EXECUTIVE SUMMARY

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for Trojan Storage (Client) for a residential property located at 7528 Bellaire Avenue, in Los Angeles County, and the community of North Hollywood, within the City of Los Angeles, California, Assessor's Parcel Number (APN): 2305-024-030. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the ASTM International E1527-13 and E1527-21 scope of work.

SITE DESCRIPTION

According to our research and information provided by the Client, the following address has been found to be associated with the subject property: 7528 Bellaire Avenue, North Hollywood, California. The subject property is located on the east side of Bellaire Avenue, approximately 600 feet west of South Saticoy Street (measured from the southwest corner), and is bounded on the east portion by Saticoy Street on the south, in the community of North Hollywood of the City of Los Angeles. The subject property is approximately 3.9 acres (170,100 square feet) in size and is developed with a one-story single-family residence on the southwest portion, which is approximately 924 square feet in size, and two storage structures with limited areas of concrete paving in between, located approximately 50 feet east of the residence. The subject property is currently vacant and all the structures were uninhabited at the time of our site reconnaissance. The subject property was most recently used for residential, agricultural (bee hives, honey processing, bee wax storage, and crop producing), and storage purposes (scrap metal yard). The subject property is slated to be redeveloped with a mixed use 21,120-square foot two-story 21-unit apartment building with one office unit, located on the west portion, and two attached large three-story self storage structures of 123,261 and 81,210 square feet each, located on the east portion. The development will feature driveway along the northern portion, gated access ways on the northwest and south-central portions, and surface parking areas. The surrounding area is used for residential, commercial, and light-industrial purposes. Groundwater is estimated to be approximately 295 feet below ground surface in the area of the site and is assumed to flow towards the northeast.

- EFI Global performed a site inspection of the property using accessible areas. However, due to the size of the property and the vegetation present on the east portion, isolated areas of the site were not accessible for direct observation during EFI Global's inspection. Based on the relatively flat landscape and the former use of the east portion for agricultural (crop producing) purposes, lack of access to the east portion of the subject property is not expected to represent a significant limitation in this assessment.

- The southern storage structure was mostly full of boxes, formerly used for bee wax storage purposes, and miscellaneous densely stored personal items, therefore, EFI Global, Inc. was not able to observe the floor in all areas of the structure. However, based on the personal nature of stored items and former use of the structure for bee wax storage purposes, lack of access is not expected to represent a significant limitation for this assessment.

- Numerous unlabeled metal and plastic containers were observed along the north side of the southern storage structure. The containers were located on the concrete-paved surface with limited staining observed. No olfactory indicators of oil leaks were identified. Mr. James Piroli, the successor of the property owner, stated, that the property was historically utilized for agricultural purposes, including crop production and honey/bee wax production and processing. The motor oil was used to service agricultural machinery.

- The remaining areas of the western portion, as stated above, were covered with grasses and trees, and limited areas of pooling stormwater observed. Mr. Piroli stated that this area was historically utilized for machinery/automobile parts dismantling operations. However, no indication of it was observed. Please refer to Sections 4.1 and 4.6.1 for further discussion.

HISTORICAL LAND USE

According to EFI Global, Inc.'s interpretation of the historical research data, the subject property was undeveloped land from sometime prior to 1894 to 1921. By 1927, the west portion was developed with two structures, and by 1928 with an additional storage structure on the southwest portion, surrounded by native vegetation. According to the Los Angeles County Assessor, the subject property was developed with the existing dwelling on the southwest portion in 1938. During that time until at least 1952, the east portion was utilized for agricultural purposes with the Tujunga Wash covering the east portion partially. Since 1928 to at least 1970, the northwest portion of the subject property was developed for agricultural purposes. From 1979 to at least 2020, the west portion was utilized for automobile/mechanical parts storage yard, while the east portion was vacant land.

- The subject property was historically used for agricultural purposes from approximately 1928 through at least 1970. There is a potential that during this period agricultural chemicals, such as pesticides, herbicides, and fertilizers, were applied to site soils consistent with normal application practices. Agricultural chemicals tend to accumulate in the near-surface soils. As the subject property is slated for redevelopment, which typically involves grading (soil mixing) of the first few feet of soil, it is likely that the agricultural chemicals, if any were present, will be homogenized and redistributed, which will likely reduce any residual concentrations to within acceptable screening levels. Furthermore, the entire subject property will be primarily covered by paved surfaces, which will further reduce potential exposure to any residual agricultural chemicals that may be present. Based on the foregoing, it is our opinion that a risk to human health or the environment from the historical agricultural use of the subject property is unlikely, and therefore, the historical agricultural use is not considered a significant environmental concern.

- The subject property was utilized for automobile/mechanical parts storage yard from 1979 to at least 2020. Any fluid, including motor oil, which may be present in engines prior to the disassembly can readily migrate into the subsurface as a result of small releases associated with on-site dismantling operations. Thus, the former presence of automobile dismantling operations on the subject property for approximately 41 years, represents a recognized environmental condition (REC).

- **Jim Piroli (7528 Bellaire Ave)** - The subject property is listed on the Resource Conservation and Recovery Act - Non-Generator / No Longer Regulated (RCRA NonGen / NLR), Hazardous Waste Tracking System (HWTS), Facility Index System/Facility Registry System (FINDS), and Enforcement and Compliance History Online (ECHO) databases. According to RCRA NonGen / NLR listing, the subject property is reported as a handler of hazardous waste with the North American Industry Classification System (NAICS) code 56299 (all other waste management services). No violations or evaluations were found. The HWTS listing indicated that the Subject Property was assigned EPA ID number CAC003165853 in March 11,2022 and is still active. No other information was provided. According to the FINDS and ECHO databases, the subject property was issued the Registry ID 110071245901. Based on the lack of evidence of a release, these listings are not expected to represent a significant environmental concern.

San Fernando Valley Area 4 Pollock Well Field (Los Angeles, CA 90086) - San Fernando Valley is listed on the National Priority List (NPL), Superfund Enterprise Management System (SEMS), Envirostor (ENVIROSTOR), Calsites Database (CA HIST Cal-Sites), Potentially Responsible Parties (PRP), Hazardous Waste & Substance Site List (HIST CORTESE), and Hazardous Waste & Substance Site List (Cortese) databases. According to the information provided, groundwater throughout the San Fernando Valley has been documented as being impacted by chlorinated organic compounds (VOCs) which include trichloroethylene (TCE) and tetrachloroethylene (PCE). A groundwater plume underlies the section of North Hollywood in Crystal Springs Well Field in Los Angeles, which is part of the San Fernando Valley groundwater basin. The USEPA and the Los Angeles Department of Water and Power (LADWP) are the lead agencies responsible for investigations and remedial activities. Remedial solutions adopted thus far have included an extraction and treatment system which consists of extraction wells, an air-stripping treatment system to remove VOCs from the air stream, and activated carbon filters to remove VOCs from the air stream. The treatment system commenced operation since being proposed in 1984 and remains active today. To alleviate the threat to human health from this contamination, public supply wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with contaminant levels below the State's guidelines. The regional investigation of the North Pollock Well Field area was completed on June 10, 1986. According to the EPA website, a clean-up plan was proposed on September 1, 1987.

Additionally, EFI Global reviewed the most recent groundwater data presented in the Upper Los Angeles River Area Watermaster (ULARA) *Annual Report*, dated December 2019. According to the contamination plume maps reviewed for the contaminants in groundwater including tetrachloroethene (PCE) and trichloroethene (TCE), the subject property is not located within the plumes of any of the aforementioned contaminants.

Based on the current regulatory oversight by the EPA and LADWP, the ongoing remedial efforts and the identification of responsible parties, presumed depth to groundwater (excess of 200-feet), and the subject property location outside of contamination plumes, these listings are not expected to represent a significant environmental concern for the subject property.

- In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred, but groundwater has not been impacted or the case has been closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

The Los Angeles Regional Water Quality Control Board (LARWQCB), California Department of Toxic Substances Control (DTSC), South Coast Air Quality Management District (SCAQMD), and City of Los Angeles Sanitation and Environment (LASAN) were contacted regarding air emission permits, air emissions, site investigation files, hazardous materials, underground storage tank, and industrial waste discharge records for the subject property. Additionally, the State Water Resources Control Board's (SWRCB) GeoTracker, the DTSC's EnviroStor and Hazardous Waste Tracking System (HWTS), the SCAQMD's Facility Information Detail (FIND), Los Angeles Fire Department Certified Unified Program Agency's (LAFD CUPA) online databases, which include Active and Inactive Underground Storage Tank (UST), Active and Inactive Hazardous Materials Inventory (HazMat), and Underground Storage Tank Historical Files lists, and the Los Angeles County Fire Department Health and Hazardous Materials Division's (LACFD HHMD) Active and Inactive Facility Lists, Site Mitigation Unit (SMU) Case Records, and California Accidental Release Program (CalARP) online databases were reviewed for information on the subject property to identify any evidence of previous or current hazardous material usage.

- According to the responses to our requests from the LARWQCB, DTSC, SCAQMD, and LASAN, and a review of aforementioned online databases, there are no files for the subject property.

- No significant data gaps were encountered during our agency file reviews.

The California Department of Conservation, Geologic Energy Management Division (CalGEM) online mapping application Well Finder, Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the subject property.

- No oil wells were identified within 500 feet of the subject property.

The City of Los Angeles Navigate LA Online Mapping System was reviewed to obtain substructure maps for the subject property.

- According to a review of the substructure maps for the subject property, no USTs or other substructure features were identified in the area of the subject property.

- The User was not aware of any environmental cleanup liens or activity and use limitations encumbering the subject property. The User provided EFI Global, Inc. with a Commitment for Title Insurance Report, performed by First American Title Insurance Company for the subject property, dated December 22, 2022, which was reviewed by EFI Global, Inc. No environmental cleanup liens or activity and use limitations encumbering the subject property were identified in our review. Furthermore, based on our review of the DTSC EnviroStor Database, no environmental liens enforced by the DTSC were identified.

Additional Issues

- Based on the age of the on-site structure (built in 1938), there is a potential for asbestos-containing materials (ACMs) and lead-based paint (LBP) at the subject property; however, no testing was completed as part of this report. Suspect ACMs and LBP were observed in the form of drywall ceiling, stucco, tile flooring and associated mastics, and painted surfaces. All materials appeared in poor condition at the time of our site reconnaissance. Individual suspect materials would need to be tested as part of asbestos or lead surveys prior to any renovation or demolition in order to confirm the presence or non-presence of asbestos or lead.

- Based on our research at the USEPA, the average radon concentrations for Los Angeles County are between 2.0 and 4.0 picocuries per liter (pCi/L), which is below the 4.0 pCi/L action level set by the USEPA. However, the *California Department of Conservation Indoor Radon Potential* online mapping system, show low potential for concentrations of radon in the vicinity of the subject property to be above the 4.0 pCi/L action level. Site specific radon levels vary greatly within the USEPA radon zones and on-site radon measurements would need to be collected in order to determine the radon levels at the subject property.

- EFI Global, Inc. observed evidence that suggests the presence of potential mold growth including water staining, discoloration, and significant odor in all subject structures. No sampling was conducted as part of this assessment. Based on the proposed redevelopment, no additional testing is necessary for observed mold growth.

- The City of Los Angeles Department of Building and Safety methane zone data was reviewed to determine if the subject property is located in a methane or methane buffer zone. According to the information reviewed, the subject property is located within a methane buffer zone. Therefore, testing for the presence of methane and the installation of methane mitigation systems at the property prior to construction activities may be necessary (Division 71 of the Los Angeles Building Code).

CONCLUSIONS

EFI Global, Inc. has performed a Phase I in conformance with the scope and limitations of ASTM International E1527-13 and E1527-21, at 7528 Bellaire Avenue, Los Angeles, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions or *de minimis* conditions in connection with the subject property, except for the following:

Recognized Environmental Conditions (REC)

The former presence of automobile dismantling operations and agricultural machinery repairs on the subject property for approximately 41 years (from 1979 to to at least 2020), represents a REC.

Historical Recognized Environmental Conditions (HREC)

In our opinion, no HRECs were identified during the course of this assessment.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC)

In our opinion, no CRECs were identified during the course of this assessment.

DE MINIMIS CONDITIONS

In our opinion, no *de minimis* conditions were identified during the course of this assessment.

SIGNIFICANT DATA GAPS

In our opinion, no significant data gaps were identified during the course of this assessment.

RECOMMENDATIONS

Based upon the foregoing, a Phase II Environmental Site Assessment is recommended.

1.0 INTRODUCTION

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for the property located at 7528 Bellaire Avenue, in Los Angeles County, and the neighborhood of North Hollywood, within the City of Los Angeles, California (Subject Property). This report has been prepared for the sole use of Trojan Storage (Client).

