Chino ALUCP Consistency Analysis Summary

The proposed project is located within the Airport Influence Area of Chino Airport (CNO) and was evaluated and found to be consistent with the policies and criteria of the Airport Land Use Compatibility Plan (ALUCP) for CNO.

The properties along Eucalyptus will be changed from Mixed-use and medium density residential to Business Park. These properties are located within Safety Zones 4 and 6. The proposed Business Park land use designation is a consistent use within CNO Safety Zones 4 and 6.

The properties along Grove Avenue will be changed from mixed-use and open space recreation to medium density residential and open space recreation. These properties are located within Safety Zone 6. The proposed medium density residential and open space recreation land use designation is a consistent use within CNO Safety Zone 6.

Chino ALUCP Consistency Analysis Summary

The proposed project is located within the Airport Influence Area of Chino Airport (CNO) and was evaluated and found to be consistent with the policies and criteria of the Airport Land Use Compatibility Plan (ALUCP) for CNO.

There are few properties located between Edison Avenue to the north and Eucalyptus Avenue to the south that are located within Chino Safety Zones 4 and 6.

ONT ALUCP Consistency Analysis Summary

The proposed project is located within the Airport Influence Area of Ontario International Airport (ONT) and was evaluated and found to be consistent with the policies and criteria of the Airport Land Use Compatibility Plan (ALUCP) for ONT.

There are two areas where the proposed land use changes are being proposed which include Area A (Holt/Grove) and Area B (Ontario Ranch) as outlined in the Vicinity Map.

ONT ALUCP Consistency Analysis Area A - Holt Grove Properties Allowable Heights Map

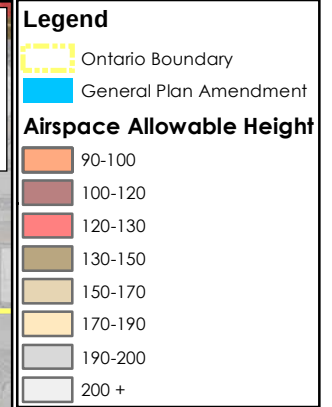

ONT ALUCP Consistency Analysis Summary

The Project parcels within Area A are located west of ONT in an area where the allowable building heights range between 15 to 120 feet. Any future development or structures will be required to be less than the allowable height ranges. Any future development that exceeds the allowable height would require FAA approval. Also, the proposed general plan land use changes do not include the construction of any structures. Therefore, the proposed general plan amendment will not result in penetrating the allowable heights as defined by Policy Map 2-4 or have the potential to create an electrical or visual hazard to aircraft in flight.

