INITIAL STUDY

Pursuant to the California Environmental Quality Act (CEQA; Pub. Res. Code [PRC] § 21000 *et seq.*) and *State CEQA Guidelines* (Cal. Code Regs., tit. 14, § 15000 *et seq.*) Section 15063, an Initial Study is a preliminary environmental analysis that is used by the lead agency (i.e., the public agency principally responsible for approving or carrying out the proposed project) as a basis for determining whether an environmental impact report, a mitigated negative declaration, or a negative declaration is required for a project. The State CEQA Guidelines require that an Initial Study contain a project description, description of the existing environmental setting, identification and explanation of potential environmental effects by checklist or other similar form to assess impacts, discussion of mitigation measures for significant effects, evaluation of the project's consistency with applicable land use plans, and the name of the preparers of the study.

This Initial Study has been prepared to analyze the potential physical environmental impacts of the Church of Jesus Christ of Ladder-Day Saints' Bakersfield Temple Project ("Project"), located at 12310 Stockdale Highway ("Project Site") in the City of Bakersfield ("City"). The Project proposes to develop a 13-acre religious campus for the Church of Jesus Christ of Latter-day Saints, consisting of a temple, meetinghouse, parking areas, landscaped gardens, and supporting facilities. Development would occur in two phases, with Phase 1 expected to begin in 2026. The timeline for Phase 2 remains to be determined. The Project is discussed in further detail in **Section 2.0, Project Location & Description**, of this Initial Study.

In accordance with *State CEQA Guidelines* Section 15367, the City of Bakersfield is the Lead Agency under CEQA for the Project.

PUBLIC AND AGENCY REVIEW

This Initial Study will be circulated for public and agency review from September 17, 2025, to October 17, 2025. Copies of this document are available for review at the City's Planning Division (address below) and on the City's website at https://www.bakersfieldcity.us/279/Environmental-Documents. Written comments on the Initial Study must be received no later than 5:00 PM on October 17, 2025, and can be mailed or emailed to:

City of Bakersfield
Development Services Department – Planning Division
1715 Chester Avenue
Bakersfield, CA 93301
Attention: Yazid Alawgarey, Assistant Planner/Project Manager
yalawgarey@bakersfieldcity.us

ORGANIZATION OF THE INITIAL STUDY

This Initial Study is organized into the following sections:

Section I – Project Information: provides summary background information about the Project, including Project location, lead agency, and contact information.

Section II – Project Location & Description: includes a description of the Project, including the need for the Project, the Project objectives, and the elements included in the Project.

Section III – Environmental Factors Potentially Affected: identifies what environmental resources, if any, would involve at least one significant or potentially significant impact that cannot be reduced to a less than significant level.

Section IV – Determination: indicates whether impacts associated with the Project would be significant, and what, if any, additional environmental documentation is required.

Section V – Evaluation of Environmental Impacts: contains the Environmental Checklist form for each resource and presents an explanation of all checklist answers. The checklist is used to assist in evaluating the potential environmental impacts of the Project and determining which impacts need to be further evaluated in an environmental impact report.

Section VI – References: lists references used in the preparation of this document.

Section VII – Initial Study Preparers: lists the names of individuals involved in the preparation of this document.

Appendices: present the technical studies used in the preparation of this Initial Study.

I. PROJECT INFORMATION

1. PROJECT TITLE AND NO.

Bakersfield Temple – SPR 24-0027 (Site Plan Review), MOD 24-0032 (Zone Modification), VTPM 12637 (Vesting Tentative Parcel Map)

2. LEAD AGENCY NAME AND ADDRESS

City of Bakersfield
Development Services Department – Planning Division

50 E. North Temple Street
Salt Lake City, UT 84150

6. GENERAL PLAN DESIGNATION

Office Commercial (O-C)

7. ZONING

Commercial and Professional Office (C-O)

1. PROJECT LOCATION

Location

The Project Site is located at the northwest corner of Stockdale Highway and Jewetta Avenue at 12310 Stockdale Highway in the City of Bakersfield, Kern County. Bakersfield lies within the central portion of the southern San Joaquin Valley in California's Central Valley with the Sierra Nevada to the east, the Tehachapi Mountains to the south, and the Coast Range to the west. See **Figure 1, Regional Project Location**. The Project Site encompasses Kern County Assessor's Parcel Numbers (APNs): 500-780-12 and 500-780-13. A third on-site parcel with no assigned APN consists of unrealized right-of-way.

Existing Conditions and Surrounding Land Uses

The Project Site is approximately 13 acres of vacant, graded relatively flat land with sparse vegetation at an elevation of approximately 365 feet above mean sea level. See **Figure 2, Aerial Photograph of the Project Site**. The Project Site is within an urbanized setting surrounded by a commercial medical facility to the west; a private high school, religious uses, and a commercial storage facility to the south across Stockdale Highway; 14-acre public park to the east across Jewetta Avenue; and a single-family residential subdivision abutting the Project Site to the north. The surrounding area has a corresponding zoning designation of Commercial and Professional Office (C-O) and combined Commercial and Planned Commercial Development (C-2/PCD) to the west; Single-Dwelling Residential (R-1) and Planned Commercial Development (PCD) to the south and southeast, respectively; Open Space (OS) to the east; and Planned Unit Development (PUD) to the north.

The Cross Valley Canal and the Kern River are located approximately 0.2 miles south of the Project Site. The Sierra Nevada Mountains are approximately 20 miles to the east. Moreover, local vehicular access to the Project Site is provided via Stockdale Highway and Jewetta Avenue. Regional access to the Project Site is provided by Interstate 5 (approximately 7.7 miles to the southwest), State Route 58 (approximately 0.4 miles to the north), and State Route 99 (approximately 5.4 miles to the east).

2. PROJECT DESCRIPTION

Overview

The Church of Jesus Christ of Latter-day Saints (Applicant) proposes to develop an approximately 13.07-acre religious campus at the Project Site in two phases. The first phase would include a temple and related site improvements such as plazas and gardens, and the second phase would include a meetinghouse and additional facilities, as more particularly described below. A cross-lot easement would connect to the north, with site access provided from the north, west, and south. See **Figure 3, Conceptual Site Plan**.

Phase 1 – Temple and Site Improvements

The Project's initial phase would develop the eastern portion of the Project Site by constructing the temple and related site improvements, with the temple itself positioned near the corner of Stockdale Highway

and Jewetta Avenue. The proposed temple building would encompass approximately 30,000 gross square feet, including a small basement, a primary main floor, and a mechanical floor. The primary parapet height will be 24 feet 6 inches for most of the building with accent walls at the building's quadrants that have a parapet height of 36 feet. The mechanical floor, which would be inset from the exterior walls and central to the building, has a maximum parapet height of 45 feet at the base of the steeple. The steeple itself would consist of an unoccupied tower, cupola/dome, and finial, with a total height of 123 feet 6 inches. The temple would be constructed of high-quality, non-combustible materials.

Site improvements would include parking areas providing 199 parking spaces, paved walking paths, plazas, and gardens that would be publicly accessible during daytime hours, as well as a grounds maintenance building, a screened equipment yard housing a chiller and diesel-powered emergency generator, and a small clothing sales retail building for temple patrons. As part of Phase 1, the Project would construct an on-site cross-lot roadway along the northern perimeter of the Project Site. This roadway would provide vehicular access from a new driveway on Jewetta Avenue to the adjoining parcel west of the Project Site, providing shared access to the Project's parking facilities.

The landscaping would feature drought-tolerant plants and efficient irrigation to reduce water use, and the temple area would be fenced for security after operating hours. The temple facade and spire would be illuminated at night until patrons and staff have departed, in compliance with the City's lighting ordinance, with lighting dimmed to security levels after hours. The temple would be used for religious instruction, marriage ceremonies, ordinances, baptisms, prayer, and reflection, and would operate Tuesday through Saturday from 5:00 AM to 10:00 PM, be closed on Sundays, and reserved for maintenance on Mondays. While peak occupancy of the temple is not anticipated to occur, the peak occupancy of the temple theoretically could be up to approximately 280 members, with a peak staff overlap of about 40 people. Many patrons and staff are expected to carpool. Temple ordinances are by invitation only and are not open to the public. Moreover, it should be noted that temple ordinances are not carried out on Sundays so as to allow temple patrons and staff to attend local worship services in their local meetinghouse (also known as a chapel).

Phase 2 – Meetinghouse and Additional Facilities

The second phase of the Project would develop the balance of the Project Site with a meetinghouse in the western portion of the Project Site. The meetinghouse would comprise approximately 16,500 gross square feet, consisting of a primary main floor level and a mechanical mezzanine. The building would have a roof height of 30 feet and would feature a steeple in the form of an unoccupied spire reaching a total height of 66 feet 4 inches constructed of non-combustible materials. The steeple height is based on a standard prefabricated design used for meetinghouses of The Church of Jesus Christ of Latter-day Saints worldwide. Associated site improvements for this phase would include additional parking areas providing 93 parking spaces (for a total of 292 parking spaces at full buildout), a service building, landscaping, and a pavilion structure. The meetinghouse would be used primarily for Sunday worship services and would also host membership activities during weekday evenings. Peak occupancy is anticipated to be approximately 300 patrons on Sundays, when the temple is closed, which also ensures the peak occupancy of both the temple and the meetinghouse would not overlap.

All landscaping and parking for the Project would conform to the City development standards as set forth in the Bakersfield Municipal Code (BMC) Chapters 17.61 and 17.58, respectively.

3. DISCRETIONARY AND MINISTERIAL APPROVAL AUTHORITY

Discretionary and ministerial entitlements, reviews, and approvals required for implementation of the Project would include, but would not necessarily be limited to, the following:

- City of Bakersfield
    - Site Plan Review No. 24-0027 for approval and associated building permits[1]
    - Zone Modification No. 24-0032 to allow steeple heights as proposed (temple: 123 feet 6 inches, meetinghouse: 66 feet 4 inches) where 60 feet is permitted in a C-O (Commercial and Professional Office) zone district.[2]
    - Other discretionary and ministerial permits and approvals that may be deemed necessary, including, but not limited to, grading permits, excavation permits and building permits
    - Vesting Tentative Parcel Map No. 12637 consisting of 3 parcels on 13.07 acres.
- San Joaquin Valley Air Pollution Control District
    - Authority to Construct / Permit to Operate for the diesel-powered emergency generator as well as the HVAC system (if applicable)
- Central Valley Regional Water Quality Control Board
    - Construction General Permit

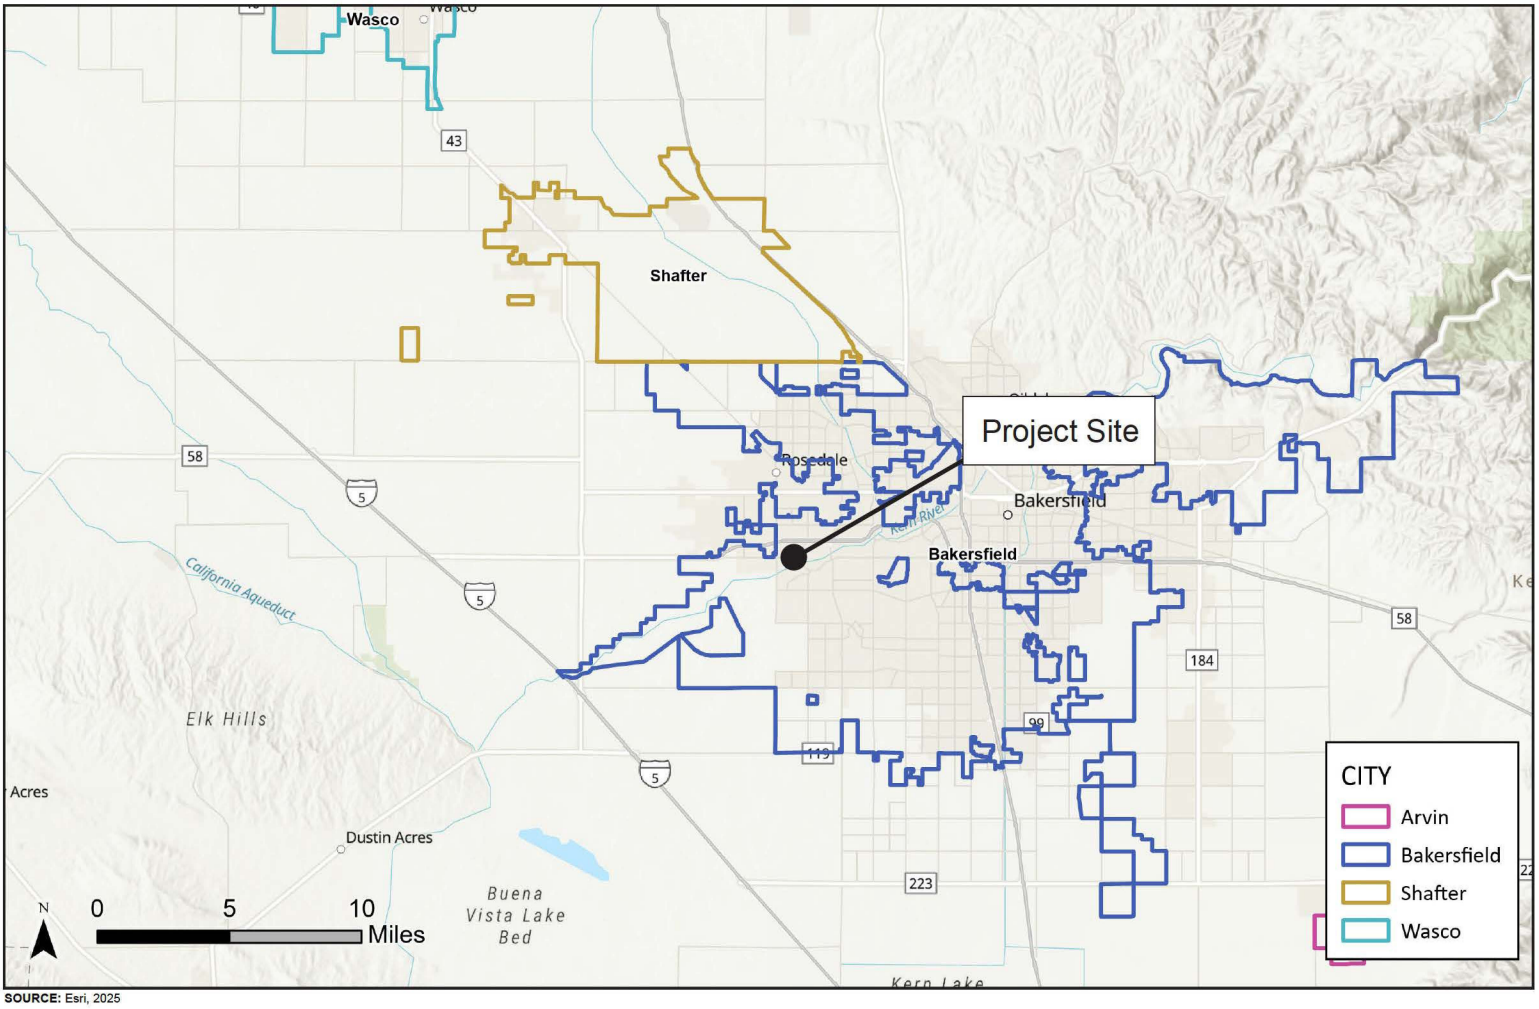

4. PROJECT CONSTRUCTION SEQUENCING AND STAGING

Construction of the Project would occur in two phases. Phase 1 is expected to begin in 2026 and last for approximately 13 months. A commencement date for Phase 2 is not known at this time. All construction staging and activities would occur entirely within the boundaries of the Project Site. Construction activities would conform to the hours allowed in BMC Section 9.22.050, which allows construction noise between 6:00 AM – 9:00 PM on weekdays and 8:00 AM – 9:00 PM on weekends.

---

1 *This Project is being processed pursuant to the provisions of the Bakersfield Municipal Code, Title 17 (Zoning Ordinance), as in effect on January 12, 2024. At that time, religious institutions were a permitted use by right within the C-O (Commercial Office) zone.*

2 *The Project applicant has submitted this zone modification request in a spirit of cooperation, even though they assert they have the right to construct the steeples at the proposed heights under the Religious Land Use and Institutionalized Persons Act of 2000 (RLUIPA) and constitutional protections.*

III. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would potentially be affected by this Project, involving at least one impact that is a "Potentially Significant Impact," as indicated by the checklist on the following pages.

☒ Aesthetics	☐ Agriculture and Forestry Resources	☒ Air Quality
☒ Biological Resources	☒ Cultural Resources	☐ Energy
☒ Geology and Soils	☒ Greenhouse Gas Emissions	☐ Hazards and Hazardous Materials
☐ Hydrology/Water Quality	☒ Land Use/Planning	☐ Mineral Resources
☒ Noise	☐ Population and Housing	☐ Public Services
☐ Recreation	☒ Transportation	☒ Tribal Cultural Resources
☐ Utilities/Service Systems	☐ Wildfire	☒ Mandatory Findings of Significance

BAKERSFIELD
THE SOUND OF *Something Better*

IV. DETERMINATION

On the basis of this initial evaluation:

☐ I find that the proposed Project **COULD NOT** have a significant effect on the environment, and a **NEGATIVE DECLARATION** will be prepared.

