condon St. Sunnyvale 94086
Medical Facility Phone Number (24-hour) 408 738-1151
Approximate Distance to Medical Facility 2 miles

EMERGENCY RESPONSE PLAN
Section II: Spill Control / Mitigation Equipment

INSTRUCTIONS: In the blank form provided describe the safety, spill reponse, and communication equipment you have in place at your facility for use in emergency situations. If practical, report the equipment according to individual job, shop, or work activity area within you facility. If applicable, include the elements listed in legend.

PERSONAL PROTECTIVE AND SAFETY EQUIPMENT

- Aprons
- Gloves
- Coats
- Chemical Suits
- Boots
- Safety Glasses
- Faceshield
- Hard Hats
- Cartridge Respirators
- Self Contained Breathing Apparatus (SCBA)
- First Aid Kits
- Exhaust Hood/Vapor Scrubbers
- First Aid Stations
- Chemical Antidotes
- Eye Wash/Safety Shower

SPILL CONTROL/MONITORING EQUIPMENT

- Fire Blankets
- Fire Extinguishers (Type A, B, C, and D)
- Fire Hoses
- Chemical Vapor Monitoring Equipment (Type)
- Spill Cart
- Chemical Absorbents
- Neutralizers
- Sand
- Leak Repair Kits (Chlorine)
- Underground Tank Leak Detection Monitors
- Overpak Drums
- Plugging/Diking Materials
- Pumps

COMMUNICATIONS EQUIPMENT

- Pager
- Telephones
- Intercoms
- Portable Radio(s)
- Verbal

EMERGENCY RESPONSE PLAN

Section III: Emergency Response Training Program

1. PERSON RESPONSIBLE FOR EMERGENCY RESPONSE TRAINING PROGRAM:

Name [illegible] Title [illegible] Phone [illegible]

2. TRAINING REQUIREMENTS (Check all applicable items.)

All employees are trained in the following procedures:

- [X] Notification of emergency response coordinator
- [ ] Notification of external emergency response organizations (e.g. Fire Department)
- [ ] Location and content of emergency response plan
- [ ] Evacuation

Chemical handlers are additionally trained in the following:

- [ ] Safe methods for handling and storage of hazardous materials
- [X] Proper use of personal protection equipment
- [X] Locations and proper use of fire and spill control equipment
- [ ] Specific hazards of each chemical to which they may be exposed, including the pathways of exposure (i.e., skin absorption, inhalation, ingestion)

Emergency response team members are additionally trained in the following procedures:

- [ ] Shutdown of operations
- [ ] Use, maintenance, and replacement of emergency response equipment

- [ ] ALL PERSONNEL RECEIVE APPROPRIATE EMERGENCY RESPONSE TRAINING WITHIN SIX MONTHS OF HIRING
- [ ] REFRESHER TRAINING IS PROVIDED AT LEAST ANNUALLY

3. PERSONNEL TRAINING RECORDS

The following training records are maintained for each employee:

- [ ] Type and amount of introductory and continuing training
- [ ] Date that training was completed
- [ ] Description of facility emergency reponse drills
- [ ] Former employees' training records are retained for at least three years

Your Emergency Response Plan must be on-site and available for review by the Fire Department.

This notice is intended to require a reasonable degree of fire and life safety. Due to access difficulties, some areas or rooms may not have been inspected. This does not absolve the responsible party(ies) from compliance with the law. All sections reference the 2013 California Fire Code/ 2012 International Fire Code (CFC/IFC) unless otherwise indicated:

(EXTERIOR)

- ☐ (34.2) Key box required—Contact FEPD for application. **Sec. 506**
- ☐ (1.1) Provide visible address/unit numbers in contrasting background minimum 6" size. **MVCC Chapter 14**
- ☐ (14.13) Dumpsters exceeding **40 cubic feet**: Keep **5'** from walls or openings. **Sec. 304.3.3**
- ☐ (43.2) Secure pool area with fence/self-closing/self-latching gate. **CBC Sec. 3109.4.1.7**
- ☐ (14.4) Remove excess combustibles away from structure or property line **Sec. 304**
- ☐ (1.2) Maintain fire lane. Clear width 20'/height 13'6" **Sec. 503**
- ☐ (42.1) Vehicle impact protection required for gas meters/piping **Sec. 603.9**
- ☐ (12.2) Remove storage from beneath stairs. **CBC Sec. 1009.9.4**

(FIRE PROTECTION EQUIPMENT)

- ☐ (41.3) On-site Hydrants. Maintain in operative condition. **Sec. 507.5.2**
- ☐ (4.1) FDC. Replace caps, repair swivel, provide inlet gasket/(4.7), install address sign—all-weather sign with minimum 48 font. **Sec. 901.6**
- ☐ (3.9) Spare sprinkler box: Provide wrench/spare heads. **NFPA 25 Sec. 2-4**
- ☐ (6.2) PIV: Provide handle, secure handle, lock open/(6.4) Install address sign—all-weather sign with 48 font. **509.1, 509.2**
- ☐ (3.1) Remove (ropes, wires, cables, flags, banners) from fire sprinkler piping. **Sec. 901.6.1**
- ☐ (3.2) Replace damaged/corroded/painted sprinklers. **NFPA 25, Sec. 5.2.1.1.2**
- ☐ (5.10) System riser location: Provide ID sign on door if enclosed. **Sec. 509.1; Last 5-Year Certificate Date** _____
- ☐ (4.3) Provide 3' clearance FDC/PIV/Hydrant. **Sec. 507.5.5**
- ☐ (3.11) Sprinklers missing in the following areas. _____ **Sec. 901.6**
- ☐ (3.3) Replace missing sprinkler escutcheons. **Sec. 901.4**
- ☐ (3.4) Provide listed sprinkler guard. **NFPA 13, Sec. 6.2.8**

(FIRE EXTINGUISHERS—FE)

- ☐ (2.1) Install ___FE(s) with a minimum rating of 2-A:10-B:C not to exceed 50'/75' of travel. (50' travel for high-hazard occupancies) Min. 4", max. 5' above floor. **Sec. 906.9, 906.3**
- ☐ (2.5) FE shall be installed on hanger/bracket or housed in cabinet. **Sec. 906.7**
- ☐ (2.8) FE shall be service and tagged annually **Title 19;** Last Service Date: _____.
- ☐ (2.6) Provide signage to clearly identify FE, **CFC 906.6.**

(ELECTRICAL/MECHANICAL AREAS)

- ☐ (13.12) Label doors to electrical rooms **"Main Electrical." Sec. 605.3.1**
- ☐ (11.2) Patch holes in walls/ceilings inside mechanical/electrical rooms. **Sec. 703**
- ☐ (14.5) Remove storage inside mechanical/electrical rooms. **Sec. 315.3.3**
- ☐ (0.0) Label gas/electric meters to identify unit served. **Sec. 509.1.1**
- ☐ (14.7) Strap water heaters at upper and lower one-third of their dimension. **CPC Sec. 507.2**
- ☐ (13.11) Provide clearance for electrical service equipment; **30"** front, **78"** height. **Sec. 605.3**

(FIRE ALARM PANEL)

- ☐ (36.5) Provide ID sign on access door if panel concealed. **Sec. 509.1**
- ☐ (36.8) Label batteries with date installed. **Sec. 901.6**
- ☐ (36.7) Provide circuit lock for breaker **NFPA 72 Sec. 10.6.5.4**
- ☐ (36.2) Maintain system in operative condition. **Sec. 901.6**
- ☐ (36.4) Label identifying source of power/ circuit number. **NFPA 72 10.6.5.2.1**
- ☐ (36.1) Provide documentation of annual testing. **NFPA 72, Sec. 14.4.4**

(KITCHEN)

- ☐ (15.5) Provide **K**-type extinguisher within **30'** of deep-fat frying. **Sec. 904.11.5**
- ☐ (15.8) Hoods/filters/fans shall be cleaned every six months. Records shall be maintained on the premises. **Sec. 904.11.6**
- ☐ (15.4) Hood suppression systems shall be serviced every six months. **Sec. 904.11.6.2** Last Serviced: _____.
- ☐ (15.9) Maintain 16" horizontal clearance between fryer and open flame. **CMC Sec. 515.1.1.3**

(STORAGE)

- ☐ (14.2) Reduce storage **2'** from ceiling (nonsprinklered building). **Sec. 315.3.1**
- ☐ (14.16) Remove trash, lint behind soft drink/candy machines/washers and dryers.
- ☐ (14.1) Reduce storage **18"** below fire sprinkler deflector. **Sec. 315.3.1**
- ☐ (38.1) Secure gas cylinders with noncomb. straps/chains to prevent falling. **Sec. 5303.5.3**

(FIRE-RESISTIVE CONSTRUCTION)

- ☐ (44.1) Trash chute doors shall close and latch (existing fusible link not exceeding 135°). **Sec. 704.2**
- ☐ (11.4) Remove obstruction(s) from fire-resistive assemblies (fire doors, windows, fire dampers) **Sec. 703.2**
- ☐ (11.2) Repair fire-resistive construction (walls, ceilings, columns). **Sec. 703.1**
- ☐ (11.6) Provide signage for roll-down or sliding fire doors, **"FIRE DOOR DO NOT BLOCK." Sec. 703.2.1**
- ☐ (11.5) Provide written records showing annual testing of fire dampers; fusible links replaced every 4 years. **NFPA 90A Sec. 5.4.1**
- ☐ (8.8) Swinging fire doors shall close and latch. **Sec. 703.2.3**
- ☐ (8.8) Horizontal/vertical sliding and rolling fire doors shall be inspected and tested annually. Records shall be maintained and available for review. **Sec. 703.4**

(MEANS OF EGRESS)

- ☐ (8.14) Remove obstructions from path of egress. **Sec. 1030.1**
- ☐ (8.4) Exit doors shall be operable without key or special effort or knowledge. **Exception:** Key-locking hardware on main exit. Post sign: "This door to remain unlocked whenever the building is occupied." **CBC 1008.1.9**
- ☐ (8.6) Exit doors shall not be concealed with decorations, furnishings or equipment. **Sec. 1030.6**
- ☐ (8.17) Aisle width in **B, M** Occupancies: Shall not be less than **36". Sec. 1017.3**
- ☐ (12.2) Remove storage from exits or exit enclosures. **Sec. 315.3.2**
- ☐ (8.20) Maintain illuminated exit signs at all times. **Sec. 1011.3**
- ☐ (8.18) Exit signs shall be installed for each required exit. **Sec. 1011.1**
- ☐ (8.21) Emergency lighting, where provided, shall be maintained. **Sec. 1006.1**
- ☐ (8.18/8.21) Install exit sign/emergency lighting as follows: _____

(ELECTRICAL HAZARDS)

- ☐ (13.18) Abate electrical hazards identified as follows:
- ☐ (13.19) Temporary wiring shall not exceed **90** days.