The research conducted for this study and the report prepared are in general conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the ASTM International E1527-13 and E1527-21 "Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process". The primary purpose for performing a Phase I ESA is to "...permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability" (ASTM, 2021). An environmental site assessment meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition is presumed to be valid under this standard. In order to maintain landowner liability protections, the User also has the following continuing obligations: "(1) No disposal of hazardous substances can occur after the person acquires the property; (2) Provide all legally required notices with respect to the discovery or release of any hazardous substances at the facility; (3) Exercise appropriate care with respect to hazardous substances by taking reasonable steps to stop any continuing release; prevent any threatened future releases; and prevent or limit human, environmental, or natural resource exposure to any previously released hazardous substance; (4) Provide full cooperation, assistance, and access to persons who are authorized to conduct response actions or natural resource restoration (including the cooperation and access necessary for the installation, integrity, and maintenance of any complete or partial response actions or natural resource restoration; (5) Comply with any land use restrictions established or relied on in connection with the response action, and not impede the effectiveness or integrity of any institutional control employed at the vessel or facility in connection with a response action; and (6) Comply with any request for information or administrative subpoena issued under CERCLA" (ASTM, 2021). Further, it is the goal of this study to identify business risks related to the property associated with environmental conditions. This investigation is not an environmental compliance audit and is not designed to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations.

The goal of this process is to identify any (1) recognized environmental conditions (RECs), (2) historical recognized environmental conditions (HRECs), (3) controlled recognized environmental conditions (CRECs), and/or (4) *de minimis* conditions associated with the subject property.

- A **recognized environmental condition** is defined as "...(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment" (ASTM, 2021).

- A **historical recognized environmental condition** is defined as "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and

meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition" (ASTM, 2021). The HREC designation requires the comparison of residual contamination concentrations, if any, to current regulatory standards.

- A **controlled recognized environmental condition** is defined as a "recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)" (ASTM, 2021).

- A ***de minimis condition*** is defined as "a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition" (ASTM, 2021).

In order to identify environmental conditions at the site, the Phase I ESA includes a site inspection, interviews with parties familiar with the property, historical research into the past uses of the property, and an environmental records search with regard to the subject property, adjoining and immediately surrounding properties, and the surrounding area. In addition, EFI Global, Inc. provides an opinion regarding the potential for asbestos containing materials, lead-based paints, mold, radon, oil and gas exploration, and methane as they relate to the subject property. Reviewing those documents that are publicly available, reasonably ascertainable, and practically reviewable controls the completeness of this assessment. The inability to review documents which do not exist or are not publicly available, reasonably ascertainable, or practically reviewable may result in a data gap.

1.1 Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the property may have occurred which could not be identified. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

1.2 Limitations and Exceptions

This report has been prepared in accordance with generally accepted environmental methodologies referred to in ASTM E1527-13 and E1527-21, and contains all of the limitations inherent in these methodologies. No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report. The conclusions of this report are based in part, on the information provided by others. The possibility remains that unexpected

environmental conditions may be encountered at the site in locations not specifically investigated. The services performed and outlined in this report were based, in part, upon visual observations of the site and attendant structures. Our opinion cannot be extended to portions of the site that were unavailable for direct observation, reasonably beyond the control of EFI Global, Inc. The objective of this report was to assess environmental conditions at the site, within the context of our contract and existing environmental regulations within the applicable jurisdiction. Evaluating compliance of past or future owners with applicable local, provincial, and federal government laws and regulations was not included in our contract for services. Our observations relating to the condition of environmental media at the site are described in this report. It should be noted that compounds or materials other than those described could be present in the site environment.

1.3 Reliance

This report has been prepared for the sole use of Trojan Storage. The contents should not be relied upon by any other parties without the express written consent of Trojan Storage and EFI Global, Inc.

1.4 User Responsibilities

The USEPA AAI and ASTM International E1527-13 and E1527-21 Phase I Standards require that the User conduct independent research and consider certain information before purchasing a property. The User is defined as the party seeking to use Practice E1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. These considerations include the following:

- Obtain and review Land Title Records and Judicial Records for Environmental Liens and Activity and Use Limitations by relying on Transaction-Related Title Insurance Documentation Such as Preliminary Title Reports and Title Commitments or Title Search Information Reports Such as Condition of Title, Title Abstracts, and AUL/Environmental Lien Reports. If environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (EFI Global, Inc.). If the User has actual knowledge of environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (EFI Global, Inc.).

- The User should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.

- If the User is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the User should provide the information to the Environmental Professional (EFI Global, Inc.).

- If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

2.0 SITE DESCRIPTION

According to our research and information provided by the Client, the following address has been found to be associated with the subject property: 7528 Bellaire Avenue, North Hollywood, California. The subject property is located on the east side of Bellaire Avenue, approximately 600 feet west of South Saticoy Street (measured from the southwest corner), and is bounded on the east portion by Saticoy Street on the south, in the community of North Hollywood of the City of Los Angeles. The subject property is approximately 3.9 acres (170,100 square feet) in size and is developed with a one-story single-family residence on the southwest portion, which is approximately 924 square feet in size, and two storage structures with limited areas of concrete paving in between, located approximately 50 feet east of the residence. The subject property is currently vacant and all the structures were uninhabited at the time of our site reconnaissance. The subject property was most recently used for residential, agricultural (bee hives, honey processing, bee wax storage, and crop producing), and storage purposes (scrap metal yard). The subject property is slated to be redeveloped with a mixed use 21,120-square foot two-story 21-unit apartment building with one office unit, located on the west portion, and two attached large three-story self storage structures of 123,261 and 81,210 square feet each, located on the east portion. The development will feature driveway along the northern portion, gated access ways on the northwest and south-central portions, and surface parking areas. The surrounding area is used for residential, commercial, and light-industrial purposes.

Natural gas services are provided to the subject property by the Southern California Gas Company (SoCalGas). Potable water and electrical services are provided by the City of Los Angeles Department of Water and Power (LADWP). Sewer services are provided by the City of Los Angeles of Sanitation and Environment (LASAN).

2.1 Current and Historical Addresses

According to our research and information provided by the Client, the following address has been found to be associated with the subject property: 7528 Bellaire Avenue, Los Angeles, California.

2.2 Legal Description

According to the Los Angeles County Assessor's Office, the subject property is located in the neighborhood North Hollywood, within the City of Los Angeles, and is described by the APN: 2305-024-030.

2.3 Physical Setting

The elevation of the subject property is approximately 772 feet above mean sea level (United States Geological Survey [USGS] Van Nuys, California 7.5-minute topographic quadrangle). Based on our review of the GeoCheck Section of the Environmental Data Resources, Inc. (EDR) Radius report, the subject property is not situated within a 100-year Federal Environmental Management Agency (FEMA) Flood Zone. No wetlands were identified at the property or adjoining/immediately surrounding properties. Based on our review of groundwater data presented in the State Water Resources Control Board (SWRCB) GeoTracker website, groundwater was detected at a cleanup program site (7361 Lauren Canyon Road) approximately 580 feet east of the subject property at approximately 295 feet below ground surface (bgs) as of July 5, 2022. However, perched and semi-perched aquifers may be present beneath the site. Based on regional groundwater data interpretation, regional groundwater flow direction is estimated to be towards the northeast; however, local groundwater flow direction may vary.

3.0 SITE RECONNAISSANCE/INTERVIEWS

3.1 Site Reconnaissance

On January 17, 2023, Ms. Galina Gamzyakova with EFI Global, Inc. conducted a site reconnaissance of the subject property. The site inspection was conducted to attempt to identify current site use(s), current hazardous materials storage, and evidence of past site uses and hazardous material storage and to identify evidence of other recognized environmental conditions. The following table summarizes our Site Reconnaissance observations:

Yes	No	Observed Feature(s)
✔		Hazardous Substances and Petroleum Products Containers
	✔	Underground and/or Aboveground Storage Tanks
	✔	Drains/Sumps/Clarifiers/Sewer Interceptors/Septic Systems
✔		Stained or Corroded Surfaces/Stained Soil or Stressed Vegetation
	✔	Pits/Ponds/Lagoons/Wetlands
	✔	Electrical Equipment with the Potential to contain Fluids
	✔	Production or Monitoring Wells
	✔	Evidence of Solid Waste Disposal/Dumping/Fill Areas

3.1.1 Exterior Observations

The west portion of the subject property consist of unpaved areas with native vegetation and grass with areas of pooling rainwater. A dwelling was situated on the southwest corner of the subject property. A storage area was located nearby, approximately 50 feet east of the dwelling.

The storage area consisted of two dilapidated storage structures (southern and northern) covered with the same roof, with concrete-paved parking area in between. Multiple unlabeled metal and plastic containers were observed along the north side of the southern structure. The containers were located on the concrete-paved surface with limited staining observed. No olfactory indicators of oil leaks were identified. A boiler enclosure was located west of the northern storage structure. A loading dock area was located east of the storage area and appeared to be clogged with non-hazardous debris. No stormwater drains were observed within the loading dock.

Mr. James Piroli, the successor of the property owner, stated that the property was historically utilized for agricultural purposes, including crop production and honey/bee wax production and processing. The motor oil observed was used to service agricultural machinery. The agricultural area was located on the east portion of the subject property. Agricultural products after collection were delivered to the storage area through the loading dock for storage and processing. Please refer to Section 3.1.2 for further discussion of the interior observations and use of the storage structures. Additionally, multiple compressed gas cylinders containing oxygen, carbon dioxide, and nitrogen were observed near the loading dock, to the east of the northern storage structure. Mr. Piroli stated that gases were used for welding purposes for tractors and other agricultural machinery/parts repairs. Based on the gaseous state (if under atmospheric pressure), and non-hazardous nature of the compressed gas, these cylinders are not expected to represent a significant environmental concern.

The remaining areas of the western portion, as stated above, were covered with grasses and trees, and limited areas of pooling stormwater observed. Mr. Piroli stated that this area was historically utilized for machinery/automobile parts dismantling operations. However, no indication of it was observed. Please refer to Sections 4.1 and 4.6.1 for further discussion. Additionally, several dilapidated retro vehicles, as well as metal 55-gallon drums filled with non-hazardous debris were observed throughout the west portion.

No pole- or pad-mounted transformers or poly-chlorinated biphenyls (PCB) containing equipment were observed on-site.

The east portion of the subject property consist of vacant land, most recently used for agricultural purposes, which is currently covered in weeds and grasses.

3.1.2 Interior Observations

The subject property contains three onsite structures.

The southwest corner was developed with a one-story three-bedroom dwelling. The structure is of wood-frame construction with crawl-space foundation, and pitched roof. The dwelling appeared dilapidated with all access points (doors and windows) sealed to prevent unauthorized trespassers. Non-hazardous debris and personal belongings appeared to be cluttered by the entry point located on the south side of the dwelling. EFI Global, Inc. observed evidence that suggests the presence of potential mold growth including water staining, discoloration, and significant odor in the interior portion of the dwelling. Please refer to Section 7.5 for further discussion. Building materials observed included wood and drywall partitions and ceiling, carpeting, wooden plank flooring, and ceramic wall tiles. The dwelling consisted of three bedrooms, dining room, living room, kitchen, and one bathroom. No floor drains, except bathtub were observed, which based on the personal hygiene purposes does not expect to represent significant environmental concern. Minor quantities of household chemicals were observed in the dwelling, however, based on the purpose are not expected to represent a significant environmental concern.

The storage structures were of wood-frame construction and pitched roof over the concrete slab-on-grade foundation. All access points to the structures were sealed to prevent unauthorized trespassers.

A retro tractor, singer sewing machine, honey/bee wax processor was observed in the interior portion of the northern structure. Multiple unlabeled sealed metal containers of approximately one quart to 15-gallon each were observed along the walls and near the structure entrance. Some of the containers were labelled "gasoline", around which no staining was observed. Minor staining were observed in the vicinity of these containers. Mr. Piroli stated, that these containers are used for honey/bee wax storage purposes, and therefore are not expected to represent a significant environmental concern.

The east portion of the southern structure was fully stacked with bee was boxes with indicative smell. The west portion of the structure was fully cluttered with personal belongings of the diseased property owner.

According to the City of Los Angeles, the building is connected to the city's sewer and water supplies.

No significant hazardous material storage or recognized environmental conditions were observed in the interior portions of the subject property.

3.1.3 Reconnaissance Limitations

EFI Global performed a site inspection of the property using accessible areas. However, due to the size of the property and the vegetation present on the east portion, isolated areas of the site were not accessible for direct observation during EFI Global's inspection. Based on the relatively flat landscape and the former use of the east portion for agricultural (crop producing) purposes, lack of access to the east portion of the subject property is not expected to represent a significant limitation in this assessment.

The southern storage structure was mostly full of boxes, formerly used for bee wax storage purposes, and miscellaneous densely stored personal items, therefore, EFI Global, Inc. was not able to observe the floor in all areas of the structure. However, based on the personal nature of stored items and former use of the structure for bee wax storage purposes, lack of access is not expected to represent a significant limitation for this assessment.

3.2 Adjoining and Immediately Surrounding Properties

The adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) were visually and physically observed from public right-of ways and the subject property in an attempt to identify recognized environmental conditions. Our observations are summarized in the following table:

Location	Address(es)	Uses/Observations
North	7554 Bellaire Avenue 7560 Teesdale Avenue 12560 Lull Street 12561 Lull Street 12564 Lull Street 12565 Lull Street	Single-family residential Single-family residential Single-family residential Single-family residential Single-family residential Single-family residential
East	No address	A city easement, followed by Hollywood Freeway (Interstate-170)
South	7510-7512 Bellaire Avenue 12580 Saticoy Street	A vacant parking area Cinema Vehicle Services, a car rental agency
West	7527 Bellaire Avenue 7533 Bellaire Avenue 7539 Bellaire Avenue 7543 Bellaire Avenue	Single-family residential Single-family residential Single-family residential Single-family residential

- The adjoining/immediately surrounding property to the south was listed on the regulatory database report and is further discussed in Section 5.2 below.

3.3 Surrounding Area Observations

3.3.1 Surrounding Property Uses

The surrounding area is developed with residential, commercial and light industrial structures.

3.3.2 Surrounding Geography

The surrounding area is mostly flat with a slight topographic slope to the south. No nearby hills or bedrock outcroppings were observed in the area of the site. Tujunga Wash is located approximately one mile west of the subject property. No lakes or ponds were observed in the surrounding area.

3.4 Interviews

3.4.1 Property Owner

Mr. James Piroli, the property owner and the successor trustee, was interviewed during the course of the site reconnaissance conducted on January 17, 2023. According to Mr. Piroli, the 924-square foot subject property residence was constructed in 1938. Mr. Piroli stated that the subject property was historically utilized for agricultural purposes. He was unaware of any environmental conditions associated with the property.

3.4.2 Key Site Manager

The owner of the property is the key site manager and was interviewed as the owner.

3.4.3 Property Occupants

The owner of the property is the property occupant and was interviewed as the owner.

3.4.4 Past Owners, Operators and Occupants

Past owners, operators and occupants were not able to be identified for an interview for this report.

3.4.5 Prospective Purchaser

Ms. Scott McMaster, the in-house counsel of Kobre Companies (Trojan Storage), the purchasing organization, completed a potential purchaser questionnaire for the purpose of this report, dated January 17, 2023. According to the questionnaire, the subject property is slated for commercial/industrial redevelopment. Mr. McMaster was unaware of any recognized environmental conditions such as underground storage tanks or any generated hazardous materials associated with the property.

3.4.6 Neighboring Property Owners/Tenants

Per ASTM, an attempt to interview neighboring property owners/tenants should be conducted when the subject property is vacant and unsecured land.

- As the subject property is currently developed and utilized for residential purposes, no neighboring property owners/tenants were interviewed during this assessment.

3.5 User Provided Information

The USEPA AAI and ASTM International E1527-13 and E1527-21 Phase I Standards require that the User conduct independent research and consider certain information before purchasing a property. EFI Global, Inc. recommends that the User documents completion of the following items:

3.5.1 Lien Search

The User is required to obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations with regard to the subject property. If environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (EFI Global, Inc.). If the User has actual knowledge of environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (EFI Global, Inc.).

- The User was not aware of any environmental cleanup liens or activity and use limitations encumbering the subject property. The User provided EFI Global, Inc. with a Commitment for Title Insurance Report, performed by First American Title Insurance Company for the subject property, dated December 22, 2022, which was reviewed by EFI Global, Inc. No environmental cleanup liens or activity and use limitations encumbering the subject property were identified in our review. Furthermore, based on our review of the DTSC EnviroStor Database, no environmental liens enforced by the DTSC were identified.

3.5.2 Specialized Knowledge

The User should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.

- The User has no specialized knowledge with respect to recognized environmental conditions in connection with the property.

3.5.3 Commonly Known or Reasonably Ascertainable Information

If the User is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the User should provide the information to the Environmental Professional (EFI Global, Inc.).

- The User is not aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions.

3.5.4 Property Valuation

If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

- According to the User, the purchase price generally reflects the fair market value of the property.

3.5.5 Purpose of Performing Phase I ESA

According to the User, the User is a prospective purchaser of the subject property and the Phase I is being performed to qualify for landowner liability protections under CERCLA as well as identify business risks related to the property associated with environmental conditions.

3.6 User Provided Documents

No documents were provided to EFI Global, Inc. by the User.

4.0 HISTORICAL LAND USE

A review of historical data derived from standard historical resources is provided in this section. The objective of consulting historical sources is to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the property. During our historical review, acute attention is paid to the subject property. Data relating to the adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) and the surrounding area is reviewed to the extent that it is revealed in the course of researching the property itself.

4.1 Aerial Photography Review

Aerial Photography of many portions of the United States dates back to the 1920's. Items searched for in each photograph included, but were not limited to: evidence of tanks, gas stations, industrial site usage, water drainage pathways, areas which show evidence of drums or excessive debris, discolored or stained soils, areas of distressed vegetation, et cetera.

Aerial Photograph Coverage was available from EDR for the years: 1928, 1938, 1947, 1952, 1964, 1967, 1970, 1979, 1983, 1989, 1994, 2002, 2005, 2009, 2012, 2016, and 2020. A summary of our observations is presented in the following table.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1928 and 1938	Appears to be developed with the existing storage buildings on the southwest portion and agricultural land on the north and east portions. The eastern portion is located within the area of the Tujunga Wash.	**North** and **South:** Agricultural. **East:** Tujunga Wash. **West:** A roadway with orchards and residential beyond.	Appears with agricultural land and associated residences. The Tujunga Wash covers a large portion of the east. A railroad spur appears to the south.
1947 and 1952	Appears to be developed with a residence and greenhouses on the southwest portion. The eastern portion of the parcel appears to be developed for agricultural purposes and separated from the Tujunga Wash.	**North:** Agricultural. **East:** Tujunga wash. **South:** Agricultural. **West:** A roadway with residential and orchards beyond (no longer appear by 1952).	No significant changes.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1964, 1967, and 1970	Appears to be developed with structural development on the southwest portion, with agricultural land on the remainder.	**North:** Residential **East:** Former area of the Tujunga Wash, that is graded for a freeway development, and the I-170 Freeway by 1970. **South:** Vacant land. **West:** Bellaire Avenue with residential beyond	Appears with dense residential development to the north, and industrial development to the south. A large excavated area (gravel pit as indicated in topographic maps) appears to the east across the freeway.
1979, 1983, 1989,1994, 2002, 2005, 2009, 2012, 2016, and 2020	Appears to be developed with a residence and warehouse structure on the southwest portion, surrounded by an apparent outdoor storage area for mechanical parts on the west portion, with vacant land on the east portion.	**North:** Residential **East:** I-170 Freeway followed by commercial/ industrial **Southeast:** Saticoy Street with an industrial structure beyond **Southwest:** Vacant land (paved by 2005) with Saticoy Street beyond **West:** Bellaire Avenue with residential beyond	No significant changes. The excavation area to the southeast appears to be paved and used for parking purposes/car sales lot by 2009.

- Aerial photographs indicate that the subject property was developed for agricultural purposes from at least 1928 to 1970. For further discussion, refer to Section 4.6.1.
- The subject property was utilized as a storage yard for mechanical parts from at least 1979 to 2020. Please refer to Sections 3.1.1 and 4.6.1 for further discussions.

4.2 Topographic Map Review

Topographic Maps of many portions of the United States dates back to the 1879, and the series of 7.5-minute quadrangles was officially completed in 1992. More than 55,000 7.5-minute maps were made to cover the 48 conterminous States. This is the only uniform map series that covers the entire area of the United States in considerable detail. Traditionally topographic maps show both natural

and man-made features. Items searched for in each topographic map included, but were not limited to: evidence of tanks, landfills, water drainage pathways, or areas which show significant evidence of fill, et cetera.

Topographic Map Coverage was available from Environmental Data Resources (EDR) for the years: 1894, 1896, 1898, 1900, 1902, 1920, 1921, 1924, 1927, 1932, 1933, 1942, 1948, 1953, 1966, 1972, 1976, 2012, 2015, and 2018. The subject property is unmapped in the topographic maps dated 1924, 1932, 1933, 1942, and 1948 and the 1976 topographic map is a low quality aerial photograph. A summary of our observations for the remaining maps is presented in the following table.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1894, 1896, 1898, 1900, 1902, 1920, and 1921	No features/ structures depicted. The subject property is partially located within the Tujunga Wash.	**All:** No features/ structures. By 1920, unspecified structures (possibly residential) were depicted to the north, south, and west, in addition to a railroad alignment to the south.	The surrounding area is mostly depicted as undeveloped with some scattered buildings. The Tujunga wash covers a large portion of the area. By 1920, a railroad alignment was depicted to the south.
1927	Depicted with two unspecified structures (possibly residential) on the west portion. The east portion is located within the Tujunga Wash.	**North** and **South:** Sparse structural development. **East:** The Tujunga Wash. **West:** A light-duty road with a structure beyond.	The surrounding area is mostly depicted as undeveloped with some scattered buildings. Multiple light duty roads have been developed. A railroad is depicted to the south of the Subject Property. The Tujunga wash covers a large portion of the area.
1953, 1966, and 1972	Depicted with a structure in the southwest portion.	**North**: Structural development; shaded areas indicating development by 1966. **South:** Structural development **East**: Undeveloped followed by shaded areas, indicating development; The Hollywood Freeway followed by shaded areas indicating development by 1966. **West**: Structural development; shaded areas indicating development by 1966.	The surrounding area is mostly shaded, indicating development; however, no specific structures are depicted except commercial/ residential structures, schools, hospitals, parks, and a shopping mall. The Tujunga Pumping Station is observed to the north and a gravel pit to the southeast.

- Topographic maps that were created in 2012, 2015, and 2018 do not depict any structures and only indicate street development and street names. This does not indicate that structures were not present at that time.

4.3 Building Department Records Review

The subject property address was researched at the City of Los Angeles Department of Building and Safety. Items considered in the course of the building permit review are previous site usage, previous ownership, and the construction or demolition of any structures that may have had a negative environmental impact on the property. The following table summarizes relevant building permits obtained and reviewed:

7528 Bellaire Avenue		
Date	**Owner/Occupant**	**Purpose**
04/19/1938	Joseph Duncan	Application for the erection of the existing dwelling with four rooms.
12/23/1938	Joseph Duncan	Building permit to alter the roof of the existing dwelling.

4.4 City Directory Review

City directories have been published since the 1800's and provide detailed occupant information for the property and its surrounding area at five-year intervals. The purpose of the City Directory research is to attempt to determine the businesses that historically occupied the subject property. Historical City Directories provided by EDR and reviewed by EFI Global, Inc. are listed below.

Subject Property

7528 Bellaire Ave	
Date	**Listing**
1950, 1956, 1962, 1999, 2004, and 2009	Marie Duncan (residential)
2014	Will Duncan (residential)

- The following addresses were identified for the adjoining and immediately surrounding properties: 7527, 7533, 7539 and 7554 Bellaire Avenue, 7560 Teesdale Avenue, 12560, 12561 and 12564 Lull Street, and 12580 Saticoy Street. These addresses were reviewed during the City Directory research and did not reveal any uses of concern except for the southeast adjacent property (12580 Saticoy Street) being occupied for automotive repair operations. Environmental concerns are discussed in Section 5.2.

4.5 Sanborn Map Review

Originally compiled by the Sanborn Map Company of Pelham, New York for fire insurance companies to assess fire risks related to building materials and hazardous materials storage, today Sanborn Maps are an invaluable tool for Environmental Professionals in determining historical site use and the potential for environmental conditions. Sanborn Map Coverage is available from as early as 1867

in some cities. Although Sanborn maps were created for approximately twelve thousand cities and towns in the United States, Canada, and Mexico, Sanborn Map Coverage is not available in newer and more rural communities.

- Sanborn Map Coverage was not available for the subject property. The remaining Historical Land Use data in our opinion is sufficient to accurately ascertain the historical site use.

4.6 Historical Summary

4.6.1 Subject Property

According to EFI Global, Inc.'s interpretation of the historical research data, the subject property was undeveloped land from sometime prior to 1894 to 1921. By 1927, the west portion was developed with two structures, and by 1928 with an additional storage structure on the southwest portion, surrounded by native vegetation. According to the Los Angeles County Assessor, the subject property was developed with the existing dwelling on the southwest portion in 1938. During that time until at least 1952, the east portion was utilized for agricultural purposes with the Tujunga Wash covering the east portion partially. Since 1928 to at least 1970, the northwest portion of the subject property was developed for agricultural purposes. From 1979 to at least 2020, the west portion was utilized for automobile/mechanical parts storage yard, while the east portion was vacant land.

- The subject property was historically used for agricultural purposes from approximately 1928 through at least 1970. There is a potential that during this period agricultural chemicals, such as pesticides, herbicides, and fertilizers, were applied to site soils consistent with normal application practices. Agricultural chemicals tend to accumulate in the near-surface soils. As the subject property is slated for redevelopment, which typically involves grading (soil mixing) of the first few feet of soil, it is likely that the agricultural chemicals, if any were present, will be homogenized and redistributed, which will likely reduce any residual concentrations to within acceptable screening levels. Furthermore, the entire subject property will be primarily covered by paved surfaces, which will further reduce potential exposure to any residual agricultural chemicals that may be present. Based on the foregoing, it is our opinion that a risk to human health or the environment from the historical agricultural use of the subject property is unlikely, and therefore, the historical agricultural use is not considered a significant environmental concern.

- The subject property was utilized for automobile/mechanical parts storage yard from 1979 to at least 2020. Any fluid, including motor oil, which may be present in engines prior to the disassembly can readily migrate into the subsurface as a result of small releases associated with on-site dismantling operations. Thus, the former presence of automobile dismantling operations on the subject property for approximately 41 years, represents a recognized environmental condition (REC).

4.7 Historical Data Gaps

None of the historical resources utilized as part of this assessment covered the period from 1922 to 1926, constituting data gaps. However, based on the agricultural/rural nature of the surrounding area, this limitation is not expected to significantly alter the finding of this report.

5.0 REGULATORY DATABASE REPORT

A radial database search was conducted in accordance with the specifications defined in ASTM International E1527-13 and E1527-21 which sets the radial search distances for each regulatory database. The radial database search was conducted by EDR on January 10, 2023. A copy of the database report is presented in Appendix III of this report. The following table summarizes required databases reviewed, the approximate search distances, and indicates if the subject site, adjoining/ immediately surrounding properties or surrounding sites are listed on the respective database.

Following the table are summaries of the information found in the relevant database listings and our opinion regarding the potential for the subject property to be impacted. Our opinion is based on the information found in the database listings, through other historical and regulatory resources, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM International E2600-15), and assumed groundwater flow direction. As discussed in Section 2.3, groundwater is estimated to be approximately 295 feet bgs in the area of the site and is assumed to flow towards the northeast.

DATABASE	Search Distance (Miles)	Subject Site (Yes/No)	Adjacent Site (Yes/No)	Total Listings (#)
Federal National Priorities List (NPL)	1.0	Yes	No	1
Federal De-listed NPL	1.0	No	No	0
Federal CERCLIS	0.5	Yes	No	1
Federal CERCLIS NFRAP	0.5	No	No	0
Federal RCRA CORRACTS	1.0	No	No	0
Federal RCRA non-CORRACTS TSD	0.5	No	No	0
Federal RCRA Generators	0.25	No	Yes	4
Federal Institutional/Engineering Controls	0.5	No	No	0
Federal ERNS	Property	No	No	0
State/Tribal Equivalent NPL	1.0	No	No	0
State/Tribal Equivalent CERCLIS	1.0	Yes	No	8
State/Tribal Landfill	0.5	No	No	0
State/Tribal Underground Storage Tank (UST)	0.25	No	Yes	33
State/Tribal Leaking Underground Storage Tank (LUST/ CPS-SLIC)	0.5	No	Yes	15
State/Tribal Institutional/Engineering Controls	0.5	No	No	0
State/Tribal Voluntary Clean-up Sites	0.5	No	No	0
State/Tribal Brownfield Sites	0.5	No	No	0

5.1 Subject Property

Jim Piroli (7528 Bellaire Ave) - The subject property is listed on the Resource Conservation and Recovery Act - Non-Generator / No Longer Regulated (RCRA NonGen / NLR), Hazardous Waste Tracking System (HWTS), Facility Index System/Facility Registry System (FINDS), and Enforcement and Compliance History Online (ECHO) databases. According to RCRA NonGen / NLR listing, the subject property is reported as a handler of hazardous waste with the North American Industry Classification System (NAICS) code 56299 (all other waste management services). No violations or

evaluations were found. The HWTS listing indicated that the Subject Property was assigned EPA ID number CAC003165853 in March 11,2022 and is still active. No other information was provided. According to the FINDS and ECHO databases, the subject property was issued the Registry ID 110071245901. Based on the lack of evidence of a release, these listings are not expected to represent a significant environmental concern.

San Fernando Valley Area 4 Pollock Well Field (Los Angeles, CA 90086) - San Fernando Valley is listed on the National Priority List (NPL), Superfund Enterprise Management System (SEMS), Envirostor (ENVIROSTOR), Calsites Database (CA HIST Cal-Sites), Potentially Responsible Parties (PRP), Hazardous Waste & Substance Site List (HIST CORTESE), and Hazardous Waste & Substance Site List (Cortese) databases. According to the information provided, groundwater throughout the San Fernando Valley has been documented as being impacted by chlorinated organic compounds (VOCs) which include trichloroethylene (TCE) and tetrachloroethylene (PCE). A groundwater plume underlies the section of North Hollywood in Crystal Springs Well Field in Los Angeles, which is part of the San Fernando Valley groundwater basin. The USEPA and the Los Angeles Department of Water and Power (LADWP) are the lead agencies responsible for investigations and remedial activities. Remedial solutions adopted thus far have included an extraction and treatment system which consists of extraction wells, an air-stripping treatment system to remove VOCs from the air stream, and activated carbon filters to remove VOCs from the air stream. The treatment system commenced operation since being proposed in 1984 and remains active today. To alleviate the threat to human health from this contamination, public supply wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with contaminant levels below the State's guidelines. The regional investigation of the North Pollock Well Field area was completed on June 10, 1986. According to the EPA website, a clean-up plan was proposed on September 1, 1987.

Additionally, EFI Global reviewed the most recent groundwater data presented in the Upper Los Angeles River Area Watermaster (ULARA) *Annual Report*, dated December 2019. According to the contamination plume maps reviewed for the contaminants in groundwater including tetrachloroethene (PCE) and trichloroethene (TCE), the subject property is not located within the plumes of any of the aforementioned contaminants.

Based on the current regulatory oversight by the EPA and LADWP, the ongoing remedial efforts and the identification of responsible parties, presumed depth to groundwater (excess of 200-feet), and the subject property location outside of contamination plumes, these listings are not expected to represent a significant environmental concern for the subject property.

5.2 Adjoining and Immediately Surrounding Properties

Cinema Vehicle Service LLC / Builders Discount / 911 Lone Star Special Effects (12580 Saticoy Street) - The property located approximately 90 feet south (hydrologically cross-gradient) of the subject property is listed on the California Environmental Reporting System (CERS), CERS Hazardous Chemical Management (CERS HAZ WASTE), Emissions Inventory Data (EMI), Hazardous Material Facilities (HAZMAT), Well Investigation Program Case List (WIP), and RCRA NonGen / NLR databases. According to the CERS and CERS HAZ WASTE listings, Cinema Vehicle Service LLC was reported as a Hazardous Waste Generator and Chemical Storage Facility with the CERS identification number (ID) 10254040. The facility was issued multiple minor administrative violations between 2016 and 2020, all of which have already returned to compliance. According to HAZMAT database, the facility is registered under Facility ID FA0030452 with an active status (last run date August 30, 2022). According to EMI database, the facility has generated emissions in the form of total organic hydrocarbon gases (5.69 tons), reactive organic gases (5.48 tons), particulate matter

(0.059 tons), and particulate matter of 10 micrometers (0.045 tons) from 2002 to 2011. According to RCRA NonGen / NLR, the facility is reported as a handler of hazardous waste with the EPA IDs CAL000407839 (June 17, 2015) and CAC003147080 (November 5, 2021) with no violations or evaluations found. The facility is identified with NAICS codes 51211 (motion picture and video production) and 811111 (general automotive repair). According to the WIP listing, Builders Discount has a historical status, with no further information being provided. According to the additional CERS listing, the facility was classified as US EPA Air Emission Inventory System (EIS). Based on the lack of evidence of a release and cross-gradient hydrological position, these aforementioned listings are not expected to represent a significant environmental concern for the subject property.

No other adjoining/immediately surrounding properties (within 100 feet) were listed on any of the regulatory databases researched.

5.3 Surrounding Area

In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred, but groundwater has not been impacted, a release has occurred, but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

5.4 Orphan Sites

Orphan sites are unmappable sites which appear in a list form in the Radius Map Report rather than on the standard Radius Map. Two orphan sites were identified in the Radius Map Report prepared for this site. The sites were manually mapped to determine the location of the site relative to the subject property and groundwater gradient. The following conclusions were made:

- In our opinion, none of the orphan sites listed pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

6.0 AGENCY FILE REVIEWS

6.1 State Agencies

The Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), and South Coast Air Quality Management District (SCAQMD) were contacted regarding air emission permits and site investigation files for the subject property. Additionally, the State Water Resources Control Board's (SWRCB) GeoTracker, DTSC's EnviroStor and Hazardous Waste Tracking System (HWTS), and SCAQMD's Facility Information Detail (FIND) online databases were reviewed for information on the subject property to identify any evidence of previous or current hazardous material usage.

- According to the responses to our requests from the LARWQCB, DTSC, and SCAQMD, and a review of corresponding online databases, there are no files for the subject property.

The California Department of Conservation, Geologic Energy Management Division (CalGEM) online mapping application Well Finder was reviewed for information pertaining to oil and gas exploration on or nearby the subject property.

- No oil wells were identified within 500 feet of the subject property.

6.2 City/County Agencies

The City of Los Angeles Sanitation and Environment (LASAN) was contacted regarding industrial waste discharge records for the subject property. Additionally, the LAFD Certified Unified Program Agency (CUPA) Active and Inactive CUPA Regulated Facilities and Underground Storage Tank databases which include Active and Inactive UST, Active and Inactive Hazardous Materials Inventory (HazMat), and UST Historical Files, and the Los Angeles County Fire Department Health and Hazardous Materials Division's (LACFD HHMD) Active and Inactive CUPA Program Records, Site Mitigation Unit (SMU) Case Records, and California Accidental Release Program (CalARP) online databases were reviewed for hazardous materials, USTs and other information pertaining to the subject property.

- According to the responses to our request from LASAN, and a review of the LACFD HHMD and LAFD CUPA online database, there are no files for the subject property.

The City of Los Angeles Navigate LA Online Mapping System was reviewed to obtain substructure maps for the subject property.

- According to a review of the substructure maps for the subject property, no USTs or other substructure features were identified in the area of the subject property.

6.3 Agency File Review Limitations

No significant data gaps were encountered during our agency file reviews.

7.0 NON-SCOPE ENVIRONMENTAL RISKS

ASTM International E1527-13 and E1527-21 identifies additional conditions which, should they exist at the subject property, may create a human health risk to the occupants of the site. These risks may also create additional costs to the property owner in the form of identification, operations & maintenance, and cleanup or remediation.

7.1 Asbestos Containing Building Materials

Asbestos is a group of naturally occurring minerals used in many products, including building materials vehicle brakes, insulation and other products that require resistance to heat and corrosion. Asbestos includes: chrysotile, amosite, crocidolite, tremolite asbestos, anthophyllite asbestos, actinolite asbestos, and any of these materials that have been chemically treated and/or altered.

The inhalation of asbestos fibers by workers can cause cancer and other serious diseases of the lungs and other organs that may not appear until years after the exposure has occurred. For instance, asbestosis can cause a buildup of scar-like tissue in the lungs and result in loss of lung function. Asbestos fibers associated with these health risks are too small to be seen with the naked eye, and smokers are at higher risk of developing some asbestos-related diseases.

Asbestos-containing materials (ACMs) do not always pose a hazard to occupants and workers in buildings that contain these materials. Intact, undisturbed ACMs generally do not pose a health risk. ACMs may become hazardous and pose an inhalation risk when they are damaged, disturbed in some manner, or deteriorate over time and asbestos fibers are released into building air.

ACMs can be found in a multitude of building products which include decorative and acoustical plaster texture, fire-proofing (Monokote), joint compound, attic and wall insulation, resilient floor covering, mastic, recessed lighting fixtures, wiring, elevator brakes, fire doors, pipe insulation, pipe gaskets, duct insulation, duct tape, siding and roofing materials (tar/shingles), textured paint, stucco, concrete, asphalt underlayment (Petromat) and plaster.

Local jurisdictions have specific laws and regulations regarding asbestos and actions including building renovations and building demolition.