☐ I find that although the proposed Project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the Project have been made by or agreed to by the Project proponent. A **MITIGATED NEGATIVE DECLARATION** will be prepared.

☒ I find that the proposed Project **MAY** have a significant effect on the environment, and an **ENVIRONMENTAL IMPACT REPORT** is required.

☐ I find that the proposed Project **MAY** have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An **ENVIRONMENTAL IMPACT REPORT** is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed Project **COULD** have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier **EIR or NEGATIVE DECLARATION** pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier **EIR or NEGATIVE DECLARATION**, including revisions or mitigation measures that are imposed upon the proposed Project, nothing further is required.

Agency

V. EVALUATION OF ENVIRONMENTAL IMPACTS

1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors, as well as general standards (e.g., the project would not expose sensitive receptors to pollutants, based on a project-specific screening analysis).

2. All answers must take account of the whole action involved, including off-site as well as onsite, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4. "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level.

5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:

a) Earlier Analyses Used. Identify and state where they are available for review.

b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.

c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7. Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

8. This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.

9. The explanation of each issue should identify:

a) the significance criteria or threshold, if any, used to evaluate each question; and

b) the mitigation measure identified, if any, to reduce the impact to less than significance

1. AESTHETICS

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Except as provided in Public Resources Code section 21099, would the project:				
a) Have a substantial adverse effect on a scenic vista?	☐	☐	☒	☐
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	☐	☐	☐	☒
c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage points.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	☒	☐	☐	☐
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	☒	☐	☐	☐

Impacts

a) **Less Than Significant Impact.** The Project does not conflict with any applicable vista protection standards, scenic resource protection requirements, or design criteria of federal, state, or local agencies. The Project Site is located within an area having slopes of 0 to 2 percent in any direction, and the surrounding terrain is generally flat and urbanized. The Project Site and its immediate vicinity are not regarded or designated within the City's General Plan as visually important or "scenic." While the proposed development would introduce new buildings, landscaping, and site improvements consistent with the existing urban character of the area, views from public vantage points are limited by commercial, institutional, and residential development, with no designated scenic vistas or protected view corridors in the Project vicinity. While the temple steeple would be taller than surrounding structures, it would not block or alter any recognized scenic vista. Therefore, because the Project Site is not located within or adjacent to a designated scenic vista, does not obstruct views of officially recognized scenic resources, the Project impacts would be less than significant. No further analysis of this issue is warranted.

b) **No Impact.** The Project Site is not located adjacent to or near any officially designated or potentially eligible scenic highways to be listed on the California Department of Transportation (Caltrans) State Scenic Highway System.[3] The nearest section of highway eligible for state scenic highway designation is State Route 14, located in Kern County over 60 miles to the east. The nearest designated segment is State Route 33 in Ventura County through the Los Padres National

[3] *California Department of Transportation, California State Scenic Highways, https://dot.ca.gov/programs/design/lap-landscape-architecture-and-community-livability/lap-liv-i-scenic-highways, accessed August 27, 2025.*

Forest, , which is well outside the viewshed of the Project Site. As a result, the Project would not introduce new visual elements that could damage scenic resources within a state scenic highway. No impact would occur, and no further analysis of this issue is warranted.

c) **Potentially Significant Impact.** The Project Site is located within an urbanized area of the City. The proposed temple and meetinghouse would include steeples with heights of approximately 123 feet 6 inches and 66 feet 4 inches, respectively. These heights exceed the maximum building height permitted in the Commercial Office (C-O) zone under the Bakersfield Municipal Code and would require a zoning modification.[4] Because the Project's vertical elements and nighttime illumination could be considered inconsistent with applicable zoning standards and other regulations intended to maintain scenic quality, there is potential for conflict with those regulations. Therefore, this issue will be further analyzed in the EIR to determine the extent of any conflicts with applicable zoning and scenic quality regulations, as appropriate, and the significance of potential impacts.

d) **Potentially Significant Impact.** The Project may result in a potentially significant impact related to light and glare due to the planned nighttime illumination of the temple facade and 123-foot-6-inch steeple, and meetinghouse's 66-foot 4-inch steeple, as well as exterior site lighting for pathways, parking areas, and plazas. While the lighting would comply with the City's lighting ordinance and be dimmed to security levels after hours, the introduction of new, elevated sources of illumination could be visible over a broad area and may contrast with existing ambient light conditions, particularly in the adjacent residential area to the north of the Project Site with lower nighttime lighting levels. Additionally, reflective building materials or finishes could generate daytime glare under certain sun angles. Therefore, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

---

4 *As noted above, the Project applicant has submitted this zone modification request in a spirit of cooperation, even though they assert they have the right to construct the steeples at the proposed heights under the Religious Land Use and Institutionalized Persons Act of 2000 (RLUIPA) and constitutional protections.*

2. AGRICULTURE & FORESTRY RESOURCES

Issues	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
Would the project:				
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☒
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)) or timberland (as defined in Public Resources Code section 4526)?	☐	☐	☐	☒
d) Result in the loss of forest land or conversion of forest land to non-forest use?	☐	☐	☐	☒
e) Involve other changes in the existing environment, which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest land?	☐	☐	☐	☒

Impacts

a) **No Impact.** According to the California Department of Conservation's Farmland Mapping and Monitoring Program (FMMP), the Project Site is designated as "Urban and Built-Up Land" and as such does not contain any land classified as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance.[5] Therefore, no impact would occur, and no further analysis of this issue is warranted.

b) **No Impact.** The Project Site is not zoned for agricultural use nor are there agricultural activities occurring on-site. Moreover, neither the Project Site nor adjacent parcels are enrolled in a Williamson Act contract.[6] As such, the Project would not conflict with existing agricultural zoning or a Williamson Act contract, and no impact would occur. Therefore, no impact would occur, and no further analysis of this issue is warranted.

c) **No Impact.** The City does not contain any forest land (as defined by PRC § 12220(g)), timberland (as defined by PRC § 4526), or timberland zoned for Timberland Production (as defined by

---

5 *California Department of Conservation, "California Important Farmland Finder," Available online at: https://maps.conservation.ca.gov/dlrp/ciff/, accessed August 12, 2025.*

6 *California Department of Conservation, Williamson Act Program. Available online at: https://www.conservation.ca.gov/dlrp/lca, accessed on August 12, 2025.*

Government Code § 51104(g)).[7] Neither the Project Site nor surrounding parcels contain forest land as defined by the Public Resources Code. Therefore, no impact would occur, and no further analysis of this issue is warranted.

d) **No Impact.** The Project involves development of a vacant, graded parcel within an existing urban setting, surrounded by urban uses with a land use appropriate to the underlying zoning and General Plan designation. The Project would not induce growth in existing agricultural or forest land uses, either directly or indirectly. Therefore, no impact would occur, and no further analysis of this issue is warranted.

---

3. AIR QUALITY

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan?	☒	☐	☐	☐
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	☒	☐	☐	☐
c) Expose sensitive receptors to substantial pollutant concentrations?	☒	☐	☐	☐
d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	☒	☐	☐	☐

Impacts

a) **Potentially Significant Impact.** The Project Site is located within the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD), in a region designated nonattainment for ozone and fine particulate matter ($PM_{2.5}$) under state and federal standards. Construction and operational emissions from the proposed temple, meetinghouse, and associated facilities could exceed SJVAPCD thresholds for ozone precursors (i.e., reactive organic gases and nitrogen oxides) and particulate matter, potentially hindering progress toward SJVAPCD's attainment goals. Therefore, impacts will be further analyzed in the EIR to determine the extent and significance of potential impacts.

b) **Potentially Significant Impact.** Construction activities such as grading, paving, and building, as well as long-term operational traffic could generate criteria pollutants in quantities that may exceed SJVAPCD significance thresholds. Given the region's existing nonattainment status for ozone and $PM_{2.5}$, Project emissions could contribute to ongoing violations of ambient air quality standards. Therefore, impacts will be further analyzed in the EIR to determine the extent and significance of potential impacts.

c) **Potentially Significant Impact.** The Project is located within 500 feet of existing residential uses to the north, a pediatric specialty care medical facility to the west, school and religious institutions to the south, and park to the east, which are considered sensitive receptors. Construction activities would involve use of heavy-duty diesel equipment, generating localized emissions of diesel particulate matter (DPM) and other pollutants. In addition, operational emissions from increased vehicle trips to and from the Project Site could lead to elevated concentrations of $PM_{2.5}$ and nitrogen dioxide (NO_2) in areas where sensitive receptors are present. Moreover,

construction emissions may pose a health risk to nearby residents. Therefore, impacts will be further analyzed in the EIR to determine the extent and significance of potential impacts.

d) **Potentially Significant Impact.** The Project has the potential to generate emissions, including odors and other air contaminants, that could adversely affect a substantial number of people. During construction, activities such as site grading, excavation, and heavy equipment use would generate dust and exhaust emissions. These earth-moving activities could release airborne spores, potentially increasing the risk of valley fever infection for construction workers and nearby residents. Diesel exhaust from equipment and trucks would also produce short-term odors and particulate matter that could cause discomfort or nuisance for sensitive receptors in the vicinity. While long-term operational activities are not expected to produce substantial objectionable odors, the potential for short-term odor and air quality impacts during construction warrants further evaluation. Therefore, impacts will be further analyzed in the EIR to determine the extent and significance of potential impacts.

4. BIOLOGICAL RESOURCES

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project:				
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	☒	☐	☐	☐
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	☒	☐	☐	☐
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☒	☐
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☒	☐	☐	☐
e) Conflict with any applicable policies protecting biological resources?	☒	☐	☐	☐
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other applicable habitat conservation plan?	☐	☐	☐	☒

Impacts

a) **Potentially Significant Impact.** The Project Site and surrounding area may provide suitable habitat for special-status plant and wildlife species identified in local or regional plans, or by the California Department of Fish and Wildlife (CDFW) and U.S. Fish and Wildlife Service (USFWS). Construction activities such as grading, vegetation removal, and increased human presence could directly affect individuals or modify habitat in ways that reduce its suitability. Therefore, as the presence or potential presence of such species cannot be ruled out without an on-site survey, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

b) **Potentially Significant Impact.** Although the Project Site is in a developed area without riparian habitat on site, potential remnant sensitive natural communities may occur within or adjacent to the project footprint. Construction could result in removal, degradation, or fragmentation of

these habitats. Therefore, as the presence or potential presence of sensitive natural communities cannot be ruled out without an on-site survey, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

c) **Less Than Significant Impact.** A review of the USFWS National Wetlands Inventory (NWI),[8] CDFW Lands Viewer,[9] and site reconnaissance indicates that the Project Site consists of vacant, graded land with sparse vegetation and no evidence of wetlands, marshes, vernal pools, riparian habitat, or other waters subject to state or federal jurisdiction. The Project Site is relatively flat, with slopes of 0 to 2 percent and has been previously disturbed by grading and surrounding urban development. There are no hydrologic features on the Project Site that would support wetland conditions, and no blue-line streams or wetland features are mapped within the Project boundaries.

The nearest surface waters are the Cross Valley Canal and the Kern River, which are riverine habitats located approximately 0.2 miles south of the site, separated from the project area by existing development and roadways. Project construction and operation would not involve direct removal, filling, or hydrological alteration of any state or federally protected wetlands. Since no state or federally protected wetlands occur on or adjacent to the Project Site, and the Project would not directly or indirectly affect such resources, there would be no substantial adverse effect on wetlands. Therefore, impacts would be less than significant impact and no further analysis of this issue is warranted.

d) **Potentially Significant Impact.** The Project area may be used by native resident or migratory wildlife for movement between habitat areas or may contain features that function as nursery sites. Construction fencing, lighting, and increased human activity could impede wildlife movement or reduce the functionality of movement corridors. As the extent of such use is not yet fully documented, this impact is considered potentially significant and will be further analyzed in the EIR. Therefore, as the presence or potential presence of native resident or migratory wildlife cannot be ruled out without an on-site survey, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

e) **Potentially Significant Impact.** The Project Site is located within an urbanized portion of the City and is designated and zoned for urban development. The Project Site has been previously graded and supports only sparse ruderal vegetation. The City's General Plan Conservation Element includes biological resource policies aim to avoid or effectively mitigate development in sensitive habitat areas, preserve riparian and wildlife habitat within floodways, protect natural resources from inappropriate off-road vehicle use, and, in coordination with state and federal partners, identify, enhance, and potentially integrate suitable sensitive habitats into regional conservation and park systems for long-term management. Applicable state and federal regulations protecting biological resources include the California Endangered Species Act, the federal Endangered Species Act, and the Migratory Bird Treaty Act. Based on the findings of an on-site survey, the Project's consistency with policies protecting biological resources can then be reviewed and

---

8 *United States Fish & Wildlife Service, National Wetlands Inventory, website: https://www.fws.gov/program/national-wetlands-inventory, accessed September 16, 2025.*

9 *California Department of Fish & Wildlife, CDFW Lands Viewer, website: https://apps.wildlife.ca.gov/lands/, accessed September 16, 2025.*

determined. Therefore, impacts will be further analyzed in the EIR to determine the extent and significance of potential impacts.

f) **No Impact.** The Project Site is not located within the boundaries of any adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other habitat conservation plan area. As such, the Project would not conflict with the provisions of any such plan. Therefore, no impact would occur, and no further analysis of this issue is warranted.

5. CULTURAL RESOURCES

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project:				
a) Cause a substantial adverse change in the significance of a historical resource pursuant to in §15064.5?	☒	☐	☐	☐
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	☒	☐	☐	☐
c) Disturb any human remains, including those interred outside of dedicated cemeteries?	☒	☐	☐	☐

Impacts

a) **Potentially Significant Impact.** The Project area may contain resources or be associated with a historical significance based on the definition of a historical resource under State CEQA Guidelines Section 15064.5. Ground disturbing construction activities could materially impair the resource's significance by altering its physical characteristics or historical context. Because the presence and eligibility of such resources have not yet been confirmed through formal evaluation, the potential for a substantial adverse change exists. This impact is considered potentially significant and will be further analyzed in the EIR. Therefore, impacts will be further analyzed in the EIR to determine the extent and significance of potential impacts.

b) **Potentially Significant Impact.** Ground-disturbing activities associated with the Project, including grading, excavation, and utility installation, could damage or destroy subsurface archaeological deposits that qualify as significant under State CEQA Guidelines Section 15064.5. The Project Site's potential to contain such resources has not been fully assessed through records searches or field surveys. Therefore, given the irreversible nature of archaeological resource loss, impacts will be further analyzed in the EIR to determine the extent and significance of potential impacts.

c) **Potentially Significant Impact.** Although no known burial sites have been documented within the Project area, the potential exists for previously unknown human remains to be encountered during ground disturbance. Such remains could be of Native American origin or other cultural significance. Inadvertent disturbance could have an irreversible impact that destroys the resource. Therefore, impacts will be further analyzed in the EIR to determine the extent and significance of potential impacts.

6. ENERGY

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project:				
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	☐	☐	☒	☐
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	☐	☐	☒	☐

Impacts

a) **Less Than Significant Impact.** Pacific Gas & Electric (PG&E) provides electricity services to most of Kern County including the City. In 2022, the total electrical generation in California was 287,220 gigawatt-hours (GWh).[10] Statewide electric consumption in 2023 was estimated by the California Energy Commission (CEC) to be 278,213 GWh, with Kern County responsible for consuming approximately 16,876 GWh.[11] The statewide natural gas consumption in 2023 was estimated by the CEC to be 11,964 millions of therms (MMThm), with Kern County responsible for consuming approximately 1,549 MMThm.[12]

Neither federal or state law nor the State CEQA Guidelines establish thresholds that define when energy consumption is considered wasteful, inefficient and unnecessary. In general, compliance with CCR Title 24 Energy Efficiency Standards would result in energy-efficient buildings. The proposed project is anticipated to comply with these standards.

Construction

Construction activities associated with the Project would consume electricity on a limited basis to power lighting, electrical equipment, and supply and convey water for dust control. Electricity would be supplied to the Project Site from existing electrical lines. The electricity demand at any given time would vary throughout the construction period based on the construction activities being performed and would cease upon completion of construction. Electricity use from

---

10 *California Energy Commission, "2022 Total System Electric Generation." Available online at: https://www.energy.ca.gov/data-reports/energy-almanac/california-electricity-data/2022-total-system-electric-generation, accessed August 12, 2025.*

11 *California Energy Commission, Electricity Consumption, 2025. Available online at: https://www.energy.ca.gov/data-reports/energy-almanac/california-electricity-data/california-energy-consumption-dashboards-0 , accessed August 12, 2025.*

12 *California Energy Commission, Energy Consumption by County, 2022. Available online at: https://www.energy.ca.gov/data-reports/energy-almanac/california-electricity-data/california-energy-consumption-dashboards-1 , accessed August 12, 2025.*

construction would be short-term, limited to working hours, used for necessary construction-related activities, and represent a small fraction of the Project's annual operational electricity.