Sec. 605.6 (CEC 370-25)

☐ (13.1) Discontinue use of extension cords in lieu of permanent wiring. Sec. 605.5

☐ (13.8) Exposed wire <8' above floor shall be protected. CEC, Sec. 110.27

☐ (13.17) Provide listed inserts for missing breaker(s). CEC, Sec. 312.10/408.7

(ASSEMBLY)

☐ (9.3) Assembly rooms/spaces (>49 occupants) shall have the occupant load posted. **CFC 1004.3**

☐ (39.1) Textiles (canopies, drapes) and decorative materials shall be treated and maintained fire-resistant at all times. **CFC Chapter 8**

☐ (9.2) Occ. Load ≥50, but ≤300 shall not be provided with a latch or lock unless it is panic hardware. Key-locking hardware may be installed on the main exit provided. Post sign. **"This door to remain unlocked whenever the building is occupied." Sec. 1008.1.9.3**

COMMENTS: _____

The Following Violations Have Been Observed During This Inspection:

INSPECTION COMMENTS:

- No violations observed.

FIRE CODE PROGRAM VIOLATIONS:

FC-3.1 • All compressed gas cylinders in storage and use shall be adequately secured by approved noncombustible straps, chain, wire, etc. to prevent falling or being knocked over. Provide securement for compressed gas cylinder storage meeting this requirement. (CFC§5303.5.3). Location: Lab

FC-5.8 • Maintenance and Testing. Provide annual records. Maintain records on site. (CFC§901.6). Location: Fume hood needs to be annually certified (current due date is 02/2019)

FC-13.3 • Remove extension cords that are affixed to structures, extended through walls, ceilings or floors, or under doors or floor coverings. (CFC §605.5). Location: Lab (extension cords are not meant for permanent power.

FC-38.03 • Individual containers, cylinders or packages shall be conspicuously marked or labeled in an approved manner. Label the following containers: (CFC §5003.5.1): Location: Lab samples should be labeled.

FC-38.46 • Areas where hazardous materials (including empty containers) are stored shall be neat and orderly. Improve general housekeeping. (MVCC Chapt. 24, §24.3.0.i). Location: Flammable liquid should be stored in flammable liquid storage cabinets.

HAZARDOUS MATERIALS PROGRAM VIOLATIONS:

- No violations observed.

URBAN RUNOFF PROGRAM VIOLATIONS:

- No violations observed.

****

NOTICE TO COMPLY: A reinspection shall be conducted on or after 12/7/2021. Additional inspections after the first reinspection are billed at $370.00/hour. Failure to correct the above violations may result in administrative fines, civil or criminal penalties.

Items From Previous Inspections Have Been Verified for Compliance. Only the Following Violations Remain:

FIRE CODE PROGRAM VIOLATIONS:

FC-13.1 • Remove all extension cords and flexible cords. (CFC §605.5). **Location: Remove extension cord powering Memmert Oven and other equipment throughout lab.**

FC-38.03 • Individual containers, cylinders or packages shall be conspicuously marked or labeled in an approved manner. Label the following containers: (CFC §5003.5.1): **Location: Label all hazardous waste containers including jar in fume hood and 5 gallon flammable canister. Labels should include hazardous waste accumulation dates.**

HAZARDOUS MATERIALS PROGRAM VIOLATIONS:

HMO-1010006 M • Failure to electronically update business plan within 30 days of any one of the following events:
a) A 100 percent or more increase in the quantity of a previously disclosed material.
b) Any handling of a previously undisclosed hazardous materials at or above reportable quantities.
c) A change of business address, business ownership, or business name.
d) A substantial change in the handler's operations that requires modification to any portion of the business plan.
(HSC 6.95 §25508.1(a)-(f)). **Location: Update hazardous material inventory to account for increase in flammable gases.**

****

NOTICE TO COMPLY: A reinspection shall be conducted on or after 3/22/2019. Additional inspections after the first reinspection are billed at $370.00/hour. Failure to correct the above violations may result in administrative fines, civil or criminal penalties.

Hi Patrick,

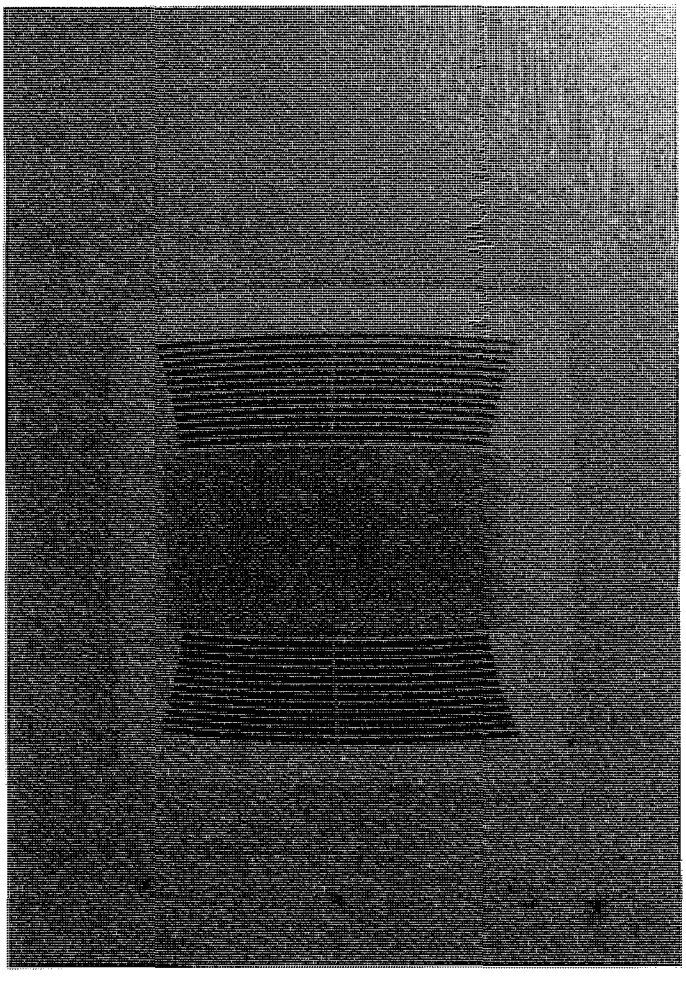

Hope you are doing great. Here are some updates in our unit.
We have reinstalled the venting fans and removed the extension cord. Please find the attached pictures of the venting fan and the new circuit cable for the fans.
Please let me know if you have any questions.

Best regards,

Minwei

Summary of Violations, Notice to Comply, Violation Code • Observations, and Required Corrective Actions	Corrective Actions Taken

FIRE CODE PROGRAM VIOLATIONS:

FC-35.1 • No building or structure shall be erected, constructed, enlarged, altered, repaired, moved, improved, removed, converted or demolished unless a separate permit for each building or structure modification has first been obtained from the building official. Contact the Building Inspection Division (650-903-6313) for plan submittal and building permit requirements for the following: (CBC §105.1): **Location: 2 fans in main lab and compressor tubing throughout shop.**

HAZARDOUS MATERIALS PROGRAM VIOLATIONS:

• All violations corrected. Thank you.

****

COMMENTS:

NOTICE TO COMPLY: Please submit a letter to this department no later than 10/26/2015 describing the actions you have taken to correct the violations listed in this inspection notice. Failure to correct the above violations may result in administrative fines, civil or criminal penalties.

Items From Previous Inspections Have Been Verified for Compliance. Only the Following Violations Remain:

FIRE CODE PROGRAM VIOLATIONS:

FC-0 • Chemical fume hoods shall be certified at least annually. **Location: Certify fume hood.**

FC-3.1 • Remove obstructions, decorations or other items attached to or interfering with the sprinkler, smoke detection, or heat detection system. (CFC §901.6, NFPA 25 §5.2). **Location: Compressed air lines.**

FC-13.1 • Remove all extension cords and flexible cords. (CFC §605.5). **Location: Throughout unit.**

FC-35.1 • No building or structure shall be erected, constructed, enlarged, altered, repaired, moved, improved, removed, converted or demolished unless a separate permit for each building or structure modification has first been obtained from the building official. Contact the Building Inspection Division (650-903-6313) for plan submittal and building permit requirements for the following: (CBC §105.1): **Location: 2 fans in main lab and compressor tubing throughout shop.**

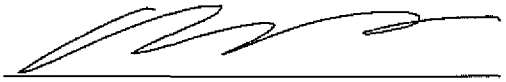

HAZARDOUS MATERIALS PROGRAM VIOLATIONS:

HMO-20.1 M • Materials that in combination may cause a fire or explosion, or the production of a flammable, toxic, or poisonous gas, or the deterioration of primary or secondary container shall be separated in both the primary and secondary containment so as to avoid intermixing. Separation shall be accomplished by one of the following:
a) separation of at least 20 feet and independent secondary containment systems;
b) providing independent secondary containment systems which isolate all possible spillage;
c) installing a noncombustible partition extending not less than 18 inches above and to the sides of the stored material;
d) storing in approved safety storage cabinets, or
e) storing compressed gases in exhausted enclosures.
Organize storage based on compatible hazard classes. Provide separation of incompatible hazard classes. (MVCC Chapt. 24, §24.3.0.r). **Location: Separate corrosives from organic solvents and crude oil.**

ENVIRONMENTAL COMPLIANCE PLAN
Emergency Response (Contingency Plan) I: Emergency Procedures

Facility ID 1378
Updated 7/5/97

Business Name
Marshall's Flavor House

Facility Street Address
922 San Leandro Avenue Unit K

Emergency response to hazardous materials spills or releases is the responsibility of the ***business owner.*** The role of the Fire Department is to provide ***assistance*** to your primary response actions. This site-specific Emergency Response (Contingency) Plan describes your facility's plan for dealing with reportable discharges and shall be implemented immediately whenever they occur. Employees must understand their roles and responsibilities during such an emergency through on-going training and drills. For larger facilities, a more detailed plan may be substituted, but it must include all the items listed here. ***This plan shall be maintained on site for use in the event of an emergency and for inspection by the Fire Department.***

1. Evacuation Plan:

The following alarm signal(s) will be used to begin evacuation of this facility:

☐ Bells ☐ Horns/Sirens ☑ Verbal (i.e. shouting) ☐ Other: .....

☐ Evacuation maps are displayed throughout the facility, including entrances to hazardous materials locations.

2. a. Emergency Contacts:

Fire/Police/Ambulance .....Phone No. **911**
State Office of Emergency Services.....Phone No. **(800) 852-7550**

b. Post-Incident Contacts:

Fire Department Environmental Safety Division .....Phone No. **(650) 903-6378**
California EPA Department of Toxic Substances Control.....Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health.....Phone No. **(415) 557-1677**
Bay Area Air Quality Management District .....Phone No. **(415) 771-6000**
Regional Water Quality Control Board .....Phone No. **(510) 286-1255**

c. Emergency Resources:

Poison Control Center.....Phone No. **(800) 876-4766**
Nearest Hospital: El Camino Hospital Phone No.: 650-940-7000
Address: 2500 Grant Road City: Mountain View
HazWaste Cleanup Contractor: ..... Phone No.: .....
Contact Name: ..... EPA ID#: .....

3. Arrangements With Emergency Responders:

If you have made arrangements with any police department, fire department, hospital, cleanup contractor, or State or local emergency response team to provide specific emergency services, describe them below:

.....

.....