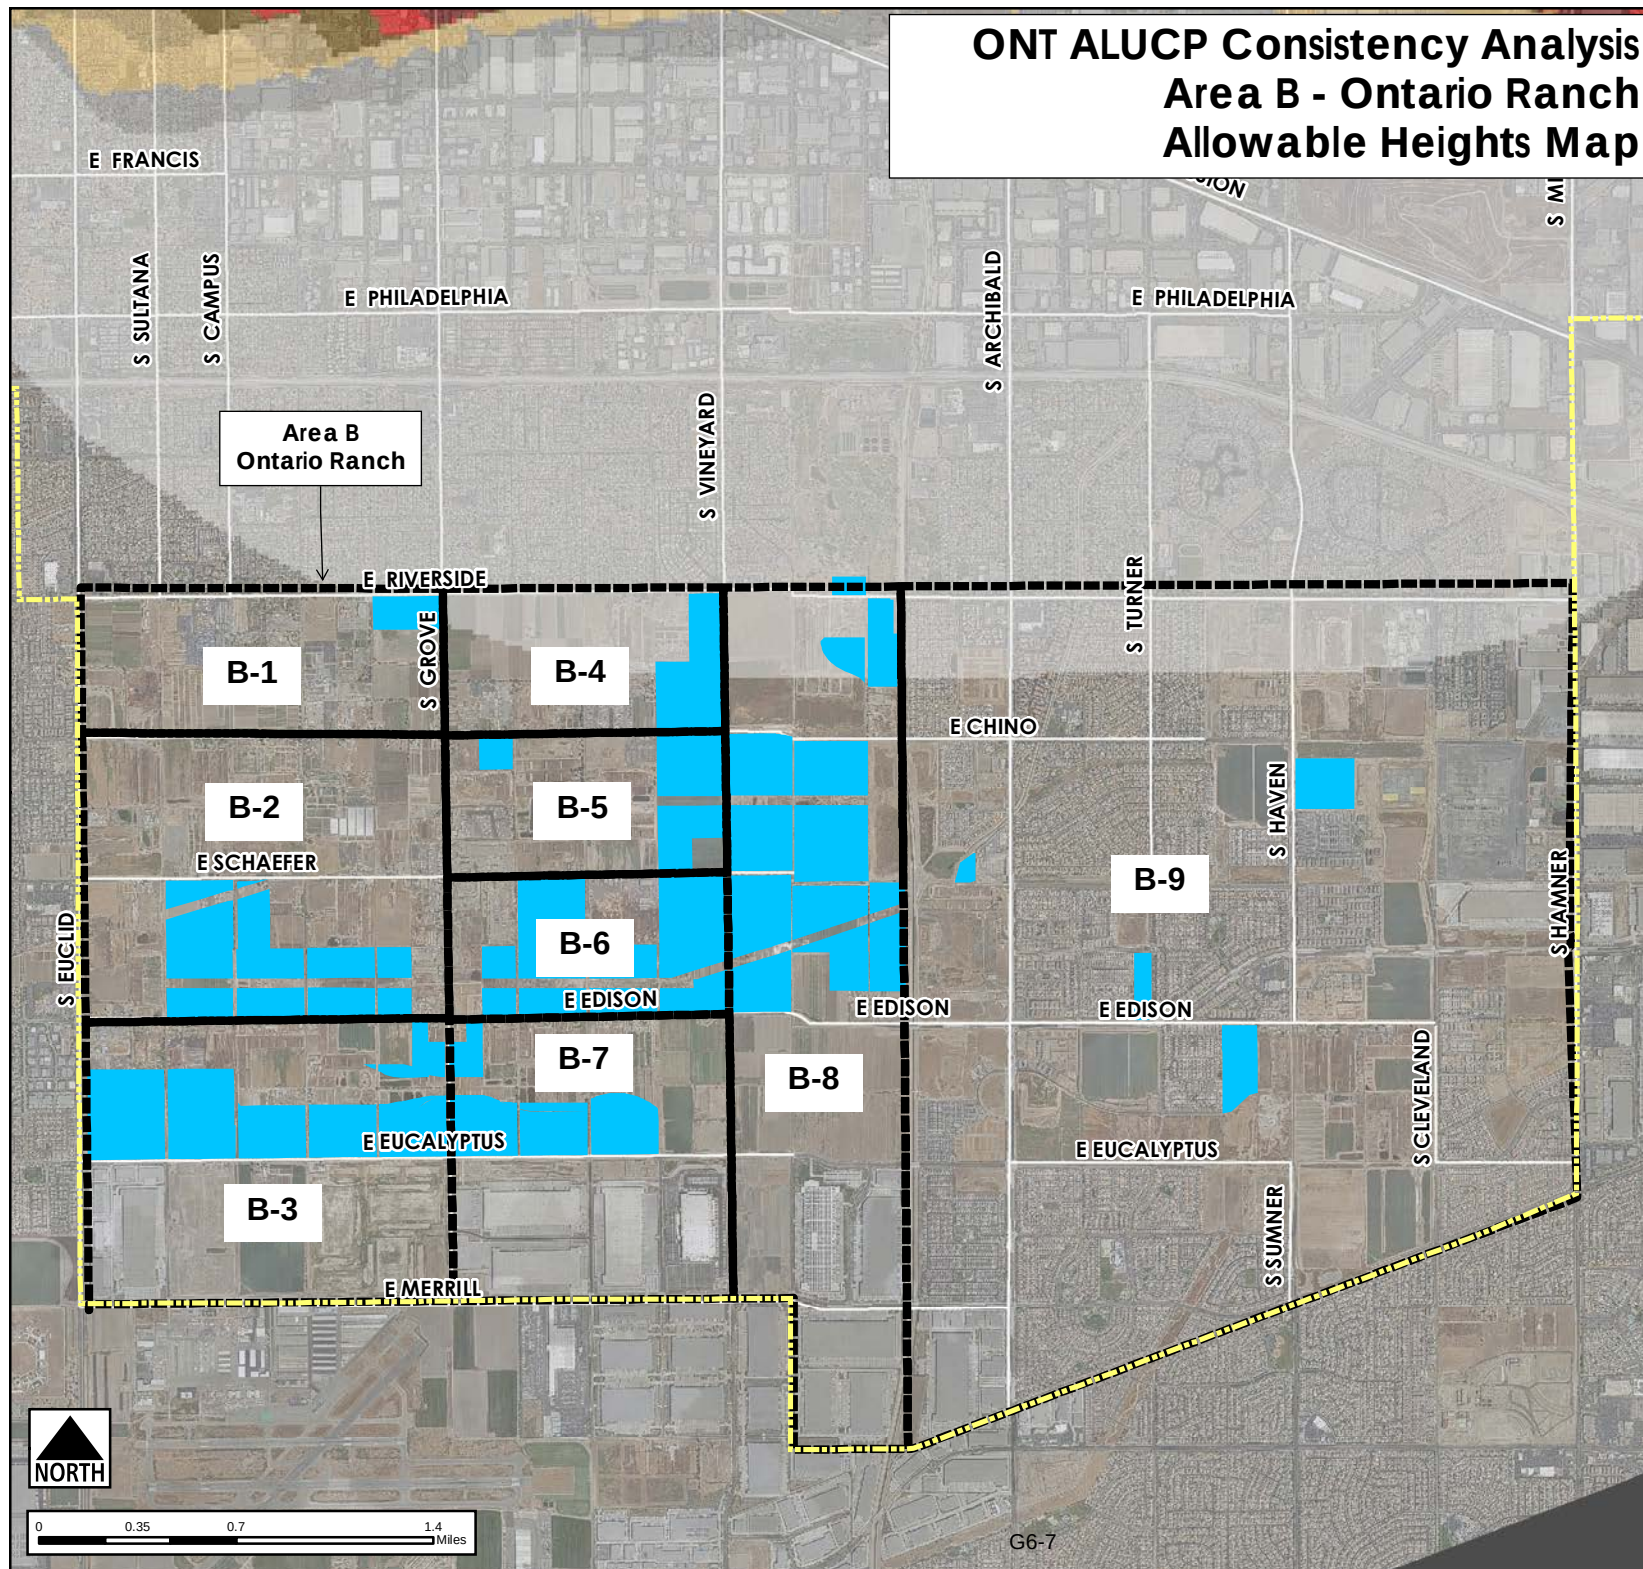

ONT ALUCP Consistency Analysis Area B - Ontario Ranch Allowable Heights Map

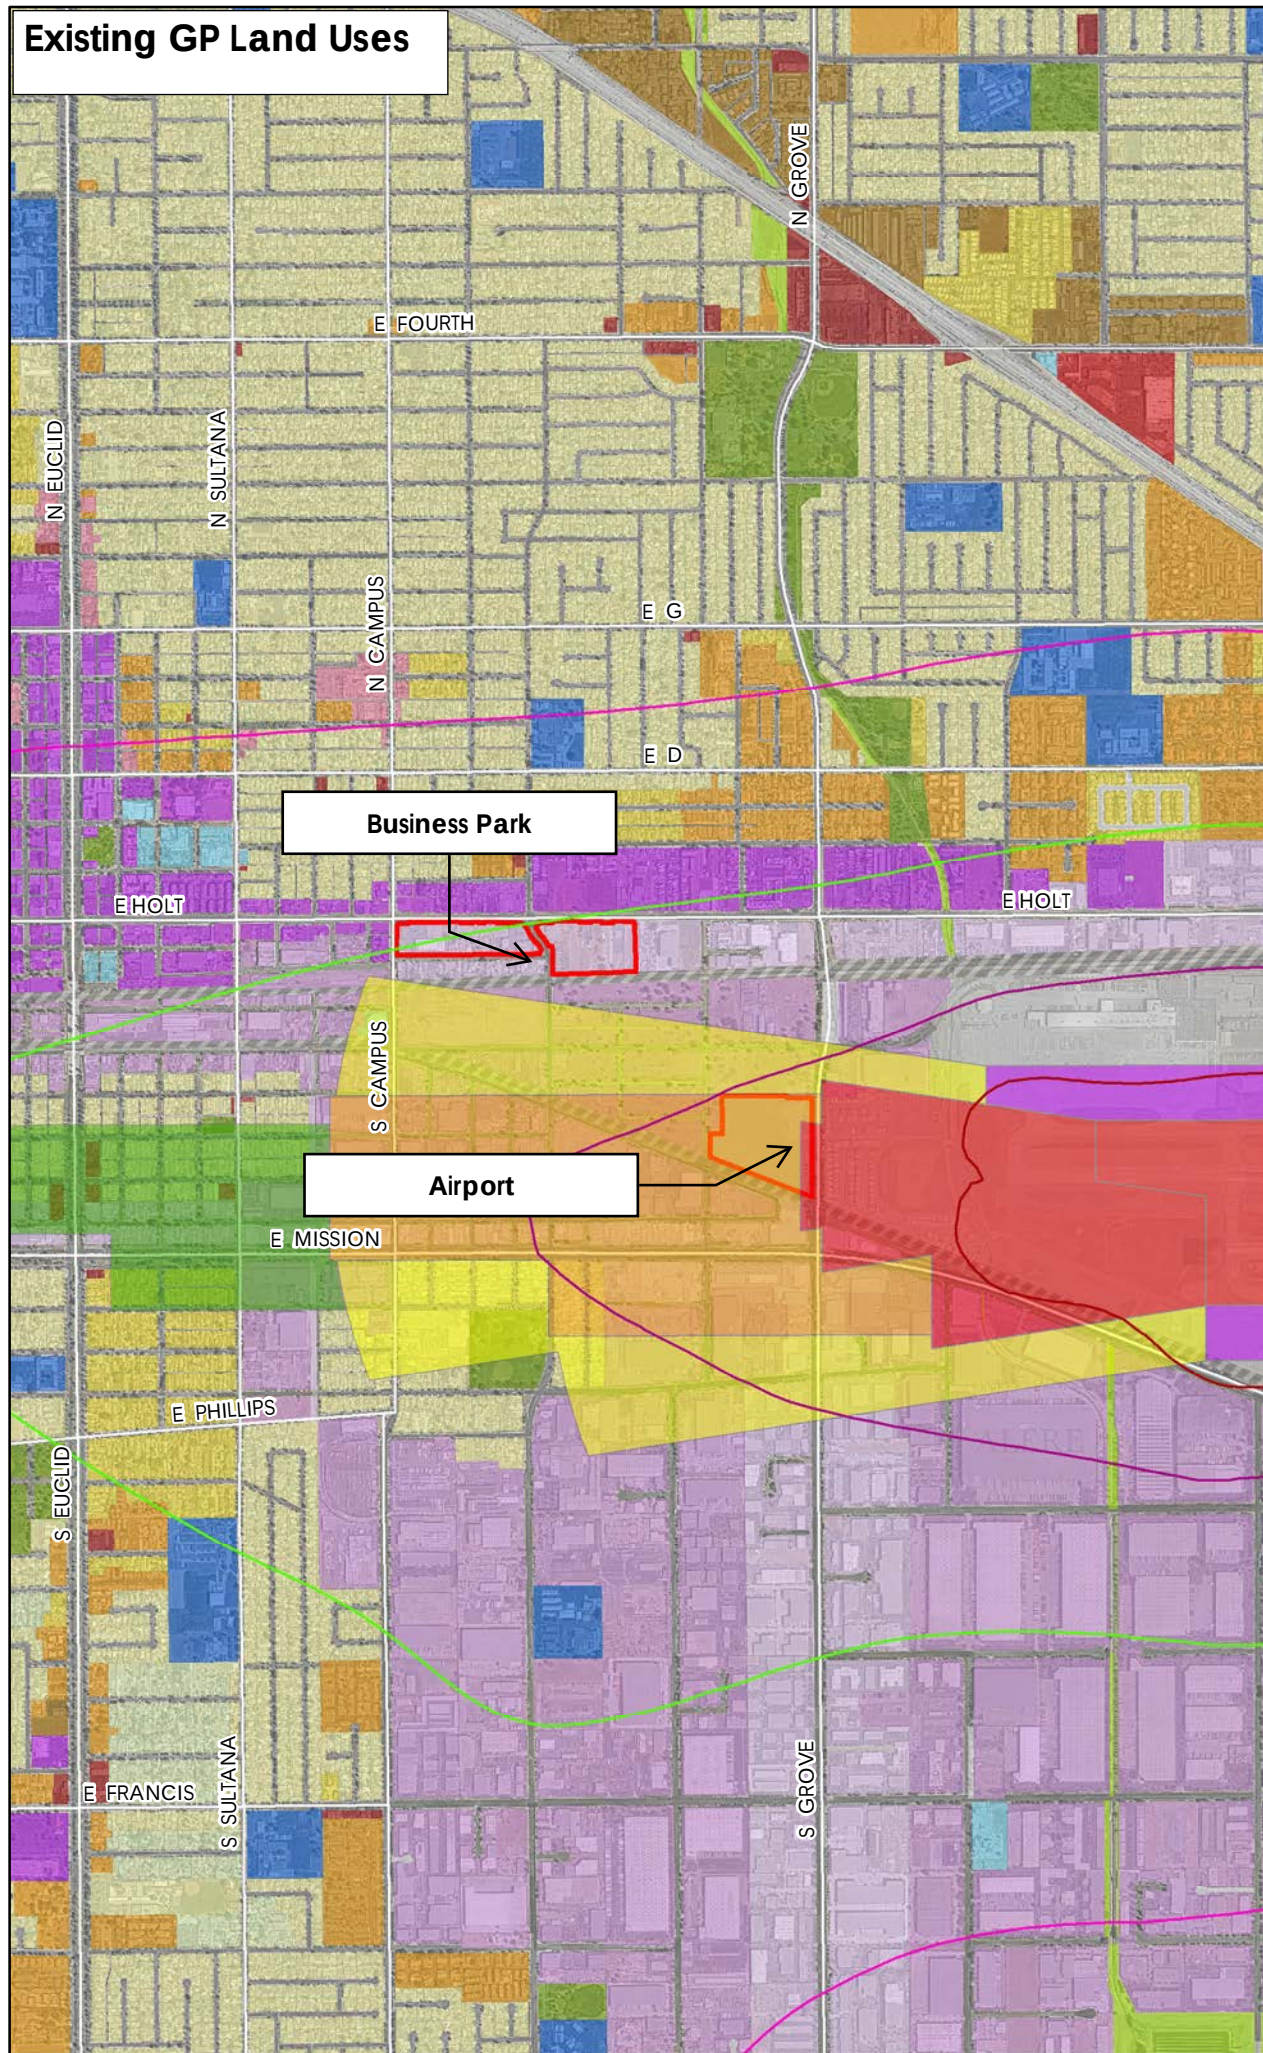

ONT ALUCP Consistency Analysis Summary

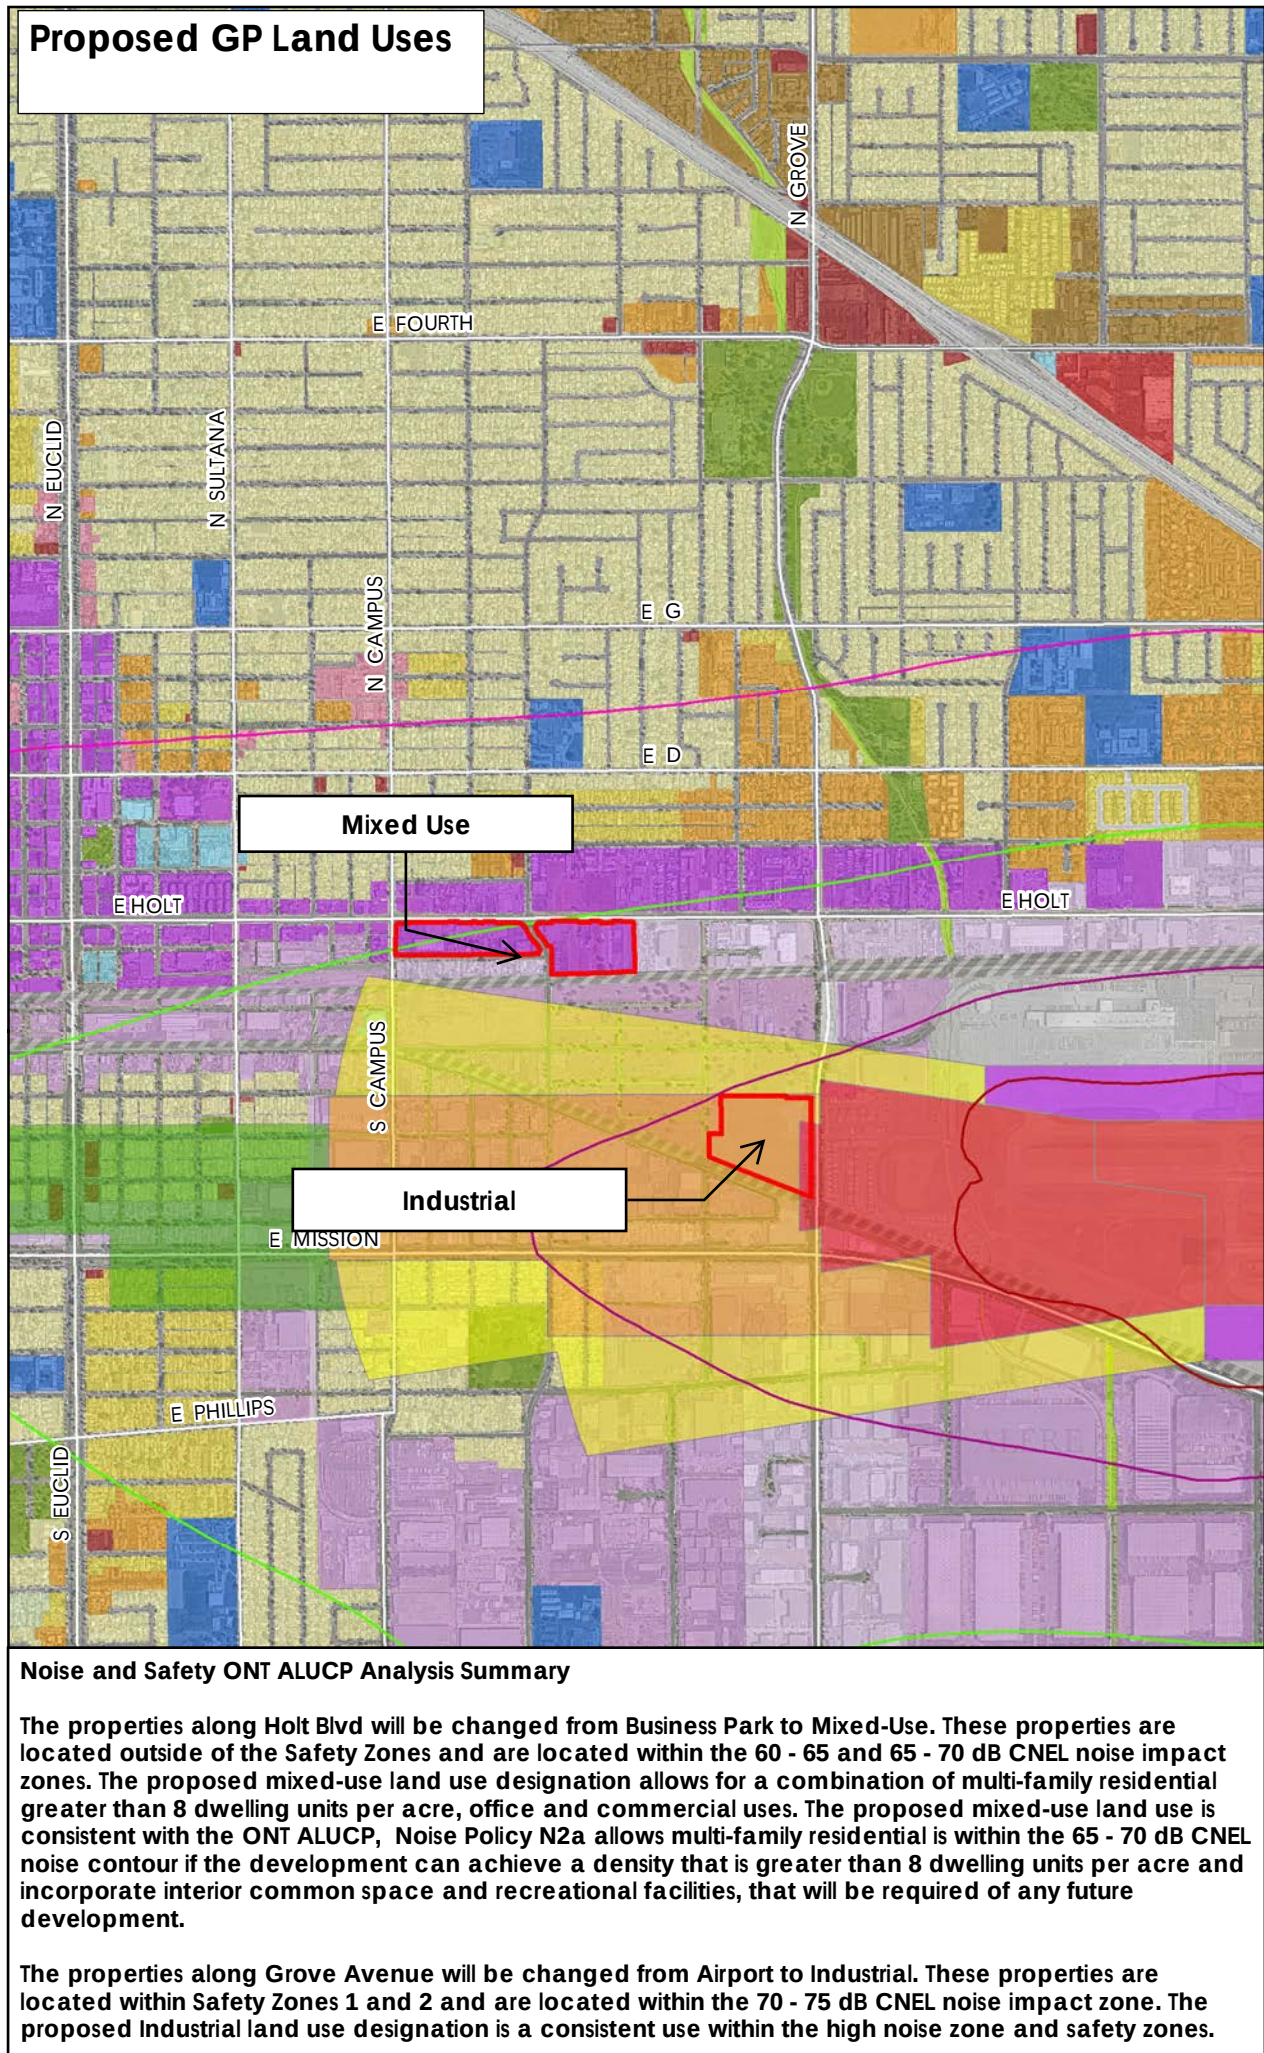

The Project parcels within Area B are located **south** of ONT in an area where the allowable