Typically, construction activities do not involve the consumption of natural gas. As such, natural gas would not be supplied to support Project construction activities and there would be no expected demand generated by construction of the Project. If natural gas is used during construction, it would be in limited amounts and on a temporary basis and would specifically be used to replace or offset diesel-fueled equipment and as such would not result in substantial on-going demand.

Construction activities associated with the Project would use gasoline and/or diesel-powered equipment and/or vehicles for hauling activities. However, the Project Applicant would use fuel-efficient equipment consistent with State and federal regulations. Furthermore, the Project would comply with all California Code of Regulations including Title 13, sections 2449(d)(3) and 2485, which minimizes the idling time of construction equipment either by shutting it off when not in use or by reducing the time of idling to no more than five minutes.

Construction equipment would comply with applicable standards, and construction activities and associated fuel consumption and energy use would be temporary and typical of construction sites. It is also reasonable to assume contractors would avoid wasteful, inefficient, and unnecessary fuel consumption during construction to reduce construction costs. Therefore, construction activities associated with the Project would not involve the inefficient, wasteful, and unnecessary use of energy during construction, and the construction-phase impact related to energy consumption would be less than significant. No further analysis is warranted.

Operational

The Project involves the construction of a new 13-acre religious campus. This development would result in energy consumption for electricity and the conveyance of water, wastewater, and solid waste disposal. The Project would be built to be entirely electrically powered and will not utilize natural gas. The Project would be required to comply with the State's Building Energy Efficiency Standards (Cal. Code Regs., tit. 24, Part 6), which requires newly constructed buildings to meet energy performance standards set by the Energy Commission to reduce the wasteful, uneconomic, inefficient, or unnecessary consumption of energy, and to enhance the outdoor and indoor environmental quality. In addition, the Project would be required to comply with the mandatory requirements set forth in the California Green Building Standards Code (CBSC) related to energy efficiency, water efficiency and conservation, and material conservation and resource efficiency for new buildings.

Energy would also be consumed as a result of vehicle trips. Thus, operation associated with implementation of the Project would result in an increase in the consumption of petroleum-based fuels related to vehicular travel to and from the Project Site. The majority of vehicles would consist of light-duty automobiles and light duty trucks, which are subject to state fuel efficiency standards, such as the Low Carbon Fuel Standard (LCFS) and Low-Emission Vehicle Program Standards. The Low Carbon Fuel Standard (LCFS), in part, aims to reduce fuel consumption and providers of transportation fuels must demonstrate that the mix of fuels they supply for use in California meets the LCFS carbon intensity standards for each annual compliance period.

In conclusion, increased energy demand associated with construction activities associated with the Project would be temporary and typical of construction projects and would not result in wasteful use of energy resources. Although operational energy use could increase overall, newly constructed uses would be energy efficient and be in conformance with the latest version of California's Building Energy Efficiency Standards and Green Building Standards Code. Similarly, vehicular travel associated with the proposed project's operations would rely upon fuel subject to state fuel efficiency standards. This impact would be less than significant. No further analysis is warranted.

b) **Less Than Significant Impact.** The Project would be designed in a manner that is consistent with relevant energy conservation plans designed to encourage development that results in the efficient use of energy resources. The City has adopted a Priority Climate Action Plan (PCAP) that identifies strategies to reduce greenhouse gas emissions and advance energy efficiency and renewable energy generation.[13] Relevant Building + Energy measures in the PCAP include promoting high-performance building envelopes that exceed state energy code requirements; encouraging electrification of new buildings; increasing on-site solar generation; incentivizing advanced energy management systems; and pairing energy upgrades with water-efficiency improvements.

The Project would involve the phased development of a 13.07-acre religious campus. The proposed structures would be constructed of high-quality, non-combustible materials and designed to comply with, and potentially exceed, the current California Building Energy Efficiency Standards (Title 24, Part 6) and California Green Building Standards Code (CALGreen). The Project incorporates energy-efficient design features such as high-performance building envelopes, LED lighting with time-based dimming, drought-tolerant landscaping with efficient irrigation, and modern HVAC systems. These measures are consistent with the PCAP's emphasis on reducing building energy demand and promoting efficient operation.

As discussed above, the Project would comply with the most current CALGreen Building Code which ensures the use of energy efficient features for the Project. The Project would be consistent with applicable state energy regulations and would advance multiple PCAP Building + Energy strategies, and it would not conflict with or obstruct implementation of a state or local plan for renewable energy or energy efficiency. Therefore, this impact would be less than significant, and no further analysis is warranted.

---

13 *City of Bakersfield, Priority Climate Action Plan, 2024. Available online at: https://www.epa.gov/system/files/documents/2024-03/city-of-bakersfield-pcap.pdf , accessed August 12, 2025.*

7. GEOLOGY & SOILS

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project:				
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	☐	☐	☒	☐
ii) Strong seismic ground shaking?	☐	☐	☒	☐
iii) Seismic-related ground failure, including liquefaction?	☐	☐	☒	☐
iv) Landslides?	☐	☐	☐	☒
b) Result in substantial soil erosion or the loss of topsoil?	☐	☐	☒	☐
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	☐	☐	☒	☐
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994) (California Building Code), creating substantial direct or indirect risks to life or property?	☐	☐	☒	☐
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	☐	☐	☐	☒
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	☒	☐	☐	☐

Impacts

a. i.) **Less Than Significant Impact.** The California Geological Survey (CGS) designates Alquist-Priolo Earthquake Fault Zones to regulate development across active faults (surface displacement within the past 11,000 years). According to the most recent CGS maps (Special Publication 42), no Alquist-Priolo Earthquake Fault Zone traverses the Project Site.[14] The nearest mapped active fault, the Kern Front Fault, is approximately 11.8 miles northeast. As such, the site is not subject to surface fault rupture hazards. While the region is seismically active and could experience strong ground shaking, the Project would be designed and constructed in compliance with the California Building Standards Code, which includes seismic safety provisions. Therefore, the Project would not directly or indirectly cause substantial adverse effects from rupture of a known earthquake fault, and impacts would be less than significant. No further analysis is warranted.

a.ii.) **Less Than Significant Impact.** The City, like most of California, is located in a seismically active region where moderate to strong earthquakes can occur on numerous regional faults. The intensity of ground shaking at the Project Site during a seismic event would depend on factors such as earthquake magnitude, distance from the epicenter, subsurface conditions, and topography. According to the CGS's Seismic Hazard Zone maps, the Project Site is not within a designated seismic hazard zone for amplified shaking, and the nearest active fault is located more than 10 miles away.[15] While strong ground shaking could occur during a major regional earthquake, the Project would be designed and constructed in compliance with the California Building Standards Code, which includes seismic safety provisions intended to protect public safety and reduce the risk of structural damage. Therefore, the Project would not expose people or structures to substantial adverse effects from strong seismic ground shaking, and impacts would be less than significant. No further analysis is warranted.

a.iii.) **Less Than Significant Impact.** The Project would not directly or indirectly cause substantial adverse effects related to seismic ground failure, including liquefaction. The Project Site is not within a CGS Seismic Hazard Zone for liquefaction.[16] Additionally, the City's General Plan identifies areas in the southeast of the City with a potential risk of liquefaction, away from the Project Site. Final design will implement all recommendations of the geotechnical report and comply with the California Building Code and ASCE 7, including seismic site classification, ground-motion parameters, and any ground improvement if warranted. The Project does not include dewatering or other activities expected to raise shallow groundwater levels. Accordingly, the Project would not expose people or structures to significant risk of loss, injury, or death from seismic-related ground failure, including liquefaction. Therefore, no impact would occur, and no further analysis of this issue is warranted.

a.iv.) **No Impact.** Landslides involve the downslope movement of soil and/or rock under the influence of gravity, often triggered by factors such as steep slopes, weak materials, elevated groundwater,

---

14 *California Geological Survey. CGS Seismic Hazards Program: Alquist-Priolo Fault Hazard Zones. Available online at: https://maps-cnra-cadoc.opendata.arcgis.com/datasets/cadoc::cgs-seismic-hazards-program-alquist-priolo-fault-hazard-zones/explore?location=36.281441%2C-119.787888%2C5.42 , accessed August 12, 2025*

15 *California Geological Survey, California Seismic Hazards Zones, available online at: https://www.conservation.ca.gov/cgs/shma, accessed August 27, 2025.*

16 *California Geologic Survey, EQ Zapp: California Earthquake Hazards Zone Application, available online at: https://www.conservation.ca.gov/cgs/geohazards/eq-zapp, accessed August 27, 2025.*

or seismic shaking. According to the CGS, the Project Site is not located within a mapped landslide hazard zone.[17] The Project Site and surrounding area are relatively flat and urbanized, with no significant natural or engineered slopes that could pose a landslide risk. The Project would not involve grading or construction on steep slopes, and no conditions exist on or adjacent to the Project Site that could result in slope instability. Therefore, the Project would not directly or indirectly cause substantial adverse effects, including the risk of loss, injury, or death involving landslides, and no impact would occur. No further analysis is warranted.

b) **Less Than Significant Impact.** Construction activities for both phases including grading, utility installation, and paving could temporarily expose soils to wind or water erosion during site preparation. The Project is required to comply with the State Water Resources Control Board's Construction General Permit as part of the National Pollutant Discharge Elimination System (NPDES), which requires preparation and implementation of a Stormwater Pollution Prevention Plan (SWPPP) with erosion and sediment control best management practices (BMPs), e.g., silt fencing, fiber rolls, stabilized construction entrances. The Project is also subject to the City's grading ordinance and BMC provisions for erosion control. Given the Project Site's relatively flat topography and urban surroundings, the potential for significant erosion is low. These regulatory compliance measures would minimize erosion during construction, and disturbed areas would be stabilized post-construction through paving, landscaping with drought-tolerant species, and other permanent improvements. As such, the Project would not result in substantial soil erosion or the loss of topsoil, and impacts would be less than significant. No further analysis is warranted.

c) **Less Than Significant Impact.** The Project Site is graded, relatively flat, and located in an urbanized area of the City. As discussed above, according to the CGS, the Project Site is not within a mapped liquefaction hazard zone, landslide zone, or other unstable geologic unit. No oil or gas extraction occurs on or adjacent to the Project Site.

Lateral spreading is typically associated with liquefaction during seismic events; because the site is not in a liquefaction zone and is underlain by compacted soils, the potential for lateral spreading is negligible. Subsidence in the Bakersfield area is generally associated with long-term deep groundwater or petroleum withdrawal; no such activities are present at or near the Project Site. A substantial amount of subsidence has occurred in agricultural zones east and southeast of the City and along major conveyance systems like the Friant-Kern Canal and California Aqueduct, away from the Project Site. Within the developed city, subsidence rates are much lower, although subsidence can still occur. The Project Site's urban setting, existing infrastructure, and absence of groundwater pumping on-site make the risk of subsidence low. The Project would not exacerbate subsidence in the region. The Project would be designed and constructed in compliance with the California Building Code, which includes seismic design standards to address potential ground shaking and settlement.

Given the absence of unstable geologic units or soils on the Project Site, the lack of nearby slopes or liquefaction-prone areas, and required adherence to applicable state and local building regulations, the Project would not be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the Project, in a manner that could result in on- or off-site

17 *California Geologic Survey, EQ Zapp: California Earthquake Hazards Zone Application, available online at: https://www.conservation.ca.gov/cgs/geohazards/eq-zapp, accessed August 27, 2025.*

landslide, lateral spreading, subsidence, liquefaction, or collapse. Therefore, no impact would occur, and no further analysis of this issue is warranted.

d) **Less Than Significant Impact.** A site-specific geotechnical investigation for the Project would include laboratory testing of near-surface soils in accordance with Uniform Building Code (UBC) Test Standard 18-1 (1994). Expansion Index values and expansion potential are based on UBC Table 18-1-B. The Project Site is situated on the Kern River alluvial fan within an urbanized area of the City where soils are predominantly Wasco sandy loam, which does not have a high Expansion Index value.[18] Additionally, no evidence of landslides, lateral spreading, or substantial regional subsidence is present at or adjacent to the Project Site. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

e) **No Impact.** The Project Site is located in an urbanized area of the City with existing municipal sewer infrastructure in adjacent roadways. Wastewater generated by the Project would be conveyed via new on-site laterals to the City's sanitary sewer system, operated in coordination with the Bakersfield Water Department and Kern County Public Works. The Project would not use septic tanks or alternative wastewater disposal systems; therefore, soil characteristics related to septic system suitability are not applicable. Because the Project would connect to existing sewer facilities with adequate capacity, no new or expanded off-site wastewater treatment facilities are required. Therefore, no impact would occur, and no further analysis of this issue is warranted.

f) **Potentially Significant Impact.** Paleontological resources are the fossilized remains or traces of prehistoric plant and animal life, exclusive of human remains and artifacts. The Project Site is underlain by Holocene-age fan and basin deposits. While Holocene alluvium is of high preservation value, its young age makes the occurrence of fossil material less likely. However, excavation extending into deeper Pleistocene alluvial sediments, which are known to have a higher potential to contain scientifically significant fossils, could occur during grading, utility trenching, or foundation work, particularly for subsurface features such as the temple basement, utility connections, or other below-grade improvements.

Although the extent of excavation and depth of disturbance would vary across the Project Site, there is an unknown potential for inadvertent discovery of paleontological resources during earthwork. Because such resources, if present, could be damaged or destroyed without appropriate monitoring and recovery protocols, there is a possibility that the Project could directly or indirectly result in the loss of unique paleontological resources or unique geologic features.

Given the uncertainty of site-specific paleontological sensitivity and the need to develop measures to ensure that any inadvertent discoveries are appropriately managed to avoid significant impacts, the potential impact is considered potentially significant. Therefore, this topic will be further analyzed in the Cultural Resources section of the EIR.

---

18 *United States Department of Agriculture, Natural Resource Conservation Service, Web Soil Survey, available online at: https://websoilsurvey.nrcs.usda.gov/app/, accessed August 27, 2025.*

8. GREENHOUSE GAS EMISSIONS

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project:				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	☒	☐	☐	☐
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	☒	☐	☐	☐

Impacts

a) **Potentially Significant Impact.** Construction and operation of the Project would result in the generation of greenhouse gas (GHG) emissions from sources such as construction equipment, worker and vendor trips, and operational energy and water use. While the Project would be subject to existing regulations designed to reduce GHG emissions, the precise magnitude of those emissions relative to applicable thresholds has not been quantified. Therefore, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

b) **Potentially Significant Impact.** The Project Site is subject to adopted plans and policies to reduce GHG emissions, such as the City of Bakersfield Climate Action Plan and statewide GHG reduction mandates. It is unknown at this time if the Project's construction and operations would conform with all applicable plans, policies, and/or regulations for reducing GHG emissions. Therefore, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

9. HAZARDS & HAZARDOUS MATERIALS

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project:				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	☒	☐
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	☒	☐
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☒	☐
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☐	☒
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	☐	☐	☐	☒
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☒	☐
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	☐	☐	☐	☒

Impacts

a) **Less Than Significant Impact.** Construction of the Project would involve the short-term use of common hazardous materials such as fuels, lubricants, paints, solvents, and adhesives. These materials would be stored, handled, transported, and disposed of in accordance with applicable federal, state, and local regulations, including those enforced by the U.S. Environmental Protection Agency, California Environmental Protection Agency, and Bakersfield Fire Department. Compliance with these requirements would minimize the potential for accidental release. During operation,

hazardous materials would be limited to small quantities of cleaning products, landscape maintenance chemicals, and similar consumer-grade products. No acutely hazardous materials, as defined by CalEPA, would be used or stored on site in reportable quantities. If an accidental release occurs during construction or operation, the contractor/operator would implement spill containment and cleanup measures and notify the appropriate agencies in accordance with regulatory requirements. Thus, given the limited types and quantities of hazardous materials involved, and mandatory compliance with applicable regulations, the Project would not create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

b) **Less Than Significant Impact.** Construction of the Project would involve the short-term use of hazardous substances typical of construction sites, such as petroleum-based fuels, lubricants, and hydraulic fluids for equipment. These materials would be stored, handled, and used in accordance with applicable federal, state, and local regulations, including those enforced by the U.S. Environmental Protection Agency, California Environmental Protection Agency, Kern County Environmental Health Services, and the City of Bakersfield. Contractors would implement standard spill prevention and response measures, including secondary containment for fuel storage, immediate cleanup of any releases, and required agency notifications. During operation, hazardous materials use would be limited to small quantities of consumer-grade cleaning products, landscaping chemicals, and fuel for maintenance equipment. These materials would be used and stored in compliance with manufacturer instructions and applicable regulations, minimizing the potential for accidental release.