4. Emergency Procedures:

Emergency Coordinator (EC) Responsibilities:

a. Whenever there is a reportable hazardous materials spill or release emergency, the EC (or his/her designee) whose name is John Marshall and job title is General Manager shall:

i. Identify the character, source, amount, and aerial extent of any released hazardous materials.

ii. Assess possible hazards to human health or the environment that may result from the emergency. This assessment must consider both direct and indirect effects.

CITY OF MOUNTAIN VIEW
ENVIRONMENTAL SAFETY DIVISION
1000 VILLA STREET, MOUNTAIN VIEW, CA 94041 • 415-903-6378

Facility ID 1378
Updated 4/21/97

Business Name
Marshall's Flavor House

Facility Street Address
922-K San Leandro Avenue

Emergency Coordinator (EC) Responsibilities (Continued):

iii. Activate internal facility alarms or communication systems, where applicable, to notify all facility personnel.
iv. Notify and act as a liasion with the "Emergency Contacts" listed in item 2.a on the previous page.
v. Monitor for leaks, pressure build up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the emergency.
vi. Take all reasonable measures necessary to ensure that the emergency does not occur, reoccur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the emergency, the EC shall:
i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from the emergency at the facility.
ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the emergency until cleanup procedures are completed.
iii. Ensure that all emergency equipment is cleaned, fit for use, available for use, or properly disposed of.
iv. Notify the applicable "Post-Incident Contacts" listed in item 2.b on the previous page.

Responsibilities of Personnel Other Than the EC:

Function:	*Name and Job Title:*
Shutdown of Operations/Systems:	.....
Evacuation of Building Personnel:	.....
Oversight of Outside Assembly Areas:	.....
Medical Treatment For Injuries (First Aid, CPR, etc.):	.....

6. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials emergency that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any emergency situation which triggers implementation of this plan, a written Emergency Incident Report must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control and the Environmental Safety Division of the Mountain View Fire Department. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and complete description of the emergency;
d. Name and quantity of the hazardous material(s) involved;
e. The extent of personal injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where applicable;
g. The estimated quantity and disposition of recovered material that resulted from the emergency;
h. The cause(s) of the emergency;
i. The actions taken in response to the emergency; and
j. Administrative or engineering controls installed to prevent such emergencies in the future.

ENVIRONMENTAL COMPLIANCE PLAN
Emergency Response (Contingency Plan) III: Emergency Training/Recordkeeping

Facility ID 1378
Updated 4/21/97

Business Name
Marshall's Flavor House

Facility Street Address
922-K San Leandro Avenue

Personnel are trained in the following procedures:

- [√] Internal alarm/notification
- [√] Evacuation/re-entry procedures & assembly point locations
- [ ] Emergency incident reporting
- [ ] External emergency response organization notification
- [√] Location(s) and contents of this Emergency Response/Contingency Plan
- [√] Facility evaucation drills, which are conducted at least *every 6 months*

Chemical Handlers are additionally trained in the followng:

- [√] Safe methods for handling and storage of hazardous materials
- [ ] Location(s) and proper use of fire and spill control equipment
- [ ] Spill clean-up procedures/emergency procedures
- [√] Proper use of personal protective equipment
- [√] Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i.e. inhalation, ingestion, etc.)

- [ ] Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation dates, storage area inspections, labeling, manifesting, etc.)*

Emergency Response Team Members are capable of and engaged in the following:

- [ ] Personnel rescue procedures
- [√] Shutdown of operations
- [ ] Liaison with responding agencies
- [ ] Use, maintenance, and replacement of emergency response equipment
- [ ] Refresher training, which is provided at least annually
- [√] Emergency response drills, which are conducted at least *every 6 months*

The following **records** are maintained by this facility:

- [ ] Current employees' training records (to be retained until facility closure)
- [ ] Former employees' training records (to be retained at least 3 years after employment termination)
- [ ] Training Program(s) (i.e. written description of introductory and continuing training)
- [√] Current copy of this Emergency Response/Contingency Plan
- [ ] Record of recordable/reportable hazardous material/waste releases
- [ ] Record of hazardous material/waste storage area inspections
- [ ] Record of hazardous waste tank daily inspections
- [ ] Description and documentation of facility emergency response drills

___ Clarification/amendment of your Environmental Compliance Plan (ECP) is required. Refer to the indicated items and comments listed below:
___Permit application is denied. (Sec. 24.7.0.f) See attached letter.
___Business Owner/Operator identification is incomplete/incorrect. (Sec 24.4.0.b.1)
___Facility Map is incomplete/incorrect. (Sec. 24.4.0.b.2)
___Hazardous Materials Inventory Statement is incomplete/incorrect. (Sec. 24.4.0.b.3)
___Emergency Response Plans are incomplete/incorrect. (Sec. 24.4.3)
___Material Safety Data Sheets (MSDS) are required. (Sec. 24.3.6)
___A Closure Plan is required 30 days prior to moving. Complete the enclosed plan. (Sec. 24.7.2)
Based on increase of flammable gas inventory.

___ An error was found in your favor on your Fee Worksheet. You have a credit towards the _____ year. Paid: $_____ Owed: $_____. CREDIT BALANCE: $_____

✓ Hazardous materials inventory was updated ~~during the inspection~~ per your ECP dated of 3/27/13 to include materials previously not reported or under-reported. Additional fees are due for these materials (see attached). (Sec. 24.4.0.b.3). Paid: $894.00 Owed: $1126.00. BALANCE DUE: $232.00

Due to your lateness in filing, delinquent fees (double permit fees) of $_____ are now owed for the 20_____ year. (Sec. 24.7.3.a). BALANCE DUE: $_____

___ An error was found on the Fee Worksheet. $_____ is still owed to complete your application (see attached). (Sec. 24.7.3). Paid: $_____ Owed: $_____ BALANCE DUE: $_____

___ Hazardous materials / underground tank / toxic gas / fire code inspections were conducted on _____. Inspections after the second inspection are billed at $321.00/hour, one hour minimum. Additional reinspection fees of $_____ are now due. (Fee Res. 7/09). BALANCE DUE: $

(Over)

Recycled Paper

____ Data entry for updates to your ECP exceeded 2 hours. Time exceeding 2 hours is billed at $92.00/hr. Total Time: _____ hours – 2 hours = _____ hours X $92.00/hr = _____. Additional fees of $_____ are now due. (Fee Res. 7/08). BALANCE DUE: $_____

____ Underground storage tank closures are allotted 2 hours for the first tank, which is billed at a flat rate of $205.00 Any additional tank closure is allotted one hour, and billed at a flat rate of $102.00 per tank . Each additionally required hour is billed at $102.00/hour.
Total Time: _____ hours – _____ total hours allotted = _____ hours x $102.00/hr = _____.
Additional fees of $_____ are now due. (Fee Res. 7/12).
BALANCE DUE: $_____

Plan check review of the following project exceeded 2 hours:
Time exceeding 2 hours is billed at $98.00/hr. Total Time: _____ hours – 2 hours = _____ hours X $98.00/hr = _____. Additional fees of $_____ are now due (Fee Res. 7/09)
BALANCE DUE: $_____

____ Preventable false alarms occurring on: _____
Billing is as follows: 3rd and subsequent alarms occurring within 180 days: $134.00 per alarm event.
Additional fees of $_____ are now due. (Fee Res. 07/09).
BALANCE DUE: $_____

____ Fire protection system maintenance test results submitted after 30 days:

__ 6 month engineered system:	$96.00
__ Annual fire alarm system test:	$196.00
__ Annual private hydrant test:	$196.00
__ Annual fire pump test:	$196.00
__ 5 Year sprinkler test:	$293.00
__ 5 Year private hydrant test:	$293.00
__ 5 Year standpipe test:	$293.00
__ Failure to correct deficiencies within 30 days:...	$149.00 (Fee Res. 7/09).

BALANCE DUE: $_____

TOTAL DUE: $ 232.00

Thank you for your prompt attention to these matters.

ENVIRONMENTAL COMPLIANCE PLAN
Certification Form

Facility ID:	1032
Updated:	4/6/2012

Business Name

Reservoir Engineering Research Institute

Facility Street Address

922 San Leandro Avenue Suite H

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the above facility:

I certify that: (Check the appropriate box.)

X . have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form. Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

.visions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator *(Print)*: ABBAS FIROUZABAD Title: DIRECTOR

Signature: ABBAS FIROUZABAD Date: MAR 27, 2013

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

ENVIRONMENTAL COMPLIANCE PLAN
Certification Form

Facility ID:	1032
Updated:	7/18/2011

Business Name
Reservoir Engineering Research Institute

Facility Street Address
922 San Leandro Avenue Suite H

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the above facility:

I certify that: (Check the appropriate box.)

☒ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

☐ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator *(Print)*: ABBAS AFROOZABADI Title: DIRECTOR

Signature: Afroozy Date: MARCH 28, 2012

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

HAZARDOUS MATERIALS FACILITY CLOSURE
(Updated 8/98)

Please complete and return the following closure application. Enter "N/A" for any items that do not apply to your situation. After all hazardous materials are removed, call us at the above number to schedule a final walk-through inspection.

Fac ID: 1168 County Acct. ID#: ____

Business Name: ARMA Hall Facility Address: 922 San Leandro Ln

Proposed Date of Closure: Unknown

1) Disposition of all hazardous materials (excluding waste):

☐ Returned to supplier/manufacturer. (List chemicals and suppliers on back)

☒ Moved to new location. (List chemicals on back).

New facility address: Santa Rosa

2) Company removing all hazardous wastes: N/A

Name: _____ Address: _____

EPA ID#: _____

TS & D Facility: _____

EPA ID#: _____

Are all hazardous waste manifests or bills of lading showing proof of transport attached? _____

3) If removing any underground structures (storage tanks, sumps, oil/water separators, etc.) have you submitted a separate "Underground Tank Removal" application? N/A

(Over)

Recycled Paper

I hereby certify that the above information is correct and all hazardous or other regulated materials have been properly removed from the premises:

Name (Signature) _____ Date _____

Name (Printed) _____ Title _____

I have been made aware that the above-named company has vacated the premises:

Property Owner Signature (Required) _____ Date _____

Anthony Ghiossi
Building Department
City of Mountain View
500 Castro Street
Mountain View, CA 94043

RE: Unit J
922 San Leandro Avenue

Dear Mr. Ghiossi,

This letter will confirm that we are replacing the existing air conditioning unit on the roof of this space. The existing unit is a Carrier Model #48DP008 (7 ½ ton) and weighs 945#. The new unit is made as a replacement to the old model and is a Carrier Model #48HJD008 (7 /2 ton) which weighs 870#.

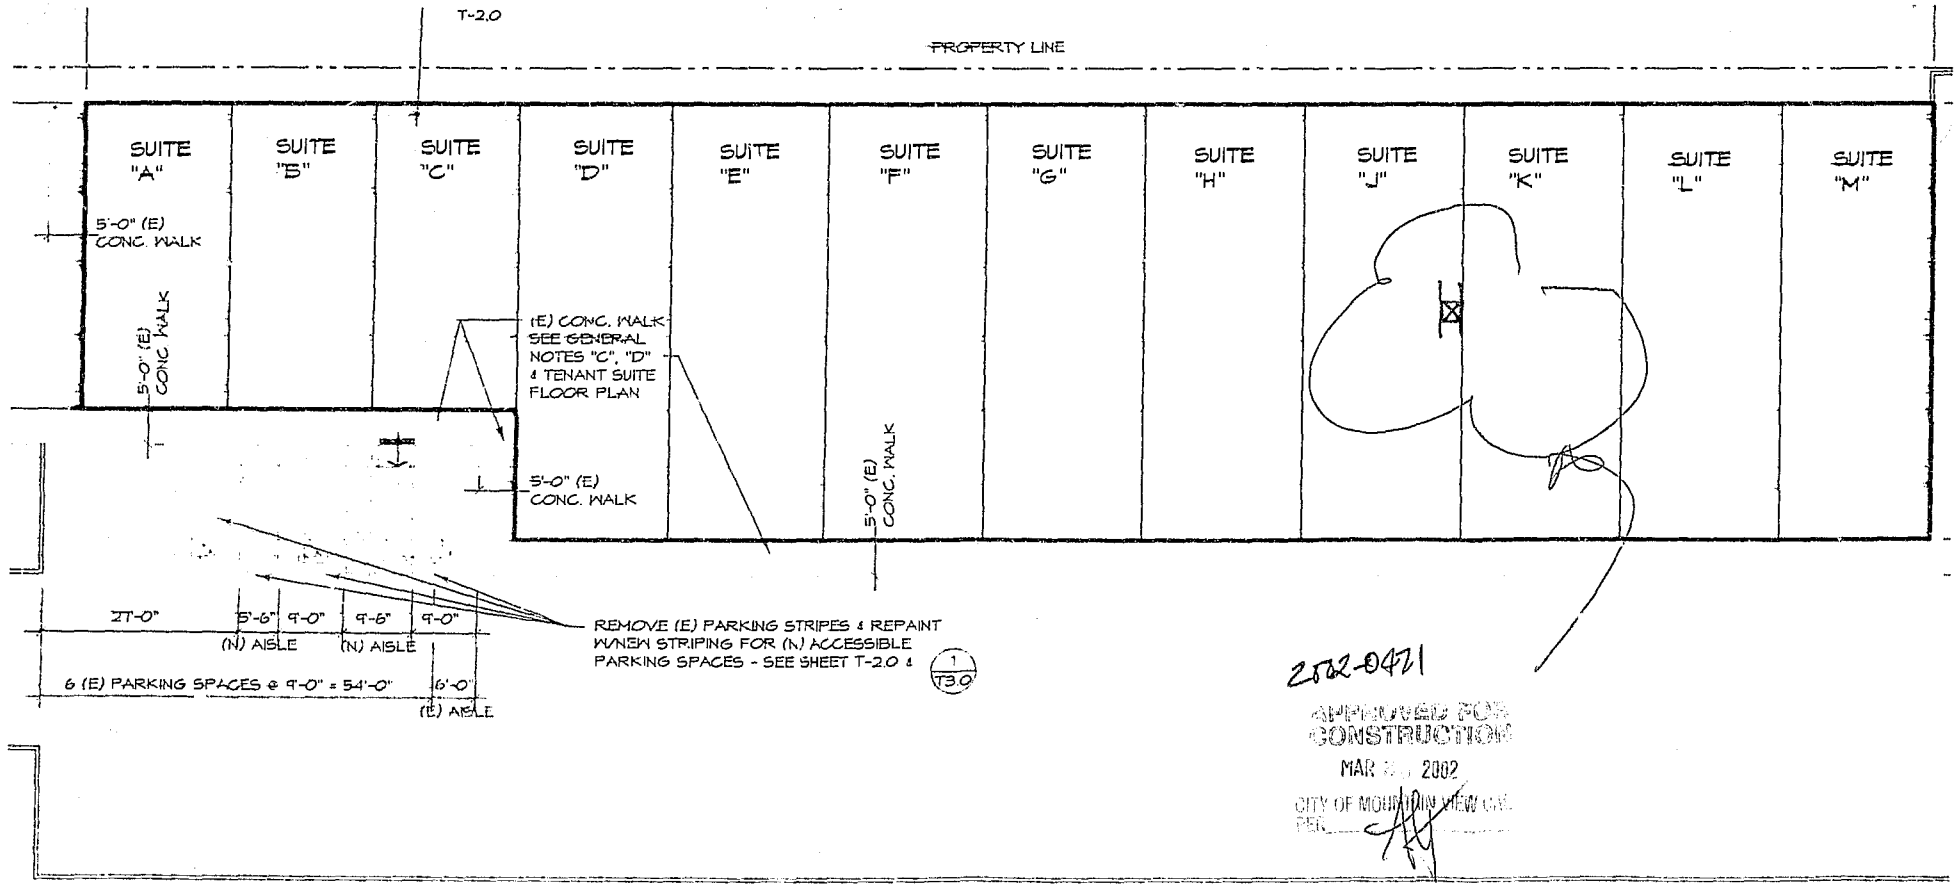

The (E) unit is old and noisy and is being replaced because of complaints from neighboring tenants. The new unit is the same footprint and will sit on the existing roof curb.

Sincerely,

Beth Guinnane
Project Manager

W_____A. I am the owner of the above property and I will contract to have all of the above work performed by licensed contractors.

W_____B. I am the owner of the above property and the work will be partially accomplished in accordance with Statement "A" and the other work will be accomplished in accordance with Statement "C."

W_____C. I am the owner of the above property and I will perform the above work personally or through my employees whose sole compensation will be wages, and the above-described structure is not intended or offered for sale.

Thomas Vincy — 11-29-94
Signature — Date

I certify that in the performance of the work for which this permit is issued I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California

Signature — Date

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

I certify that the use of this facility shall comply with sections 25505, 25533, and 25534 of the Health and Safety Code which regulates the storage, handling, and use of hazardous materials.

I certify that I have read this application and state that the information given is true and correct. I agree to comply to all City ordinances and State laws relating to the building construction, and I make this statement under penalty of law.

CITY OF MOUNTAIN VIEW
MEMORANDUM

RECEIVED
NOV 20 2001
BLDG INSPECTION

DATE: November 20, 2001

TO: Ron Geary, Deputy Community Development Director for Building and Safety

FROM: Scott Heyworth, Fire Protection Engineer

SUBJECT: 922 SAN LEANDRO AVE. - PERMIT NO. 2001-2238
NEW FUME HOOD FOR UNIT H – RESERVOIR ENGINEERING

I have reviewed the above project for compliance with all applicable uniform codes and have found there to be insufficient information to grant approval at this time. The following conditions are offered to assist the applicant in the next submittal. **A plan review of any / all proposed fire protection systems has not been performed. All fire protection systems shall be submitted under separate permit(s) for review.**

Conditions

SEE ATTACHED

1. A Hazardous Materials Inventory Statement must be included for the entire building, not just for Unit H. Provide statements for all tenant spaces within this building. The City of Mountain View can not determine if the entire building is a single control area or if several control areas are required.

SEE ATTACHED

2. The Hazardous Materials Inventory Statement shall indicate the specific hazard classification for each material. We acknowledge the DOT classifications, however, the classifications shall be in accordance with the UBC and UFC. Refer to Tables 3-D and 3-E of the UBC. For instance, flammable liquids need to be classified as Class I-A, I-B or I-C.

SEE T-2.1 GENERAL NOTES

3. On the drawings, demonstrate compliance with regulations for flammable gases in quantities not exceeding exempt amounts in accordance with Section 8001.16 of the UFC. Address the following concerns:

   a) Compressed gas system conveying flammable gases shall be provided with emergency shutoff capability in accordance with Sections 8001.16.2.1 and 8004.1.12 of the UFC. Flammable gas systems shall be provided with approved emergency shutoff valves that can be activated at each point of use and at each source.

SEE T-2.1

   b) NO SMOKING signs shall be posted in areas containing flammable gases in accordance with Sections 8001.16.2.2 and 8003.1.2 of the UFC.

SEE T-2.1 & T-1.0 GENERAL NOTES

4. Show locations of fire extinguishers on the plans. Minimum 2A:10B:C fire extinguishers shall be provided so that all portions of the tenant space are within 75 feet travel distance of an extinguisher.

922 SAN LEANDRO – PERMIT NO. 2001-2238
November 20, 2001
Page 2 of 2

SEE T-2.1 REFLECTED CLG + T-3.0 DTL

5. Demonstrate that the fume hood is listed for its intended use. The specification sheets on the plans do not indicate a UL-listing, FM-approval or other listing from a nationally recognized testing laboratory.

SEE T-2.1 GENERAL NOTES

6. Provide manufacturer specification sheets of the proposed storage cabinets. When storage cabinets are used to increase exempt amounts or to comply with Article 80, such cabinets shall be in accordance with Section 8001.10.6 of the UFC.
EXEMPT, NOT NEEDED.

SEE DTL 5/T-3.0 Redline

7. Provide a Roof Plan and show the termination point of the exhaust duct. Demonstrate compliance with Section 505.9 of the UMC.

SEE ATTACHED LIST

8. Indicate the materials used in the product-conveying duct system in accordance with Section 609.1 of the UMC. EXHAUST DUCT Redline STAINLESS STEEL OR GALVANIZED

SEE T-3.0 & T-2.1

9. Show the location of proposed cleanouts in accordance with Section 609.4 of the UMC.
OK, BY AJ,

SEE 5/T-3.0

Redline

10. Sprinklers or other fire-protection devices shall be installed within ducts having a cross-sectional dimension exceeding 10 inches when the duct conveys flammable vapors or fumes in accordance with Section 609.7 of the UMC. We acknowledge the 10-inch exhaust vent, however, all exhaust duct work is not indicated on the plans. Show all exhaust ducts and clearly indicate that exhaust ducts shall not exceed 10" or provide a note indicating that fire protection will be provided for the exhaust duct and will be submitted under separate permit.

11. Provide a Detail of the exhaust duct penetration in the roof. Demonstrate that adequate clearance will be provided in accordance with Section 609.8 of the UMC.

SEE T-2.1

12. Show new/existing exit signs in tenant space H.

13. Show new/existing emergency lighting fixtures in tenant space H.

SEE T-1.0 + EXITING ANALYSIS

14. General Notes shall reference the 1997 Editions of the Uniform codes. In addition, the City of Mountain View has adopted the 1994 Edition of Chapter 10 in the UBC.

Labconco offers a variety of other laboratory fume hoods not detailed in this catalog. Contact Labconco at 800-821-5525 or 816-333-8811 for ordering information on hoods with built-in blowers, variable air volume hoods, explosion-proof hoods, hoods with international electrical configurations, hoods with horizontal sliding sashes, and custom-designed hoods.

Features and Benefits

By-pass system reduces face velocity fluctuations when sash is lowered ensuring containment.

Liftaway™ front panel is removed easily without tools for access to electrical components.

Tempered safety glass sash protects the operator while providing excellent visibility and corrosion resistance.

Hideaway™ hose connectors of corrosion-resistant Kynar* are angled inward for greater work space.

