# (JOC) LOWER SACRAMENTO ROAD CONCRETE REPAIR
## Project Description

**Project Location:**
Location #1: 1,520 feet North of Mettler Road; Location #2: 1,700 feet South of Harney Lane at Extension Road**. See attached Vicinity Map.**

**Project Justification:**
This project will repair/modify concrete within the Lower Sacramento Bike Lane Safety project limits, so that it will not interfere with bike lane striping taking place next spring.

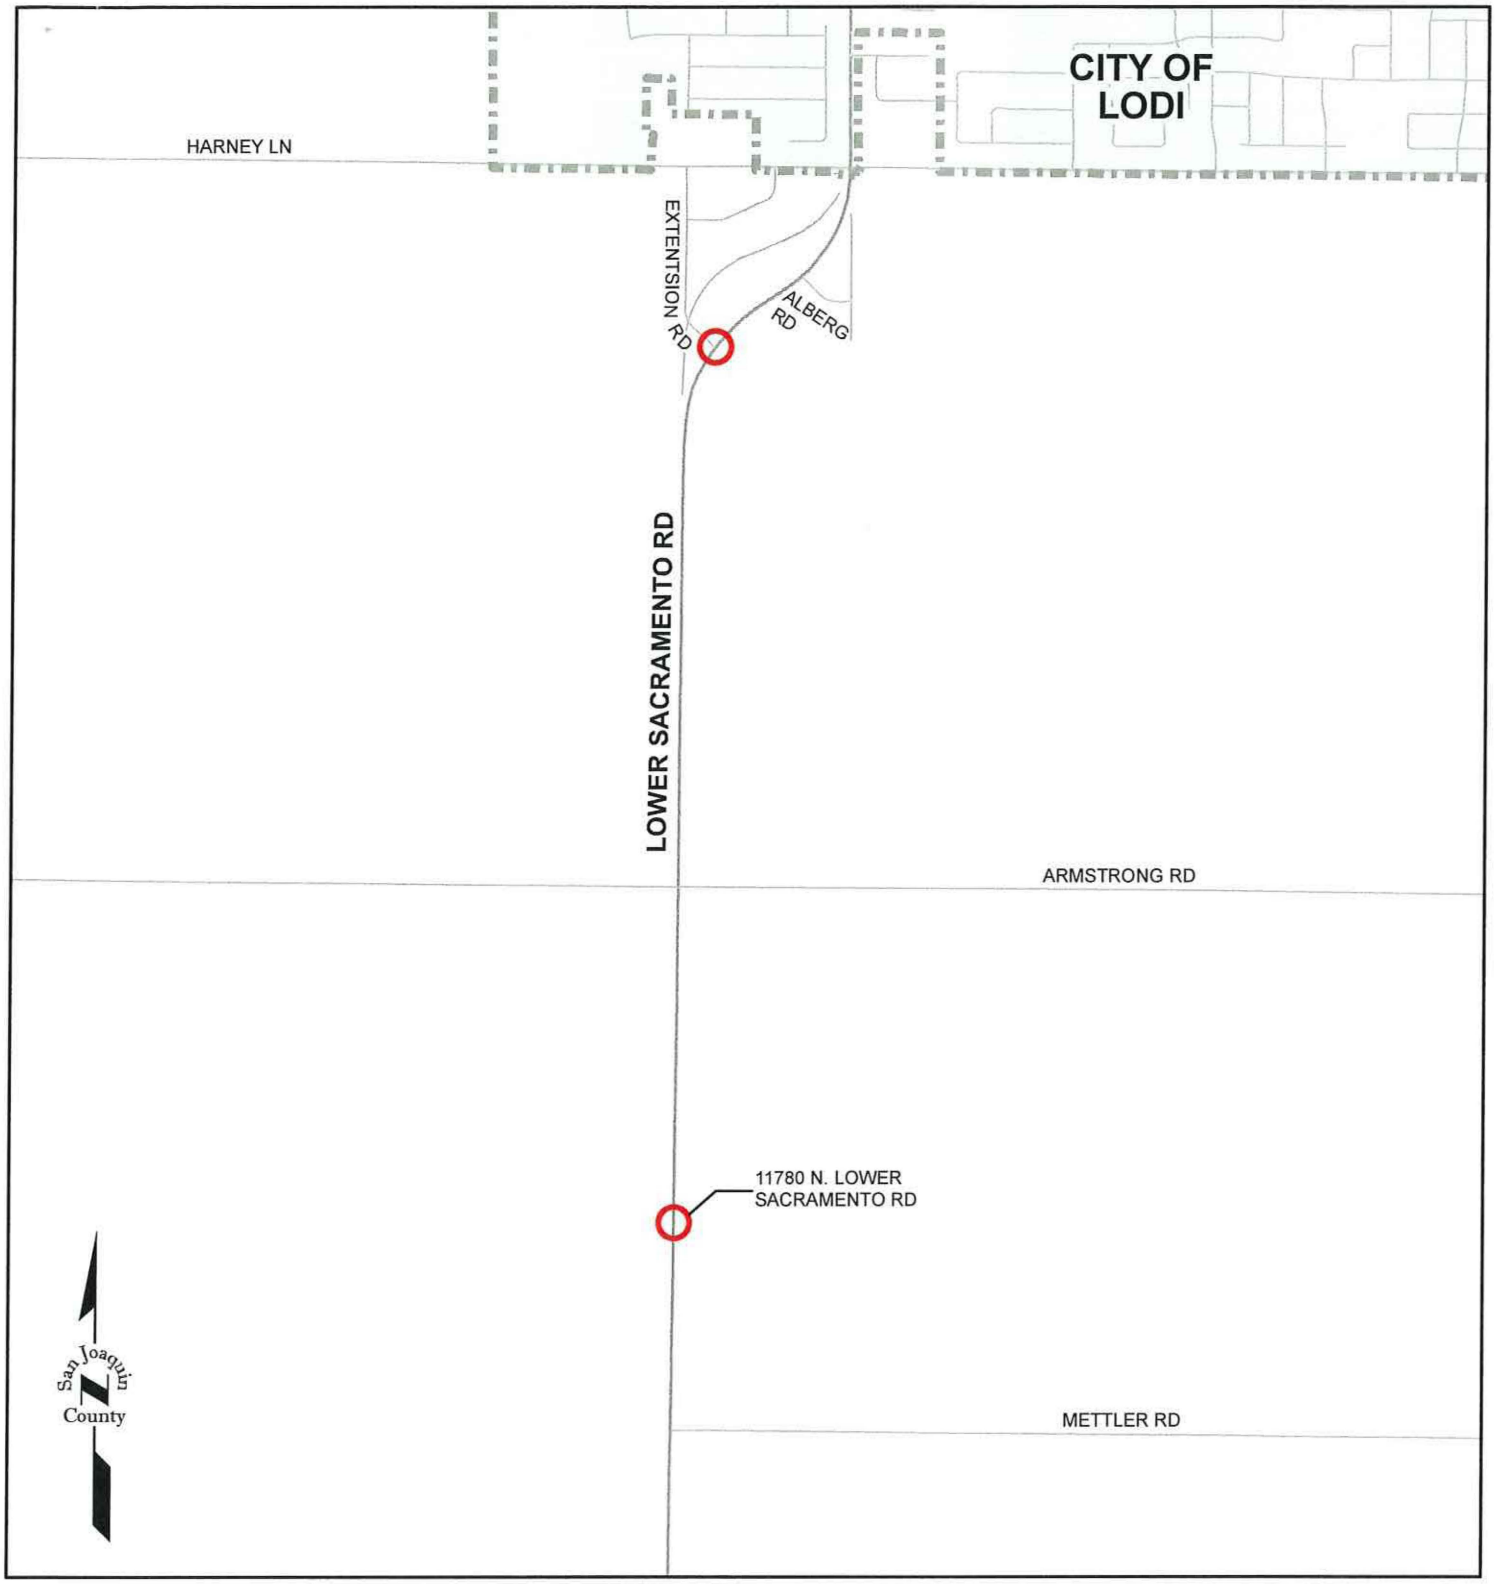

**Scope of Work:**
The project will consist of:

1. Removing and replacing two large PCC panels in the median that have heaved up over time at Location #1.
2. Modifying pork chop island at Extension Road to accommodate future bike lane at Location #2.

**Environmental Setting:**
In these portions of the San Joaquin County, land usage is primarily **rural with single family homes.**

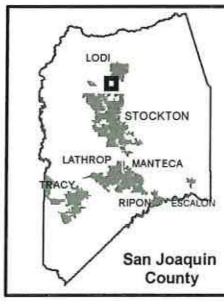

**There are many large trees adjacent to the project area.** Nesting and migratory birds, protected by the Migratory Bird Treaty Act, may nest within these trees. Furthermore, the Swainson's Hawk, a raptor species of concern within the State of California and listed as threatened may nest adjacent to or within the project area. A pre-construction survey for nesting Swainson's Hawks and other migratory birds is recommended if construction is scheduled to occur from February 15th to September 1st.

**Beneficiaries:**
The public will see increased safety and fewer hazards with this well-maintained concrete. Overall, there will be reduced maintenance concerns and more reliability within the project area.
