Subject: Phase I Environmental Site Assessment
Paul Ecke Central Elementary School, Encinitas, California

Dear Mr. Mears,

Padre Associates (Padre) at the request of PlaceWorks and on behalf of Encinitas Union School District (EUSD), has prepared this Phase I Environmental Site Assessment (ESA) report for the Paul Ecke Elementary School located at 185 Union Street in Encinitas, San Diego County, California.

The Phase I ESA was performed in general accordance with the American Society for testing and Materials (ASTM) Standard Practice Designation E 1527-21, and the school site selection requirements of the California Department of Toxic Substances Control (DTSC).

Padre appreciates the opportunity to provide environmental consulting services to PlaceWorks and Encinitas Union School District. If you have any questions or require additional information, please contact the undersigned at (916) 333-5920, Ext. 240.

Sincerely,

PADRE ASSOCIATES, INC.

Alan Churchill, P.G.
Senior Geologist

Alan J. Klein, C.P.E.S.C., QSD/QSP
Associate Senior Environmental Scientist

1.0 INTRODUCTION

Padre Associates. (Padre), on behalf of PlaceWorks and Encinitas Union School District (EUSD), completed a Phase I Environmental Site Assessment (ESA) for the Paul Ecke Central Elementary School, located at 185 Union Street in Encinitas, San Deigo County, California (Subject Property). The Subject Property is identified on **Plate 1 - Site Location** and **Plate 2 – Site Map.**

This ESA was prepared for use by EUSD as the owner of the Subject Property and as the User of the Phase I ESA. Padre understands that the Encinitas Union School District plans to demolish and rebuild the existing Paul Ecke Central Elementary School, except for an approximately 100-year-old building that will remain.

This Phase I ESA was completed in accordance with the guidelines outlined in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments promulgated in 2013 (ASTM E1527-13) with the inclusion of general modifications and revisions outlined in the recently revised and updated ASTM Standard Practice dated November 1, 2021 (ASTM E1527-21), and the U.S. Environmental Protection Agency's All Appropriate Inquiry (AAI). The objective of the ESA was to evaluate whether current or previous land use at or adjacent to the Subject Property may have involved, or resulted in the use, storage, disposal, treatment, and/or release of hazardous substances to the environment, resulting in the determination of a Recognized Environmental Condition (REC) at the Subject Property. A REC is defined by the updated ASTM E1527-21 as *(1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; and (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.* The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de-minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Additional key definitions from the updated ASTM E1527-21 standard include the following:

- Activity Use Limitation (AUL) - legal or physical restrictions or limitations on the use of, or access to, a site or facility: (a) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and / or surface water on the property, or (b) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.
- *Controlled Recognized Environmental Condition (CREC)* - recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (i.e., activity and use limitations or other property use limitations).

- *Environment* - includes navigable waters, the waters of the contiguous zone, and the ocean waters; and any other surface water, groundwater, drinking water supply, land surface, or subsurface strata. It should be noted that this ESA did not include a survey of asbestos-containing materials (ACM) or lead-based paint (LBP), nor did it include sampling and chemical analysis of any environmental media at the Subject Property.
- *Historical Recognized Environmental Condition (HREC)* - a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations, or other property use limitations). It should be noted that an HREC is not a Recognized Environmental Condition.
- *Migrate / Migration* - refers to the movement of hazardous substances or petroleum products in any form, including solid and liquid at the surface and subsurface, and vapor in the subsurface.
- *Property Use Limitation (PUL)* - limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allow hazardous substances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria.

To achieve the objective of the ESA, the following tasks were completed:

- A review of readily available geologic and hydrogeologic literature;
- Historical research including a review of available historical aerial photographs, Sanborn Fire Insurance Maps, historical city directories, and historical topographic maps relating to the Subject Property;
- A site reconnaissance of the Subject Property and adjacent properties;
- Interviews with knowledgeable persons of the Subject Property;
- Public agency records review;
- An environmental database search; and
- The preparation of this report documenting the results of the ESA.

Seven appendices are included with this report. Appendix A presents the assessor's parcel map and Flood Insurance Rate Map; Appendix B presents historical aerial photographs and topographic maps; Appendix C presents photographs of the Subject Property at the time of the assessment; Appendix D presents a copy of the completed property owner questionnaire; Appendix E presents USTs removal documentation; Appendix F presents the environmental database report obtained from EDR for the Subject Property; and Appendix G presents the qualifications of the environmental assessor responsible for report preparation.

2.0 ENVIRONMENTAL SETTING

The following discussion summarizes the geologic, hydrogeologic, and other relevant data pertaining to the physical setting of the Subject Property.

2.1 SITE LOCATION AND DESCRIPTION

The Subject Property is located in Section 9, Township 13 South, Range 4 West of the U.S. Geological Survey (USGS) 7½ Minute topographic series, Encinitas Quadrangle Map (2022). Approximate latitude and longitude are identified to be:

- Latitude (North) 33.05741°, (33° 3' 26.67"N)
- Longitude (West) -117.297052°, (117° 17' 49.38"W)

The Subject Property consists of 7.2 acres and is currently operated at the Paul Ecke Central Elementary School, which was originally constructed in 1927. The Subject Property is identified by the San Diego County Assessor as assessor's parcel number (APN) 256-301-01-00. A copy of the assessor's parcel map is presented in **Appendix A**.

2.2 TOPOGRAPHY

Based on a review of the United States Geological Survey (USGS) 7.5-minute topographic maps for the Encinitas, California quadrangle, the Subject Property is situated at approximate elevations of 80 to 85 feet above mean sea level (msl) and slopes gently from east to west. Surface water run-off and stormwater at the Subject Property is diverted via surface grading and storm drain inlets leading to the City of Encinitas' stormwater collection system along the adjacent streets. The Pacific Ocean is located approximately 1,200 feet west of the Subject Property.

2.3 GEOLOGY AND HYDROLOGY

The Subject Property is located within the western portion of the Peninsular Ranges Geomorphic Province of California. The Peninsular Ranges stretch approximately 900 miles from the Los Angeles Basin to the southern tip of the Baja California Peninsula and are bounded to the east by the Colorado Desert. The Peninsular Ranges Province is divided into three major fault bounded tectonic blocks within the San Andreas Fault System, consisting of the Santa Anna, Perris, and San Jacinto Blocks. The ranges are seismically active and include parts of four major northwest-striking, right-lateral strike slip Pacific and North American plate boundary fault zones. These include the Elsinore fault zone to the east, the Newport-Inglewood-Rose Canyon offshore fault zone to the west, and the Coronado Bank fault, and San Diego Trough fault zone to the southwest (Norris and Webb, 1990).

According to the California Geological Survey (CGS), *Geologic Map of California, Santa Ana Sheet (1:250,000)*, 1965 (second printing 1973), the Subject Property is underlain by Pleistocene marine and marine terrace deposits.

According to the United States Department of Agriculture (USDA), Natural Resources Conservation Services (NRCS), Web Soil Survey of the San Diego County Area, California (Websoil 2025), surficial soils identified at the Subject Property consist primarily of Marina loamy coarse sand (2 to 9 percent slopes) with a lesser amount of Marina loamy coarse sand (9 to 30 percent slopes) located at the east area of the Subject Property.

Marina loamy coarse sand consists of eolian sands derived from mixed sources. A typical profile consists of loamy coarse sand from surface to 10 inches; loamy sand from 10 to 57 inches; and sand from 57 to 60 inches. The soil is somewhat excessively drained and has a high runoff.

The Subject Property is located within the Batiquitos Hydrologic Sub-Area of the Carlsbad Hydrologic Unit. The Batiquitos Hydrologic Sub-Area has been classified as having existing beneficial uses for varying purposes including municipal and domestic supply, agricultural supply, and industrial service supply (SWRCB, 2025). Groundwater levels beneath the Subject Property are unknown, but anticipated to be greater than 25 feet. Groundwater flow direction is anticipated to follow surface topography which is westerly.

2.4 FLOODPLAIN

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (*Community Panel Number: 06073C1041H, Effective Date: December 20, 2019),* the Subject Property is located in Zone X (areas determined to be outside the 0.2% annual chance flood plain). A copy of the FEMA Flood Insurance Rate Map is presented in **Appendix A**.

2.5 RADON

Radon is a colorless, odorless, tasteless, and radioactive gas that is produced as a natural decay product of uranium. Because of its radioactivity, studies have shown that at elevated concentrations there is a link between radon and lung cancer. Persons living in a building with elevated radon concentrations may have an increased risk of contracting lung cancer over a period of years.

The U.S. Environmental Protection Agency (U.S. EPA) recommends that action be taken to reduce radon levels in homes if levels are 4.0 pico curies per Liter (pCi/L) or higher. Radon levels below 4.0 pCi/L still pose a certain level of risk. Sections 307 and 309 of the Indoor Radon Abatement Act of 1988 (IRAA) directed the U.S. EPA to list and identify areas of the United States with the potential for elevated indoor radon levels. The U.S. EPA's Map of Radon Zones assigns each of the 3,141 counties in the U.S. to one of three zones based on radon potential:

- Zone 1 (red) counties have a predicted average indoor radon screening level greater than 4 pCi/L (highest potential);
- Zone 2 (orange) counties have a predicted average indoor radon screening level between 2 and 4 pCi/L (moderate potential);
- Zone 3 (yellow) counties have a predicted average indoor radon screening level less than 2 pCi/L (lowest potential).

According to the U.S. EPA map of California radon zones, Orange County is identified as a Zone 3 (yellow) county. Zone 3 counties have a predicted average indoor radon screening level less than 2 pCi/L (lowest potential). According to the California Indoor Radon Test Results (updated February 2016) for Zip Code 92024, 48 radon tests were conducted with 5 sites reported to have radon levels ≥ 4 pCi/L. This represents 10.4% of the radon tests in the Subject Property zip code. Therefore, the potential for radon hazard at the Subject Property is considered low and is dependent on site-design and building construction specifications.

2.6 OIL AND GAS WELLS

The California Geologic Energy Management Division (CalGEM) oversees the drilling, operation, maintenance, and plugging and abandonment of oil wells, natural gas wells, and geothermal wells. The CalGEM regulatory program emphasizes the wise development of oil, natural gas, and geothermal resources in the state of California through sound engineering practices that protect the environment, prevent pollution, and ensure public safety. Padre reviewed the available CalGEM online mapping system for the Subject Property at the California Department of Conservation webpage (https://www.conservation.ca.gov/calgem/). According to a review of the CalGEM online database and interactive map, there are no reported oil wells, natural gas wells, and/or geothermal wells located within a one-mile radius of the Subject Property.

2.7 NATURALLY OCCURRING ASBESTOS (NOA)

Asbestos is a naturally occurring silicate mineral of the amphibole group that has Asbestos is a naturally occurring silicate mineral of the amphibole group that has historically been utilized for a variety of purposes including fireproofing, due to its fibrous nature, which allowed it to be woven into cloth and formed into various types of construction material. Asbestos is a known carcinogen.

According to the California Department of Conservation, Division of Mines and Geology, Open-File Report 2000-19, dated August 2000, natural occurrences of asbestos are more likely to be encountered in, and immediately adjacent to, areas of ultramafic outcrops (igneous and metamorphic rocks with high iron and magnesium contents).

According to the California Geological Survey (CGS), *Geologic Map of California, Santa Ana Sheet (1:250,000)*, 1965 (second printing 1973), there are no exposures of potentially asbestos-bearing ultramafic or serpentinized rocks located approximately 10 miles of the Subject Property. Therefore, the potential for NOA to be present at the Subject Property from weathering and deposition of ultrabasic rock originating from outcrops is not considered a REC.

2.8 EARTHQUAKE FAULT ZONES

In 1972 the State of California passed the Alquist-Priolo Earthquake Fault Zoning Act (AP Act) to mitigate the hazard of surface faulting to structures utilized for human occupancy. The AP Act's primary purpose is to prevent the construction of buildings used for human occupancy on the surface trace of active faults. The AP Act defines three categories of fault activity; active

(demonstrated movement within the last 11,000 years), potentially active (movement within the past 11,000 to 2,000,000 years), and inactive (no movement within the past 2,000,000 years).

Since 1972 CGS has issued a series of 1"=2,000' scale maps delineating Earthquake Fault Zones (EFZs). Structures proposed within mapped EFZs require geologic investigations to demonstrate that the structures will not be constructed across active faults. If an active fault is identified within the boundaries of the Subject Property, the proposed structures must be set back from the EFZ, generally a distance of 50 feet on either side of the identified fault location. The CGS mapping program is ongoing, and areas not currently identified as being within an EFZ may be included at some later time.

According to the EFZ maps issued by the CGS, the Subject Property is not located within the boundaries of an EFZ, and no active faults are known to cross the Subject Property (Jennings 2010).

3.0 HISTORICAL SITE CONDITIONS

Based on a review of readily available historical information, Padre has compiled the following history of the Subject Property. The earliest documentation reviewed for site usage was an aerial photograph dated 1939 and a topographic map dated 1901. Copies of historical aerial photographs and topographic maps are presented in **Appendix B**.

3.1 HISTORICAL AERIAL PHOTOGRAPHS

Padre reviewed readily available aerial photographs of the Subject Property, and the surrounding area obtained from EDR for the years 1939, 1946, 1953, 1964, 1966, 1970, 1979, 1985, 1997, 2005, 2012, and 2020. The information is summarized below:

1939 The 1939 photograph shows two school structures located in the northeast area of the Subject Property. The west area of the Subject Property is vacant, and the south area appear to be agriculture. Union Street is located north and adjacent to the Subject Property. Vulcan Avenue is located west and adjacent to the Subject Property, beyond which is a railroad line, Highway 101, and the Pacific Ocean. In general, the surrounding areas are mostly rural residences with agriculture (orchards).

1946 The 1946 photograph shows the Subject Property similar to the 1939 photograph with the exception of the addition of more school buildings. The surrounding areas are similar to the 1939 photograph with the exception of increased residences on the west side of Highway 101.

1953 The 1953 photograph shows the addition of an elongate building along the north Subject Property boundary. The remaining areas are vacant. Surrounding areas similar to the 1946 photograph.

1964 The 1964 photograph shows the addition of an elongate building in the east-central portion of the Subject Property. In general surrounding areas show increased residential development in particular on the west side of Highway 101.

1966 The 1966 photograph shows the addition of a building in the northwest area of the Subject Property. Surrounding areas similar to the 1964 photograph. Interstate 5 has been constructed further out to the east.

1970 The 1970 photograph appears to the show the central and south areas under construction. The surrounding areas are similar to the 1966 photograph with the exception of large greenhouses further out to the east and southeast.

1979 The 1979 photograph appears to show the addition of play fields in the central and south areas. Surrounding areas to the north, east, and south show increased residential development and less orchards.

1985 The 1985 photograph appears to show a courtyard area in the central portion of the Subject Property. In general surrounding areas show increased residential development.

1997 The 1997 photograph shows the Subject Property similar to the 1985 photograph. The surrounding areas to the north, east, and south continue with increased residential development.

2005 The 2005 photograph shows the Subject Property and surrounding areas similar to the 1997 photograph.

2012 The 2012 photograph shows the Subject Property similar to the 2005 photograph. Properties to the east are being developed.

2020 The 2020 photograph shows the Subject Property and surrounding properties similar to the 2012 photograph.

3.2 U.S.G.S. TOPOGRAPHIC MAPS

Padre obtained historical topographic maps published by the United States Geological Survey for the vicinity of the Subject Property. Historical topographic maps dated 1901, 1947, 1948, 1949, 1968, 1975, 1997, 2012, 2015, 2018, and 2022 were reviewed. A summary of the information presented on each map is presented below.

1901 The 1901 map shows the Subject Property as undeveloped land. An unpaved road running northeast-southwest abuts the northwest corner of the Subject Property. A railroad line is located to the west beyond which is a road (future Highway 101) and the Pacific Ocean. There is a structure located to the southeast. Encinitas is located further out to the south. The surrounding are primarily undeveloped with a sparse amount of structures.

1947 The 1947 map shows the Subject Property developed as a school. The surrounding areas have been developed with residences and road. Leucadia is located to the northwest.

1948 The 1948 map shows the Subject Property and surrounding areas similar to the 1947 photograph.

1949 The 1949 map shows the Subject Property and surrounding areas similar to the 1948 photograph.

1968 The 1968 map shows the Subject Property as Encinitas Union School and includes more buildings. Surrounding areas show increased development including Interstate 5 further out to the east.

1975 The 1975 map shows the Subject Property as the Encinitas Union School. Surrounding areas continued to be developed.

1997 The 1991 map shows the Subject Property similar to the 1975. Surrounding areas mostly show roads and few structures.

2012 The 2012 map only shows roads and geographical features.

2015 The 2015 map shows the Subject Property as a school. There is a school identified to the north and another one to the southwest.

2018 The 2018 map is similar to the 2015 map.

2022 The 2022 map shows the Subject Property as a school. North Vulcan Avenue is identified west and adjacent to the Subject Property. Surrounding areas are similar to the 2018 map.

3.3 CITY DIRECTORIES

Padre obtained an abstract of historical city directories provided by EDR for the physical addresses along Union Street. The years listed included 1971, 1975, 1979, 1982, 1986, 1992, 1995, 2000, 2005, 2010, 2014, 2017, and 2020.

The Subject Property is identified as a school in 1971, 1975, 1979, 1982, 1986, 1995, 2000, 2005, 2010, 2014, 2017, and 2020. The 1992 city directory identifies the Subject Property with an address of 180 Union Street. In addition, the Encinitas Union Elementary (district office) is identified at 189 Union Street for the years 1979, 1982, 1986, 1992, and 1995. Residences primarily occupy the adjacent addresses. A review of available city directories did not identify RECs for the Subject Property.

3.4 ENVIRONMENTAL LIENS

Padre reviewed the EDR Environmental Lien and activity use limitations (AULs) search report of available current land title records for environmental cleanup liens and other AULs such as engineering controls and institutional controls. No environmental liens or AULs were identified for the Subject Property. According to EDR, the current legal owner of APN: 256-301-01-00 is the Encinitas Union School District.

3.5 EXISTING ENVIRONMENTAL REPORTS

Padre was not provided with, nor did it identify the presence of existing environmental reports for the Subject Property.

4.0 CURRENT SITE CONDITIONS

The current site conditions were assessed to determine current activities and hazardous substances handling and storage at the Subject Property.

4.1 SITE RECONNAISSANCE

On April 30, 2025, Mr. Alan Klein with Padre conducted a site reconnaissance of the Subject Property. At the time of the inspection conditions were sunny and mild. Site reconnaissance consisted of walking the Subject Property and photographing site features, as well as observing adjacent properties.

Mr. Klein spoke on the phone with Mr. Eric Smith, Director of Facilities. Mr. Smith directed the janitorial staff to show me around the school property and open buildings, classrooms, etc. The school site consists of the main administrative building, classroom buildings, multi-purpose building, media center building, outdoor lunch area, garden area, playfields and hard courts.

The janitors room contained cleaning chemicals and supplies. Two pad-mounted electrical transformers were observed onsite. No visible oil-staining was observed around the base of these units. An exterior site reconnaissance of the Subject Property did not observe the presence of petroleum and/or chemical containers, nor petroleum and/or chemical stained soils or concrete/asphalt surfaces. No aboveground or indications of underground petroleum storage tanks were observed at the Subject Property. Features observed during the site reconnaissance are shown on **Plate 3 – Site Map Detail**. In addition photographs taken during the course of the site reconnaissance are presented in **Appendix C**.

4.2 UTILITIES

Electricity and gas is provided to the Subject Property by San Diego Gas & Electric, water services are provided by the San Dieguito Water District, and wastewater services are provided by the City of Encinitas.

4.3 ASBESTOS-CONTAINING MATERIALS

Padre did not conduct a comprehensive Asbestos-Containing Materials (ACM) survey as part of this Phase I ESA. Properties with residential and/or commercial structures constructed before 1976 may potentially contain ACM. The mitigation and management of ACM is currently regulated by several federal, state, and local agencies.

Based on a review of historic aerial photographs building structures have been present at the Subject Property prior to 1976. Therefore, the potential for ACM in building materials at the Subject Property is considered a REC.

4.4 LEAD-BASED PAINT

Properties containing structures with paint or surface coatings, with the exception of residential structures constructed on or after January 1, 1979, or schools constructed prior to January 1, 1993, may have surfaces coated with lead-based paint. Weathering, scraping, chipping, and abrasion may cause lead to be released to and accumulate in soil around these structures. Therefore, the California Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup Division recommends the collection of soil samples to determine if the potential presence of residual lead in soil contamination poses a threat to human health and the environment.