- Based on the age of the on-site structure (built in 1938), there is a potential for ACMs at the subject property; however, no testing was completed as part of this report. Suspect ACMs were observed in the form of drywall ceiling, stucco, and tile flooring and associated mastics. All building materials appeared in poor condition at the time of our site reconnaissance. Individual suspect materials would need to be tested as part of an asbestos survey prior to any renovation or demolition in order to confirm the presence or non-presence of asbestos.

7.2 Lead-Based Paint

Although the use of lead-based paint (LBP) in residential structures has been prohibited since 1978, it may still be used in commercial and industrial buildings. It is approximated that 80 percent of buildings built prior to 1978 contain LBP. Even at low levels, lead poisoning can cause IQ deficiencies, reading and learning disabilities, impaired hearing, reduced attention spans, hyperactivity and other behavior problems with children under 6 years old being most at risk.

Lead is a highly toxic metal that was used for many years in products found in and around our homes and commercial buildings. Lead can be found in dust from friction surfaces of windows and doors that are painted with LBP and from building components coated with LBP that has begun peeling, flaking and chalking. There is also the potential for soil to have elevated lead levels due to leaching from LBP on nearby structures and deposition of airborne lead when leaded fuel was in use prior to the 1976 ban and phase out.

Since the 1980's, lead has been phased out in gasoline, reduced in drinking water, reduced in industrial air pollution, and banned or has been limited in use in consumer products.

Between the local, State and Federal agencies, including the Environmental Protection Agency (EPA), Department of Housing and Urban Development (HUD), Occupational Safety & Health Administration (OSHA) and the California Department of Public Health (CDPH), each state has various action limits that have been enacted with the intent to prevent human exposure and contamination of the surrounding environment.

- Based on the age of the on-site structure (built in 1938), there is a potential for LBP at the site. All painted surfaces appeared in poor condition at the time of our site reconnaissance. Individual suspect materials would need to be tested as part of a lead-based paint survey prior to any renovation or demolition in order to confirm the presence or non-presence of LBP.

7.3 Radon

Radon is a radioactive gas that has been found in structures all over the United States. Radon is produced from the natural breakdown of uranium in soil, rock, and water. Radon typically moves up through the ground and into structures through cracks and other holes in the foundation. Movement of radon through the earth is strongly influenced by moisture content and permeability of soil, porosity, and degree of fracturing in rocks, as well as surface meteorological conditions. High levels of radon have been discovered in every state.

Radon cannot be seen, smelled, or tasted. Breathing air-containing radon may increase the risk of getting lung cancer. The Surgeon General of the United States has warned that radon is the second leading cause of lung cancer in the United States today after smoking.

Testing for the presence of radon is fairly inexpensive, simple and is the only way to be certain of the on-site concentrations. Various types of sampling methods exist to determine the concentration. On-site radon sampling was not performed during the completion of this assessment.

- Based on our research at the USEPA, the average radon concentrations for Los Angeles County are between 2.0 and 4.0 picocuries per liter (pCi/L), which is below the 4.0 pCi/L action level set by the USEPA. However, the *California Department of Conservation Indoor Radon Potential* online mapping system, show low potential for concentrations of radon in the vicinity of the subject property to be above the 4.0 pCi/L action level. Site specific radon levels vary greatly within the USEPA radon zones and on-site radon measurements would need to be collected in order to determine the radon levels at the subject property.

7.4 Wetlands

According to the Clean Water Act, a wetland is "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Wetland areas have been identified as ecologically diverse and sensitive areas and are generally subject to more stringent development, re-development, and building regulations.

- The United States Fish and Wildlife Service (USFWS) National Wetlands Inventory was reviewed to determine if the subject property is situated within an identified wetland. According to the USFWS, the subject property is not located within a wetland area.

7.5 Mold

Mold and mildew are simple, microscopic organisms in the Fungi kingdom that can grow virtually anywhere if they have adequate moisture, nutrients, air and appropriate temperatures. Depending on the particular mold or fungus, growing colonies can be almost any color. Most household molds and fungi (mildews) are white, black, grey, or brown colored. Spores of dozens of kinds of mold and fungus (mildew) are present at all times in indoor and outdoor air. These spores can settle, germinate and grow wherever good growth conditions are found. They can grow on soil, plants, dead plant materials, foods, fabrics, paper, wood and many other materials found within buildings. Many molds are not harmful and actually have a beneficial role in the environment and in living systems. In soil, molds play a crucial part in decomposition of organic matter and in making nutrients available to plants.

When mold and fungi (mildews) growth occurs in buildings, it can be very destructive to the materials on which they grow and cause high levels of airborne mold spores and volatile organic compounds associated with the characteristic musty / moldy odor. They cause staining, decomposition (rotting of materials) and objectionable, musty odors. Where colonies are extensive they can also produce enough spores, and by-products to be harmful to health. Many of the by-products of mold and fungus (mildew) are irritating to skin, eyes and respiratory tracts. Some molds produce true allergic sensitization and allergic reactions in susceptible people. Some molds produce toxic by-products that could be harmful to skin, and poisonous if ingested or inhaled in quantity. Persons with compromised immune systems may even experience systemic fungal infections of the respiratory tract.

EFI Global, Inc. observed a limited amount of interior areas of the subject buildings in order to identify the significant, visible presence of mold. This activity was not intended to discover all areas which may be affected by mold growth at the subject property. Potential areas of mold not observed as part of this limited assessment, include but are not limited to, pipe chases, HVAC systems and within enclosed wall and ceiling cavities that may be present in the subject property. A complete mold assessment, which may include various types of sampling, would be required to determine if mold levels within the subject buildings are at levels acceptable by industry standards.

- EFI Global, Inc. observed evidence that suggests the presence of potential mold growth including water staining, discoloration, and significant odor in all subject structures. No sampling was conducted as part of this assessment. Based on the proposed redevelopment, no additional testing is necessary for observed mold growth.

7.6 Methane Gas

In response to growing concern regarding methane intrusion into buildings and to the potential for methane build-up underneath buildings, certain municipalities have established methane requirements for structures based on the proximity to oil wells and landfills. If a subject property is located in the proximity of active or abandoned oil wells or landfills, methane mitigation devices installed prior to construction activities at a subject property may be necessary.

- The City of Los Angeles Department of Building and Safety methane zone data was reviewed to determine if the subject property is located in a methane or methane buffer zone. According to the information reviewed, the subject property is located within a methane buffer zone. Therefore testing for the presence of methane and the installation of methane mitigation systems at the property prior to construction activities may be necessary (Division 71 of the Los Angeles Building Code).

8.0 FINDINGS

EFI Global, Inc. has performed a Phase I for Trojan Storage (Client) for a residential property located at 7528 Bellaire Avenue, in Los Angeles County, and the community of North Hollywood, within the City of Los Angeles, California, APN: 2305-024-030. The research conducted for this study and the report prepared are in conformance with the USEPA AAI standard and the ASTM International E1527-13 and E1527-21 scope of work.

8.1 CONCLUSIONS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM International E1527-13 and E1527-21, at 7528 Bellaire Avenue, Los Angeles, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions or *de minimis* conditions in connection with the subject property, except for the following:

Recognized Environmental Condition (REC)

The former presence of automobile dismantling operations and agricultural machinery repairs on the subject property for approximately 41 years (from 1979 to to at least 2020), represents a REC.

Historical Recognized Environmental Condition (HREC)

In our opinion, no HRECs were identified during the course of this assessment.

Controlled Recognized Environmental Condition (CREC)

In our opinion, no CRECs were identified during the course of this assessment.

De Minimis Condition

In our opinion, no *de minimis* conditions were identified during the course of this assessment.

Significant Data Gaps

In our opinion, no significant data gaps were identified during the course of this assessment.

8.2 RECOMMENDATIONS

Based upon the foregoing, a Phase II Environmental Site Assessment is recommended.

9.0 SIGNATURES

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Prepared By: Date: February 2, 2023

Galina Gamzyakova
Project Manager

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The U.S.EPA has released this contaminant plume map to update the public on the current status of the San Fernando Valley Superfund groundwater site.

1- The areas of contamination shown on this map represent generalized two-dimensional approximations based on water quality data from groundwater monitoring wells in the eastern part of the San Fernando Valley.
2. Areas of contamination are based on the sample collected closest to 4/7/2017 between January 2012 and June 2017.
3- The maximum contaminant concentration at any well or group of adjacent wells, regardless of depth, was used for developing the plume outlines.
4- This map is not intended for enforcement purposes.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). EFI GLOBAL INC. used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by EFI GLOBAL INC.. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

An online review and analysis by EFI GLOBAL INC. of the RCRA-LQG list, as provided by EDR, has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WHITTAKER DBA MEGGIT EPA ID:: CAD981450448:	***12838 SATICOY ST.***	***SW 1/8 - 1/4 (0.209 mi.)***	***L66***	***216***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by EFI GLOBAL INC. of the RCRA-SQG list, as provided by EDR, has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk

characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

An online review and analysis by EFI GLOBAL INC. of the ENVIROSTOR list, as provided by EDR, has revealed that there are 7 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

An online review and analysis by EFI GLOBAL INC. of the UST list, as provided by EDR, has revealed that there are 8 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by EFI GLOBAL INC. of the RCRA NonGen / NLR list, as provided by EDR, has revealed that there are 66 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Summary Details:

Conditions at proposal October 15, 1984): San Fernando Valley Area 4) is an area of contaminated ground water in the Pollock Well Field area in the City of Los Angeles, Los Angeles County, California. The area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an

SAN FERNANDO VALLEY (AREA 4) (Continued) **1000710135**

area of approximately 5,860acres, contains perchloroethylene PCE), according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State s recommended drinking water guideline for PCE 4 parts per billion)is exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with concentrations below the State sguideline. Status June 10, 1986): EPA and the Los Angeles Department of Water and Power are entering into a cooperative agreement for a remedial investigation of the San Fernando Valley Basin and a feasibility study targeted at Area 1,the most contaminated area. The RI is scheduled to begin in early 1986.

Background Info: The San Fernando Valley Ground Water Basin (SFVGWB) is located within the Upper Los Angeles River Area and consists of the eastern portion of the San Fernando Valley and the entire Verdugo Basin. The SFVGWB encompasses approximately 112,000 acres of alluvial valley fill deposits and provides enough water to serve approximately 600,000 residents. The Basin is bounded on the north and the northwest by the Santa Susana Mountains, on the northeast by the San Gabriel Mountains, on the west by the Simi Hills and on the south by the Santa Monica Mountains.
The San Fernando Valley Study area includes four National Priorities List (NPL) sites. They are:
Area #1 - North Hollywood NPL Site covers 9336 acres in the eastern part of the San Fernando Valley. The site has been divide into the North Hollywood Operable Unit (OU) and the Burbank OU
Area #2 - Crystal Springs NPL Site covers 3975 acres southeast of the North Hollywood NPL Site and is located in the cities of Glendale and Los Angeles.
Area #3 - Verdugo NPL Site covers 2673 acres in the eastern part of the San Fernando Valley and is located in and adjacent to La Crescenta in the Verdugo Mountains.
Area #4 - the Pollock NPL Site covers 1635 acres in the southeastern part of the San Fernando Valley and is located in and adjacent to the cities of Los Angeles and Glendale.
Groundwater contamination in the SFVGWB is linked to prewar, postwar, and current industrialization in the San Fernando Valley.
The contaminants of concern are volatile organic compounds (VOCs), trichloroethylene (TCE) and tetrachloroethylene (PCE) which have been and/or are being used in many San Fernando Valley

SAN FERNANDO VALLEY (AREA 4) (Continued) **1000710135**

industries, such as aeronautical, automotive, dry cleaning, and metal plating. These solvents have found their way to the groundwater basin as a result of both past and improper use, storage and disposal practices. The SFVGWB Superfund sites, added to the NPL in 1986, are areas where groundwater from wells have been found to contain VOCs above the state and federal drinking water standards. Groundwater contamination at numerous wells have been so severe with TCE and PCE that these wells have essentialput out of commission.
Exposure of receptors to contaminants can possibly occur through ingestion of contaminated drinking water, inhalation of VOCs released from the contaminated water as in taking showers, and dermal exposure as in washing or bathing. However, with the strict regulatory control over water quality by the State's Department of Health, Office of Drinking Water (ODW), the RWQCB, and other agencies, residents are assured that the water they consume is safe and that no one is drinking water which contains concentrations of contaminants above regulatory standards.
Federal, state, and local agencies have been conducting investigation and cleanup of contaminated groundwater in the SFVGWB since contamination was discovered in 1979. These activities involve measuring the extent of contamination, developing & implementing cleanup remedies, and identifying responsible parties.
EPA provided oversight of the basinwide Remedial investigation (RI) of groundwater contamination conducted by the Los Angeles Department of Water and Power (LADWP). The RI objectives were to collect lithological and water quality data and information regarding basin operations for the eastern SF and Verdugo basins; develop a regional characterization of geology, hydrology, and the nature and extent of groundwater contamination within the eastern and Verdugo basins; study fate and transport of compounds in the environment; identify ARARs; and evaluate the potential risk to human health and the environment. The Remedial Investigations of the SFVGWB were divided into two phases:
Phase I activities have included vertical profile borings and installation of monitoring wells to obtain preliminary contaminant information. Monitoring wells have been installed as follows: 34 in North Hollywood (Area #1); 29 in Crystal Springs (Area #2); 7 in Verdugo (Area #3); and 17 in Pollock (Area #4). Information obtained from Phase I investigation activities identified the need for several operable units. Operable Unit is a federal term which is similar to the State's definition of a removal action.
Phase II activities consist of a basinwide remedial investigation conducted by LADWP.
Remedial Actions (RAs):
North Hollywood (Area #1) -- Two RAs were identified for Area #1, the North Hollywood OU and the Burbank OU.
A Record of Decision (ROD) for the North Hollywood RA was signed in September 1987, selecting groundwater extraction and treatment (air stripping) of 2,000 gallons per minute (gpm) of contaminated water as an interim remedy. This RA was constructed with funding from EPA and the State and has been treating contaminated groundwater since March 1989. This facility is loca located at 11845 Vose Street in the N. Hollywood section of

