Project Description (Proposed actions, location, and/or consequences).

The Regional Transportation Plan/Active Transportation Plan (RTP/ATP) is a transportation planning document prepared by the Lake Area Planning Council. The Plan provides a vision of regional transportation goals, policies and objectives for all modes of travel, including local streets and roads, State highways, public transit, bicycle, pedestrian and aviation. It assesses current transportation, identifies needs and problems, and suggests actions to solve these problems and improve transportation throughout the region. The plan also considers financing options in relation to projects discussed within the plan.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

In preparing the Initial Study for the project, it was determined that the project would not result in any significant or potentially significant effects on the environment. No mitigation measures are required.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No areas of controversy have been made known to the Lead Agency at this time.

Provide a list of the responsible or trustee agencies for the project.

The Lake Area Planning Council (APC), in its role as the Regional Transportation Planning Agency (RTPA), has the sole authority for approving the project. No other State agency approvals are necessary. The Department of Fish and Wildlife would be considered a Trustee Agency.