Based on a review of historic aerial photographs building structures have been present at the Subject Property since well before 1993. Therefore, the potential for LBP on building materials at the Subject Property is considered a REC.

4.5 POLYCHLORINATED BIPHENYLS

Padre did not conduct a comprehensive polychlorinated biphenyls (PCBs) survey as part of this Phase I ESA. The federal Toxic Substances Control Act (TSCA) generally prohibited the domestic manufacturing of polychlorinated biphenyls (PCBs) after 1979; however, hydraulic fluids or dielectric insulating fluids typically found in electrical transformers, hydraulic equipment, capacitors, and similar equipment may contain PCBs if such materials have been present prior to the late 1970s. EPA regulations require that encapsulated surfaces be marked with the yellow "Caution Contains PCBs" sticker typically used for labeling PCB Transformers (less than 500 ppm).

Two pad-mounted electrical transformers were observed located on the Subject Property. Based on the age of the school site, the potential presence of PCBs in soil from pad-mounted electrical transformers at the Subject Property is considered a REC.

Reportedly, PCBs were added to window caulking from 1950 to 1979 in commercial and school buildings. Weathering of the caulking may cause PCBs to be released to and accumulate in soil around these structures. A review of historical aerial photographs indicates that many of the buildings at the Subject Property were constructed between 1950 and 1979. Therefore, the

potential for residual PCBs in soil from weathering of window caulking at the Project Site is considered a REC.

4.6 TERMITICIDES

Organochlorine pesticides (OCPs) were commonly used as insecticides for termite control around structures and typically applied surficially to soil surrounding foundations and injected into the soil in an effort to isolate wood structures from termite nests. Chlordane was used in the United States from 1948 until 1988, when it was banned by the United States Environmental Protection Agency (U.S. EPA). Because of evidence of human exposure and accumulation in body fat, as well as persistence in the environment and effects on wildlife, the U.S. EPA prohibited the use of chlordane in 1988.

DTSC conducted an investigation of three proposed school sites in southern California with residential structures to evaluate the presence and prevalence of chlordane and other OCPs as a result of termiticide application. Additionally, DTSC investigated OCPs from termiticide application at residential properties proposed for school sites in various counties throughout California. The results of the study indicated that it is likely that significant concentrations of OCP residues may exist around structures with wood components built prior to January 1, 1989 and should be evaluated at school sites.

Based on a review of historic aerial photographs building structures have been present at the Subject Property prior to 1989. Therefore, the potential for residual OCPs in soil from direct application of termiticides is considered a REC.

4.7 PROPERTY OWNER QUESTIONNAIRE

A property owner environmental questionnaire was completed for the Subject Property by Mr. Eric Smith, Director of Facilities and Safety, EUSD. According to Mr. Smith, EUSD has owned the Subject Property since 1927 when the original school was constructed. The previous property owner is unknown.

According to Mr. Smith, the Subject Property consists of an existing elementary school and is provided with water and sewer services from the City of Encinitas. Mr. Smith has no knowledge of chemical spills; landfills and/or burn pits; or the presence of underground or aboveground fuel storage tanks at the Subject Property. In addition, no herbicides or pesticides are used at the Subject Property. Common bathroom cleaners including bleach are stored and utilized by the janitorial staff. A copy of the completed environmental questionnaire is presented in **Appendix D**.

4.8 SURROUNDING PROPERTIES

The Subject Property is bordered to the north by Union Street, beyond which are residences; to the south by residences; to the east by Orpheus Park and residences, beyond which is Orpheus Avenue and residences; and to the west North Vulcan Avenue, beyond which is a railroad line, Highway 101, light commercial/residences, and the Pacific Ocean.

4.9 VAPOR ENCROACHMENT CONDITION

Based on a review of surrounding properties, no existing or former facilities (dry cleaners, fuel stations and/or manufactured gas plants) were identified adjacent to or nearby the Subject Property. The Subject Property formerly contained one, 550-gallon gasoline underground storage tank (UST) and one, 1000-gallon heating oil UST that were removed under regulatory permit in 1987 and 1990, respectively. These former USTs do not present a vapor encroachment condition at the Subject Property and are discussed further in Section 5.1.1.

5.0 ENVIRONMENTAL RECORDS REVIEW

Padre contacted the regulatory agencies in the region to determine if soil and groundwater contamination is known or suspected at or near the Subject Property. Regulatory agency databases were obtained from EDR for the Subject Property and properties within one mile.

5.1 PUBLIC RECORDS REVIEW AND AGENCY CONTACTS

Padre contacted the following local agencies for information concerning environmental complaints, accidents, or spills on or in the vicinity of the Subject Property and for safety concerns related to school sites in California.

5.1.1 San Diego County Department of Health and Environmental Quality

Padre submitted a public records request (online portal) to the San Diego County Department of Health and Environmental Health Quality (EHQ) for records of hazardous underground storage tanks (USTs); aboveground storage tanks (ASTs); hazardous materials business plans (HMBPs); and hazardous waste generation, etc. identified for the Subject Property. According to EHQ, the Subject Property is identified to have previous contained one, 550-gallon gasoline UST and one 1,000-gallon heating oil UST.

The 550-gallon gasoline UST consisted of a single-walled, steel tank that was removed in 1987 under permit from San Diego County Department of Health Services (DHS). According to removal documentation the condition of the tank was good, there were no holes, and there was no indication of soil or groundwater contamination. The excavation was backfilled and no further action was required. The location of the UST was not provided in the removal documentation. The former gasoline UST is considered a HREC. The UST removal documentation is provided in **Appendix E**.

The 1,000-gallon heating oil UST consisted of a single-walled steel tank that was apparently installed in 1928 and removed under permit from DHS in June 1990. The UST was located west of the original school building. According to removal documentation the tank exhibited heavy corrosion with several holes observed in the bottom of the tank. Two soil samples were collected from the base of the excavation (approx.. 7 to 8 feet) and analyzed for total recoverable petroleum hydrocarbons (TRPH). The results for both soil samples were reported as non-detect at a reporting limit of 10 milligrams per kilogram (mg/kg). Based on the analytical

results, no further action was required. The former heating oil UST is considered a HREC. The UST removal documentation is provided in **Appendix E**.

5.1.2 City of Encinitas

According to the City of Encinitas E-Zoning Map, the Subject Property is zoned N-P/SP. This zoning designation is described as Public/Semi-Public.

5.2 ENVIRONMENTAL DATABASE INFORMATION

Padre obtained environmental agency database information from EDR. The EDR report is included as **Appendix F**. The databases were reviewed to identify registrations and documented environmental incidents regarding the site and nearby properties within a one-mile radius of the Subject Property. Padre also attempted to locate unplottable sites that EDR did not locate because of incomplete or incorrect address information. The following sections summarize our findings.

5.2.1 National Priorities List - Federal Superfund

The National Priorities List is a U.S. Environmental Protection Agency (U.S. EPA) listing of private, state, and federally owned sites which have been included on the federal Superfund list for remediation.

- Neither the Subject Property nor properties identified within a 1-mile radius of the Subject Property were identified on the National Priorities List.

5.2.2 U.S. Superfund Enterprise Management System (SEMS)

The U.S. EPA's SEMS Listings (formerly known as CERCLIS) are a compilation of sites that have been brought to the attention of the U.S. EPA, through various means, as being possible sites of hazardous waste activity. The SEMS listings are an information database and not necessarily an action list.

- Neither the Subject Property nor properties located within a 1-mile radius of the Subject Property are identified on the SEMS List.

5.2.3 RCRA-TSDF

The U.S. EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA-Transportation, Storage, and Disposal Facilities (TSDF) database is a compilation by the U.S. EPA of reporting facilities that transport, treat, store, or dispose of hazardous waste.

- Neither the Subject Property nor properties located within a ½-mile radius of the Subject Property are identified on the RCRA-TSDF List.

5.2.4 RCRA - LQG's

The U.S. EPA's RCRA Program identifies and tracks large quantity generators (LQG's). LQG's generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg acutely hazardous waste per month.

- Neither the Subject Property nor properties located within a ¼-mile radius of the Subject Property are identified on the RCRA-LQG's List.

5.2.5 RCRA - SQG's

The U.S. EPA's RCRA Program identifies and tracks small quantity generators (SQG's). SQG's generate between 100 kg and 1,000 kg of hazardous waste per month.

- Neither the Subject Property nor properties located within a ¼-mile radius of the Subject Property are identified on the RCRA-SQG's List.

5.2.6 Emergency Response Notification System

The Emergency Response Notification System (ERNS) contains records on releases of oil and hazardous substances reported to the U.S. EPA and National Response Center of the U.S. Coast Guard.

- The Subject Property is not identified on the ERNS List.

5.2.7 RCRA-CORRACTS Facilities

The U.S. EPA's Resource Conservation and Recovery Act (RCRA) Corrective Action Sites Listing contains information pertaining to hazardous waste treatment, storage, and disposal facilities (RCRA TSD) which have conducted, or are currently conducting, a corrective action(s) as regulated under RCRA.

- Neither the Subject Property nor properties located within a 1-mile radius of the Subject Property are identified on the RCRA-CORRACTS List.

5.2.8 CA SWF/LF

State and Tribal; landfill and/or solid waste disposal site listings. The Solid Waste Facility/Landfill facility (SWF/LF), solid waste information system (SWIS) maintains records of active, closed and inactive landfills.

- Neither the Subject Property nor properties located within a ½-mile radius of the Subject Property are identified on the CA SWF/LF List.

5.2.9 UST

Underground storage tanks (USTs) are regulated under Subtitle I of RCRA and must be registered with the state department responsible for administering the UST program. In California,

the State Water Resources Control Board has compiled a list of UST sites. Active UST facilities lists are gathered from local regulatory agencies.

- The Subject Property is not identified on the UST List.
- One property within a ¼-mile radius of the Subject Property is listed on the UST List. RCP Block and Brick is located at 577 North Vulcan Avenue approximately 610 feet northwest of the Subject Property. This property formerly contained one, 550-gallon gasoline UST and one, 10,000-gallon diesel-fuel UST. Reportedly, the diesel fuel UST was removed in January 2012. Based on distance and regulatory status, this property is not considered a REC.

5.2.10 Historical UST

The Hazardous Substance Storage Container Database is a historical listing of UST sites and is maintained by the California State Water Resources Control Board.