SAN FERNANDO VALLEY (AREA 4) (Continued) **1000710135**

Los Angeles.
A ROD for the Burbank OU was signed in June 1989, again selecting groundwater extraction and treatment of about 12,000 gpm of contaminated water. Negotiations are continuing with PRPs for the design and construction of this RA.
Crystal Springs (Area #2) -- LADWP has completed a focused RI/FS for this proposed RA. The Glendale OU was separated into a North OU and a South OU based on the amount of contamination and the facilities contributing to the GW contamination. A ROD for each OU was signed on June 18, 1993 designating groundwater extraction and treatment as the interim remedy. The PRPs formed a group and combined the RA efforts for each OU into one document. The selected alternative is GW extractio and treatment.
Verdugo and Pollock (Areas #3 and #4) -- Currently no RAs have been identified for Area #3 or for Area #4.
In October 2003, US EPA proposed No Remedial Action for Verdugo Basin (Area #3).
EPA and the RWQCB are identifying potential sources of contamination and pursuing PRPs that may be responsible for contaminating groundwater. As these PRPs are identified, individual site investigations and mitigation activities will be pursued. Enforceable agreements and orders have been implemented at numerous specific potential source sites within the Basin by RWQCB and the Department.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by JESSE DICKERSON. CONTACT INFORMATION: CONTACT@SINEMAVEHICLES.COM Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically)within 30 days of the change.

Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Haz Waste Generator Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 01/19/2016. OBSERVATION: Owner/Operator failed to submit the hazardous waste notification electronically to CERS. CORRECTIVE ACTION: Owner/Operator shall submit a notification of hazardous waste generated by the facility in accordance with HSC 25128 electronically to CERS. HSC 25404(e)(4) No later than three years after the statewide information management system is established, each CUPA, PA, and regulated business shall report program data electronically. The secretary shall work with the CUPAs to develop a phased in schedule for the electronic collection and submittal of information to be included in the statewide information management system, giving first priority to information relating to those chemicals determined by the secretary to be of greatest concern. The secretary, in making this determination shall consult with the CUPAs, the California Emergency Management Agency, the State Fire Marshal, and the boards, departments, and offices within the California [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Primary Waste Type: Not reported
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by JULIO RAMREZ. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically)within 30 days of the change.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 402074
Site Name: Sherman Way Chevron
Violation Date: 01-14-2022
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 04/06/2022. OBSERVATION: Uniform Hazardous Waste Manifests for water and solids with benzene were not available at the time of inspection. No transportation document for Petroleum Dynamics Inc. CORRECTIVE ACTION: Locate a copy of all manifests for water and solids with benzene and submit copies to the CUPA.

Eval Notes: Inspector Shane Bystrom LAFD, onsite this date to conduct routine inspection of storage tanks in vault. Consent to enter, inspect and take photographs was given on this date by Masoud Fasa, manager. Monitoring system certification was conducted at this time. Monitoring certification was performed by John Kneisel, Petroleum Tank Testing, Inc. Tester provided the following certifications: CA UST Service Tech ICC#5252941 exp. 2/20/18 Veeder-Root Tech Level 4 #B33233 exp. 5/1/18 VMI #2512 exp. 3/30/18 The 2 monitoring panels showed all functions normal. The monitoring set up and alarm history were provided for

96133-CHEVRON STATION (Continued) **S101585475**

review. The sumps and UDCs were opened for inspection and the sensors were observed positioned to detect a leak at the earliest opportunity. The spill buckets were also visually inspected. The Monitoring Plan was compared to the equipment onsite. The operation of the tank system was compared to the conditions of the operating permit. V/R TLS-350+ [Truncated]

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/27/2022

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 08/25/2022

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/08/2022

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

USGS TOPOGRAPHIC MAP

Target Property Map:	5630789 VAN NUYS, CA
Version Date:	2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

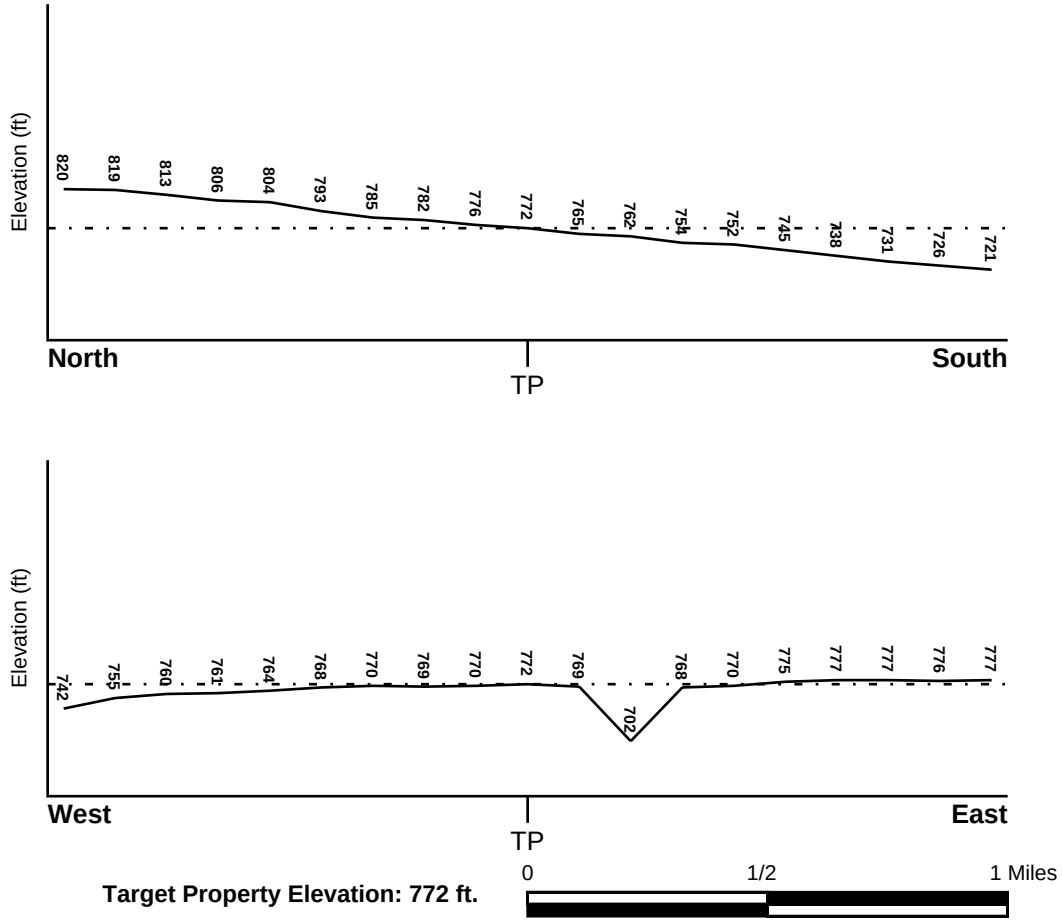

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1310F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
VAN NUYS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EJScreen EJ Indexes

Twelve environmental justice (EJ) indexes of EJScreen, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group or 1-mile maximum (US or State) in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJScreen provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJScreen home page.

No valid spatial coordinate is available for this facility.

Demographic Profile of Surrounding Area (1 mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2016 - 2020 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

LAST UPDATED ON SEPTEMBER 21, 2022

SAN FERNANDO VALLEY (AREA 4)
LOS ANGELES, CA

Operable Units

Below, EPA has provided a list of the remedial actions selected pertaining to each operable unit.

EPA issues **Records of Decision (RODs)** to explain which cleanup methods will be used at Superfund National Priorities List sites. EPA has two primary documents that it may use to identify changes to the remedies selected in RODs. EPA uses a **ROD Amendment** when it needs to make a fundamental change to the remedy. EPA publishes an **Explanation of Significant Differences (ESD)** for significant changes.

During cleanup, complex sites may be divided into several distinct areas to make the response more efficient. These areas, called **operable units (OUs)**, may address geographic areas, specific problems, or medium (e.g., groundwater, soil) where a specific action is required. The remedies are displayed for the OU numbers indicated in the original decision document. OU numbers may change over time.

EPA is working to improve data quality. The information presented on this page is undergoing review for accuracy and completeness, and may be subject to change.

OU ID	Name	Decision Document	Cleanup Technologies Selected in the Decision Document
00	SITEWIDE	Not applicable	
01	BASINWIDE	No decision document	
02	POLLOCK	No decision document

Site Milestones

Milestone	Date(s)
Initial Assessment Completed	04/01/1984
Proposed to the National Priorities List	10/15/1984
Finalized on the National Priorities List	06/10/1986
Remedial Investigation Started	08/15/2015
Remedy Selected	Not Yet Achieved
Remedial Action Started	Not Yet Achieved
Construction Completed	Not Yet Achieved
Deleted from National Priorities List	Not Yet Achieved
Most Recent Five-Year Review	Not Yet Achieved
Achieved Sitewide Ready for Anticipated Reuse	Not Yet Achieved

Cleanup Schedule by Operable Unit

During cleanup, a site can be divided into a number of distinct areas depending on its complexity. These areas, called operable units (OUs), may address geographic areas, specific problems, or areas where a specific action is required. Examples of typical operable units include construction of a groundwater pump and treatment system or construction of a cap over a landfill.

Select an operable unit. After making a selection, press go to filter the table by operable unit.

NPL Site Narrative for San Fernando Valley (Area 4)

SAN FERNANDO VALLEY (AREA 4)
Los Angeles, California

Conditions at proposal (October 15, 1984): San Fernando Valley (Area 4) is an area of contaminated ground water in the Pollock Well Field area in the City of Los Angeles, Los Angeles County, California. The area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an area of approximately 5,860 acres, contains perchloroethylene (PCE), according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State's recommended drinking water guideline for PCE (4 parts per billion) is exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with concentrations below the State's guideline.

Status (June 10, 1986): EPA and the Los Angeles Department of Water and Power are entering into a cooperative agreement for a remedial investigation of the San Fernando Valley Basin and a feasibility study targeted at Area 1, the most contaminated area. The RI is scheduled to begin in early 1986.

For more information about the hazardous substances identified in this narrative summary, including general information regarding the effects of exposure to these substances on human health, please see the Agency for Toxic Substances and Disease Registry (ATSDR) ToxFAQs. ATSDR ToxFAQs can be found on the Internet at ATSDR - ToxFAQs (http://www.atsdr.cdc.gov/toxfaqs/index.asp) or by telephone at 1-888-42-ATSDR or 1-888-422-8737.

LOS ANGELES, CA 90086

Background

The San Fernando Valley (Area 4) site is a 5,860-acre area of contaminated groundwater in Los Angeles, California. The site is one of four Superfund sites in the San Fernando Valley. Numerous potentially responsible parties (PRPs) contaminated groundwater in the region with volatile organic compounds (VOCs), including trichloroethylene (TCE) and perchloroethylene (PCE). Cleanup and investigative activities are ongoing.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Bldg. Form 2

2

CITY OF LOS ANGELES

DEPARTMENT OF BUILDING AND SAFETY

BUILDING DIVISION

Application for the Erection of a Building

OF

CLASS "D"

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

Lot No. .....

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Contact: Galina Gamzyakova

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EFI Global Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 12AC-4BD9-A77D

INTERVIEW AND USER PROVIDED DOCUMENTATION

USER QUESTIONNAIRE

As part of the All Appropriate Inquiry (AAI) standard for conducting Phase I Environmental Site Assessments set by the Environmental Protection Agency (EPA), the following questions are to be asked of the prospective purchaser.