The Project Site is not listed as a hazardous materials site on databases maintained by the California Department of Toxic Substances Control's EnviroStor database,[19] the State Water Resources Control Board's GeoTracker database,[20] and the current "Cortese" list.[21] A Phase I Environmental Site Assessment prepared by Terracon Consultants, Inc., in June 2025 identified no recognized environmental conditions, controlled recognized environmental conditions, or historical recognized environmental conditions on the site.[22] Thus, given the limited types and quantities of hazardous materials involved, the absence of known contamination, and mandatory compliance with applicable regulations, the Project would not create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

c) **Less Than Significant Impact.** Bakersfield Christian High School, located at 12775 Stockdale Highway, is located within one-quarter mile of the Project Site. Construction and operation of the Project would involve the use of small quantities of hazardous materials typical of building activities and ongoing

---

19 *California Department of Toxic Substances Control, EnviroStor. Available online at: https://www.envirostor.dtsc.ca.gov/public/map/?myaddress=stockdale+and+jewetta, accessed August 12, 2025.*

20 *State Water Resources Control Board, GeoTracker. Available online at https://geotracker.waterboards.ca.gov/map/?CMD=runreport&myaddress=stockdale+and+jewetta+ave , accessed August 12, 2025.*

21 *California Department of Toxic Substances Control, Hazardous Waste and Substances Site List (Cortese). 22 *Terracon, Bakersfield Temple Phase I Environmental Site Assessment, June 2025. See Appendix A to this Initial Study.*

maintenance (e.g., fuels, lubricants, cleaning products). These materials would be stored, handled, and disposed of in accordance with applicable federal, state, and local regulations, including those enforced by the CalEPA, Department of Toxic Substances Control, Kern County Environmental Health Services, and Bakersfield Fire Department. Given the minimal quantities involved, adherence to regulatory requirements, and standard best management practices for spill prevention and cleanup, the Project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste in a manner that would pose a significant risk to nearby schools. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

d) **No Impact.** Government Code Section 65962.5, commonly referred to as the "Cortese List," requires the CalEPA to compile and annually update a list of hazardous waste sites and properties. Data sources include the Department of Toxic Substances Control's EnviroStor database, the State Water Resources Control Board's GeoTracker database, and other agency records. A Phase I Environmental Site Assessment for the Project was prepared by Terracon Consultants, Inc., in June 2025 (available in Appendix A to this Initial Study). As discussed above, the Project Site is not included on any list of these hazardous materials sites compiled pursuant to Government Code Section 65962.5. The site is currently vacant, graded, and has no history of uses that would have generated or stored hazardous materials in reportable quantities. Because the Project Site is not listed on the Cortese List or any related database, development of the proposed Project would not create a significant hazard to the public or the environment under this threshold. Therefore, no impact would occur, and no further analysis of this issue is warranted.

e) **No Impact.** The Project Site is not located within the boundaries of any Airport Land Use Compatibility Plan or within two miles of a public airport or public use airport. The nearest public use airport is Bakersfield Municipal Airport, located approximately eight miles southeast of the Project Site, well outside the 2-mile screening distance. The Project Site is also outside the 65 dB CNEL noise contour for this airport and is not within any designated airport safety zones. No private airstrips are located within two miles of the Project Site. Therefore, implementation of the Project would not result in a safety hazard or expose people residing or working in the Project area to excessive noise levels. Therefore, no impact would occur, and no further analysis of this issue is warranted.

f) **Less Than Significant Impact.** The approach to evacuations in the City and Kern County is a dynamic zone-based system, which is a more modern and effective method as it allows for a targeted response to the specific location of an emergency instead of pre-determined evacuation routes.[23] The Project would not interfere with the real-time monitoring and evacuation coordination system used by the City and Kern County. Moreover, as part of the City's standard development review process, the Bakersfield Police Department and Bakersfield Fire Department review project plans prior to construction to ensure that safety considerations and emergency access are incorporated into the design and maintained. The Project does not anticipate closure of any public or private streets and would use existing on-site driveways for emergency vehicle access. Construction activities would be confined to the Project Site and would include provisions for detour signage, trained flaggers, and staging areas for emergency vehicles, as required by the City's police and fire agencies, should they be needed. Therefore, the Project would not impair implementation of or physically interfere with an

23 *Kern County Fire Department, KCFD News, "A New Evacuation Management Tool Activated in Kern County," August 18, 2023, https://kerncountyfire.org/15143/a-new-evacuation-management-tool-activated-in-kern-county/, accessed August 27, 2025.*

adopted emergency response plan or emergency evacuation plan. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

g) **No Impact.** According to the California Department of Forestry and Fire Protection (CAL FIRE), the Project Site is located in a Local Responsibility Area and is not within a designated Fire Hazard Severity Zone.[24] The Project Site is in an urbanized area, surrounded by residential, commercial, religious institutional, and manicured park, and does not contain wildland vegetation or steep terrain that would contribute to wildfire risk. The Bakersfield Fire Department provides fire protection services to the area. Implementation of the Project would not expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires. Therefore, no impact would occur, and no further analysis of this issue is warranted.

---

10. HYDROLOGY & WATER QUALITY

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project:				
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	☐	☐	☒	☐
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such the project may impede sustainable groundwater management of the basin?	☐	☐	☒	☐
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:				
i) result in substantial erosion or siltation on- or off-site;	☐	☐	☒	☐
ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;	☐	☐	☒	☐
iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	☐	☐	☒	☐
iv) impede or redirect flood flows?	☐	☐	☒	☐
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	☐	☐	☐	☒
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	☐	☐	☐	☒

Impacts

a) **Less Than Significant Impact.** Construction of the Project would involve grading, utility installation, and paving that could temporarily increase erosion and sedimentation in stormwater runoff. The Project would be subject to the State Water Resources Control Board's Construction General Permit (Order 2009-0009-DWQ, as amended), which requires preparation and implementation of a SWPPP with erosion and sediment control BMPs such as silt fencing, fiber rolls, stabilized construction entrances, and inlet protection. The Project must also comply with the City's NPDES MS4 Permit (No. CA00883399), and Kern County Public Works post-construction BMP requirements. During operation, potential stormwater pollutants would be limited to those

associated with parking areas, landscaped areas, and building maintenance (e.g., oils, grease, fertilizers, pesticides). These would be addressed through site design features, source control measures, and treatment controls consistent with the City's MS4 Permit and Kern County standards. The Project Site is graded and relatively flat, reducing erosion potential, and no septic systems or direct discharges to groundwater are proposed. Thus, with compliance with applicable state and local regulatory requirements and implementation of appropriate construction and post-construction BMPs, the Project would not violate water quality standards or waste discharge requirements, nor substantially degrade surface or groundwater quality. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

b) **Less Than Significant Impact.** The proposed Project would be served by the City's municipal water system, which obtains water from a combination of surface water and groundwater sources overseen by the Kern River Groundwater Sustainability Agency. The Project is expected to use approximately 16.6 to 17.1 acre-feet of water each year based on the landscape design and building program. Most of this demand would come from irrigating the Project Site's 256,674 square feet of landscaped areas, which are designed with drought-tolerant plants and efficient irrigation systems. Indoor water use for the temple and meetinghouse would be minimal by comparison, thanks to efficient fixtures and the intermittent nature of worship and assembly activities. Relative to the California Water Service – Bakersfield District's 2020 actual demand of about 66,000 acre-feet, the Project would account for roughly 0.026 percent of total demand. Compared to the District's projected 2045 demand of approximately 78,000 to 80,000 acre-feet, the Project's share would remain around 0.022 percent. Thus, the Project's contribution to Citywide water demand would be negligible in scale within existing entitlements and allocations. No on-site wells are proposed by the Project.

Project Site development would increase impervious surfaces; however, post-construction stormwater BMPs, including landscaped areas, would promote on-site percolation where feasible. The Project Site is not located within a designated groundwater recharge area, and underlying Wasco sandy loam soil type has moderate infiltration capacity. Thus, given the small incremental demand relative to available supplies, absence of direct groundwater extraction, and incorporation of infiltration BMPs, the Project would not substantially decrease groundwater supplies or interfere with recharge in a manner that would impede sustainable groundwater management of the basin. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

c.i.) **Less Than Significant Impact.** The Project Site is graded, relatively flat, and located in an urbanized area. There are no natural streams or rivers on or adjacent to the Project Site; therefore, the Project would not alter the course of a stream or river. Construction activities such as grading, trenching, and excavation would temporarily disturb soils, making them susceptible to erosion from wind or stormwater runoff. However, as the Project would disturb more than one acre, it must obtain coverage under the State Water Resources Control Board's Construction General Permit (NPDES), which requires preparation and implementation of a SWPPP. The SWPPP would include erosion and sediment control BMPs such as silt fencing, fiber rolls, stabilized construction entrances, and inlet protection. The Project would also comply with the City's grading and stormwater requirements and Kern County Public Works post-construction BMP standards to manage runoff from new impervious surfaces. Thus, given the Project Site's flat topography, absence of natural drainages, and required implementation of construction and post-construction BMPs, the Project would not substantially alter the existing drainage pattern in a manner that

would result in substantial erosion or siltation on- or offsite. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

c.ii.) **Less Than Significant Impact.** The Project Site is graded, relatively flat, and located in an urbanized area of the City. There are no natural streams or rivers on or adjacent to the Project Site; therefore, the Project would not alter the course of a stream or river. Development would introduce new impervious surfaces; however, site drainage would be designed to direct runoff to the City's storm drain system in compliance with the City's stormwater management requirements and Kern County Public Works post-construction BMP standards. Because the Project would disturb more than one acre, it must obtain coverage under the State Water Resources Control Board's Construction General Permit (NPDES), which requires preparation and implementation of a SWPPP. The SWPPP would include BMPs to control the rate and volume of runoff during construction. Post-construction, the Project would incorporate detention, infiltration, or other approved measures to ensure that peak runoff rates do not exceed pre-Project conditions. Moreover, according to the Federal Emergency Management Agency's Flood Map Service Center, the Project Site is outside the 100-year flood hazard area.[25] Given the Project Site's topography, absence of natural drainages, and required implementation of construction and post-construction BMPs, the Project would not substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or offsite. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

c.iii.) **Less Than Significant Impact.** The Project Site is graded, relatively flat, and located in an urbanized area of the City. There are no natural streams or rivers on or adjacent to the Project Site; therefore, the Project would not alter the course of a stream or river. Development would introduce new impervious surfaces; however, site drainage would be designed to direct runoff to the City's storm drain system in compliance with the City's stormwater management requirements and Kern County Public Works post-construction BMP standards. Because the Project will disturb more than one acre, it must obtain coverage under the State Water Resources Control Board's Construction General Permit (NPDES), which requires preparation and implementation of a SWPPP. The SWPPP would include erosion and sediment control BMPs during construction, and post-construction measures such as detention basins, infiltration areas, or flow-through treatment to ensure that post-Project peak runoff rates do not exceed pre-Project conditions and that the capacity of the existing/planned storm drain system is not exceeded. Potential pollutants in stormwater runoff from the completed project (e.g., oil and grease from parking areas, nutrients from landscaping, trash and debris) would be minimized through source control and treatment control BMPs consistent with City and state requirements. Thus, given the Project Site's topography, absence of natural drainages, and required implementation of construction and post-construction BMPs, the Project would not create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

c.iv.) **Less Than Significant Impact.** The Project Site is graded, relatively flat, and located in an urbanized area of the City. There are no natural streams, rivers, or other flood conveyance features on or

---

25 *Federal Emergency Management Agency, FEMA Flood Map Service Center. Available online at: https://msc.fema.gov/arcgis/rest/directories/arcgisjobs/nfhl_print/mscprintb_gpserver/j50a4fece810a4beba165d486b4b8349d/scratch/FIRMETTE_5b155c17-d0c9-403e-aab8-112038fe9556.pdf , accessed September 6, 2024.*

adjacent to the Project Site; therefore, the Project would not alter the course of a stream or river. As discussed above, according to the Federal Emergency Management Agency's Flood Map Service Center, the Project Site is outside the 100-year flood hazard area and is identified as having minimal flood risk.

Site grading and building placement would be designed to maintain existing overland flow paths and direct stormwater to the City's storm drain system in compliance with the City's stormwater management requirements and Kern County Public Works post-construction BMP standards. Because the Project would disturb more than one acre, it must also obtain coverage under the State Water Resources Control Board's Construction General Permit (NPDES), which requires preparation and implementation of a SWPPP to manage runoff during construction. Thus, given the Project Site's topography, absence of flood conveyance features, and required implementation of construction and post-construction BMPs, the Project would not impede or redirect flood flows. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

d) **Less Than Significant Impact**. The Project Site is graded, relatively flat, and located in an urbanized area of the City. As discussed above, the Project Site is outside the Federal Emergency Management Agency's 100-year flood hazard area and is designated Zone X (minimal flood risk). The Project Site is approximately 70 miles inland from the nearest point of the Pacific Ocean and is not subject to tsunami hazards. The California Department of Water Resources dam inundation mapping indicates the Project Site is not within a designated dam failure inundation zone.[26] There are no large water bodies in the vicinity that could generate a seiche affecting the Project Site.

The Project would not store or use hazardous materials in reportable quantities; hazardous materials use would be limited to small amounts of cleaning products, landscaping chemicals, and maintenance fuels, all handled in compliance with applicable regulations. Therefore, even in the unlikely event of inundation, there would be no substantial risk of pollutant release. Thus, based on the Project Site's location, topography, and absence of significant inundation hazards, the Project would not result in the release of pollutants in a flood hazard, tsunami, or seiche zone. Therefore, no impact would occur, and no further analysis of this issue is warranted.

e) **No Impact.** The Project Site is within the jurisdiction of the Central Valley Regional Water Quality Control Board and subject to the Water Quality Control Plan for the Tulare Lake Basin (Basin Plan). The Basin Plan identifies beneficial uses for surface and groundwater in Kern County, establishes water quality objectives, and outlines implementation programs to achieve those objectives. The Project would comply with applicable Basin Plan requirements through implementation of construction and post-construction BMPs consistent with the City's stormwater management standards and the State Water Resources Control Board's Construction General Permit (NPDES), including preparation of a SWPPP.

The Project Site overlies the Kern County Subbasin of the San Joaquin Valley Groundwater Basin, overseen by the Kern River Groundwater Sustainability Agency pursuant to the Sustainable Groundwater Management Act (SGMA). The Project would be served by the City's municipal water system and would not involve direct groundwater extraction. Project water demand is

---

26 *California Department of Water Resources, "California Dam Breach Inundation Maps." Available online at: https://fmds.water.ca.gov/maps/damim/. Accessed August 12, 2025.*

within the City's existing entitlements and consistent with the sustainable management criteria for Kern County Subbasin groundwater.

Because the Project would adhere to the Basin Plan's water quality requirements and would not conflict with the Groundwater Sustainability Plan, it would not conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan. Therefore, no impact would occur, and no further analysis of this issue is warranted.

11. LAND USE AND PLANNING

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project:				
a) Physically divide an established community?	☐	☐	☐	☒
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	☒	☐	☐	☐

Impacts

a) **No Impact.** The Project Site is located within an existing urbanized area of the City and is surrounded by developed land uses, including residential, commercial, and religious institutional uses. The proposed development would occur entirely within the boundaries of the Project Site, which are existing parcels intended for urbanized development, and would not introduce new roadways, barriers, or other physical features that would bisect or isolate any portion of the surrounding community. The Project would maintain existing public street connections and would not alter established circulation patterns in a way that would physically divide an established community. Therefore, no impact would occur, and no further analysis of this issue is warranted.

b) **Potentially Significant Impact.** The Project is subject to the General Plan, zoning ordinance, and other applicable local and regional plans that include policies and regulations intended to avoid or mitigate environmental effects, such as those related to noise, traffic, air quality, visual resources, and biological resources. The Project include a zoning modification to construct the steeples for the temple and meetinghouse as proposed (i.e., 123 feet 6 inches and 66 feet 4 inches, respectively, where 60 feet is permitted in the C-O zone), which achieve heights beyond the current zoning height limitations. Thus, given the Project's scale, height, and potential for environmental effects in multiple resource areas, there is a possibility that certain design elements or operational characteristics could conflict with applicable policies or regulations adopted for environmental protection. Therefore, this issue will be further analyzed in the EIR.

12. MINERAL RESOURCES

Issues	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☒
b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☒

Impacts

a) **No Impact.** According to the California Department of Conservation Division of Mine Reclamation, and the California Geological Survey's Mineral Land Classification maps, the Project Site has no active mines and is designated as MRZ-1.[27, 28] The MRZ-1 classification is an area where adequate information indicates that no significant mineral deposits are present, or that the likelihood for their presence is minimal.[29] The General Plan does not designate the Project Site or surrounding area for Mineral Petroleum (R-MP), which is assigned to parcels that contain producing, or potentially productive, petroleum fields and mineral deposits. Implementation of the Project would not result in the loss of availability of a known mineral resource that would be of value to the region or residents of the state, nor would it encroach on, or otherwise indirectly affect, existing mineral resource areas. Therefore, no impact would occur, and no further analysis of this issue is warranted.

b) **No Impact.** The City's General Plan and California Department of Conservation mapping indicate the Project Site is not delineated as a locally important mineral resource recovery site, nor are such sites located adjacent to the Project Site. The Project would not preclude access to, or otherwise indirectly affect, any important local mineral resource recovery area such as area designated by the General Plan as Mineral Petroleum (R-MP). Therefore, no impact would occur, and no further analysis of this issue is warranted.