- The Subject Property is identified on the Historical UST List. The Subject Property previously contained one, 550-gallon gasoline UST and one, 1,000-gallon heating oil tank. The removal of these tanks is discussed in Section 5.1.1. These former USTs are considered an HREC.

- One property located within a ¼-mile radius of the Subject Property is identified on the Historical UST List. Bunyard Masonry Supply Company (aka RCP Block and Brick) is located at 577 North Vulcan Avenue approximately 610 feet northwest of the Subject Property. This property formerly contained one, 550-gallon gasoline UST and one, 10,000-gallon diesel-fuel UST. Reportedly, the diesel fuel UST was removed in January 2012. Based on distance and regulatory status, this property is not considered a REC.

5.2.11 CA FID UST

The California Facility Inventory Database (CA FID) UST contains a historical listing of active and inactive underground storage tank locations from the State Water Resources Control Board.

- Neither the Subject Property nor properties located within a ¼-mile radius of the Subject Property are identified on the CA FID UST List.

5.2.12 Leaking Underground Storage Tank

The California Regional Water Quality Control Board is the agency with jurisdiction over leaking underground storage tanks (LUSTs) in the region of the site.

- The Subject Property is not identified on the LUST list.
- Three properties located within a ½-mile radius of the Subject Property are identified on the LUST list. The nearest property is RCP Block and Brick located at 577 North Vulcan Avenue located approximately 610 feet northwest of the Subject Property.

This property formerly contained one, 550-gallon gasoline UST and one, 10,000-gallon diesel-fuel UST. Reportedly, the diesel fuel UST was removed in January 2012. Soil and groundwater assessment activities were performed from 2012 through 2014, and this property received regulatory closure in 2014. Based on distance and regulatory status, none of these properties are considered a REC.

5.2.13 AST

The Aboveground Storage Tank (AST) lists facilities with registered aboveground petroleum storage tanks, compiled by the State Water Resources Control Board (SWRCB).

- Neither the Subject Property nor properties located within a ¼-mile radius of the Subject Property are identified on the AST List.

5.2.14 US Eng Controls

The US Engineering Controls list consists of sites with engineering controls in place that include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

- Neither the Subject Property nor properties located within a ½-mile radius of the Subject Property are identified on the US ENG Controls List.

5.2.15 US Inst Controls

The US Institutional Controls list consists of sites with institutional controls in place that include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining onsite. Deed restrictions are generally required as part of the institutional controls.

- Neither the Subject Property nor properties located within a ½-mile radius of the Subject Property are identified on the US INST Controls List.

5.2.16 Historic Cal-Sites

The State of California Historic Cal-Sites database contains potential or confirmed hazardous substance release properties. In 1996, the California Environmental Protection Agency reevaluated and significantly reduced the number of sites in the Cal-sites database.

- Neither the Subject Property nor properties located within a 1-mile radius of the Subject Property are identified on the Historic Cal-Sites List.

5.2.17 WMUD/SWAT

The Waste Management Unit Database System (WMUDS) is used by the State Water Resources Control Boards for program tracking and inventory of waste management units. The

Solid Waste Assessment Test Program (SWAT) is a database maintained by the California Water Resources Control Board for information on the ground water monitoring of sanitary landfills.

- Neither the Subject Property nor properties located within a ½-mile radius are identified on the WMUDS/SWAT List.

5.2.18 California Hazardous Materials Incident Reporting System

The California Hazardous Materials Incident Reporting System (CHMIRS) is maintained by the California Office of Emergency Services (OES) and contains information on reported hazardous materials accidental releases or spills.

- The Subject Property is not identified on the CHMIRS List.

5.2.19 CERCLIS-NFRAP

The Comprehensive Environmental Response, Compensation, and Liability Information System - No Further Remedial Action Planned (CERCLIS-NFRAP) database is a list of sites that were removed CERCLIS in 1995. These sites may have been removed due to the following: after an initial investigation, no contamination was found; contamination was removed quickly without the need to place the site on the NPL; or the contamination was not serious enough to require Federal Superfund action or NPL consideration. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

- Neither the Subject Property nor properties located within a ½-mile radius of the Subject Property are identified on the CERCLIS-NFRAP List.

5.2.20 Voluntary Cleanup Program

The Voluntary Cleanup Program database is maintained by the Department of Toxic Substances Control (DTSC). The VCP database contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee the investigation and/or cleanup activities and have agreed to provide coverage for DTSC's Costs.

- Neither the Subject Property nor properties located within a ½ -mile radius of the Subject Property are identified on the VCP List.

5.2.21 Hazardous Waste Information System

The Hazardous Waste Information System (HAZNET) database is developed from copies of hazardous waste manifests required for proper disposal of wastes and received each year by the DTSC.

- The Subject Property is identified on the HAZNET List. In 1990, 1998, and 2007 asbestos containing waste was disposed of from the Subject Property. In addition halogenated solvents were disposed of from the Subject Property in 1994, and waste

oil/mixed oil was disposed of in 1990. No violations are identified and the disposal of this material from the Subject Property is not considered a REC.

5.2.22 California SLIC Program

The California SLIC (Spills, Leaks, Investigations, and Cleanup) is designed to protect and restore water quality from spills, leaks and similar discharges. The database is maintained by the State Water Resources Control Board (SWRCB).

- The Subject Property is not identified on the SLIC List.
- Nine properties located within a ½-mile radius of the Subject Property are identified on the SLIC List. Based on distance and regulatory status, none of these properties are considered a REC.

5.2.23 CUPA

California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities for Orange County.

- The Subject Property is identified on the CUPA list related to a former gasoline and a heating oil UST that were removed under DHS permit in 1987 and 1990, respectively. The removal of these tanks is discussed in Section 5.1.1. These former USTs are considered an HREC.
- No properties located within a ¼-mile radius of the Subject Property are identified on the CUPA List.

5.2.24 ENVIROSTOR

The DTSC Site Mitigation and Brownfields Reuse Program (SMBRPs) maintain a database that identifies sites that have known contamination or sites for which there may be reasons to investigate further.

- The Subject Property is not identified on the Envirostor List.
- Two properties located within a 1-mile radius of the Subject Property are identified on the Envirostor List. Based on distance and regulatory status, these properties are not considered a REC.

6.0 SUMMARY AND CONCLUSIONS

Based on the results of the scope of services performed for this Phase I ESA, Padre has prepared the following summary and conclusions regarding the Subject Property.

6.1 CURRENT CONDITIONS AND HISTORIC SITE BACKGROUND

The Subject Property consists of 7.2 acres and is currently operated at the Paul Ecke Central Elementary School, which was originally constructed in 1927. The school site consists of the main administrative building, classroom buildings, multi-purpose building, media center building, outdoor lunch area, garden area, playfields and hard courts. The San Diego County Assessor identifies the Subject Property as APN 256-301-01-00.

Padre reviewed the EDR Environmental Lien and activity use limitations (AULs) search report of available current land title records for environmental cleanup liens and other AULs such as engineering controls and institutional controls. No environmental liens or AULs were identified for the Subject Property.

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (*Community Panel Number: 06073C1041H, Effective Date: December 20, 2019),* the Subject Property is located in Zone X (areas determined to be outside the 0.2% annual chance flood plain).

According to the EFZ maps issued by the CGS, the Subject Property is not located within the boundaries of an EFZ, and no active faults are known to cross the Subject Property (Jennings 2010).

Based on a review of historical documentation including aerial photographs and topographic maps, the Subject Property was developed as an elementary school in 1927. Additions were made throughout the years and the Subject Property currently operates as the Paul Ecke Central Elementary School.

Padre's site reconnaissance on April 30, 2025 observed the Subject Property to consist of an active elementary school The Subject Property includes a main administrative building, classroom buildings, multi-purpose building, media center building, outdoor lunch area, garden area, playfields and hard courts. A janitor's room was observed to contain general cleaning chemicals and supplies. Two pad-mounted electrical transformers were observed onsite; however no visible staining was observed around the base of these units. An exterior site reconnaissance of the Subject Property did not observe the presence of petroleum and/or chemical containers, nor petroleum and/or chemical stained soils or concrete/asphalt surfaces. No aboveground or indications of underground petroleum storage tanks were observed at the Subject Property.

The Subject Property is bordered to the north by Union Street, beyond which are residences; to the south by residences; to the east by Orpheus Park and residences, beyond

which is Orpheus Avenue and residences; and to the west North Vulcan Avenue, beyond which is a railroad line, Highway 101, light commercial/residences, and the Pacific Ocean.

The Subject Property is identified on the Historical UST list related to a former 550-gallon gasoline UST and a former 1,000-gallon heating oil UST. The 550-gallon gasoline UST consisted of a single-walled steel tank that was removed in 1987 under permit from DHS. According to removal documentation the condition of the tank was good, there were no holes, and there was no indication of soil or groundwater contamination. The excavation was backfilled and no further action was required. The location of the UST was not provided in the removal documentation. The former gasoline UST is considered a HREC.

The 1,000-gallon heating oil UST consisted of a single-walled steel tank that was apparently installed in 1928 and removed under permit from DHS in June 1990. The UST was located west of the original school building. According to removal documentation the tank exhibited heavy corrosion with several holes observed in the bottom of the tank. Two soil samples were collected from the base of the excavation (approx.. 7 to 8 feet) and analyzed for total recoverable petroleum hydrocarbons (TRPH). The results for both soil samples were reported as non-detect. Based on the analytical results, no further action was required. The former heating oil UST is considered a HREC.

The Subject Property is identified on the HAZNET list. In 1990, 1998, and 2007 asbestos containing waste was disposed of from the Subject Property. In addition halogenated solvents were disposed of from the Subject Property in 1994, and waste oil/mixed oil was disposed of in 1990. No violations are identified and the disposal of this material from the Subject Property is not considered a REC.

6.2 DATA GAPS

All the areas of the Subject Property were accessible to Padre. The information obtained and available to Padre during the preparation of this Phase I ESA is considered acceptable and complete. In general conformance with the scope and limitations of the ASTM E1527-21 Standard, Padre did not identify any significant data gaps in completing this Phase I ESA.

6.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

The former 550-gallon gasoline UST and 1,000-gallon heating oil UST are considered HRECs. Both of these USTs were under DHS permit in 1987 and 1990, respectively. Based on observations and/or analytical data of soil samples collected after removal, no additional assessment and/or remediation related to these former USTs is recommended.

