Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: City of Ontario Water, Recycled Water, Sewer, and Drainage Master Plans Updates

Lead Agency: City of Ontario

Contact Name: Thomas Lambertson

Email: TLambertson@ontarioca.gov Phone Number: (909) 395-2774

Project Location: Ontario (*City*) San Bernardino (*County*)

Project Description (Proposed actions, location, and/or consequences).

The City of Ontario is updating four Utility Master Plans: Water Master Plan, Recycled Water Master Plan, Sewer Master Plan, and Drainage Master Plan. These updates build upon the previous plans adopted in 2012. The updated Master Plans propose: (1) upgrading pipelines and related infrastructure to support projected growth in Ontario (refer to Table 3.2-2); (2) replacing aging infrastructure that has reached the end of its service life; (3) expanding water storage capacity for both routine operations and emergency needs, and improving pressure throughout the water distribution system; (4) enhancing flood protection measures under the Drainage Master Plan; and (5) expanding the distribution of recycled water to increase its use citywide.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Biological Resources: project implementation would cause impacts on special-status species and on the City's tree protection and replacement ordinance. Mitigation measures include biological monitoring; surveys; burrowing owl protection measures; raptor protection measures; worker environmental awareness training; construction best management practices; project limits and designated areas; general vegetation and wildlife avoidance and protection measures; and compliance with tree protection ordinances of the cities of Ontario, Rancho Cucamonga, Upland, Chino; and San Bernardino County.

Cultural Resources: Project implementation may cause impacts to archaeological resources. Mitigation: monitoring; with recovery, identification, and curation of discovered resources.

Hazards and Hazardous Materials: Some of the proposed pipes and other improvements would be installed under soil known or likely to be contaminated. Mitigation: Sampling and Analysis Plan

Tribal Cultural Resources: Project implementation may cause impacts to tribal cultural resources. Mitigation: tribal monitoring; treatment and disposition of discovered resources at discretion of tribes.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No areas of controversy are known.

Provide a list of the responsible or trustee agencies for the project.

Trustee Agency: California Department of Fish and Wildlife
Responsible Agencies: Santa Ana Regional Water Quality Control Board
South Coast Air Quality Management District