---

13. NOISE

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project result in:				
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☒	☐	☐	☐
b) Generation of excessive groundborne vibration or groundborne noise levels?	☒	☐	☐	☐
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒

Impacts

a) **Potentially Significant Impact.** Construction of the Project would involve activities such as site preparation, grading, building construction, and paving, which would require the use of heavy equipment (e.g., excavators, dozers, haul trucks) that can generate high noise levels. These activities could result in temporary increases in ambient noise that may exceed the City's noise ordinance limits at nearby sensitive receptors, particularly during early morning or evening hours. In addition, Project operations could introduce new stationary noise sources (e.g., mechanical equipment, HVAC systems) and increased traffic volumes that may elevate long-term ambient noise levels. Because the potential exists for both construction and operational noise to exceed applicable standards, this impact is considered potentially significant and will be further analyzed in the EIR.

b) **Potentially Significant Impact.** Construction activities such as grading, compaction, and potential use of impact equipment (e.g., pile drivers, vibratory rollers) could generate groundborne vibration levels perceptible at nearby structures. Depending on proximity, these vibration levels could cause annoyance to occupants or, in extreme cases, cosmetic damage to older or more fragile buildings. While operational activities are not expected to produce substantial vibration, the potential for construction-related vibration impacts warrants detailed evaluation. Therefore, this impact is considered potentially significant and will be further analyzed in the EIR.

c) **No Impact.** The Project Site is not located within an airport land use plan area, within two miles of a public airport or public use airport, or within the vicinity of a private airstrip. As such, there would be no exposure of people in the Project area to excessive aircraft-related noise levels. Therefore, no impact would occur, and no further analysis is warranted.

14. POPULATION AND HOUSING

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the Project:				
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	☐	☐	☒	☐
b) Displace substantial numbers of existing people or housing units, necessitating the construction of replacement housing?	☐	☐	☐	☒

Impacts

a) **Less Than Significant Impact.** A Project could induce population growth in an area either directly, through the development of new housing or businesses, or indirectly, through the extension of roads or other infrastructure. The Project does not include the addition or removal of housing and would, therefore, have no direct impact on population or housing forecasts identified in City and regional growth projections. The Project is consistent with the Project Site's existing land use designation and zoning (from a land use perspective), which anticipated the type of development proposed (i.e., an area-serving, non-residential land use).

Although the Project would generate additional employment opportunities, it is anticipated that the workforce would primarily consist of existing residents in the Bakersfield area. Any potential employees who may permanently relocate to the region as a direct result of the Project is expected to be minimal. Estimating such relocation would be highly speculative due to multiple factors (e.g., family income, housing cost and availability). Furthermore, the Project does not require extension of new infrastructure or utilities beyond the immediate service connections to the Project Site, thereby avoiding growth inducement through expanded service corridors.

As of 2025, the City has an estimated population of 419,238 persons.[30] Given the scale of the Project and the above considerations, any potential increase in population would be nominal and within planned growth assumptions. Therefore, the Project would not induce substantial unplanned population growth, either directly or indirectly, and associated impacts would be less than significant. No further analysis of this issue is warranted.

b) **No Impact.** The Project Site is currently vacant and contains no existing housing units or residents. The Project would not involve demolition, removal, or alteration of any residential structures, nor would it require acquisition of off-site properties that could contain housing. The Project Site's existing land use designation and zoning do not identify it for residential use, and the Project does

30 *California Department of Finance. E-1 Population and Housing Estimates for Cities, Counties, and the State – January 1, 2024 and 2025, May 2025. Available online at: https://dof.ca.gov/forecasting/demographics/estimates-e1/, accessed August 27, 2025.*

not propose any changes that would indirectly displace housing elsewhere. Therefore, the Project would not displace substantial numbers of existing people or housing units, and no construction of replacement housing would be necessitated. No Impact would occur, and no further analysis of this issue is warranted.

15. PUBLIC SERVICES

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a) Fire protection?	☐	☐	☒	☐
b) Police protection?	☐	☐	☒	☐
c) Schools?	☐	☐	☒	☐
d) Parks?	☐	☐	☒	☐
e) Other public facilities?	☐	☐	☒	☐

Impacts

a) **Less Than Significant Impact.** Fire protection services for the Project Site are provided by the Bakersfield Fire Department, with the nearest fire station, Fire Station No. 15, located at 1301 Buena Vista Road, approximately 1.1 miles southeast of the Project Site. The Project would not induce population growth that could increase service demand beyond existing capacity. The Project would primarily serve existing members in the Bakersfield region and would not require the construction of new or physically altered fire protection facilities to maintain acceptable service ratios, response times, or other performance objectives. Any additional personnel needed for special events would be dispatched from existing stations. As no new or expanded fire facilities are required, the Project would not result in associated environmental impacts. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

b) **Less Than Significant Impact.** Police protection services for the Project Site are provided by the Bakersfield Police Department, with the nearest station, Westside Police Substation, located at 1301 Buena Vista Road, approximately 1.1 miles southeast of the Project Site. The Project would primarily serve existing members in the Bakersfield region and would not induce population growth that could increase demand for police services beyond existing capacity. The Project's operational characteristics are not expected to generate unusual or sustained service calls. Any additional personnel needed for special events would be dispatched from existing stations. The Project would not require the construction of new or physically altered police facilities to maintain acceptable service ratios, response times, or other performance objectives. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

c) **Less Than Significant Impact**. The Project Site is located within the Rosedale Union School District, which includes elementary and middle schools, and Kern High School District. Public schools that

serve the Project Site include American Elementary School, located at 800 Verdugo Lane; Rosedale Middle School, located at 12463 Rosedale Highway; and Liberty High School, located at 925 Jewetta Avenue. The Project would primarily serve existing members in the Bakersfield region and would not induce population growth that could increase student enrollment beyond existing capacity. The Project's operational characteristics are not expected to generate sustained or unusual school service demands.

Moreover, pursuant to the Leroy F. Greene School Facilities Act of 1998 (Senate Bill 50), codified in part at Government Code Section 65995 *et seq.*, the payment of state-mandated school impact fees to Rosedale Union School District and Kern High School District would be deemed by statute to be full and complete mitigation of any school facility impacts associated with the Project. Unless waived by the affected school districts for this Project, the Project would be required to pay applicable school impact fees at the time of building permit issuance, consistent with SB 50 requirements. Since the Project would not require the construction of new or physically altered school facilities beyond those addressed through SB 50 fees, and such payment constitutes complete mitigation under CEQA, impacts on schools would be less than significant, and no further analysis is warranted.

d) **Less Than Significant Impact**. The Bakersfield Parks and Recreation Department operates over 65 parks and community facilities for public recreation and community services. The nearest park to the Project Site is Aera Park, located across Jewetta Avenue less than 0.1 mile to the east. The Project would primarily serve existing members in the Bakersfield region and does not include residential uses; therefore, it would not induce population growth that could increase demand for neighborhood or regional parks. In addition, the Project design includes landscape plazas and gardens available to the public, providing incidental recreational opportunities onsite. No new or expanded public park facilities would be required, and no physical deterioration of existing facilities would occur or be accelerated. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

e) **Less Than Significant Impact**. The Southwest Branch Library, a branch of the Kern County Library, is located at 8301 Ming Avenue, approximately 3.1 miles east of the Project Site, and serves residents of the City. The Project would primarily serve existing members in the Bakersfield region and does not include residential uses; therefore, it would not induce population growth that could increase demand for libraries or other public facilities such as community centers, civic buildings, or cultural venues. No new or expanded public facilities would be required, and no physical deterioration of existing facilities would occur or be accelerated. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

16. RECREATION

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☒	☐
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?	☐	☐	☒	☐

Impacts

a) **Less Than Significant Impact.** The Project proposes development of an approximately 13-acre religious campus intended to serve the existing Bakersfield region. The Project does not include residential uses and would not generate population growth that could increase demand for neighborhood or regional parks. In addition, the Project itself would include publicly accessible landscaped areas, plazas, and gardens for patrons to enjoy during daytime hours. These on-site amenities would provide opportunities for informal outdoor use associated with the Project activities, further reducing the likelihood that patrons would rely on nearby public parks for passive recreation.

Any incidental use of neighborhood or regional parks by attendees is expected to be minimal and well within the capacity of existing facilities. As such, the Project would not require new or expanded park facilities, and it would not cause or accelerate physical deterioration of existing recreational facilities. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

b) **Less Than Significant Impact.** The Project is located on a vacant parcel and does not propose any off-site recreational facilities. No residential uses are included; therefore, the Project would not generate new demand for neighborhood or regional parks that could require the construction or expansion of such facilities. The Project's design includes landscape plazas and gardens that will be available to the public. These features would be constructed and maintained entirely within the Project Site and would not create demand for additional off-site recreational resources. As such, no physical environmental effects associated with the construction of new or expanded public recreational facilities would occur, and impacts would be less than significant. No further analysis of this issue is warranted.

17. TRANSPORTATION

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project:				
a) Conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	☒	☐	☐	☐
b) Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	☒	☐	☐	☐
c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☒	☐	☐	☐
d) Result in inadequate emergency access?	☐	☐	☒	☐

Impacts

a) **Potentially Significant Impact.** The Project would generate additional vehicle trips during both construction and operation, potentially affecting the performance and safety of the surrounding circulation network. Depending on design features and trip distribution, there could be conflicts with adopted plans and policies intended to promote multimodal transportation, such as policies from the City's General Plan Circulation Element, Bicycle Master Plan, and Complete Streets initiative. Potential impacts could include reduced roadway capacity, impediments to bicycle or pedestrian connectivity, or interference with transit operations. Therefore, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

b) **Potentially Significant Impact.** State CEQA Guidelines Section 15064.3(b) establishes vehicle miles traveled (VMT) as the primary metric for evaluating transportation impacts. The Project could result in VMT levels exceeding applicable thresholds for its land use type and location, particularly if it generates substantial regional trip lengths or induces additional travel demand. The potential for inconsistency with VMT reduction goals and related GHG reduction strategies warrants a quantified VMT analysis. Therefore, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

c) **Potentially Significant Impact.** Project driveways, internal circulation, and interface with the surrounding roadway network could introduce new design features that increase collision risk or create unsafe conditions for motorists, bicyclists, or pedestrians should the Project include inadequate sight distance, unconventional intersection configurations, or driveway placements on high-volume roadways. Therefore, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

d) **Less Than Significant Impact.** The Project Site is located within an urbanized area served by an established public street network, including direct frontage on Stockdale Highway (classified as

an Arterial) and Jewetta Avenue (classified as a Collector) that provide unobstructed access for emergency vehicles. The Project's site plan has been reviewed by City staff, including the City Fire Department, and confirmed to meet all applicable emergency access requirements of the BMC, California Fire Code, and City development standards. The design provides multiple driveways, adequate turning radii, and clear fire lane widths to accommodate emergency apparatus, and no roadway closures or access restrictions are proposed during construction or operation. As such, the Project would not result in inadequate emergency access, and impacts would be less than significant. No further analysis of this issue is warranted.

18. TRIBAL CULTURAL RESOURCES

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or	☒	☐	☐	☐
b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	☒	☐	☐	☐

Impacts

a) **Potentially Significant Impact.** Tribal cultural resources may be present at the Project Site, including sites, features, places, cultural landscapes, sacred places, and objects with cultural value to California Native American tribes. Ground-disturbing activities such as grading, excavation, and utility installation could damage or destroy such resources, if present. This impact is considered potentially significant and will be further analyzed in the EIR. This topic will be consolidated into the Cultural Resources section of the EIR.

b) **Potentially Significant Impact.** Even if a tribal cultural resource is not formally listed in, or eligible for, the California Register or a local register, it may still be considered significant by the lead agency based on substantial evidence and in consultation with California Native American tribes. The Project Site may contain resources that meet the significance criteria in Public Resources Code Section 5024.1(c), such as association with cultural practices, beliefs, or traditions of a tribe. Construction activities could result in the alteration or destruction of such resources. Therefore, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts. This topic will be consolidated into the Cultural Resources section of the EIR.

19. UTILITIES & SERVICE SYSTEMS

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
Would the project:				
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	☐	☐	☒	☐
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	☐	☐	☒	☐
c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☒	☐
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	☐	☐	☒	☐
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	☐	☐	☒	☐

Impacts

a) **Less Than Significant Impact.** The proposed Project would incrementally increase demand for water, wastewater, stormwater, electric, natural gas, or telecommunications. The Project would connect to existing infrastructure and utilities, all of which have sufficient capacity to accommodate the proposed development without requiring the relocation or construction of new or expanded off-site facilities that could cause significant environmental effects.

Potable water service to the project site would be provided by the City of Bakersfield's Domestic Water System, which is managed by the City's Water Resources Department and operated under contract by California Water Service (Cal Water). The system serves approximately 48,140 municipal connections and, in 2020, delivered 45,649 acre-feet of water to customers. According to the City's 2020 Urban Water Management Plan, the Domestic Water System has adequate supplies to meet existing and projected demands under normal, single-dry-year, and multiple-dry-year conditions through 2045. The Project's estimated annual demand of approximately 16.6 to 17.1 acre-feet represents roughly 0.026 percent of current citywide demand and about 0.022 percent of projected 2045 demand. This

incremental increase can be accommodated within existing system capacity. No new or expanded off-site water treatment or major distribution facilities would be required to serve the project; only standard service connections and on-site infrastructure would be installed. Therefore, the Project would not result in the need for new or expanded water supply entitlements or facilities, and impacts related to water supply would be less than significant.

Wastewater generated by the Project would be collected and conveyed via the City of Bakersfield's municipal sewer system, operated by the City's Wastewater Division. The City's wastewater system serves the urbanized area through two treatment plants: Wastewater Treatment Plant No. 2 and the North of the River Sanitary District Plant, which together provide a total treatment capacity of approximately 48 million gallons per day (MGD). In 2020, average daily flows were well below permitted capacity, leaving adequate reserve capacity to accommodate additional development. Moreover, the Project's wastewater generation, based on its limited occupancy and assembly-type use, would represent a negligible increase in system flows relative to existing capacity. The City has confirmed that the existing collection and treatment infrastructure in the service area is adequate to serve the Project without the need for new or expanded off-site wastewater treatment or major conveyance facilities. Only standard on-site laterals and connections to existing mains would be required. It should be noted that the Project would comply with all applicable federal, state, and local wastewater regulations, including the City's sewer connection requirements and the treatment plants' NPDES permits.

Stormwater in the Bakersfield metropolitan area is managed through a joint MS4 operated by the City of Bakersfield and Kern County under a NPDES permit issued by the Central Valley Regional Water Quality Control Board (NPDES No. CA00883399). The system includes a network of underground storm drains, inlets, and approximately 200 retention basins that capture and manage urban runoff before discharge to the Kern River, canals, or infiltration facilities. The Project would incorporate site-specific drainage improvements consistent with the City's Storm Water Management Plan and Municipal Code Chapter 8.34, including low-impact development (LID) features and BMPs to control the volume and quality of runoff. Post-development peak flows would be managed on-site to avoid exceeding pre-Project conditions, and runoff would be directed to the existing municipal storm drain system via standard service connections. The City has confirmed that the existing storm drainage infrastructure in the service area has adequate capacity to accommodate the Project's incremental runoff. No new or expanded off-site drainage facilities would be required beyond the Project's on-site improvements. The Project would comply with all applicable NPDES permit requirements, including construction-phase erosion and sediment control measures and post-construction stormwater quality standards.

Pacific Gas and Electric Company (PG&E) would provide electrical service to the Project Site, which is located within an urbanized area already served by existing distribution infrastructure along Stockdale Highway and Jewetta Avenue. Based on California Energy Commission demand factors for religious assembly uses, the Project's estimated peak load of approximately 150–200 kW can be accommodated by the existing local distribution circuit and substation without requiring new or expanded off-site electric power facilities, and any necessary service connections or minor equipment upgrades would occur on-site or within existing utility corridors, avoiding the need for construction or relocation of facilities that

could cause significant environmental effects; therefore, impacts would be less than significant.

Southern California Gas Company (SoCalGas) provides natural gas service to the Bakersfield area through existing distribution mains in the public rights-of-way along Stockdale Highway and Jewetta Avenue adjacent to the Project Site. The City allows natural gas in new construction, subject to compliance with the California Building Standards Code (Title 24) and applicable efficiency requirements. Based on California Energy Commission energy intensity factors for religious assembly uses, the combined 46,500 square feet of proposed building area is estimated to have a peak annual natural gas demand of approximately 7,000–9,300 therms, which can be accommodated by existing infrastructure without the need for new or expanded off-site facilities. Any necessary service connections or meters would be installed onsite or within previously disturbed utility corridors, avoiding the construction or relocation of facilities that could cause significant environmental effects; therefore, impacts would be less than significant.

Telecommunications services in the Project area are provided by multiple carriers with existing underground and overhead infrastructure within the public rights-of-way along Stockdale Highway and Jewetta Avenue. Service to the Project, if selected by the operator, would be extended via standard connections from these existing facilities, with any necessary installation limited to on-site conduit, wiring, and equipment pads. No new or expanded off-site telecommunications facilities such as cell towers, switching stations, or major fiber trunk lines would be required, and all work would occur within previously disturbed areas. As a result, the Project would not necessitate the relocation or construction of telecommunications facilities that could cause significant environmental effects, and impacts would be less than significant.