building heights are over 200 feet. Any future development or structures will be required to be less than the allowable height. Any future development that exceeds the allowable height would require FAA approval. Also, the proposed general plan land use changes do not include the construction of any structures. Therefore, the proposed general plan amendment will not result in penetrating the allowable heights as defined by Policy Map 2-4 or have the potential to create an electrical or visual hazard to aircraft in flight.

Existing GP Land Uses

Proposed GP Land Uses

Noise and Safety ONT ALUCP Analysis Summary

The properties along Holt Blvd will be changed from Business Park to Mixed-Use. These properties are located outside of the Safety Zones and are located within the 60 - 65 and 65 - 70 dB CNEL noise impact zones. The proposed mixed-use land use designation allows for a combination of multi-family residential greater than 8 dwelling units per acre, office and commercial uses. The proposed mixed-use land use is consistent with the ONT ALUCP, Noise Policy N2a allows multi-family residential is within the 65 - 70 dB CNEL noise contour if the development can achieve a density that is greater than 8 dwelling units per acre and incorporate interior common space and recreational facilities, that will be required of any future development.

The properties along Grove Avenue will be changed from Airport to Industrial. These properties are located within Safety Zones 1 and 2 and are located within the 70 - 75 dB CNEL noise impact zone. The proposed Industrial land use designation is a consistent use within the high noise zone and safety zones.