6.4 RECOGNIZED ENVIRONMENTAL CONDITIONS

The following and RECs were identified based on the findings of the Phase I ESA and the requirements of the California Department of Education (CDE) and the Department of Toxic Substances Control (DTSC) for school sites:

- The potential for ACM in building materials for buildings constructed before 1976 at the Subject Property;
- The potential for residual lead in soil associated with weathering of lead-based paint from buildings constructed before 1993 at the Subject Property;
- The potential for OCPs in soil from the direct application of termiticides around the foundations of buildings containing wood components that were present prior to 1989 at the Subject Property; and
- The potential for PCBs in soil from the presence of pad-mounted electrical transformers that were present prior to 1979 at the Subject Property.
- The potential for PCBs in soil from the presence of pad-mounted electrical transformers and from weathering of window caulking that may contain PCBs in school buildings constructed between 1950 and 1979.

6.5 RECOMMENDATIONS

Padre understands that the Encinitas Union School District plans to demolish and rebuild the existing Paul Ecke Central Elementary School, except for an approximately 100-year-old building that will remain. The District will be applying for state funding from CDE and therefore will be pursuing school site approval from DTSC. Padre recommends the completion of a Phase I Addendum for evaluating the identified RECs for the Subject Property.

6.6 CERTIFICATION

We declare that, to the best of our professional knowledge and understanding, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR §312. Additionally, we have the specific qualifications based on education, training, and experience to assess the nature, setting, and of the subject property. We have performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part §312. Qualifications of the environmental assessors responsible for the preparation of this report are presented in **Appendix G**.

7.0 LIMITATIONS

This report has been prepared for the sole benefit of PlaceWorks and Encinitas Union School District. No other person(s) may rely on the findings of this report without the expressed written consent of PlaceWorks, Encinitas Union School District and Padre Associates. In performing our professional services, we have attempted to apply present engineering and scientific judgment and use a level of effort consistent with the standard of practice measured on the date of work and in locale of the Subject Property for similar type studies. Padre Associates makes no warranty, express or implied.

The analyses and interpretations presented in this report have been developed based on the results from the review of existing information pertaining to the Subject Property. The ASTM Standard Practice E 1527-13 and E 1527-21 recognize inherent limitations for Phase I ESAs, including, but not limited to:

- *Uncertainty Not Eliminated.* A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any property.
- *Not Exhaustive.* A Phase I ESA is not an exhaustive investigation of the Subject Property and environmental conditions on such Subject Property.
- *Past Uses of the Property.* Phase I requirements only require review of standard historical sources at five-year intervals if readily available. Therefore, past uses of the Property at less than five-year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E 1527-13 and E 1527-21 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other Property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

Padre makes no representation of or warranty that the past or current operations at the Subject Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, Padre is not responsible for consequences or conditions arising from facts not fully disclosed to Padre during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by Padre's observations or other credible referenced sources reviewed during the assessment. Padre shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

Padre used reasonable efforts to identify evidence of aboveground and underground storage tanks and ancillary equipment on the Subject Property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by objects including, but not limited to, paving, construction activities, stored materials, and landscaping.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

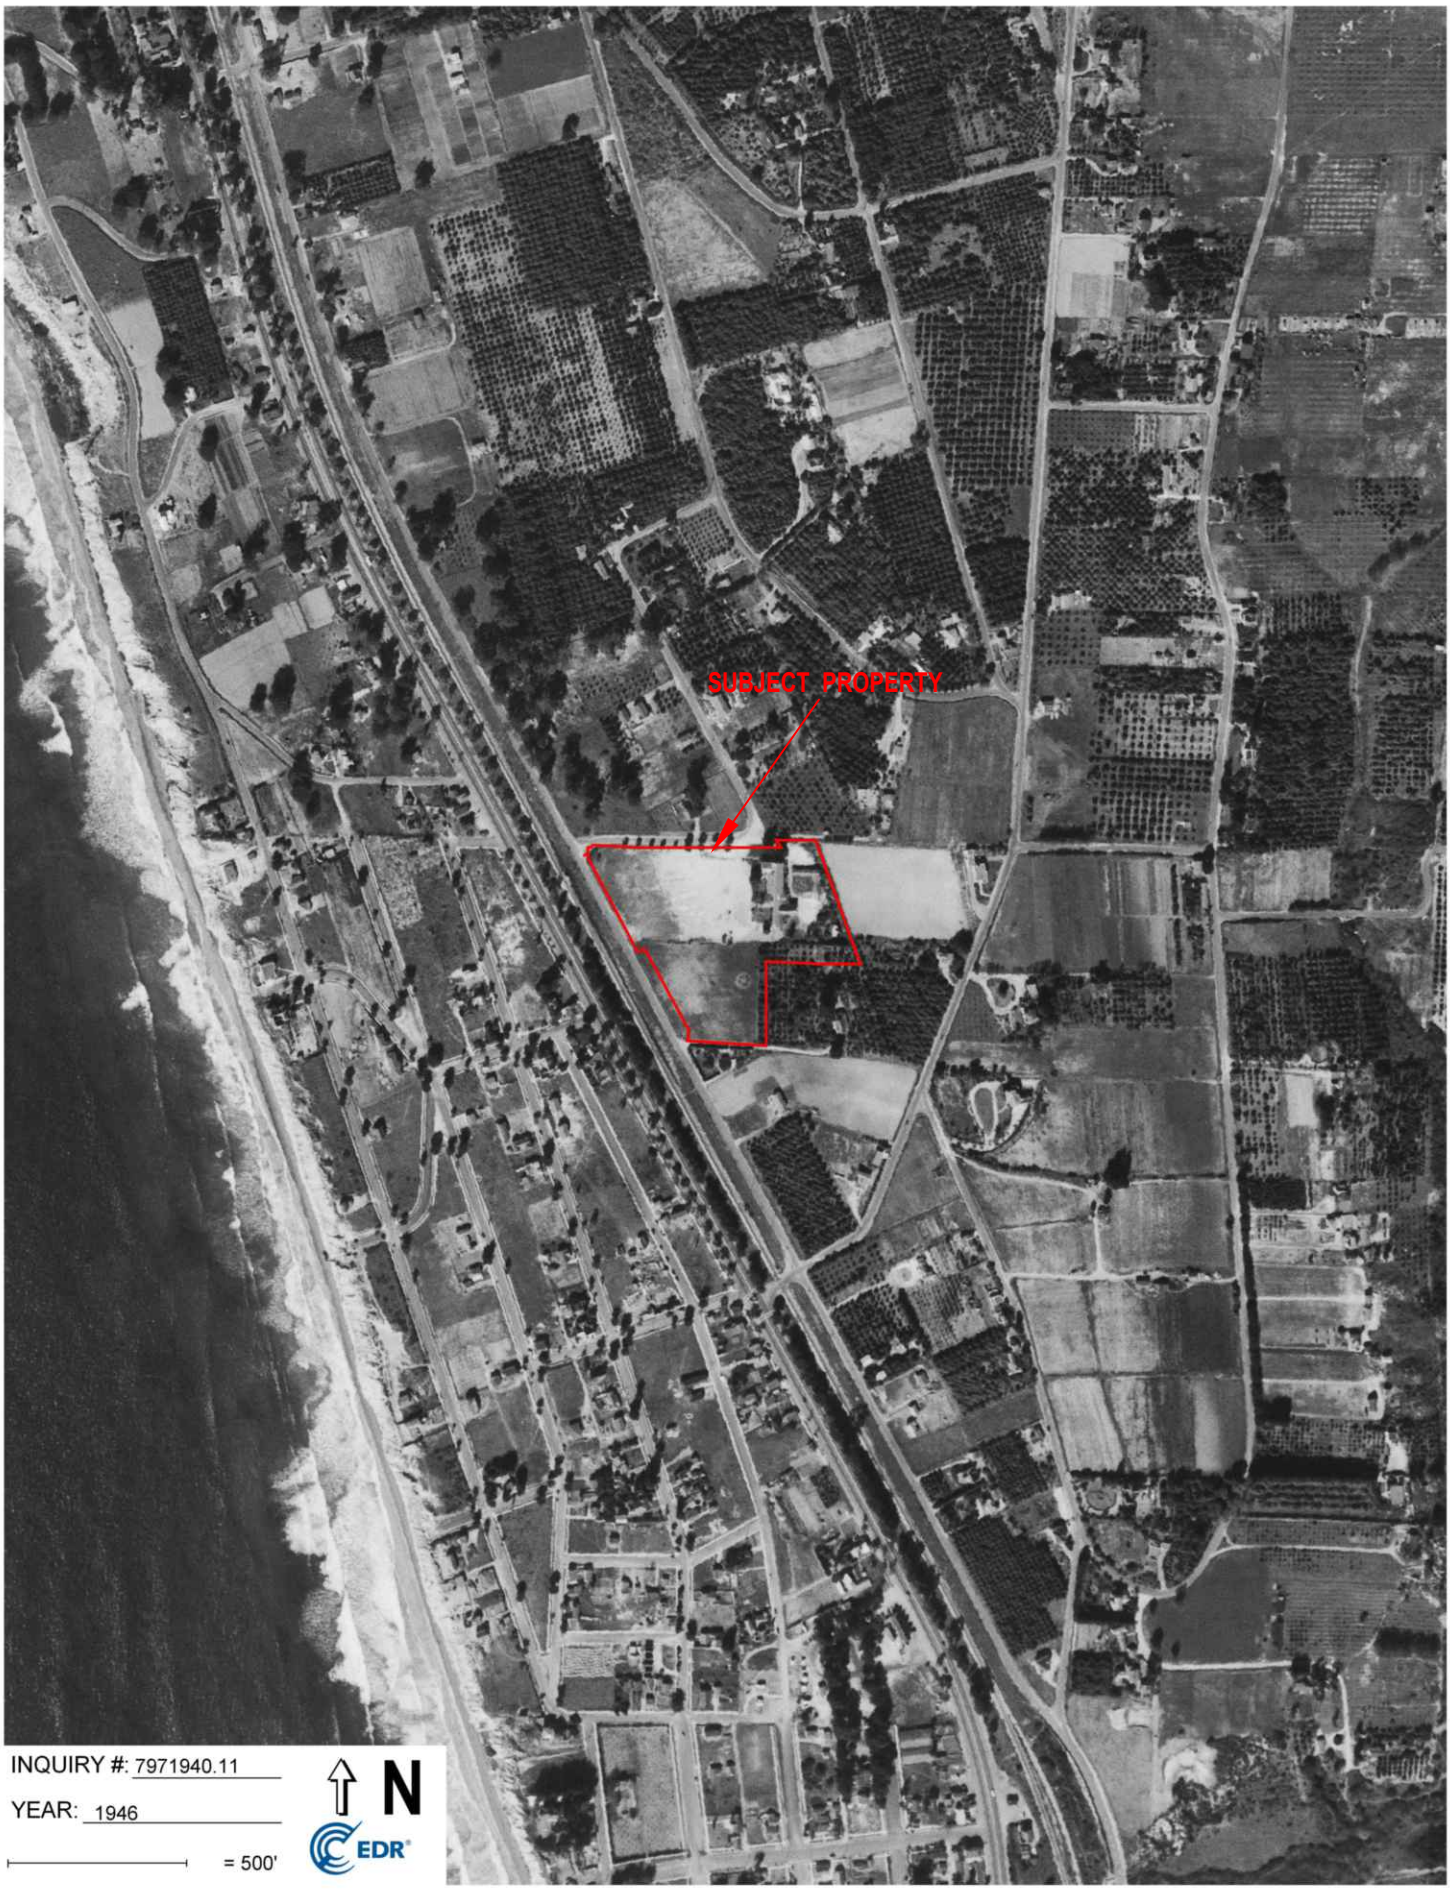

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 5/23/2025 at 7:53 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