Overall, because the Project's potable water, wastewater, stormwater, electricity, natural gas, and telecommunications demands can all be met by existing municipal and utility infrastructure with only standard on-site connections or minor improvements in previously disturbed area, and without the need for new or expanded off-site facilities that could cause significant environmental effects, impacts related to utilities and service systems would be less than significant. No further analysis is warranted.

b) **Less Than Significant Impact.** The proposed Project would be served by the City of Bakersfield's Domestic Water System, managed by the City's Water Resources Department and operated under contract by California Water Service (Cal Water). In 2020, the system included 48,140 municipal connections and supplied 45,649 acre-feet of water from a combination of surface water and groundwater sources. The Project Site is within the City's service area and planned growth boundary.

The Project is expected to generate an annual water demand of approximately 16.6 to 17.1 acre-feet per year, with the majority of use attributable to landscape irrigation across 256,674 square feet of drought-tolerant planting areas. Indoor water use for the temple and meetinghouse is expected to be minimal due to efficient fixtures and intermittent occupancy typical of worship and assembly uses. According to the 2020 Urban Water Management Plan (UWMP) prepared for the California Water Service – Bakersfield District, total Citywide water demand was approximately 66,000 acre-feet in 2020 and is projected to increase to

approximately 78,000 to 80,000 acre-feet per year by 2045 under normal and dry hydrologic conditions. The Project's estimated demand represents approximately 0.026 percent of current Citywide demand and 0.022 percent of projected 2045 demand within existing entitlements and allocations. Therefore, given the Project's modest water use relative to citywide totals, its compliance with water efficiency standards, and the availability of long-term water supplies identified in the UWMP, the Project would not result in a significant impact on water supply resources.

Because the Project is within the service area of a water provider with documented, reliable supplies under all hydrologic conditions evaluated in the UWMP, and because its demand is within forecasted growth assumptions, the Project would have a less than significant impact. No further analysis is warranted.

c) **Less Than Significant Impact**. The Project would be served by the City of Bakersfield Wastewater Division via Wastewater Treatment Plant (WWTP) No. 3, located at 6901 McCutchen Road, which has a permitted capacity of 32 MGD and currently treats an average of 17.3 MGD, with approximately 14.7 MGD of available capacity.[31] Based on typical wastewater generations factors for assembly-type uses (approximately 15 gallons per occupant per day) and the Project's peak non-overlapping occupancies of up to 280 persons for the temple and 300 persons for the meetinghouse, the Project maximum daily wastewater generation is estimated to be approximately 8,700 gallons per day, or 0.0087 MGD. This represents approximately 0.027 percent of WWTP No. 3's permitted capacity and approximately 0.05 percent of its current available capacity. The City has confirmed that existing collection and treatment infrastructure can accommodate this incremental demand without the need for new or expanded off-site wastewater treatment or major conveyance facilities. Therefore, the wastewater treatment provider would determine that it has adequate capacity to serve the Project in addition to existing commitments, and impacts would be less than significant. No further analysis is warranted.

d) **Less Than Significant Impact**. The Project would be served by the Metropolitan Sanitary Landfill, operated by the Kern County Public Works Department. This Class III municipal solid waste facility has a permitted maximum throughput of 4,500 tons per day and an estimated remaining capacity of approximately 22 million tons, equating to approximately 22 years of operation at current disposal rates. Based on CalRecycle's construction and demolition (C&D) debris generation factor of approximately 4.38 pounds per square foot of building area, construction of the 46,500 square feet of new structures would generate an estimated 203,670 pounds (approximately 102 tons) of C&D debris over the construction period. In compliance with AB 939 and City requirements, a substantial portion of this debris, such as concrete, metals, asphalt, and cardboard, would be diverted from landfill disposal through recycling, further reducing the net disposal volume. Regarding the Project's operation, using CalRecycle's solid waste generation factor for institutional/religious assembly uses of approximately 0.006 pounds per square foot per day, the Project's 46,500 square feet of building area would generate approximately 279 pounds/day (0.14 tons/day), or 51 tons per year of solid waste. Consistent with state mandates (AB 939, AB 341, AB 1826, and SB 1383) and City programs, at least 50 percent of this material would be diverted through recycling

---

31 *City of Bakersfield, Water Resources, Wastewater Division, Wastewater Treatment Plant No. 3 https://www.bakersfieldcity.us/679/Wastewater-Treatment-Plants, accessed August 27, 2025*

and organics collection, resulting in an estimated disposal volume of 25.5 tons per year (0.07 tons/day). This generation represents approximately 0.0016 percent of the landfill's permitted daily throughput and an even smaller fraction of its remaining capacity.

Given the minimal contribution of both operational and construction solid waste relative to available landfill capacity, the fact that the waste stream is accounted for in the County Integrated Waste Management Plan, and the Project's compliance with all applicable waste reduction and diversion requirements, the Project would not generate solid waste in excess of state or local standards, exceed the capacity of local infrastructure, or impair the attainment of solid waste reduction goals. Therefore, impacts would be less than significant, and no further analysis is warranted.

e) **Less Than Significant Impact.** Solid waste collection and disposal for the Project would be provided by the Bakersfield Department of Public Works (BDPW), which offers garbage, recycling, and organics collection services to residents and businesses. Solid waste from the Project would be transported to the Metropolitan Landfill, which operates under permits issued by CalRecycle. The Project would be required to comply with all applicable federal, state, and local solid waste management and reduction statutes and regulations, including the federal Resource Conservation and Recovery Act (RCRA), California Integrated Waste Management Act of 1989 (AB 939), Mandatory Commercial Recycling (AB 341), Mandatory Commercial Organics Recycling (AB 1826), and Short-Lived Climate Pollutants: Organic Waste Reductions (SB 1383), as well as the City of Bakersfield's solid waste and recycling ordinances. Compliance would be achieved through participation in the City's collection and recycling programs, proper segregation of recyclables and organics, and adherence to landfill disposal requirements.

Because the Project would be served by an established municipal solid waste collection system and would comply with all applicable statutes and regulations, it would not conflict with or obstruct implementation of solid waste management and reduction laws. Therefore, impacts would be less than significant, and no further analysis of this issue is warranted.

20. WILDFIRE

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
If located in or near state responsibilities areas or lands classified as very high fire hazard severity zones, would the project:				
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☒
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	☐	☐	☐	☒
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	☐	☐	☐	☒
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	☐	☐	☐	☒

Impacts

a) **No Impact.** According to the 2025 California Department of Forestry and Fire Protection's (CAL FIRE) Fire Hazard Severity Zone maps, the Project Site is not located within or adjacent to a State Responsibility Area or within a designated Fire Hazard Severity Zone.[32] Moreover, the approach to evacuations in the City and Kern County is a dynamic zone-based system, which is a more modern and effective method as it allows for a targeted response to the specific location of an emergency instead of pre-determined evacuation routes.[33] The Project would not interfere with the real-time monitoring and evacuation coordination system used by the City and Kern County. Therefore, even though the Project Site is not within a very high fire hazard severity zone, the Project also would not impair an adopted emergency response plan or emergency evacuation plan. No impact would occur, and no further analysis of this issue is warranted.

b) **No Impact.** According to the 2025 CAL FIRE Fire Hazard Severity Zone maps, the Project Site is not located within or adjacent to a State Responsibility Area or within a designated Very High Fire

---

32 *California Department of Forestry and Fire Protection, Fire Hazard Severity Zones, 2025. Available online at: https://experience.arcgis.com/experience/5065c998b4b0462f9ec3c6c226c610a9, accessed August 27, 2025.*

33 *Kern County Fire Department, KCFD News, "A New Evacuation Management Tool Activated in Kern County," August 18, 2023, https://kerncountyfire.org/15143/a-new-evacuation-management-tool-activated-in-kern-county/, accessed August 27, 2025.*

Hazard Severity Zone. The Project Site is relatively flat, located in an urbanized area, and lacks extensive flammable vegetation. Prevailing wind conditions and site characteristics do not create elevated wildfire risk. The Project does not include features that would increase the likelihood of wildfire ignition or contribute to the uncontrolled spread of wildfire, such as large-scale storage of flammable materials or introduction of high-fuel landscaping. Therefore, the Project would not exacerbate wildfire risks or expose occupants to pollutant concentrations from wildfire, and no impact would occur. No further analysis is warranted.

c) **No Impact.** According to the 2025 CAL FIRE Fire Hazard Severity Zone maps, the Project Site is not located within or adjacent to a State Responsibility Area or within a designated Very High Fire Hazard Severity Zone. The Project Site is in an urbanized area and is already served by existing public roads, utilities, and other infrastructure. The Project would connect to these existing systems and would not require the installation or maintenance of new roads, fuel breaks, emergency water sources, power lines, or other utilities that could exacerbate wildfire risk or cause temporary or ongoing environmental impacts. No off-site infrastructure extensions into undeveloped areas are proposed. Therefore, no impact would occur, and no further analysis of this issue is warranted.

d) **No Impact**. According to the 2025 CAL FIRE Fire Hazard Severity Zone maps, the Project Site is not located within or adjacent to a State Responsibility Area or within a Very High Fire Hazard Severity Zone. The Project Site is in an urbanized area and relatively flat, with no steep slopes or unstable geologic features. The Project would not involve grading or vegetation removal beyond the site boundary that could alter drainage patterns or increase erosion potential. Given these conditions, there is no potential for post-fire slope instability, downslope or downstream flooding, or landslides. Therefore, no impact would occur, and no further analysis of this issue is warranted.

21. MANDATORY FINDINGS OF SIGNIFICANCE

Issues	Potentially Significant Impact	Less than Significant with Project Mitigation	Less than Significant Impact	No Impact
The lead agency shall find that a project may have a significant effect on the environment and thereby require an EIR to be prepared for the project where there is substantial evidence, in light of the whole record, that any of the following conditions may occur. Where prior to commencement of the environmental analysis a project proponent agrees to mitigation measures or project modifications that would avoid any significant effect on the environment or would mitigate the significant environmental effect, a lead agency need not prepare an EIR solely because without mitigation the environmental effects would have been significant (per Section 15065 of the *State CEQA Guidelines*):				
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☒	☐	☐	☐
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are significant when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of past, present and probable future projects)?	☒	☐	☐	☐
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☒	☐	☐	☐

Impacts

a) **Potentially Significant Impact.** The Project involves ground-disturbing and operational activities that could result in the loss or degradation of sensitive biological resources, including special-status species, sensitive natural communities, and wildlife movement corridors. In addition, the Project Site may contain or be proximate to historical or prehistoric resources that could be damaged or destroyed. These respective topics (i.e., Biological Resources, Cultural Resources, and Tribal Cultural Resources) are to be further analyzed in the EIR. Therefore, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

b) **Potentially Significant Impact.** While the Project's individual impacts in certain resource areas may appear limited, they could combine impacts from other related projects and reasonably foreseeable future projects in the vicinity to create cumulatively considerable effects to such areas as to regional air pollutant levels, GHG emissions, traffic congestion, loss of habitat, and noise. Because cumulative impacts are evaluated in the context of the broader environmental

setting, and the Project could contribute to significant cumulative effects, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

c) **Potentially Significant Impact.** Construction and operation of the Project could generate environmental effects that adversely affect human health, safety, or quality of life. Potential issues include exposure to excessive noise, air pollutant emissions, traffic hazards, lighting, or other environmental stressors. Therefore, this issue will be further analyzed in the EIR to determine the extent and significance of potential impacts.

Re: Phase I Environmental Site Assessment
Bakersfield Temple
12310 Stockdale Highway
Bakersfield, Kern County, California 93312
Terracon Project No. LA257112

Dear Mr. Briskin:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced subject property (hereinafter known as the "site"). This assessment was performed in accordance with our Master Services Agreement, dated November 1, 2023, and Task Order, dated February 27, 2025.

We appreciate the opportunity to be of service to you on this project. In addition to ESA services, our professionals provide other environmental, geotechnical, construction materials, and facilities services on a wide variety of projects locally, regionally, and nationally. For more detailed information on all of Terracon's services please visit our website at www.terracon.com. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,

Terracon Consultants, Inc.

APPENDIX E Credentials

Executive Summary

This Phase I Environmental Site Assessment (ESA) was performed in accordance with our Master Services Agreement, dated November 1, 2023, and Task Order, dated February 27, 2025, and was conducted consistent with the procedures included in ASTM E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify recognized environmental conditions (RECs) in connection with the site as reflected by the scope of this report. The ESA was conducted under the supervision or responsible charge of Jennifer S. Van, Environmental Professional. Rachel L. Spellenberg performed the site reconnaissance on April 10, 2025.

Findings and Opinions

A summary of the findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

The site is located at 12310 Stockdale Highway, in Bakersfield, Kern County, California (Assessor Parcel Numbers (APNs) 5007801200 and 5007801300) and consists of approximately 11.9-acres of vacant graded land with vegetation. The site is improved with utility connections for electrical, water and sewer. The site is proposed for the developed of a new 30,000-SF temple, associated parking areas, site utilities, landscaping, trash enclosure, service building, and an ancillary building and a future 16,500-SF meetinghouse, associated parking area, service building, pavilion structure, and trash enclosure. During the site reconnaissance, the site was observed to be unoccupied with no site operations. Please refer to **Exhibit 2** in **Appendix A** for a diagram of the site.

Historical Information

Based on a review of historical information, the site consisted of undeveloped, agricultural and/or vacant land with Pioneer Canal along the southern portion of the site from as early as 1910 through the mid-2000s, when the canal was no longer observed and agricultural land was cleared. The site appears to have been graded for construction purposes in 2006 and has remained the same through the present. Prior occupants were not identified.

The site has been utilized as agricultural land and the agricultural practice of crop production often includes the use of pesticides and/or herbicides. The historical agricultural activities on the site may have included the use of pesticides and herbicides.

Information that would indicate the extensive use of pesticides or herbicides on the site was not identified. Based on a review of historical information, the historical agricultural land use does not appear to represent a REC to the site.

The surrounding properties consisted of undeveloped, agricultural, and/or vacant land from as early as 1910 through the mid-2000s, when the property to the adjacent east was developed with water basin/reservoir. By the late 2000s, the several basins/reservoirs were redeveloped into the existing recreational park. The property to the adjacent north was partially developed with a residential neighborhood, which was completed in the late 2010s. The church and self-storage facility located southeast of the site was partially developed in 2006, consisted of its existing layout in 2016. The property located adjacent south of the site has been undeveloped, agricultural, and/or vacant land from 1910 through the present. The existing medical office building located to the adjoining west was developed in 2018 and has remained relatively unchanged through the present.

Terracon identified a canal located along the southern portion of the site from as early as 1910 through the mid-2000s, when the canal was no longer observed. Historical aerial photographs indicates the canal may have been filled as part of grading activities in the mid-2000s. Terracon completed geotechnical exploration activities on December 21, 2023 (60215068). Two soil borings P-4 and P-5 were advanced in the vicinity of the former canal to a maximum depth of 10 feet below grade surface (bgs). Based on Terracon's observations, deleterious materials, staining, and/or odors were not reported. Soil Boring P-4 consisted of silty sand and sand with trace silt. Based on this information, the filled canal does not represent a REC to the site.

Prior Reports

The Terracon April 16, 2021 Phase I ESA reported the site assessed to consist of the same general layout as the site. During the site reconnaissance, on pad-mounted transformer, trash and debris scattered throughout the site, and construction/demolition debris were observed. The site was unoccupied with no operations. RECs were not identified, and no additional investigation was reccomneded.

Records Review

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed. The site was not identified in the regulatory databases.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time, based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Site Reconnaissance

During the site reconnaissance, a pad-mounted transformer, buried natural gas line, and approximately nine (9) cubic yards of construction/demolition debris were observed. RECs were not identified in connection with the above-mentioned features.

Adjoining Properties

The site is bordered by the following: residential housing tract to the north, Aera Park with a retention pond (100 Jewetta Avenue) to the east, Stockdale Highway followed by Bridge Bible Church (12225 Stockdale Highway) and Derrel's Mini Storage (12001 Stockdale Highway) to the south, and Eagle Oaks Specialty Care Center (12500 Stockdale Highway) to the west. RECs were not identified in connection with the adjoining properties.

Significant Data Gaps

Significant data gaps (SDGs) were not identified.

Additional Services

Per the agreed scope of services, additional services as outlined in the proposal, including items described in Section 13.0 (Non-Scope Considerations) of ASTM E1527-21, were not conducted.

Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E1527-21 at 12310 Stockdale Highway, Bakersfield, Kern County, California, the site. RECs, Controlled RECs (CRECs) and/or SDGs were not identified in connection with the site.

1.0 Introduction

1.1 Site Description

Site Name	Bakersfield Temple
Site Location/Address	12310 Stockdale Highway, Bakersfield, Kern County, California
Parcel Number	Parcel #5007801200 and 5007801300
Land Area	Approximately 11.9-acres
Site Improvements	The site is improved with utility connections for electrical, water and sewer.
Anticipated Future Site Use	Religious assembly and worship in a Temple and a Meeting House
Reason for the ESA	Redevelopment of the site for the Temple Project

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the United States Geological Survey (USGS) 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A.

