Project Title: Moreno Valley Regional Water Reclamation Facility Plant 2A Rehabilitation Project
Project Location: 17140 Kitching Street
City: Moreno Valley
County: Riverside

Description of Nature, Purpose, and Beneficiaries of Project:

Eastern Municipal Water District (EMWD) operates Moreno Valley Wastewater Reclamation Facility (MVRWRF), which has two secondary treatment plants, Plant 1 and Plant B. Basin 2A at Plant 2 is in need of structural, safety, mechanical, and electrical improvements to continue with reliable operation.

The scope of the proposed project includes: rehabilitation of the aeration basins and secondary clarifiers 1 and 2; modifications to the existing influent pump station; installation of new buried and overhead pipes to convey process flows to the facilities and structures; site civil improvements; associated electrical, instrumentation, and control system modifications; and control integration services.
Beneficiaries of the project are MVRWRF staff and EMWD ratepayers.

Public Agency Approving and Carrying Out Project: Eastern Municipal Water District

Exempt Status:

☑ Categorical. 15301(b)

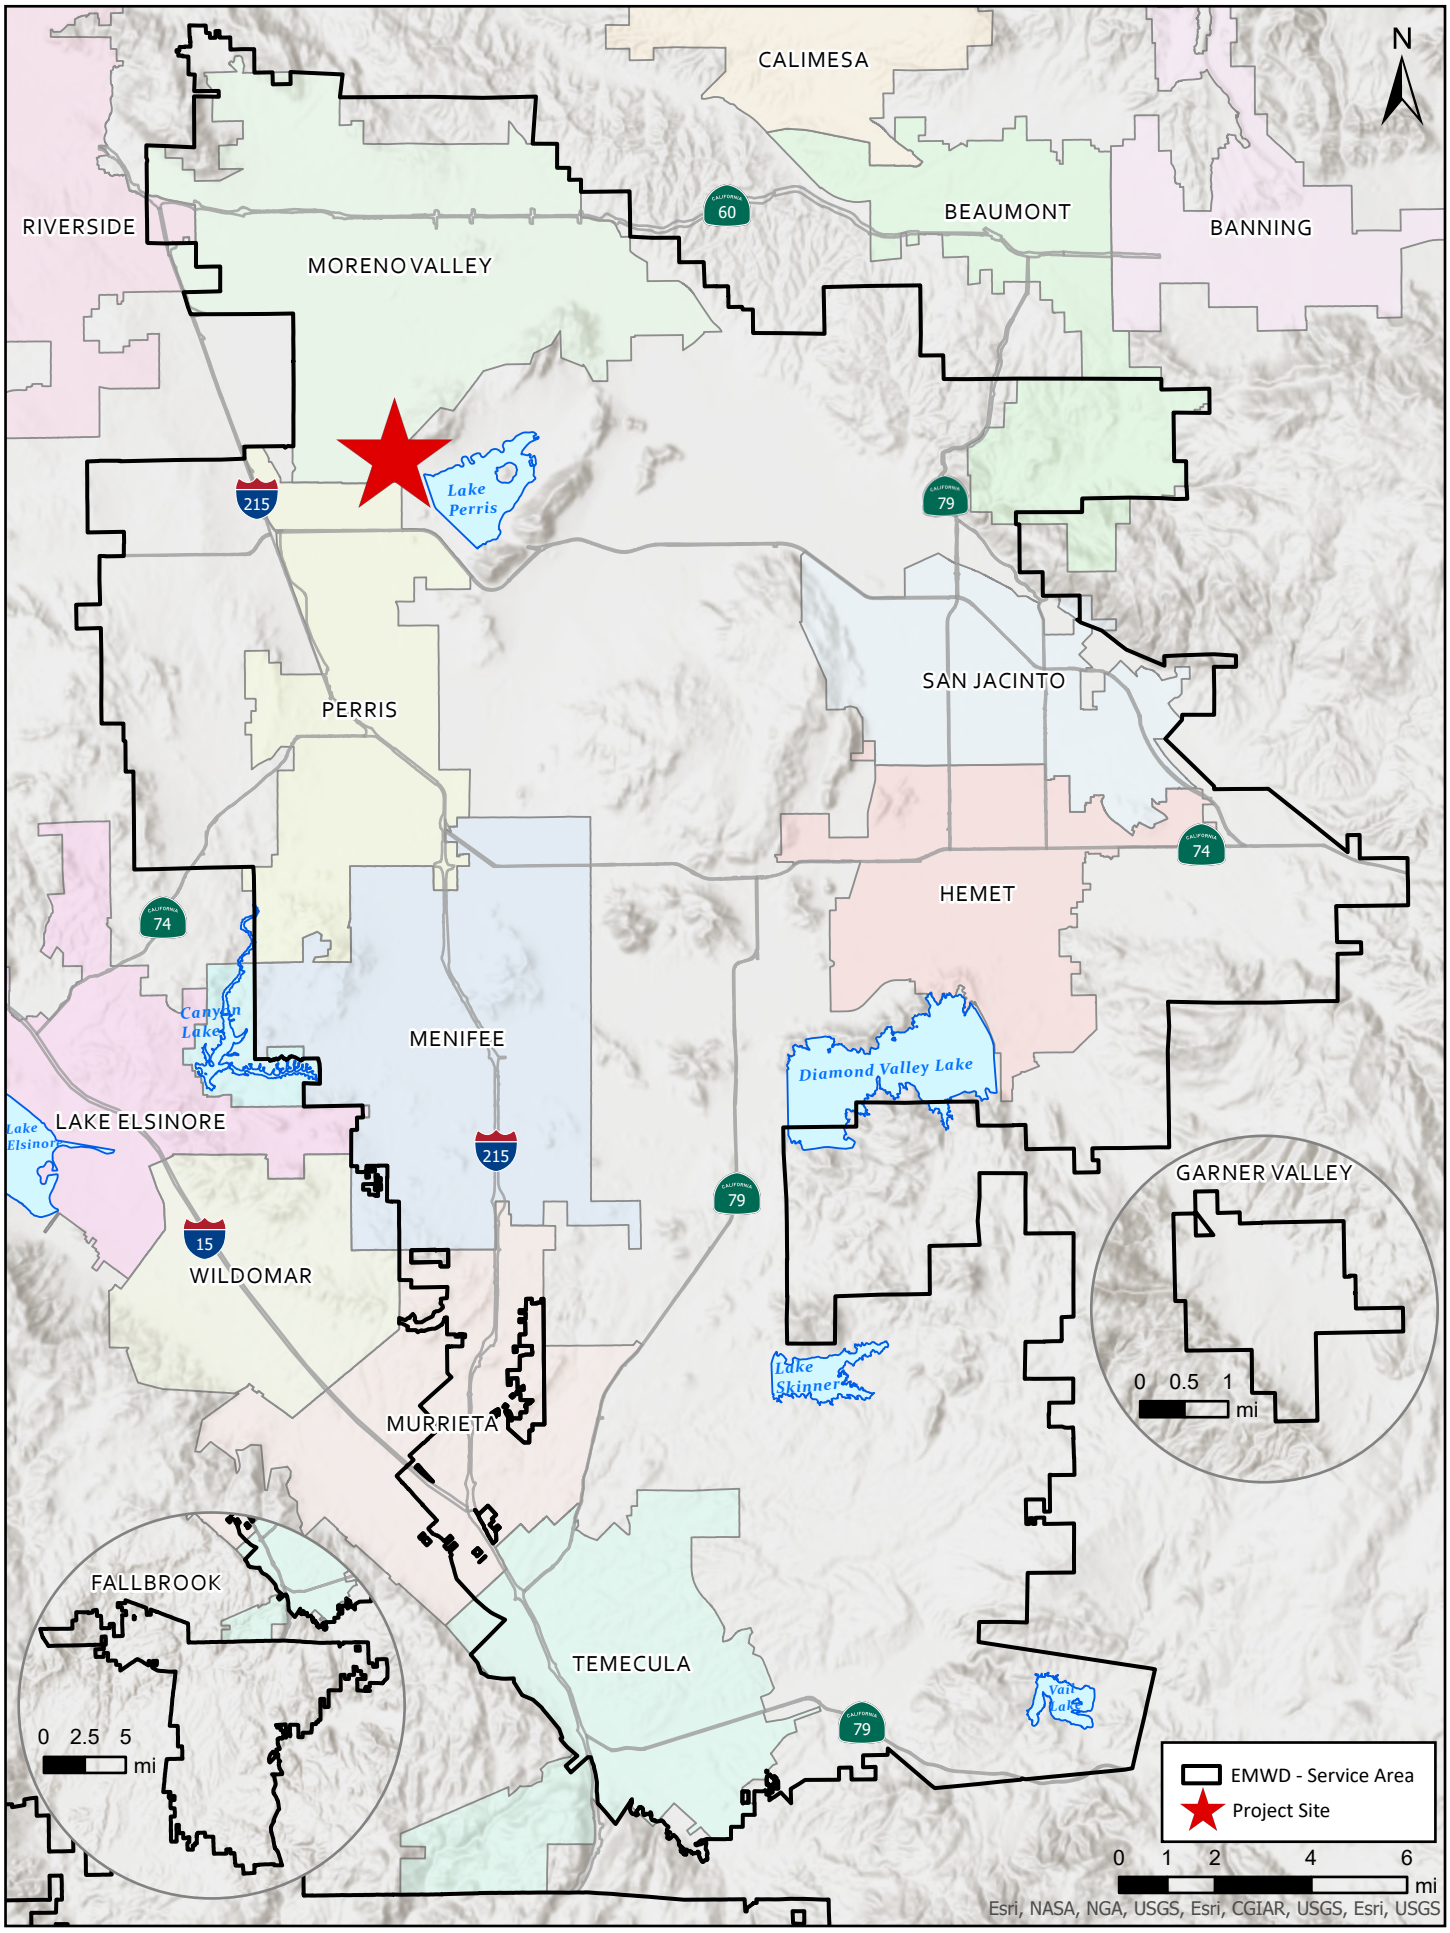

Reasons why project is exempt:

Implementation of the project would result in the minor alteration of an existing facility with no expansion to the existing use and public utility service provided. The proposed project would rehabilitate the existing Plant 2A in MVRWRF and would not increase the capacity of the plant or the facility.