PROPERTY OWNER QUESTIONNAIRE

padre associates, inc.
ENGINEERS, GEOLOGISTS & ENVIRONMENTAL SCIENTISTS

Subject Property Owner Questionnaire

Padre Associates, Inc. (Padre) on behalf of **Encinitas Union School District** is requesting the completion of the following questionnaire. The purpose of the questionnaire is to identify past and current use(s) of the Subject Property. Please answer the following questions to the best of your knowledge. If you need more space, please use a separate sheet(s) of paper.

Subject Property: Paul Ecke Central Elementary School, 185 Union Street in Encinitas, San Diego County, California. A Site Map is attached.

1. Current Property Owner: Encinitas Union School District

   Mailing Address: 101 S. Rancho Santa Fe Rd. Encinitas Ca 92024

   Contact: Eric Smith Email/Phone No.: Eric.Smith@eusd.net

2. Date of Ownership: 1927

3. Previous property owner/date of ownership: N/A

4. Current Property Use(s): Elementary School

5. Historic Property Use: Elementary School

6. Are there any building structures located onsite and/or historic building structures (i.e., removed)? Please provide building use and date of construction: Current 300 building was original school building initially built in 1927.

7. Are there any existing environmental reports for the Project Site: N/A

8. Is the Subject Property connected to City water and sewer; or private well and septic system: Property is connected to City sewer and water.

9. Are there any environmental permits (i.e., air emissions, wastewater discharge, etc.) for the Subject Property: N/A

10. Are there any existing or former underground or aboveground petroleum storage tanks located onsite: N/A

11. Are chemicals used and/or stored onsite (If yes, please list chemicals and quantities used per year): Common custodian chemicals used on-site, such as bleach, bathroom cleaners, etc. Less than 20 gallons a year used of each.

12. Are waste chemicals recycled, treated and/or disposed of onsite (If yes, please list chemicals and quantities used per year): No, waste chemicals are picked up and disposed of off site.

13. Have there been any chemical spills and/or incidents located onsite: N/A

14. List past and present pesticide/herbicide use (List chemicals/year): N/A

15. Are there any existing or former landfills and/or burn pits located onsite: N/A

16. Are there any existing or former pits, ponds, or lagoons in connection with waste treatment or waste disposal located onsite: N/A

17. Has fill material (soil) been imported to the property (date, volume, borrow source): N/A

18. Are you aware of any environmental incidents associated with adjacent or nearby properties: Unaware of any.

WASTE FUEL & WATER (NA 1270) WAS REMOVED 2/17/87 BY MIAD MARINE. GEN. EPA # CAD 0120321513 ON MANIFEST # 84268239

NOTICE: You are hereby notified that on Feb 18, 1987, Hazardous Materials Specialist of County Department of Health Services, conducted an inspection for the removal and/or abandonment of ONE(1) underground storage tanks of hazardous substances. A summary of conditions found is noted as follows:

[X] No indication of soil or groundwater contamination apparent this date. Excavation may be backfilled.

[ ] The conditions noted below must be reported and corrected in accordance with Chapters 6.5 and 6.7 of the California Health and Safety Code and Chapters 9 and 10 of the San Diego County Code.

[ ] Hazardous substance/waste is ponded in the excavation. Immediately take steps to remove the ponded hazardous liquid from the excavation. This liquid is a hazardous waste that shall be properly transported, under manifest, by a licensed hazardous waste hauler to a licensed recycling or disposal facility.

[ ] Contaminated soil and/or contaminated groundwater is suspected in the excavation. Determining the extent and impact of this contamination and completing any required clean-up is the responsibility of the tank owner/operator. Within 5 work days, the tank owner/operator or his agent must submit a written UNAUTHORIZED RELEASE REPORT to the Department of Health Services including all of the following information that is known at the time of filing the report:

a. Describe the type, quantity and concentration of the hazardous substance released.
b. Provide the results of all investigations completed at this time to determine the extent of soil, groundwater, or surface water contamination due to the release.
c. Describe the method of cleanup implemented to date, proposed cleanup actions, and approximate costs of actions taken to date.
d. Indicate the method and location of disposal of the released hazardous substance and any contaminated soils or groundwater or surface water. (If any contaminated soil/water is hauled off-site, include copies of the hazard waste manifests).
e. Include the tank operator's name and telephone number, the name and telephone number of any consultants retained, and a projection of proposed activity schedule.

Subsequent mitigation actions will be discussed upon review of the submitted Report and consultation with other appropriate agencies.

County of San Diego
Department of Health Services

UNDERGROUND HAZARDOUS MATERIALS STORAGE TANK FACILITY

PART III

APPLICATION FOR PERMIT TO ABANDON

Complete all sections of Part III. If information is not known or applicable please indicate on application.

A. Total number of tanks to be abandoned 1

B. Tank Information - Complete the following information for each tank to be abandoned. Attach additional sheets as necessary.

Tank Number (Label tanks on plot plan to correspond to application)		1	2	3	4
Tank Capacity (gallons)		550			
Date Tank Installed		NOT KNOWN			
Tank Composition (Steel, Fiberglass, Fiberglass Coated Steel, Concrete, etc.)		STEEL			
Tank Manufacturer		NOT KNOWN			
Tank Presently in Use? (Yes-No)		NO			
Materials Stored in Tank	Material: dates:	WASTE OIL to	to	to	to
	Material: dates:	to	to	to	to
Has Tank System Leaked? (Yes, No, Not Known)	Tank	NOT KNOWN			
	Piping				
Basis of determination (Inventory records, tank system testing/monitoring, environmental monitoring)					
Is any part of the system cathodically protected? (Yes-No-Not Known)		NOT KNOWN			
	Tank				
	Piping Lines				
Piping materials		STEEL			

C. PREVIOUS OWNERS AND OPERATORS OF THE TANK(S):

Dates	Owner/Operator
	NONE

D. Approximate depth to groundwater: NOT KNOWN

Basis of Determination: _____

E. Proposed method of abandonment: [X] Removal [ ] Destruction in place

NOTE: Removal of the tank(s) is the preferred method of abandonment. Destruction o the tank in place, for example, by filling with an inert substance, will only be con sidered in special cases upon submittal of additional information to determine th risks and hazards of contamination. Additional information required includes recen tank testing results, soils data, special site characteristics and approval from th local Fire Department.

F. Future use/disposal site of tank: SCRAP

G. ATTACH A PLOT PLAN ON 8-1/2" x 11" paper showing the following:

1. Property Lines, Site Address, Scale, North Arrow
2. Location of 100 year flood plain, if applicable
3. Location of all existing and proposed structures
4. Location of all existing and proposed underground storage tank facilities
5. Location of underground tank(s) to be abandoned (number tanks to correspond t application)
6. Location of underground utility lines and vaults

H. REQUIRED INSPECTION - PERMIT TO ABANDON

A representative of the Department of Health Services (DHS) must be on site at th time the tank(s) is removed from the ground to evaluate the condition of the tank ar the surrounding soil and/or groundwater. Any evidence of an unauthorized release of hazardous material from the tank will require the submittal of additional informatic by the permittee to the DHS.

When a permit has been issued by the DHS to destroy a tank in place, the DHS wil inspect to verify that the tank has been properly emptied and purged of all hazardou materials immediately prior to filling with an approved inert substance.

I. I declare that to the best of my knowledge and belief the statements and informatic provided are correct and true. I understand that information in addition to th provided above may be needed in order to obtain final approval by the Department Health Services.

I understand that tests and procedures that may be required by other departments ar agencies to demonstrate adequate site safety or suitability for future developmer (e.g., soil compaction testing) are in addition to the requirements of the Departmer of Health Services.

I will notify the Department of Health Services at least two working days (48 hour before work is to begin in order to schedule the required inspections. I understar that site and worker safety are solely the responsibility of the property owner or h agent and that this responsibility is not shared nor assumed by the County of S Diego.

F. PROJECT WORK TO BE COMPLETED: Check Applicable Box	COMPLETE APPLICATION PARTS	FEE CODE TABLE G.
☐ Installation/Construction of new tank(s) only (without closing any existing tanks)	I & II	1
☐ Closure of existing tank(s) with installation of new tanks (tank replacement)	I, II & III	1 & 2
☒ Closure of existing tank(s) with no new tank installation	I & III	2
☐ Interior coating/repair of an existing underground storage tank	I & IV	3
☐ Repipe/pipe-repair of an existing underground storage tank facility	I & V	4

G. FEES: The fees shown below cover plan review, plan re-review and approval, the required field inspections and the first year's operating permit fees. Use the appropriate Fee Code as determined in Section F above.