1.2 Scope of Services

This Phase I Environmental Site Assessment (ESA) was performed in accordance with our Master Services Agreement, dated November 1, 2023, and Task Order, dated February 27, 2025, and was conducted consistent with the procedures included in ASTM E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. Recognized environmental conditions are defined by ASTM E1527-21 as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." This ESA includes consideration of the movement of hazardous substances and petroleum products in any form, including migration of vapor in the subsurface. A de minimis condition is not a recognized environmental condition.

This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews (including local government inquiries, as applicable), and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

Review of Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS)

PFAS are a family of compounds which are considered emerging contaminants of concern due to their mobility and longevity in the environment. PFAS have been used in many products, including but not limited to fire-fighting foam, anti-stick coatings, stain and water-repellent coatings, electroplating, and paper products, among others. On July 8, 2024, US EPA designated two PFAS compounds, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), including their salts and structural isomers, as hazardous substances under CERCLA; accordingly, PFOA and PFOS were evaluated within the scope of E1527-21. Please note that PFAS compounds are ubiquitous in the environment and this limited review is not to be construed as confirmation that PFAS compounds are not present in, at or under the site.

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations, and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e., evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, the information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances, petroleum products or PFAS compounds may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of The Church of Jesus Christ of Latter-day Saints. Use or reliance by any other party is prohibited without the written authorization of The Church of Jesus Christ of Latter-day Saints and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Master Services Agreement. The limitation of liability defined in the Master Services Agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-21 Section 4.6. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-21.

1.6 Client Provided Information

Prior to the site visit, Mr. Daniel Briskin, client's representative, was asked to provide the following user questionnaire information as described in ASTM E1527-21 Section 6.

Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client's Response		
		N/A*	Yes	No
Actual Knowledge of Environmental Liens that may encumber the site.				X
Actual Knowledge of Activity Use Limitations (AULs) that may encumber the site.				X
Specialized Knowledge or Experience that is material to a REC in connection with the site.				X
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.				X
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.				X
Obvious Indicators of Releases at the site.				X

*N/A = Not Applicable

It was noted that Terracon completed a Phase I ESA for the site in 2021, which is further discussed in Section 3.7.

Terracon's consideration of the client-provided information did not identify RECs. A copy of the questionnaire is included in Appendix C.

2.0 Physical Setting

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 367 feet above mean sea level (msl).	USGS Topographic Map, Stevens California Quadrangle, dated 2021 (Appendix A)
Topographic Gradient	Gently sloping towards the southwest.	
Closest Surface Water	Cross Valley Canal, approximately 870 feet south of the site.	
Soil Characteristics		
Soil Type	Wasco sandy loam	Kern County, CA USDA, Soil Conservation Services Soil Survey issued September 3, 2024 Terracon Geotechnical Evaluation Report Dated December 21, 2023
Description	Well drained soils with 0 to 2 percent slopes. Soil profile consists of 0 to 60 inches below ground surface (bgs) sandy loam. Soils consisted of 2.5 to 7.5 feet bgs fill material consisting of silty sand underlain by loose to medium dense silty sand and poorly graded sand with variable amounts of silt and clay.	
Geology/Hydrogeology		
Formation	Quaternary deposits	California Department of Conservation, Geological Map of California, dated 2015
Description	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated.	
Estimated Depth to First Occurrence of Groundwater	Estimated to be approximately 220 feet bgs, measured in a groundwater well located approximately 4,440 feet northwest of the site.	California department of Water Resources State Well No. 29S26E3H003M Last measured 2021

Physical Setting Information		Source
	Groundwater not encountered to a depth of 51.5 feet bgs in on-site geotechnical borings.	Terracon Geotechnical Evaluation Report Dated December 21, 2023
*Hydrogeologic Gradient	Not known - may be inferred to be parallel to topographic gradient (primarily to the southwest).	

* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

3.0 Historical Use Information

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area. Copies of selected historical documents are included in Appendix C.

3.1 Historical Topographic Maps, Aerial Photographs, and Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10-to-15-year intervals) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps and aerial photographs are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from EDR to evaluate past uses and relevant characteristics of the site and surrounding properties. Based upon inquiries to the above-listed Sanborn provider, Sanborn maps were not available for the site.

- Topographic maps:
  - Buena Vista Lake, California, dated **1910**, **1912** (1:125,000)
  - Gosford, California, dated **1932** (1:31,680)
  - Stevens, California, dated **1932** (1:31,680)
  - Bakersfield West, California, dated **1942** (1:62,500)

- Bakersfield West, California, dated **1947** (1:50,000)
- Gosford, California, dated **1950**, **1954**, **1968**, **1973**, **2012**, **2015**, **2018**, **2021** (1:24,000)
- Rosedale California, dated **1950**, **1954**, **1968**, **1973**, **2012**, **2015**, **2018**, **2021** (1:24,000)
- Stevens, California, dated **1950**, **1954**, **1968**, **1973**, **2012**, **2015**, **2018**, **2021** (1:24,000)
- Oildale, California, dated **1954**, **1968**, **1973**, **2012**, **2015**, **2018** (1:24,000)

- Aerial photographs:
  - USDA, **1937**, **1942**, **1956**, **1973**, **1984**, (1" = 500')
  - USGS, **1952** and **1968**, (1" = 500')
  - USGS/DOQQ, **1994**, (1" = 500')
  - USDA/NAIP, **2006**, **2009**, **2012**, **2016**, **2020**, (1" = 500')

Historical Maps and Aerial Photographs

Direction	Description
Site	Undeveloped land with Pioneer Canal running west to east through the southern portion of the site followed by an unpaved road (1910-1973); undeveloped land appears to be graded for agricultural purposes (1984-1994); canal is no longer depicted, vacant graded land with vegetation (2006-2020).
North	Undeveloped land (1910-1973); agricultural land (1984-1994); graded land with partial residential construction (2006-2012); developed with single-family residential neighborhood (2016-2020).
East	Undeveloped land with unpaved road (1910-1942); agricultural land (1984-1994); paved road abuts the site and agricultural land improved with wastewater basins (2006); wastewater basins are graded, followed by baseball fields and grass (2009-2012); previous graded land appears to be a storm water basin (2016-2020).

Direction	Description
South	Undeveloped land with an adjacent unpaved road that transects the southeastern border of the site (1910-1942); unpaved road splits off and now an additional road abuts the property (1952-1956); unpaved road appears to be paved (1968-1994); graded land with partial construction of a church to the southeast (2006); graded land followed by asphalt parking lots and commercial structures (2009-2016-2020).
West	Undeveloped land (1910-1973); undeveloped land appears to be graded for agricultural purposes (1984-1994); graded land (2006-2020).

The site has been utilized as agricultural land and the agricultural practice of crop production often includes the use of pesticides and/or herbicides. The historical agricultural activities on the site may have included the use of pesticides and herbicides. Information that would indicate the extensive use of pesticides or herbicides on the site was not identified. Based on a review of historical information, the historical agricultural land use does not appear to represent a REC to the site.

Terracon identified a canal located along the southern portion of the site from as early as 1910 through the mid-2000s, when the canal was no longer observed. Historical aerial photographs indicates the canal may have been filled as part of grading activities in the mid-2000s. Terracon completed geotechnical exploration activities on December 21, 2023 (60215068). Two soil borings P-4 and P-5 were advanced in the vicinity of the former canal to a maximum depth of 10 feet below grade surface (bgs). Based on Terracon's observations, deleterious materials, staining, and/or odors were not reported. Soil Boring P-4 consisted of silty sand and sand with trace silt. Based on this information, the filled canal does not represent a REC to the site.

3.2 Historical City Directories

The city directories used in this study were made available through EDR (selected years reviewed: 1922-2020) and were reviewed at approximate five-year intervals, if readily available. Street listings not available prior to 1922. The current street address for the site was identified as 12310 Stockdale Highway.

Historical City Directories

Direction	Description
Site	**12310 Stockdale Highway**: No listings (1922-2020).
North	**12001-12421 French Park Lane**: No listings (1922-2020).

Direction	Description
East	**100 Jewetta Avenue:** No listings (1922-2020).
South	**12001 Stockdale Highway**: No listings (1922-2004); Derrel's Mini Storage (2005-2020). **12225 Stockdale Highway**: No listings (1922-2009); Bridge Bible Church (2010-2020).
West	**12500 Stockdale Highway**: No listings (1922-2019); Alazalon Ryan Early MD, Joshua Warolin PD (2020).

Terracon reviewed the above historical city directories for indications of RECs associated with the site. RECs associated with the site were not identified through a review of available historical city directories.

3.3 Site Ownership

Based on a review of information obtained from the City or County assessor's records, the current site owner is Church of Jesus Christ of Latter-day Saints.

3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.5 Environmental Liens and Activity and Use Limitations

The EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and activity and use limitation records recorded against the site were not provided by the client. At the direction of the client, performance of a review of these records was not included as part of the scope of services and unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.6 Interviews Regarding Current and Historical Site Uses

The following individual was interviewed regarding the current and historical use of the site.

Interviews

Interviewer	Name / Phone #	Title	Date
Baylie Zemke	Daniel Briskin / (808) 312-2136	Project Manager, Special Projects Department	May 15, 2025

Terracon interviewed Mr. Daniel Briskin, owner representative. Mr. Briskin noted that The Church of Jesus Christ Latter-Day Saints has owned the site since October 14, 2021. Mr. Briskin noted that the site has historically and currently been unoccupied. Mr. Briskin noted that Terracon completed a Phase I ESA for the site in 2021, which is further discussed in Section 3.7. Mr. Briskin noted that Terracon has completed other studies regarding wetlands, critical habitat, threatened or endangered species, and historic or cultural resources, which are presented under a separate cover. Mr. Briskin was not aware of pending environmental litigation, threatened environmental litigation, past environmental litigation, possible violations of environmental laws, possible environmental liability, or potential environmental concern.

3.7 Prior Report Review

Terracon requested the client to provide any previous environmental reports they are aware of for the site. A previous report was provided by the client to Terracon for review.

- Phase I ESA
  12310 Stockdale Highway, Bakersfield, CA
  Dated: April 16, 2021
  Prepared by: Terracon
  For: The Church of Jesus Christ of Latter-day Saints
  Project Number: 60217021

The Terracon April 16, 2021 Phase I ESA reported the site assessed to consist of the same general layout as the site. During the site reconnaissance, on pad-mounted transformer, trash and debris scattered throughout the site, and construction/demolition debris were observed. The site was unoccupied with no operations. RECs were not identified, and no additional investigation was recommended.

4.0 Records Review

Regulatory database information was provided by EDR, a contract information services company. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient, and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

4.1 Federal and State/Tribal Databases

Terracon reviewed standard federal, state, and tribal environmental record sources within the approximate minimum search distances as required by ASTM E1527-21 and presented in Table 2 of Section 8.0 of The Standard (Types of Government Records to be Reviewed). Further, to enhance and supplement the standard environmental record sources, Terracon reviewed additional federal, state, tribal, local, and proprietary environmental record sources, provided by the database firm, if potentially useful and reasonably ascertainable. Please refer to Appendix D (the environmental regulatory database report) for the number of listings within each database reviewed and database definitions and descriptions.

Due to conversion of address data to location coordinates and the accuracy of government records, the facility locations depicted in the environmental regulatory database report may not match actual physical locations. As such, Terracon attempted to field-verify the actual distances of facilities of concern from the site.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities. Facilities are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

Listed Facilities

Facility Name and Location	Estimated Distance / Direction / Gradient	Database Listings	Findings Summary
River Run Boulevard Site River Run Boulevard/Elkhorn Creek	3,800 feet / South / Down-gradient	ENVIROSTOR, SCH	Not a REC, discussed below.

River Run Boulevard/ Elkhorn Creek

River Run Boulevard/ Elkhorn Creek approximately 3,800 feet south and in a topographic down-gradient position relative to the site, is identified in the EnviroStor Database (ENVIROSTOR) and School Property Evaluation Program (SCH) regulatory databases. According to a review of the listing, this site was previous used as agriculture land. A School Investigation was conducted to test this area for potential arsenic, DDD, DDT, lead and toxaphene contaminants. No contaminants were found during this investigation. Based on the facility's distance and topographic down-gradient position relative to the site, the River Run Boulevard/ Elkhorn Creek do not represent a REC to the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report listed four facilities in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, none of these facilities were identified as the site or adjacent properties. These facilities are listed in the database report in Appendix D.

4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
Kern County Public Health Department and Environmental Health / by online form https://www.kernpublichealth.com/i-want-to/submit/public-health-request-for-public-records	On April 11, 2025, the Kern County Public Health Department responded that no records were found for the site.
Kern County Clerk / by online https://kerncountyca.nextrequest.com/	On April 11, 2025, the Kern County Clerk responded that no records were found for the site.
Kern County Fire Department / by online https://kerncountyca.nextrequest.com/	On April 11, 2025, the Kern County Fire Department responded that no records were found for the site.
Department of Toxic Substances Control (DTSC) / by e-mail pubreqact@dtsc.ca.gov	On April 16, 2025, Juan Acosta from the DTSC responded that no records were found for the site.
San Joaquin Valley Air Pollution Control District (SJVAPCD) / by online https://sanjoaquinvalleyapcdca.nextrequest.com/requests/new	On April 11, 2025, the SJVAPCD responded that no records were found for the site.
City of Bakersfield / by online portal https://www.bakersfieldcity.us/175/Records	On April 15, 2025, the City of Bakersfield responded that no records were found for the site.
Central Valley Regional Water Quality Control Board / by email info5@waterboards.ca.gov	On April 17, 2025, Kathryn Smith from the Central Valley Water Board responded that no records were found for the site.

4.3 Local Area Knowledge

Based on a review of the California Department of Conservation, Geologic Energy Management Division well finder website (CalGEM GIS), there are no active or plugged oil production wells located at the Site or adjoining properties.

Based on review of the National Piping Mapping System (NPMS) Public Viewer, gas transmission pipelines are not located within the vicinity of the site or adjoining properties.

Terracon researched on-line at the State Resources Water Control Board (SRWCB) GeoTracker database – Land Disposal Sites and landfills were not identified on the site and/or in the site vicinity.

5.0 Site Reconnaissance

5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

General Site Information

Site Reconnaissance	
Field Personnel	Rachel L. Spellenberg
Reconnaissance Date	April 10, 2025
Weather Conditions	Partly cloudy / 70°F
Site Contact/Title	Terracon was unaccompanied for the site visit.

5.2 Overview of Current Site Occupants and Operations

The site is currently vacant graded land with vegetation improved with utility connections for electrical, water and sewer.

5.3 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an "X") are discussed in more detail following the table.

Site Characteristics

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	
	Air compressors	
	Hydraulic lifts	
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Oil, gas, or mineral production	
	Other processes or equipment	
Aboveground Chemical or Waste Storage	Aboveground storage tanks	
	Drums, barrels, and/or containers ≥ 5 gallons	
	MSDS or SDS	
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins, and/or dry wells	
	Grease traps	
	Septic tanks and/or leach fields	

Category	Item or Feature	Observed or Identified
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	X
	Interior floor drains	
Electrical Transformers/ PCBs	Transformers and/or capacitors	X
	Other equipment	
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	
	Leachate and/or waste seeps	
	Trash, debris, and/or other waste materials	
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	X
	Surface water discoloration, odor, sheen, and/or free-floating product	
	Strong, pungent, or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wastewater lagoons	
	Wells	

Underground Chemical or Waste Storage, Drainage or Collection Systems

Pipeline markers

A pipeline marker was observed along the eastern site boundary. Associated labeling indicated that the pipeline contained natural gas and was owned by Southern California Gas. Based on the properties of natural gas (not a liquid at standard temperature and pressure), the on-site natural gas pipeline does not constitute a REC.

Releases or Potential Releases

Construction/demolition debris and/or dumped fill dirt

Construction/demolition debris was observed on the southeastern and northern portion of the site during the site reconnaissance. The amount of debris was approximately nine (9) cubic yards. Based upon visual observation of surface materials only, this area appeared to consist primarily of asphalt, concrete, brick and a wooden pallet. Leakage, spills or other releases from these materials not observed during the visual reconnaissance. Based on site observations, the construction/demolition debris does not represent a REC.

Electrical Transformers/ PCBs

Transformers and/or capacitors

Terracon observed one pad-mounted transformer, owned and serviced Pacific Gas and Electric (PG&E), on the northwestern portion of the site; however, no information with regard to PCB content of the transformer fluids was observed. Some transformers contain mineral oil which may contain PCBs.

PG&E maintains responsibility for the transformer, and if the transformer was "PCB contaminated," PG&E is not required to replace the transformer fluids until a release is identified. However, evidence of current or prior releases was not observed in the vicinity of the electrical equipment during the site reconnaissance. Based on site observations, the pad-mounted transformer does not represent a REC to the site.

6.0 Adjoining Property Reconnaissance

Visual observations of adjoining properties (from site boundaries) are summarized below.

Adjoining Properties

Direction	Description
North	Residential housing tract.
East	Aera Park with a retention pond (100 Jewetta Avenue).
South	Stockdale Highway followed by Bridge Bible Church (12225 Stockdale Highway) and Derrel's Mini Storage (12001 Stockdale Highway).
West	Eagle Oaks Specialty Care Center (12500 Stockdale Highway).