Molded fiberglass liner gives superior corrosion and chemical resistance, durability and light reflectivity. Radioisotope and perchloric acid hoods are lined with corrosion-resistant stainless steel. Contact Labconco for ordering information on hoods with liners of other materials such as PVC and composite panels.

Fixture panels can be easily removed to provide convenient access to service fixtures from the front of the hood and eliminate the need for interior access panels.

Preset baffle requires no adjustment, ensuring safe and rapid fume removal and uniform face velocity.

Duplex electrical receptacle is mounted on the fixture panel for convenient and safe connections.

Exhaust connection with bell-shaped entry cone reduces noise and static pressure loss to ensure smooth, efficient air flow. The integral collection ring channels the condensed vapors through rubber tubing to a collection container or drum.

Bright working area is achieved with energy saving fluorescent lights. Radioisotope and perchloric acid hoods feature incandescent lights.

Single counterbalancing sash weight makes sash position control effortless.

Factory wired lights and blower switches speed installation. Two rocker switches control both the lights and remote blower.

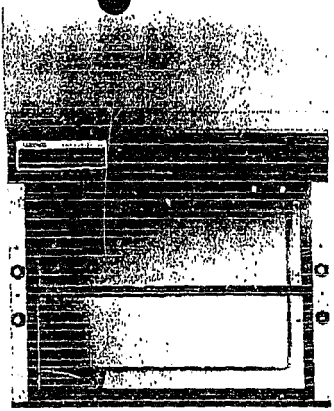

Liftaway™ side panels give easy access to sash weight, service fixtures and plumbing lines.

Fixtures are plumbed with copper tubing. The tubing for the upper right fixture is tin-lined for gas service.

PRODUCT SPECIFICATIONS FOR PROTECTOR® 48 FIBERGLASS LABORATORY HOODS MODELS 48705, 48707, 48800, 48801, 48802, 48803, 48804, 48805, 48806, 48807, 48810, 48815, 48816, 48817, 48818, 48825

GENERAL DATA

Hood Construction

Hood interior is molded fiberglass reinforced polyester resin with a Flame Spread Index of 25 or less when tested in accordance with ASTM E84. Hood exterior is epoxy coated steel and stainless steel.

Front Access Panel

Upper front panel is removable for access to the upper chamber. Six panel colors are available: -01 Glacier White, -02 Maize, -03 Redwood, -04 Moss Green, -05 Pacific Blue, -06 Charcoal. (Add this number to catalog number as suffix.)

Viewing Panel (Sash)

Hoods have a 3/16" thick, vertical rising, counterbalanced clear safety glass sash. The sash has a maximum opening height of 20" and closes down on an epoxy coated steel air foil.

Lighting, Standard Vapor-Proof

(48800, 48801, 48803, 48804, 48806, 48807, 48810, 48825)

Hoods have two factory installed 30-watt fluorescent lamps and rocker switches for light and blower. All wiring terminates in main connection boxes.

Lighting, Explosion-Proof

(48802, 48805, 48815, 48816, 48817, 48818)

Lighting is UL approved for Class I, Groups C and D; and Class II, Groups E, F and G locations. Furnished with one 100-watt explosion-proof incandescent lamp. No wiring or switches are provided.

Lighting, Universal™

(48705, 48707)

Hoods have two factory installed 30-watt fluorescent lamps. No wiring or switches are provided.

Blower, Standard

(48800, 48803, 48806, 48825)

Hoods have factory installed blower, wiring and switch. All wiring terminates in main connection boxes.

Blower, Explosion-Proof

(48802, 48805)

Hoods have factory installed explosion-proof blower. All wiring and switches are to be provided and installed by the customer. Blower is approved for Class I, Group D, and Class II, Groups E, F and G.

Service Fixtures

(48803, 48804, 48805, 48806, 48810, 48816, 48818, 48825)

Hoods have four remotely controlled service fixtures for use with gas, vacuum, air or water. Models 48806 and 48825 have one service fixture. Forged brass valves have silicone bronze stem with TFE coated Vee tip. Hose connectors are Kynar* (PVDF). Fixtures are pre-plumbed and are provided with color-coded inlays for mounting on individual control knobs and their corresponding hose connectors. Access for servicing these fixtures is through removable side panels and from the front of the hood. Models 48800 and 48825 have one remotely controlled sepia bronze coated swivel gooseneck. All models are factory prepared to accommodate up to eight remotely controlled service fixtures including two gooseneck faucet locations. (Fixture kits for on-site installation are available.)

Electrical Duplex

(48800, 48801, 48803, 48804, 48806, 48807, 48810)

One each 115 volt, 15 amp polarized and grounded electrical duplex is located on the inner face of the right fixture panel. All wiring terminates in separate, main connection boxes. All non-explosion-proof models, including Universal models, are factory prepared to accommodate up to four electrical duplexes (eight outlets). Outlets may be mounted in two locations on both the left and right fixture panels. (Electrical outlet kits for on-site installation are available — these require a separate junction box which is not provided.)

EXPLOSION-PROOF BY-PASS MODELS WITH BUILT-IN BLOWER

48802+ * FIBERGLASS LABORATORY HOOD WITH EXPLOSION-PROOF BLOWER AND LIGHTING.

47" x 32 1/4" x 59" high. The hood structure shall be prepared for operation on two 115/230 volt, 50/60 Hz, 15 amp electrical services.

Built-in explosion-proof exhaust blower shall be equipped with 1/3 hp motor and shall be factory set to provide 100 fpm face velocity (735 CFM) at an external static pressure of .17" H_2O or 80 fpm (600 CFM) at .30" H_2O. ** Hood interior shall be one piece molded fire-resistant fiberglass. Hood exterior shall be epoxy coated steel and stainless steel. Hood shall have automatic air by-pass system.

Interior lighting shall be provided by one 100-watt explosion-proof incandescent lamp.

Hood shall be furnished with a vertical rising, tempered safety glass sash assembly with a counterbalancing weight.

Hood shall be furnished without switches, electrical outlets or wiring as these must conform to varying local codes.

Hood shall be furnished with a condensation collection ring located on the duct collar which collects moisture precipitated in duct work external to the hood. The hood exhaust connection shall be sized to accept 10" nominal diameter PVC duct.

Colors shall be glacier white and charcoal. A removable front panel shall be available in a selection of six colors.

Shipping weight 352 lbs.

48805+ * FIBERGLASS LABORATORY HOOD WITH EXPLOSION-PROOF BLOWER, LIGHTING AND REMOTELY CONTROLLED SERVICE FIXTURES.

47" x 32 1/4" x 59" high. The hood structure shall be prepared for operation on two 115/230 volt, 50/60 Hz, 15 amp electrical services.

Built-in explosion-proof exhaust blower shall be equipped with 1/3 hp motor and shall be factory set to provide 100 fpm face velocity (735 CFM) at an external static pressure of .17" H_2O or 80 fpm (600 CFM) at .30" H_2O. * Hood interior shall be one piece molded fire-resistant fiberglass. Hood exterior shall be epoxy coated steel and stainless steel. Hood shall have automatic air by-pass system.

Interior lighting shall be provided by one 100-watt explosion-proof incandescent lamp.

Hood shall be furnished with a vertical rising, tempered safety glass sash assembly with a counterbalancing weight.

Left and right fixture panel shall be factory prepared for up to eight remotely-controlled service fixtures including two gooseneck faucet locations. Four remotely-controlled service fixtures shall be supplied with the hood and located two on each side. Access for servicing these fixtures shall be through the removable side panels and from the front of the hood structure. The fixtures shall be pre-plumbed with 1/4" diameter copper tubing. The upper right fixture shall be tin-lined for connection to gas. Additional tubing shall be supplied to all fixtures for service connections to be made to the hood exterior.

Hood shall be furnished without switches, electrical outlets or wiring as these must conform to varying local codes.

Hood shall be furnished with a condensation collection ring located on the duct collar which collects moisture precipitated in duct work external to the hood. The hood exhaust connection shall be sized to accept 10" nominal diameter PVC duct.

Colors shall be glacier white and charcoal. A removable front panel shall be available in a selection of six colors.

Shipping weight 372 lbs.

STEEL DUCT PER OWNER

DIMENSIONAL DATA — MODELS WITH BUILT-IN BLOWER

PROTECTOR 48 FIBERGLASS LABORATORY HOODS
Models 48800, 48802, 48803, 48805, 48806*, 48825*

1. Electrical supply connections require two 115 V, 60 Hz, 15 amp circuit breakers for blower, outlets and fluorescent lamps. Fluorescent lamps and junction boxes provided only on non-explosion-proof models. Accessories require additional junction boxes.
2. 100 W explosion-proof light fixture provided only on explosion-proof models.
3. Electrical connections for explosion-proof lamp (115 V or 230 V, 60 Hz, 15 amp service required).
4. Switches, receptacles and wiring provided only on non-explosion-proof models.
5. One-inch clearance above hood is required to allow removal of front and side panels.

RERI
Reservoir Engineering Research Institute

Re: Lab Function and Detail of Storage Areas for City of Mountain View

November 1, 2001

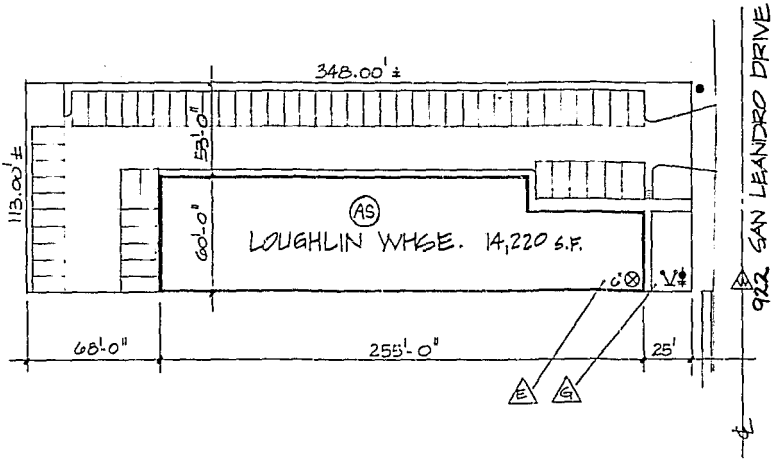

To Whom It May Concern:

Reservoir Engineering Research Institute is a non profit organization performing research on oil reservoirs. Our laboratory occupies Suite D of 922 San Leandro Ave. in Mountain View, CA. The main function of this lab is to perform research on petroleum fluids. The unit has two storage cabinets, the first of which is used to store waste and organic chemicals such as acetone, pentane, crude oil, and toluene. The second cabinet (2) holds alcohol, methanol, and coating chemicals used in wettability testing.

Please feel free to contact me should you have any questions or concerns regarding this information.

Kind regards,

Debbie Rowland

CITY OF MOUNTAIN VIEW

February 17, 1978

Jim Loughlin, Job Superintendant
922 San Leandro
Mtn View, CA 94040

Dear Mr. Loughlin:

RE: 922 San Leandro, Unit M - Woodworking Shop Requirements

Reference is made to our recent inspection of Unit M and our conversation relating to the proposed woodworking shop. The following items shall be completed prior to occupancy of that unit:

4-25-78 OK - Disconnect the space heater at the rear of the shop. It is not authorized in a hazardous location.