FEE CODE		
1	Installation fee for first tank $446	Fee: $
	Installation fee for each additional tank No.____ x $122	Fee: $
	Establishment Base Fee $135 (Applies to establishments not currently under permit with HMMD)	Fee: $
	Operating Permit Fee per tank No.____ x $102 (Does not apply to replacement tanks if the existing tank to be replaced has paid current operating permit fees)	Fee: $
	State Surcharge per tank No.____ x $56	Fee: $
	Plan Re-Review $108	Fee: $
2	Closure fee for first tank $187	Fee: $ 187 00
	Closure fee for each additional tank No.____ x $94	Fee: $
	Plan Re-Review $60	Fee: $
3	Repair/Interior coating fee for first tank $446	Fee: $
	Repair/Interior coating fee for each additional tank No.____ x $122	Fee: $
	Plan Re-Review $108	Fee: $
4	Repipe/Pipe-repair of an existing tank facility $374	Fee: $
	Plan Re-Review $78	Fee: $
	TOTAL FEE: $	187 00

I. PERMITS REQUIRED BY OTHER AGENCIES

FIRE DEPT. ✓ APCD _____ BLDG DEPT. _____ OTHER _____

Provide copies of approved applications from these departments and others if needed.

COUNTY OF SAN DIEGO

HAZARDOUS MATERIALS MANAGEMENT DIVISION

PART III

APPLICATION FOR PERMIT TO CLOSE UNDERGROUND STORAGE TANKS

A. TOTAL NUMBER OF TANKS TO BE CLOSED 1

B. DESCRIPTION OF TANKS TO BE CLOSED:

TANK NO.	CAPACITY	DATE INSTALLED	TANK COMPOSITION	TANK PRESENTLY IN USE?	MATERIALS STORED IN TANK
(1)	1000	1928	STEEL	NO	FUEL OIL

C. HAS THE TANK SYSTEM EVER FAILED OR LEAKED? YES ☐ NO ☑

D. REASON FOR TANKS TO BE CLOSED:

☑ Meet current state/federal requirements

☐ Replacement of existing tanks

☐ Tank system failure, briefly describe _____

☐ Other; briefly describe _____

E. PREVIOUS OWNERS AND OPERATORS OF THE TANKS:

DATES	OWNER/OPERATOR

F. PROPOSED METHOD OF CLOSURE: ☑ REMOVAL ☐ CLOSURE IN PLACE

SAMPLING PROTOCOL Tank owner/authorized representative responsible for all sampling analyses and associated costs.

- for tank systems that are to be removed. The excavation shall be exposed prior to the scheduled inspection and sampling points identified by the HMMD inspector. Sampling is required for both tank and piping. The tank must remain in the excavation until the HMMD inspector approves the removal.

- tank systems to be closed in place. Submit an alternate plan which must include soil sampling, reason for closing the tank system in place and type of material to be used to fill the tank.. Soil sampling and/or hydrostatic testing is also required for piping closures. Tank system closure in place will only be considered after evaluating the risks and hazards if the tank system were removed.

G. DISPOSAL SITE OF TANK: SANAPOLI TANKS 110 N 7TH HALE ESCONDIDO

Note: You must inform the HMMD of the address of where the tank is to be disposed . Plans will be disapproved without this information.

H. ATTACH THREE COPIES OF PLANS SHOWING THE FOLLOWING:

1. Property lines, site address, scale, north arrow.
2. Location of all existing structures.
3. Location of all existing underground storage tank facilities.
4. Location of underground storage tanks to be closed.
5. Location of underground utility lines and vaults.

I. REQUIRED INSPECTION-PERMIT TO CLOSE

A representative from the HMMD must be on site at the time the tank(s) are closed.

1. TANK SYSTEM CLOSURE BY REMOVAL:
   - excavation shall be exposed prior to the scheduled inspection. The tank owner/authorized representative on site must submit a uniform hazardous waste manifest demonstrating that the tank has been properly decontaminated. A combustible gas instrument and soil sampling equipment must be on site. The HMMD inspector will identify sampling points. The tank must remain in the excavation until the HMMD approves the removal.
2. TANK SYSTEM CLOSURE IN PLACE:
   - after approval of the alternate plan, the tank owner/authorized representative on site shall submit a uniform hazardous waste manifest demonstrating that the tank has been properly decontaminated. The HMMD inspector shall verify that the tank system has been properly emptied and will witness the filling with an approved inert substance. Piping approved to be closed in place by hydrostatic testing shall also be witnessed by the HMMD.

J. DECLARATION

I declare that to the best of my knowledge and belief the statements and information provided are correct and true. I understand that information in addition to that provided above may be needed in order to obtain final approval by the Hazardous Materials Management Division.

I understand that tests and procedures that may be required by other departments and agencies to demonstrate adequate site safety or suitability for further development (e.g. soil compaction testing) are in addition to the requirements of the Hazardous Materials Management Division.

I will notify the Hazardous Materials Management Division at least two working days (48 hours) before work is to begin in order to schedule the required inspections. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared or assumed by the County of San Diego.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 28 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, has revealed that there is 1 FTTS site within approximately 0.001 miles of the target property.

ENCINITAS UNION ELEM	***189 UNION ST***	***0 - 1/8 (0.000 mi.)***	***A6***	***17***

Database: FTTS INSP, Date of Government Version: 04/09/2009

EXECUTIVE SUMMARY

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, has revealed that there is 1 HIST FTTS site within approximately 0.001 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Database: HIST FTTS INSP, Date of Government Version: 10/19/2006				

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/11/2024 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 3 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 21 E MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 2 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 11/04/2022. Inspection Sequence ID:7077901
Violation Division: San Diego County Department of Env Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 150462
Site Name: San Dieguito Union High School District - Maintenance Dept.
Violation Date: 12-08-2014
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 02/12/2015.
Violation Division: San Diego County Department of Env Health
Violation Program: HW
Violation Source: CERS,

Site ID: 150462
Site Name: San Dieguito Union High School District - Maintenance Dept.
Violation Date: 12-08-2014
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 12/10/2015.
Violation Division: San Diego County Department of Env Health
Violation Program: HW
Violation Source: CERS,

Site History:	A 3.7-acre property, located on Union Street between Interstate 5 and Saxony Road in Encinitas, California, was formerly occupied by a nursery. The property, which consists of two parcels, is currently occupied by greenhouses, some of which remain in use, and storage areas. The property was purchased by City Ventures for the purpose of developing a residential subdivision. Present plans indicate that the subdivision would feature 13 single-family residential units that would be accessed by a road from Union Street. The property has been used for agricultural purposes since at least 1939. Citrus and/or avocado groves were present on the property until the late 1970s, when several greenhouses were constructed. A few of the greenhouses were used for flower-growing operations until at least mid-2013.

FORMER NURSERY (Continued) **S116290490**

Previous agricultural use of the property prompted City Ventures to investigate the surficial soils to assess whether pesticide and/or the metals arsenic and lead were present at levels that might present a human health concern. The City of Encinitas required City Ventures to enter DEH s Voluntary Assistance Program (VAP) to review soil investigation findings for the property. VAP Case #DEH2014-LSAM-000225 was opened on January 28, 2014. Stantec, City Ventures environmental consultant, performed Phase I and Phase II investigations for the property in 2013. Forty soil samples were collected from 20 sampling locations during the Phase II investigation at depths of 0.5 to 1.0 foot and 2.5 to 3.0 feet below the ground surface (bgs). The soil samples collected from 0.5 to 1.0 foot were analyzed for organochlorine pesticides (OCPs), as well as arsenic and lead, while the remaining samples were archived. At least one of the following OCPs were detected in five of the samples: 4,4 -DDD, 4,4 -DDE, 4,4 -DDT, chlordane, and dieldrin. The detected concentrations of the OCPs were below California Human Health Screening Levels (CHSSLs) for a residential scenario (2.3, 1.6, 1.6, 0.43, and 0.35 milligrams per kilogram [mg/kg], respectively). The analytical results for arsenic and lead were compared to their respective CHHSLs (0.07 and 80 mg/kg). The analytical method detection limit for arsenic (1.0 mg/kg) exceeded its CHHSL (0.07 mg/kg). However, detected arsenic concentrations detected for the samples did not exceed 7.6 mg/kg and were within background levels observed in San Diego County. Lead concentrations detected for the samples did not exceed its CHHSL (80 mg/kg). Based on the Phase II investigation findings, Stantec concluded that OCPs, arsenic, and lead detected in soil at the property do not pose a human health concern and recommended no further action at the property. DEH concurs with this recommendation.

Site History:	This case was opened to evaluate and remediate pesticides at this site. The site consists three single-family residences that are currently unoccupied. The site will be developed to include 10 residences. On September 2015, nine shallow soil samples were taken which indicated trace pesticide levels that were below Regional Screening Levels (RSLs) and Human & Ecological Risk Office (HERO) levels. Arsenic (As) levels were above RSLs and HERO but are below the Regional Background Levels of 12 mg/kg As. Additional pesticide and As samples were requested from areas of potential contamination (storage sheds, mixing areas, greenhouses, etc.) In addition, areas of equipment and vehicle maintenance or fuel storage were sampled for Total Petroleum Hydrocarbons (TPH). An area containing a used car

HYMETTUS ESTATES (Continued) **S119777552**

battery was sampled for lead (Pb). These areas were sampled March 14, 2017. Pesticide results were also below RSLs, HERO and background As. TPH samples were all Non Detect (ND). The Pb sample was 2.3 mg/kg which is below the HERO level of 80 mg/kg for Pb. Based on the results of the September 2015 and March 2017 sampling results, the consultant concludes that workers and future residents will not be exposed to Chemicals of Concern (COCs) at concentrations that present a human health risk. DEH concurs.

Site History: This Voluntary Assistance Program case was opened in April 2021 to evaluate soil impacts from organochlorine pesticides (OCPs) for three properties which, along with the adjoining property located at 556 Union Street (former VAP case DEH2014-LSAM-000225), will be developed into a multi-family apartment community consisting of 199 rental apartment homes. Two of the properties, 672 Clark Avenue (APN 256-171-13-00), and 682 Clark Avenue (APN 256-171-14-00) are currently occupied by single-family residences. The third property (APN 256-171-15-00) is a vacant lot that was used for storing landscaping materials, primarily decorative rocks and other inert materials. From 1939 until the 1950 s the Site was occupied by an avocado orchard. As a result of the previous agricultural use of the property, surficial soils were assessed to determine whether OCPs, and/or the metals arsenic and lead were present at levels that might present a human health concern. The consultant, Blackstone Consulting Inc. (Blackstone), oversaw the collection of 32 soil samples from 16 sampling locations at depths of 0.5 to 1.0 foot and 2.5 to 3.0 feet below the ground surface (bgs). An April 16, 2021 Limited Site Investigation (LSI) Findings report detailed the soil sampling results for OCPs, lead, and arsenic. Arsenic levels were below the California regional background level of 12 mg/kg and lead was below the SF-RWQCB Environmental Screening Level (ESL) of 80 mg/kg for residential land use. Levels of OCPs were all non-detect (ND) with the exception of trace amounts of DDE, DDT, and dieldrin that were below their respective residential ESLs. Based on this, Blackstone concluded that OCPs, arsenic, and lead detected in soil at the property do not pose a human health concern and recommended no further action at the property. DEHQ concurs with this recommendation.

