Public/Public Facilities

Project Description: *(please use a separate page if necessary)*

T-TSA is proposing improvements to their process and comfort heating facilities at their Water Reclamation Plant (WRP). The existing steam boilers have reached the end of their useful life and require replacement. T-TSA is proposing to replace the existing steam boilers with a new heating and energy recovery system that is more efficient and reliable, reduces long-term O&M, and provides flexibility to accommodate future demands and processes. The project would include new hydronic boilers, a new boiler building, a new access road, new digester gas conditioning equipment for the new boiler system, and replacement of existing facilities associated with the existing process and comfort heating system, including piping systems, electrical equipment, and instrumentation and controls.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "**X**".
If you have already sent your document to the agency please denote that with an "**S**".

X	Air Resources Board	X	Office of Historic Preservation
	Boating & Waterways, Department of		Office of Public School Construction