Please return to fax number below or e-mail to your project manager. Please also provide a **Title Report, previous environmental reports including Phase I and Phase II, Site Characterization, Removal or Remediation, Geotechnical Reports, Lead Based Paint or Asbestos Survey or Removal,** or other relevant material, as available**.**

A. GENERAL

1. Subject Property Address 7528 N. Bellaire Ave., North Hollywood, CA 91605

2. Person completing this questionnaire:

Scott McMaster — Name

310-372-8600 — Telephone Number

In-house counsel for potential buyer — Relationship to Property

Jan. 17, 2023 — Date

3. What is your intended use of the property?

☐ No Change ☐ Residential Development ☒ Commercial/Industrial Development

4. What is the purpose of ordering a Phase I ESA?

☒ Purchase ☐ Refinance ☐ Other (please specify)_____

B. AAI STANDARD QUESTIONS

1. Are you aware of any environmental liens or activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have filed or recorded against the property under federal, tribal, state or local law? Yes ☐ No ☒ If Yes, Please Explain _____

2. Do you have any specialized knowledge or experience that is material to recognized environmental conditions in connection with the property? Yes ☐ No ☒ If Yes, Please Explain _____

3. Are you aware of any commonly known or reasonably ascertainable information within the local community about the property that is material to recognized environmental conditions in connection with the property? Yes ☐ No ☒ If Yes, Please Explain_____

4. Is the purchase price of the property comparable to the fair market value of the property? Yes ☒ No ☐ N/A ☐
If the purchase price is significantly lower than the fair market value, the user must identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products._____

Survey Questionnaire – Please Return to Fax Number Below

A. GENERAL

1. Subject Property Address 7528 Bellaire Ave, North Hollywood, CA 91605

2. Name of business(es) occupying the subject property NA

3. Person completing this questionnaire:

James Piroli	818.269.8534
Name	Telephone Number
Successor Trustee	1/17/23
Title	Date
Family	
Relationship to Property	How Long?

4. If you are the person who has ordered this report, what is the purpose of this report?
Purchase ☐ Sale ☐ Refinance ☐

B. PROPERTY DESCRIPTION

1. **Land**

A. What is the approximate square footage of the land? 170,682

B. Were there any buildings or other improvements on the property prior to the existing improvements?
Yes ☐ No ☑ DK ☐

If yes, what were the buildings used for? _____

C. Is or has there been a well on the subject property? Yes ☐ No ☐ DK ☑

If yes, what type of well is it?: ☐ Drinking Water ☐ Irrigation ☐ Monitoring ☐ Dry Well

D. Is or has there been a septic system on the subject property? Yes ☑ No ☐ DK ☐

E. Has fill of unknown origin been imported onto the subject property?
Yes ☐ No ☐ DK ☑

2. **Improvements (Buildings) - This includes all buildings**

A. What is the approximate square footage of the onsite structure? 924

B. What year was the onsite structure built? 1938

317 S. Isis Avenue, STE 207, Inglewood, CA 90301
Toll Free: 888-705-6300 Phone: 310-854-6300 Fax: 310-854-0199 Web: https://www.efiglobal.com/our-services/environmental/

C. Is there a heating system at the site? Yes ☑ No ☐ DK ☐

If yes, what is it fueled by?: ☑ Natural Gas, ☐ Fuel Oil ☐ Electricity, ☐ Solar

D. Is there a boiler at the site? Yes ☐ No ☑ DK ☐

If yes, what is it fueled by?: ☐ Natural Gas, ☐ Fuel Oil ☐ Electricity, ☐ Solar

E. Who provides the following utility services to the subject property?

Natural Gas: So Cal Gas Electrical: LADWP

Sewer: None Water: LADWP

F. Do you have copies of the Subject Property's construction, site, and/or "as-built" drawings and building specifications? Yes ☐ No ☑ If so, please provide copies of same.

C. STORAGE TANKS

1. Are there any registered or unregistered (active or inactive) Underground Storage Tanks ("UST") or Aboveground Storage Tanks ("AST") located on the premises? Yes ☐ No ☑ DK ☐

2. Do you have any knowledge of USTs or ASTs that once existed on the Subject Property and whether such tanks were removed or abandoned? Yes ☐ No ☑ DK ☐

D. HAZARDOUS MATERIALS

1. Are any regulated hazardous materials, chemicals, or waste stored/used on-site? Yes ☐ No ☑ DK ☐

If "yes" please provide a copy of the chemical inventory.

2. To the best of your knowledge, do any of the following operations take place on the Subject Property or have ever taken place on the Subject Property:

Dry Cleaning:	Yes ☐ No ☑	Battery Storage/Sales:	Yes ☐ No ☑
Paint Storage/Sales:	Yes ☐ No ☑	Petroleum Storage/Sales:	Yes ☐ No ☑
Landfill/Dumping:	Yes ☐ No ☑	Junkyard:	Yes ☐ No ☑
Photo or X-Ray Finishing:	Yes ☐ No ☑	Electric Equip Manufacturing:	Yes ☐ No ☑
Solvent Storage or Sales:	Yes ☐ No ☑	Chemical Manufacture/Sales:	Yes ☐ No ☑
Automobile Storage or Repair:	Yes ☐ No ☑	Agriculture:	Yes ☑ No ☐
Metals Machining:	Yes ☐ No ☑	Metals Heat Treating:	Yes ☐ No ☑

Any other commercial or industrial process which may have included the use of chemicals: Yes ☐ No ☑

If yes, Please specify:_____

317 S. Isis Avenue, STE 207, Inglewood, CA 90301

Toll Free: 888-705-6300 Phone: 310-854-6300 Fax: 310-854-0199 Web: https://www.efiglobal.com/our-services/environmental/

E. REGULATORY ACTION

1. Has the subject property ever been subject to any environmental enforcement action by the local government, federal, or state entities? Yes ☐ No ☑ DK ☐

2. Do you have any knowledge of pending or proposed environmental actions against the subject property or neighboring properties? Yes ☐ No ☑ DK ☐

3. Have there been any formal or informal citizen or tenant complaints regarding environmental or health matters in connection with the Subject Property? Yes ☐ No ☑ DK ☐

4. Are you aware of any releases of hazardous materials on the Subject Property? Yes ☐ No ☑ DK ☐

F. ADDITIONAL INFORMATION

1. Do you have knowledge of any previous environmental reports conducted for the site such as Phase I ESA, Phase II ESA, Site Characterization, Removal or Remediation, Geotechnical Reports, Lead Based Paint or Asbestos Survey or Removal, or other relevant material?

   Yes ☐ No ☑ If yes, please provide a copy.

2. Do you have a recent Title Report for the subject property?

   Yes ☐ No ☑ If yes, please provide a copy.

3. Can you provide the contact information of the former owner/occupant of the property? Yes ☐ No ☑
   If yes, please provide contact information below.

Public Records Request Number: PR3-011023-14

Location: 7528 Bellaire Ave., North Hollywood, CA 91605

APN: 2305-024-030

Dear Ms. Garcia:

On January 10, 2023, the Department of Toxic Substances Control (DTSC) received your email of the same date requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the site/facility referenced above.

Many of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 818-717-6521 or via email at ChatsworthFileRoom@dtsc.ca.gov.

Sincerely,

Robert Hardison

Note: Please use the above button for attaching additional documents that will help define your public records request.

Also Note: You MUST press the "Submit Your Public Records Request" button to complete this form otherwise the form will be automatically deleted!

INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.

2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.

3. A search for facility records can only be conducted by one or all of the following:

-- a) Facility Name, Address, or Identification Number

-- b) Facility Application Number, or Permit to Operate Number; or

-- c) Facility Notice of Violation/Notice to Comply Number.

4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.

5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.

6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.

7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.

8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.

9. The charge for the direct cost of duplication is as follows: Paper Copies, $0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, $5.00 each. After a preliminary estimate, advance payment may be required.

10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs $10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@aqmd.gov.

REQUEST FOR DOCUMENTS - UNDER THE PUBLIC RECORDS ACT

In reply to your request of January 10, 2023, for records concerning Request #23-243.

As of this date, our office has determined that LA Sanitation and Environment (LASAN) is not in possession of any documents or information relating to your request.

This does not include any records that may be in the custody of other city departments, as each department in the City of Los Angeles maintains and is responsible for their own records.

For all other City Department records please go to their respective website at https://lacity.org, the City's 311 website at http://myla311.lacity.org or call 311 to reach the City's call center during business hours.

Best regards,

LA Sanitation & Environment

CITY OF LOS ANGELES

DEPARTMENT OF BUILDING AND SAFETY

BUILDING DIVISION

Application for the Erection of a Building

OF

CLASS "D"

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

Commitment No. NCS-1161303-LA2

SCHEDULE B, PART I—Requirements

All of the following Requirements must be met:

A. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

B. Pay the agreed amount for the estate or interest to be insured.

C. Pay the premiums, fees, and charges for the Policy to the Company.

D. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

E. Releases(s) or Reconveyance(s) of Item(s): None

F. Other: None

G. You must give us the following information:
   a. Any off-record leases, surveys, etc.
   b. Statement(s) of Identity, all parties.
   c. Other:

With respect to the trust referred to in the vesting:

a. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
b. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
c. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

The following additional requirements, as indicated by "X", must be met:

☒ H. Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

☒ I. The Company's Owner's Affidavit form (attached hereto) must be completed and

Copyright 2021 American Land Title Association. All rights reserved.
The use of this Form (or any derivative thereof) is restricted to ALTA licensees and
ALTA members in good standing as of the date of use. All other uses are prohibited.
Reprinted under license from the American Land Title Association.

submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

☒ J. An ALTA/NSPS survey of recent date, which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

☐ K. The following LLC documentation is required from the seller:
a. a copy of the Articles of Organization.
b. a copy of the Operating Agreement, if applicable.
c. a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State.
d. express Company Consent to the current transaction.

☐ L. The following partnership documentation is required:
a. a copy of the partnership agreement, including all applicable amendments thereto.
b. a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State.
c. express Partnership Consent to the current transaction.

☐ M. The following corporation documentation is required:
a. a copy of the Articles of Incorporation.
b. a copy of the Bylaws, including all applicable Amendments thereto.
c. a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State.
d. express Corporate Resolution consenting to the current transaction.

☐ N. Based upon the Company's review of that certain partnership/operating agreement dated Not disclosed for the proposed insured herein, the following requirements must be met: Any further amendments to said agreement must be submitted to the Company, together with an affidavit from one of the general partners or members stating that it is a true copy, that said partnership or limited liability company is in full force and effect, and that there have been no further amendments to the agreement. This Commitment will then be subject to such further requirements as may be deemed necessary.

☐ O. A copy of the complete lease, as referenced in Schedule A, #3 herein, together with any amendments and/or assignments thereto, must be submitted to the Company for review,

along with an affidavit executed by the present lessee stating that it is a true copy, that the lease is in full force and effect, and that there have been no further amendments to the lease. This Commitment will then be subject to such further requirements as may be deemed necessary.

☒ P. Approval from the Company's Underwriting Department must be obtained for issuance of the policy contemplated herein and any endorsements requested thereunder. This Commitment will then be subject to such further requirements as may be required to obtain such approval.

☒ Q. Potential additional requirements, if ALTA Extended coverage is contemplated hereunder, and work on the land has commenced prior to close, some or all of the following requirements, and any other requirements which may be deemed necessary, may need to be met:
a. The Company's "Indemnity Agreement I" must be executed by the appropriate parties.
b. Financial statements from the appropriate parties must be submitted to the Company for review.
c. A copy of the construction contract must be submitted to the Company for review.
d. An inspection of the Land must be performed by the Company for verification of the phase of construction.
e. The Company's "Mechanic's Lien Risk Addendum" form must be completed by a Company employee, based upon information furnished by the appropriate parties involved.

Commitment No. NCS-1161303-LA2

SCHEDULE B, PART II—Exceptions

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This Commitment and the Policy treat any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document will be excepted from coverage.

The Policy will not insure against loss or damage resulting from the terms and conditions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I—Requirements are met.

2. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.

3. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.

4. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.

5. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.

6. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

7. General and special taxes and assessments for the fiscal year 2023-2024, a lien not yet due or payable.

8. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

Copyright 2021 American Land Title Association. All rights reserved.
The use of this Form (or any derivative thereof) is restricted to ALTA licensees and
ALTA members in good standing as of the date of use. All other uses are prohibited.
Reprinted under license from the American Land Title Association.

9. An easement for right of way and incidental purposes in the document recorded as Book 5469, Page 289 of Official Records.

10. An easement for pole lines, telephone and telegraph lines and conduits and incidental purposes in the document recorded in Book 4991 of Deeds, Page 100.

11. Notice of pendency of action recorded March 08, 1961 as Book M-720, Page 990 of Official Records.

Court:	The Superior Court, County of Los Angels
Case No.:	766228
Plaintiff:	State of California
Defendant:	Marie M. Duncan, County of Los Angels, a body politic and corporate, Et Al.
Purpose:	for Freeway Purposes

12. An easement for permanent slope easement and public street easement and incidental purposes in the document recorded May 25, 1976 as Instrument No. 4378 of Official Records.