RECs associated with the site originating from current off-site operations were not identified.

7.0 Additional Services

Per the agreed scope of services specified in the proposal, additional services (asbestos sampling, lead-based paint sampling, wetlands evaluation, lead in drinking water testing, radon testing, vapor encroachment screening, etc.) were not conducted.

8.0 Declaration

I, Jennifer S. Van, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 2640 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

BAKERSFIELD TEMPLE
12310 STOCKDALE HIGHWAY
BAKERSFIELD, CA 93312

TARGET PROPERTY COORDINATES

Latitude (North):	35.354983 - 35° 21' 17.94"
Longitude (West):	119.138502 - 119° 8' 18.61"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	305685.1
UTM Y (Meters):	3914310.8
Elevation:	367 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50004632 STEVENS, CA
Version Date:	2021
Southeast Map:	50005168 GOSFORD, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

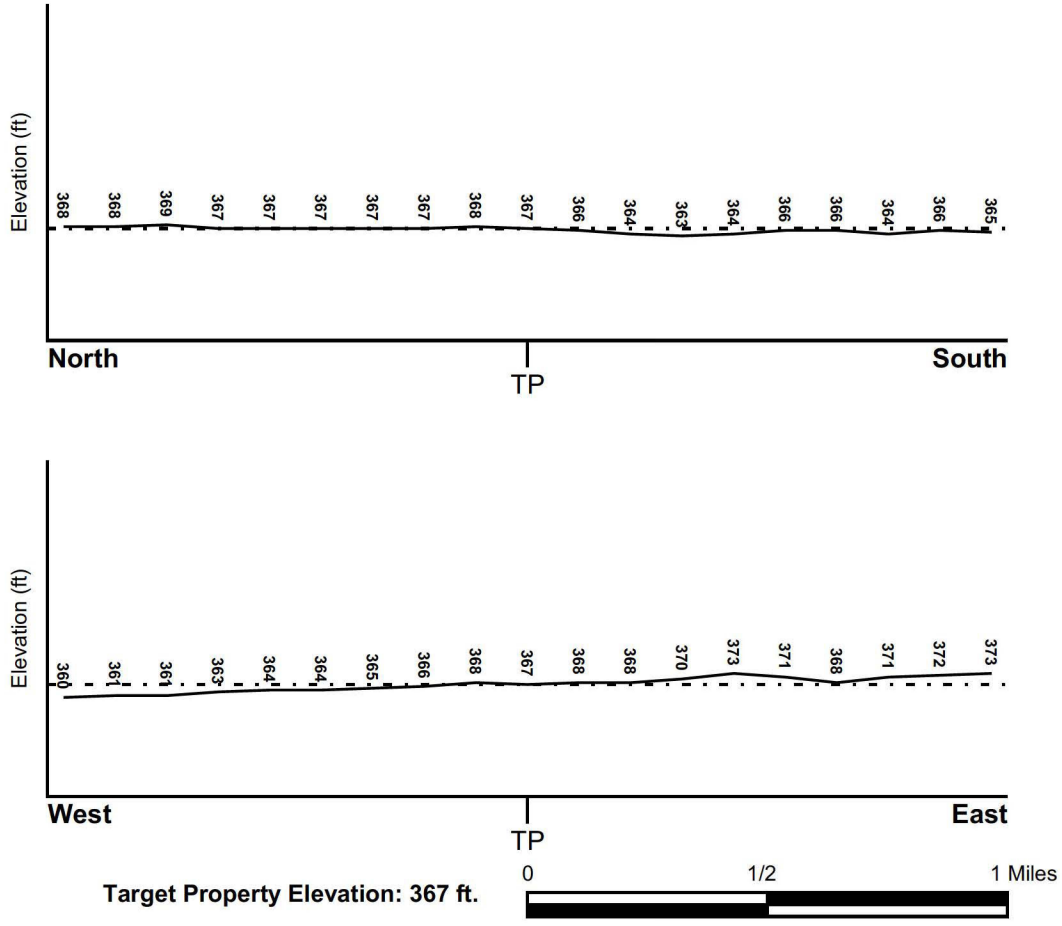

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06029C2257E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06029C2275E	FEMA FIRM Flood data
06029C2276E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
STEVENS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: WASCO

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 6.6
2	14 inches	59 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: CAJON

Soil Surface Texture:
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	9 inches	40 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 7.4
3	40 inches	59 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 7.4

Soil Map ID: 3

Soil Component Name: CAJON

Soil Surface Texture:

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	9 inches	44 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 7.4
3	44 inches	59 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 7.4

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations

Rachel Spellenberg, MESM

SENIOR STAFF SCIENTIST

Rachel Spellenberg is a senior staff scientist specializing in environmental planning, habitat restoration, vegetation monitoring, and sustainability. She has ten years of experience in the environmental field across Central and Southern California. She has helped develop and lead successful habitat restoration efforts and has expertise in data analysis and technical writing.

PROJECT EXPERIENCE

Threatened and Endangered Species Assessment, Riverside, CA

Rachel conducted field surveys and records searches to assist clients in evaluating and complying with state and federal endangered species requirements regulated by the California Department of Fish and Wildlife (CDFW) and U.S. Fish and Wildlife Service (USFWS). Record searches included CDFW's California Natural Diversity Database, USFWS's Information for Planning and Consultation, and California Native Plant Society's Electronic Inventory of Rare and Endangered Vascular Plants of California.

Wetland Assessment, Riverside, CA

Rachel reviewed available wetland maps, soil survey maps, and vegetation data to conduct site reconnaissance and identify wetland areas. She developed wetland assessment reports, incorporating information from both desktop reviews and on-site observations. The report included recommendations for compliance with state regulations based on the project's potential impact on Waters of the United States.

Former Fort Ord Site 39 Habitat Restoration Inland Ranges, Monterey, CA.

Rachel led all field efforts associated with the native plant restoration team, managing field crews, and directing daily actions. She has experience surveying for special-status plants such as Monterey spineflower (*Chorizanthe pungens* var. *pungens*), sand gilia (*Gilia tenuiflora* ssp. *arenaria*), and seaside bird's beak (*Cordylanthus rigidus* ssp. *littoralis*) while in compliance with special status species regulations. She developed and implemented restoration plans for seed collection and broadcast, native plant propagation and installation, erosion control, and irrigation. She led vegetation monitoring and survivorship surveys, analyzed data to ensure work sites are on a trajectory to meet success criteria, conducted all project-related mapping, and wrote technological memoranda and annual reports.

Martin Dunes Preserve Invasive Plant Treatment, Marina, CA.

Rachel led the invasive species management team performing satellite individual removal, invasive plant control along vectors, and management of herbicide application. Predominant invasive species were iceplant (*Carpobrotus edulis*) and ripgut brome (*Bromus diandrus*). She strictly followed herbicide application protocols to minimize effects on sensitive species in the area including Monterey spineflower, sand gilia, Smith's blue butterfly, and snowy plover. She conducted Trimble GPS data collection and all project-related mapping.

Lapis Sand Plant Revegetation, Marina, CA.

Rachel supported invasive species management and revegetation at the Lapis Sand Plant. Predominant invasive species are iceplant and European beachgrass (*Ammophila arenaria*). She strictly followed herbicide application protocols to minimize the effect on sensitive species in the area including Monterey spineflower, sand gilia, Smith's blue butterfly, and snowy plover. Additionally, she supported plant propagation, planting, seed collection and broadcast, and erosion control.

WORK HISTORY

Terracon Consultants, Inc. (Laguna Hills, CA). Staff Scientist January 2024 to Present

Terracon Consultants, Inc. (Laguna Hills, CA). Assistant Scientist July 2021 to January 2024

Orange County Coast Keepers. Industrial Stormwater Monitor, October 2020- April 2021

PROFESSIONAL EXPERIENCE

Ms. Zemke is a Staff Scientist in Terracon's Orange County, California Office. In this office, Ms. Zemke works on preparing Phase I Environmental Site Assessments (ESA) reports. These efforts involve managing all aspects of the project in order to ensure that it is completed on time and within the scope as well as engaging with the Authorized Project Reviewer. Additionally, Ms. Zemke completes field surveys, interviews with property owners, Environmental Data Resource reports, and file reviews at local county and city regulatory offices. As required, each ESA is prepared and finalized in accordance with new ASTM Standards. Her experience ranges from small scale buildings to large scale industrial and commercial properties.

PROJECT EXPERIENCE

COMMERCIAL
Project Manager and Environmental Site Assessment on commercial properties including restaurants and retail spaces.

AUTO DEALERSHIPS/AUTOMOTIVE SERVICE
Project Manager and Environmental Site Assessment on automotive dealerships, automotive maintenance facilities, and automotive collision repair centers.

OFFICE BUILDINGS
Project Manager and Environmental Site Assessment on office properties including multi-story financial, educational, and medical office buildings.

MULTI-FAMILY & SENIOR COMMUNITIES
Project Manager and Environmental Site Assessment on properties including apartment complexes and senior communities.

WAREHOUSE & INDUSTRIAL
Project Manager and Environmental Site Assessment on properties including warehouses and logistical centers.

TELECOMMUNICATIONS
Project Manager and Environmental Site Assessment for telecommunications towers.

ENERGY & UTILITIES
Project Manager and Environmental Site Assessment for solar sites ranging from 300-acres to over 1,000-acres.

AGRICULTURE & LAND DEVELOPMENT
Project Manager and Environmental Site Assessment on projects ranging from 20-acres to over 300-acres.

Jennifer S. Van
ENVIRONMENTAL GROUP MANAGER
DUE DILIGENCE

PROFESSIONAL EXPERIENCE

Ms. Van has over 12 years of experience in the environmental consulting industry. She currently serves as the Due Diligence lead for Southern California. With her staff of geologists and scientists, her group manages all due diligence work in Southern California and Nevada. Ms. Van is the Authorized Project Reviewer of Phase I Environmental Site Assessments (ESAs). Ms. Van has been involved with environmental investigations including Phase I ESAs, Limited Subsurface Investigations (LSIs) including agricultural, petroleum, and industrial properties. In addition, Ms. Van has experience with Spill, Prevention, Control and Countermeasure Plans (SPCCs), Limited Environmental Compliance Assessments (LECAs), regulatory compliance and Radon Measurement Provider. She posses excellent organization, analytical, advisory and team management skills.

PROJECT EXPERIENCE

Phase I ESAs
Conducted and managed thousands of Phase I ESAs for properties in California, Hawaii and various other states. Performed the necessary tasks to determine past and/or present land use and to locate possible sources of hazardous materials/wastes. Tasks include reviews of aerial photographs, fire insurance maps, topographic maps, historical city directories, and environmental database reports, site reconnaissance, personnel interviews, and file review with state and local agencies. Typical sites have included automotive facilities, fueling stations, recreational vehicle (RV) facilities, multi-family residential, warehouses, hospitals, military bases, restaurants, offices, retail, various other commercial facilities, industrial facilities, and agricultural and undeveloped land ranging up to 3,000 acres.

Limited Subsurface Investgiations (LSIs)
Ms. Van is a Project Manager for LSIs throughout California including dry cleaners, service stations, dealerships, and manufacturing types of facilities. Investigated environmental conditions in soils, soil vapor and groundwater.

Phase I ESAs and Soil management Plan (SMP) – Navy Base San Diego, Camp Pendleton, Naval Air Station North Island, San Diego, California
Project Manager for numerous telecommunications sites at naval and marine corps bases, and to evaluate recognized environmental conditions (RECs) identified. Based on the findings, preparation and implementation of SMPs were recommended.

EDUCATION

Masters: Environmental Engineering
California State University, Fullerton, 2018.

Bachelor of Science, Environmental Sciences: Natural Sciences.
Minor: Business Administration
University of California Riverside, 2011.

WORK HISTORY

Terracon Consultants, Inc. Senior Project Manager, March 2019-Present

PROFESSIONAL EXPERIENCE

Mr. Mikacich is a Professional Geologist in California and Senior Project Manager in the firm with over 25 years of experience managing complex environmental investigations and remediation programs for a variety of industrial, utility and energy-related facilities, military bases, petroleum retailers, and landfill sites in California, and Nevada. Mr. Mikacich's areas of specialty include site characterization, remediation, construction and treatment system oversight, delineation of groundwater contaminant plumes, solid waste characterization, hazardous materials decontamination, and the preparation of technical reports.

Mr. Mikacich also has significant experience in site remediation projects including commercial and retail projects of various sizes in different markets. Mr. Mikacich routinely interacts with state, federal and local regulatory agencies on behalf of clients in obtaining regulatory resolutions to environmental issues and compliance matters.

Mr. Mikacich also has experience in completing regulatory compliance permitting and providing environmental permitting assistance for numerous facilities.

PROJECT EXPERIENCE

Environmental Compliance Assessments and Monitoring:

Mr. Mikacich has managed numerous compliance assessment and monitoring projects for private, federal, and utility and energy-related clients. The scope of assessments performed includes assessments of such issues as air quality, groundwater, soil, wastewater generation, hazardous waste generation, and aboveground/underground storage tanks. The scope of compliance monitoring projects include groundwater, air quality, surface water quality, and soil. Mr. Mikacich has worked with industries including utility and energy-related facilities, commercial and industrial facilities, chemical manufacturing, petroleum retailers, and commercial real estate construction/development.

Gasoline Retailer – Multiple Sites in California and Nevada

Mr. Mikacich managed approximately 10 sites with an annual budget in excess of $500,000 located in both California and Nevada for a private client with a portfolio of more than 100 retail gasoline stations. Mr. Mikacich's key responsibilities included managing the groundwater monitoring and sampling, assessment, and remediation of site contaminants including BTEX and MTBE. Remedial designs included; dual-phase extraction, vapor extraction, air sparge, and groundwater pump and treat. Additional remedial actions have included Underground Injection Permits for the application of peroxide. Mr. Mikacich's responsibilities also included authoring conceptual site models, work plans, feasibility studies, CAP's, remedial design, treatment system installation, and O&M of remediation systems.

Former Gasoline Retailer – Isleton California

Mr. Mikacich is currently managing project activities that include the preparation of the scope of work and budget to perform a Limited Site Investigation (LSI) for a former gasoline retailer with a reported release from past operations. Mr. Mikacich was responsible for the preparation and application submittal to the California Ophan Site Cleanup Fund to request financial support for future site assessment and potential remedial action.

Former Gasoline Retailer and Automotive Repair Shop – Stockton California

Mr. Mikacich is currently managing a project that included the preparation of the scope of work and budget to investigate an offsite LUST case and a former onsite automotive repair shop for TPH, VOCs, and metals contaminants in soil and groundwater. A Limited Site Investigation (LSI) was performed at the site to investigate past site use and future redevelopment for a new convenience store and fuel station.

Former Dry Cleaners – Las Vegas, Nevada

Mr. Mikacich managed a former dry cleaner site which had an unauthorized release of tetrachloroethene (PCE) and trichloroethene (TCE) into the subsurface soil and groundwater. Mr. Mikacich's role included submitting a Corrective Action Plan (CAP) to the Nevada Division of Environmental Protection (NDEP) to address on-site contamination, which included expanding the current Dual-Phase Extraction (DPE) system, and a separate CAP and DPE system to address contaminants which migrated off-site and more than 1,800 feet down-gradient in groundwater. This project which had an annual budget of $300,000 involved the characterization of PCE and TCE, a feasibility study, pilot testing, design and installation of two remedial systems for the clean-up of on- and off-site contaminants. Mr. Mikacich was the primary point of contact to the client and regulatory agencies and was responsible for the implementation of the two CAPs. Mr. Mikacich's responsibilities included providing technical oversight and management of all on-going remediation and monitoring activities to ensure reporting was completed in accordance with all permits and regulatory requirements.

Site Assessment and Hazardous Materials Decontamination Program - Northern California Utility

Mr. Mikacich managed a program that focused on site assessment and decontamination and management of hazardous materials for the Utility to reduce environmental risk and insure worker safety. Mr. Mikacich was responsible for managing the assessment of approximately 50 sites which resulted in the hazardous materials decontamination of 20 of those sites from across all lines of business. Mr. Mikacich's key roles and responsibilities included managing; program-level cost proposals, budgets and invoicing, quality and work products, schedules, staffing, program team update meetings, and communications with the prime contractor and client. The program had an annual budget as high as $650,000.

Environmental Site Assessments/Due Diligence:

Mr. Mikacich has managed due diligence investigations on property types ranging from commercial retail to manufacturing facilities. The investigations include identification of a variety of environmental hazards including hazardous substance and petroleum impacted soils and groundwater, chlorinated solvents, asbestos, PCBs, USTs and other regulatory concerns. Mr. Mikacich has performed or managed due diligence activities at sites in conformance with ASTM and USEPA guidelines and standards.

Mr. Mikacich has coordinated remedial investigation activities including work plan preparation, implementation and generation of final reports. He has been involved with the development of conceptual site models and corrective action designs to successfully remediate impacted sites. Managed Phase I & II investigative projects. These projects included a wide variety of compliance issues and required familiarity with state and local hazardous waste management, water wells, fuel storage tanks, and groundwater and soil impact guidelines and regulations.