- All electrical work shall comply with Article 501, Class III, Division 1 of the National Electrical Code.

4-25-78 OK - All woodworking equipment shall be provided with approved dust collecting systems.

- Provide one (1) Class 3A 20 B/C fire extinguisher to be mounted in the vicinity of the front exitway.

- Provide an approved exit sign over the side exterior exit doors.

4-25-78 OK - The fire sprinkler system need not be altered. Upon checking our files it was noted that the system is sized for ordinary hazard, Group III which is adequate for the intended operation.

4-25-78 OK - The locking devices on the side exit door shall be changed so that only one (1) action is needed to exit.

4-25-78 OK - Provide non-combustible lids for the waste containers.

- A reinspection will be made in approximately 10 days to determine compliance.

If you have any questions I can be reached at 968-4415.

Sincerely,

Robert B. Merritt

Robert B. Merritt
Deputy Fire Marshal

RBM/pam

cc: C. Hinkley, Bldg Dept.

2-17-78

Needed for FINAL:

OK Loosen FDC caps.. female fittings won't turn. OK

OK Paint FDC riser at pit. OK

OK Check with Honeywell why main riser OS&Y not supervised. MAIN DRAIN - NOT CONTROL VALVES Advised J. Loughlin to seal open. ~~ok Floor switch is attached.~~

OK Lock p.i.v. - OK

OK Ring Sprinkler bell. 2-28-78

OK Clean sprinklers (or replace) which have been sprayed with Acoustical material.

1) provide 2A 10 B/C fire extinguishers in each unit as per sq. footage.

OK Paint panelink in unit M with fire retardant.

X) Requested water Dept. (Ralph Delpino) to have valve pit inspected.

Labconco offers a variety of other laboratory fume hoods not detailed in this catalog. Contact Labconco at 800-821-5525 or 816-333-8811 for ordering information on hoods with built-in blowers, variable air volume hoods, explosion-proof hoods, hoods with international electrical configurations, hoods with horizontal sliding sashes, and custom-designed hoods.

Features and Benefits

By-pass system reduces face velocity fluctuations when sash is lowered ensuring containment.

Liftaway™ front panel is removed easily without tools for access to electrical components.

Tempered safety glass sash protects the operator while providing excellent visibility and corrosion resistance.

Hideaway® hose connectors of corrosion-resistant Kynar,* are angled inward for greater work space.

Molded fiberglass liner gives superior corrosion and chemical resistance, durability and light reflectivity. Radioisotope and perchloric acid hoods are lined with corrosion-resistant stainless steel. Contact Labconco for ordering information on hoods with liners of other materials such as PVC and composite panels.

Exhaust connection with bell-shaped entry cone reduces noise and static pressure loss to ensure smooth, efficient air flow. The integral collection ring channels the condensed vapors through rubber tubing to a collection container or drain.

Bright working area is achieved with energy saving fluorescent lights. Radioisotope and perchloric acid hoods feature incandescent lights.

Single counterbalancing sash weight makes sash position control effortless.

Factory wired lights and blower switches speed installation. Two rocker switches control both the lights and remote blower.

Liftaway™ side panels give easy access to sash weight, service fixtures and plumbing lines.

Fixtures are plumbed with copper tubing. The tubing for the upper right fixture is tin-lined for gas service.

Fixture panels can be easily removed to provide convenient access to service fixtures from the front of the hood and eliminate the need for interior access panels.

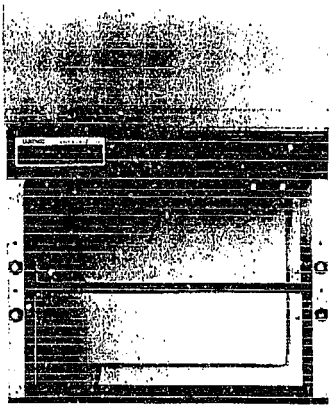

Preset baffle requires no adjustment, ensuring safe and rapid fume removal and uniform face velocity.

Duplex electrical receptacle is mounted on the fixture panel for convenient and safe connections.

PRODUCT SPECIFICATIONS FOR PROTECTOR® 48 FIBERGLASS LABORATORY HOODS MODELS 48705, 48707, 48800, 48801, 48802, 48803, 48804, 48805, 48806, 48807, 48810, 48815, 48816, 48817, 48818, 48825

GENERAL DATA

Hood Construction

Hood interior is molded fiberglass reinforced polyester resin with a Flame Spread Index of 25 or less when tested in accordance with ASTM E84. Hood exterior is epoxy coated steel and stainless steel.

Front Access Panel

Upper front panel is removable for access to the upper chamber. Six panel colors are available: •01 Glacier White, •02 Maize, •03 Redwood, •04 Moss Green, •05 Pacific Blue, •06 Charcoal (Add this number to catalog number as suffix.)

Viewing Panel (Sash)

Hoods have a 3/16" thick, vertical rising, counterbalanced clear safety glass sash. The sash has a maximum opening height of 26" and closes down on an epoxy coated steel air foil.

Lighting, Standard Vapor-Proof

(48800, 48801, 48803, 48804, 48806, 48807, 48810, 48825)

Hoods have two factory installed 30-watt fluorescent lamps and rocker switches for light and blower. All wiring terminates in main connection boxes.

* Lighting, Explosion-Proof

(48802, 48805, 48815, 48816, 48817, 48818)

Lighting is UL approved for Class I, Groups C and D; and Class II, Groups E, F and G locations. Furnished with one 100-watt explosion-proof incandescent lamp. No wiring or switches are provided.

Lighting, Universal*

(48705, 48707)

Hoods have two factory installed 30-watt fluorescent lamps. No wiring or switches are provided.

Blower, Standard

(48800, 48803, 48806, 48825)

Hoods have factory installed blower, wiring and switch. All wiring terminates in main connection boxes.

* Blower, Explosion-Proof

(48802, 48805)

Hoods have factory installed explosion-proof blower. All wiring and switches are to be provided and installed by the customer. Blower is approved for Class I, Group D, and Class II, Groups E, F and G.

Service Fixtures

(48803, 48804, 48805, 48806, 48810, 48816, 48818, 48825)

Hoods have four remotely controlled service fixtures for use with gas, vacuum, air or water. Models 48806 and 48825 have one service fixture. Forged brass valves have silicone bronze stem with TFE coated Vee tip. Hose connectors are Kynar® (PVDF). Fixtures are pre-plumbed and are provided with color-coded inlays for mounting on individual control knobs and their corresponding hose connections. Access for servicing these fixtures is through removable side panels and from the front of the hood. Models 48800 and 48825 have one remotely controlled sepia bronze coated swivel gooseneck. All models are factory prepared to accommodate up to eight remotely controlled service fixtures including two gooseneck faucet locations. (Fixture kits for on-site installation are available.)

Electrical Duplex

(48800, 48801, 48803, 48804, 48806, 48807, 48810)

One each 115 volt, 15 amp polarized and grounded electrical duplex is located on the inner face of the right fixture panel. All wiring terminates in separate, main connection boxes. All non-explosion-proof models, including Universal models, are factory prepared to accommodate up to four electrical duplexes (eight outlets). Outlets may be mounted in two locations on both the left and right fixture panels. (Electrical outlet kits for on-site installation are available — these require a separate junction box which is not provided.)

EXPLOSION-PROOF BY-PASS MODELS WITH BUILT-IN BLOWER

48802+ * FIBERGLASS LABORATORY HOOD WITH EXPLOSION-PROOF BLOWER AND LIGHTING.

47" x 32 1/1" x 91" high. The hood structure shall be prepared for operation on two 115/230 volt, 50/60 Hz, 15 amp electrical services.

Built-in explosion-proof exhaust blower shall be equipped with 1/3 hp motor and shall be factory set to provide 100 fpm face velocity (735 CFM) at an external static pressure of .12" H_2O or 80 fpm (600 CFM) at .30" H O ** Hood interior shall be one piece molded fire-resistant fiberglass. Hood exterior shall be epoxy coated steel and stainless steel. Hood shall have automatic air by-pass system.

Interior lighting shall be provided by one 100 watt explosion-proof incandescent lamp.

Hood shall be furnished with a vertical rising, tempered safety glass sash assembly with a counterbalancing weight.

Hood shall be furnished without switches, electrical outlets or wiring as these must conform to varying local codes.

Hood shall be furnished with a condensation collection ring located in the duct collar which collects moisture precipitated in duct work external to the hood. The hood exhaust connection shall be sized to accept 10" nominal diameter PVC duct.

Colors shall be glacier white and charcoal. A removable front panel shall be available in a selection of six colors.

Shipping weight 262 lbs.

48805+ * FIBERGLASS LABORATORY HOOD WITH EXPLOSION-PROOF BLOWER, LIGHTING AND REMOTELY CONTROLLED SERVICE FIXTURES.

47" x 32 1/1" x 91" high. The hood structure shall be prepared for operation on two 115/230 volt, 50/60 Hz, 15 amp electrical services.

Built-in explosion-proof exhaust blower shall be equipped with 1/3 hp motor and shall be factory set to provide 100 fpm face velocity (735 CFM) at an external static pressure of .12" H_2O or 80 fpm (600 CFM) at .30" H_2O.** Hood interior shall be one piece molded fire-resistant fiberglass. Hood exterior shall be epoxy coated steel and stainless steel. Hood shall have automatic air by-pass system.

Interior lighting shall be provided by one 100-watt explosion-proof incandescent lamp.

Hood shall be furnished with a vertical rising, tempered safety glass sash assembly with a counterbalancing weight.

Left and right fixture panel shall be factory prepared for up to eight remotely-controlled service fixtures including two gooseneck faucet locations. Four remotely-controlled service fixtures shall be supplied with the hood and located two on each side. Access for servicing these fixtures shall be through the removable side panels and from the front of the hood structure. The fixtures shall be pre-plumbed with 1/4" diameter copper tubing. The upper right fixture shall be set listed for connection to gas. Additional tubing shall be supplied to all fixtures for service connections to be made to the hood exterior.

Hood shall be furnished without switches, electrical outlets or wiring as these must conform to varying local codes.

Hood shall be furnished with a condensation collection ring located in the duct collar which collects moisture precipitated in duct work external to the hood. The hood exhaust connection shall be sized to accept 10" nominal diameter PVC duct.

Colors shall be glacier white and charcoal. A removable front panel shall be available in a selection of six colors.

Shipping weight 372 lbs.

See dimensional data on page 8.

