

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Cardinal Road Levee Upgrade Project

Lead Agency: Marin County Flood Control and Water Conservation District

Contact Name: Kyra Purvis

Email: kyra.purvis@marincounty.gov

Phone Number: 4154736378

Project Location: Unincorporated Town of Tamalpais Vally, Marin County

City

County

Project Description (Proposed actions, location, and/or consequences).

The Project aims to address chronic seepage issues associated with Coyote Creek and tidal water coming from Richardson Bay by constructing a new steel sheet pile floodwall with a height extending 3 feet above the existing floodwall along an approximately 1,100-foot segment of the Cardinal Road levee. The project also includes installing a new storm drain system, removing concrete drain boxes, and replacing a culvert.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant effects on air quality (cumulatively considerable net increase in criteria pollutants and exposure of sensitive receptors) are mitigated to less than significant by fugitive dust control, hybrid and cleaner fuel construction vehicles, and limits on vehicle idling.

Potentially significant effects on biological resources (sensitive species, sensitive communities, and wetlands) are mitigated to less than significant by rare plant surveys, buffers, and replacement plantings if unavoidable; nesting bird surveys; California black rail and Ridgway's rail surveys; work windows; resource agency permits; and BMPs.

Potentially significant effects on cultural resources and tribal cultural resources archaeological resources and significant tribal cultural resources) are mitigated to less than significant by accidental discovery and human remains protocols in place, including work stoppage until proper parties are contacted and potential resource evaluated.

Potentially significant effects on utilities (new/expanded storm drain facilities) are mitigated to less than significant with the mitigation measures listed above.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None known.

Provide a list of the responsible or trustee agencies for the project.

US Army Corps of Engineers
US Fish and Wildlife Service
California Department of Fish and Wildlife
San Francisco Bay Regional Water Quality Control Board
