Project Title: 637428_Crimson_UIC_OG

Project Applicant: Crimson Resource Management Corporation (Crimson)

Project Location: Kern County, Midway-Sunset Oil Field; Section 25/Township 31S/Range 22E/MD; 35.20501400, -119.55656700

Project Description: Crimson Resource Management Corporation (Crimson) proposes to rework one well located in the Midway-Sunset Oil Field in Kern County, California. The proposed rework consists of pulling the existing liner and replacing the liner with the same size at the same depth. Additionally, Crimson requests a well status change from cyclic steam producer to oil and gas producer. Crimson will comply with their UIC Project Approval Permit/Code 46400038 for the proposed rework project. Per Crimson, the existing well site is maintained free of vegetation based on permits previously received from the California Department of Conservation, Geologic Energy Management Division (CalGEM) for the original preparation of the well pad and drilling of the existing well.

The well is located on an existing well pad with existing access roads located within a densely developed CalGEM-defined oil field. No expansion of the existing well pad, roads, staging areas, or pipelines is proposed. Reworking activities and return to operation of the existing well includes the following phases: re-working and equipping phase, a production phase, and a plugging and abandonment phase. All proposed work will comply with all updated CalGEM regulations.

The proposed project consists of CalGEM approving a permit for Crimson to rework the well listed below, in the Midway-Sunset Oil Field in Kern County.

API #	Well Name
0403060090	19-09

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

Exemption Type	Statute (PRC)	Regulation (14 CCR)	
☐ **Statutory Exemption:**			
☐ Ongoing Project (*pre-CEQA approval on April 5, 1973*)	21169	15261 (b)	
☐ Ministerial	21080 (b)(1)	15268	
☐ Declared Emergency	21080 (b)(3)	15269 (a)	
☐ Emergency Projects	21080 (b)(4)	15269 (b) or (c)	
☑ **Categorical Exemption:**	21084		
☑ **Class 1**: Existing Facilities		15301	1684.1
☑ **Class 2**: Replacement or Reconstruction		15302	
☐ **Class 3**: New Construction/Conversion of Small Structures		15303	
☑ **Class 4:** Minor Alterations to Land		15304	1684.2
☐ **Class 6:** Information Collection		15306	
☐ **Class 7**: Protection of Natural Resources		15307	
☐ **Class 8**: Protection of the Environment		15308	
☐ **Class 11:** Accessory Structures		15311	
☐ **Class 21**: Enforcement Actions to revoke a permit		15321	
☐ **Class 30**: Minor Actions to Prevent, Minimize, Stabilize, Mitigate, or Eliminate a Release (Actual or Threat) of Hazardous Substances (Waste or Material)		15330	
☐ **Class 33**: Small Habitat Restoration Projects		15333	
☐ **General Exemption** ("common sense")		15061 (b)(3)	
☐ **Not a "Project" subject to CEQA**		15378 (b)(2)	
CEQA Exceptions to the Exemptions (14 CCR § 15300.2)**:** where project is located (e.g., sensitive environment); Cumulative Impact; Significant Effect due to Unusual Circumstances; Scenic Highways; Hazardous Waste Sites; Historical Resources.			

Reasons Why Project is Exempt: The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

Class 1, Existing Facilities (14 CCR §§ 15301, 1684.1): The project is categorically exempt from CEQA under the "Class 1" (14 CCR § 15301) exemption per the CEQA Guidelines

because the proposed project is a repair or minor alteration of existing facilities and will not involve an expansion of use of the oil field, and therefore is exempt from the need for full CEQA review. Additionally, in accordance with 14 CCR § 1684.1 the Class 1 exemption consists of operation repair, maintenance, minor alternation of existing public or private structures, facilities, mechanical equipment, or topographical features involving negligible or no expansion of use beyond that existing previously. This Class includes but is not limited to conversion, and abandonment work on oil, gas, injection, and geothermal wells involving the alteration of well casing, such as perforating and casing repair, removal, or replacement; installation or removal of downhole production or injection equipment, cement plugs, bridge plugs, and packers set to isolate production or injection intervals. As the proposed project consists of pulling the existing liner and replacing the liner with the same size at the same depth and would not expand the facility, the Class 1 exemption applies.

Class 2, Replacement or Reconstruction (14 CCR § 15302): Class 2 applies because it consists of "replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced[.]" Examples of Class 2 include, but are not limited to, "Replacement or reconstruction of existing utility systems and/or facilities involving negligible or no expansion of capacity." The proposed project consists of pulling the existing liner and replacing the liner with the same size at the same depth. Therefore, the Class 2 exemption applies.

Class 4, Minor Alterations to Land (14 CCR §§ 15304, 1684.2): Class 4 exemption applies. The proposed project consists of pulling the existing liner and replacing the liner with the same size at the same depth and would not expand the facility. The proposed project would be conducted entirely on an existing pad with enough space to contain all equipment. The proposed project would not disturb any undisturbed areas. The proposed project is located within an industrial area. Therefore, the proposed project "consists of drilling operations that result in only minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation."

Exceptions to Exemptions: CalGEM further finds that there are no exceptions to the application of the categorical exemptions (PRC § 21084; 14 CCR § 15300.2) referenced above. For example, there is no substantial evidence that there are any "unusual circumstances" associated with the proposed project that create a reasonable possibility that the activity will have a significant effect on the environment, and that there are no significant "cumulative impacts" resulting from successive projects of the same type in the same place. Therefore, reliance on the exemptions is appropriate.

A copy of this NOE (as required by 14 CCR § 15062(a)) and all other related materials can be made available to the public by contacting the CalGEM CEQA Program, located at 715 P Street, MS 1803, Sacramento, CA 95814; by calling (916) 445-9686; or an electronic copy of these documents may be requested by contacting CEQA@conservation.ca.gov.