DIMENSIONAL DATA — MODELS WITH BUILT-IN BLOWER

PROTECTOR 48 FIBERGLASS LABORATORY HOODS
Models 48800, 48802, 48803, 48805, 48806*, 48825*

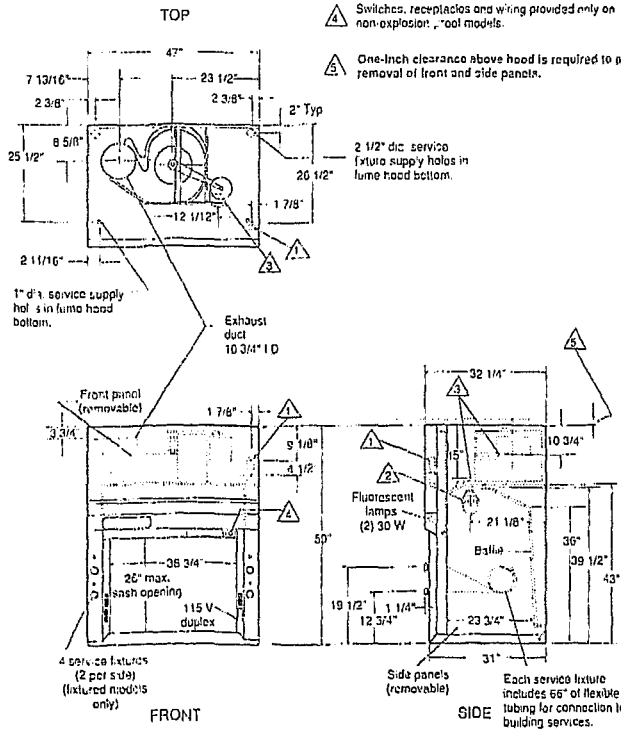

⚠1 Electrical supply connections require two 115 V, 60 Hz, 15 amp circuit breakers for blower, outlets and fluorescent lamps. Fluorescent lamps and junction boxes provided only on non-explosion-proof models. Accessories require additional junction boxes.

⚠2 100 W explosion-proof light fixture provided only on explosion-proof models.

⚠3 Electrical connections for explosion proof lamp (115 V or 230 V, 60 Hz, 15 amp service required).

⚠4 Switches, receptacles and wiring provided only on non-explosion proof models.

⚠5 One-inch clearance above hood is required to allow removal of front and side panels.

*Gooseneck service fixture located in left rear corner.

RERI
Reservoir Engineering Research Institute

Re: Lab Function and Detail of Storage Areas for City of Mountain View

November 1, 2001

To Whom It May Concern:

Reservoir Engineering Research Institute is a non profit organization performing research on oil reservoirs. Our laboratory occupies Suite 11 of 922 San Leandro Ave. in Mountain View, CA. The main function of this lab is to perform research on petroleum fluids. The unit has two storage cabinets, the first of which is used to store waste and organic chemicals such as acetone, pentane, crude oil, and toluene. The second cabinet (2) holds alcohol, methanol, and coating chemicals used in wettability testing.

Please feel free to contact me should you have any questions or concerns regarding this information.

Kind regards,

Debbie Rowland

1.0 EXECUTIVE SUMMARY

On behalf of City Ventures ("Client"), Stantec Consulting Services Inc. (Stantec) has prepared this Phase II Environmental Site Assessment (ESA) report for the property located at 922-944 San Leandro Street in the city of Mountain View, county of Santa Clara, California (the Site or Subject Property; Figure 1).

The investigation was completed in accordance with the Master Services Agreement between the Client and Stantec (the "MSA"). In the event of any conflict between this document and the MSA, the MSA will prevail. City Venture (the "User") has been designated as the User of this report.

The Subject Property consists of approximately 1.7 acres of land developed with a single-story multi-tenant commercial building with an associated asphalted parking lot and two residential structures with an open field. Adjoining properties, as well as the nearby area, uses include residential, commercial, and light industrial. A Subject Property Location Map is provided as Figure 1. A Subject Property Vicinity Map illustrating the main features of the Subject Property and vicinity is provided as Figure 2.

The Phase I Environmental Site Assessment (ESA) for the Subject Property was prepared by Stantec and dated February 9, 2023. That Phase I ESA revealed the following evidence of a recognized environmental condition (REC) pursuant to ASTM E1527-21:

- **On-Site Agricultural Use.** Stantec's interpretation of historical aerial photographs indicate the northwest portion of the Subject Property and surrounding areas to the north were used as agricultural land (orchards) until approximately 1970. Application of organochlorine pesticides (OCPs) and herbicides is considered likely to have occurred during this time period. This use gives rise to a concern for the potential accumulation of OCPs and metals (lead and arsenic) commonly associated with herbicide application in shallow soils at the Property.

To address the REC, Stantec completed the Phase II ESA on April 27, 2023 which included the advancement of four (4) shallow hand auger soil borings (HA-1 through HA-4) in the northwestern portion of the Subject property. Soil samples were collected at a depth of 0.5 and 3-foot below ground surface (bgs) interval from each boring. A total of eight (8) soil samples collected from the drilling were analyzed for OCPs by USEPA Method 8081A and lead and arsenic by USEPA Method 6010B.

According to the analytical results, only minor detections of the OCP 4,4,'-DDE (0.033 to 0.137 milligrams per kilogram (mg/kg)) and 4,4'-DDT (0.012 to 0.020 mg/kg) were reported in the collected soil samples. These concentrations are significantly below the San Francisco Water Quality Control Board (SFRWQCB) Environmental Screening Level (ESL) of 1.80 and 1.90 mg/kg, for DDE and DDT respectively. Additionally, minor detections of Chlordane and Dieldrin were reported in two samples below their SFRWQCB ESLs of 0.48 and 0.037 mg/kg, respectively. Based on these results, the historical use of OCPs on the Property is not considered an environmental concern, and no further investigation is warranted.

SHALLOW SOIL SAMPLING
922-944 SAN LEANDRO STREET, MOUNTAIN VIEW, CALIFORNIA

Executive Summary

Lead was detected in all eight soil samples at detected concentrations ranging from 4.12 to 45.0 mg/kg. All reported concentrations of lead are below the DTSC HERO NOTE 3 residential screening level of 80 mg/kg and within expected background concentrations. Arsenic was detected in six samples ranging from 1.98 to 3.98 mg/kg, which exceed ESLs when compared to the DTSC HERO NOTE 3 residential screening level of 0.41 mg/kg, however, these concentrations are well within naturally-occurring California background levels of up to 12 mg/kg. The potential presence of lead and arsenic as part of potential historic herbicide application are not considered a REC based on this investigation and as a result no further assessment is recommended.

The results of the Phase II subsurface investigations have indicated that there are no Recognized Environmental Conditions associated with the Subject Property (pursuant to ASTM E1527-21) and that no further assessment is recommended in relation to the environmental condition of the Subject Property.

2.0 INTRODUCTION

On behalf of City Ventures, Stantec Consulting Services Inc. (Stantec) has prepared this Phase II Environmental Site Assessment (ESA) report for the property located at 922-944 San Leandro Street, Mountain View, California, Buena Park, in Santa Clara County, California (the Site or Property; Figure 1). The investigation was performed in accordance with Stantec's proposal entitled *Proposal to Conduct Shallow Soil Sampling*, dated April 12, 2023.

2.1 PROPERTY DESCRIPTION AND LAND USE

The Subject Property consists of approximately 1.7 acres of land developed with a single-story multi-tenant commercial building with an associated asphalted parking lot and two residential structures with an open field. Adjoining properties, as well as the nearby area, uses include residential, commercial, and light industrial. A Subject Property Location Map is provided as Figure 1. A Subject Property Vicinity Map illustrating the main features of the Subject Property and vicinity is provided as Figure 2.

2.2 PROPERTY GEOLOGY AND HYDROGEOLOGY

The Subject Property is located in Santa Clara County. The area is located within the Coast Ranges Geomorphic Province, which includes northwest-southeast trending mountain ranges and valleys that have been developed by the San Andreas Fault system (California Geological Survey [CGS], 2002). The stratigraphy underlying the Site consists primarily of recent-age alluvium (CDMG, 1961).

The Subject Property sits at an average elevation of 42 feet above mean sea level (amsl) is relatively flat with a regional topographic gradient to the northwest (EDR, 2023). Based on the topography, surface water on the Subject Property infiltrates the ground surface or flows overland into curb and gutter system along San Leandro Street to the east of the Subject Property.

3.0 BACKGROUND INFORMATION

The Phase I ESA for the Subject Property was prepared by Stantec and dated February 9, 2023. That Phase I ESA revealed the following evidence of a recognized environmental condition (REC):

- **On-Site Agricultural Use.** Stantec's interpretation of historical aerial photographs indicate the northwest portion of the Subject Property and surrounding areas to the north were used as agricultural land (orchards) until approximately 1970. Application of organochlorine pesticides (OCPs) and herbicides is considered likely to have occurred during this time period. This use gives rise to a concern for the potential accumulation of OCPs and metals (lead and arsenic) commonly associated with herbicide application in shallow soils at the Property.

The results of the recommended Phase II ESA to assess the identified REC are presented in the following sections of this report.

4.0 FIELD INVESTIGATION

Prior to the commencement of fieldwork activities, Stantec made the following preparations.

4.1 INVESTIGATION

To address the REC, Stantec completed the Phase II ESA on April 27, 2023. All work was conducted under the direct oversight of a State of California professional and included the following:

- Advancement of four (4) shallow hand auger soil borings (HA-1 through HA-4) in the northwestern portion of the Subject property. Soil samples were collected at a depth of 0.5 and 3-foot below ground surface (bgs) interval from each boring. Eight (8) soil samples collected from the drilling were analyzed for OCPs by USEPA Method 8081A and lead and arsenic by USEPA Method 6010B.

4.1.1 Soil Boring and Sampling Procedures

All soil samples obtained by advancement of a hand auger to the corresponding terminal depths as noted above were submitted to the laboratory under chain of custody. At each soil sample collected from a depth of 0.5, and three-feet bgs were collected by discharging the soil in the hand auger cutter head from the specified depth directly into pre-cleaned laboratory-provided eight-ounce glass jars with Teflon®-lined lids. The soils from each of the borings were visually examined by Stantec field personnel who classified the soils in accordance with the Unified Soil Classification System (USCS).

Following classification, the soil samples were carefully packaged for chemical analysis. All sample containers were labeled with the appropriate identification information (boring number, sample depth, sample collection date, and sample collection time).

4.1.2 Field Equipment Cleaning Procedures

To maintain quality control during drilling operations, the hand auger and soil sampling equipment were decontaminated using a triple rinse. Prior to drilling at a given location or sampling interval, all equipment coming in direct contact with soil samples was scrubbed with an Alconox scrub solution followed by a clean tap water rinse and then a final distilled water rinse.

5.0 LABORATORY TESTING

All soil chemical analysis was performed at State of California Certified Laboratories. Collected soil samples were analyzed at Torrent Laboratory, Inc. (Torrent) located in Milpitas, California. All soil samples were managed under strict chain-of-custody. The results are discussed below, and soil results are presented on Table 1. Complete laboratory reports, including QA/QC documentation is included in Appendix A.

6.0 INVESTIGATION RESULTS

6.1 FIELD OBSERVATIONS

Soils encountered during this round of assessment consisted of clayey silts with sand. No staining or odor was observed in any of the borings advanced during this assessment. All boring locations are depicted on **Figure 2**.

6.2 ANALYTICAL RESULTS

Laboratory analytical test results from this assessment are attached as **Appendix A**. A summary of the analytical data from this assessment is provided in **Table 1**. The results of all analyzed soil samples were reported in units of milligrams per kilogram (mg/kg). The laboratory test results from this investigation are discussed below and were compared to the most conservation between the United States Environmental Protection Agency (USEPA) Regional Screening Level (RSL) and Department of Toxic Substances Control (DTSC) Human and Ecological Risk Office (HERO) Note 3 residential screening levels.

