Project Description: *(please use a separate page if necessary)*

The San Francisco Public Utilities Commission is proposing the Cherry Valley Dam Spillway Short-Term Improvement Project. The project would rehabilitate a segment of the existing unlined spillway discharge channel that receives Cherry Valley Dam spillway flows and directs the water toward Cherry Creek, in a generally north-south orientation. Debris from landslides on steep side slopes along the discharge channel has obstructed the channel and caused the spillway flows to be diverted east toward the Cherry Power Tunnel Adit entrance and public dispersed camping areas. The project would restore the alignment of the discharge channel to its original north-south orientation.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "**X**".
If you have already sent your document to the agency please denote that with an "**S**".