13. The terms and provisions contained in the document entitled "Department of Public Works, Bureau of Engineering" recorded March 13, 1981 as Instrument No. 81-264591 of Official Records.

14. A waiver of any claims for damages by reason of the location, construction, landscaping or maintenance of a contiguous freeway, highway, roadway or transit facility as contained in the document recorded March 13, 1981 as Instrument No. 81-264591 of Official Records.

15. Any defects, liens, encumbrances or other matters which name parties with the same or similar names as Marie M. Duncan. The name search necessary to ascertain the existence of such matters has not been completed. In order to complete this preliminary report or commitment, we will require a statement of information.

16. We find no outstanding voluntary liens of record affecting subject property. An inquiry should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any security interest in the subject property.

17. Water rights, claims or title to water, whether or not shown by the Public Records.

18. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/NSPS survey.

19. Rights of parties in possession.

Copyright 2021 American Land Title Association. All rights reserved.
The use of this Form (or any derivative thereof) is restricted to ALTA licensees and
ALTA members in good standing as of the date of use. All other uses are prohibited.

INFORMATIONAL NOTES

ALERT - CA Senate Bill 2 imposes an additional fee of $75 up to $225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

NOTE to proposed insured lender only: No Private transfer fee covenant, as defined in Federal Housing Finance Agency Final Rule 12 CFR Part 1228, that was created and first appears in the Public Records on or after February 8, 2011, encumbers the Title except as follows: None

1. Taxes for proration purposes only for the fiscal year 2022-2023.

First Installment:	$2,315.15, PAID
Second Installment:	$2,315.15, PAID
Tax Rate Area:	00013
APN:	2305-024-030

2. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Single Family Residence known as 7528 Bellaire Avenue, Los Angeles, CA.

3. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

4. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

The map attached, if any, may or may not be a survey of the land depicted thereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of this Commitment or the Policy, if any, to which the map is attached.

ALTA COMMITMENT FOR TITLE INSURANCE
issued by
FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT—READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I—Requirements; Schedule B, Part II—Exceptions; and the Commitment Conditions, First American Title Insurance Company, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Amount of Insurance and the name of the Proposed Insured.

If all of the Schedule B, Part I—Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

FIRST AMERICAN TITLE INSURANCE COMPANY

COMMITMENT CONDITIONS

1. DEFINITIONS
   a. "Discriminatory Covenant": Any covenant, condition, restriction, or limitation that is unenforceable under applicable law because it illegally discriminates against a class of individuals based on personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or other legally protected class.
   b. "Knowledge" or "Known": Actual knowledge or actual notice, but not constructive notice imparted by the Public Records.
   c. "Land": The land described in Item 5 of Schedule A and improvements located on that land that by State law constitute real property. The term "Land" does not include any property beyond that described in Schedule A, nor any right, title, interest, estate, or easement in any abutting street, road, avenue, alley, lane, right-of-way, body of water, or waterway, but does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
   d. "Mortgage": A mortgage, deed of trust, trust deed, security deed, or other real property security instrument, including one evidenced by electronic means authorized by law.
   e. "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
   f. "Proposed Amount of Insurance": Each dollar amount specified in Schedule A as the Proposed Amount of Insurance of each Policy to be issued pursuant to this Commitment.
   g. "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
   h. "Public Records": The recording or filing system established under State statutes in effect at the Commitment Date under which a document must be recorded or filed to impart constructive notice of matters relating to the Title to a purchaser for value without Knowledge. The term "Public Records" does not include any other recording or filing system, including any pertaining to environmental remediation or protection, planning, permitting, zoning, licensing, building, health, public safety, or national security matters.
   i. "State": The state or commonwealth of the United States within whose exterior boundaries the Land is located. The term "State" also includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and Guam.
   j. "Title": The estate or interest in the Land identified in Item 3 of Schedule A.

2. If all of the Schedule B, Part I—Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and
ALTA members in good standing as of the date of use. All other uses are prohibited.
Reprinted under license from the American Land Title Association.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:
   a. the Notice;
   b. the Commitment to Issue Policy;
   c. the Commitment Conditions;
   d. Schedule A;
   e. Schedule B, Part I—Requirements; and
   f. Schedule B, Part II—Exceptions; and
   g. a counter-signature by the Company or its issuing agent that may be in electronic form.

4. COMPANY'S RIGHT TO AMEND
   The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company is not liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY
   a. The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
      i. comply with the Schedule B, Part I—Requirements;
      ii. eliminate, with the Company's written consent, any Schedule B, Part II—Exceptions; or
      iii. acquire the Title or create the Mortgage covered by this Commitment.
   b. The Company is not liable under Commitment Condition 5.a. if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
   c. The Company is only liable under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
   d. The Company's liability does not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Condition 5.a. or the Proposed Amount of Insurance.
   e. The Company is not liable for the content of the Transaction Identification Data, if any.
   f. The Company is not obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.
   g. The Company's liability is further limited by the terms and provisions of the Policy to be issued to the Proposed Insured.

Copyright 2021 American Land Title Association. All rights reserved.
The use of this Form (or any derivative thereof) is restricted to ALTA licensees and
ALTA members in good standing as of the date of use. All other uses are prohibited.
Reprinted under license from the American Land Title Association.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT; CHOICE OF LAW AND CHOICE OF FORUM
   a. Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
   b. Any claim must be based in contract under the State law of the State where the Land is located and is restricted to the terms and provisions of this Commitment. Any litigation or other proceeding brought by the Proposed Insured against the Company must be filed only in a State or federal court having jurisdiction.
   c. This Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
   d. The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
   e. Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
   f. When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT IS ISSUED BY AN ISSUING AGENT
   The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for closing, settlement, escrow, or any other purpose.

8. PRO-FORMA POLICY
   The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. CLAIMS PROCEDURES
   This Commitment incorporates by reference all Conditions for making a claim in the Policy to be issued to the Proposed Insured. Commitment Condition 9 does not modify the limitations of liability in Commitment Conditions 5 and 6.

10. CLASS ACTION
    ALL CLAIMS AND DISPUTES ARISING OUT OF OR RELATING TO THIS COMMITMENT, INCLUDING ANY SERVICE OR OTHER MATTER IN CONNECTION WITH ISSUING THIS COMMITMENT, ANY BREACH OF A COMMITMENT PROVISION, OR ANY OTHER CLAIM OR DISPUTE ARISING OUT OF OR RELATING TO THE TRANSACTION GIVING RISE TO THIS COMMITMENT, MUST BE BROUGHT IN AN INDIVIDUAL CAPACITY. NO PARTY MAY SERVE AS PLAINTIFF, CLASS MEMBER, OR PARTICIPANT IN ANY CLASS OR REPRESENTATIVE PROCEEDING. ANY POLICY ISSUED PURSUANT TO THIS COMMITMENT WILL CONTAIN A CLASS ACTION CONDITION.

11. ARBITRATION

The Policy contains an arbitration clause. All arbitrable matters when the Proposed Amount of Insurance is $2,000,000 or less may be arbitrated at the election of either the Company or the Proposed Insured as the exclusive remedy of the parties. A Proposed Insured may review a copy of the arbitration rules at http://www.alta.org/arbitration.

APPENDIX IX

RESUMES

Galina Gamzyakova | Environmental Specialist

317 South Isis Avenue, Suite 207, Inglewood, California 90301 *310.854.6300*
galina.gamzyakova@efiglobal.com

Professional Summary:

Ms. Gamzyakova is an Environmental Specialist with approximately three years of experience in environmental consulting, ecosystem restoration, and scientific research industries. Current area of expertise of Ms. Gamzyakova includes preparation and assisting of Phase I Environmental Site Assessments and other limited environmental due diligence products on residential, commercial and industrial types of properties in accordance with ASTM standards, Phase II Environmental Site Assessment fieldwork assistance, and developing health and safety plans.

Areas of Expertise:

- Records Search with Risk Assessments
- Transaction Screen Assessments
- Phase I Environmental Site Assessments project management
- Phase II Environmental Site Assessments fieldwork assistance

Licenses and Certifications:

OSHA 8-Hour HAZWOPER Annual Refresher # 2104155329878, Safety Unlimited, Inc., 2021.

OSHA 40-Hour HAZWOPER, OSHA Training Institute at CSU Dominguez Hills (DH), 2019.

Introduction to Safety and Health Management – OSHA Training Institute at CSUDH, 2019.

Project Experience:

Records Search with Risk Assessment project management – Lending Institution

Provided desktop regulatory databases review and research of historical sources per the scope of work associated with refinance transaction for multi-family residential properties throughout Southern California, including Los Angeles, Orange, Riverside, and San Bernardino Counties, Northern California, and Arizona.

Transaction Screen Assessment project management – Lending Institution

Performed site visits and regulatory databases review for multi-family residential properties per the scope of work of transaction screen assessments for the purpose of refinance and acquisition. One of the projects included expedited one-week deadline, which was successfully met, with provided follow-up support to the client.

Phase I Environmental Site Assessment projects portfolio – Lending Institution

Performed project management and maintained inspection related communications with site contacts for assisted living facilities located in Northern and Southern California, Washington, and Arizona.

Phase I Environmental Site Assessment project management – Conservation Agency

Performed site visits of undeveloped properties in unincorporated areas of Riverside County, agency file reviews, historical records, and regulatory databases review per the scope of work associated with acquisition transactions for environmental conservation purposes.

Andrea Moore | Senior Staff Professional

2000 S. Dairy Ashford, Suite 600, Houston, Texas 77077 832-518-5145 andie.moore@efiglobal.com

Professional Summary: Ms. Moore is an environmental consultant specializing in resolving complex environmental issues for property owners and managers. She is an active team member responsible for client reporting, operations management, cost control, schedule analysis, proposal development, execution of contracts for environmental site assessments, hazardous material identification, remediation, and spill investigations. Ms. Moore conducts Phase I Environmental Site Assessments, Phase II Environmental Site Assessments, Remediation, and Asbestos sampling.

Licenses and Certifications: Ms. Moore is certified as Asbestos Building Inspector, TX, #601772 and has her HAZWOPER, OSHA training.

Project Experience:

Regency Center, Voluntary Cleanup Program (VCP)-The Woodlands, Texas

Ms. Moore has supervised the installation of soil borings and monitoring wells, as well as collected soil and groundwater samples to determine the verticle and horizontal extent of clorinated solvent contamination from a dry cleaning facility on the Subject Property. Ms. Moore has assisted the client in enrolling the site in the Texas Commission on Environmental Quality (TCEQ) Voluntary Cleanup Program (VCP). After the enrollment of the site, Ms. Moore installated injection wells with the TCEQ Underground Injection Control (UIC) division for in-situ-chemical oxidation ativities using sodium persulfate. This site was granted a Certificate of Completion in June 29, 2012.

University of Houston, Tank Closure-Houston, Texas

EFI conducted a Phase II investigation, which involved the advancement of soil borings in the area of the contaminated soil to collect soil and groundwater samples. During the remediation efforts, Ms. Moore supervised the removal and disposal of the contaminated soil, as well as documenting and reporting the identified contamination with the TCEQ. Due to EFI's efforts, the TCEQ concurred with the scope of work and issued a No Further Action (NFA) letter.

Woods Partners, Oil/Gas Wells and Mud Pits-Houston, Texas

Ms. Moore utilized geophysical technology on a vacant tract of land to determine the location of a historical oil well and associated mud pits. Ms. Moore worked in coordination with the Texas Railroad Commission (RRC) VCP Program to determine the course of action for this site.

Legacy Partners, Corrective Action-Austin, Texas

Ms. Moore assisted the client in receiving closure for lead contaminated soil by conducting a voluntary Phase II Environmental Site Assessment, receptor evaluation, and Tier 1 Exclusion Criteria Check list. Based on EFI's efforts, the TCEQ concurred with the scope of work and issued a NFA letter.

Triten, Prepare Notification of Registration (NOR)-Houston, Texas

Ms. Moore classified and registered hazardous waste streams and storage practices to the TCEQ.

Landry's Restaurants, Innocent Owner/Operator Program (IOP)-Galveston, Texas

Ms. Moore prepared an IOP application for a property impacted from a release by an adjacent gas station. The TCEQ concurred with the application and issued a Certificate of Completion.

Cobalt, Phase II, Houston-Texas and Atlanta, Georgia

Ms. Moore Installed borings and collected soil and groundwater samples to determine the extent of petroleum and solvent contamination from an oil/gas well production area.

Prescott Reality Group, Phase I-Chevron Office Building

Ms. Moore conducted a due diligence survey of an office building, the collection of radon, lead-in-drinking water, and asbestos samples.
