Project Title: CSA 70J Recoating of Tanks & Pump Stations Project

Project Location: This project is located at 7939 Opal Avenue, Hesperia, CA 92345.

Project Description: This project entails the external re-coating of the ten(10) existing water storage tanks, encompassing all requisite surface preparation, ancillary operations, and associated maintenance activities. The work will also include upgrading the existing liquid level indicator as required by Cal/OSHA and AWWA for these types of tank rehabilitation as well as minor booster pump building rehab. The project construction operations will be conducted solely within the tank facility, and no new disturbances to the land will occur. No traffic detours or nighttime construction are planned, and no utility relocation is anticipated. Our construction activities will be carefully managed, occurring on or adjacent to existing roads, asphalt, or graded and maintained dirt shoulders. This approach minimizes any potential environmental disruption, ensuring the project's impact on the community and its surroundings is kept to a minimum. Construction duration is anticipated for approximately 260 calendar days.