Site History:	: A 2.4-acre property located between Interstate 5 and Saxony Road in Encinitas, California, is currently slated for development as a residential subdivision. The property, which adjoins the north side of Union Street, is comprised of three parcels forming a T-shaped configuration. Historical aerial photographs indicate past

PROPOSED UNION STREET SUBDIVISION (Continued) **S116290483**

agricultural use of the property from at least 1939 to 2014. The property was most recently occupied by a flower growing operation and nursery. Greenhouses were constructed in portions the north central portion of the property beginning in 1974, and were apparently expanded westward over the years. County aerial photographs indicate that the greenhouses had been demolished by approximately 2007. The only structure remaining on the property in 2013 was a well/pump house, which formerly served as a source of irrigation water. A Voluntary Assistance Program case (#DEH2014-LSAM-000219) was opened for the property in early 2014 following detection of organochlorine pesticides (OCPs) during a July 2013 Phase II Environmental Site Assessment (ESA). Six borings had been advanced on the property. Soil samples were collected from the borings at depths of 0.5-foot and 1.5-feet below ground surface (bgs). The OCPs chlordane and toxaphene were detected in one or more samples at concentrations that exceeded their respective residential California Human Health Screening Levels (CHHSLs) of 430 and 460 micrograms per kilogram (g), respectively. A second Phase II ESA was performed in October 2013 to further characterize the lateral and vertical extents of OCPs in soil. Sixty soil samples were collected from 20 borings advanced to a maximum depth of 2.5 feet bgs. Forty of the samples were analyzed for OCPS, and the sample with the highest total OCP concentration was also tested for organophosphorous pesticides, chlorinated herbicides, and Title 22 metals. Eight OCPs were detected in the soil samples, including, in order of decreasing frequency, 4,4 -DDE, 4,4 -DDT, 4,4 -DDD, chlordane, toxaphene, heptachlor epoxide, dieldrin, and endrin. Toxaphene concentrations in four samples collected at depths of one foot or less exceeded its residential CHHSL. Organophosphorous pesticides and chlorinated herbicides were not detected in the sample analyzed, and concentrations of Title 22 metals were in the range of background levels. The property was sold in 2014 and a new VAP case (DEH2014-LSAM-000256) was opened for mitigation of the OCP-impacted soils. A remedial action plan (RAP) was submitted to DEH that proposed excavation of soil in areas of the site where toxaphene was detected at concentrations exceeding its CHHSL and disposal at an appropriately-licensed landfill. DEH approved the RAP on September 10, 2014. Approximately 396 cubic yards of OCP-impacted soil was removed from four excavations with a maximum depth of 2.5 feet on the property from March 4 to 17, 2015. The excavated soil was direct-loaded onto trucks for off-site transport and disposal. Confirmation samples were collected from the base and sidewalls of each excavation. The CHHSL for toxaphene was exceeded in one confirmation sample collected from the eastern sidewall of Excavation #3. The sidewall was extended 6 feet to the east. A second confirmation sample was collected with a toxaphene concentration well below its CHHSL. Based on the removal of the OCP-impacted soils, an estimated depth of greater than 100 feet to groundwater beneath the property, and the lack of a human health threat, the consultant concluded that the property is suitable for residential development and has recommended no further action and case closure. DEH concurs with these recommendations.

Comments:	Pursuant to the MOU, DTSC has prepared a Phase I Environmental Assessment for the North County Health Services (NCHS) - Encinitas Clinic. The subject property, owned and operated by NCHS, contains a two-story building housing an existing health clinic. No change in use is being proposed. A Phase I Report was prepared by DTSC and concluded that no action was needed for this property; there is no contamination on the property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database
EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

PAUL ECKE CENTRAL ELEM SCH
185 UNION STREET
ENCINITAS, CA 92024

TARGET PROPERTY COORDINATES

Latitude (North):	33.05741 - 33° 3' 26.68''
Longitude (West):	117.297052 - 117° 17' 49.39''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	472268.0
UTM Y (Meters):	3657499.2
Elevation:	83 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005760 ENCINITAS, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

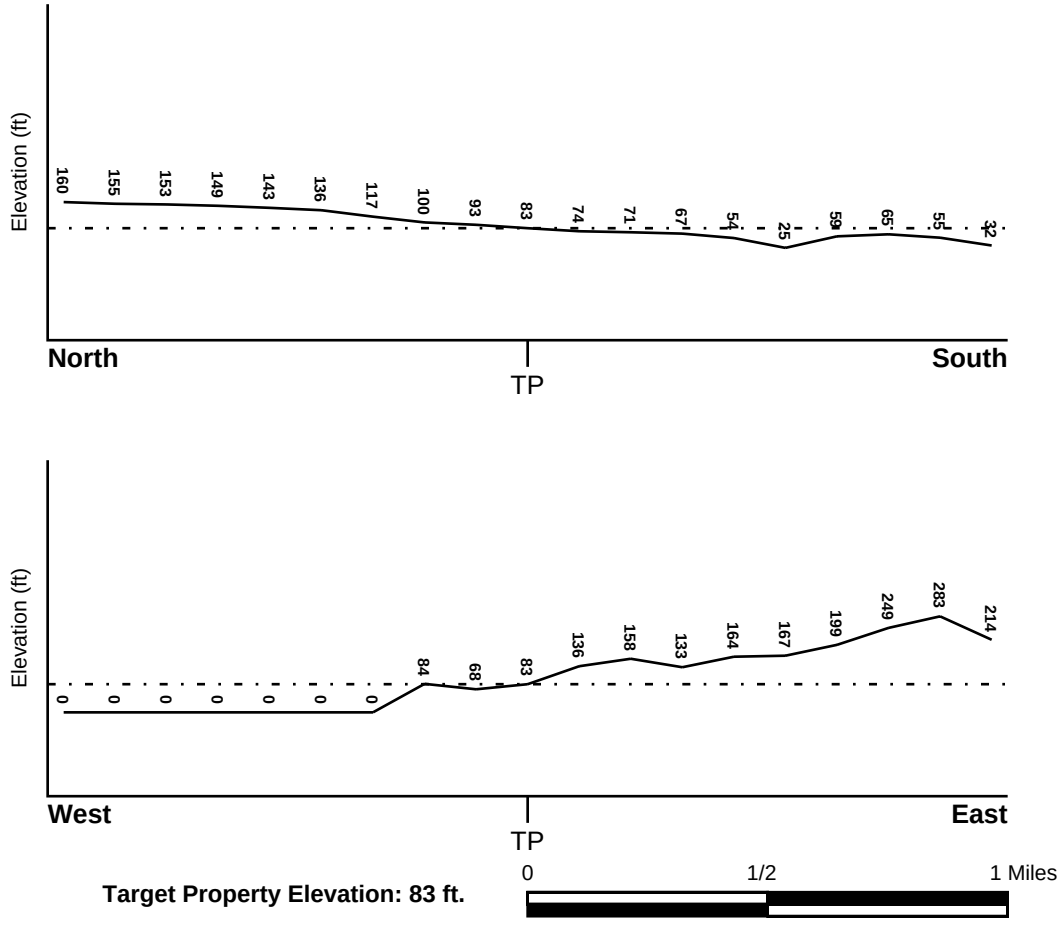

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 83 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C1045G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06073C1030G	FEMA FIRM Flood data
06073C1035G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ENCINITAS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/2 - 1 Mile SSE	W
A6	1/2 - 1 Mile SE	Varies
1G	1/2 - 1 Mile SE	Varies
2G	1/2 - 1 Mile SSE	W

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MARINA

Soil Surface Texture: loamy coarse sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	9 inches	57 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
3	57 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: MARINA

Soil Surface Texture: loamy coarse sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	9 inches	57 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
3	57 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

Soil Map ID: 3

Soil Component Name: CARLSBAD

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	20 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	Not reported	Max: Min:	Max: Min:
2	20 inches	35 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	Not reported	Max: Min:	Max: Min:
3	35 inches	50 inches	indurated	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	Not reported	Max: Min:	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

APPENDIX G

QUALIFICATION OF THE ENVIRONMENTAL ASSESSORS

ENVIRONMENTAL ASSESSOR QUALIFICATIONS

The environmental professionals responsible for conducting or reviewing this Phase I ESA and preparing the report include:

Alan J. Klein, R.E.P.A., C.P.E.S.C., QSD/QSP, is a ..... Senior Environmental Scientist with Padre Associates, Inc. He holds a Bachelor of Arts degree in Environmental Studies and Planning from California State University, Sonoma, 1985. Mr. Klein obtained a Professional Certificate in Hazardous Materials Management from the University of California, Santa Barbara in 1992. Mr. Klein is a Registered Environmental Property Assessor; a Certified Professional in Erosion and Sediment Control; and a State of California Qualified SWPPP Developer and Practitioner. Mr. Klein has over 25 years of professional experience performing Phase I environmental site assessments; soil and groundwater assessments; soil and groundwater remediation projects; preliminary endangerment assessments (PEAs); removal actions; risk assessments; preparation and implementation of Storm Water Pollution Prevention Plans (SWPPPs).

Alan Churchill, P.G., is a Senior Geologist with Padre Associates, Inc. He holds a Bachelor of Science degree in Geology and a Minor Degree in Hydrologic Science from the University of California, Davis, March 1996. Mr. Churchill has 20 years of professional experience performing soil, groundwater, and soil gas investigation/remediation projects, underground storage tanks (USTs) removal projects, well abandonments, and soil/ groundwater modeling (environmental fate transport). His responsibilities include specification of project scope, regulatory agency negotiation and compliance, proposal and workplan preparation, field investigation, documentation, risk assessments, and reporting.

DECLARATION

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional*, as defined in §312.10 of 40 CFR §312. I have specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Additionally, the subject Phase I ESA has been performed in conformance with the scope and limitations of ASTM Practice E1527-21.