6.2.1 Soil Results

According to the analytical results, minor detections of the OCP 4,4,'-DDE (0.033 to 0.137 milligrams per kilogram (mg/kg)) and 4,4'-DDT (0.012 to 0.020 mg/kg) were reported in the analyzed soil samples. These concentrations are significantly below the San Francisco Water Quality Control Board (SFRWQCB) Environmental Screening Level (ESL) of 1.80 and 1.90 mg/kg, respectively. Additionally, minor detections of Chlordane and Dieldrin were reported in two soil samples, which are below their SFRWQCB ESLs of 0.48 and 0.037 mg/kg, respectively. Based on these results, the historical use of OCPs on the Property is not considered an environmental concern, and no further investigation is warranted.

Lead was detected in all eight soil samples at detected concentrations ranging from 4.12 to 45.0 mg/kg. All reported concentrations of lead are below the DTSC HERO NOTE 3 residential screening level of 80 mg/kg and within expected background concentrations. Arsenic was detected in six samples ranging from 1.98 to 3.98 mg/kg, which exceed ESLs when compared to the DTSC HERO NOTE 3 residential screening level of 0.41 mg/kg, however, these concentrations fall within naturally occurring California background levels up to 12 mg/kg. Based on these soil sample results, the presence of lead and arsenic as part of potential historic herbicide application are not considered a REC based on this investigation and as a result no further assessment is recommended.

7.0 CONCLUSIONS AND RECOMMENDATIONS

The results of the Phase II subsurface investigations have indicated that there are no Recognized Environmental Conditions associated with the Subject Property (pursuant to ASTM E1527-21) and that no further assessment is recommended in relation to the environmental condition of the Subject Property.

8.0 LIMITATIONS

The conclusions presented in this report are professional opinions based on data described in this report. The opinions of this report have been arrived at in accordance with currently accepted hydrogeologic and engineering standards and practices applicable to this location and are subject to the following inherent limitations. Stantec makes no other warranty, either expressed or implied, concerning the conclusions and professional advice that is contained within the body of this report.

Inherent in most projects performed in a heterogeneous subsurface environment, continuing excavation and assessments may reveal findings that are different than those presented herein. This facet of the environmental profession should be considered when formulating professional opinions on the limited data collected on these projects.

This report has been issued with the clear understanding that it is the responsibility of the owner, or their representative, to make appropriate notifications to regulatory agencies. It is specifically not the responsibility of Stantec to conduct appropriate notifications as specified by current County and State regulations.

The information presented in this report is valid as of the date our exploration was performed. Site conditions may degrade with time; consequently, the findings presented herein are subject to change.

APPENDIX A

Laboratory Analytical Report

Stantec Consulting Corporation
15575 Los Gatos Boulevard Building C
Los Gatos, California 95032
Tel: (408) 356-6124

RE: 922-944 San Leandro St.,Mountain View,CA

Work Order No.: 2304225

Dear Alicia Jansen:

Torrent Laboratory, Inc. received 8 sample(s) on April 27, 2023 for the analyses presented in the following Report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991 If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

Kathie Evans
Project Manager

CASE NARRATIVE

Unless otherwise indicated in the following narrative, no issues encountered with the receiving, preparation, analysis or reporting of the results associated with this work order.

Unless otherwise indicated in the following narrative, no results have been method and/or field blank corrected.

Reported results relate only to the items/samples tested by the laboratory.

This report shall not be reproduced, except in full, without the written approval of Torrent Laboratory, Inc.

Decachlorobiphenyl (S)				100	78.1	75.4		38 - 135		

Laboratory Qualifiers and Definitions

DEFINITIONS:

Accuracy/Bias (% Recovery) - The closeness of agreement between an observed value and an accepted reference value.
Blank (Method/Preparation Blank) -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.
Duplicate - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)
Laboratory Control Sample (LCS ad LCSD) - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.
Matrix - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)
Matrix Spike (MS/MSD) - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.
Method Detection Limit (MDL) - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero
Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ) - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.
Precision (%RPD) - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates
Surrogate (S) or (Surr) - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis
Tentatively Identified Compound (TIC) - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.
Units: the unit of measure used to express the reported result - **mg/L** and ***mg/Kg*** (equivalent to PPM - parts per million in **liquid** and ***solid***), **ug/L** and ***ug/Kg*** (equivalent to PPB - parts per billion in **liquid** and ***solid***), **ug/m3**, ***mg/m3***, **ppbv** and ***ppmv*** (all units of measure for reporting concentrations in air), **%** (equivalent to 10000 ppm or 1,000,000 ppb), **ug/Wipe** (concentration found on the surface of a single Wipe usually taken over a 100cm2 surface)

LABORATORY QUALIFIERS

B - Indicates when the analyte is found in the associated method or preparation blank
D - Surrogate is not recoverable due to the necessary dilution of the sample
E - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.
H- Indicates that the recommended holding time for the analyte or compound has been exceeded
J- Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative
NA - Not Analyzed
N/A - Not Applicable
ND - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.
NR - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added
R- The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts
S- Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative
X -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.

Sample Receipt Checklist

Client Name: Stantec Consulting Corporation

Project Name: 922-944 San Leandro St.,Mountain View,CA

Work Order No.: 2304225

Date and Time Received: 4/27/2023 12:15:00PM

Received By: Lorna Imbat

Physically Logged By: Lorna Imbat

Checklist Completed By: Lorna Imbat

Carrier Name: Client Drop Off

Chain of Custody (COC) Information

Chain of custody present?	Yes
Chain of custody signed when relinquished and received?	Yes
Chain of custody agrees with sample labels?	Yes
Custody seals intact on sample bottles?	Not Present

Sample Receipt Information

Custody seals intact on shipping container/cooler?	Not Present
Shipping Container/Cooler In Good Condition?	Yes
Samples in proper container/bottle?	Yes
Samples containers intact?	Yes
Sufficient sample volume for indicated test?	Yes

Sample Preservation and Hold Time (HT) Information

All samples received within holding time?	Yes			
Container/Temp Blank temperature in compliance?	Yes	Temperature:	4.0	°C
Water-VOA vials have zero headspace?	No VOA vials submitted			
Water-pH acceptable upon receipt?	N/A			

pH Checked by: n/a

pH Adjusted by: n/a

CORNERSTONE EARTH GROUP

Date:	February 28, 2025
Project No.:	118-171-1
Prepared For:	Mr. Nick Towstopiat **DAVID J. POWERS & ASSOCIATES** 1871 The Alameda, Suite 200 San Jose, California 95126
Re:	Environmental Review 922-950 San Leandro Avenue Mountain View, California

Dear Mr. Towstopiat:

Per your request, Cornerstone Earth Group, Inc. (Cornerstone) is pleased to present this letter summarizing our review of the provided environmental reports for 922-950 San Leandro Avenue in Mountain View, California (Site). This letter was prepared for David J. Powers & Associates in accordance with our November 21, 2024 agreement.

Project Background

We understand that David J. Powers is providing California Environmental Quality Act (CEQA) support for the proposed redevelopment of the Site. The Site currently is developed with a multi-tenant commercial building and two residences. The propsed project would demolish the existing structures to construct a 38-unit townhome residential development.

Documents Reviewed

This letter briefly summarizes selected information obtained from the following provided reports:

- Stantec Consulting Services, Inc. (Stantec). February 23, 2023a. *Phase I Environmental Site Assessment, 922-944 San Leandro Street, Mountain View, California.*
- Stantec. May 9, 2023b. *Shallow Soil Sampling, 922-944 San Leandro Street, Mountain View, California.*

For complete details, please refer directly to the original reports.

Reported Site Conditions and History

Based on the information reviewed, the northwestern portion of the Site was historically used for agricultural purposes (orchards) through at least the 1960s. The two existing residences on the northeastern portion of the Site were constructed prior to 1939. Historical aerial photographs also show what appears to have been a third residence on the southeast corner of the Site,

which was removed by the late 1960s. The existing commercial building on the southern portion of the Site was constructed in approximately 1980.

Stantec identified the historical agricultural use as a Recognized Environmental Condition (REC[1]) due to the possible use of pesticides and herbicides. Stantec (2023a) recommended collecting shallow soil samples to evaluate for potential residual organochlorine pesticide (OCP) concentrations and arsenic/lead concentrations that may be present.

Stantec stated that given the age of the existing buildings, the presence of asbestos containing materials (ACMs) and lead-based paint (LBP) is considered possible. Stantec (2023a) recommended conducting a pre-demolition ACM and LBP survey prior to any activities with the potential to disturb building materials.

In April 2023, Stantec collected soil samples from four location on the northwest portion of the Site that was historically occupied by an orchard. The samples were analyzed for OCPs, lead and arsenic. The detected OCP concentrations did not exceed current residential or commercial environmental screening levels (ESLs[2]). The detected lead and arsenic concentrations appear typical of naturally occurring background concentrations.

Conclusions and Recommendations

Based on the information obtained during this study, Cornerstone concludes and recommends the following:

The soil sampling conducted by Stantec (2023b) on the northwest portion of the Site that was historically occupied by an orchard did not identify OCPs at concentrations exceeding current residential ESLs, and the detected lead and arsenic concentrations appear typical of naturally occurring background concentrations. Thus, the former agricultural activities do not appear to have significantly impacted the Site.

Stantec (2023a) recommended conducting a pre-demolition ACM and LBP survey prior to any activities with the potential to disturb building materials. Cornerstone concurs with this recommendation.

Additionally, soil adjacent to structures that are painted with lead-containing paint can become impacted with lead as a result of the weathering and/or peeling of painted surfaces. Soil near wood framed structures also can be impacted by pesticides historically used to control termites. No information was identified documenting the use of lead-based paint or termite control pesticides on-Site; however, if used, residual pesticide and lead concentrations may remain in on-Site soil. Lead and/or pesticides often are identified in soil near old residences, such as those currently and historically located on-Site. Prior to residential development of the Site, we

[1] Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

[2] Environmental Screening Levels (ESLs) established by the Water Board (January 2019) are used to screen sites for potential human health concerns where releases of chemicals have occurred. These screening levels are risk-based concentrations derived from standardized equations combining exposure information assumptions with toxicity data. Under most circumstances, the presence of a chemical at concentrations below the corresponding screening level can be assumed not to pose a significant health risk.

recommend that shallow soil at the current and former residential structure locations be evaluated for the possible presence of lead and pesticides.

Limitations

Cornerstone performed this investigation to support David J. Powers & Associates in the evaluation of the referenced Site. Conclusions presented in this letter are based on limited, readily available information. This letter, an instrument of professional service, was prepared for the sole use of David J. Powers & Associates and may not be reproduced or distributed without written authorization from Cornerstone. It is valid for 180 days. Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

We thank you for this opportunity to work with you on this important project. Should you have any questions, please contact us at your convenience.

Sincerely,

Cornerstone Earth Group, Inc.

Kurt M. Soenen, P.E.
Senior Principal Engineer
