Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Reservoir 6 and Almond St Waterline Replacement Project

Lead Agency: Cucamonga Valley Water District

Contact Name: Jiwon Seung

Email: Jiwons@CVWDwater.com Phone Number: (909) 987-2591

Project Location: Rancho Cucamonga (*City*) San Bernardino (*County*)

Project Description (Proposed actions, location, and/or consequences).

The Cucamonga Valley Water District (CVWD) has proposed the replacement of a dual 14-inch and 16-inch waterlines across a seasonal drainage within the city of Rancho Cucamonga, San Bernardino County, California. The new waterlines will connect into the existing waterlines at a western connection point located between a residential development and the seasonal drainage. The eastern connection point along the hiking trail is situated approximately 50 feet above the drainage bottom.

The proposed alignment spans approximately 800 linear feet, beginning at the western connection point and extending north within a newly established easement. It then turns east to cross the seasonal drainage and then continues south along the hiking trail to terminate at the eastern connection point. The Proposed Project includes abandonment of approximately 300 linear feet of 14-inch and 16-inch waterlines which extend from the western connection point to the eastern connection point directly across the drainage.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The results of the Initial Study show that there are potentially significant impacts to Biological Resources and Cultural Resources. These impacts will be reduced to less than significant levels after incorporation of Biological Resources mitigation measure BIO-1 CDFW current recommendations for nesting bird surveys, and Cultural Resources mitigation measures CUL-1 CUL-2, and CUL-3 as well as compliance with existing rules and regulations. Also, no Tribal Cultural Resources (TCRs) were identified within the project area during AB 52 consultation. The Proposed Project would not result in significant impacts to known TCRs. However, as a result of AB 52 consultation the Tribes identified a potential for the discovery of unknown TCRs during construction, which may result in a significant impact if such resources are found and affected. Impacts to unknown TCRs would be less than significant with the implementation of Mitigation Measures TCR-1 through TCR-5. The Project Site has a high concentration of vegetation. Therefore, there is a high potential to indirectly cause wildfire during construction. As such, implementation of Mitigation Measure HAZ-1 that requires the contractor to implement fire protection protocols during construction, such as equipment maintenance and the suspension of welding during certain Santa Ana wind conditions, to reduce potential impacts to less than significant

Through incorporation of design measures, County policies, standards, and guidelines indicates there shall be no substantial adverse effects on human beings, either directly or indirectly. No such impacts have been identified by the studies conducted for this Project that cannot be mitigated.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No issues or controversy have been raised due to the Project proposal, by any state or local agency or members of the public.

Provide a list of the responsible or trustee agencies for the project.

State Water Resources Control Board, Division of Drinking Water
California Regional Water Quality Control Board, Santa Ana Region
City of Rancho Cucamonga Public Works and Engineering Departments
