PROJECT BACKGROUND. The California Public Utilities Commission (CPUC), as Lead Agency under the California Environmental Quality Act (CEQA), has prepared an Initial Study/Mitigated Negative Declaration (IS/MND) for PG&E's proposed S-238 Hinkley Compressor Station Electrical Upgrades Project within southwest San Bernardino County. The Project would involve replacing the electrical distribution system within the compressor station to increase reliability, maintainability, and operational safety. As part of the Project, the station's existing electrical power switchgear, motor control center (MCC), and load center would be replaced or modified, and connecting conduit and new or replacement cable would be installed between the switchgear and MCC locations. Based on the Initial Study, the CPUC intends to adopt a Mitigated Negative Declaration under CEQA.

AVAILABILITY OF IS/MND: The IS/MND is available on the CPUC project website:
